So Bakunin disagreed with Proudhon on many subjects. He did share Proudhon's support for industrial self-management, self-organisation in workers' associations, his hatred of capitalism and his vision of a decentralised, libertarian, federal, "from below" socialist society. It is true that, as McNally notes, *"Bakunin shared [Proudhon's] anti-semitism"* but he fails to mention Marx and Engels' many racist remarks against Slavs and other peoples. Also it is not true that Bakunin *"was a Great Russian chauvinist convinced that the Russians were ordained to lead humanity into [the] anarchist utopia."* Rather, Bakunin (being Russian) hoped Russia would have a libertarian revolution, but he also hoped the same for France, Spain, Italy and all countries in Europe (indeed, the world). He opposed the Russian Empire and he wished *"the destruction of the Empire of All the Russias"* and supported national liberation struggles of nationalities oppressed by Russia (and any other imperialist nation). [**The Basic Bakunin**, p. 162] Unlike Proudhon, he supported Polish National liberation although he recognised that *"its leading parties, which are still drawn primarily from the gentry. have been unable to renounce their state-centred program"* and hoped that the national movement would embrace economic change and seek the *"liberation and renewal of their homeland in social revolution"*. [**Statism and Anarchy**, p. 40]

McNally moves on to *"Bakunin's organisational methods"*, stating that they *"were overwhelmingly elitist and authoritarian."* This assertion completely misunderstands Bakunin's ideas on how revolutionaries should organise and influence working class organisations as well as the revolutionary process. Before turning to these, we must discuss Bakunin's views on social or-

ganisation as these indicate what his *"utopia"* (to use McNally's word) would be like and place his ideas on how anarchists should organise into context. If this is not done then Bakunin cannot be understood nor how later anarchists revised his ideas.

We must start by pointing out that Bakunin's viewpoints on the organisational methods of mass working class organisations and those of political groupings were somewhat different. As we show in section 9, Bakunin had what would now be termed a syndicalist position on the labour movement and so he rejected organising political parties and electioneering (*"political action"*) in favour of *"the development and organisation\85 of the social (and, by consequence, anti-political) power of the working masses as much in the towns as in the countryside."* [**Michael Bakunin: Selected Writings**, pp. 197–8] This was reflected in his ideas on social revolution as expressed in 1868:

> *"the federative Alliance of all working men's associations\85 will constitute the Commune ... by the creation of a Revolutionary Communal Council composed of one or two delegates\85 vested with plenary but accountable and removable mandates ... all provinces, communes and associations\85 [would send] their representatives to an agreed meeting place ... vested with similar mandates to constitute the federation of insurgent associations, communes and provinces\85 to organise a revolutionary force capable of defeating reaction\85 it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution ... Since revolution everywhere must be created by the people, and supreme control must always belong to the people organised in a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation"* [**Op. Cit.**, pp. 170–2]

How is this federation of workers councils based on elected, mandated and recallable delegates organised from the bottom-up *"elitist and authoritarian"*? Compare this to McNally's own words on the soviets of the Russian Revolution:

> *"The Russian revolution was based upon a wholly new kind of social organisation, the workers' council or soviet. These councils, based on elected delegates from the workplace and the neighbourhoods, became the new decision-making bodies of Russia. They were organs of direct democracy whose delegates, like those of the Paris Commune, could be recalled by the electors. The soviets represented a new form of mass democracy. It was for this reason that Lenin and Trotsky made the demand for 'All power to the soviets!' the central slogan of the Russian revolution."*

As noted in section 4, Proudhon had already raised the idea of recallable delegates in the 1848 revolution and it was his followers who applied them in 1871. Given McNally's praise of the Paris Commune and the Russian soviets, it seems strange that Bakunin's comments with regards to revolutionary social organisation with its obvious parallels to both should not be mentioned. Perhaps because to do so would totally undermine his case? Thus rather than being *"overwhelmingly elitist and authoritarian"* Bakunin's ideas on a future society have marked similarities to the actual structures created by working people in struggle and are marked by libertarian and self-managed visions and concepts — as anyone familiar with Bakunin's work would know.

The key difference between Bakunin and Lenin is that for the former turning the soviets into a state (even a so-called "workers' state") as desired by the latter would mean that power moved from the bottom to the top, empowering the few at the expense of the many. Given that Lenin's aim was the creation of a Bolshevik government it comes as no surprise that this *"central slogan"* of the revolution was quickly violated (see section H.1.7). As Bakunin once put it, there is the *"Republic-State"* and there is *"the system of the Republic-Commune, the Republic-Federation, i.e. the system of* ***Anarchism****. This is the politics of the Social Revolution, which aims at the abolition of the* ***State*** *and establishment of the economic, entirely free organisation of the people — organisation from bottom to top by means of federation."* [**The Political Philosophy of Bakunin**, p. 314] The difference is fundamental and not simply a question of words (see section H.2.1).

The question now arises of how Bakunin thought revolutionaries should influence both working class struggle and revolution. While not completely libertarian, Bakunin's ideas on this issue are different than McNally's summary would suggest.

The aim of the political grouping was to exercise a *"natural influence"* on the members of unions and associations, seeking to convince them of the validity of anarchist ideas. The political group did not aim to seize political power (unlike Marxists) and so it *"rule[d] out any idea of dictatorship and custodial control."* All it could do was to *"assist the birth of the revolution by sowing ideas corresponding to the instincts of the masses"* and act *"as intermediaries between the revolutionary idea and the popular instinct."* It *"help[s] the people towards self-determination on the lines of the most complete equality and the fullest freedom in every direction, without the least interference from any sort of domination."* [**Michael Bakunin: Selected Writings**, p. 172 and p. 191] The *"sole aim of a secret society must be, not the creation of an artificial power outside the people, but the rousing, uniting and organising of the spontaneous power of the people"*. It *"does not foist upon the people any new regulations, orders, styles of life, but merely unleashes its will and gives wide scope to its self-determination and social organisation, which must be created by itself from below and not above. The organisation must accept in all sincerity the idea that it is a servant and a helper, but never a commander, of the people, never under any pretext its manager, not even under the pretext of the people's welfare."* The secret society *"acts on the people only by the natural personal influence of its members who are not invested with any power"* and so this *"does not threaten the liberty of the people because it is free from all official character. It is not placed above the people like state power because its whole aim, defined by its programme, consists of the fullest realisation of the liberty of the people."* [quoted by Michael Confino, **Daughter of a Revolutionary**, p. 250, pp. 258–9 and p. 261]

As we discuss in more detail in section J.3.7, the key to understanding the role of Bakunin's secret societies is to recognise that rather than seek to be elected into positions of power, they would work within popular organisations at the base and argue their ideas and win others over to them (i.e., their *"natural personal influence"*). This is why Bakunin considered such organisations as being no danger to popular liberty — by not having power they could not force their ideas onto others, unlike a new state regime. All this is ignored by McNally.

McNally then quotes *"one historian"* on Bakunin. It should be noted that not even providing a name makes evaluating the accuracy of the historian's work impossible and so leaves the reader in the dark as to whether the historian does provide a valid account of Bakunin's ideas. However, after investigation the historian in question is George Lichtheim whom McNally feels provides *"the most reliable guides to early socialist thought"* presumably because his account chimes with all the standard Marxist prejudices, assumptions and errors about anarchism (significantly McNally

ignores Lichtheim's statement that Bakunin's supported *"anti-authoritarian collectivism"*). A socialist, Lichtheim opposed Marxist-Leninism while presenting a sceptical but superficial account of anarchism. This can be seen from the words McNally quotes:

> *"The International Brotherhood he founded in Naples in 1865–66 was as conspiratorial and dictatorial as he could make it, for Bakunin's libertarianism stopped short of the notion of permitting anyone to contradict him. The Brotherhood was conceived on the Masonic model, with elaborate rituals, a hierarchy, and a self-appointed directory consisting of Bakunin and a few associates."* [**A Short History of Socialism**, p. 126]

First, it should be noted that Bakunin considered secret societies as necessary because, at the time, most countries were monarchies and did not have basic civil liberties. Bakunin had been imprisoned by the Tsar for his activities during the 1848 revolution and so had personal experience of the fate of revolutionaries who were caught by these regimes. As Murray Bookchin argues, *"Bakunin's emphasis on conspiracy and secrecy can be understood only against the social background of Italy, Spain, and Russia the three countries in Europe where conspiracy and secrecy were matters of sheer survival."* [**The Spanish Anarchists**, p. 24] McNally ignores the historical context — and the awkward fact that Marxists have also favoured secret groupings in the face of similar regimes.

Second, it should be noted that in 1865–6 Bakunin was just becoming an anarchist and this period *"represents the transition from the revolutionary nationalism of his middle-years to the revolutionary anarchism of his last period."* The *"rituals"* of the International Brotherhood were not reflected in later organisations because, as Bakunin admitted to a recruit, *"they aren't necessary. We invented that for the Italians"*. In other words, they reflected the revolutionary traditions of the democratic conspiracies of that country rather than his own ideas, something confirmed by James Guillaume, his associate in the Alliance of Social Democracy, who recounted this, Bakunin's group in the First International, *"had little resemblance to 'the classic type of secret society where one had to obey orders coming from above.' Bakunin's organisation was nothing more than a 'free association of men who were uniting for collective action, without formalities, without ceremonies or mysterious rites.'"* As for the Brotherhood, *"the constitution thus laid down was to be regarded as provisional; for when the Brotherhood attained a membership of seventy, a constituent assembly was to be convened which would determine the definite rules and programme of the organisation."* [E.H. Carr, **Michael Bakunin**, p. 320, p. 316, p. 357 and p. 315]

Third, this summary is simply inaccurate. To show this, we shall quote from Bakunin's letter to the Russian Nihilist Sergy Nechayev in which he explains the differences in their ideas. He discusses the *"principles and mutual conditions"* for a *"new society"* of revolutionaries in Russia (noting that this was an *"outline of a plan"* which *"must be developed, supplemented, and sometimes altered according to circumstances"*):

> *"Equality among all members and the unconditional and absolute solidarity — one for all and all for one — with the obligation for each and everyone to help each other, support and save each other... Complete frankness among members and proscription of any Jesuitical methods in their relationships ... When a member has to say anything against another member, this must be done at a general meeting and in his presence. **General fraternal control** of each other ... Everyone's personal intelligence vanished like a*

river in the sea in the collective intelligence and all members obey unconditionally the decisions of the latter.

"All members are equal; they know all their comrades and discuss and decide with them all the most important and essential questions bearing on the programme of the society and the progress of the cause. The decision of the general meeting is absolute law... The society chooses an Executive Committee from among their number consisting of three or five members who should organise the branches of the society and manage its activities in all the regions of the [Russian] Empire on the basis of the programme and general plan of action adopted by the decision of the society as a whole... This Committee is elected for an indefinite term. If the society ... the People's Fraternity is satisfied with the actions of the Committee, it will be left as such; and while it remains a Committee each member ... and each regional group have to obey it unconditionally, except in such cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have participated equally in the discussion of them... In such a case members of the group must halt the execution of the Committee's orders and call the Committee to judgement before the general meeting ... If the general meeting is discontented with the Committee, it can always substitute another one for it... Any member or any group is subject to judgement by the general meeting ... No new Brother can be accepted without the consent of all or at the very least three-quarters of all the members...

"The Committee divides the members ... among the Regions and constitutes Regional groups of leaderships from them ... Regional leadership is charged with organising the second tier of the society — the ***Regional Fraternity****, on the basis of the same programme, the same rules, and the same revolutionary plan ... Each Regional Committee will set up* ***District*** *Committees from members of the* ***Regional Fraternity*** *... District Committees can, if necessary and only with the consent of the Regional Committee, set up a third tier of the organisation —* ***District Fraternity*** *with a programme and regulations as near as possible to the general programme and regulations of the People's Fraternity. The programme and regulations of the District Fraternity will not come into force until they are discussed and passed by the general meeting of the Regional Fraternity and have been confirmed by the Regional Committee...*

"Jesuitical control ... are totally excluded from all three tiers of the secret organisation ... The strength of the whole society, as well as the morality, loyalty, energy and dedication of each member, is based exclusively and totally on the shared truth, sincerity and trust, and on the open fraternal control of all over each one." [quoted by Confino, **Op. Cit.**, pp. 264–6]

As can be seen, while there is much in Bakunin's ideas that few anarchists would agree with today, it cannot be said that it was *"dictatorial"* as McNally and Lichtheim wish to suggest. Ironically, as we note in section H.2.14, there are distinct similarities to Lenin's (and Marx's during the 1848 revolution) ideas on how revolutionaries should organise. Thus we find Lenin arguing in **What is to be Done?** for *"a powerful and strictly secret organisation, which concentrates in its hands all the threads of secret activities, an organisation which of necessity must be a centralised organisation"* because the revolutionary movement would *"benefit by the fact that a 'dozen' ex-*

perienced revolutionaries, no less professionally trained than the police, will centralise all the secret side of the work – prepare leaflets, work out approximate plans and appoint bodies of leaders for each urban district, for each factory district and for each educational institution, etc." Under Tsarism, the *"only serious organisational principle the active workers of our movement can accept is strict secrecy, strict selection of members, and the training of professional revolutionaries."* [**The Essential Lenin**, p. 158, p. 149 and p. 162]

The parallels with Bakunin's system are clear and are predominately the result of the identical political conditions both revolutionaries experienced. While anarchists are happy to indicate and oppose the non-libertarian aspects of Bakunin's ideas, it is hard for the likes of the McNally to attack Bakunin while embracing Lenin's ideas on the party, justifying their more "undemocratic" aspects as a result of the objective conditions of Tsarism. Worse, in 1920 these principles were agreed by the Communist International, including the necessity of both legal and illegal structures within the party for *"the Communist parties must learn to combine legal and illegal activity in a planned way. However, the legal work must be placed under the actual control of the illegal party at all times."* [**Proceedings and Documents of the Second Congress 1920**, vol. 1, p. 198–9] Anarchists have, since Bakunin's death, rejected his ideas that anarchists should organise in a centralised fashion (see section J.3).

Therefore, McNally has a problem. On the one hand, he denounces Bakunin's ideas of a centralised, secret top-down organisation of revolutionaries. On the other, the party structure that Lenin recommends is also a tightly disciplined, centralised, top-down structure with a membership limited to those who are willing to be professional revolutionaries. So if he attacks Bakunin, he must also attack Lenin, not to do so is hypocrisy. And, unlike Bakunin, Lenin wished his party to seize state power — which then used it to build a system in its own image (see section H.5.9).

At this point it will be objected that Lenin's party was more democratic and he allowed people to disagree with him. Yet Lichtheim's summation leaves a lot to be desired. To point to just three examples: the historian T.R. Ravindranathan indicates that *"Bakunin wanted the Alliance to become a branch of the International [Working Men's Association] and at the same time preserve it as a secret society. The Italian and some French members wanted the Alliance to be totally independent of the IWA and objected to Bakunin's secrecy. Bakunin's view prevailed on the first question as he succeeded in convincing the majority of the harmful effects of a rivalry between the Alliance and the International. On the question of secrecy, he gave way to his opponents"*. [**Bakunin and the Italians**, p. 83]; while other Bakunin influenced sent delegates to the Hague Congress of the First International in 1872, the Italian sections decided not to; The Spanish section of the Alliance *"survived Bakunin ... yet with few exceptions it continued to function in much the same way as it had done during Bakunin's lifetime."* [George R. Esenwein, **Anarchist Ideology and the Working Class Movement in Spain**, p. 43] Hardly what you would expect if Lichtheim's comments were accurate.

The evidence suggests that the Alliance *"was not a compulsory or authoritarian body."* In Spain, it *"acted independently and was prompted by purely local situations. The copious correspondence between Bakunin and his friends ... was at all times motivated by the idea of offering advice, persuading, and clarifying. It was never written in a spirit of command, because that was not his style, nor would it have been accepted as such by his associates."* Moreover, there *"is no trace or shadow or hierarchical organisation in a letter from Bakunin to [Spanish anarchist] Mora ... On the contrary, Bakunin advises 'direct' relations between Spanish and Italian Comrades."* The Spanish comrades also wrote a pamphlet which *"ridiculed the fable of orders from abroad."* [Juan Gomez Casa, **An-**

archist Organisation, p. 25 and p. 40] This is confirmed by George R. Esenwein, who argues that *"[w]hile it is true that Bakunin's direct intervention during the early days of the International's development in Spain had assured the pre-dominance of his influence in the various federations and sections"* of the organisation, *"it cannot be said that he manipulated it or otherwise used the Spanish Alliance as a tool for his own subversive designs."* Thus, *"though the Alliance did exist in Spain, the society did not bear any resemblance to the nefarious organisation that the Marxists depicted."* [**Op. Cit.**, p. 42] Indeed, as Max Nettlau points out, those Spaniards who did break with the Alliance were persuaded of its *"hierarchical organisation ... not by their own direct observation, but by what they had been told [by Marxists] about the conduct of the organisation"* in other countries. [quoted by Casa, **Op. Cit.**, pp. 39–40]

In summary, McNally's comments are a distortion of Bakunin's ideas and activities. He misrepresents one aspect of Bakunin's ideas while ignoring those aspects which support working class self-organisation and self-management. Ironically, he ignores the awkward fact that Bakunin's and Lenin's ideas on how revolutionaries should organise were similar (as to be expected given similar circumstances) but with the key difference that Lenin, unlike Bakunin, sought state power for the professional revolutionaries (see section H.3.11).

6. Are these *"quirks of personality"* or *"rooted in the very nature of anarchist doctrine"*?

After chronicling the failings of, and distorting the facts about, two individuals, McNally tries to generalise. *"These characteristics of Bakunin and Proudhon,"* he argues, *"were not mere quirks of personality. Their elitism, authoritarianism and support for backward-looking and narrow-minded causes are rooted in the very nature of anarchist doctrine."* Thus McNally claims that these failings of Proudhon and Bakunin are not personal failings but rather political. They, he suggests, represent the reactionary core of anarchist politics but makes no attempt to show that this is the case. Worse, many of his claims about *"anarchist doctrine"* are simply untrue and, once corrected, leave little left other than *"quirks of personality"*.

Take, for example, Proudhon's position on the American Civil War. Let us assume that McNally's assertion is correct (as shown in section 4 it is not) and he supported the South. Bakunin *"supported the Union in the struggle between the states"*. [Paul Avrich, **Anarchist Portraits**, p. 20] What does this mean for *"anarchist doctrine"*? Which of the two represented the "real" anarchist position? So the question remains why Proudhon's refusal to support either side during the American Civil War (his actual position) is an example of *"anarchist doctrine"* while Bakunin's support of the North is not. Proudhon, to raise another obvious example, did not share Bakunin's interest in secret societies (nor did Kropotkin, Goldman, etc.). What does this tell us about *"the very nature of anarchist doctrine"*? Could Bakunin's position not be better explained by him being imprisoned in a Tsarist dungeon? Could it be that rather than attack anarchism, McNally simply attacks the failings of individual anarchists?

Unlike Proudhon, Bakunin and other revolutionary anarchists supported both unions and strikes and, as Kropotkin summarised, anarchists *"do not seek to constitute, and invite the working men not to constitute, political parties in the parliaments. Accordingly, since the foundation of the International Working Men's Association in 1864–1866, they have endeavoured to promote their ideas directly amongst the labour organisations and to induce those unions to a direct struggle against capital, without placing their faith in parliamentary legislation"*. How can Proudhon's

position represent *"the very nature of anarchist doctrine"* when he was the only one to hold it? Similarly, Kropotkin simply (and rightly) dismissed Proudhon's position on women's equality as one *"which most modern writers will, of course, not agree."* [**Direct Struggle Against Capital**, p. 165 and p. 218] If McNally is right then we can only conclude that only Proudhon amongst all anarchist thinkers understood what anarchism stood for. That is, needless to say, unlikely and so we can only conclude that Proudhon's sexism and opposition to strikes were *"quirks of personality"* which later anarchists rejected in favour of a more consistent libertarian position (in the case of Proudhon's anti-feminism) or as inadequate (in the case of Proudhon's reformism). Neither, in short, is inherent to anarchist theory and it would be silly to suggest they were.

It should also be noted that Marx and Engels took positions which modern readers would consider strange at best. In the case of slavery, Marx suggested in his polemic against Proudhon that if you *"[c]ause slavery to disappear and you will have wiped America off the map of nations"*. [**Collected Works**, vol. 6, p. 167] Engels, unsurprisingly, after the American Civil War added a note suggesting that this obvious tolerance of slavery was only valid in 1847. A few years later, in the early 1850s, Marx argued that slavery in Jamaica had been marked by *"freshly imported BARBARIANS"* in contrast to the United States where *"the present generation of Negroes"* was *"a native product, more or less Yankeefied"* and *"hence capable of being emancipated."* {**Op. Cit.**, vol. 39, p. 346] The many comments by Marx and Engels on the progressive role of imperialism in replacing traditional societies by capitalist social relationships are also relevant in this context as are the many racists comments on Slavs and other peoples (including Jews). In other words, Proudhon and Bakunin were not the only major socialist thinkers to express racist views and if they are to be dismissed as a result then why not Marx and Engels as well?

We will draw upon Roman Rosdolsky's important work *"Engels and the \91Nonhistoric' Peoples: The National Question in the Revolution of 1848."* (**Critique: Journal of Socialist Theory**, No. 18/19) to sketch the bigotries of Marx and Engels (unless otherwise indicated all quotes in this section come from Rosdolsky's work). As will be seen, on almost every issue McNally raises against Proudhon and Bakunin we find similar comments by Marx and Engels.

Unsurprisingly, given the times, Marx and Engels made numerous anti-Semitic remarks both in private and public. During the 1848 revolution, the paper Marx edited (**Neue Rheinische Zeitung**) published the reports of M\FCller-Tellering who expressed *"an all too maniacal hatred"* of Jews. Engels wrote *"very unpleasant passages on the (Polish) Jews"* [193, 116], describing them as *"the very incarnation of haggling, avarice and sordidness"* and *"the meanest of all races"* with *"its lust for profit."* The Austrian Jews had *"**exploited the revolution** and are now being punished for it"* while *"anyone who knows how powerful"* they were. He generalised by suggesting that *"Jews are known to be cheated cheats everywhere"* and, according to Marx, they had put themselves *"at the **head of the counter-revolution**"* and so the revolution had *"to throw them back into their ghetto"*. [quoted 192, 203,196] Marx's paper *"did not dissociate itself from the anti-Semitic 'popular opinion'"* and its articles resulted in some of its backers who were Jewish demanding the return of their money as it preached *"religious hatred."* [201, 191]

Yet the despicable attitude expressed against Jews in **Neue Rheinische Zeitung** is the least of the issues of concern here given the opinions expressed over Slavs by the founders of Marxism. Thus we find Engels asserting that the Slavs have been *"forced to attain the first stage of civilisation only by means of a foreign yoke, are not viable and will never be able to achieve any kind of independence"* and that the conquered should be grateful to the Germans for *"having given themselves the trouble of civilising the stubborn Czechs and Slovenes, and introducing among them trade,*

industry, a tolerable degree of agriculture, and culture!" [**Marx-Engels Collected Works**, vol. 8, p 238] Worse, Engels proclaimed that *"one day we shall* ***take a bloody revenge on the Slavs*** *for this cowardly and base betrayal of the revolution"* and *"hatred of the Russians was, and still is, the first revolutionary passion of the Germans".* The revolution could only be secured *"against these Slavs peoples by the most decisive acts of terrorism"* and *"****a war of annihilation and ruthless terrorism****, not in the interests of Germany but in the interests of the revolution!"* There would be *"a* ***bloody revenge in the Slav barbarians****"* and a war which will *"****annihilate all these small pig-headed nations even to their very names****"* and *"will not only cause reactionary classes and dynasties* ***to disappear from the face of the earth, but also entire reactionary peoples.*** *And that too is an advance."* [quoted, 85, 86]

In short, Engels advocated ethnic cleansing in the name of the revolution against those whom he considered *"nonhistoric"* peoples. This was recognised by leading Marxist Karl Kautsky who, rightly, denounced him for advocating that *"they had to be exterminated"* [quoted 90] Regardless of what drove these rants, as Rosdolsky rightly states *"it no way nullifies the fact that they made entire peoples the object of this hatred and proclaimed a 'war of annihilation' against them."* [87]

Ignoring the genocidal ethnic cleansing proclaimed against the Slavs (bar Poles) and other *"nonhistoric"* people, Engels wrote of the war which *"broke out over Texas"* between Mexico and the USA and how it was good that *"that magnificent California was snatched from the lazy Mexicans, who did not know what to do with it"* by *"the energetic Yankees."* [quoted, 159] He failed to mention that the revolt of 1836 over Texas which was the root of the 1846 war was conducted by *"****planters, owners of Negro slaves****, and their main reason for revolting was that* ***slavery had been abolished in Mexico in 1829****."* [160] In fact in 1845 a majority of voters in the Republic of Texas approved a proposed constitution that specifically endorsed slavery and the slave trade and was later accepted by the U.S. Congress. Unlike Engels, Northern abolitionists attacked this war as an attempt by slave-owners to strengthen the grip of slavery and ensure their influence in the federal government and publicly declared their wish for the defeat of the American forces. Henry David Thoreau was jailed for his refusal to pay taxes to support the war, penning his famous essay **Civil Disobedience**. [Howard Zinn, **A People's History of the United States**, pp. 155–7] Rosdolsky rightly comments on how *"inappropriate, in fact perverse, was Engels' illustration."* [160]

So we find distinct parallels between McNally's attacks on Proudhon and the many racist and anti-Semitic remarks by Marx and Engels (as listed by Peter Fryer in his *"Engels: A Man of his Time"* [John Lea and Geoff Pilling (eds.), **The condition of Britain: Essays on Frederick Engels**]) as well as their siding with slave states against abolitionist ones. Nor did Marx, it must be noted, denounce Proudhon's racism or sexism (he also failed to comment on the Paris Commune being elected by **male** universal suffrage, thinking nothing of the exclusion of half the population while proclaiming its democratic nature). Strangely, most Marxists (rightly) condemning Proudhon for his bigotries are silent about this — as silent as they are on the awkward facts that Proudhon did not actually support the Southern States in the American Civil War and that a one-off, never repeated, comment made in a private notebook simply cannot be taken as expressing his political ideas (see section 4 for details).

The fact is, once we correct McNally's errors, we discover that the vast majority of Proudhon's and Bakunin's positions are **not** *"backward-looking and narrow-minded"*, quite the reverse. Where a position **is** so (Proudhon's position to trade unions and feminism being the most obvious examples) then we quickly discover that subsequent anarchists publicly rejected it. Most of the

position's McNally paints as *"anarchist doctrine"* were not actually held by either Proudhon or Bakunin (such as, opposition to industry and collectively-owned and managed property). Rather than take examples which are common to most anarchist theorists — and so actually reflective of *"anarchist doctrine"* — McNally takes only a few positions held by one, at most two, major anarchist thinkers. Worse, these positions are tangential to the core of their ideas and, indeed, directly opposed to them (such as infrequently expressed bigotries against specific peoples being in obvious conflict to their other, more common, support for racial equality). From this minority of examples McNally generalises a theory — and so violates the basic principles of the scientific method!

So McNally's position leaves something to be desired. Why is Proudhon's opposition to trade unions and strikes is an example *"anarchist doctrine"* while Bakunin's (and Kropotkin's, Malatesta's, Berkman's, Goldman's, etc.) support for both is not? Why is Proudhon's sexism *"anarchist doctrine"* but Bakunin's (and Kropotkin's, Goldman's, Malatesta's, etc.) support for women's liberty and equality is not? Why proclaim Bakunin *"shared most of Proudhon's views"* when anyone who did the most basic research would quickly conclude that in these two issues (and others!) Bakunin rightly rejected the positions McNally raises with regards to Frenchman's ideas? Worse, many of the positions McNally attacks Proudhon for are simply inaccurate — he simply did not hold the ideas McNally so confidently asserts he did.

Moreover, as Daniel Gu'rin notes *"[m]any of these masters were not anarchists throughout their lives and their complete works include passages which have nothing to do with anarchism."* Bakunin, for example, was only an anarchist from around 1864 to his death in 1876 while *"in the second part of his career Proudhon's thinking took a conservative turn"*. [**Anarchism**, p. 6] As such, the positions McNally, rightly, attacks (once his errors are corrected!) are clearly *"quirks of personality"* rather than somehow *"rooted in the very nature of anarchist doctrine."* This can be seen from the awkward fact that no later anarchists advocated them. Not to mention the awkward fact that Marx and Engels shared similar views as those McNally attacks Proudhon and Bakunin for having (even if, in reality, they did not hold the positions McNally claims they did).

These examples in themselves prove the weakness of McNally's claims and the low levels of scholarship which lay behind them. Indeed, it is amazing that the SWP/ISO printed this diatribe — it obviously shows their contempt for facts, history and the intelligence of their desired audience.

7. Are anarchists against democracy?

McNally asserts the following:

> *"Originating in the revolt of small property owners against the centralising and collectivising trends in capitalist development (the tendency to concentrate production in fewer and fewer large workplaces), anarchism has always been rooted in a hostility to democratic and collectivist practices. The early anarchists feared the organised power of the modern working class. To this day, most anarchists defend the 'liberty' of the private individual against the democratically made decisions of collective groups."*

As indicated in section 3, the notion that anarchists are against large-scale industry or collective property is simply an invention. Both Proudhon and Bakunin, for example, argued for collective management and ownership of the means of production by the workers themselves.

Indeed, workers' self-management of production and collective ownership were raised in the very first anarchist book, Proudhon's **What is Property?** and both have remained an key aspect of anarchism ever since. Proudhon put it well: *"Large industry and high culture come to us by big monopoly and big property: it is necessary in the future to make them rise from the association."* [quoted by [K. Steven Vincent, **Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 156] So workers' associations running workplaces is at the heart of anarchism, an easy fact to discover if you bother to read Proudhon and Bakunin — as is the fact that Bakunin supported revolutionary trade unionism as the means of producing a social revolution (see section 9). So much for *"fear[ing] the organised power of the modern working class"*!

So the premise of his assertion is factually incorrect. What of the conclusion, the idea that anarchists support the liberty to ignore *"the democratically made decisions of collective groups"*? Here McNally takes a grain of truth to create a lie.

First, however, we need to ask an obvious question: what does "democracy" mean? Or, more correctly, what kind of democracy are we talking about? If quoting Lenin is not **too** out of place, in a section of his pamphlet **The Proletarian Revolution and the Renegade Kautsky** in section entitled *"How Kautsky Turned Marx Into A Common Liberal"*, Lenin stated it was *"natural for a liberal to speak of 'democracy' in general; but a Marxist will never forget to ask: 'for what class?'"* [**The Lenin Anthology**, p. 465] So the question is not whether anarchists support "democracy" or not but what **kind** of democracy and for whom. For if McNally is right (and he is) and there are two kinds of socialism (one "from above" and one "from below") then there are multiple kinds of democracy: centralised and decentralised; unitarian and federal, top-down and bottom-up; bourgeois and workers. That is why Proudhon talked of the workers democracy (*"D'mocratie ouvri\E8re"*) in his last work, contrasting it to the democracy (the left-Jacobin bourgeois-republican democracy which included the state socialists), but the elements of which he had been expounding upon since the 1840s.

A close reading of Proudhon shows that his main opposition to "democracy" was that it was, paradoxically, not democratic enough as it referred to the Jacobin notion that the whole nation as one body should elect a government. In such a regime *"**the People reigns and does not govern**, which is to deny the Revolution."* [**Property is Theft!**, p. 267] He sought a social organisation in which people had meaningful control over their own lives — as individuals **and** as groups, collectives. This was not possible under a centralised democracy and so *"universal suffrage provides us, ... in an embryonic state, with the complete system of future society. If it is reduced to the people nominating a few hundred deputies who have no initiative ... social sovereignty becomes a mere fiction and the Revolution is strangled at birth."* [**Selected Writings of Pierre-Joseph Proudhon**, p. 123] Nor was it possible as long as workers did not control their work and workplaces. This meant, as discussed in section 4, he argued for a decentralised, federal bottom-up system of communal and workplace associations based on elected, mandated and recallable delegates:

> *"we are all voters; we can choose the most worthy ... we can follow them step-by-step in their legislative acts and their votes; we will make them transmit our arguments and our documents; we will suggest our will to them, and when we are discontented, we will recall and dismiss them.*
>
> *"The choice of talents, the imperative mandate ... and permanent revocability are the most immediate and incontestable consequences of the electoral principle. It is the inevitable program of all democracy.* [**Property is Theft!**, p. 273]

As we noted in section 5, Bakunin had identical ideas on the need for a decentralised, federal, bottom-up social organisation based on elected, mandated and recallable delegates. Rather than express *"hostility to democratic and collectivist practices"*, anarchists have always sought to discover which social forms allow **genuine** democratic and collectivist practices to flourish — a "democracy" which reduces the masses to simply picking their masters every few years while workers were employed by bosses would not promote libertarian values. Hence the support for workers' self-management of production by democratic associations, communal self-government and social-economic federalism even the casual reader would find in the works of Proudhon and Bakunin but which McNally fails to mention.

Anarchists are well aware that support for democratic collectives in the workplace and community is a necessary but not sufficient condition for individual freedom (to quote McNally, the *"challenge is to restore to socialism its democratic essence, its passionate concern with human freedom"*). This is because collectives can make bad decisions, the majority can — and does — act oppressively towards the minority. For example, the United States has seen numerous votes on the issue of homosexual rights which saw the majority of voters or their representatives reject equality. That the majority are against equality for gays does not make it right — anymore than previous majorities against equality for women and blacks were right. If a majority vote for a right-wing party which promises to make strikes illegal would McNally accept that decision and urge trade unionists to obey the democratic decisions of the collectivity? Would a referendum result make it any more just and worthy of respect? What if the majority vote to ban the teaching of evolution in all schools? And, finally, what if the majority vote in favour of authoritarian regimes? This is no idle question, it happened in, for example, France in 1851 and 1852 (much to Proudhon's disgust).

Perhaps it is not surprising, then, that the right often invoke the *"silent majority"* against the progressive minorities seeking change. The term was popularised (though not first used) by U.S. President Richard Nixon in 1969 when he asked for the support of *"the great silent majority of my fellow Americans"*, those who felt threatened by attacks on "traditional values" during the 1960s — the civil rights, women's and peace movements as well as student rebellions, the counter-culture, wildcat strikes, and so on. Nixon, it should be noted, won a landslide victory in the 1972 Presidential election and took 49 of 50 states. The Thatcher government, likewise, invoked its democratic credentials (in spite of never receiving an actual majority of support) when launching state repression against strikes (particularly the 1984–85 miners' strike) and imposing the most draconian anti-union laws in the Western World. Their trade union "reforms" included forcing a paper ballot of members before taking strike action, so replacing the mass union meeting with the atomised democracy of the bourgeois state. Many Tory politicians wish to go further and impose yet more legislation which would outlaw strikes unless a majority of trade union members take part in the ballot as well as the majority voting for strike action (rather than just the majority of those voting in the ballot) — in the interests of "democracy", of course, as it would stop "unrepresentative" minorities disrupting the (non-union) majority.

Needless to say, this is a condition they never suggest for the electing of politicians for good reason: "democratic" government usually means government by those elected by a minority of a population. For example, in the 2012 London Mayor election the successful candidate received just over 50% of a 38% turn-out, meaning that the successful candidate represented a mere 20% of the city's population. It should also be stressed that this minority of voters did not actually make decisions — that rested in the hands of one person, the mayor. In other words, power over

a city of ten million rested in the hands a person elected by 20% of those eligible to vote. The same can be said of U.S. elections, particularly Presidential ones. So democracy can easily mean government by the largest minority although, in practice, it means government of the few elected by the largest minority of the minority who bother to vote. None of which is very democratic and confirms Proudhon's critique that *"nothing resembles a monarchy more than a* ***r'publique unitaire****"*. [quoted by Vincent, **Op. Cit.**, p. 211]

So invoking "democracy" is problematic, given its wide number of uses. At its most basic, the majority can be wrong (as can be seen from the numerous crooks, incompetents, authoritarians and demagogues who have managed to win the popular vote). The aim, of course, is to change the views of the majority but that cannot be done by simply obeying its unjust opinions but rather challenging them by direct action — or *"ignoring"* them to use McNally's term. As we note in section H.2.11, all progressive movements — whether trade unionism, civil rights activism, feminism and gay rights – started out as minorities (and sometimes remained so!) but managed, by direct action and protest (i.e., ignoring the wishes of the majority) to change perspectives and make society more freedom and just (see Kropotkin's essay *"Revolutionary Minorities"* in **Words of a Rebel** for further discussion). Malatesta put it well:

> *"We do not recognise the right of the majority to impose the law on the minority, even if the will of the majority in somewhat complicated issues could really be ascertained. The fact of having the majority on one's side does not in any way prove that one must be right. Indeed, humanity has always advanced through the initiative and efforts of individuals and minorities ... [W]e are even more opposed to domination of the majority by a minority. It would be absurd to maintain that one is right because one is in a minority ... [I]t is not a question of being right or wrong; it is a question of freedom, freedom for all, freedom for each individual so long as he does not violate the equal freedom of others ... it is necessary that majority and minority should succeed in living together peacefully and profitably by mutual agreement and compromise, by the intelligent recognition of the practical necessities of communal life and of the usefulness of concessions which circumstances make necessary."* [**Errico Malatesta: His Life and Ideas**, p. 72]

So, yes, anarchists **do** defend the liberty of individuals to rebel against the decisions of collective groups (we should point out that Marxists usually use such expressions as a euphemism for the state, but here we will take it at face value). This is for two very good reasons. Firstly, the majority is not always right. Secondly, simply because progress is guaranteed by individual liberty — by **dissent.** That is what McNally is attacking here — the right of individuals and groups to dissent, to express themselves and live their own lives. As we argue in section A.2.11, most anarchists are in favour of direct democracy in free associations. However, we agree with Carole Pateman when she argues:

> *"The essence of liberal social contract theory is that individuals ought to promise to, or enter an agreement to, obey representatives, to whom they have alienated their right to make political decisions ... Promising ... is an expression of individual freedom and equality, yet commits individuals for the future. Promising also implies that individuals are capable of independent judgement and rational deliberation, and of evaluating*

> *and changing their own actions and relationships; promises may sometimes justifiably be broken. However, to promise to obey is to deny or limit, to a greater or lesser degree, individuals' freedom and equality and their ability to exercise these capacities. To promise to obey is to state that, in certain areas, the person making the promise is no longer free to exercise her capacities and decide upon her own actions, and is no longer equal, but subordinate."* [**The Problem of Political Obligation**, p. 19]

She indicates an obvious truth which McNally ignores:

> *"Even if it is impossible to be unjust to myself, I do not vote for myself alone, but along with everyone else. Questions about injustice are always appropriate in political life, for there is no guarantee that participatory voting will actually result in decisions in accord with the principles of political morality."* [**Op. Cit.**, p. 160]

Thus, for anarchists, a democracy which does not involve individual rights to dissent, to disagree and to practice civil disobedience would violate freedom and equality, the very values McNally claims to be at the heart of Marxism. He is essentially arguing that the minority becomes the slave of the majority — with no right of dissent when the majority is wrong or being unjust and restricting the freedom democracy is meant to be based upon, reflect and defend. In effect, he wishes the minority to be subordinate, not equal, to the majority. Anarchists, in contrast, because we support self-management also recognise the importance of dissent and individuality — in essence, because we are in favour of self-management ("democracy" does not do the concept justice) we also favour the individual freedom that is its rationale. We support the liberty of private individuals because we believe in self-management ("democracy") so passionately.

Then there is the question of **which** *"collective groups"* make the democratic decision. This is a key issue for anyone concerned about freedom for its answer determines what kind of democracy we are talking about — a meaningful one which empowers all or a formal one which restricts what democracy is meant to be about?

For example, during debates on Scottish Independence some commentators suggest that limiting the vote on whether Scotland should withdraw from the UK to just those who lived there was "undemocratic" as the consequences impacted on those who lived in England, Wales and Northern Ireland. However, expanding the vote would have meant that the democratic decision of those in Scotland — a small minority of the total population of the UK — would have been irrelevant to the final decision. This can be generalised to all nation states which contain distinct cultural or ethic groupings within it. Can it be considered "democratic" to favour *"collective groups"* which ensure the marginalisation of minorities who wish to govern themselves?

This applies with equal force to the labour movement. In terms of strike action, which *"collective groups"* get to decide? Is it a sub-unit of a union branch (for example, IT staff within a University facing a restructuring), the branch (in which the IT staff may be a minority), the region or the national union. The strike decision would impact on all these levels but McNally's position gives no guidance for what is the correct level. Is it "democratic" if the sub-unit of the branch has to face redundancies because the majority of the branch does not support strike action? Is it "democratic" if the local branch cannot strike because the majority of the national union considers it harmful to the union as a whole?

This is no academic discussion as the answer has a significant impact on the evolution of the labour movement. In the Marxist-influenced German unions, the prejudice for centralisation

meant that the whole union (in practice, a few leaders at the top) was considered the key collective group and so *"every local strike had first to be approved by the Central, which was often hundreds of miles away and was not usually in a position to pass a correct judgement on the local conditions"* which lead to *"inertia of the apparatus of the organisation [and] renders a quick attack quite impossible"*. The unions were *"condemned ... to stagnation"* and the structure *"kills the spirit and the vital initiative of its members."* This *"turned over the affairs of everybody in a lump to a small minority"* and resulted in *"barren official routine"* which *"crushed individual conviction, kills all personal initiative by lifeless discipline and bureaucratic ossification and permits no independent action."* [**Anarcho-Syndicalism**, p. 61 and p. 60]

The anarchist position is clear — the appropriate group makes the decision. Thus federalism allows *"free combination from below upward, putting the right of self-determination of every member above everything else and recognising only the organic agreement of all on the basis of like interests and common convictions."* [Rocker, **Op. Cit.**, p. 60] Unsurprisingly, then, we discover that the most militant British union was that of the miners which had, due to syndicalist influence, a decentralised, federal structure based on autonomous branches. And, as Rocker notes, while the German unions made no attempt to resist the Nazi seizure of power, the anarcho-syndicalist CNT rose in insurrection and stopped Franco across two-thirds of Spain in 1936.

Simply put, Marxism (as McNally presents it here) flies in the face of how societies change and develop. New ideas start with individuals and minorities and spread by argument and by force of example. McNally is urging the end of the free expression of individuality. For example, who would seriously defend a society that "democratically" decided that, say, homosexuals should not be allowed the freedom to associate? Or that inter-racial marriage was against "Natural Law"? Or that trade unions and strikes should be outlawed as the acts of "selfish" minorities? Or that socialists were dangerous subversives and should be banned? He would, we hope (like all sane people), recognise the rights of individuals to rebel against the majority when the majority violate the spirit of association, the spirit of freedom and equality which should give democracy its rationale. However, if he did then he would have to also admit the correctness of the anarchist position.

So McNally fails to understand the rationale for democratic decision making — it is not based on the idea that the majority is always right but that individual freedom requires democracy to express and defend itself. By placing the collective above the individual, McNally undermines democracy and replaces it with little more than tyranny by the majority — or, more likely, those who claim to represent the majority. It also, ironically, places him on the wrong side within his own political tradition.

If we take McNally's comments seriously then we must conclude that those members of the German Social Democratic Party who opposed their party's role in supporting the First World War were acting inappropriately. Rather than express their opposition to the war and act to stop it, according to McNally's "logic", they should have remained in their party (after all, **leaving** the party meant ignoring the democratic decision of a collective group), accepted the democratic decision of the collective and supported the Imperialist slaughter in the name of party democracy. Indeed, the minority of anti-war Social-Democratic representatives in the German Parliament did precisely that, refusing to vote against war credits in 1914 in the name of party discipline (presumably because, as good Marxists, they thought only *"anarchists defend the 'liberty' of the private individual against the democratically made decisions of collective groups"*, to use McNally's words). It took until 1915 for Karl Liebknecht to do the right thing. If quoting Trotsky is not

too out of place: *"Do not fear to remain in a minority — even a minority of one, like Liebknecht's one against a hundred and ten".* [**History of the Russian Revolution**, vol. 1, p. 293] Common sense as well as political principle indicates that Liebknecht's (belated) defence of socialist internationalism against the democratically made decision of the Social-Democratic representatives (and wider party) was right — and his principled dissent helped turn the tide against the jingoism of the majority.

Another obvious example is provided by Lenin who, just before the party's seizure of power in 1917, was so frustrated with the conservativism of his own party's central committee that he, *"by way of protest resigns from the Central Committee"* after his *"furious criticism"* had no effect. Rather than abide by the rules of his own party and the majority of its governing body *"by announcing his resignation ... Lenin obviously wanted to make it possible to free himself in case of need from internal discipline of the Central Committee".* This meant the *"withdrawing completely beyond the limits of party legality"* and the threat of resigning gave him *"greater freedom to develop his offensive along internal lines."* [**Op. Cit.**, vol. 3, p. 131] Perhaps McNally is of the opinion that a private individual should not ignore the democratically made decisions of collective bodies — unless the individual in question is Lenin!

We are sure that McNally would reject the notion that Liebknecht and Lenin were wrong — in **these** cases the rights of minorities (even of one) take precedence over the *"democratic decisions of collectives."* This is because the majority is not always right and it is only through the dissent of individuals and minorities that the opinion of the majority can be moved towards the right one. Thus his comments are fallacious.

Progress is determined by those who dissent and rebel against the status quo and the decisions of the majority. That is why anarchists support the right of dissent in self-managed groups — in fact, dissent, refusal, revolt by individuals and minorities is a key aspect of self-management. Given that Leninists do not support self-management (rather they, at best, support the Lockean notion of electing a government as being "democracy") it is hardly surprising they, like Locke, view dissent as a danger and something to denounce. Anarchists, on the other hand, recognising that self-management's (i.e. direct democracy's) rationale and base is in individual freedom, recognise and support the rights of individuals to rebel against what they consider as unjust impositions (hence our recognition of the possibility of "the tyranny of the majority" — see section I.5.6). As history shows, the anarchist position is the correct one — without rebellion, numerous minorities would never have improved their position. Indeed, McNally's comments is just a reflection of the standard capitalist diatribe against strikers and protestors — they do not need to protest, for they live in a "democracy."

So, yes, anarchists do support individual freedom to resist even democratically made decisions simply because democracy **has to be** based on individual liberty. Without the right of dissent, democracy becomes a joke and little more than a numerical justification for tyranny (usually of the few who make up the so-called "democratically elected" government). Thus McNally's latter claim that the *"challenge is to restore to socialism its democratic essence, its passionate concern with human freedom"* seems farcical — after all, he has just admitted that Marxism aims to eliminate individual freedom in favour of *"collective groups"* (i.e. the government). Unless of course he means freedom for the abstraction "humanity" rather than concrete freedom of the individual to govern themselves as individuals and as part of freely joined self-managed associations? For those who really seek to restore to socialism its passionate concern for freedom the way it clear — anarchism. Hence Murray Bookchin's comments:

> *"Here is the nub of the problem [with] ... Marxism ... its perspectives are orientated not towards concrete, existential freedom, but towards an abstract freedom — freedom for 'Society', for the 'Proletariat', for* ***categories*** *rather than for people."* [**Post Scarcity Anarchism**, p. 148]

Anarchism, on the other hand, favours freedom for people and that implies two things — individual freedom and self-management (direct democracy) in free associations. Any form of "democracy" not based on individual freedom would be so contradictory as to be useless as a means to human freedom (and vice versa, any form of "individual freedom" — such a liberalism — which denies self-management would be little more than a justification for minority rule and a denial of human freedom). Ultimately, McNally's attack on anarchism fails simply because the majority is not always right and dissent a key to progress. That he forgets these basic facts of life indicates the depths to which Marxists will sink to distort the truth about anarchism.

Not that those in the Bolshevik tradition have any problem with individuals ignoring the democratic decisions of collective groups. The Bolsheviks were very happy to let individuals ignore and revoke the democratic decisions of collective groups — **as long as the individuals in question were the leaders of the Bolshevik Party**. As the examples we provide later (in section 8) indicate, leading lights in the Leninist tradition happily placed the rights of the party before the rights of working people to decide their own fate. Thus McNally comments are strange in the extreme. Both anarchists and Leninists share a belief that individuals can and should have the right to ignore decisions made by groups. However, Leninists seem to think only the government and leadership of the Party should have that right while anarchists think **all** should. Unlike the egalitarian support for freedom and dissent for all anarchists favour, Leninists have an elitist support for the right of those in power to ignore the wishes of those they govern. Thus the history of Marxists parties in power expose McNally as a hypocrite and as we argue in section 14, Leninist ideology provides the rationale for such action. Thus his attempt to portray anarchism as "anti-democratic" is somewhat ironic.

McNally states that anarchists *"oppose even the most democratic forms of collective organisation of social life. As the Canadian anarchist writer George Woodcock explains: 'Even were democracy possible, the anarchist would still not support it ... Anarchists do not advocate political freedom. What they advocate is freedom from politics ...' That is to say, anarchists reject any decision-making process in which the majority of people democratically determine the policies they will support."*

It is perhaps understandable that McNally fails to provide a reference for Woodcock's quote given that the two parts come from different chapters of the pamphlet **Anarchy or Chaos**. The first part (*"Even were democracy possible, the anarchist would still not support it"*) appears in chapter 3 on page 20 while the second (*"Anarchists do not advocate political freedom. What they advocate is freedom from politics"*) comes from chapter 15, page 108. In other words, McNally skips most of the pamphlet and ignores such trivial discussions as anarchist support for organisation and so collective decision making, the links between anarchism and syndicalism (including a chapter explaining syndicalist ideas), revolutionary anarchist support for collective property in the means of production and products (libertarian communism) as well as what was meant by *"political freedom"* and *"democracy"*.

It is useful, then, to present what Woodcock **actually** argued in order to understand what anarchism stands for. First, it should be stressed that Woodcock is very specific about what he meant by democracy: *"for democracy puts forward the will of the majority as the supreme law,*

and declares that society must be governed, and the individual, whether he agrees or not, be coerced by that will." Thus he is not discussing democratic decision making within free associations but rather the majority passing laws which all must obey. As indicated above, this is not an unproblematic situation. Woodcock indicates this by noting the *"laws against bigamy, abortion, homosexual practices, transvestism, and other [so-called] sexual deviations, as well as the semi-official persecution of the unmarried mother and the bastard child, protect the institution of the family"*. Thus *"laws protecting the state [or the wishes of the majority] find their way into every sphere of life, and involve the prohibition of activities that, at first consideration, would appear to have no bearing on the social structure."* [**Op. Cit.**, p. 20 and p. 107]

So it is essential to remember that democracy and freedom need not go hand-in-hand — majorities can, and do, restrict the freedom of individuals in repressive and unjust ways. So while democracy is a necessary condition for freedom it is not sufficient for, ultimately, the defining feature of democracy is **not** that the majority is always right but rather that a ruling minority cannot be trusted to not abuse its position and power. This is why Woodcock states *"Anarchists seek neither the good of a minority, nor the good of the majority, but the good of all."* He also notes that in so-called democracies it is usually the handful of people who make up the "democratically elected" government who make the decisions and so it is *"not even of the majority [who rule] but of the privileged few who forms its ruling class"*. [**Op. Cit.**, p. 20] This awareness informs his comments on political freedom which McNally shamefully ignores:

> *"Political freedom the right to vote, trial by jury, freedom of speech and press — does not constitute real freedom. Indeed it masks the unfree nature of the society from which it springs. The right to vote means the right to choose whether one will have a brewer or a lawyer for a master. It does not mean the right to do without a master. Trial by jury means the right to be judged by a handful of petty tradesmen, in accordance with the laws of a society based on property and class ... Political freedom in a class society is virtually meaningless ... it is strictly limited in the interests of the controlling class, and its availability is in relation to the class and economic position of the man concerned ... Democratic freedoms, then, are relative to wealth. But this is not the full measure of the relationship. In reality the rich enjoy a far greater freedom than that ... In a class society the ruling class are always free owing to their control of the means of production, of the money that in an acquisitive society is the way to all enjoyment. The ruled are not free because lack of control of production, and the benefits of money, liberal education, etc., proceeding there from ... Moreover, political freedom in a class society (and all political societies are by definition class societies), is relative to the security of that society. The ruling class give just so much political freedom as it is worthwhile and possible to give to keep the people out of mischief ... Political freedom, at its best, can only be limited, as it maintains the power of property, which, by conferring the right of exploitation, limits the freedom of the exploited, who are the majority of the population ...*
>
> *"Political freedom is thus, in fact, an ingenious delusion, by which the governing classes give the people the comforting belief that they themselves have made the chains that bind them and that for this reason the chains are necessary and good. It gives men certain liberties that the ruling classes find it wise to concede as a cheap way of buying security, but its very retention of a political system, which means government, which means coercion, must in the end destroy political freedom itself.*

> *"Anarchists do not advocate political freedom. What they advocate is freedom from politics, freedom from the institution of government, freedom from coercion, freedom from the law's interference in the lives of individual men and women, freedom from economic domination and inequality ... Only a society based on control from above has need of coercion. A society based on co-operation can do without oppression and restriction because it is based on the voluntary agreement between its members."* [**Op. Cit.** pp. 105–8]

Ultimately, if you define political freedom as the freedom to elect a government then, obviously, anarchists do not aim for it because we aim to end all governments! As is clear from the pamphlet McNally shamefully rips quotes from. The dishonesty is clear.

Given McNally's assertions about anarchism opposing collective property and being undemocratic, it is useful to also quote Woodcock's words on what anarchism is based on and what it logically implies. He stresses that *"few anarchists contend that absolute individual freedom is possible, or, indeed, desirable ... man is a social being, depending for his well-being on working and living together in society ... The freedom anarchists seek, then, is a reciprocal freedom, a freedom of men and women recognising each other's rights, a freedom based on justice."* [**Op. Cit.**, p. 105] Therefore:

> *"Anarchism ... is based on the concepts of freedom and justice, justice being that reciprocity of freedom without which no real individual freedom is possible. The social principles that follow from these concepts are mutual aid, or co-operation, and communism, or common ownership of the means of production ... In the anarchist view these principles are expressed concretely in the administration of economic and functional affairs by voluntary associations of the workers for the purpose of running the factories and the farms and providing the necessary social services such as posts, drainage, roads, etc. Each industry would be administered by its own workers who are the most competent people for that purpose ... who, having expert knowledge of their professions, are obviously better fitted to do this than politicians chosen according to the methods of parliamentary democracy."* [**Op. Cit.**, p. 91]

The means used to create such a society would be *"prosecuting the economic struggle ... an organisation on an economic basis which will embrace all the workers, according to their industries and workplaces . .. The syndicate [union], organised and governed by the workers themselves ... [also] contain[s] the germ of the functional organisation upon which the new society can be built after the revolution."*. Anarchists wish *"that the people themselves take their destiny into their own hands and carry through the social revolution."* [**Op. Cit.**, p. 89]

All of which, to state the obvious, is at odds with McNally's claims about anarchism.

To summarise: Anarchists are not opposed to people in free associations democratically determining the policies they will support (see sections I.3.1 and I.5.1 for more details on this). The minority can then decide to abide by the decision, protest against it or, if all else fails, to leave the association if they cannot tolerate the decisions being made. What we **do** oppose is the assumption that the majority is always right and that (non-repressive or non-oppressive) minorities should submit to the decisions of the majority no matter how wrong they are. We feel that history is on our side on this one — it is only by the freedom to dissent, by the direct

action of minorities to defend and extent their freedoms that society progresses. We also feel that theory is on our side — majority rule without individual and minority rights is a violation of the principle of freedom and equality which democracy is said to be built on. Democracy should be an expression of individual liberty but in McNally's hands it is turned into bourgeois liberalism. Little wonder Marxism has continually failed to produce a free society. It has no conception of the relationship of individual freedom to democracy and vice versa.

Finally, we must point out a slight irony in McNally's claim, namely that Marxists usually claim that they seek a society similar to that anarchists seek but have different means to achieve it. In the words of Marx:

> *"What all socialists understand by anarchy is this: once the aim of the proletarian movement, the abolition of classes, has been attained, the power of the State ... disappears, and the functions of government are transformed into simple administrative functions."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 76]

Or, as the **Communist Manifesto** put it, *"the free development of each is the condition for the free development of all"* [**The Marx-Engels Reader**, p. 491] So, Marxists and anarchists seek the same society, one of individual freedom which means that McNally's comments about anarchism also apply (once the state "withers away", which it never will) to Marxism. But, of course, McNally fails to mention this aspect of Marxism and its conflict with anarchism — but, then, he fails to discuss what anarchism actually stands for nor does he present an accurate account of its views of democracy and democratic decision making.

8. Are Leninists in favour of democracy?

McNally's attack on anarchism for being anti-democratic, authoritarian and elitist is somewhat ironic given that the Leninist tradition he places himself in **did** destroy democracy during the Russian Revolution — whether in the soviet, the workplace, the union or the military — and replaced it with party dictatorship. This means that his attack on anarchism can be turned back on his own politics, with much more justification and evidence.

We need to understand the importance of comparing the rhetoric of Bolshevism to its reality as we can have repeated pronouncements about "democracy" made while, at the same time, the necessity of party dictatorship is both being practised **and** advocated. Thus Lenin repeatedly contrasted the higher form of democracy expressed by the soviets to bourgeois democracy. In his in 1918 polemic against leading Social-Democrat Karl Kautsky who was accusing the Bolsheviks of being undemocratic, Lenin argued that the *"only view that corresponds to Marxism"* was expounded by Plekhanov (the father of Russian Marxism) at the Second Congress of the Russian Social Democratic Party in 1903, namely *"in the revolution the proletariat would, if necessary, disenfranchise the capitalists and **disperse any parliament** that was found to be counter-revolutionary."* [**Collected Works**, vol. 28, p. 280] Which raises the obvious question, found to be counter-revolutionary by whom? The proletariat? No, according to Plekhanov it was **the party**:

> *"Every democratic principle must be considered not by itself, abstractly, but in relation to ... the success of the revolution [as this] is the highest law. And if the success of the revolution demands a temporary limitation on the working of this or that democratic*

> *principle, then it would be criminal to refrain from such a limitation . .. the principle of universal suffrage must be considered from the point of view of what I have designated the fundamental principle of democracy. It is hypothetically possible that we might ... speak out against universal suffrage ... If in a burst of revolutionary enthusiasm the people chose a very fine parliament then we would be bound to make it a* ***long parliament****; and if the elections turned out unsuccessfully, then we would have to try to disperse it.* [quoted by Samuel H. Baron, **Plekhanov: The Father of Russian Marxism**, p. 242]

As we will discover, the dispersing of elected bodies by the party was not limited to bourgeois Parliaments: soviets were also subject to this policy. Perhaps this is unsurprising, given that before seizing power Lenin had repeatedly equated the power of the Bolsheviks with that of the proletariat. Thus *"Bolshevik power"* was *"one and the same thing"* as *"proletarian revolutionary power"* and so the Second All-Russian Congress *"gave a majority to the Bolshevik Party and put it in power."* [**The Lenin Anthology**, p. 413 and p. 419] While problematic (it substitutes the party for the class), it could be argued that as the party was supported by the majority of workers (but not peasants) then the Bolshevik government was democratic. Which is true, in the limited bourgeois sense. The question is what would happen if the workers turned against the party — would it give up its power as required by a movement committed to democracy? Unfortunately for McNally, the answer was: no.

Before discussing this, we must present some context and discuss the Bolshevik regime from the democratic perspective of one-person, one-vote. **Before** seizing power, Lenin protested that the Bolsheviks *"must pass a resolution demanding* ***equal*** *suffrage (both in the Soviets and at trade union congresses), branding the slightest departure from equality as a* ***fraud*** *... We cannot tolerate a* ***fraud*** *of democracy if we call ourselves 'democrats'. We are not democrats but unprincipled people if we tolerate this!!"* [**Collected Works**, vol. 25, p. 304] After winning around 25% of the votes in the elections to the Constituent Assembly he was happy with a Soviet Constitution which saw the All-Russian Congress of Soviets being composed of representatives of urban soviets (one delegate for 25,000 voters) and of representatives of the rural congresses of soviets (one delegate for 125,000 inhabitants). In other words, a worker's vote was 5 times more important than a peasant's vote. That this ensured a Bolshevik majority in the Third and Fourth All-Russian Congresses may explain this embrace of **unequal** suffrage in 1918 after the votes in the Constituent Assembly had been counted.

Given that the Bolsheviks disbanded the Constituent Assembly in spite of it being elected by universal suffrage (i.e., by democracy) McNally would, undoubtedly, argue — as Lenin did — that soviet democracy was much superior. Ignoring the awkward issue of unequal suffrage between workers and peasants, the fact is that the Bolsheviks also disbanded soviets which elected non-Bolshevik majorities. Martov, the leader of the left-Mensheviks, recounted in June 1918 how in those *"places where we were in the majority, the soviets will be liquidated".* When *"workers demanded new elections"* the demands were *"stubbornly resisted"* and the issue *"escalated to workers' strikes and the suppression of workers' demonstrations by armed forces".* If the protests succeeded, then elections resulted in *"a majority to the Mensheviks and SRs"* and in those cases Bolshevik Military Revolutionary Councils ensured *"the soviets were disbanded by armed force or the opposition delegates were* ***expelled*** *as 'counter-revolutionaries' from the soviets"* (although *"Bolshevik investigators themselves could not succeed in implicating even one Menshevik in the conspiracy trials"*).

The disbanding of soviets was *"applied to the **uzed** congresses of peasant soviets."* [*"Iulii Martov's Letter to A.N. Stein"*, pp. 78–82, **The Structure of Soviet History**, Ronald Grigor Suny (ed.), p. 78] Martov gave amongst many the example of Tula and a leading Bolshevik there informed his Party's Central Committee in early 1918 about the means being used there:

> *"After the transfer of power to the soviet, a rapid about-face began in the mood of the workers. The Bolshevik deputies began to be recalled one after another, and soon the general situation took on a rather unhappy appearance. Despite the fact that there was a schism among the SRs, and the Left SRs were with us, our situation became shakier with each passing day. We were forced to block new elections to the soviet and even not to recognise them where they had taken place not in our favour."* [quoted by Scott Smith, *"The Socialists-Revolutionaries and the Dilemma of Civil War"*, pp. 83–104, **The Bolsheviks In Russian Society**, Vladimir N. Brovkin (ed.), p. 87]

"The sum of this evidence from around the country," summarises one historian, *"makes clear that the majority of Russian workers were hostile to the Bolsheviks by the spring of 1918 ... the Bolsheviks simply dissolved opposition-controlled soviets, disregarded workers' opinions, and cracked down brutally on such manifestations of discontent as strikes."* [Smith, **Op. Cit.**, p. 94] This meant disbanding soviets which were elected with the wrong majority and so in response to the *"great Bolshevik losses in the soviet elections"* during the spring and summer of 1918 *"Bolshevik armed force usually overthrew the results of these provincial elections."* For example, in the city of Izhevsk in *"the May election [to the soviet] the Mensheviks and SRs won a majority"* and the following month *"these two parties also won a majority of the executive committee of the soviet. At this point, the local Bolshevik leadership refused to give up power"* and by the use of the military *"abrogated the results of the May and June elections and arrested the SR and Menshevik members of the soviet and its executive committee."* [Samuel Farber, **Before Stalinism**, pp. 23–4]

As we summarise in section H.6.1, the Bolsheviks applied many tactics to secure their power: soviet elections were delayed, the soviets themselves were packed with their representatives to secure their majority (so making direct election from the workplace irrelevant) and, when all else failed, the soviets themselves were simply, as noted, disbanded. This applied at the national level as well, and *"electoral fraud gave the Bolsheviks a huge majority of congress delegates"* for the fifth All-Russian Soviet Congress in July 1918. The *"number of legitimately elected Left SR delegates was roughly equal to that of the Bolsheviks."* The Left-SRs expected a majority but did not include *"roughly 399 Bolsheviks delegates whose right to be seated was challenged by the Left SR minority in the congress's credentials commission."* Without these dubious delegates, the Left SRs and SR Maximalists would have outnumbered the Bolsheviks by around 30 delegates. This ensured *"the Bolshevik's successful fabrication of a large majority in the Fifth All-Russian Congress of Soviets."* [Alexander Rabinowitch, **The Bolsheviks in Power**, p. 396, p. 288, p. 442 and p. 308]

This was reflected in Lenin's 1917 argument that the *"Bolsheviks have no right to await the Congress of Soviets. They ought to seize the power **right now**"* [quoted by Trotsky, **The History of the Russian Revolution**, vol. 3, pp. 132–2] The important thing was party power and the soviets were seen as only a means to that end and so perhaps their fate once the Bolsheviks had reached their goal is unsurprising. Hence we see Lenin, in his polemic against Kautsky, pointing with no apparent concerns to the fact that *"97 per cent of the total number of delegates [to the Sixth All-Russian Soviet Congress] were Bolsheviks"* as an example of his party's popular support!

[**Collected Works**, vol. 28, p. 303] It should be noted that the delegates to the congress were elected not by workers and peasants but rather by the appropriate soviet body below it. In other words, Bolshevik gerrymandered and packed soviets elected Bolsheviks to the national congress.

Perhaps unsurprisingly, given the reality of their regime, Bolshevik rhetoric started to change. By the end of 1918 the necessity of party dictatorship started to appear in party material and, as Victor Serge noted in the 1930s, *"the degeneration of Bolshevism"* was apparent by that time *"since at the start of 1919 I was horrified to read an article by Zinoviev ... on the monopoly of the party in power"*. [**The Serge-Trotsky Papers**, p. 188] It must be stressed that Serge's horror was well hidden and, as noted in section H.1.2 he joined the Bolsheviks and publicly defended this monopoly of power as a necessity of revolution. Lenin admitted the reality in 1919:

> *"When we are reproached with having established a dictatorship of one party and ... . a united Socialist front is proposed, we say, 'Yes, it is a dictatorship of one party! This is what we stand for and we shall not shift from that position ...'"* [**Op. Cit.**, vol. 29, p. 535]

Not only did the Bolsheviks not shift from that position, they recommended this position to the world revolutionary movement at the Second Congress of the Second International in 1920. In the words of Zinoviev:

> *"Today, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party."* [**Proceedings and Documents of the Second Congress 1920**, vol. 1, pp. 151–2]

"We must have a state organisation" he argued, *"and only the party can direct it, because a state political organisation is one that encompasses the best working-class elements of the entire country."* [**Op. Cit.**, p. 154] Elsewhere that year he argued that *"soviet rule in Russia could not have been maintained for three years — not even three weeks — without the iron dictatorship of the Communist Party. Any class conscious worker must understand that the dictatorship of the working class can be achieved only by the dictatorship of its vanguard, i.e., by the Communist Party ... All questions of economic reconstruction, military organisation, education, food supply — all these questions, on which the fate of the proletarian revolution depends absolutely, are decided in Russia before all other matters and mostly in the framework of the party organisations ... Control by the party over soviet organs, over the trade unions, is the single durable guarantee that any measures taken will serve not special interests, but the interests of the entire proletariat."* [quoted by Oskar Anweiler, **The Soviets**, pp. 239–40] In short: *"The chief conclusion of the proletarian revolution is the need for an iron, organised and monolithic Party."* [Zinoviev, quoted by Robert Service, **The Bolshevik Party in Revolution**, p. 144] Lenin dismissed the notion that workers could govern themselves:

> *"In the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers ... What happens*

> *is that the Party, shall we say, absorbs the vanguard of the proletariat, and this vanguard exercises the dictatorship of the proletariat ... the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... Such is the basic mechanism of the dictatorship of the proletariat, and the essentials of transition from capitalism to communism ... for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation."* [**Collected Works**, vol. 32, pp. 20–1]

This, of course, did not stop the Bolsheviks also claiming their regime was far more democratic than any other. In 1920, Zinoviev as head of the Communist International wrote a letter to the **Industrial Workers of the World**, a revolutionary labour union, which stated that the *"Russian Soviet Republic ... is the most highly centralised government that exists. It is also the most democratic government in history. For all the organs of government are in constant touch with the working masses, and constantly sensitive to their will."* [**Proceedings and Documents of the Second Congress 1920**, vol. 2, p. 928] Lenin, in his diatribe against Left-Wing Communism made a similar claim and proclaimed the soviets *"**democratic** institutions, the like of which even the best democratic republics of the bourgeois have never known"* while also suggesting that it was *"ridiculously absurd, and stupid"* to make *"a contrast, **in general**, between the dictatorship of the masses and the dictatorship of the leaders."* He also pointed to *"non-Party workers' and peasants' conferences"* as means by which the party secured its rule and so the Bolsheviks would have to *"support, develop and extend"* non-Party conferences *"to be able to observe the temper of the masses, come closer to them, meet their requirements, promote the best among them to state posts"*. [**The Lenin Anthology**, p. 573] Yet **if** the soviets were so democratic, then why were the non-Party Congresses needed at all? Perhaps because *"the dictatorship of the leaders"* is **not** the same as *"dictatorship of the masses"* and so the Soviets were irrelevant due to the party dictatorship?

Perhaps unsurprisingly given the fate of the soviets in 1918, the Bolsheviks disbanded these "non-Party" conferences because *"[d]uring the disturbances"* of late 1920, *"they provided an effective platform for criticism of Bolshevik policies."* Their frequency was decreased and they *"were discontinued soon afterward."* [Richard Sakwa, **Soviet Communists in Power**, p. 203] Lenin summarised the reasons for this policy:

> *"Non-Party conferences are not a fetish. They are valuable if they help us to come closer to the impassive masses — the millions of working people still outside politics. They are harmful if they provide a platform for the Mensheviks and Socialist Revolutionaries masquerading as 'non-party' men. They are helping the mutinies, and the whiteguards. The place for Mensheviks and Socialist-Revolutionaries, avowed or in non-party guise, is not at a non-Party conference but in prison ... We can and must find other methods of testing the mood of the masses and coming closer to them. We suggest that those who want to play the parliamentary, constituent assembly and non-Party conference game, should go abroad ... "* [**Op. Cit.**, vol. 32, p. 362]

In other words, the conferences were used by the proletariat to express its opinions and these were found to be lacking in the eyes of its vanguard. Like soviet democracy, they threatened

the rule of the party and as Lenin suggested in 1920 *"[w]hoever brings about even the slightest weakening of the iron discipline of the party of the proletariat (especially during its dictatorship) is actually aiding the bourgeoisie against the proletariat."* [**The Lenin Anthology**, p. 570] So any conflict between the vanguard and the proletariat would, by this logic, necessitates the victory of the former over the latter — in the latter's interests, of course. As Trotsky put it in 1921:

> *"The Workers' Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers' right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers' democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party, which is obliged to maintain its dictatorship, regardless of temporary wavering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a workers' democracy."* [quoted by Farber, **Op. Cit.**, p. 209]

So, politically, the Bolsheviks systematically disbanded democratic institutions — whether bourgeois (the Constituent Assembly) or proletarian (the soviets and non-Party Conferences). They proclaimed to the world the necessity of party dictatorship and how mass working class organisations could not exercise the so-called dictatorship of the proletariat. In March 1923 the Central Committee of the Communist Party, in a statement issued to mark the 25th anniversary of the founding of the Party, summarised the lessons gained from the Russian revolution: *"the party of the Bolsheviks proved able to stand out fearlessly against the vacillations within its own class, vacillations which, with the slightest weakness in the vanguard, could turn into an unprecedented defeat for the proletariat."* Vacillations, of course, are expressed by workers' democracy. Little wonder the statement rejects it: *"The dictatorship of the working class finds its expression in the dictatorship of the party."* [*"To the Workers of the USSR"* in G. Zinoviev, **History of the Bolshevik Party**, p. 213 and p. 214]

Bolshevik authoritarianism, needless to say, was not limited to the political regime. In the workplace, they replaced workers' economic democracy with *"one-man management"* selected from above, by the state. These *"individual executives"* would have *"dictatorial powers (or 'unlimited' powers)"* as there was *"absolutely **no** contradiction in principle between Soviet (**that is**, socialist) democracy and the exercise of dictatorial powers by individuals."* The applied also at the national level for *"our task is to study the state capitalism of the Germans, to spare **no effort** in copying it and not to shrink from adopting **dictatorial** methods to hasten the copying of it."* [**Collected Works**, vol. 27, p. 267, p. 268 and p. 340] He suggested dictatorial power was universal fact of all revolutions:

> *"in the history of revolutionary movements the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of the revolutionary classes has been shown by the irrefutable experience of history."* [**Op. Cit.**, p. 267]

It is churlish, but essential, to note that previous revolutionary movements had transformed one form of class society into another and so we must note, as well as refuting McNally's claim that Leninism is a democratic tradition, Lenin's comments display a distinct confusion over the nature of a **social** revolution (rather than a political one). Yes, **previous** revolutions may have

utilised the dictatorship of individuals but these revolutions have been revolutions from one class system to another. The "revolutionary" classes in question were **minority** classes and so elite rule would not in any way undermine their class nature. Not so with a **socialist** revolution which must be based on mass participation (in every aspect of society, economic, political, social) if it is too achieve its goals — namely a classless society. Little wonder, with such theoretical confusion, that the Russian revolution ended in Stalinism — the means used determined the ends. Unsurprisingly enough, the Bolshevik imposition of one-management simply transformed private-capitalism into state-capitalism, that is one form of class society into another (see section H.3.13). After the end of the Civil War Lenin summarised his position: *"Industry is indispensable, democracy is not. Industrial democracy breeds some utterly false ideas."* [**Op. Cit.**, vol. 32, p. 27]

This system of state-appointed "one-man" managers armed with *"dictatorial"* powers was not considered as opposed to socialism, as McNally implies. Lenin stressed in 1919 that the *"organisation of the communist activity of the proletariat and the entire policy of the Communists have new acquired a final, lasting form."* [**Op. Cit.**, vol. 30, p. 144] Moreover, after the end of the civil war he combated the idea of workers' control as (rightly!) a syndicalist and anarchist deviation within the party at odds with Marxism:

> *"Syndicalism hands over to the mass of non-Party workers ... the management of their industries ... thereby making the Party superfluous... Why have a Party, if industrial management is to be appointed ... by trade unions nine-tenths of whose members are non-Party workers?"* [**Op. Cit.**, vol. 32, p. 50]

He went so far as to admit that he thought *"the syndicalist deviation"* (i.e., giving the proletariat economic democracy, the power to elect their own workplace managers and economic conferences) *"leads to the collapse of the dictatorship of the proletariat"*. [**Op. Cit.**, p. 86] This was a theme to which he repeatedly returned:

> *"Does every worker know how to run the state? ... this is not true . .. If we say that it is not the Party but the trade unions that put up the candidates and administrate, it may sound very democratic ... It will be fatal for the dictatorship of the proletariat ... To govern you need an army of steeled revolutionary Communists. We have it, and it is called the Party. All this syndicalist nonsense about mandatory nominations of producers must go into the wastepaper basket. To proceed on those lines would mean thrusting the Party aside and making the dictatorship of the proletariat in Russia impossible."* [**Op. Cit.**, pp. 61–2]

In short, the economic relations favoured by the Bolsheviks were identical to that of capitalism except that the boss was replaced by a state-appointed bureaucrat, private-capitalism by state-capitalism (an awkward fact McNally cannot bring himself to mention, never mind admit to). *"In the shops where one-man management (Lenin's own preference) replaced collegial management,"* notes Diane Koenker, *"workers faced the same kinds of authoritarian management they thought existed only under capitalism."* The *"overall management of industry in 1921 was no more democratic than it had been in 1914; indeed, it was much more highly centralised, hierarchical, and bureaucratic."* [**Labour Relations in Socialist Russia**, p. 177 and p. 190]

Needless to say, the Bolsheviks also combated independent trade unions with the same methods. As one historian summarises, *"Soviets and trade unions with non-Bolshevik majorities, and*

there was a definite revival in the electoral fortunes of the opposition in the spring of 1918, were dispersed" and by the *"beginning of 1920 non-Bolshevik controlled trade union organisations no longer existed at the national level"*. [Jonathan Aves, *"The Demise of Non-Bolshevik Trade Unionism in Moscow: 1920–21"*, pp. 101–33, **Revolutionary Russia**, vol. 2, no. 1, pp. 101–2 and p. 103] By the end of 1920, the Bolsheviks had broken the both Menshevik-influenced printers and anarchist-influenced bakers union, with the offices of the former *"occupied by soldiers. Eleven members of the [union] board where arrested along with twenty-nine members of the Council of Representatives, factory committees and ordinary unionists . .. five were also members of the Moscow soviet. After being held without trial most were sentenced to terms between six months and two years in prison. The disbandment was approved by the plenum of the Moscow trade union council"* which *"also voted to disband the bakers' section. The leading anarchist members of the section ... and ... an SR Maximalist ... and two other members ... were barred from office and arrested to stand trial."* [Jonathan Aves, **Workers Against Lenin**, pp. 68–9] In May 1921, to present another example, the All-Russian Congress of the Metalworkers' Union met and the *"Central Committee of the [Communist] Party handed down to the Party faction in the union a list of recommended candidates for* ***union*** *(sic!) leadership. The metalworkers' delegates voted down the list, as did the Party faction in the union ... The Central Committee of the Party disregarded every one of the votes and appointed a Metalworkers' Committee of its own. So much for 'elected and revocable delegates.' Elected by the union rank and file and revocable by the Party leadership!"* [M. Brinton, *"The Bolsheviks and Workers' Control"*, **For Workers' Power,** , p. 375] The same year also saw the Bolshevik disperse provincial trade unions conferences in Vologda and Vitebsk *"because they had anti-communist majorities."* [Aves, **Op. Cit.**, p. 176]

A similar onslaught by the party against democracy also occurred in the armed forces. Trotsky simply abolished the soldier's committees and elected officers in early 1918, stating that *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree."* This destruction of military democracy was compared to the concurrent push by the Bolsheviks to introduce "one-man" management in production, as workplace democracy *"is not the last word in the economic constructive work of the proletariat"*. The *"next step must consist in self-limitation of the collegiate principle"* and its replacement by *"[p]olitical collegiate control by the Soviets"*, i.e. the state control Lenin had repeatedly advocated in 1917. Moreover *"for executive functions we must appoint technical specialists."* He ironically called this the working class *"throwing off the one-man management principles of its masters of yesterday"* and failed to recognise it was imposing the one-man management principles of new masters. As with Lenin, the destruction of workers' power at the point of production was of little concern for what mattered was that *"with power in our hands, we, the representatives of the working class"* would introduce socialism. [*"Work, Discipline, and Order to save the Socialist Soviet Republic"*, **How the Revolution Armed**, vol. 1, p. 47, p. 37 and p. 38]

Thus the Bolshevik tradition clearly placed the power of the party above the ability of working people to elect their own representatives, managers and officer. And McNally claims that his tradition aims at *"workers' power"* and a *"direct and active democracy"*!

Of course McNally tries to blame the destruction of democracy in Russia on the Civil War: *"By 1920, the very face of Russia had changed. Workers' democracy, in the meaningful sense of the term, had disappeared – as had most of the working class through death or retreat to the countryside."* This meant the rise of Stalinism for *"[a]s workers' democracy disintegrated, a new bureaucracy rose to power."* However, this is hard to accept, given that the undermining of democracy began **before**

the civil war started and continued **after** it had finished (for example, the onslaught on soviet democracy and attempts to impose one-man management in the workplace and armed forces predate the start of the civil war at the end of May 1918). Moreover, as we indicate in section 13, the Bolshevik state was marked by bureaucracy from the start.

Both these developments did not occur by accident, they were due to the nature of Bolshevik ideology and the kind of centralised structures it favoured. Trotsky is typical. In April 1918 he argued that once elected the government was to be given total power to make decisions and appoint people as required as it is *"better able to judge in the matter than"* the masses. The sovereign people were expected to simply obey their public servants until such time as they *"dismiss that government and appoint another."* Trotsky raised the question of whether it was possible for the government to act *"against the interests of the labouring and peasant masses?"* And answered no! Yet it is obvious that Trotsky's claim that *"there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members"* is just nonsense. [**Leon Trotsky Speaks**, p. 113] The history of trade unionism is full of examples of committees betraying their membership. Needless to say, the subsequent history Lenin's government showed that there can be *"antagonism"* between rulers and ruled and that appointments are always a key way to further elite interests. Needless to say, the notion that the party leaders are *"better able to judge in the matter than"* has its roots in Lenin's vanguardism, as discussed in section 11.

McNally's claim that the working class had been destroyed by the civil war is equally flawed and cannot explain the fact that attempts by working class people to express themselves were systematically undermined by the Bolshevik party. Nor does the notion of a *"disappeared"* working class make much sense when *"in the early part of 1921, a spontaneous strike movement ... took place in the industrial centres of European Russia"* and strikes involving around 43 000 per year took place between 1921 and 1925. [Samuel Farber, **Op. Cit.**, p. 188 and p. 88] As we show in section H.6.3, while the number of workers **did** decrease from 1918 to 1921, there remained substantial numbers who were able to and did take collective action before, during and after the civil war. So rather than there being objective reasons for the lack of democracy under Lenin we can suggest **political** reasons — the awareness that, given the choice, the Russian working class would have preferred someone else in power. Indeed, McNally's argument can be traced back to Lenin who formulated it *"to justify a political clamp-down"* in the face of rising working class protest rather than its lack: *"As discontent amongst workers became more and more difficult to ignore, Lenin ... began to argue that the consciousness of the working class had deteriorated ... workers had become 'declassed.'"* However, there *"is little evidence to suggest that the demands that workers made at the end of 1920 ... represented a fundamental change in aspirations since 1917."* [Aves, **Op. Cit.**, p. 18, p. 90 and p. 91]

Also, we must point out a certain duplicity in McNally's comments that Stalinism can be explained purely by the terrible civil war Russia experienced. After all, Lenin himself before seizing power mocked those who opposed revolution because *"the situation is exceptionally complicated"* and argued that *"the development of the revolution itself **always** creates an **exceptionally** complicated situation"* and that it was an *"incredibly complicated and painful process."* In fact, it was *"the most intense, furious, desperate class war and civil war. Not a single great revolution in history has taken place without civil war. And only a 'man in a muffler' can think that civil war is conceivable without an 'exceptionally complicated situation.'" "If the situation were not exceptionally complicated there would be no revolution."* [**Op. Cit.**, vol. 26, pp. 118–9] Thus McNally's assertion that

for *"the germ cell of socialism to grow [in Russia], it required several essential ingredients. One was peace. The new workers' state could not establish a thriving democracy so long as it was forced to raise an army and wage war to defend itself"* is simply incredible. It also raises an important question with regards Leninist ideas: if Bolshevik politics and its organisational form cannot survive during a period of disruption and complicated circumstances (i.e., a revolution) then it is clearly a theory to be avoided at all costs.

The leading Bolsheviks all argued that the specific problems their latter day followers blame for their authoritarianism were natural results of any revolution and, consequently, unavoidable. In addition, there is a slight irony in this standard but flawed excuse for Bolshevik authoritarianism as Leninists like to suggest that anarchists do not recognise the possibility of counter-revolution and so reject the idea of defending a revolution. As we discuss in section H.2.1, this is simply untrue — the anarchist rejection of "the dictatorship of the proletariat" has nothing to do with defending revolution. As Bakunin stressed, *"the sole means of opposing the reactionary forces of the state"* was the *"organising of the revolutionary force of the people."* [**Statism and Anarchy**, p. 156] So given that Leninists mock anarchists for their supposed naivety over the dangers of counter-revolution, it seems ironic that McNally uses what he is supposed to consider an inevitable aspect of revolution to explain (excuse would be the better word) the degeneration of the Bolshevik revolution. Long after 1917, Lenin repeated his earlier comments by stating *"history teaches us that no big question has ever been settled and no revolution accomplished without a series of wars."* [**Op. Cit.**, vol. 31, p. 494] He was adamant that *"were it not for this iron rule of the workers, of this workers' vanguard, we should not have been able to hold out for two months, let alone two years"*. [**Op. Cit.**, vol. 30, p. 498]

Simply put, if counter-revolution is considered inevitable by your ideology then explaining Bolshevik authoritarianism by it is unconvincing — particularly if that authoritarianism started **before** the start of the civil war at the end of May 1918 and continued **after** its end. So *"the effective conclusion of the Civil War at the beginning of 1920 was followed by a more determined and comprehensive attempt to apply these so-called War Communism policies rather than their relaxation"* and so the *"apogee of the War Communism economy occurred after the Civil War was effectively over."* With the fighting over Lenin *"forcefully raised the introduction of one-man management . .. Often commissars fresh from the Red Army were drafted into management positions in the factories."* By the autumn of 1920, one-man management was in 82% of surveyed workplaces. This *"intensification of War Communism labour policies would not have been a significant development if they had continued to be applied in the same haphazard manner as in 1919, but in early 1920 the Communist Party leadership was no longer distracted by the Civil War from concentrating its thoughts and efforts on the formulation and implementation of its labour policies."* While the *" experience of the Civil War was one factor predisposing communists towards applying military methods"* to the economy in early 1920, *"ideological considerations were also important."* [Jonathan Aves, **Workers Against Lenin**, p. 2, p. 17, p. 15, p. 30, p. 17 and p. 11] Unsurprisingly, then, the defeat of Wrangel in November 1920 saw no changes in Bolshevik policy nor the Bolshevik use of coercion against workers and peasants calling and protesting for the re-introduction of freedom and democracy.

So there is a continuity between Bolshevik policies before, during and after the civil war which McNally does not mention. Take one-man management, for example. This was advocated by Lenin **before** the civil war started and when he looked back at this time from April 1920, he reiterated his position (*"Dictatorial powers and one-man management are not contradictory to so-*

cialist democracy") while also stressing that this was not forced upon the Bolsheviks by civil war. It was time to build socialism and the *"whole attention of the Communist Party and the Soviet government is centred on peaceful economic development, on problems of the dictatorship and of one-man management". "When we tackled them for the first time in 1918, there was no civil war and no experience to speak of"* and so it was *"not only experience"* of civil war, argued Lenin *"but something more profound ... that has induced us now, as it did two years ago, to concentrate all our attention on labour discipline."* Lenin stressed that we *"need more discipline, more individual authority and more dictatorship".* [**Collected Works**, vol. 30, p. 503, p. 504 and p. 514]

The same can be said of the arguments for party dictatorship, which were raised at the Second Congress of the Communist International and aimed to influence the revolutionary movement across the globe. Trotsky wrote his infamous **Terrorism and Communism** as part of this debate between socialists and, to quote syndicalist-turned-Bolshevik Alfred Rosmer, it *"dealt with the theoretical and practical problems posed by the revolution, the civil war and the building of the new society"* and it *"formed a sort of introduction and commentary on the **Theses** prepared for the Congress."* As we show in section 15, this work acknowledged that party dictatorship was a necessity of a successful revolution, the need for one-man management as well as the militarisation of labour (needless to say, we also show how — McNally's claims notwithstanding — Trotsky did not reject these positions in the 1920s and 1930s). In addition, the congress took place in July 1920 when the civil war appeared to have been won, with Rosmer recalling that when he had arrived in *"June 1920"* in Russia *"the civil war was virtually at an end"* for *"[a]fter the triple blow struck at the interventionist forces, after the destruction of Kolchak, Yudenich and Denikin, the counter-revolution was defeated."* [**Lenin's Moscow**, p. 58, p. 65, p. 128 and p. 101]

To stress the point, Lenin, Zinoviev and Trotsky were all clearly arguing for party power, **not** workers' power, and that party dictatorship is inevitable in **every** revolution. This position was **not** put in terms of the problems facing the Russian Revolution but rather were expressed in universal terms and unsurprisingly, then *"[f]rom the first days of Bolshevik power there was only a weak correlation between the extent of 'peace' and the mildness or severity of Bolshevik rule, between the intensity of the war and the intensity of proto-war communist measures ... Considered in ideological terms there was little to distinguish the 'breathing space' (April-May 1918) from the war communism that followed."* Unsurprisingly, then, *"the breathing space of the first months of 1920 after the victories over Kolchak and Denikin ... saw their intensification and the militarisation of labour"* and, in fact, *"no serious attempt was made to review the aptness of war communist policies."* Ideology *"constantly impinged on the choices made at various points of the civil war ... Bolshevik authoritarianism cannot be ascribed simply to the Tsarist legacy or to adverse circumstances."* [Richard Sakwa, **Soviet Communists in Power**, p. 24, p. 27 and p. 30]

As we discuss in section H.6.2, Bolshevik ideology and the decisions it inspired helped make the difficult circumstances the revolution was facing worse. Their centralised vision of socialism could not help but produce economic mismanagement as well as a new class of bureaucrats. The inherent tendencies of Bolshevism were revealed by the civil war, a war which only accelerated the development of what was implicit (and, often, not so implicit) in Bolshevik ideology and its vision of socialism, the state and the role of the party. Therefore, in practice, Leninism has proven to be profoundly anti-democratic. In terms of McNally's argument, to not discuss in detail Bolshevik authoritarianism and blame it on the impact of the civil war is dishonest, particularly given the awkward fact that their anti-democratic activities started **before** its beginning at the end of May 1918.

Bolshevik authoritarianism had two main causes.

First, the obvious change in its social position — it became part of the state and, as a result, viewed society — and the working class — from above, as rulers. So as Marxism is *"centralist"* and aims for *"conscious, democratic, proletarian centralism"* it will inevitably lead to a new class system being created. [**The Lenin Anthology**, p. 348] This is not necessarily because Leninists seek dictatorship for themselves (although they do aim for party power — see section H.3.11) but rather it is because of the nature of the state machine. In the words of Murray Bookchin:

> *"Anarchist critics of Marx pointed out with considerable effect that any system of representation would become a statist interest in its own right, one that at best would work against the interests of the working classes (including the peasantry), and that at worst would be a dictatorial power as vicious as the worst bourgeois state machines. Indeed, with political power reinforced by economic power in the form of a nationalised economy, a 'workers' republic' might well prove to be a despotism (to use one of Bakunin's more favourite terms) of unparalleled oppression ...*
>
> *"Republican institutions, however much they are intended to express the interests of the workers, necessarily place policy-making in the hands of deputies and categorically do not constitute a 'proletariat organised as a ruling class.' If public policy, as distinguished from administrative activities, is not made by the people mobilised into assemblies and confederally co-ordinated by agents on a local, regional, and national basis, then a democracy in the precise sense of the term does not exist. The powers that people enjoy under such circumstances can be usurped without difficulty ... [I]f the people are to acquire real power over their lives and society, they must establish — and in the past they have, for brief periods of time established — well-ordered institutions in which they themselves directly formulate the policies of their communities and, in the case of their regions, elect confederal functionaries, revocable and strictly controllable, who will execute them. Only in this sense can a class, especially one committed to the abolition of classes, be mobilised as a class to manage society."* [*"The Communist Manifesto: Insights and Problems"*, pp. 14–17, **Black Flag**, no. 226, pp. 16–7]

As we discuss in section H.3.9, anarchists argue that the state cannot be considered as simply an instrument of economic class but, rather, has interests of its own. As such, concentrations of political power will produce a new class system and become independent of the masses of people and even of economically dominant classes like capitalists. This is why anarchists stress direct democracy (self-management) in free federations of free associations. It is the only way to ensure that power remains in the hands of the people and is not turned into an alien power above them. Thus Marxist support for statist forms of organisation will inevitably undermine the liberatory nature of the revolution. As we note in section 14, that is anarchists have long argued for the need for social transformation *"from below"*.

Second, as indicated in section H.5, their idea of the party being the "vanguard" of the working class, combined with its desire for centralised power, makes the dictatorship of the party **over** the proletariat inevitable. Lenin's belief that working class people could not liberate themselves explains his continual emphasis on **representative** democracy and centralism as well as the Bolshevik's easy slide into both practicing and advocating party dictatorship — simply put, the party must have power **over** the working class as that class could not be trusted to make the right

decisions (i.e. know what its "real" interests were). At best they would be allowed to vote for the government, but even this right could be removed if they voted for the wrong people as shown above. For Leninists, revolutionary consciousness is not generated by working class self-activity in the class struggle, but is embodied in the party (*"Since there can there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement* ***the only choice is****: either bourgeois or socialist ideology"* [Lenin, **The Essential Works of Lenin**, 82]). The conclusions of this position are obvious: the important issues facing the working class are to be determined not by the workers ourselves, but by the leadership of the party, who are the (self-appointed) *"vanguard of the proletariat"*.

The nature of the relationship between the party and the working class is clear. We remain incapable of achieving revolutionary consciousness and have to be led by the vanguard — using state coercion, if need be. As Lenin argued:

> *"it must he made clear that democracy under the Soviet system does not contradict dictatorship ... Unity of will must not be a catchword, a symbol. We demand it in practice. This is how unity of will was expressed during the [civil] war — anybody who placed his own interests (or the interests of his village or group) above the common interests, was branded as a self-seeker and was shot; this was justified by the moral consciousness of the working class that it must achieve victory. We spoke about these shootings openly; we said that we made no secret of coercion, because we realised that we could not emerge from the old society without resorting to compulsion as far as the backward section of the proletariat was concerned ..."* [**Op. Cit.**, vol. 30 pp. 509–10]

This raises numerous questions, the most obvious is **who** (which individual or group) decides which is and is not in the common interests? Another is, what is to stop this pivileged person or group placing **their** interests above *"the common interests"* and repressing those who object in the name of those very same *"common interests"*? Moreover, as **everyone** is — by definition! — *"backward"* in comparison to the vanguard in its own eyes, Lenin's position ensures that *"compulsion"* can be used by the party against **all** who it considers an danger to its power — including the proletariat it claims to be the ruling class. Hence the destruction of soviet, workplace, union and armed forces democracy and, of course, the creation of bodies of armed men (such as the political police, the Cheka) separate from the people (i.e., a state in the normal sense of the word — see section H.3.8).

In short, the notion that dictatorship does not contradict democracy is simply nonsense — self-serving nonsense, of course — and which could have no other impact than a negative one of socialism. What would stop, say, a Stalin proclaiming that his regime was simply using coercion against the backward sections of the masses in the common interest and that those who objected were placing their own interests above it? It is the crudest form of idealism to hope that the socialist principles of the ruling elite will overcome the pressures of their position in the social hierarchy and, unsurprisingly, it did not happen.

"If we perish", Lenin said privately to Trotsky in 1921, *"it is all the more important to preserve our ideological line and give a lesson to our continuators. This should never be forgotten, even in hopeless circumstances"*. [quoted by Brinton, *"The Bolsheviks and Workers' Control"*, **For Workers' Power**, p. 372] Hence the comments made by Zinoviev at the Second Congress of the Communist International, Trotsky in **Terrorism and Communism** and Lenin in innumerable speeches and

articles. Sadly for McNally's case, the lesson that the Bolsheviks wanted to give to the world revolutionary movement was not the importance of freedom and democracy but rather that party dictatorship and one-man management were necessary to achieve a successful revolution and that an economic regime which was obvious **state-capitalism** was socialism. Little wonder Leninists had so much difficulty in recognising Stalinism was a new class system — to do so would have been to raise awkward questions about the similar — if less brutal — regime under Lenin and Trotsky.

To conclude, both anarchism and Leninism have a critical position on democracy. Lenin argued that *"formal democracy must be subordinate to the revolutionary interest"* and in a sense he was right. [**Collected Works**, vol. 32, p. 86] As we indicated in section 7, anarchists argue that minorities should ignore (or rebel against) the majority if it is oppressing the minority — for progress to be achieved the *"revolutionary interest"* (freedom) must come first. Only in this way can the liberatory promise of democracy can be secured in the face of any potential dictatorship of the majority. The Leninist position is that a minority can ignore the majority only if it is the party leadership for it is they, the vanguard, who determine what the *"revolutionary interest"* is and, as a result, Leninism — for all its rhetoric — is fundamentally an anti-democratic ideology simply because this justifies party dictatorship as **everyone** is "backward" compared to the vanguard. McNally distorts the anarchist position while proclaiming the democratic credentials of Leninism. The facts are otherwise.

9. Why is McNally wrong on the relation of syndicalism to anarchism?

After slandering anarchism, McNally turns towards another form of libertarian socialism, namely syndicalism. It is worth quoting him in full as his comments are truly ridiculous:

> *"There is ... another trend which is sometimes associated with anarchism. This is syndicalism. The syndicalist outlook does believe in collective working class action to change society. Syndicalists look to trade union action — such as general strikes — to overthrow capitalism. Although some syndicalist viewpoints share a superficial similarity with anarchism — particularly with its hostility to politics and political action — syndicalism is not truly a form of anarchism. By accepting the need for mass, collective action and decision-making, syndicalism is much superior to classical anarchism."*

The weakness of McNally's position can be seen from comparing his summary of syndicalism's key ideas with *"classical anarchism"*, namely Bakunin's revolutionary anarchism. This passage by Bakunin expresses almost all the ideas McNally ascribes to syndicalism:

> *"Toilers count no longer on anyone but yourselves. Do not demoralise and paralyse your growing strength by being duped into alliances with bourgeois Radicalism ... Abstain from all participation in bourgeois Radicalism and organise outside of it the forces of the proletariat. The bases of this organisation ... are the workshops and the federation of workshops ... instruments of struggle against the bourgeoisie, and their federation, not only national, but international ... when the hour of revolution sounds, you will proclaim the liquidation of the State and of bourgeois society, anarchy, that is to say the true, frank people's revolution."* [quoted by K.J. Kenafick, **Michael Bakunin and Karl Marx**, pp. 120–1]

Bakunin, therefore, stressed trade union action, arguing as *"strikes spread from one place to another, they come close to turning into a general strike. And with the ideas of emancipation that now hold sway over the proletariat, a general strike can result only in a great cataclysm which forces society to shed its old skin."* He raised the possibility that this could *"arrive before the proletariat is sufficiently organised"* and dismissed it the *"necessities of the struggle impel the workers to support one another"* and the *"more active the struggle becomes ... the stronger and more extensive this federation of proletarians must become."* Thus strikes *"indicate a certain collective strength already"* and *"each strike becomes the point of departure for the formation of new groups."* [**The Basic Bakunin**, pp. 149–50]

For Bakunin, like the later syndicalists, *"the natural organisation of the masses ... is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association"* and once *"every occupation ... is represented within the International [Working-Men's Association], its organisation, the organisation of the masses of the people will be complete."* [**Op. Cit.**, p. 139] Thus *"unions create that conscious power without which no victory is possible"* while strikes *"create, organise, and form a workers' army, an army which is bound to break down the power of the bourgeoisie and the State, and lay the ground for a new world."* [**The Political Philosophy of Bakunin**, p. 379 and pp. 384–5] The *"organisation of the trade sections and their representation by the Chambers of Labour ... bear in themselves the living seeds of the new society which is to replace the old world. They are creating not only the ideas, but also the facts of the future itself."* [**Bakunin on Anarchism**, p. 255]

And yet McNally proclaims that Bakunin *"shared most of Proudhon's views"* and so, by implication, *"so feared the organised power of the developing working class that he went so far as to oppose trade unions"*! Rather than be against the *"freedom of the working class to make collectively a new society"*, Bakunin repeatedly argued that *"the new social order"* would be attained *"through the social (and therefore anti-political) organisation and power of the working masses of the cities and villages."* This would see *"capital and all tools of labour belong to the city workers — to the workers associations. The whole organisation of the future should be nothing but a free federation of workers — agricultural workers as well as factory workers and associations of craftsmen."* [**The Political Philosophy of Bakunin**, p. 300 an p. 410] This position was common to all revolutionary anarchists (see sections H.2.2 and H.2.7).

What is ridiculous about McNally's comments is that all historians who take the time to read Bakunin's works note the obvious links between his ideas and syndicalism. Let us present a few examples here (many writers also point to syndicalist aspects in Proudhon's ideas as well but we will concentrate on Bakunin). Thus we discover Caroline Cahm pointing out *"the basic syndicalist ideas of Bakunin"* and that he *"argued that trade union organisation and activity in the International [Working Men's Association] were important in the building of working-class power in the struggle against capital ... He also declared that trade union based organisation of the International would not only guide the revolution but also provide the basis for the organisation of the society of the future."* Indeed, he *"believed that trade unions had an essential part to play in the developing of revolutionary capacities of the workers as well as building up the organisation of the masses for revolution."* [**Kropotkin and the Rise of Revolutionary Anarchism**, p. 219, p. 215 and p. 216] George R. Esenwein noted that syndicalism *"had deep roots in the Spanish libertarian tradition. It can be traced to Bakunin's revolutionary collectivism"* and the class struggle was *"central to Bakunin's theory."* [**Anarchist Ideology and the Working Class Movement in Spain**, p. 209 and p. 20] The syndicalists *"viewed themselves as the descendants of the federalist*

wing of the First International, personified above else by Mikhail Bakunin." [Wayne Thorpe, **"The Workers Themselves"**, pp. xiii-xiv] *"Hardly any of these ideas [associated with syndicalism] are new"*, stated Bertrand Russell *"almost all are derived from the Bakunist [sic!] section of the old International"* and this was *"often recognised by Syndicalists themselves."* [**Roads to Freedom**, p. 52] J. Romero Maura correctly summarised that for the *"Bakuninists"* in the First International, the *"anarchist revolution, when it came, would be essentially brought about by the working class. Revolutionaries needed to gather great strength and must beware of underestimating the strength of reaction"* and so they *"logically decided that revolutionaries had better organise along the lines of labour organisations."* [*"The Spanish case"*, pp. 60–83, **Anarchism Today**, D. Apter and J. Joll (eds.), p. 66]

We could go on but as leading syndicalist activist and thinker Rudolf Rocker summarised:

> *"Modern Anarcho-syndicalism is a direct continuation of those social aspirations which took shape in the bosom of the First International and which were best understood and most strongly held by the libertarian wing of the great workers' alliance."* [**Anarcho-Syndicalism**, p. 54]

Perhaps, in the face of such evidence (and the writings of Bakunin himself!), Marxists like McNally could claim that the sources we quote are either anarchists or "sympathetic" to anarchism. To counter this we will quote Marx and Engels. According to Marx, Bakunin's theory consisted of urging the working class to *"only organise themselves by trades-unions"* and *"not occupy itself with **politics.**"* Engels asserted that in the *"Bakuninist programme a general strike is the lever employed by which the social revolution is started"* and that they admitted *"this required a well-formed organisation of the working class"*. [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 48, p. 132 and p. 133] Ignoring the misrepresentations of Marx and Engels about the theories of their enemies, we can state that they got the basic point of Bakunin's ideas — the centrality of trade union organisation and struggle as well as the use of strikes as the means of starting a social revolution.

(As an aside, ironically enough, Engels distorted diatribe against Bakunin and the general strike was later used against more radical Marxists like Rosa Luxemburg — usually claimed by Leninists as part of their tradition — by the reformists in Social Democratic Parties. For orthodox Marxists, the mass strike was linked to anarchism and Engels had proven that only political action — i.e. electioneering — could lead to working class emancipation. This appeal to authority lead Luxemburg to the innovative tactic of suggesting Engels was correct against the anarchist **general** strike but not against her **mass** strike! That this involved distorting the anarchist position — as Engels had done — should go without saying — see section H.3.5.)

It should be stressed that Bakunin's position on revolutionary class struggle waged by workers' organisations became the basis of revolutionary anarchism. Thus we find, for example, Emma Goldman arguing that in the First International *"Bakunin and the Latin workers"* forged ahead *"along industrial and Syndicalist lines"* and so syndicalism *"is, in essence, the economic expression of Anarchism"* and *"[l]ike Anarchism, Syndicalism prepares the workers along direct economic lines, as conscious factors in the great struggles of to-day, as well as conscious factors in the task of reconstructing society."* The *"most powerful weapon"* for liberation was *"the conscious, intelligent, organised, economic protest of the masses through direct action and the general strike."* [**Red Emma Speaks**, p. 89, p. 91 and p. 60] Kropotkin summarised the libertarian perspective well in 1907:

"Workmen's organisations are the real force capable of accomplishing the social revolution -\96 after the awakening of the proletariat has been accomplished, first by individual action, then by collective action, by strikes and revolts extending more and more; and where workmen's organisations have not allowed themselves to be dominated by the gentlemen who advocate 'the conquest of political power', but have continued to walk hand in hand with anarchists \96- as they have done in Spain -\96 they have obtained, on the one hand, immediate results (an eight-hour day in certain trades in Catalonia), and on the other have made good propaganda for the social revolution -\96 the one to come, not from the efforts of those highly-placed gentlemen, but from below, from workmen's organisations." [*"Anarchists and Trade Unions"*, **Direct Struggle Against Capital**, pp. 391–2]

We will leave the matter here and point interested readers to our extended discussion of the links between anarchism and syndicalism in section H.2.8. However, the inaccuracy of McNally's statement should be clear as we have shown that according to him *"syndicalism"* (i.e. Bakunin's ideas) is *"much superior to classical anarchism"* (i.e. Bakunin's ideas)! How spurious his argument actually is can be seen from his comments about syndicalism and its relation to anarchism.

10. Do syndicalists reject working class political action?

McNally, after getting the relationship between *"classical anarchism"* and syndicalism completely wrong (see last section), moves on to an equally flawed argument against syndicalism. He states that *"by rejecting the idea of working class political action, syndicalism has never been able to give real direction to attempts by workers to change society."* However, syndicalists (like all anarchists) are clear what kind of politics they reject — bourgeois politics (i.e. the running of candidates in elections). It is worth quoting Rudolf Rocker at length on McNally's claim:

"It has often been charged against Anarcho-Syndicalism that it has no interest in the political structure of the different countries, and consequently no interest in the political struggles of the time, and confines its activities to the fight for purely economic demands. This idea is altogether erroneous and springs either from outright ignorance or wilful distortion of the facts. It is not the political struggle as such which distinguishes the Anarcho-Syndicalists from the modern labour parties, both in principle and in tactics, but the form of this struggle and the aims which it has in view...

"The attitude of Anarcho-Syndicalism toward the political power of the present-day state is exactly the same as it takes toward the system of capitalist exploitation... [and so] Anarcho-Syndicalists pursue the same tactics in their fight against that political power which finds its expression in the state...

"For just as the worker cannot be indifferent to the economic conditions of his life in existing society, so he cannot remain indifferent to the political structure of his country... It is, therefore, utterly absurd to assert that the Anarcho-Syndicalists take no interest in the political struggles of the time... But the point of attack in the political struggle lies, not in the legislative bodies, but in the people... If they, nevertheless, reject any participation in the work of bourgeois parliaments, it is not because they have no sympathy

with political struggles in general, but because they are firmly convinced that parliamentary activity is for the workers the very weakest and the most hopeless form of the political struggle…

"But, most important of all, practical experience has shown that the participation of the workers in parliamentary activity cripples their power of resistance and dooms to futility their warfare against the existing system…

"Anarcho-Syndicalists, then, are not in any way opposed to the political struggle, but in their opinion this struggle, too, must take the form of direct action, in which the instruments of economic power which the working class has at its command are the most effective…

"The focal point of the political struggle lies, then, not in the political parties, but in the economic fighting organisations of the workers. It as the recognition of this which impelled the Anarcho-Syndicalists to centre all their activity on the Socialist education of the masses and on the utilisation of their economic and social power. Their method is that of direct action in both the economic and the political struggles of the time. That is the only method which has been able to achieve anything at all in every decisive moment in history." [**Op. Cit.**, pp. 73–78]

Rocker's work, **Anarcho-Syndicalism**, was written in 1938 and is considered the standard introduction to that theory. McNally wrote his pamphlet in the 1980s and did not bother to consult the classic introduction to the ideas he claims to be refuting. That in itself indicates the worth of his pamphlet and any claims it has for being remotely accurate with respect to anarchism and syndicalism.

Syndicalists, then, **do** reject working class *"political action"* only if you think "political action" means simply bourgeois politics — that is, electioneering, standing candidates for Parliament, local town councils and so on. It does not reject "political action" in the sense of direct action to effect political changes and reforms. As syndicalists Ford and Foster argued, syndicalists use *"the term 'political action' … in its ordinary and correct sense. Parliamentary action resulting from the exercise of the franchise is political action. Parliamentary action caused by the influence of direct action tactics … is not political action. It is simply a registration of direct action."* They also note that syndicalists *"have proven time and again that they can solve the many so-called political questions by direct action."* [Earl C. Ford and William Z. Foster, **Syndicalism**, p. 19f and p. 23] A historian of the British syndicalist movement reiterates this point:

"Nor did syndicalists neglect politics and the state. Revolutionary industrial movements were on the contrary highly 'political' in that they sought to understand, challenge and destroy the structure of capitalist power in society. They quite clearly perceived the oppressive role of the state whose periodic intervention in industrial unrest could hardly have been missed." [Bob Holton, **British Syndicalism: 1900–1914**, pp. 21–2]

This awareness that the state could not be ignored but had to be fought is reflected in the 1909 French syndicalist novel *How We Shall Bring About the Revolution* which discussed how the Chamber of Deputies was *"invaded from all sides"* by the crowd during the revolution, which *"threatened with death any deputies who should dare sit again."* The *"General Strikers were on*

watch" and *"in order to guard against any aggressive action by the fallen power, or any effort to re-establish Parliamentarianism, a certain number of their comrades should remain permanently at the Palais Bourdon"* and *"oppose by force any counter-revolutionary measures."* Guards were also used in *"the Police Offices, the Government Offices, the Elys'e, etc."* after *"having taken them by assault."* The town hall *"was not neglected"* and *"was occupied"* in a similar fashion. Thus there was a *"definite intention of disorganising the State, of dismantling and thoroughly disabling it"* to ensure it was *"impossible for the Government to recover itself, or rally around any point whatever."* Thus the general strike *"very soon changed into an insurrectional strike"* and *\93the General Strikers occupied the centres of Government action, and expelled the representative of the State.* The state would be replaced by *Bourses du Travail* (local federation of unions) and the Trades Unions Congress, with the latter being formed by delegates *"from all parts of France"* and *"from all trades, from all professions"* and *"having to decide upon points previously discussed by the comrades who had sent them."* The similarities to soviets — and Bakunin's ideas (see section 5) — are clear. Nor did they ignore the need to defend a revolution and like revolutionary anarchists (see section H.2.1) argued for the unions to form *"bands"* to *"watch over the security of the committees"* and *"sought to arm themselves"* in order to *"counterbalance the military and other forces"* which *"held them under the yoke."* The trade unions distributed arms and in each syndicate *"a group for defence was formed"* which entered *"into relation with like groups in the same district, and with distant centres"* by means of an *"organisation of defence, with a Trade Union and Federal basis."* These *"Syndicalist battalions were not a force external to the people. They were the people themselves"* who *"had the common-sense to arm themselves in order to protect their conquered liberty."* [Emile Pataud and Emile Pouget, **How We Shall Bring About the Revolution**, pp. 79–83, p. 94, pp. 128–9, p. 69 and pp. 155–7]

As we argued in section J.2.10, anarchist support for direct action and opposition to taking part in elections does not mean we are "apolitical" or reject political action. Anarchists have always been clear — we reject "political action" which is bourgeois in nature in favour of "political action" based on the organisations, action and solidarity of working class people. This is because electioneering corrupts those who take part, watering down their radical ideas and making them part of the system they were meant to change. As Rocker summarised:

> *"Participation in the politics of the bourgeois States has not brought the labour movement a hair's-breadth nearer to Socialism, but thanks to this method, Socialism has almost been completely crushed and condemned to insignificance ... Participation in parliamentary politics has affected the Socialist Labour movement like an insidious poison. It destroyed the belief in the necessity of constructive Socialist activity, and, worse of all, the impulse to self-help, by inoculating people with the ruinous delusion that salvation always comes from above."* [**Op. Cit.**, p. 54]

Rocker's last point is important, given that McNally seeks to appropriate the idea of *"from below"* for Marxism. He is well aware of the results of socialist electioneering, reporting how by the start of the 20th century *"most European socialists... came to the view that socialism would be achieved gradually, through the slow transformation of capitalism into a kind of welfare capitalism under which workers would prosper"* and *"[g]one was Marx's notion that socialism could only come into being through a revolutionary transformation of society from below. In its place developed the view that capitalism would slowly grow over into socialism."* However, he significantly fails to note

that these parties considered themselves as Marxist and had been following the strategy Marx and Engels had advocated.

It would have been informative to his readership if McNally had found time to discuss this awkward fact. One of the key differences between Marx and Bakunin in the First International was over *"political action"*: the forming of political parties and standing in elections. Bakunin argued that *"it is usually enough for these men of the people to enter government for them to become members of the bourgeoisie in their turn, sometimes scorning the people from whom they came more than do the natural-born members of the bourgeoisie."* The need was *"**the organisation of the might of the workers**, the unification of the proletariat of the entire world"* by *"eliminat[ing] from its program all bourgeois political schemes"* in favour of *"workers' solidarity in their struggle against the bosses. It means **trades unions, organisation, and the federation of resistance funds**."* [**The Basic Bakunin**, p. 51, p. 93, p. 99 and p. 103] Marx and Engels, in contrast, favoured *"political action"* and completely failed, unlike Bakunin, to recognise the dangers of reformism in the tactic. Indeed, in 1891 Engels proudly announced that the Brussels Congress of the Second International *"proved a brilliant success for us ... And, best of all, the anarchists have been shown the door, just as they were at the Hague Congress. The new, incomparably larger and avowedly Marxist International is beginning again at the precise spot where its predecessor ended."* [**Collected Works**, vol. 49, p. 238]

McNally, like most Leninists, is keen to distance Marx and Engels from Social Democracy and so does not note their repeated comments — both before **and** after the Paris Commune that socialism **could** come about peacefully by utilising elections (see section H.3.10). Engels in 1847, for example, argued that the *"first, fundamental condition for the introduction of community of property is the political liberation of the proletariat through a democratic constitution"* and so the revolution's had to *"inaugurate a **democratic constitution** and thereby ... the political rule of the proletariat"* as in *"America, where a democratic constitution has been introduced"* [**Collected Works**, vol. 6, p. 102, p. 350 and p. 356] In contrast, Proudhon had concluded the year before that the state could **not** be captured and reformed and socialism could only be created by proletarian self-organisation:

> *"Thus power [i.e. the state] ... finds itself inevitably enchained to capital and directed against the proletariat ... The problem before the labouring classes, then, consists, not in capturing, but in subduing both power and monopoly — that is, in generating from the bowels of the people, from the depths of labour, a greater authority, a more potent fact, which shall envelop capital and the State and subjugate them. Every proposition of reform which does not satisfy this condition is simply one scourge more ... which threatens the proletariat."* [**Property is Theft!**, p. 226]

The syndicalists, like Bakunin, argued the same — although, unlike the Frenchman, saw the trade union movement as the means of social transformation. It is almost redundant to note that history has proven the validity of anarchist anti-electioneering ideas. For example, as we argue in section J.2.6, the net result of the Marxists use of electioneering ("political action") was the de-radicalising of their movement and theory and its becoming yet another barrier to working class self-liberation. Rather than syndicalism not giving *"real direction to attempts by workers to change society"* it was Marxism in the shape of Social Democracy which did that. Indeed, at the turn of twentieth century more and more radicals turned to Syndicalism and Industrial Unionism

as the means of by-passing the dead-weight of Social Democracy (i.e. orthodox Marxism), its reformism, its opportunism and its bureaucracy.

This was recognised by Lenin, if in his own way. Anarchism, he suggested, *"was not infrequently a kind of penalty for the opportunist sins of the working-class movement."* [**Collected Works**, vol. 31, p. 32] His claim that anarchist and syndicalist support in the working class is the result of the opportunist nature of the Social Democratic Parties has an element of truth. Obviously militants sick to death of the reformist, corrupt and bureaucratic "working class" parties will seek a revolutionary alternative and find libertarian socialism. However, Lenin seeks to explain the symptoms (opportunism) and not the disease itself (Parliamentarianism) . Nowhere does he see the rise of "opportunist" tendencies in the Marxist parties as the result of the tactics and organisational struggles they used. Indeed, Lenin desired the new Communist Parties to practice electioneering ("political action"). Anarchists rather point out that given the nature of the means, the ends surely follow. Working in a bourgeois environment (Parliament) will result in bourgeoisifying and de-radicalising the party. Working in a centralised environment will empower the leaders of the party over the members and lead to bureaucratic tendencies. In short, the means urged inevitably produced a *"from above"* mentality and the descent into reformism — a descent Lenin only noticed with the outbreak of war in 1914 and the siding of German Social Democracy with its state in the imperialist slaughter.

As Bakunin predicted, using bourgeois institutions will corrupt "revolutionary" and radical parties and tie the working class to the current system. Lenin's analysis of anarchist influence as being the off-spring of opportunist tendencies in mainstream parties may be right, but if so it is a natural development as the tactics supported by Marxists from Marx onwards inevitably lead to opportunist tendencies developing. What Lenin could not comprehend was that opportunism was the symptom and electioneering was the disease — using the same means (electioneering) with different parties/individuals ("Communists" instead of "Social Democrats") and thinking that opportunism would not return was idealistic nonsense.

Sadly for his readers, McNally did not discuss any of this and preferred to present an inaccurate account of the syndicalist position on political struggles. Perhaps this is understandable, for an accurate account would mention the debates of the First International and have to draw the obvious conclusion: Bakunin — and the syndicalists — were right.

11. Why is McNally's claim that Leninism supports working class self-emancipation wrong?

McNally claims that Marx *"was the first major socialist thinker to make the principle of self-emancipation — the principle that socialism could only be brought into being by the self-mobilisation and self-organisation of the working class — a fundamental aspect of the socialist project."* This is not entirely true as *"Proudhon insisted that the revolution could only come from below, through the action of the workers themselves."* [K. Steven Vincent, **Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 157] In his words:

> *"Workers, labourers, men of the people, whoever you may be, the initiative of reform is yours. It is you who will accomplish that synthesis of social composition which will be the masterpiece of creation, and you alone can accomplish it."* [quoted by George Woodcock, **Pierre-Joseph Proudhon: A Biography**, p. 64]

As we indicated in section 2, Proudhon stressed that the working class had to free itself by its own means and its own organisations for, as indicated in section 10, the state was a capitalist institution which could not be captured by the masses. So while Proudhon placed his hopes in reformist tendencies (such as workers' co-operatives and mutual banks) he clearly believed in working class self-emancipation, even stating in 1848 that *"the proletariat must emancipate itself"* for *"the revolutionary power ... is not in the National Assembly: it is in you. The people alone, acting upon themselves without intermediary, can achieve the economic Revolution begun in February. The people alone can save civilisation and advance humanity!"* [**Property is Theft!**, 306 and p. 366]

Marx's use of the famous expression — *"the emancipation of the working class is the task of the working class itself"* — dates from 1865, 17 years after Proudhon's comment that *"the proletariat must emancipate itself."* Moreover, as Libertarian Marxist Paul Mattick pointed out, Marx was not even the first person to use the expression *"the emancipation of the working class is the task of the working class itself"* as Flora Tristan used it in 1843. [**Marx and Keynes**, p. 333] Thus a case could be made that Marx was, in fact, the **third** *"major socialist thinker to make the principle of self-emancipation — the principle that socialism could only be brought into being by the self-mobilisation and self-organisation of the working class — a fundamental aspect of the socialist project."*

Similarly, Bakunin continually quoted Marx's (and so Tristan's) words from the Preamble to the General Rules of the First International: *"That the emancipation of the workers must be accomplished by the workers themselves."* Far more than Marx, Bakunin argued that workers' can only free themselves by a *"single path, that of* ***emancipation through practical action****"* namely *"workers' solidarity in their struggle against the bosses"* by *"****trades-unions, organisation, and the federation of resistance funds****"*. The *"collective experience"* workers gain in the *"collective struggle of the workers against the bosses"* will ensure they *"will necessarily come to realise that there is an irreconcilable antagonism between the henchmen of reaction and [their] own dearest human concerns. Having reached this point, [the worker] will recognise [themselves] to be a revolutionary socialist."* [**The Basic Bakunin**, p. 92 and p. 103]

In contrast Marx placed his hopes for working class self-emancipation on a political party which would conquer "political power." As history soon proved, Marx was mistaken on two levels. First, as Bakunin predicted, political action by socialist parties resulted in the political system changing the party rather than vice versa, that it *"inexorably enmeshes its adherents, under the pretext of political tactics, in endless accommodations with governments and the various bourgeois political parties — that is, it thrusts them directly into reaction."* [**Statism and Anarchy**, p. 180] Second, "political power" can only be seized by a minority (i.e. the party, **not** the class it claims to represent) and if the few have the power, the rest are no longer free (i.e. they no longer govern themselves). That the many elect the few who issue them orders does **not** signify emancipation!

However, this is beside the point. McNally proudly places his ideas in the Leninist tradition. It is thus somewhat ironic that McNally claims that Marxism is based on self-emancipation of the working class while claiming Leninism as a form of Marxism as Lenin explicitly stated the opposite, namely that the working class **could not** liberate itself by its own actions. In his 1902 book **What is to be Done?** Lenin argued that *"the working class, exclusively by their own effort, is able to develop only trade union consciousness ... The theory of socialism [i.e. Marxism] ... grew out of the philosophic, historical and economic theories that were elaborated by the educated representatives of the propertied classes, the intellectuals ... the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia."* This meant that

"Social Democratic [i.e. socialist] consciousness ... could only be brought to them [the workers] from without." Speaking on behalf of workers, he asked that the *"intellectuals must talk to us, and tell us more about what we do not know and what we can never learn from our factory and 'economic' experience, that is, you must give us political knowledge."* [**Essential Works of Lenin**, pp. 74–5 and p. 108]

Thus, rather than believe in working class self-emancipation, Lenin thought the opposite. Without the radical bourgeois to provide the working class with "socialist" ideas, a socialist movement, let along society, was impossible. Hardly what you would consider self-emancipation. As Lenin put it:

> *"Since there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement,* ***the only choice is****: either bourgeois or socialist ideology. There is no middle course ... Hence, to belittle socialist ideology* ***in any way,*** *to* ***deviate from it in the slightest degree*** *means strengthening bourgeois ideology. There is a lot of talk about spontaneity, but the* ***spontaneous*** *development of the labour movement leads to its becoming subordinated to bourgeois ideology ... Hence our task, the task of Social-Democracy, is to* ***combat spontaneity,*** *to* ***divert*** *the labour movement from its spontaneous, trade unionist striving to go under the wing of the bourgeoisie, and to bring it under the wing of revolutionary Social-Democracy."* [**Op. Cit.**, pp. 82–3]

As we discuss in section H.5, this is a deeply anti-socialist position which, due to its privileging of the party, creates the theoretical justification for the anti-democratic actions of the Bolsheviks we sketched in section 8. This perspective states that the party has a better understanding of what the interests of the people are than the people themselves. If they reject the party then it means that they simply do not understand their own class interests and so they have become *"declassed"*, to use Lenin's term. The party, due to it being the repository of what socialism is, then has the right — the duty — to ignore the masses for to do otherwise *"means strengthening bourgeois ideology"*. That this is self-serving circular logic is an understatement but it is self-serving circular logic which, in revolutionary Russia, destroyed socialism in favour of state-capitalism and party dictatorship.

For this notion of working class passivity is not confined to the "early" Lenin of **What is to Be Done?** infamy (not that there is any evidence that Lenin later repudiated the ideas expressed there — see section H.5.4). It can be found in his apparently more "libertarian" work **The State and Revolution** which argues that *"we do not indulge in 'dreams' of dispensing* ***at once*** *. .. with all subordination; these anarchist dreams ... are totally alien to Marxism ... we want the socialist revolution with human nature as it is now, with human nature that cannot dispense with subordination, control and 'managers'"* Nowhere is the notion that working class people, during the process of mass struggle, direct action and revolution, **revolutionises themselves** (see sections A.2.7 and J.7.2, for example). Instead, we find a vision of people as they are under capitalism (*"human nature as it is now"*) and no vision of self-emancipation of the working class and the resulting changes that implies for those who are transforming society by their own action. Perhaps it will be argued that Lenin sees *"subordination"* as being *"to the armed vanguard of all the exploited ... i.e., to the proletariat"* and so there is no contradiction. However, this is not the case as he confuses the rule of the party with the rule of the class: *"We cannot imagine democracy, not even proletarian democracy, without representative institutions."* [**Op. Cit.**, p. 307 and p. 306]

Thus *"subordination"* is **not** to the working class itself (i.e. direct democracy or self-management). Rather it is the *"subordination"* of the majority to the minority, of the working class to "its" representatives. Thus we have a vision of a "socialist" society in which the majority have not revolutionised themselves and are subordinated to "their" party. Such a subordination, however, ensures that a socialist consciousness **cannot** develop as only the **process** of self-management generates the abilities required for self-management (*"Only freedom or the struggle for freedom can be the school for freedom."* [Malatesta, **Errico Malatesta: His Life and Ideas**, p. 59]). Lenin saw the revolution as the means by which the mass of the people will recognise that the vanguard party represents their interests and so vote it into power. However, as *"there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement"* any clash between the party and masses simply mean that the latter are wrong and *"the armed vanguard"* needs *"to **combat spontaneity**"* — literally, as we showed in section H.6.3. As Lenin admitted in 1920:

> *"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves."* [**Collected Works**, vol. 42, p. 170]

As we indicate in section H.3.8, this perspective meant that Leninist theorists ended up arguing for a state separate from the working class (a *"state in the proper sense of the word"*) rather than the semi-state promised in such works as **The State and Revolution** (a work whose promises, as we note in section H.1.7, were forsaken completely within six months of the Bolshevik seizure of power). This was required to ensure that the party could *"combat"* spontaneous movements in the working class which questioned the privileged position of the party — both ideologically (in terms of its advanced ideas) and politically (its holding of power). This privileged position for the party engenders a perspective which can (and did) justify party dictatorship **over** the proletariat. Given Lenin's position that the working class cannot formulate its own "ideology" by its own efforts, of its incapacity to move beyond *"trade union consciousness"* independently of the party, the clear implication is that the party could in no way be bound by the predominant views of the working class as these are, **by definition** non-socialist, bourgeois even. As the party embodies *"socialist consciousness"* (and this arises outside the working class and its struggles) then opposition of the working class to the party signifies a failure of the class to resist alien influences, a failure that the party must fight to ensure that this failure does not spread to the revolution itself — the proletariat, in short, must be repressed in its own interests by the "proletarian" dictatorship.

Therefore McNally's comments that Leninism is a valid expression of Marx's idea of proletarian self-emancipation is false. In reality, Lenin rejected the idea that working class people can emancipate themselves and, therefore, any claim that this tradition stands for proletarian self-emancipation is false. Rather Leninism, for all its rhetoric, has no vision of working class self-activity leading to self-liberation — it denies it can happen and that is why it stresses the role of the party and its need to take centralised power into its own hands. Of course, it never entered Lenin's mind that if bourgeois ideology imposes itself onto the working class it also imposes itself on the party as well — more so as they are bourgeois intellectuals in the first place.

While anarchists are aware of the need for groups of like minded individuals to influence the class struggle and spread anarchist ideas, we reject the idea that such ideas have to be "injected"

into the working class from outside. Rather, as we argued in section J.3, anarchist ideas are developed within the class struggle by working people themselves. Anarchist groups exist because we are aware that there is an uneven development of ideas within our class and to aid the spreading of libertarian ideas it is useful for those with those ideas to work together. However, being aware that our ideas are the product of working class life and struggle we are also aware that we have to learn from that struggle. It is because of this that anarchists stress self-management of working class struggle and organisation from below (anarchists are, to use Bakunin's words, *"convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction"* [**Michael Bakunin: Selected Writings**, p. 237]). Only when this happens can new ways of life be created and truly develop freely. It also explains anarchist opposition to political groups seizing power — that will only result in old dogmas crushing the initiative of people in struggle and the new forms of life they create. That is why anarchists stress the importance of revolutionaries using *"natural influence"* (i.e. arguing their ideas in popular organisations and convincing by reason) — doing so allows new developments and ideas to be expressed and enriched by existing ones and vice versa.

One last point. It could be argued that similar comments to Lenin's arguments can be found in Marx and Engels and so Marxism **as such** rather than just Leninism does not believe in proletarian self-emancipation. After all, had not **The Manifesto of the Communist Party** proclaimed that *"a small section of the ruling class cuts itself adrift, and joins the revolutionary class"* and this *"portion of the bourgeois ideologists"* have *"raised themselves to the level of comprehending theoretically the historical movement as a whole."* In addition, the Communists are *"the most advanced and resolute section of the working-class parties"* and *"they have over the great mass of the proletariat the advantage of clearly understanding the line of march, the conditions, and the general results of the proletarian movement"*. [**The Marx-Engels Reader**, p. 481 and p. 484] This, needless to say, places *"bourgeois ideologists"* and party leaders (like Marx, Engels, Lenin and Trotsky) in a privileged position within the party, labour movement and society as a whole. Had not Marx and Engels argued in **The Holy Family** that the *"question is not what this or that proletarian, or even the whole of the proletariat at the moment **considers** as its aim. The question is **what the proletariat is**, and what, consequent on that **being**, it will be compelled to do."* [quoted by Murray Bookchin, **The Spanish Anarchists**, p. 280] As Murray Bookchin argued:

> *"These lines and others like them in Marx's writings were to provide the rationale for asserting the authority of Marxist parties and their armed detachments over and even against the proletariat. Claiming a deeper and more informed comprehension of the situation than 'even the whole of the proletariat at the given moment,' Marxist parties went on to dissolve such revolutionary forms of proletarian organisation as factory committees and ultimately to totally regiment the proletariat according to lines established by the party leadership."* [**Op. Cit.**, p. 289]

Unlike Lenin and Trotsky, Marx and Engels rarely drew the obvious conclusions from their arguments (although their contempt for working class socialist thinkers — like Proudhon — was legendary) but the elitism was there. It is to Bakunin's merit that he recognised the danger long before the likes of Lenin and Trotsky (see section 15) made it explicit.

12. Why is Marxist "class analysis" of anarchism contradictory?

Another ironic aspect of McNally's pamphlet is its demonisation of anarchism combined with praise for the Paris Commune and the Russian Soviets. This is because key aspects of both revolutionary forms were predicted by Proudhon and Bakunin. For example, McNally's and Marx's praise for revocable mandates in the Commune was advocated by Proudhon in 1840s (see section 4). Bakunin also advocated this in the late 1860s along with a federation of delegates from workplaces which showed a marked similarity with the Russian soviets (see section 5).

Indeed, the Paris Commune (in both its economic and political aspects) showed a clear inspiration from Proudhon's works. In the words of George Woodcock, there are *"demands in the Commune's Manifesto to the French People of the 19th April, 1871, that might have been written by Proudhon himself."* [**Pierre-Joseph Proudhon: A Biography**, p. 276] K. Steven Vincent also points out that the declaration *"is strongly federalist in tone, and it has a marked proudhonian flavour."* [**Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 232] Moreover, the desire to replace wage labour with associated labour by the creation of co-operatives expressed during the Commune clearly showed the influence of Proudhon. Marx mentions a *"rough sketch of national organisation which the Commune had no time to develop"* but does not quote from it. [**The Marx-Engels Reader**, p. 633] This is perhaps unsurprising as the Commune's declaration clearly shows its anarchist roots and tendencies:

> *"The absolute autonomy of the Commune extended to all localities in France and assuring to each one its full rights, and to every Frenchman the full exercise of his faculties and abilities as man, citizen and producer.*
>
> *"The only limit to the autonomy of the Commune should be the equal right to autonomy for all communes adhering to the contract, whose association shall insure French unity ... The choice by election or competition of magistrates and communal functionaries of all orders, as well as the permanent right of control and revocation.*
>
> *"The absolute guarantee of individual freedom and freedom of conscience.*
>
> *"The permanent intervention of citizens in communal affairs by the free manifestation of their ideas, the free defence of their interests ...*
>
> *"The organisation of urban defence and the National Guard, which elects its chiefs and alone watches over the maintenance of order in the city . ..*
>
> *"Paris wants nothing else as a local guarantee, on condition, of course, of finding in the great central administration — the delegation of federated Communes — the realisation and the practice of the same principles. But as an element of its autonomy, and profiting by its freedom of action, within its borders it reserves to itself the right to operate the administrative and economic reforms called for by the populace as it wills; to create the institutions needed to develop and spread instruction, production, exchange and credit; to universalise power and property in keeping with the needs of the moment, the wishes of those concerned and the facts furnished by experience.*
>
> *"Unity, as it has been imposed on us until today by the Empire, the monarchy or parliamentarism is nothing but unintelligent, arbitrary or onerous centralisation.*

> *"Political unity, as Paris wants it, is the voluntary association of all local initiatives, the spontaneous and free concourse of all individual energies in view of a common goal: the well-being, the freedom and the security of all.*
>
> *"The communal revolution, begun by popular initiative on March 18, begins a new era of experimental, positive, scientific politics.*
>
> *"It is the end of the old governmental and clerical world, of militarism and bureaucracy, of exploitation, speculation, monopolies and privileges to which the proletariat owe their servitude and the Fatherland its misfortunes and disasters."* [*"Declaration to the French People"*, pp. 789–791, **Property is Theft!**, pp. 789–790]

The links with Proudhon's ideas cannot be clearer. Little wonder, then, that during the Commune anarchist James Guillaume stated that *"the Paris Revolution is federalist ... in the sense given it years ago by the great socialist, Proudhon."* It is *"above all the negation of the nation and the State."* [contained in **The Paris Commune of 1871: The View From the Left**, Eugene Schulkind (ed.), p. 191] Bakunin, for his part, rightly argued that its *"general effect was so striking that the Marxists themselves, who saw their ideas upset by the uprising, found themselves compelled to take their hats off to it. They went further, and proclaimed that its programme and purpose where their own, in face of the simplest logic ... This was a truly farcical change of costume, but they were bound to make it, for fear of being overtaken and left behind in the wave of feeling which the rising produced throughout the world."* [**Michael Bakunin: Selected Writings**, p. 261]

To see why, we need simply to compare Marx's reporting of the Commune with Proudhon's words. Marx stated, correctly, that the Commune *"was formed of the municipal councillors, chosen by universal suffrage in the various wards of the town, responsible and revocable at short terms"* and was *"a working, not a parliamentary, body, executive and legislative at the same time"*. The delegates would *"revocable and bound by the **mandat imperatif** (formal instructions) of his constituents"* [**The Marx-Engels Readers**, p. 632 and p. 633] As well as arguing that *"federalism is the political form of humanity"*, Proudhon also argued that the *"legislative power is not distinguished from the executive power."* [**Property is Theft!**, p. 678 and p. 674] As he put it in 1848:

> *"It is up to the National Assembly, through organisation of its committees, to exercise executive power, just the way it exercises legislative power ... Besides universal suffrage and as a consequence of universal suffrage, we want implementation of the imperative mandate [**mandat imp'ratif**]. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy."* [**Op. Cit.**, pp. 378–9]

This applies to the economic goals of the Commune, with Marx suggesting that it *"wanted to make individual property a truth by transforming the means of production, land, capital, now chiefly the means of enslaving and exploiting labour, into mere instruments of free and associated labour"* and *"this is Communism"*. Engels, twenty years later, painted a picture of Proudhon being opposed to association (except for large-scale industry) and stated that *"to combine all these associations in one great union"* was *"the direct opposite of the Proudhon doctrine"* and so *"the Commune was the grave of the Proudhon school of socialism."* [**Op. Cit.**, p. 635 and p. 626] Yet they must have been aware of Proudhon's support for large-scale industry and workers associations

(section 4) as expressed, for example, in his 1863 call for an *"agricultural-industrial federation"* or his 1846 comment that *"to unfold the system of economic contradictions is to lay the foundations of universal association"* [**Op. Cit.**, p. 712 and p. 179] As he put it in 1848:

> *"under universal association, ownership of the land and of the instruments of labour is **social** ownership ... We want the mines, canals, railways handed over to democratically organised workers\92 associations ... We want these associations to be models for agriculture, industry and trade, the pioneering core of that vast federation of companies and societies woven into the common cloth of the democratic and social Republic."* [**Op. Cit.**, pp. 777–8]

Given that Marx described the Commune as *"essentially a working-class government"*, *"the political form at last discovered under which to work out the economic emancipation of labour"* and *"will be for ever celebrated as the glorious harbinger of a new society"*, it is strange that McNally terms Proudhon's and Bakunin's ideas as those of the past. [**Op. Cit.**, pp. 634–5 and p. 652] It seems the height of hypocrisy for McNally to attack Proudhon while praising the Paris Commune.

So the awkward fact is that anarchists had been advocating these forms since Proudhon in the 1840s and they were developed by Bakunin in the 1860s. Nothing similar can be found in Marx until the Commune which suggests, as Anarchist K.J. Kenafick stated, *"that the programme [the Commune] set out is ... the system of Federalism, which Bakunin had been advocating for years, and which had first been enunciated by Proudhon. The Proudhonists ... exercised considerable influence in the Commune. This 'political form' was therefore not 'at last' discovered; it had been discovered years ago; and now it was proven to be correct by the very fact that in the crisis the Paris workers adopted it almost automatically, under the pressure of circumstance, rather than as the result of theory, as being the form most suitable to express working class aspirations."* [**Michael Bakunin and Karl Marx**, pp. 212–3]

Little wonder few Marxists (like Marx himself) directly quote from the Commune's declaration. It would be difficult to attack anarchism (as "petty-bourgeois") while proclaiming the Paris Commune as the first example of *"the dictatorship of the Proletariat."* The decentralised, federalist nature of the Commune cannot be squared with the usual Marxist instance on centralisation and the claim that federalism *"as a principle follows logically from the petty-bourgeois views of anarchism. Marx was a centralist"* and to *"confuse Marx's views ... with Proudhon's federalism is positively monstrous!"* While there may be *"not a trace of federalism"* in Marx's *"observations on the experience of the Commune"*, the Commune **itself** was distinctly federalist in its aspirations. If Marx *"upheld democratic centralism, the republic — one and indivisible"* the same cannot be said of the Communards themselves. [Lenin, *"The State and Revolution"*, **The Lenin Anthology**, p. 348, p. 347 and p. 361] As Paul Avrich noted, the *"influence of Proudhon — unquestionably greater than that of Marx — was reflected in the title of 'Federals' by which the Communards were known."* [**Anarchist Portraits**, p. 232]

This is not to suggest that the Commune was a perfect example of anarchism in action — far from it. As we indicate in section A.5.1, while it wished federalism outside of Paris it was not federalist within its boundaries. If, as Marx put it, *"the Paris Commune took the management of the revolution in its own hands"* then its structure simply was not up to its tasks. [**Op. Cit.**, p. 636] As Bakunin put it, while the Commune was *"a bold and outspoken negation of the State"*, the Communards had set up *"a revolutionary government"* within Paris and so organised *"themselves*

in reactionary Jacobin fashion, forgetting or sacrificing what they themselves knew were the first conditions of revolutionary socialism", rather than *"by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal"* organised *"solely from the bottom upwards."* [**Michael Bakunin: Selected Writings**, p. 199, p. 202 and p. 206] Building on Bakunin's comments, Kropotkin argued that while *"proclaiming the free Commune, the people of Paris proclaimed an essential anarchist principle"* but *"they stopped mid-course"* and gave *"themselves a Communal Council copied from the old municipal councils."* Thus the Paris Commune did not *"break with the tradition of the State, of representative government, and it did not attempt to achieve within the Commune that organisation from the simple to the complex it inaugurated by proclaiming the independence and free federation of the Communes."* Kropotkin continually stressed that the revolutionaries were isolated from the masses and shut-up in the town hall which lead to disaster as the Commune council became *"immobilised ... by red tape"* and lost *"the sensitivity that comes from continued contact with the masses ... Paralysed by their distancing from the revolutionary centre \96- the people -\96 they themselves paralysed the popular initiative."* [**Words of a Rebel**, p. 97, p. 93 and p. 97]

So the Commune applied aspects of anarchism but not all. However, the main thrust of the revolt was federalist in nature — something Marxists tend to forget to mention. Anarchists argued that the Commune should have rejected the Municipal Council and instead organised a workers' council. Anarchist ideas, then, as can be seen from the Paris Commune and the soviets were the ideas **of the future** — and of working class self-liberation and self-organisation. And ones that Marx and his followers paid lip service to.

(We say lip service for Marx's praise for the Commune did not stop him recommending the labour movement to stand candidates in national elections nor did Lenin quoting Marx's statement that the future proletarian state, like the Paris Commune, would abolish the distinction between executive and administrative powers mean he honoured it. Immediately after the October Revolution the Bolsheviks established an executive power **above** the soviets, namely the Council of People's Commissars. Those who quote Lenin's **The State and Revolution** as proof of his democratic nature usually fail to mention this little fact. In practice that work was little more than an election manifesto to be broken as required, as we shown in section H.1.7)

In fact, the Paris Commune was primarily the work of artisans (the bulk of the Parisian workers at the time). This is reflected in Marx's comments in 1866 that the French workers were *"corrupted"* by Proudhon's *"sham criticism and sham opposition to the Utopians (he himself is only a petty-bourgeois utopian ...)"*, *"particularly those of Paris, who as workers in luxury trades are strongly attached, without knowing it [!], to the old rubbish."* The *"Parisian gentlemen had their heads full of the emptiest Proudhonist phrases"* and so *"Proudhon did enormous mischief."* [Marx, Engels and Lenin, **Anarchism and Anarcho-syndicalism**, pp. 45–6] Five years later, these workers (still obviously influenced by *"the old rubbish"* and their heads still full of *"Proudhonist phrases"*) created *"the political form"* of *"the economic emancipation of labour."* This is not explained by Marxists, who also do not trouble themselves to explain how can the Paris Commune be the *"Dictatorship of the Proletariat"* when 35 members of the Commune's council were artisans and only 4 or 5 were industrial workers (i.e. proletarians).

Can the fact that Proudhon-influenced artisans were, according to McNally and Marx, social strata of the past, were backward looking, etc. be reconciled with the claim that the Paris Commune was the political form of proletarian emancipation? No, not from a Marxist class analysis.

Hence Marxists ignoring the real nature of the Parisian working class when discussing the commune. However, from an anarchist perspective — which sees the artisan, peasant and proletariat forming a common class of working people — the development of the Paris Commune is no surprise. It is the work of people seeking to end wage labour and the threat of wage labour **now** rather than sometime in the future once capitalism has fully developed. Thus McNally's (and Marx's) support for the Commune makes a mockery of his attacks on anarchism as the theory of the artisans and peasants for it was the artisans who created the first model of their *"proletarian"* state and applied what they say they consider the foundations of *"proletarian"* democracy — electing mandated and recallable delegates. That the "petty-bourgeois" Proudhon advocated this 23 years before Marx did is, of course, left unsaid.

As indicated, McNally's arguments do not hold water. Ironically, if anarchism was the death-cry of the artisan and peasant then it is strange, to say the least, that this theory so influenced the Paris Commune which McNally praises so much. We therefore suggest that rather than being a backward-looking cry of despair for those disappearing under the wheels of rising capitalism, anarchism was in fact a theory developed from the struggles and self-activity of those currently suffering capitalist and state oppression — namely the artisans, peasants **and** industrial proletariat (i.e. the working class as a whole). In other words, it is a philosophy and theory for the future, not of the past. This can be seen from the libertarian aspects of the Paris Commune, aspects Marx immediately tried to appropriate for his own theories (which, unfortunately, were swamped by the authoritarian elements that existed already).

In addition the *"old rubbish"* the Parisian workers supported was very much ahead of its time. In 1869 the delegate of the Parisian Construction Workers' Trade Union argued that *"[a]ssociation of the different corporations [labour unions] on the basis of town or country . .. leads to the commune of the future ... Government is replaced by the assembled councils of the trade bodies, and by a committee of their respective delegates."* In addition, *"a local grouping which allows the workers in the same area to liaise on a day to day basis"* and *"a linking up of the various localities, fields, regions, etc."* (i.e. international trade or industrial union federations) would ensure that *"labour organises for present and future by doing away with wage slavery."* [**No Gods, No Masters**, vol. 1, p. 184] Such a vision of workers' councils and associated labour has obvious similarities with the spontaneously created soviets of the 1905 Russian Revolution. These, too, were based on assembled councils of workers' delegates. Of course they were differences but the basic idea and vision are identical.

Therefore to claim that anarchism represents the past presents Marxists with a few problems given the nature of the Paris Commune and its obvious libertarian nature. If it is claimed that the Parisian artisans defended *"not their present, but their future interests"* and so *"desert[ed] their own standpoint to place themselves at that of the proletariat"* (the class they are being *"tranfer[ed]"* into by the rise of capitalism) then, clearly, anarchist ideas are *"future,"* proletarian, ideas as it is that class interest artisans serve *"[i]f by chance they are revolutionary."* [Marx and Engels, *"The Communist Manifesto"*, **The Marx-Engels Reader**, p. 482]

Whichever way you look at it, McNally's claims on the class nature of anarchism do not stand up to close analysis. Proudhon addressed both artisan/peasant and wage-worker in his works. He addressed both the current and the future working class. Bakunin did likewise. Moreover, both were part of the workers movement. Proudhon was working class, the son of an artisan and peasant who was a printer by trade, and took part in the debates and polemics of the French socialist movement as well as the 1848 Revolution. Bakunin joined the First International, taking

an active part in its debates and championing the syndicalist ideas which had evolved from Proudhon's mutualism in France, Belgium, Spain and Italy. As Paul Avrich suggests, as *"early as the 1860's and 1870's, the followers of Proudhon and Bakunin in the First International were proposing the formation of workers' councils designed both as a weapon of class struggle against capitalists and as the structural basis of the future libertarian society"* [**The Russian Anarchists**, p. 73] Therefore it is not surprising that Proudhon and Bakunin predicted aspects of the Paris Commune — they were expressing the politics of the future. As is clear from their writings, which still remain fresh today.

This is reflected in another comment by McNally, who writes that *"all major trends in Russian socialism had believed that a bourgeois democratic revolution — a revolution against Czarism and for the establishment not of socialism but merely of liberal capitalism — would have to precede a workers' revolution in Russia. In 1906, Leon Trotsky developed a dissenting view. Only the working class of Russia, Trotsky argued, would be willing and able to carry through the fight for democratic reforms and for a democratic republic. But why, he asked, should the workers be expected to stop at that point? Why should they not extend the fight for democratic rights into a struggle for workers' control and socialist democracy?"* In reality, the idea that working people should extend a revolution from political to economic goals was raised by both Proudhon and Bakunin long before Trotsky and, moreover, was advocated by Kropotkin the year before Trotsky introduced it into Marxism.

Thus Proudhon argued that the 1848 revolution *"had been made 'without an idea' and that it had unfortunately satisfied itself with the proclamation of purely political palliatives"* and *"he did not believe that such political reforms would solve the social problem."* [K. Steven Vincent, **Op. Cit.**, p. 169] Bakunin took up, as with so many other things, Proudhon's argument and, as we discuss in section H.1.1, a key part of Bakunin's critique of Marxism was precisely that it looked to political change before social and economic transformation, the latter coming as a result of "political action" allowed by the previous political revolution. Thus *"[t]o win political freedom first can signify no other thing but to win this freedom only, leaving for the first days at least economic and social relations in the same old state, — that is, leaving the proprietors and capitalists with their insolent wealth, and the workers with their poverty."* [**The Political Philosophy of Bakunin**, p. 294] This meant that anarchists aimed to ensure any revolution was *"simultaneously universal, social, philosophical, economic and political revolution"*. The *"revolution as we understand it will ... set about the ... complete destruction of the State ... The natural and necessary upshot of that destruction"* will include the *"[d]issolution of the army, magistracy, bureaucracy, police and clergy"* and *"[a]ll productive capital and instruments of labour ... be[ing] confiscated for the benefit of toilers associations, which will have to put them to use in collective production"* as well as the *"[s]eizure of all Church and State properties."* The *"federated Alliance of all labour associations ... will constitute the Commune."* The people *"must make the revolution everywhere, and ... ultimate direction of it must at all times be vested in the people organised into a free federation of agricultural and industrial associations ... organised from the bottom up."* [**No Gods, No Masters**, vol. 1 pp. 152–6] This was echoed by Kropotkin in 1905:

> *"The Russian people — the working men — having compelled the autocrat to abdicate his despotic power, must compel him now to give body to his abdication by sending away the troops upon which rest his power and the power of bureaucracy, the power of unbridled capitalism.*

> *"The people must arm itself; otherwise the Tsar, the bureaucrats and the capitalists will crush it down ... the Russian working men must not forget **their own demands**. To guarantee the individual against police arbitrariness is necessary for all. But he who works and produces riches with his own hands requires something else... . If you are compelled tomorrow, after the Constitution has been proclaimed, to return to the factories the same slaves as you have been before, then you will have been betrayed ...*
>
> *"Don't expect anything from would-be saviours. But in every factory, every building yard, every workshop, and every mine, **establish yourselves the order of things which, by common accord, you will find proper to establish**. But remember this: Don't allow others to interfere! It is **your** affair, and **you** have to settle it.*
>
> *"***Accomplish yourselves a revolution in the organisation of labour as you have accomplished it in the general administration of the Russian State.***
>
> *"Don't trust those who will tell you: 'Not yet! It is too soon!' No, it is not too soon; it is just the time for it."* [*"The Revolution in Russia"*, **Direct Struggle Against Capital**, pp. 456–7]

As with the Paris Commune and the soviets, yet another key aspect of McNally's Marxism was first advocated by anarchists. As Emma Goldman noted in 1918, the Bolsheviks where *"adopting Anarchist Revolutionary tactics"* and, unlike in 1905, in 1917 they *"no longer believe"* that *"the industrialisation of Russia and the historic mission of the bourgeoisie as a necessary evolutionary process before the Russian masses could come into their own"* and now accepted *"the point of view held by the Anarchists since Bakunin; namely, that once the masses become conscious of their economic power, they make their own history"* and so revolution *"means a fundamental social and economic change, something which has its roots in the needs and hopes of the people and which must not end until the disinherited of the earth come into their own. In a word, the Russian people saw in the overthrow of the autocracy the **beginning** and not the **finale** of the Revolution."* For the toiler, the Russian Revolution *"can mean nothing ... unless it sets the land fee and joins to the dethroned Tsar his partner, the dethroned land-owner, the capitalist."* [*"The Truth About the Bolsheviki"*, **Writings of Emma Goldman**, p. 163 and p. 165]

So when Victor Serge, like McNally, stated that by concluding the *"self-evident truth"* that *"the Russian Revolution cannot confine itself to changing the political order"* in 1917 but that it had to take in *"a social character"* by expropriating capital and land he was unknowingly *"on the line"* advocated by Lenin we must remember that this was not *"the line"* pioneered by Trotsky but rather the one raised by Kropotkin and other anarchists during the 1905 revolution (and rejected at the time by all Marxists) **and** that this had been argued for since the late 1860s by Bakunin and other libertarians. [**Memoirs of a Revolutionary**, p. 60]

This confusion associated with Marxist "class analysis" of anarchism was also present in Lenin. Given that anarchism is apparently associated with the petty-bourgeois we find a strange contradiction in Lenin's work. On the one hand Lenin argued that Russia *"despite the more petty-bourgeois composition of her population as compared with the other European countries"* anarchist influence was *"negligible during the two revolutions (of 1905 and 1917)"*. The lack of influence in Russia, he claimed, was due to Bolshevism having *"waged a most ruthless and uncompromising struggle against opportunism"* for anarchism was *"a penalty for the opportunist sins of the working-class movement."* On the other he admitted that, in the developed capitalist nations, syndicalism

was *"a profoundly proletarian and mass movement"* and that it is *"the duty of all Communists to do everything to help all proletarian mass elements to abandon anarchism ... the measure in which genuinely Communist parties succeed in winning mass proletarian elements ... away from anarchism, is a criterion of the success of those Parties."* [**Collected Works**, vol. 31, p. 31, p. 32, p. 200 and p. 201]

Thus, in the most capitalist nations, ones with a more widespread and developed proletariat, the anarchist and syndicalist movements were more firmly developed and had closer connections with the masses than in Russia. Moreover, these movements were also quite revolutionary as well and should be won to Bolshevism. But anarchism is the politics of the petit-bourgeois and so should have been far smaller in Western countries than in Russia due to the larger numbers of artisans and peasants in the latter. The opposite was the case, thus suggesting that Lenin's analysis is wrong.

We can point to another explanation of these facts. Rather than the Bolsheviks *"struggle against opportunism"* being the reason why anarchism was *"negligible"* in 1917–18 in Russia (it was not, in fact) but had mass appeal in Western Europe perhaps it was the fact that anarchism was a product of working class struggle in advanced capitalist countries while Bolshevism was a product of **bourgeois** struggle (for Parliament, a liberal republic, etc.) in Tsarist Russia? Similarly, perhaps the reason why Bolshevism did not develop the same opportunist tendencies as in other Social-Democratic movements was because it did not work in an environment which encouraged them. After all, unlike the German Social Democrats, the Bolsheviks were illegal for long periods of time and worked in an absolutist monarchy. The influences that corrupted the German Social Democrats were not at work in the Tsarist regime simply because there was no genuine Parliamentarianism for the party to get corrupted by. Thus, Bolshevism, perhaps at best, was applicable to Tsarist conditions and anarchism to Western ones.

However, contrary to Lenin, Russian anarchism was far from *"negligible"* during 1917–18 and was growing in influence within the Russian working class which was the real reason why the Bolsheviks suppressed them **before** the start of the civil war. As Emma Goldman noted, a claim such as Lenin's *"does not tally with the incessant persecution of Anarchists which began in [April] 1918, when Leon Trotsky liquidated the Anarchist headquarters in Moscow with machine guns. At that time the process of elimination of the Anarchists began."* [*Trotsky Protests Too Much"*, **Writings of Emma Goldman**, p. 265] This fact of anarchist influence during the revolution does not contradict our earlier analysis. This is because the Russian anarchists, rather than appealing to the petit-bourgeois, were influencing exactly the same workers, sailors and soldiers the Bolsheviks were. Indeed, the Bolsheviks often had to radicalise their activities and rhetoric to counter anarchist influence. As Alexander Rabinowitch in his study of the July uprising of 1917 notes:

> *"At the rank-and-file level, particularly within the [Petrograd] garrison and at the Kronstadt naval base, there was in fact very little to distinguish Bolshevik from Anarchist ... The Anarchist-Communists and the Bolsheviks competed for the support of the same uneducated, depressed and dissatisfied elements of the population, and the fact is that in the summer of 1917, the Anarchist-Communists, with the support they enjoyed in a few important factories and regiments, possessed an undeniable capacity to influence the course of events. Indeed, the Anarchist appeal was great enough in some factories and military units to influence the actions of the Bolsheviks themselves."* [**Prelude to Revolution**, p. 64]

This is hardly what would be expected if anarchism was "petit-bourgeois" as Marxists assert.

It could, in fact, be argued that the Bolsheviks gained the support of so many workers during the summer of 1917 **because they sounded and acted like anarchists** and **not** like Marxists and lost it, by the summer of 1918, because, once in power, they reverted to acting like Marxists and their centralised policies were simply not solving the problems facing the revolution. At the time many considered the Bolsheviks as anarchists and one fellow Marxist (an ex-Bolshevik turned Menshevik) thought Lenin had *"made himself a candidate for one European throne that has been vacant for thirty years — the throne of Bakunin!"* [quoted by Rabinowitch, **Op. Cit.**, p. 40] As Alexander Berkman argued, the *"Anarchist mottoes proclaimed by the Bolsheviks did not fail to bring results. The masses relied to their flag."* [**What is Anarchism?**, p. 120] Indeed, as we note in section H.5.12, the Bolshevik party in the summer of 1917 was far from the disciplined vanguard party of Leninist myth and far more like a federation of local groups which could — and did — ignore the party's central committee and its conservatism. It was in 1918, faced with the realities of holding state power in the face of popular discontent and counter-revolution that Lenin's long desired model of a centralised, top-down, disciplined party came to be — a development which contributed to the degeneration of the regime away from socialism and towards state capitalism.

Moreover, this stealing of anarchist slogans and tactics in 1917 was **forced** upon the Bolsheviks by the working class. On Lenin's own admission, the masses of peasants and workers were *"a hundred times further to the left"* than the Bolsheviks. Trotsky himself notes that the Bolsheviks *"lagged behind the revolutionary dynamic ... The masses at the turning point were a hundred times to the left of the extreme left party."* [**History of the Russian Revolution**, Vol. 1, p. 403f] Indeed, one leading Bolshevik stated in June 1917 (in response to a rise in anarchist influence), *"[b]y fencing ourselves off from the Anarchists, we may fence ourselves off from the masses."* [quoted by Rabinowitch, **Op. Cit.**, p. 102] That, in itself, indicates the weakness of Lenin's class analysis of anarchism.

Rather than the Russian experience refute the claim that anarchism is a working class theory, it reinforces it — the Bolsheviks would not have succeeded if they had used traditional Marxist slogans and tactics (as was the fate of the Mensheviks). Instead, much to the dismay of their more orthodox comrades, the Bolsheviks embraced traditional anarchist ideas and tactics and thereby gained increased influence in the working class. After the Bolshevik seizure of power in the name of the soviets, anarchist influence increased as more working people recognised that what the Bolsheviks meant by their slogans was different than what working people thought they meant (see section A.5.4). So the experience of the Russian Revolution re-enforces the fact that Marxist "class analysis" of anarchism fails to convince. Far from proving that libertarian socialism is non-proletarian, that Revolution proved that it was: just as it confirmed the prophetic correctness of the views of the founders of anarchism and, in particular, their critique of Marxism.

To conclude, the usual Marxist "class analysis" of anarchism is somewhat confused. On the one hand, it claims that anarchism is backward looking and the politics of the petit-bourgeois being destroyed by the rise and development of capitalism. On the other hand Marxists point to events and organisations created in working class struggle which were predicted and/or influenced by **anarchist** ideas and ideals, **not** Marxist ones. That indicates better than any other argument that Marxists are wrong about anarchism and their "class analysis" nothing more than distortions and bigotry. Based on the evidence and the contradictions it provokes in Marxist ideology, we have to argue that McNally is simply wrong. Rather than being an ideology of the petit-bourgeois anarchism is, in fact, a political theory of the working class (artisans, peasants and proletariat).

Rather than a backward looking theory, anarchism is a theory of the present and future — it has a concrete and radical critique of current society, a vision of the future and a theory how to get there which appeals to working people in struggle. Such is obviously the conclusion when you read anarchist theory and see how Marxists have appropriated aspects of it which they had previously denounced. Sadly, as we note in section H.3.5, this appropriation has been selective and had not made Leninism any more libertarian, its pre-revolution rhetoric aside.

13. If Marxism is *"socialism from below,"* why do anarchists reject it?

McNally claims that Marxism is *"socialism from below."* In his text he indicates support for the Paris Commune and the soviets of the Russian Revolution. He states that the *"democratic and socialist restructuring of society remains ... the most pressing task confronting humanity. And such a reordering of society can only take place on the basis of the principles of socialism from below. Now more than ever, the liberation of humanity depends upon the self-emancipation of the world working class... The challenge is to restore to socialism its democratic essence, its passionate concern with human freedom."*

So, if this is the case, why the hostility between anarchists and Marxists? Surely it is a question of semantics? No, for while Leninists pay lip-service to such developments of working class self-activity and self-organisation as workers' councils (soviets), factory committees, workers' control, revocable and mandated delegates they do so in order to ensure the election of their party into positions of power (i.e. the government). Rather than see such developments as working people's **direct** management of their own destinies and as a means of creating a self-managed (i.e. free) society as anarchists do, Leninists see them as a means for their party to take over state power. Nor do they see them as a framework by which working class people can take back control of their own lives. Rather, they see them, at best, as typical bourgeois forms — namely the means by which working people can delegate their power to a new group of leaders, i.e. as a means to elect a socialist government into power. The nature of the regimes they wish to create are centralised in nature, so reducing meaningful democracy to picking a few leaders and, even worse, producing the natural conditions under which a bureaucracy can flourish — both conditions for creating a new ruling elite (the bureaucracy).

This attitude can be seen from Lenin's perspectives on the Russian soviets during the 1905 Russian Revolution. Rather than seeing them as a means of working class self-government, he saw them purely as a means of gaining influence for his party:

> *"the Party ... has never renounced its intention of utilising certain non-party organisations, such as the Soviets of Workers' Deputies ... to extend Social-Democratic influence among the working class and to strengthen the Social-Democratic labour movement ... the incipient revival creates the opportunity to organise or utilise non-party working-class institutions, such as Soviets ... for the purpose of developing the Social-Democratic movement; at the same time the Social-Democratic Party organisations must bear in mind if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous."* [**Collected Works**, vol. 12, pp. 143–4]

Such a perspective indicates well the difference between anarchism and Leninism. Anarchists do not seek power for their own organisations. Rather they see self-managed organisation cre-

ated by working class people in struggle as a means of eliminating hierarchy within society, of directly involving the mass of people in the decisions that affect them. In other words, as a means of creating the organisations through which people can change both themselves and the world by their own direct action and the managing of their own struggles, lives, communities and workplaces. Leninists view working class self-organisation as a means of gaining power for their own party (which they identify with the power of the working class — see section H.3.11). Mass organisations, which could be schools for self-management and freedom, are instead subjected to an elitist leadership of intellectual ideologues. The party soon substitutes itself for the mass movement, and the party leadership substitutes itself the party. This is the inevitable result of a vision of socialism rooted in being *"fully and unreservedly in favour of a strong state power and of centralism."* [**Op. Cit.**, vol. 26, p. 116]

Lenin's view of the soviets was instrumental: he regarded them merely as a means of getting the workers to support the Bolshevik Party and ensuring his party seized state power. Indeed, he constantly confused soviet power with party power, seeing the former as the means to the latter and the latter as the key to creating socialism (see section H.3.11). Given his vanguardist ideology (see section H.5) this is unsurprising and, indeed, understandable — flawed assumptions will produce incorrect conclusions. What is missing from his vision is the idea of socialism as being based on working class self-activity, self-management, self-government and, ultimately, self-emancipation (section 11 refutes McNally's claims that Leninism is based on working class self-emanicipation). *"Lenin"* as one historian concluded, *"believed that the transition to socialism was guaranteed ultimately, not by the self-activity of workers, but by the 'proletarian' character of state power."* [A. S. Smith, **Red Petrograd**, pp. 261–2] Worse, the 'proletarian' character of the state was determined by the party in government and, as we indicated in section 8, the party determined what was and was not "proletarian" so allowing — indeed, justifying — party dictatorship. This gap in his politics, this confusion of party with class, helped undermine the revolution and create the dictatorship of the bureaucracy. Little wonder that by the end of 1918, the Bolsheviks ruled the newly established soviet state entirely alone and had turned the soviets into docile instruments of their party apparatus rather than forms of working class self-government. Perhaps needless to say, this reality came to be reflected in Bolshevik ideology and the assertion that a socialist revolution required a party dictatorship was embedded into it at this time — where it remained (Trotsky, for example, arguing this position throughout the 1920s and 1930s, as shown in section 15).

So despite its radical language, Leninism is totally opposed to the nature of revolt and rebellion. It seeks to undermine what makes these activities and the organisations they create potentially revolutionary (their tendencies towards self-management, decentralisation, solidarity, direct action, free activity and co-operation) by using them to build the party and, ultimately, a centralised, hierarchical state structure on the corpse of these once revolutionary forms of working class self-organisation and self-activity. This applies both to the social organisations of the working class **and** to their economic ones as Leninists view nationalisation (i.e., state ownership and control) as the basis of socialism rather than, as anarchists do, socialisation and workers self-management of production. The Leninist position can only produce a new ruling class (the bureaucracy) in a new class system (state capitalism). As Kropotkin predicted:

> *"The state organisation, having always been ... the instrument for establishing monopolies in favour of the ruling minorities, cannot be made to work for the destruction of*

> *these monopolies. The anarchists consider, therefore, that to hand over to the state all the main sources of economical life — the land, the mines, the railways, banking, insurance, and so on — as also the management of all the main branches of industry, in addition to all the functions already accumulated in its hands (education, state-supported religions, defence of the territory, etc.), would mean to create a new instrument of tyranny. State capitalism would only increase the powers of bureaucracy and capitalism. True progress lies in the direction of decentralisation, both* ***territorial*** *and* ***functional****, in the development of the spirit of local and personal initiative, and of free federation from the simple to the compound, in lieu of the present hierarchy from the centre to the periphery."* [**Direct Struggle Against Capital**, pp. 164–5]

While Leninists point to Lenin's **The State and Revolution** as proof of Leninism's "socialism from below" credentials, anarchists note that, firstly, its promises were either not applied or quickly abandoned and, secondly, its vision of socialism is impoverished. As we discuss the first objection in section H.1.7, we will note here that Lenin's work postulated a centralised proletarian state rooted in representative rather than delegate institutions as well as a "socialism" modelled on capitalist institutions which the workers were expected to "control" rather than self-management of production. Thus Lenin's pointing to the postal service, in which workers are usually employed by the State under capitalism, as *"an example of the socialist economic system"* and argued that we needed to *"organise the whole economy on the lines of the postal service"* simply transferred economic power to the state bureaucracy. [**Collected Works**, vol. 25 pp. 426–7] Anarchists, in contrast, argue that working class bodies like trade unions must take into their *"hands the management of production"* and co-operatives *"for production and for distribution, both in industry and agriculture"* were expressing aspects of *"communist society"* for *"Socialist forms of life could find a much easier realisation"* by means of these bodies *"than by a State organisation"*. [**The Conquest of Bread**, pp. 22–23] As Maurice Brinton documents in great detail in his classic **The Bolsheviks and Workers' Control**, the Leninist vision of socialism was never based on workers management of the economy (see section H.3.14). Politically, the Bolsheviks placed an executive power (their own) over the soviets and so centralised power into the hands of a few party leaders.

So as well as differences in the **political** nature of a socialist society, the role of organisations created in, by and for the class struggle and the nature of socialist organisation, anarchists and Marxists disagree with the **economic** nature of the future society. McNally claims that in Russia *"[c]ontrol of the factories was taken over by the workers"* but this is a total distortion of what actually happened. Throughout 1917, it was the workers themselves, **not** the Bolshevik Party, which raised the issue of workers' self-management and control. As S.A. Smith puts it, the *"factory committees launched the slogan of workers' control of production quite independently of the Bolshevik party. It was not until May that the party began to take it up."* [**Op. Cit.**, p. 154] Given that the defining aspect of capitalism is wage labour, the Russian workers' raised a clearly socialist demand that entailed its abolition. It was the Bolshevik party, we must note, who failed to raise above a *"trade union conscious"* in this and so many other cases and, worse, they hindered the movement of workers trying to control, and then manage, the factories they worked in. As Maurice Brinton correctly argued, *"it is ridiculous to claim — as so many do today — that in 1917 the Bolsheviks really stood for the full, total and direct control by working people of the factories, mines, building sites or other enterprises in which they worked, i.e. that they stood for workers'*

self-management." [*"The Bolsheviks and Workers' Control"*, **For Workers' Power**, p. 328] Rather, Lenin identified *"workers' control"* as something totally different:

> *"When we say: 'workers' control', always **juxtaposing** this slogan to dictatorship of the proletariat, always putting it **immediately after** the latter, we thereby explain what kind of state we mean ... if we are speaking of a proletarian state, that is, of the proletarian dictatorship, then workers' control can become the country-wide, all-embracing, omnipresent, most precise and most conscientious **accounting** of the production and distribution of goods."* [**Collected Works**, vol. 26, p. 105]

By this Lenin meant the "power" to oversee the books, to check the implementation of decisions made by others, rather than fundamental decision making by the workers themselves. As he argued, when *"the proletariat is victorious it will do the following, it will set economists, engineers, agronomists, and so forth, to work **under the control** of the workers' organisations on drawing up a 'plan', on verifying it, on devising labour-saving methods of centralisation, on devising the simplest, cheapest, most convenient and universal measures and methods of control. For this we shall pay the economists, statisticians and technicians good money ... but we shall not give them anything to eat if they do not perform this work conscientiously and entirely **in the interests of the working people**."* *"The important thing,"* he stressed *"will not be even the confiscation of the capitalists' property, but country-wide, all-embracing workers' control over the capitalists and their possible supporters ... by the workers' control of the **workers' state**."* The economy would be state-run based on the structures inherited from capitalism: *"**Compulsory syndication**, i.e., compulsory amalgamation in associations under state control — this is what capitalism has prepared the way for"* [**Op. Cit.**, vol. 26, p. 118, pp. 107–8 and p. 108] Thus others — a few planners at the top of a centralised state — would determine the plans, not the workers themselves, and primarily the "control" would be exercised over the capitalists whom Lenin thought should remain in position for an indefinite period after the revolution. Rather than workers' managing their own workplaces and economy Leninism meant *"the organisation of really democratic control, i.e., control from 'below', control by the workers and the poor peasants **over** the capitalists"* [**Op. Cit.**, vol. 25, p.353] Unsurprisingly, then, in 1922, he even suggested granting legislative power to the State Planning Commission to ensure its decisions *"could not be rejected by ordinary procedure in Soviet bodies, but would need a special procedure to be reconsidered"* as it was *"a body of experienced people, experts, representatives of science and technology"* and so was *"actually in a better position to form a correct judgment of affairs"*. [**Op. Cit.**, vol. 36, p. 598]

So Lenin's commitment to workers' control was limited and as Maurice Brinton correctly summarised:

> *"Nowhere in Lenin's writings is workers' control ever equated with fundamental decision-taking (i.e. with the **initiation** of decisions) relating to production ... He envisioned a period during which, in a workers state, the bourgeois would still retain the formal ownership and effective management of most of the productive apparatus ... capitalists would be coerced into co-operation. 'Workers' control' was seen as the instrument of this coercion."* [**Op. Cit.**, pp. 314–5]

Thus the capitalists would remain and wage slavery would continue but workers could "control" those who had the real power and gave the orders (the capitalists were later replaced by

"one-man management" by state bureaucrats but the lack of effective power remained — see section H.3.14). In other words, no vision of workers' self-management in production (and so real socialism) and the reduction of "socialism" to a warmed up variation of state capitalism with (in theory, but not in practice) a dash of liberal democracy in the form of "control" of those with the real power by those under them in the hierarchy. This is to be expected because, as S.A. Smith correctly argues, Lenin's proposals were *"thoroughly statist and centralist in character"* and that he used *"the term ['workers' control'] in a very different sense from that of the factory committees."* [**Op. Cit.**, p. 154] As can be seen from McNally's pamphlet, Leninists still follow this tradition and hide the grim reality that their tradition advocates an economic regime drastically different from the workers' self-management their words imply to most readers. Using the same slogans as others ("workers' control" or "socialism from below", for example) but meaning something radically different by it can only bred confusion.

Given Lenin's lack of concern about the revolutionising of the relations of production (a lack not shared by the Russian workers, we must stress) it is hardly surprising that Lenin considered the first task of the Bolshevik revolution was to build state capitalism. *"State capitalism,"* he wrote, *"is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps".* [**Collected Works**, vol. 24, p. 259] The aim was to ensure that *"**[a]ll** citizens are transformed into hired employees of the state"* and the *"whole of society will have become a single office and a single factory, with equality of labour and pay."* [**Op. Cit.**, vol. 25, pp. 473–4] For Lenin, the *"domination of the proletariat consists in the fact that the landowners and capitalists have been deprived of their property ... The victorious proletariat has abolished property ... and therein lies its domination as a class. The prime thing is the question of property."* [**Op. Cit.**, vol. 30, p. 456] Hence his support for centralisation and *"one-man management"* — if the issue is property then working class power **in production** cannot be considered as a necessary condition for socialism. Little wonder Soviet Russia never progressed beyond state capitalism — it could not as the fundamental aspect of capitalism, wage labour, was never replaced by workers' self-management of production. Lenin, in short, was firmly in the same tradition as those *"certain utopians"* whose call that *"the Government seize trade, industry and agriculture, to add them to its attributes and to make the French nation a nation of wage-workers"* Proudhon rejected during the 1848 revolution as *"expropriation by the State"* was *"still wage-labour."* [**Property is Theft!**, p. 22 and p. 377]

Writing in May 1917, Lenin took the viewpoint that state capitalism *"is a complete **material** preparation for socialism, the threshold of socialism"* and so socialism *"is nothing but the next step forward from state capitalist monopoly."* It is *"merely state-capitalist monopoly **which is made to serve the interests of the whole people** and has to that extent **ceased** to be capitalist monopoly."* [**Op. Cit.**, vol. 25, p. 359 and p. 358] Rather than seeing *"workers' control"* as workers managing production directly by means of their own class organisations, he always saw it in terms of workers' *"controlling"* those who did within institutions inherited from capitalism. It simply meant *"the country-wide, all-embracing, omnipresent, most precise and most conscientious **accounting** of the production and distribution of goods."* He clarified what he meant, arguing for *"country-wide, all-embracing workers' control over the capitalists"* who would still manage production. Significantly, he considered that *"as much as nine-tenths of the **socialist** apparatus"* required for this *"country-wide **book-keeping,** country-wide **accounting** of the production and distribution of goods"* would be achieved by nationalising the *"big banks,"* which *"**are** the 'state apparatus' which we **need** to bring about socialism"* (indeed, this was considered *"something in the nature of*

*the **skeleton** of socialist society"*). This structure would be taken intact from capitalism for *"the modern state possesses an apparatus which has extremely close connection with the banks and [business] syndicates ... this apparatus must not, and should not, be smashed."* [**Op. Cit.**, vol. 26, p. 105, p. 107, p. 106 and pp. 105–6] He had no real notion of workers' self-management of production nor of the impossibilities of combining the centralised state capitalist system with its big banks, monopolies, big business with genuine rank and file control, never mind self-management.

As discussed in section H.6.2, this was what the Bolsheviks **did** do, using the institutions inherited from Tsarism as framework for "socialism". They believed that this economic structure would be made to serve the many rather than the few by a change in the political regime for *"given a really revolutionary-democratic state, state-monopoly capitalism inevitably and unavoidably implies a step, and more than one step, towards socialism!"* [**Op. Cit.**, vol. 25, pp. 357–8] Yet a centralised state (never mind party dictatorship!) is hardly *"a really revolutionary-democratic"* anything other than in Bolshevik rhetoric. Surely, then, such an centralised economic structure would simply become a step, and more than a step, towards rule by the bureaucracy? And, sadly, that was the case so confirming anarchist warnings that state socialism would produce a new class system with the bureaucracy replacing the capitalist elite.

Yet even this is too generous, given the two obvious flaws in Lenin's position. First, in-so-far-as a social organisation **is** *"revolutionary-democratic"* then it is **not** a state and, as Lenin's regime showed, any new state will not remain so for long. Second, Lenin seems to have forgotten the Marxist theory of base and superstructure. The base is the economic forces and relations of production while the superstructure is the culture, institutions and state. In Marxist theory, while some mutual influences are sometimes admitted, the base determines the superstructure. Given this, surely an economic structure created under a class system would be far more likely to produce an undemocratic superstructure (state) than the opposite? Surely a centralised economic structure would produce concentrations of economic and bureaucratic power and so it would be far more consistent for a Marxist to suggest a centralised economic base (and *"state-monopoly capitalism"* can be nothing less) would produce an equally centralised political superstructure (state)? And so it came to be — *"state-monopoly capitalism"* inevitably and unavoidably implies a step, and more than one step, towards a new class system (state-capitalism) rather than a classless one (socialism). Although, to be fair to Lenin, Marx and Engels were equally untroubled by this danger and did not draw this obvious conclusion. Anarchists were not so naive. As Alexander Berkman correctly argued:

> *"The role of industrial decentralisation in the revolution is unfortunately too little appreciated ... Most people are still in the thraldom of the Marxian dogma that centralisation is 'more efficient and economical.' They close their eyes to the fact that the alleged 'economy' is achieved at the cost of the workers' limb and life, that the 'efficiency' degrades him to a mere industrial cog, deadens his soul, kills his body. Furthermore, in a system of centralisation the administration of industry becomes constantly merged in fewer hands, producing a powerful bureaucracy of industrial overlords. It would indeed be the sheerest irony if the revolution were to aim at such a result. It would mean the creation of a new master class."* [**What is Anarchism?**, p. 229]

The Leninist "vision" of the future socialist economy is one of a highly centralised organisation, modelled on capitalism, in which, at best, workers can supervise the decisions made by others

and "control" those in power. It is a vision of a more democratic corporate structure, with the workers replacing the shareholders. In practice, it would be a new bureaucracy exploiting and oppressing those who do the actual work — as in private capitalism — simply because capitalist economic structures are designed to empower the few over the many. Like the capitalist state, they cannot be used by the working class to achieve their liberation (they are not created for the mass participation that real socialism requires, quite the reverse in fact). Sadly, Lenin failed to understand this and called the centralised, bureaucratic monstrosity the Bolsheviks created "socialism".

In contrast, anarchists view the socialist economy as being based on workers' self-management of production and the workplace turned into an association of equals. Above the individual workplace, federations of factory committees would co-ordinate activities and ensure wide scale co-operation is achieved. Thus anarchists see a **new** form of economic structure developing, one based on workers' organisations created in the process of struggle **against** capitalism. Rather than embrace bourgeois notions of "democracy" (i.e. the election of leaders into positions of power) like Marxists do, anarchists dissolve hierarchical power by promoting workers' self-management and association. While Marxism ends up as state capitalism pure and simple (as can be seen by the experience of Russia under Lenin and then Stalin) anarchism destroys the fundamental social relation of capitalism — wage labour — via association and workers' self-management of production.

So while both Leninists and anarchists claim to support factory committees and "workers' control" we have decidedly different notions of what we mean by this. The Leninists see them as a means of workers' to supervise (a closer translation of the Russian expression) those who have the real power in the economy and so perpetuate wage slavery with the state replacing the capitalist. Anarchists, in contrast, see them as a means of expressing workers self-organisation, self-management and self-government — as a means of abolishing wage slavery and so capitalism by eliminating hierarchical authority. The difference could not be more striking. Indeed, it would be correct to state that the Leninist tradition is not, in fact, socialist as it identifies socialism as the natural development of capitalism and **not** as a new form of economy which will develop **away** from capitalism by means of associated labour and workers' self-management of production (see section H.3.12).

So anarchists and Leninism may often use similar words and expressions but they aim for different things. Leninists seek party power over a state capitalist economy and favour centralised political and economic structures. Sadly, they seem unaware that this will simply generate a new ruling class, the bureaucracy as centralised structures mean placing power at the top of society. The new layer of rulers this produces need the means to enforce their decisions and to gather and process the information needed to make their decisions, which is why bureaucracy grows. However, by the nature of bureaucracy the servants of the government quickly become the masters due to their control over information, resources and so on. This is why anarchists advocate federalism, to combat the obvious dangers of centralisation. The Bolshevik regime confirmed the wisdom of the libertarian position as the new state soon saw a new bureaucratic system quickly emerge around it. The size and power of the bureaucracy *"grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between 'people' and 'officials,' which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about 'bureaucratic excesses,' lack of contact with voters, and new proletarian bureaucrats grew louder and louder."* [Oskar Anweiler, **The Soviets**, p. 242] So

the rise of a state bureaucracy started immediately with the seizure of power by the Bolsheviks, particularly as the state's functions grew to include economic as well as political ones. Instead of the state starting to "wither away" it grew:

> *"The old state's political apparatus was 'smashed,' but in its place a new bureaucratic and centralised system emerged with extraordinary rapidity. After the transfer of government to Moscow in March 1918 it continued to expand ... As the functions of the state expanded so did the bureaucracy, and by August 1918 nearly a third of Moscow's working population were employed in offices. The great increase in the number of employees ... took place in early to mid-1918 and, thereafter, despite many campaigns to reduce their number, they remained a steady proportion of the falling population"* [Richard Sakwa, *"The Commune State in Moscow in 1918,"* pp. 429–449, **Slavic Review**, vol. 46, no. 3/4, pp. 437–8]

While Lenin started to be concerned about the growth of the bureaucracy after 1920 and Trotsky argued that the Stalinist regime rested on this caste, neither had the theoretical framework to understand exactly why and how the centralisation and statist structures they favoured produced the bureaucracy they denounced. By not understanding the need for federalism they ensured that the socialistic tendencies being built by the Russian people were crushed under the weight of the bureaucratic machine which centralisation needs to function. That this bureaucracy soon became the ruling class is as unsurprising as Trotsky's inability to recognise the state capitalist nature of Stalinism (nor his and Lenin's role in producing such a regime in the first place).

Russia, Lenin once said, *"was accustomed to being ruled by 150 000 land owners. Why can 240 000 Bolsheviks not take over the task?"* [**Op. Cit.**, vol. 21, p. 336] The idea of socialism as working class self-management and self-government was lost on him — and the possibility **real** socialism was soon lost to the Russian working class when the Tsar was replaced by the autocratic the rule of the Bolshevik Party. *"Workers' power"* cannot be identified or equated with the power of the Party — as it repeatedly was by the Bolsheviks (and Social Democrats before them).

Thus Malatesta's comments that the *"important, fundamental dissension"* between anarchists and Marxists is that the latter *"are authoritarians, anarchists are libertarians.* Marxists *"want power ... and once in power wish to impose their programme on the people ... Anarchists instead maintain, that government cannot be other than harmful, and by its very nature it defends either an existing privileged class or creates a new one."* [**Errico Malatesta: His Life and Ideas**, p. 142] Therefore anarchists seek to influence people by the power of our ideas within popular organisations. We see such organisations as the means by which working people can take control of their own lives and start to create a free, libertarian socialist society — in other words, as we sketch in section I.2.3, the structures of a free society are created in the struggle against hierarchy today and, moreover, people become able to govern themselves by the very process of that struggle. A self-managed society can only be created by self-management, in short, and any tendencies to undermine popular self-management in favour of hierarchical power of a party will subvert a revolution and create an end drastically at odds with the ideals of those who take part in it.

Similarly, anarchists reject the Leninist idea of highly centralised "vanguard" parties. As the anarchists of Trotwatch explain, such a party leaves much to be desired:

> *"In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly 'revolutionary' organisation: between leaders and*

led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class." [**Carry on Recruiting!**, p. 41]

As we discuss in section H.5.9, such an organisation can **never** create a socialist society. In contrast, anarchists argue that socialist organisations should reflect as much as possible the future society we are aiming to create (see section H.1.6. To build organisations which are statist/capitalistic in structure cannot do other than reproduce the very problems of statism/capitalism into them and so undermine their liberatory potential. As Murray Bookchin put it:

"The 'glorious party,' when there is one, almost invariably lags behind the events ... In the beginning ... it tends to have an inhibitory function, not a 'vanguard' role. Where it exercises influence, it tends to slow down the flow of events, not 'co-ordinate' the revolutionary forced. This is not accidental. The party is structured along hierarchical lines ***that reflect the very society it professes to oppose*** *... Its membership is schooled in obedience ... The party's leadership, in turn, is schooled in habits born of command, authority, manipulation ... Its leaders ... lose contact with the living situation below. The local groups, which know their own immediate situation better than any remote leaders, are obliged to subordinate their insights to directives from above. The leadership, lacking any direct knowledge of local problems, responds sluggishly and prudently . ..*

"The party becomes less efficient from a revolutionary point of view the more it seeks efficiency by means of hierarchy, cadres and centralisation. Although everyone marches in step, the orders are usually wrong, especially when events begin to move rapidly and take unexpected turns — as they do in all revolutions. The party is efficient in only one respect — in moulding society in its own hierarchical imagine if the revolution is successful. It recreates bureaucracy, centralisation and the state. It fosters the bureaucracy, centralisation and the state. It fosters the very social conditions which justify this kind of society. Hence, instead of 'withering away,' the state controlled by the 'glorious party' preserves the very conditions which 'necessitate' the existence of a state — and a party to 'guard' it." [**Post-Scarcity Anarchism**, pp. 123–6]

As we argue in section J.3, anarchists do not reject the need for political organisations (anarchist groups, federations and so on) to work in mass movements and in revolutionary situations. However, we do reject the Leninist idea of a vanguard party as being totally inappropriate for the needs of a social revolution — a revolution that aims to create a free society.

In short, anarchists reject both the means and the ends Leninists aim for and so our disagreements with that tradition is far more than semantics. Simply put, for anarchists Leninism is **not** "socialism from below" but rather a centralised, top-down movement aiming for a centralised, top-down state capitalist system.

This does not mean that all members of Leninist parties do not support workers' self-management in society and production and some genuinely seem to favour workers' democracy and actually do believe in working class self-emancipation, etc. They are simply unaware that the tradition they have joined does not actually share those values (thanks to, it must be stated, works like McNally's). It could, perhaps, be argued that such values can be "added" to the core Leninist ideas. However, such a viewpoint is optimistic in the extreme. Leninist positions on

workers' self-management, etc., do not "just happen" nor are they the product of ignorance. Rather they are the natural result of those "core" ideas. To add other values to Leninism would be like adding extensions to a house built on sand — the foundations are unsuitable and any additions would soon fall down. This was what happened during the Russian Revolution — movements from below which had a different vision of socialism came to grief on the rocks of Bolshevik power. Simply put, adding self-management to a centralised system and party power is impossible and if we strip Leninism of all its authoritarian notions then we would simply have anarchism.

So as we discuss in section H.3.1, while there appears to be some similarity between the aims of anarchism and Marxism (namely a free classless society of free and equal individuals) on closer look there are significant differences between the two and only anarchism truly represents *"socialism from below"* (as we will see next section, we have been talking about "from below" since the 1840s while Marxist use of the terminology dates from much later). This is no coincidence.. Moreover, as shown in section H.6.2, these differences are important as Bolshevik ideology, once its advocates held power at the top of a centralises state structure and started to apply it, impacted negatively on the Russian revolution and ensured its failure (i.e., it was not creating socialism even if a self-proclaimed "communist" party remained in power at the end of the civil war in 1920). The issue is clear — either you aim for a socialist society and use socialist methods to get there or you do not. Those who do seek **real** socialism (as opposed to warmed up state capitalism) would be advised to recognise this and study closely what Leninists actually mean by the slogans they use rather than taking them at face value.

14. Why is McNally's use of the term *"socialism from below"* dishonest?

McNally argues that Marxism can be considered as *"socialism from below."* Indeed, that is the name of his pamphlet. However, his use of the term is somewhat ironic for two reasons. First, because the expression *"from below"* can be found in the writings of Bakunin and Proudhon, not Marx. Second, because Lenin explicitly attacked the idea of *"from below"* as an anarchist principle.

In terms of the first point, the expression *"from below"* was constantly on the lips of Bakunin and Proudhon. Indeed, it was a defining part of their ideas. Thus we find Proudhon attacking the state socialism of Louis Blanc in 1846 because he *"is never tired of appealing to authority, and socialism loudly declares itself anarchistic; M. Blanc places power above society, and socialism tends to subordinate it to society; M. Blanc makes social life descend from above, and socialism maintains that it springs up and grows from below"* [**Property is Theft!**, p. 205] He re-iterated this during the 1848 revolution:

> *"**From above** ... signifies power; **from below** signifies the people. On the one hand we have the actions of government; on the other, the initiative of the masses ... revolution from above is ... inevitably revolution according to the whims of the Prince, the arbitrary judgement of a minister, the fumblings of an Assembly or the violence of a club: it is a revolution of dictatorship and despotism .. . Revolution on the initiative of the masses is a revolution by the concerted action of the citizens, by the experience of the workers, by the progress and diffusion of enlightenment, revolution by the means of liberty ... a revolution from below, from true democracy ... Saint-Simon, Fourier, Owen, Cabet, Louis*

> *Blanc, all believers in the organisation of labour by the State, by Capital, by whatever authority, appealed … to revolution **from above**. Instead of teaching the people how to organise themselves, by calling on their experience and their reasoning, they demanded Power …*
>
> *"The conclusion is that government can never be revolutionary quite simply because it is government. Society alone, the masses armed with their intelligence, can create revolution; society alone is able to deploy all its spontaneity, to analyse and explain the mystery of its destiny and its origin, to change its faith and its philosophy, because it alone is capable of fighting against its originator and bearing its fruit. Governments are God\92s scourge, established to **discipline** the world: do you really expect them to destroy themselves, to create freedom, to make revolution?*
>
> *"They cannot act otherwise. All revolutions … were achieved by the spontaneity of the people: governments have always hindered, always suppressed, always beaten back; they have never created revolution. Their role is not to create change but to control it."* [**Op. Cit.**, pp. 398–9]

Thus *"experience testifies and philosophy demonstrates … that any revolution, to be effective, must be spontaneous and emanate, not from the heads of the authorities but from the bowels of the people: that government is reactionary rather than revolutionary: that it could not have any expertise in revolutions, given that society, to which that secret is alone revealed, does not show itself through legislative decree but rather through the spontaneity of its manifestations: that, ultimately, the only connection between government and labour is that labour, in organising itself, has the abrogation of government as its mission"*. [**No Gods, No Masters**, vol. 1., p. 52] *"The Revolution **from above**,"* Proudhon stressed, *"is the intervention of power in everything; it is the absolutist initiative of the State, the pure governmentalism of … [state-socialist] Louis Blanc. The Revolution **from above** is the negation of collective activity, of popular spontaneity … What serious and lasting Revolution was not made **from below**, by the people? How did the Revolution of 1789 come about? How was that of February made? The Revolution **from above** has never been other than the oppression of the wills of those below."* [quoted by George Woodcock, **Pierre-Joseph Proudhon**, p. 143]

Proudhon, then, placed his hopes for introducing socialism in alternative institutions created by working class people themselves and *"insisted that the revolution could only come from below, through the action of the workers themselves."* [K. Steven Vincent, **Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 157] Bakunin did likewise, seeing the labour movement as the means of ensuring that an anarchist revolution would come *"from below."* As he put it, *"liberty can be created only by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward."* [**Statism and Anarchy**, p. 179] Elsewhere he wrote that *"future social organisation must be made solely from the bottom upwards, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal."* [**Michael Bakunin: Selected Writings**, p. 206] As he wrote in 1868:

> *"I hate Communism because it is the negation of liberty and because for me humanity is unthinkable without liberty. I am not a Communist, because Communism concentrates and swallows up in itself for the benefit of the State all the forces of society, because it inevitably leads to the concentration of property in the hands of the State … I want to see*

> *society and collective or social property organised from below upwards, by way of free associations, not from above downwards, by means of any kind of authority whatsoever … That is the sense in which I am a Collectivist and not a Communist."* [quoted by K.J. Kenafick, **Michael Bakunin and Karl Marx**, pp. 67–8]

Anarchists, argued Bakunin, opposed the state because *"all State rule, all governments being by their very nature placed outside the people, must necessarily seek to subject it to customs and purposes entirely foreign to it. We therefore declare ourselves to be foes … of all State organisations as such, and believe that the people can be happy and free, when, organised from below upwards by means of its own autonomous and completely free associations, without the supervision of any guardians, it will create its own life."* [**Marxism, Freedom and the State**, p. 63] This applied to the so-called "workers' state" because *"every state, even the pseudo-People's State concocted by Mr. Marx, is in essence only a machine ruling the masses from above, through a privileged minority of conceited intellectuals who imagine that they know what the people need and want better than do the people themselves."* [**Bakunin on Anarchism**, p. 338] The revolution would see *"an end to all masters and to domination of every kind, and the free construction of popular life in accordance with popular needs, not from above downward, as in the state, but from below upward, by the people themselves, dispensing with all governments and parliaments — a voluntary alliance of agricultural and factory worker associations, communes, provinces, and nations; and, finally, … universal human brotherhood triumphing on the ruins of all the states."* [**Statism and Anarchy**, p. 33]

No such idea is present in Marx. Rather, he saw a revolution as consisting of the election of a socialist party into government. At its best, for example when he was reporting on the Paris Commune, this vision had libertarian (*"from below"*) aspects — perhaps unsurprisingly, given its obviously Proudhon-inspired federalism (which Marx could not bring himself to mention). However, at its worse this was not only reformist in the sense of utilising bourgeois elections (see section H.3.10) but also "from above" in nature. In 1850, for example, he argued that the workers must *"not only strive for a single and indivisible German republic, but also within this republic for the most determined centralisation of power in the hands of the state authority."* This was because *"the path of revolutionary activity"* can *"proceed only from the centre."* This meant that the workers must be opposed to a *"federative republic"* and *"must not allow themselves to be misguided by the democratic talk of freedom for the communities, of self-government, etc."* This centralisation of power was essential to overcome local autonomy, which would allow *"every village, every town and every province"* to put *"a new obstacle in the path"* of the revolution due to *"local and provincial obstinacy."* Decades later, Marx dismissed Bakunin's vision of *"the free organisation of the worker masses from bottom to top"* as *"nonsense."* [**Marx-Engels Reader**, p. 509 and p. 547]

As we discuss in section H.3.2, the idea of *"socialism from below"* is a distinctly anarchist notion, one found in the works of Proudhon and Bakunin, **not** Marx. It is ironic, given his distorted account of Proudhon and Bakunin, that McNally uses their words to describe Marxism!

Secondly, and far more seriously for McNally, Lenin repeatedly dismissed the idea of *"from below"* as not Marxist. In 1904, during the debate over the party split into Bolsheviks and Mensheviks, Lenin stated that the argument *"[b]ureaucracy **versus** democracy is in fact centralism **versus** autonomism; it is the organisational principle of revolutionary Social-Democracy as opposed to the organisational principle of opportunist Social-Democracy. The latter strives to proceed from the bottom upward, and, therefore, wherever possible … upholds autonomism and 'democracy,' carried*

(by the overzealous) to the point of anarchism. The former strives to proceed from the top downward." [**Collected Works**, vol. 7, pp. 396–7] Lenin repeated this argument during the near revolution of 1905, mocking the Mensheviks for only wanting *"pressure from below"* which was *"pressure by the citizens on the revolutionary government."* Instead, he argued for *"pressure ... from above as well as from below,"* where *"pressure from above"* was *"pressure by the revolutionary government on the citizens."* He notes that Engels *"appreciated the importance of action from above"* and that he saw the need for *"the utilisation of the revolutionary governmental power."* Lenin summarised his position (which he considered as being in line with that of orthodox Marxism) by stating: *"Limitation, in principle, of revolutionary action to pressure from below and renunciation of pressure also from above is* ***anarchism.****"* [**Op. Cit.**, vol. 8, p. 474, p. 478, p. 480 and p. 481] He returned to this theme, explicitly stating that it was an *"anarchist stand"* to be for *"'action only from below', not 'from below and from above'"*. [**Op. Cit.**, vol. 9, p. 77]

How you can have *"socialism from below"* when your *"organisational principle"* is *"from the top downward"* and *"renunciation of pressure also from above is* ***anarchism****"* is not explained by McNally. Moreover, given that McNally states repeatedly the evils of *"from above"* in his pamphlet he gives his account of Marxism a distinctly anarchist feel (while denouncing it in a most deceitful way). Why is this? Perhaps because his readers would recognise that in a conflict between *"pressure from above"* (the armed might of the state) and *"pressure from below"* (the people) it would be the former which would tend to win? And that this was the case in the Russian Revolution, with the Bolshevik state crushing all forms of working class protest? As we discuss in section H.6, the *"the utilisation of the revolutionary governmental power"* simply produced a "dictatorship **over** the proletariat" as Bakunin (see section H.1.1). and other anarchists had long predicted.

In other words, Marxism is based on idea that the government pressuring the citizens is acceptable. As we discuss in the next section, Trotsky recognised this and openly proclaimed the need for party dictatorship to resist the pressures from below (dismissed as *"wavering"* and *"vacillation"* by the backward masses). As we discuss in section H.5, the vanguardism of Leninism privileges the party and its leadership and lays the foundation for "socialism from below." A given ideological premise will led to certain conclusions in practice — conclusions Lenin and Trotsky were not shy in explicitly stating.

Little wonder McNally fails to mention Lenin's support for revolutionary action *"from above"* for in practice Leninism substituted the rule (and then dictatorship) of the party for that of the working class as a whole. Lenin always stressed that the *"Bolsheviks must assume power"* and they *"can and must take state power into their own hands."* He raised the question of *"will the Bolsheviks dare take over full state power alone?"* and answered it: *"I have already had occasion ... to answer this question in the affirmative."* Moreover, *"a political party ... would have no right to exist, would be unworthy of the name of party ... if it refused to take power when opportunity offers."* He equated rule by the party with rule by the class, noting that *"proletarian revolutionary power"* and *"Bolshevik power"* are *"now one the same thing"* and indicated that once in power the Bolsheviks *"shall be fully and unreservedly in favour of a strong state power and of centralism."* [**Op. Cit.**, vol. 26, p. 19, p. 90, p. 179 and p. 116] In this confusion, we must note, Lenin followed Engels who argued that *"each political party sets out to establish its rule in the state, so the German Social-Democratic Workers' Party is striving to establish* ***its*** *rule, the rule of the working class."* [**Collected Works**, vol. 23, p. 372] Such confusion is deadly to a true *"revolution from*

below" and justifies the use of repression against the working class based on the advanced ideas of the vanguard party.

McNally, of course, stresses the impact of the civil war on the degeneration of Bolshevism but comments like these were not caused by circumstantial factors as can be seen from Lenin's work **Left-Wing Communism**. In this 1920 tract, written for the Second Congress of the Communist International, Lenin lambasted those Marxists who argued for direct working class power against the idea of party rule (i.e. the various council communists around Europe) and argued that *"the Communists' correct understanding of his tasks"* lies in *"correctly gauging the conditions and the moment when the vanguard of the proletariat can successfully assume power, when it will be able — during and after the seizure of power — to win adequate support from sufficiently broad strata of the working class and of the non-proletarian working masses, and when it is able thereafter to maintain, consolidate, and extend its rule by educating, training and attracting ever broader masses of the working people."* Note, the vanguard (the party) seizes power, **not** the masses and he stressed that the *"mere presentation of the question — 'dictatorship of the party **or** dictatorship of the class: dictatorship (party) of the leaders **or** dictatorship (party) of the masses?' — testifies to most incredible and hopelessly muddled thinking"* and *"[t]o go so far ... as to contrast, **in general**, the dictatorship of the masses with a dictatorship of the leaders is ridiculously absurd, and stupid."* [**The Lenin Anthology**, p. 575, p. 567 and p. 568] He then explained the nature of Bolshevik rule:

> *"In Russia today, the connection between leaders, party, class and masses ... are concretely as follows: the dictatorship is exercised by the proletariat organised in the Soviets and is guided by the Communist Party ... The Party, which holds annual congresses ..., is directed by a Central Committee of nineteen elected at the congress, while the current work in Moscow has to be carried on by [two] still smaller bodies ... which are elected at the plenary sessions of the Central Committee, five members of the Central Committee to each bureau. This, it would appear, is a full-fledged 'oligarchy.' No important political or organisational question is decided by any state institution in our republic [sic!] without the guidance of the Party's Central Committee.*
>
> *"In its work, the Party relies directly on the **trade unions**, which ... have a membership of over four million and are formally **non-Party**. Actually, all the directing bodies of the vast majority of the unions ... are made up of Communists, and carry out of all the directives of the Party. Thus ... we have a formally non-communist .. . very powerful proletarian apparatus, by means of which the Party is closely linked up with the **class** and **the masses,** and by means of which, under the leadership of the Party, the **class dictatorship** of the class is exercised."* [**Op. Cit.**, pp. 571–2]

This was *"the general mechanism of the proletarian state power viewed 'from above,' from the standpoint of the practical realisation of the dictatorship"* and so *"all this talk about 'from above' **or** 'from below,' about 'the dictatorship of leaders' **or** 'the dictatorship of the masses,'"* is *"ridiculous and childish nonsense."* [**Op. Cit.**, p. 573] The links with his comments from 1904 and 1905 are clear, as clear as his explanation of the lessons he thought that the world communist movement had to learn from the Bolshevik revolution. The notion that Leninism stands for *"socialism from below"* in untenable.

Lenin, of course, did not bother to view "proletarian" state power "from below," from the viewpoint of the proletariat. If he had, perhaps he would have recounted the numerous strikes and

protests broken by the Cheka under martial law, the gerrymandering and disbanding of soviets, the imposition of *"one-man management"* onto the workers in production, the turning of the unions into agents of the state/party and the elimination of working class freedom by party power (see section 8). All of which suggests that there **are** fundamental differences, at least for the masses, between *"from above"* and *"from below."*

Anarchists, in contrast, recognise that parties and classes are different and only self-management in popular organisations from below upwards can ensure that a social revolution remains in the hands of all and not a source of power for the few. Thus *"All Power to the Soviets,"* for anarchists, means **exactly** that — not a euphemism for *"All Power to the Party."* As Russian anarchist Voline argued, *"for, the anarchists [in 1917] declared, if 'power' really should belong to the soviets, it could not belong to the Bolshevik Party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets."* Marxist confusion of the difference between working class power and party power, combined with the nature of centralised power and an ideology which privileges the party over the working class (see section 11) cannot help but lead to the rise of a ruling bureaucracy, pursuing "from above" their own power and privileges. *"**All political power inevitably creates a privileged situation** for the men who exercise it,"* argued Voline. *"Thus is violates, from the beginning, the equalitarian principle and strikes at the heart of the Social Revolution"* and *"becomes the source of other privileges ... **power is compelled to create a bureaucratic and coercive apparatus** indispensable to all authority ... **Thus it forms a new privileged caste,** at first politically and later economically."* [**The Unknown Revolution**, p. 213 and p. 249]

The concept of revolution *"from above"* is one that inevitably leads to a new form of class rule — rule by bureaucracy. This is not because the Bolsheviks were "bad people" — rather it is to do with the nature of centralised power (which by its very nature can only be exercised by the few) combined with bad politics (the confusion of party power with people power, unthinking prejudices in favour of centralism, ignoring the need for only *"from below"*, etc.). As the Russian anarchist Sergven argued in 1918 while the Bolshevik regime was building state capitalism:

> *"The proletariat is being gradually enserfed by the state. The people are being transformed into servants over whom there has arisen a new class of administrators — a new class born mainly form the womb of the so-called intelligentsia ... We do not mean to say ... that the Bolshevik party set out to create a new class system. But we do say that even the best intentions and aspirations must inevitably be smashed against the evils inherent in any system of centralised power. The separation of management from labour, the division between administrators and workers flows logically from centralisation. It cannot be otherwise."* [**The Anarchists in the Russian Revolution**, pp. 123–4]

Thus McNally's use of the term *"from below"* is dishonest on two levels. Firstly, it is of anarchist origin and, secondly, it was repudiated by Lenin himself (who urged revolution *"from below"* and *"from above"*, thus laying the groundwork for a new class system based around the Party). It goes without saying that either McNally is ignorant of his subject (and if so, why write a pamphlet on it?) or he knew these facts and decided to suppress them. Either way it shows the bankruptcy of Marxism — it uses libertarian rhetoric for non-libertarian ends while distorting the real source of those ideas. That Lenin dismissed this rhetoric and the ideas behind them as *"anarchist"* says it all. McNally's (and the SWP/ISO's) use of this rhetoric and imagery is therefore deeply dishonest.

15. Did Trotsky keep alive Leninism's *"democratic essence"*?

McNally argues that *"[d]uring the terrible decades of the 1920s and 1940s ... the lone voice of Leon Trotsky kept alive some of the basic elements of socialism from below"* and suggests it *"was Trotsky's great virtue to insist against all odds that socialism was rooted in the struggle for human freedom."* By the mid-1920s *"the programme of the Left Opposition"* which Trotsky lead had as one of its *"two central planks"* that *"democracy had to be re-established in the Bolshevik party and in the mass organisations such as the trade unions and the soviets."* In short:

> *""Throughout the 1920s and until his death at the hands of Stalinist agent in 1940, Trotsky fought desperately to build a revolutionary socialist movement based on the principles of Marx and Lenin.""*

There is one slight flaw with this argument, namely that it is not actually true. All through the 1920s and 1930s Trotsky, rather than argue for *"socialism's democratic essence"*, continually argued for party dictatorship. That McNally asserts the exact opposite suggests that the ideas of anarchism are not the only ones he is ignorant of. To prove our case, we simply need to provide a chronological account of Trotsky's actual ideas.

We shall begin in early 1920 when he argued that the *"working class cannot be left wandering round all over Russia. They must be thrown here and there, appointed, commanded, just like soldiers"* and that *"[d]eserters from labour ought to be formed into punitive battalions or put into concentration camps"*. [quoted by Maurice Brinton, *"The Bolsheviks and Workers' Control"*, **For Workers' Power**, p. 61] Is *"human freedom"* (to use McNally's words) compatible with Trotsky's suggestions? This was no isolated comment and in July of that year we discover him arguing that:

> *"In the hands of the party is concentrated the general control ... it has the final word in all fundamental questions ... the last word belongs to the Central Committee of the party ... Such a regime is possible only in the presence of the unquestioned authority of the party, and the faultlessness of its discipline ...*
>
> *"The exclusive role of the Communist Party under the conditions of a victorious proletarian revolution is quite comprehensible. The question is of the dictatorship of a class. In the composition of that class there enter various elements, heterogeneous moods, different levels of development. Yet the dictatorship pre-supposes unity of will, unity of direction, unity of action. By what other path then can it be attained? The revolutionary supremacy of the proletariat pre-supposes within the proletariat itself the political supremacy of a party, with a clear programme of action and a faultless internal discipline.*
>
> *"The policy of coalitions contradicts internally the regime of the revolutionary dictatorship. We have in view ... a coalition of Communists with other 'Socialist' organisations, representing different stages of backwardness and prejudice-of the labouring masses.*
>
> *"[...]*
>
> *"We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It*

is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class. It is quite natural that, in the period in which history brings up those interests ... the Communists have become the recognised representatives of the working class as a whole." [**Terrorism and Communism**, pp. 107–9]

He argued against those who suggested that the dictatorship should be carried out by the whole class: *"It is not easy to understand what actually they imagine when they say this. The dictatorship of the proletariat, in its very essence, signifies the immediate supremacy of the revolutionary vanguard, which relies upon the heavy masses, and, where necessary, obliges the backward tail to dress by the head."* [**Op. Cit.**, p. 110] This rejection of democracy also applied to workplace democracy:

"our Party Congress ... expressed itself in favour of the principle of one-man management in the administration of industry ... It would be the greatest possible mistake ... to consider this decision as a blow to the independence of the working class ... It would consequently be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy over the whole Soviet mechanism of the collective will of the workers, and not at all in the form in which individual economic enterprises are administered ... we took our stand, and continue to do so on purely Marxist views of the revolutionary problems and creative duties of the proletariat when it has taken power into its own hands .. . I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully." [**Op. Cit.**, pp. 161–3]

In this, as with party dictatorship, he was simply repeating Bolshevik orthodoxy — Lenin had been arguing for state-appointed one-man management (armed with *"dictatorial"* authority) since the spring of 1918. Ignoring all the euphemisms for party dictatorship (*"the collective will of the workers"*) and obvious questions (like, if this were the case, how Trotsky could argue that it was the proletariat which had *"taken power into its own hands"*?), the fact is that he was simply wrong. It **does** matter if workplaces are run by their workers or not for if they do not then someone else does. Replacing capitalists with state bureaucrats just changes the face of the boss — as anarchists have been arguing since Proudhon. Trotsky did not deny how authoritarian this regime was:

"Both economic and political compulsion are only forms of the expression of the dictatorship of the working class in two closely connected regions ... the road to Socialism lies through a period of the highest possible intensification of the principle of the State ... Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless

> *form of State, which embraces the life of the citizens authoritatively in every direction ... No organisation except the army has ever controlled man with such severe compulsion as does the State organisation of the working class in the most difficult period of transition. It is just for this reason that we speak of the militarisation of labour."* [**Op. Cit.**, pp. 169–170]

Against those who argued that by *"[d]estroying or driving underground the other parties, you have thereby prevented their political competition with you, and consequently you have deprived yourselves of the possibility of testing your line of action"* Trotsky replied by pointing to the efficiency of Bolshevik repression: *"In a period in which ... the political struggle swiftly passes into a civil war, the ruling party has sufficient material standard by which to test its line of action, without the possible circulation of Menshevik papers. Noske crushes the Communists, but they grow. We have suppressed the Mensheviks and the SRs — and they have disappeared. This criterion is sufficient for us."* From this he concluded that Bolshevism *"expresses the interests of historical development."* [**Op. Cit.**, pp. 109–110] Needless to say, he did not repeat this "might-makes-right" criteria when the Stalinists made the Trotskyists disappear in the late 1920s and 1930s.

Of course, this was written during the Civil War and may be excused in terms of the circumstances in which it was written. However, this ignores the awkward fact that Trotsky's arguments reflected the theoretical conclusions required to produce what he considered as a **successful** revolution and, as noted in section 8, other leading Bolsheviks had proclaimed to the world this necessity of party dictatorship. Trotsky did not object and universalised the argument when he pondered the important decisions of the revolution and who would make them in his reply to the delegate from the Spanish anarcho-syndicalist union the CNT:

> *"Who decides this question [and others like it]? We have the Council of People's Commissars but it has to be subject to some supervision. Whose supervision? That of the working class as an amorphous, chaotic mass? No. The Central Committee of the party is convened to discuss ... and to decide ... Who will solve these questions in Spain? The Communist Party of Spain."* [**Proceedings and Documents of the Second Congress 1920**, vol. 1, p. 174]

This dismissal of working-class democracy was party orthodoxy, as can be seen from the awkward fact that Trotsky continued to argue for party dictatorship after the end of the civil war in November 1920. Thus we discover him in early in 1921 arguing again for Party dictatorship at the Communist Party's Tenth Party Congress. His comments made there against the **Workers' Opposition** within the Communist Party make his position clear:

> *"The Workers' Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers' right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers' democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party, which is obliged to maintain its dictatorship, regardless of temporary wavering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a workers' democracy."* [quoted by Samuel Farber, **Before Stalinism**, p. 209]

It should be noted that Trotsky was being too generous to the Workers' Opposition, for *"while demanding more freedom of initiative for the workers"* in economic matters, *"it was quite content to leave untouched the state of affairs in which a few hundred thousand imposed their will on many millions"* and it *"had no wish to disturb the communist party's monopoly of political power."* [Leonard Schapiro, **The Origin of the Communist Autocracy**, p. 294] So even limited industrial democracy was considered too much by Trotsky in 1921. In late March 1921, he re-iterated this position in relation to the crushing of the Kronstadt revolt for soviet democracy by asserting that the *"economic, political, and national independence of Russia is possible only under the dictatorship of the soviets. The backbone of this dictatorship is the Communist Party. There is no other party that can play this part, nor can there be."* [Lenin and Trotsky, **Kronstadt**, p. 73]

Trotsky repeated this call again in 1922 when he stated plainly that *"we maintain the dictatorship of our party!"* [**The First Five Years of the Communist International**, vol. 2, p. 255] Writing in the following year, he argued that *"[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party, and its leadership in all spheres of our work."* He stressed that *"[o]ur party is the ruling party ... To allow any changes whatever in this field, to allow the idea of a partial ... curtailment of the leading role of our party would mean to bring into question all the achievements of the revolution and its future."* He indicated the fate of those who **did** question this: *"Whoever makes an attempt on the party's leading role will, I hope, be unanimously dumped by all of us on the other side of the barricade."* [**Leon Trotsky Speaks**, p. 158 and p. 160] Which, of course, was exactly what the Bolsheviks had done to other socialists (anarchists and others) and working class militants and strikers after they had taken power (see section H.6 for details).

At this point, it will be argued that this was before the rise of Stalinism and his activities in the Left Opposition. As McNally suggests, many argue that these developments saw Trotsky finally rejecting the idea of party dictatorship and re-embracing what McNally terms the *"democratic essence"* of Leninism. Unfortunately, yet again, this argument suffers from the flaw that it is false.

Let us start with the so-called *"New Course"* of December 1923, in which Trotsky stated that *"[w]e are the only party in the country and, in the period of the dictatorship, it could not be otherwise"*, the Party was *"obliged to monopolise the direction of political life"* and it was *"incontestable that fractions [within the Party] are a scourge in the present situation"*. Of course, there was talk of *"workers' democracy"* but the *"New Course Resolution"* was clear that that term in fact meant only internal party democracy: *"Workers' democracy means the liberty of frank discussion of the most important questions of party life by all members, and the election of all leading party functionaries and commissions"*. [**The Challenge of the Left Opposition (1923–25)**, p. 87, p. 89 and p. 460]

This applied to the banning of factions **within** the Communist party, with Trotsky keen to stress at the 13th Party Congress in 1924 that *"party democracy in no way implies freedom for factional groupings which are extremely dangerous for the ruling party, since they threaten to split or divide the government and the state apparatus as a whole. I believe this is undisputed and indisputable"*. He linked his position to the 10th Party Congress *"where Valdimir Ilyich [Lenin] personally"* made the same points and re-iterated his position: *"I have never recognised freedom for groupings inside the party, nor do I now recognise it"*. [**Op. Cit.**, p. 170 and p. 171] He declared his faith in the Party:

> *"Comrades, none of us wants to be or can be right against the party. In the last analysis the party is always right, because the party is the only historical instrument that*

> *the working class possesses for the solution of its fundamental tasks ... I know that no one can be right against the party. It is only possible to be right only with the party and through it because history has not created any other way to determine the correct position ... the party, in the last analysis, is always right".* [**Op. Cit.**, p. 179]

He did acknowledge that *"even the party itself can make occasional mistakes"* but argued that the duty of a party member was to follow its decisions if they could not convince the party that it had made one of these. The links to his arguments from 1920 and 1921 are clear enough, alongside the privileged position this places the party in terms of its right to ignore any democratic decisions of the masses it claimed to be ruling on behalf of. Needless to say, the "New Course Resolution" likewise stated party democracy *"does not ... imply the freedom to form factional groupings".* [**Op. Cit.**, p. 180 and p. 460]

Moving on to Left Opposition proper, we see Trotsky opining in 1926 that the *"dictatorship of the party does not contradict the dictatorship of the class either theoretically or practically; but is the expression of it, if the regime of workers' democracy is constantly developed more and more."* [**The Challenge of the Left Opposition (1926–27)**, p. 76] The obvious contradictions and absurdities of this assertion are all too plain. Needless to say, when defending the concept of *"the dictatorship of the party"* he linked it to Lenin (and so to Leninist orthodoxy):

> *"Of course, the foundation of our regime is the dictatorship of a class. But this in turn assumes ... it is class that has come to self-consciousness through its vanguard, which is to say, through the party. Without this, the dictatorship could not exist ... Dictatorship is the most highly concentrated function of a class, and therefore the basic instrument of a dictatorship is a party. In the most fundamental aspects a class realises its dictatorship through a party. That is why Lenin spoke not only of the dictatorship of the class but also the dictatorship of the party and,* ***in a certain sense****, made them identical."* [**Op. Cit.**, pp. 75–6]

The following year saw Trotsky state that *"[w]ith us the dictatorship of the party (quite falsely disputed theoretically by Stalin) is the expression of the socialist dictatorship of the proletariat ... The dictatorship of a party is a part of the socialist revolution".* [**Leon Trotsky on China**, p. 251] 1927 also saw the publication of the **Platform of the Opposition**, in which Trotsky **still** did not question the issue of Party dictatorship. Indeed, it was actually stressed in that document and so while it urged a *"consistent development of a workers' democracy in the party, the trade unions, and the soviets"* and to *"convert the urban soviets into real institutions of proletarian power"* it contradicted itself by, ironically, attacking Stalin for weakening the party's dictatorship. In its words, the *"growing replacement of the party by its own apparatus is promoted by a 'theory' of Stalin's which denies the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party."* It stressed that *"the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry"* and *"[n]obody who sincerely defends the line of Lenin can entertain the idea of 'two parties' or play with the suggestion of a split. Only those who desire to replace Lenin's course with some other can advocate a split or a movement along the two-party road".* Given this: *"We will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a*

single party." [**The Challenge of the Left Opposition (1926–7)**, p. 384, p. 395, p. 439 and p. 441]

The Platform was as anti-democratic economically as it was politically, asserting that *"nationalisation of the means of production was a decisive step toward the socialist reconstruction of that whole social system which is founded upon the exploitation of man by man"* and that the *"appropriation of surplus value by a workers' state is not, of course, exploitation"* yet makes no call for workers' management of production (unsurprisingly as one-man management had been raised by Lenin in early 1918 and became Bolshevik orthodoxy as Trotsky had explained in 1920). The Platform does acknowledge that *"we have a workers' state with bureaucratic distortions"* and so its *"swollen and privileged administrative apparatus devours a very considerable part of our surplus value"* and *"the growing bourgeoisie, by means of trade and gambling on the abnormal disparity of prices, [also] appropriates a part of the surplus value created by our state industry"*. Thus *"all the data testify that the growth of wages is lagging behind the growth of the productivity of labour."* [**Op. Cit.**, p. 347, p. 348 and p. 350] Trotsky appeared to believe that an economic regime marked by one-man management by state-appointed bosses under a party dictatorship would somehow be without exploitation even though someone other than the workers controlled both their labour and how its product (and any surplus) was used — just as in a capitalist workplace. He failed to understand that this exploitation was the inevitable result of the economic regime he considered as "socialist" — namely *"nationalisation of the means of production"* which simply handed the economy to the bureaucracy and created state capitalism (see section H.3.13). This did not abolish *"the exploitation of man by man"* but rather changed the social class which exploited the working class from private capitalists to state bureaucrats — as anarchists had predicted from Proudhon onwards.

Of course **The Platform** did not bother to explain how workers' democracy **could** develop within a party dictatorship nor how soviets could become institutions of power when real power would, obviously, lie with the party. But, then, it did not have to as by *"workers' democracy"* the Platform meant inter-party democracy, as can be seen when it *"affirm[s]"* the *"New Course Resolution"* definition quoted above. [**Op. Cit.**, p. 402]

As is well know, the Opposition was crushed and Trotsky forced into exile. This did not lead to a fundamental re-evaluation of the degeneration of the revolution and the need for genuine soviet democracy. A key task was *"[t]o stop the dissolution of the party into the class in the USSR"* and so, perhaps unsurprisingly, Soviet democracy went unmentioned. [**Writings 1930**, p. 148] Repeating previous arguments, Trotsky was fundamentally concerned about the dangers *"if the vanguard is dissolved into the amorphous mass"* for *"the party is not the class, but its vanguard; it cannot pay for its numerical growth by the lowering of its political level"*. There was *"the demand of party democracy"* for the dictatorship of the proletariat *"is inconceivable without a ruling proletarian party"* but nothing on working class freedom or democracy. Perhaps this is unsurprising: *"What we mean by the restoration of party democracy is that the real revolutionary, proletarian core of the party win the right to curb the bureaucracy and to really purge the party"*. In other words, the first act of the successful Opposition would have been the reduction in numbers of those who had some kind of meaningful vote. Rest assured, though, because the new party regime *"means that the party directs the proletarian dictatorship but does not strangle the mass organisations of the toilers"* and the secret ballot is *"one of the most important means to discipline the entire apparatus and subordinate it to the party"*. [**Writings 1930–31**, p. 241, p. 244, p. 247, pp. 255–6, p. 70 and

p. 130] Clearly *"socialism's democratic essence"* was, at best, applicable to within the ruling party — or at least what remained of it after the purges.

In 1932, he was arguing that the *"same class can rule with the help of different political systems and methods according to circumstances. So the bourgeoisie on its historical road carried through its rule under absolute monarchy, bonapartism, parliamentary republic and fascist dictatorship ... the Soviet regime means the rule of the proletariat, irrespective of how broad the stratum on whose hands the power is* ***immediately concentrated****."* This was justification for his denial that there was *"a small group in the Kremlin who exercise oligarchical powers"* (*"No, that is not so"*). [**Writings 1932**, p. 217] Trotsky seemed to have forgotten that the bourgeoisie was a minority class which controlled the economic life of a country. Given this, it is not surprising that it could still rule under dictatorships. The same cannot be said of the working class — particularly if, as under Lenin and Trotsky, its democratic control of work and so the economy was replaced by one-man management. Yet Trotsky had no alternative to make such an obviously wrong assertion — to acknowledge the truth, that socialism needs meaningful workers' social and economic democracy to qualify as genuinely socialist — would have meant raising questions over the nature of the Bolshevik regime between 1918 and 1923 when he was at its commanding heights. Hence clearly incorrect assertions like: *"The dictatorship of a class does not mean by a long shot that its entire mass always participates in the management of the state"* [**Writings 1933–34**, p. 124]

In 1936 Trotsky finally appeared to revise his ideas in **The Revolution Betrayed**, although his revisionism in terms of democracy was combined with revisionism in the events of the Russian Revolution. It would be fair to suggest that McNally's account of Trotsky's ideas may be based on this work for in stark contrast to his early arguments he now stated that *"[b]ureaucratic autocracy must give place to Soviet democracy. A restoration of the right of criticism, and a genuine freedom of elections, are necessary conditions for the further development of the country. This assumes a revival of freedom of Soviet parties, beginning with the party of Bolsheviks"*. [**The Revolution Betrayed**, p. 273] Given his previous comments on the matter, the reader would be justified in wondering whether, rather than a sincere change of heart, Trotsky's position was a limited and temporary aberration (Anarchist-turned-Bolshevik Victor Serge, who later broke with Trotsky over this issue, stated that he *"had prevailed on him to include in"* this book *"a declaration of freedom for all parties accepting the Soviet system."* [**Memoirs of a Revolutionary**, p. 348]).

The evidence suggests the latter, that it was a temporary aberration — particularly given the misleading account of the rise of the Bolshevik dictatorship. Thus we find Trotsky suggesting that it was 1924–26 that saw *"the complete suppression of party and Soviet democracy"* when, as noted above, he was publicly acknowledging the reality of party dictatorship in 1920. He also forgot the ideas of his own Opposition from 1927 and in 1936 it was no longer was it a case of the necessity of a single party as *"a class has many 'parts' -\96 some look forward and some back -\96 [and so] one and the same class may create several parties ... An example of only one party corresponding to one class is not to be found in the whole course of political history -\96 provided, of course, you do not take the police appearance for the reality."* That the need for the dictatorship of the vanguard was justified **precisely** in terms of the backwardness of the class and other parties was forgotten. Likewise, the acknowledgement of party dictatorship as a principle of Leninism was overlooked in favour of the suggestion that the civil war resulted in the opposition parties being *"forbidden one after the other"* and while this was *"obviously in conflict with the spirit of Soviet democracy, the leaders of Bolshevism regarded [it] not as a principle, but as an episodic act of self-defence."* [**Op. Cit.**, p. 34, p. 252 and p. 96] It would be churlish to note that the final

abolition of opposition parties — like factions within the ruling party — occurred **after** the end of the civil war.

These awkward facts did not stop Trotsky from suggesting a fundamental difference between the Leninist and Stalinist dictatorships:

> *"To be sure, during the first period of the Soviet era the Bolshevik party also exercised a monopoly. But to identify these two phenomena would be to take appearance for reality. The prohibition of opposition parties was a temporary measure dictated by conditions of civil war, blockade, intervention and famine. The ruling party, representing in that period a genuine organisation of the proletarian vanguard, was living a full-blooded inner life. A struggle of groups and factions to a certain degree replaced the struggle of parties. At present, when socialism has conquered 'finally and irrevocably,' the formation of factions is punished with concentration camp or firing squad. The prohibition of other parties, from being a temporary evil, has been erected into a principle."* [**Op. Cit.**, p. 251]

In reality, the necessity of a party dictatorship was embraced by leading Bolsheviks like Trotsky and proclaimed to the world Socialist movement. The prohibition of opposition parties was not lamented at the time but rather raised to a principle (a Leninist principle, no less!) and implemented after victory in the civil war was secure. Factions were banned — with Trotsky's wholehearted support — precisely because, as he later noted, they had replaced the struggle of parties. Nor was Trotsky bothered by state repression of opposition when he was in charge. For example a series of (unofficial) strikes broke out in July and August 1923 in Moscow and Petrograd and this *"gave a new lease of life to the Mensheviks"* and so *"the GPU carried out a massive round up of Mensheviks, and as many as one thousand were arrested in Moscow alone."* [Tony Cliff, **Trotsky**, vol. 3, p. 25] When it was the turn of the ex-Bolsheviks in the Workers' Group, Trotsky *"was not at all eager to defend"* them and *"did not protest when their adherents were thrown into prison. Nor was he at all eager to support their demand for soviet democracy in that extreme form"*. [Isaac Deutscher, **The Prophet Unarmed**, pp. 108–9] It should be noted that rather than *"extreme"* a better word would have been *"genuine"* as the Workers' Group, unlike Trotsky, **did** call for a multi-party workers' democracy — and paid the price. Indeed, the *"New Course Resolution"* even went so far as to say that *"it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers' Truth and Workers' Group."* [**The Challenge of the Left Opposition (1923–25)**, p. 408]

It would be remiss to not note how limited Trotsky's position was: being limited to the Soviet Union it does not automatically negate his arguments previously made to the international socialist movement. Moreover, given the revisionism of the origins of the Bolshevik dictatorship it is legitimate to ponder how honest Trotsky's statement is. He stated that if *""the Soviet bureaucracy is overthrown by a revolutionary party having all the attributes of the old Bolshevism"* then it *"would begin with the restoration of democracy in the trade unions and the Soviets"* and it *"would be able to, and would have to, restore freedom of Soviet parties."* Yet it was precisely the Bolsheviks who decreed that other parties within the Soviets were not genuine Soviet parties after all and repressed them. What guarantee exists that once the Bolsheviks had been revived (i.e., his faction took over) they did not conclude, as before, the necessity of party dictatorship?

None. After all, did he not suggest that the *"dictatorship of the Bolshevik party proved one of the most powerful instruments of progress in history"*? [**The Revolution Betrayed**, pp. 238–9 and p. 104]

This limited support for Soviet Democracy was short-lived. Writing in 1937, ten years after the Platform was published and a year after **The Revolution Betrayed**, Trotsky was reiterating the privileged position of the party. In his essay *"Bolshevism and Stalinism"* he argued quite explicitly that *"the proletariat can take power only through its vanguard"* and that *"the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity."* Only with *"support of the vanguard by the class"* can there be the *"conquest of power"* and it was in *"this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard."* Thus, rather than the working class as a whole seizing power, it is the *"vanguard"* which takes power – *"a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society."* Note, the party is *"the sovereign ruler of society,"* **not** the working class. Nor can it be said that he was not clear who held power in his system: state power is required to **govern the masses,** who cannot exercise power themselves as *"[t]hose who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the Bolshevik leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [**Writings 1936–37**, p. 490, p. 488 and p. 495] Later that same year he repeated this position clearly and unambiguously:

> *"The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history ... The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution .. . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses."* [**Op. Cit.**, pp. 513–4]

Which was, let us not forget, his argument in 1920. Such remarkable consistency on this point over a 17 year period and one which cannot be overlooked if you seek to present an accurate account of Trotsky's ideas during this period. Significantly, this was the year after his apparent (and much belated) embrace of soviet democracy for the USSR in **The Revolution Betrayed** and so that work must be considered as a temporary aberration, quickly rejected. His advice on what to do during the Spanish Revolution followed this pattern: *"Because the leaders of the CNT renounced dictatorship **for themselves** they left the place open for the Stalinist dictatorship."* [our emphasis, **Op. Cit.**, p. 514] So much for workers' power!

The following year saw Trotsky produce an article defending the suppression of the Kronstadt revolt which proclaimed that a *"revolution is 'made' directly by a **minority**. The success of a revolution is possible, however, only where this minority finds more or less support, or at least friendly*

neutrality, on the part of the majority. The shift in different stages of the revolution, like the transition from revolution to counterrevolution, is directly determined by changing political relations between the minority and the majority, between the vanguard and the class." [*"Hue and Cry Over Kronstadt"*, Lenin and Trotsky, **Kronstadt**, p. 85] Given that Kronstadt had rebelled against the Bolshevik dictatorship for soviet democracy, Trotsky's argument suggests that for him the rule of the party (the *"minority ... the vanguard"*) is more important than soviet democracy (see the appendix on "What was the Kronstadt Rebellion?" for more details of this key event in the history of the Russian Revolution). In other words, if the majority come to reject the minority then the former shows lack of sufficient class awareness and so the latter needs, as in Kronstadt, to use state power to secure its ruling position. This is implicit in the following strange comment:

> *"It is true that some of them [the critics of Bolshevism] recognise the revolution and the dictatorship \96- in words. But this does not help matters. They wish for a revolution which will not lead to dictatorship or for a dictatorship which will get along without the use of force. Of course, this would be a very 'pleasant' dictatorship. It requires, however, a few trifles: an equal and, moreover, an extremely high, development of the toiling masses. But in such conditions the dictatorship would in general be unnecessary. Some Anarchists, who are really liberal pedagogues, hope that in a hundred or a thousand years the toilers will have attained so high a level of development that coercion will prove unnecessary. Naturally, if capitalism could lead to such a development, there would be no reason for overthrowing capitalism. There would be no need either for violent revolution or for the dictatorship which is an inevitable consequence of revolutionary victory"* [**Op. Cit.**, pp. 92–3]

Given that the so-called "dictatorship of the proletariat" is meant to be the means by which the proletariat coerce the former ruling elite, it is strange to read Trotsky argue that coercion becomes unnecessary if the toiling masses have a high level of political development. Why would the ruling elite stop their attempts at counter-revolution in those circumstances? That seems unlikely so we can only conclude that the coercion (like the dictatorship) is directed against the *"toiling masses"* by the ruling party. This is confirmed the following year (1939) when Trotsky repeats the same dictatorial ideas of 1921 by indicating — yet again — that he viewed democracy as a threat to the revolution and saw the need for party power over workers' freedom:

> *"The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves ... if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the proletariat is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself."* [*"The Moralists and Sycophants against Marxism"*, pp. 53–66, **Their Morals and Ours**, p. 59]

Needless to say, **by definition** everyone is *"backward"* when compared to the *"vanguard of the proletariat."* Moreover, as it is this *"vanguard"* which is *"armed with the resources of the state"* and **not** the proletariat as a whole we are left with one obvious conclusion, namely party dictatorship rather than working class freedom. This is because such a position means denying exactly what

workers' democracy is meant to be all about — namely that working people can recall and replace their delegates when those delegates do not follow the wishes and mandates of the electors. If the governors determine what is and what is not in the "real" interests of the masses and "overcome" (i.e. repress) the governed, then we have dictatorship, not democracy.

Trotsky was hardly alone in his views given that they were Bolshevik orthodoxy. Amazingly enough, even in the Russian prison camps in the late 1920s and early 1930s, *"almost all the Trotskyists continued to consider that 'freedom of party' would be 'the end of the revolution.' 'Freedom to choose one's party — that is Menshevism,' was the Trotskyists' final verdict."* This was because it had been *"condemned formerly by Lenin, by Trotsky"* as well as by other Opposition Groups. [Ante Ciliga, **The Russian Enigma**, p. 280] As Left Oppositionist Victor Serge pointed out *"the greatest reach of boldness of the Left Opposition in the Bolshevik Party was to demand the restoration of inner-Party democracy, and it never dared dispute the theory of single-party government — by this time, it was too late."* [**The Serge-Trotsky Papers**, p. 181] Sadly, like Trotsky's **The Revolution Betrayed**, Serge's later **Memoirs** paint a different picture by asserting one of its *"great fundamental ideas"* was *"working-class democracy"*! [**Memoirs of a Revolutionary**, p. 252]

As can be seen, McNally does not present a remotely accurate account of Trotsky's ideas during the 1920s and 1930s. All of which makes McNally's comments deeply ironic. He argues that *"Stalin had returned to an ideology resembling authoritarian pre-Marxian socialism. Gone was socialism's democratic essence. Stalin's 'Marxism' was a variant of socialism from above"* Clearly, Trotsky's Marxism was also a variant of *"socialism from above"* and without *"socialism's democratic essence"* (unless you think that party dictatorship can somehow be reconciled with democracy or expresses one of the *"basic elements of socialism from below"*). For Trotsky, as for Stalin, the dictatorship of the party was a fundamental principle of Bolshevism and one which was above democracy (which, by its very nature, expresses the *"vacillation of the masses"*). Compare McNally's words on Stalinism to Trotsky's position:

> *""For [Stalin's] group, 'socialism' lost all foundation in organs of workers' democracy, soviets ... They came increasingly to identify socialism with a bureaucratic monopoly of power which allowed no place for organs of mass democracy ... Gone was the commitment to workers' democracy and international socialism ... Stalin undertook to reshape the entire nature and direction of Russian society ... the elimination of all dissent; the liquidation of all forms of democracy and of genuine working class organisation ... "*

Given that the identification of socialism with the party's *"monopoly of power"* as well as removal of *"the commitment to workers' democracy"* occurred under Lenin and that Trotsky's defended this, the question arises was there any fundamental difference between Leninism and Stalinism? As Victor Serge admitted, *"a good many Oppositionists rallied to the [Stalinist] 'general line' and renounced their errors since, as they put it, 'After all, it is our programme that is being applied'"* [**Op. Cit.**, p. 252] Hence Emma Goldman:

> *"In point of truth I see no marked difference between the two protagonists of the benevolent system of the dictatorship except that Leon Trotsky is no longer in power to enforce its blessings, and Josef Stalin is ... Stalin did not come down as a gift from heaven to the hapless Russian people. He is merely continuing the Bolshevik traditions, even if in a more relentless manner ... I admit, the dictatorship under Stalin's rule has become*

> *monstrous. That does not, however, lessen the guilt of Leon Trotsky as one of the actors in the revolutionary drama"* [*"Trotsky Protests Too Much"*, **Writings of Emma Goldman**, pp. 251–2]

Ante Ciliga saw the similarities first-hand while in prison in the Soviet Union, noting that the Trotskyists *"who were in prison for anti-Stalinism could find nothing better to do than to indulge in Stalinism themselves [in their political groups] while in prison. This absurdity was only apparent; it merely served to prove that between Trotskyism and Stalinism there were many points in common"*. The outlook of the Trotskyist majority *"was not very different from that of the Stalinist bureaucracy; they were slightly more polite and human, that was all."* [**Op. Cit.**, p. 218 and p. 263] This is unsurprising given, as indicated, the same Bolshevik political legacy and same class position (Trotskyists were labelled *"the bureaucracy in exile"*). It may have been that if the Trotskyists had won the inter-bureaucracy struggle in the mid-1920s then the Soviet Union would have avoided the horrors of Stalinism but it would have remained a state capitalist party dictatorship and, as such, a class system in which the few exploit, oppress and repress the many. That this few would have exploited the many less ruthlessly and aimed to impose similar regimes internationally rather than concentrating on building *"socialism in one country"* does not mean much.

Needless to say, Goldman had no difficulty in recognising that Bolshevik Russia was *"State Capitalism"* in the early 1920s (i.e., when Trotsky was still part of the ruling class). [**My Disillusionment in Russia**, p. 247] McNally argues that *"[b]y making the nature of property ownership the criterion of workers' state"* rather than *"workers' power and workers' democracy"* Trotsky had *"committed an error that was seriously to disorient the Trotskyist movement in later years. For, unwittingly, Trotsky had broken from the most basic precepts of socialism from below."* Yet what alternative did he have? After all, both workers' democracy and power had been eliminated when he held power alongside Lenin and he did not consider the first — bar for a short period in 1936 — as important enough to advocate and equated the second with party rule. So if McNally's criteria is taken seriously then we must conclude that the Bolshevik regime had not been a "workers' state" since mid-1918 nor did Trotsky aim for one during the 1920s and 1930s. Which raises the awkward question of why McNally thinks he had not broken *"from the most basic precepts of socialism from below"* by defending Lenin's party dictatorship and Trotsky's attempts to recreate it? Does having the right people in power make *"workers' control of society"* an optional extra for *"socialism from below"*?

McNally then suggests that this breaking with *"the most basic precepts of socialism from below"* by not recognising Stalinist Russia was *"a system of bureaucratic state capitalism in which capital is collectively controlled by the privileged bureaucracy that controls the state"* was *"not readily apparent during Trotsky's lifetime."* Far from it — anarchists had recognised the grim reality of the new Bolshevik state from early 1918 and indicated that it had confirmed the fears raised by Bakunin in his polemics with Marx (see section H.3.13). It is worth indicating these arguments since we did not have to wait until the 1940s before drawing what to the uninitiated was an obvious conclusion — that the Soviet Union was a state capitalist dictatorship run by and for a new ruling minority.

A state, Bakunin argued, *"stands outside the people and above them"* and so was *"the government of society from above downward"* which resulted in the *"actual subordination of the sovereign people to the intellectual minority that governs them."* It was the *"government of the masses from above downwards"* by a minority *"which supposedly understands the real interests of the people better*

than the people themselves". However, *"power corrupts those invested with it just as much as those compelled to submit to it"* and the *"government of the majority by a minority in the name of the presumed stupidity of the one and the presumed intelligence of the other"* would have *"the direct and inevitable result of consolidating the political and economic privileges of the governing minority and the political and economic slavery of the masses".* Bakunin recognised the elitism inherent in Trotsky's privileging of the party (the vanguard) and argued that while it was claimed *"those elected will be passionately committed as well as learned socialists"* the reality would be that *"the pseudo-popular state will be nothing but the highly despotic government of the masses by a new and very small aristocracy of real or pretended scholars. The people are not learned, so they will be liberated in entirety form the cares of government and included in entirety in the governed herd. A fine liberation!"* The new government would *"begin to look upon the whole workers\92 world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people."* Rather than securing the freedom of the people *"no dictatorship can have any other objective than to perpetuate itself, and that it can engender only slavery in the people who endure it".* [**Statism and Anarchy**, p. 136, p. 198, p. 13, p. 24, p. 136, p. 137, pp. 178–9, p. 178 and p. 179]

Economically, the workers would remain oppressed and exploited as the Marxists would *"concentrate the reins of government in a strong hand, because the ignorant people require strong supervision. They will create a single state bank, concentrating in their own hands all commercial, industrial, agricultural, and even scientific, production, and will divide the people into two armies, one industrial and one agrarian, under the direct command of state engineers, who will form a new privileged scientific and political class."* The state bureaucracy would become the new ruling class, *"a new bureaucratic aristocracy"* who are *"corrupted by state service"*, and as soon as *"they enter state service ... the iron logic of their position, the force of circumstances inherent in certain hierarchical and profitable relationships, makes itself felt and ... [they] become bureaucrats from head to toe ... The demands of a certain position always prove stronger than sentiments, intentions, or good impulses ... They have to become members of the bureaucratic class ... they become enemies of the people, whether they want to or not".* [**Op. Cit.**, p. 181 and p. 51]

Clearly the Bolshevik experience confirmed Bakunin's critique of Marxism while the Makhnovist insurrectionary army in the Ukraine confirmed the validity of the anarchist alternative (see the appendix "Why does the Makhnovist movement show there is an alternative to Bolshevism?" for details). As such, it is ironic to read McNally state that *"[t]hroughout the 1920s and until his death .. . Trotsky fought desperately to build a revolutionary socialist movement based on the principles of Marx and Lenin."* Leaving Marx to one side for the moment, McNally's comments are correct simply because in his advocacy of party power and dictatorship (for a *"socialism from above,"* to use McNally's term) Trotsky was indeed following Lenin's principles and Bolshevik orthodoxy. As noted in the last section, Lenin had been arguing from a "socialism" based on *"above"* and *"below"* since at least 1905 (which, to show their Marxist orthodoxy, he linked to Engels and his arguments against Bakunin.) The reality of Bolshevik rule (as indicated in section 8) showed that pressure *"from above"* by a "revolutionary" government easily crushes pressure "from below" in the name, as Trotsky constantly stressed throughout the 1920s and 1930s, of the advanced political ideas of the Bolshevik party leaders. Yet despite Lenin and Trotsky's dismissal of democracy, McNally argues that democracy is the core need of socialism:

> *"A workers' state, according to Marx and Lenin, is a state based upon workers' control of society. It depends upon the existence of democratic organisation that can control society from below. A workers' state presupposes that workers are running the state. To talk of a workers' state is necessarily to talk of workers' power and workers' democracy."*

Which, as far as it goes, is correct (for anarchists, of course, the idea that a state can be run from below is utopian — it is not designed for that and no state has ever been). Sadly for his argument, both Lenin and Trotsky argued against the idea of workers' democracy and, in stark contrast, argued that the dictatorship of the party was essential for a successful revolution. Indeed, they both explicitly argued against the idea that a mass, democratic organisation could run society during a revolution. The need for party power was raised explicitly to combat the fact that the workers' could change their minds and vote against the vanguard party. As such, the founding fathers of the SWP/ISO political tradition explicitly argued that a workers' state had to reject workers power and democracy in order to ensure the victory of the revolution. Clearly, according to McNally's own argument, his own politics cannot be considered as "socialism from below" as it explicitly argued that a workers' state did not "necessarily" mean workers' power or democracy.

As indicated above, for the period McNally **himself** selects (the 1920s and 1930s), Trotsky consistently argued that the Bolshevik tradition the SWP/ISO places itself was based on the *"Leninist principle"* of party dictatorship. For McNally to talk about Trotsky keeping *"socialism from below"* alive is, therefore, truly amazing. It either indicates a lack of awareness of Trotsky's ideas or a desire to deceive. To be fair to McNally, the notion that Trotsky's Opposition supported genuine workers' democracy seems to be a common fallacy in SWP circles. Thus Chris Harman asserted that the *"alternative to Stalinism"* in the late 1920s was *"returning to genuine workers' democracy and consciously linking the fate of Russia to the fate of the world revolution"* (while allowing *"a limited development of heavy industry"*) and it was the *"historical merit of the Left Opposition"* that *"it framed a policy along these lines."* [Chris Harman, **Bureaucracy and Revolution in Eastern Europe**, p. 19] Clearly McNally is not the only Leninist unable — or unwilling — to discover the grim truth about the Left Opposition or, for that matter, the reality of Bolshevik rule.

For anarchists, we stress, the Bolshevik substitution of party power for workers power did not come as a surprise. The state is the delegation of **power** — as such, it means that the idea of a "workers' state" expressing "workers' power" is a logical impossibility (see section H.3.7). If workers **are** running society then power rests in their hands. If a state exists then power rests in the hands of the handful of people at the top, **not** in the hands of all. The state was designed for minority rule. No state can be an organ of working class (i.e. majority) self-management due to its basic nature, structure and design.

For this reason anarchists from Bakunin onwards have argued for a bottom-up federation of workers' councils as the agent of revolution and the means of managing society after capitalism and the state have been abolished. If these organs of workers' self-management are co-opted into a state structure (as happened in Russia) then their power will be handed over to the **real** power in any state — the government (in this case, the Council of People's Commissars). They will quickly become mere rubberstamps of the organisation which holds the reigns of power, the vanguard party and its central committee.

McNally rewrites history by arguing that it was *"Stalin's counter-revolution"* which saw *"communist militants ... executed, peasants slaughtered, the last vestiges of democracy eliminated."* The SWP/ISO usually date this "counter-revolution" to 1928 (the defeat of the Left Opposition and

the first Five Year Plan). However, long before this date there was no *"vestiges"* of meaningful democracy left — as Trotsky himself made clear in his comments in favour of party dictatorship between 1920 and 1923. Indeed, Trotsky had supported the repression of the Kronstadt revolt which had called for soviet democracy. McNally ignores this and instead argues that Trotsky *"acknowledged that the soviets had been destroyed, that union democracy had disappeared, that the Bolshevik party had been stripped of its revolutionary character"* under Stalinism. Yet, as we discusse in section H.6, the Bolsheviks had already destroyed soviet democracy, undermined union democracy and repressed all revolutionary elements outside of the party, argued for the introduction of state capitalism and the appointment of "one-man management" as well as repressing peasants and striking and protesting workers long before the start of the Russian Civil War in late May 1918. In short, the Bolsheviks had introduced much of which McNally denounces as "Stalinism" before the war he uses to excuse them for all responsibility for its rise. As Maurice Brinton rightly states:

> *"there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practices of Stalinism ... The more one unearths about this period the more difficult it becomes to define — or even to see — the 'gulf' allegedly separating what happened in Lenin's time from what happened later. Real knowledge of the facts also makes it impossible to accept ... that the whole course of events was 'historically inevitable' and 'objectively determined'. Bolshevik ideology and practice were themselves important and sometimes decisive factors in the equation, at every critical stage of this critical period [between 1917 and 1921]"* [*"The Bolsheviks and Workers' Control"*, **For Workers' Power**, p. 376]

To draw a sharp distinction between Stalinism and Bolshevism is difficult, if not impossible, to make based on McNally's own criteria. That Stalinism was more brutal, more unequal, more despotic is true but that does not change the similarities in social relationships between the two — both were dictatorial state capitalist regimes. That the repression did not extend to within the Bolshevik party is a weak hook to hang a theory on.

During his analysis of the failure of orthodox Trotskyism, McNally states that after the second world war *"the Trotskyist movement greeted"* the various new Stalinist regimes in Eastern Europe and elsewhere *"as workers' states"* in spite of being *"brutally undemocratic state capitalist tyrannies."* Given that the SWP/ISO and a host of other Leninist groups still argue that Lenin's brutally undemocratic state capitalist tyranny was some kind of "workers' state" McNally's comments seem deeply ironic. As such, Trotsky's defence of Stalinism as a *"degenerated workers' state"* is not as surprising nor as puzzling as McNally tries to claim. If, as he argues, *"[t]o talk of a workers' state is necessarily to talk of workers' power and workers' democracy"* then Lenin's regime had ceased to be a "workers' state" (if such a thing could exist) by the spring of 1918 at the latest. For anarchists (and libertarian Marxists) the similarities are all too clear between the regime under Lenin and that under Stalin. That McNally cannot see the obvious similarities suggests a lack of objectivity and a weak commitment to the principles of *"socialism from below"*

He sums up his account of the post-Second War World Trotskyists by arguing that *"the movement Trotsky had created fell victim to the ideology of socialism from above."* Unfortunately for his claims, this is not the case. As proven above, Trotsky had consistently argued for the dictatorship of the party between 1920 and 1940 and so Trotskyism had always been based on *"the ideology*

of socialism from above." Trotsky had argued for party dictatorship simply because democratic mass organisations would allow the working class to express their *"wavering"* and *"vacillations."* Given that, according to those who follow Bolshevik ideas, the working class is meant to run the so-called "workers' state" Trotsky's arguments are extremely significant. He explicitly acknowledged that under Bolshevism the working class does **not** actually manage their own fates but rather the vanguard party does. This is cannot be anything **but** *"socialism from above."* If, as McNally argues, Trotsky's *"fatal error"* in not recognising that Stalinism was state capitalism came from *"violating the principles of socialism from below,"* then this *"fatal error"* is at the heart of the Leninist tradition.

As such, the roots of Trotsky's *"fatal error"* can be traced further back than the rise of Stalin. Its real roots lie with the idea of a "workers' state" and so with the ideas of Marx and Engels. As Bakunin argued against Marx (and anarchists have repeated since) the state is, by its nature, a centralised and top-down machine. By creating a "revolutionary" government, power is automatically transferred from the working class into the hands of a few people at the top. As they have the real, **de facto**, power in the state, it is inevitable that they will implement "socialism from above" as that is how the state is structured. As Bakunin argued, all states *"are in essence only machines governing the masses from above"* by a *"privileged minority, allegedly knowing the genuine interests of the people better than the people themselves."* The idea of a state being run "from below" makes as much sense as "dry rain." Little wonder Bakunin argued for a *"federal organisation, from the bottom upward, of workers' associations, groups, city and village communes, and finally of regions and peoples"* as *"the sole condition of a real and not fictitious liberty."* In other words: *"Where all rule, there are no more ruled, and there is no State."* [**The Political Philosophy of Bakunin**, p. 211, p. 210 and p. 223] Only this, the destruction of every state and its replacement by a free federation of workers' councils, can ensure a real *"socialism from below"*.

Therefore, rather than signifying the working class running society directly, the "workers' state" actually signifies the opposite — namely, that the working class has delegated that power and responsibility to **others**, namely the government. As Leninism supports the idea of a "workers' state" then it is inevitably and logically tied to the idea of "socialism from below." Given that Lenin himself argued that "only from below" was an anarchist principle, we can easily see what the *"fatal error"* of Trotsky **actually** was. By rejecting anarchism he automatically rejected **real** *"socialism from below."*

Sadly for McNally, Trotsky did not, as he asserts, embrace the *"democratic essence"* of Leninism in the 1920s or 30s. Rather, as is clear from Trotsky's writings, he embraced party dictatorship (i.e. *"socialism from above"*) and considered this as quite compatible (indeed, an essential aspect) of his Leninist ideology. That McNally fails to indicate this and, indeed, asserts the exact opposite of the facts shows that it is not only anarchism he is ignorant about.

Marxists and Spanish Anarchism

In this appendix of our FAQ we discuss and reply to various analyses of Spanish anarchism put forward by Marxists, particularly Marxist-Leninists of various shades. The history and politics of Spanish Anarchism is not well known in many circles, particularly Marxist ones, and the various misrepresentations and distortions that Marxists have spread about that history and politics are many. This appendix is an attempt to put the record straight with regards the Spanish Anar-

chist movement and point out the errors associated with the standard Marxist accounts of that movement, its politics and its history.

Hopefully this appendix will go some way towards making Marxists (and others) investigate the actual facts of anarchism and Spanish anarchist history rather than depending on inaccurate secondary material (usually written by their comrades). As such, it is a supplement to section I.8 and provides some background information on the Social Revolution of 1936.

Part of this essay is based on the article *"Trotskyist Lies on Anarchism"* which appeared in **Black Flag** issue no. 211 and Tom Wetzel's article **Workers' Power and the Spanish Revolution**.

1. Were the Spanish Anarchists *"Primitive Rebels"*?

The thesis that the Spanish Anarchists were *"primitive rebels,"* with a primitive understanding of the nature of revolution is a common one amongst Marxists. One of the main sources for this kind of argument is Eric Hobsbawm's **Primitive Rebels**, who was a member of the British Communist Party at the time. While the obvious Stalinist nature of the author may be thought enough to alert the intelligent of its political biases, its basic thesis is repeated by many Marxists.

Before discussing Hobsbawm in more detail, it would be useful to refute some of the more silly things so-called serious historians have asserted about Spanish Anarchism. Indeed, it would be hard to find another social or political movement which has been more misrepresented or its ideas and activities so distorted by historians whose attitudes seem more supported by ideological conviction rather than history or investigation of social life.

One of the most common descriptions of Spanish anarchism is that it was *"religious"* or *"millenarium"* in nature. Hobsbawm himself accepts this conceptualisation, along with historians and commentators like Gerald Brenan and Franz Brokenau (who, in fact, did state *"Anarchism **is** a religious movement"*). Such use of religion was largely due to the influence of Juan Diaz del Moral, a lawyer and historian who was also a landowner. As Jerome R. Mintz points out, *"according to Diaz del Moral, the moral and passionate obreros conscientes [conscious workers – i.e. workers who considered themselves to be anarchists] absorbed in their pamphlets and newspapers were akin to frenzied believers in a new religion."* [**The Anarchists of Casas Viejas**, p. 5f] However, such a perspective was formed by his class position and privileges which could not help but reflect them:

> *"Diaz del Moral ascribed to the campesinos [of Andalusia] racial and cultural stereotypes that were common saws of his class. The sole cause for the waves of rural unrest, Diaz del Moral asserted, could be found in the psychology of the campesinos ... He believed that the Andalusian field workers had inherited a Moorish tendency toward ecstasy and millenarianism that accounted for their attraction to anarchist teaching. Diaz del Moral was mystified by expressions of animosity directed toward him, but the workers considered him to be a senorito, a landowner who does not labour ... Although he was both scholarly and sympathetic, Diaz del Moral could not comprehend the hunger and the desperation of the campesinos around him ... To Diaz del Moral, campesino ignorance, passion, ecstasy, illusion, and depression, not having a legitimate basis in reality, could be found only in the roots of their racial heritage."* [**Op. Cit.**, pp. 5–6]

Hence the *"religious"* nature of anarchism — it was one of the ways an uncomprehending member of the middle-class could explain working class discontent and rebellion. Unfortunately, this "explanation" has become common place in history books (partly reflected academics class interest too and lack of understanding of working class interests, needs and hopes).

As Mintz argues, *"at first glance the religious model seems to make anarchism easier to understand, particularly in the absence of detailed observation and intimate contact. The model was, however, also used to serve the political ends of anarchism's opponents. Here the use of the terms 'religious' and 'millenarium' stamp anarchist goals as unrealistic and unattainable. Anarchism is thus dismissed as a viable solution to social ills."* He continues by arguing that the *"oversimplifications posited became serious distortions of anarchist belief and practice"* (as we shall see). [**Op. Cit.**, p. 5 and p. 6]

Temma Kaplan's critique of the *"religious"* view is also worth mentioning. She argues that *"the millenarium theory is too mechanistic to explain the complex pattern of Andalusian anarchist activity. The millenarian argument, in portraying the Andalusian anarchists as fundamentally religious, overlooks their clear comprehension of the social sources of their oppression."* She concludes that *"the degree of organisation, not the religiosity of workers and the community, accounts for mass mobilisations carried on by the Andalusian anarchists at the end of the nineteenth century."* She also notes that the *"[i]n a secular age, the taint of religion is the taint of irrationality."* [**Anarchists of Andalusia: 1868–1903**, pp. 210–12 and p. 211] Thus, the Andalusian anarchists had a clear idea who their enemies were, namely the ruling class of the region. She also points out that, for all their revolutionary elan, the anarchists developed a rational strategy of revolution, channelling their energies into organising a trade union movement that could be used as a vehicle for social and economic change. Moreover, as well as a clear idea of how to change society they had a clear vision of what sort of society they desired — one built around collective ownership and federations of workers' associations and communes.

Therefore the idea that anarchism can be explained in *"religious"* terms is fundamentally flawed. It basically assumes that the Spanish workers were fundamentally irrational, unable to comprehend the sources of their unhappiness nor able to define their own political goals and tactics and instead looked to naive theories which reinforced their irrationalities. In actuality, like most people, they were sensible, intelligent human beings who believed in a better life and were willing to apply their ideas in their everyday life. That historians apply patronising attitudes towards them says more about the historians than the campesinos.

This uncomprehending attitude to historians can be seen from some of the more strange assertions they make against the Spanish Anarchists. Gerald Brenan, Eric Hobsbawm and Raymond Carr, for example, all maintained that there was a connection between anarchist strikes and sexual practices. Carr's description gives a flavour:

> *"Austere puritans, they sought to impose vegetarianism, sexual abstinence, and atheism on one of the most backward peasantries of Europe ... Thus strikes were moments of exaltation as well as demands for better conditions; spontaneous and often disconnected they would bring, not only the abolition of piece-work, but 'the day,' so near at hand that sexual intercourse and alcohol were abandoned by enthusiasts till it should dawn."* [**Spain: 1808–1975**, p. 444]

Mintz, an American anthropologist who actually stayed with the campesino's for a number of years after 1965, actually asked them about such claims. As he put it, the *"level-headed anarchists*

were astonished by such descriptions of supposed Spanish puritanism by over-enthusiastic historians." [**Op. Cit.**, p. 6] As one anarchist put it, *"[o]f course, without any work the husband couldn't provide any food at dinnertime, and so they were angry at each other, and she wouldn't have anything to do with him. In that sense, yes, there were no sexual relations."* [quoted, **Op. Cit.**, p. 7]

Mintz traces the citations which allowed the historians to arrive at such ridiculous views to a French social historian, Angel Maraud, who observed that during the general strike of 1902 in Moron, marriages were postponed to after the promised division of the lands. As Mintz points out, *"as a Frenchman, Maraud undoubtedly assumed that everyone knew a formal wedding ceremony did not necessarily govern the sexual relations of courting couples."* [**Op. Cit.**, p. 6f]

As for abstinence and puritanism, nothing could be further from the truth. As Mintz argues, the anarchists considered alcoholism as being *"responsible for much of the social malaise among many workers ... Excessive drinking robbed the worker of his senses and deprived his family of food. Anarchist newspapers and pamphlets hammered out the evil of this vice."* However, *"[p]roscriptions were not of a puritanical order"* (and so there was no desire to "impose" such things on people) and quotes an anarchist who stated that *"coffee and tobacco were not prohibited, but one was advised against using them. Men were warned against going to a brothel. It was not a matter of morality but of hygiene."* As for vegetarianism, it *"attracted few adherents, even among the* ***obreros conscientes****."* [**Op. Cit.**, pp. 86–7 and p. 88]

Moreover, academic mockery of anarchist attempts to combat alcoholism (and **not** alcohol as such) forgets the social context. Being academics they may not have experienced wage labour directly and so do not realise the misery it can cause. People turn to drink simply because their jobs are so bad and seek escape from the drudgery of their everyday lives. As Bakunin argued, *"confined in their life like a prisoner in his prison, without horizon, without outlet ... the people would have the singularly narrow souls and blunted instincts of the bourgeois if they did not feel a desire to escape; but of escape there are but three methods — two chimerical and a third real. The first two are the dram-shop and the church, debauchery of the body or debauchery of the mind; the third is social revolution."* [**God and the State**, p. 16] So to combat alcoholism was particularly important as many workers turned to alcohol as a means of escaping the misery of life under capitalism. Thus Bookchin:

> *"[T]o abstain from smoking, to live by high moral standards, and to especially adjure the consumption of alcohol was very important at the time. Spain was going through her own belated industrial revolution during the period of anarchist ascendancy with all its demoralising features. The collapse of morale among the proletariat, with rampant drunkenness, venereal disease, and the collapse of sanitary facilities, was the foremost problem which Spanish revolutionaries had to deal with ... On this score, the Spanish anarchists were eminently successful. Few CNT workers, much less a committed anarchist, would have dared show up drunk at meetings or misbehave overtly with their comrades. If one considers the terrible working and living conditions of the period, alcoholism was not as serious a problem in Spain as it was in England during the industrial revolution."* [*"Introductory Essay"*, **The Anarchist Collectives**, Sam Dolgoff (ed.), pp. xix-xxf]

Mintz sums up by stating *"[c]ontrary to exaggerated accounts of anarchist zeal, most thoughtful* ***obreros conscientes*** *believed in moderation, not abstinence."* [**Op. Cit.**, p. 88] Unfortunately Mintz's work, the product of years of living with and talking to the people actually involved in

the movement, does not seem to have made much impact on the historians. Unsurprising, really, as history is rarely about the actions, ideas and hopes of working people.

As can be seen, historians seem to delight in misrepresenting the ideas and actions of the Spanish Anarchists. Sometimes, as just seen, the distortions are quite serious, extremely misleading and ensure that anarchism cannot be understood or viewed as a serious political theory (we can understand why Marxists historians would seek this). Sometimes they can be subtle as when Ronald Fraser states that at the CNT's Saragossa congress in 1936 *"the proposal to create a libertarian militia to crush a military uprising was rejected almost scornfully, in the name of traditional anti-militarism."* [**Blood of Spain**, p. 101] Hugh Thomas makes the same claim, stating at *"there was no sign that anyone [at the congress] realised that there was a danger of fascism; and no agreement, in consequence, on the arming of militias, much less the organisation of a revolutionary army as suggested by Juan Garcia Oliver."* [**The Spanish Civil War**, p. 181]

However, what Fraser and Thomas omit to tell the reader is that this motion *"was defeated by one favouring the idea of guerrilla warfare."* [Peter Marshal, **Demanding the Impossible**, p. 460] The Saragossa resolution itself stated that a *"permanent army constitutes the greatest danger for the revolution ... The armed people will be the best guarantee against all attempts to restore the destroyed regime by interior or exterior forces ... Each Commune should have its arms and elements of defence."* [quoted by Robert Alexander, **The Anarchists in the Spanish Civil War**, vol. 1, p. 64]

Fraser's and Hugh's omission is extremely serious — it gives a radically false impression of anarchist politics. Their comments could led a reader to think that anarchists, as Marxists claim, do not believe in defending a revolution. As can be seen from the actual resolutions of the Saragossa conference, this is not the case. Indeed, given that the congress was explicitly discussing, along with many other issues, the question of *"defence of the revolution"* their omission seriously distorts the CNT's position and anarchist theory. As seen, the congress supported the need to arm the people and to keep those arms under the control of the communes (as well as the role of *"Confederal Defence Forces"* and the efficient organisation of forces on a national level). Given that Thomas quotes extensively from the Saragossa resolution on libertarian communism we can only surmise that he forgot to read the section entitled ***"Defence of the Revolution."***

Hugh and Thomas omissions, however, ensure that anarchism is presented as an utopian and naive theory, unaware of the problems facing society. In reality, the opposite is the case — the Spanish anarchists were well aware of the need to arm the people and resist counter-revolution and fascism by force. Regardless of Thomas' claims, it is clear that the CNT and FAI realised the danger of fascism existed and passed appropriate resolutions outlining how to organise an effective means of self-defence (indeed, as early as February 14 of that year, the CNT had issued a prophetic manifesto warning that right-wing elements were ready to provoke a military coup [Murray Bookchin, **The Spanish Anarchists**, p. 273]). To state otherwise, while quoting from the document that discusses the issue, must be considered a deliberate lie.

However, to return to our main point — Eric Hobsbawm's thesis that the Spanish anarchists were an example of *"pre-political"* groups — the *"primitive rebels"* of his title.

Essentially, Hobsbawm describes the Spanish Anarchists — particularly the Andalusian anarchists — as modern-day secular mystics who, like the millenarians of the Middle Ages, were guided by the irrational belief that it was possible to will profound social change. The actions of the Spanish anarchist movement, therefore, can be explained in terms of millenarian behaviour — the belief that it was able to jump start to utopia via an act of will.

The Spanish farm and industrial workers, it is argued, were unable to grasp the complexities of the economic and political structures that dominated their lives and so were attracted to anarchism. According to Hobsbawm, anarchism is marked by *"theoretical primitivism"* and a primitive understanding of revolution and this explained why anarchism was popular with Spanish workers, particularly farm workers. According to Hobsbawm, anarchism told the workers that by spontaneously rising up together they could overthrow the forces of repression and create the new millennium.

Obviously, we cannot refute Hobsbawm's claims of anarchism's *"theoretical primitivism"* in this appendix, the reader is invited to consult the main FAQ. Moreover, we cannot stress more that Hobsbawm's assertion that anarchists believe in spontaneous, overnight uprisings is false. Rather, we see revolution as a **process** in which day-to-day struggle and organisation play a key role — it is not seen as occurring independently of the on-going class struggle or social evolution. While we discuss in depth the nature of an anarchist social revolution in section J.7, we can present a few quotes by Bakunin to refute Hobsbawm's claim:

> *"Revolutions are not improvised. They are not made at will by individuals. They come about through the force of circumstances and are independent of any deliberate ill or conspiracy."* [quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 139]
>
> *"It is impossible to rouse people by artificial means. Popular revolutions are born by the actual force of events ... It is impossible to bring about such a revolution artificially. It is not even possible to speed it up at all significantly ... There are some periods in history when revolutions are quite simply impossible; there are other periods when they are inevitable."* [**Michael Bakunin: Selected Writings**, p. 183]

As Brian Morris correctly argues, *"Bakunin denies that a social revolution could be made by the will of individuals, independent of social and economic circumstances. He was much less a voluntarist than his Marxist critics make out ... he was ... aware that the social revolution would be a long process that may take many years for its realisation."* [**Bakunin: The Philosophy of Freedom**, pp. 138–9] To aid the process of social revolution, Bakunin supported the need for *"pioneering groups or associations of advanced workers who were willing to initiate this great movement of self-emancipation."* However, more is needed — namely popular working class organisations — *"what is the organisation of the masses? ... It is the organisation by professions and trades ... The organisation of the trade sections ... bear in themselves the living seed of the new society which is to replace the old world. They are creating not only the ideas but also the facts of the future itself."* [**Bakunin on Anarchism**, p. 252 and p. 255]

Therefore, Bakunin saw revolution as a process which starts with day-to-day struggle and creation of labour unions to organise that struggle. As he put it himself:

> *"What policy should the International [Workers' Association] follow during th[e] somewhat extended time period that separates us from this terrible social revolution ... the International will give labour unrest in all countries an* ***essentially economic*** *character, with the aim of reducing working hours and increasing salary, by means of the* ***association of the working masses*** *... It will [also] propagandise its principles ... Lastly, the International will expand and organise across frontiers of all countries, so*

> *that when the revolution — brought about by the force of circumstances — breaks out, the International will be a real force and will know what it has to do. Then it will be able to take the revolution into its own hands and give it a direction that will benefit the people: an earnest international organisation of workers' associations from all countries, capable of replacing this departing world of States and bourgeoisie."* [**The Basic Bakunin**, pp. 109–10]

However, while quoting Bakunin refutes part of his thesis, Hobsbawm does base his case on some actual events of Spanish Anarchist history. Therefore we need to look at these cases and show how he gets these wrong. Without an empirical basis, his case obviously falls even without quotes by Bakunin. Luckily the important examples he uses have been analysed by people without the ideological blinkers inherent in Leninism.

While we shall concentrate on just two cases — Casa Viejas in 1933 and the Jerez rising of 1892 — a few general points should be mentioned. As Jerome Mintz notes, Hobsbawms' *"account is based primarily on a preconceived evolutionary model of political development rather than on data gathered in field research. The model scales labour movements in accord with their progress toward mass parties and central authority. In short, he explains how anarchosyndicalists were presumed to act rather than what actually took place, and the uprising at Casa Viejas was used to prove an already established point of view. Unfortunately, his evolutionary model misled him on virtually every point."* [**Op. Cit.**, p. 271] We should also note his "model" is essentially Marxist ideology – namely, Marx's assertion that his aim for mass political parties expressed the interests of the working class and all other visions were the products of sectarians. Mintz also points out that Hobsbawm does not live up to his own model:

> *"While Hobsbawm's theoretical model is evolutionary, in his own treatment anarchism is often regarded as unchanging from one decade to the other. In his text, attitudes and beliefs of 1903–5, 1918–20, 1933, and 1936 are lumped together or considered interchangeable. Of course during these decades the anarchosyndicalists had developed their programs and the individuals involved had become more experienced."* [**Op. Cit.**, p. 271f]

Hobsbawm believed that Casas Viejas was the classic *"anarchist"* uprising — *"utopian, millenarian, apocalyptic, as all witnesses agree it to have been."* [**Primitive Rebels**, p. 90] As Mintz states, *"the facts prove otherwise. Casas Viejas rose not in a frenzy of blind millenarianism but in response to a call for a nation-wide revolutionary strike. The insurrection of January 1933 was hatched by faistas [members of the FAI] in Barcelona and was to be fought primarily there and in other urban centres. The uprisings in the countryside would be diversionary and designed to keep the civil guard from shifting reinforcements. The faista plot was then fed by intensive newspaper propaganda, by travelling orators, and by actions undertaken by the [CNT] defence committees. Representatives of the defence committees from Casas Viejas and Medina had received instructions at a regional meeting held days before. On January 11, the anarchosyndicalists of Casas Viejas believed that they were joining their companeros who had already been at the barricades since January 8."* [**Op. Cit.**, p. 272]

Hobsbawm argued that the uprising occurred in accordance with an established economic pattern:

> *"Economic conditions naturally determined the timing and periodicity of the revolutionary outbreaks — for instance, social movements tended to reach a peak intensity during the worse months of the year — January to March, when farm labourers have least work (the march on Jerez in 1892 and the rising of Casas Viejas in 1933 both occurred early in January), March-July, when the proceeding harvest has been exhausted and times are lean."* [**Op. Cit.**, p. 79]

Mintz states the obvious:

> *"In reality, most agricultural strikes took place in May and June, the period of the harvest and the only time of the year when the campesinos had any leverage against the landowners. The uprising at Casas Viejas occurred in January precisely because it was **not** an agricultural strike. The timing of the insurrection, hurriedly called to coincide with a planned railway strike that would make it difficult for the government to shift its forces, was determined by strategic rather than economic considerations."* [**Op. Cit.**, p. 273]

As for the revolt itself, Hobsbawm asserts that:

> *"Secure from the outside world, [the men] put up the red and black flag of anarchy and set about dividing the land. They made no attempt to spread the movement or kill anyone."* [**Op. Cit.**, p. 274]

Which, as Mintz clearly shows, was nonsense:

> *"As is already evident, rather than securing themselves from the rest of world, the uprising at Casas Viejas was a pathetic attempt to join in an ill-fated national insurrection. With regard to his second point, there was neither the time nor the opportunity to 'set about dividing the land.' The men were scattered in various locations guarding roads and paths leading to the town. There were no meetings or discussions during this brief period of control. Only a few hours separated the shooting at the barracks and the entrance of the small [government] rescue force from Alcala. Contrary to Hobsbawm's description of peaceful enterprise, at the outset the anarchists surrounding the barracks had fired on the civil guards, mortally wounding two men."* [**Op. Cit.**, p. 274]

As can be seen, Hobsbawm was totally wrong about the uprising itself and so it cannot be used as evidence for his thesis. On other, less key issues, he was equally wrong. Mintz gives an excellent summary:

> *"Since kinship is a key feature in 'primitive' societies, according to Hobsbawm, it was a major factor in the leadership of the sindicato [union] in Casas Viejas.*
>
> *"There is no evidence that kinship had anything to do with leadership in the anarchist movement in Casa Viejas or anywhere else. The reverse would be closer to the truth. Since the anarchists expressed belief in universal brotherhood, kinship ties were often undermined. In times of strike or in carrying out any decision of the collective membership, obreros conscientes sometimes had to act counter to their kinship demands in order to keep faith with the movement and with their companeros.*

"Hobsbawm's specific examples are unfortunately based in part on errors of fact...

"Hobsbawm's model [also] requires a charismatic leader. Accordingly, the inspired leader of the uprising is said to be 'old Curro Cruz ('Six Fingers') who issued the call for revolution ... '

[...]

"This celebration of Seisdedo's role ['Six Fingers'], however, ignores the unanimous view of townspeople of every class and political persuasion, who assert that the old man was apolitical and had nothing to do with the uprising ... every observer and participant in the uprising agrees that Seisdedos was not the leader and was never anything other than a virtuous charcoal burner with but a slight interest in anarchosyndicalism.

[...]

"Should the role of charismatic leader be given to someone else in the town? This was not a case of mistaken identity. No single person in Casas Viejas could lay clam to dominating the hearts and minds of the men...The sindicato was governed by a junta. Among the cast of characters there is no sign of charismatic leadership ..." [**Op. Cit.**, pp. 274–6]

Mintz sums up by stating *"Hobsbawm's adherence to a model, and the accumulation of misinformation, led him away from the essential conflicts underlying the tragedy and from the reality of the people who participated in it."* [**Op. Cit.**, p. 276]

The Jerez uprising of 1892 also fails to provide Hobsbawm with any empirical evidence to support his claims. Indeed, as in Casas Viejas, the evidence actually works against him. The actual events of the uprising are as follows. Just before midnight of 8th January 1892, several hundred workers entered the town of Jerez crying *"Long live the revolution! Long live Anarchy!"* Armed with only rocks, sticks, scythes and other farm equipment, they marched toward the city jail with the evident intention of releasing its prisoners — who included many political prisoners, victims of the government's recent anti-anarchist campaign. A few people were killed and the uprising dispersed by a regiment of mounted troops.

Hobsbawm claims this revolt as evidence for his *"primitive rebels"* thesis. As historian George R. Esenwein argues:

"[T]he Jerez incident cannot be explained in terms of this model. What the millenarian view fails to do in this instance is to credit the workers with the ability to define their own political goals. This is not to deny that there were millenarian aspects of the rising, for the mob action of the workers on the night of 8 January indicates a degree of irrationalism that is consistent with millenarian behaviour. But .. . the agitators seem to have had a clear motive in mind when they rose: they sought to release their comrades from the local jail and thereby demonstrate their defiance of the government's incessant persecution of the International [Workers' Association] movement. However clumsily and crudely they expressed their grievance, the workers were patently aiming to achieve this objective and not to overthrow the local government in order to inaugurate the birth of a libertarian society." [**Anarchist Ideology and the Working Class Movement in Spain: 1868–1898**, p. 184]

Similarly, many Marxists (and liberal historians) point to the *"cycle of insurrections"* that occurred during the 1930s. They usually portray these revolts as isolated insurrections organised by the FAI who appeared in villages and proclaimed libertarian communism. The picture is one of disorganisation, millenarianism and a believe in spontaneous revolution inspired by a few militants and their daring actions. Nothing could be further from the truth. The *"cycle of insurrections"* was far more complex that this, as Juan Gomez Casas makes clear:

> *"Between 1932 and 1934 ... the Spanish anarchists tried to destroy the existing social order through a series of increasingly violent strikes and insurrections, which were at first spontaneous, later co-ordinated."* [**Anarchist Organisation: The History of the FAI**, p. 135]

Stuart Christie stresses this point when he wrote *"[i]t has been widely assumed that the cycle of insurrections which began in ... January 1933 were organised and instigated by the FAI ... In fact the rising had nothing to do with the FAI. It began as an entirely spontaneous local affair directed against a local employer, but quickly mushroomed into a popular movement which threatened to engulf the whole of Catalonia and the rest of Spain ... [CNT militant] Arturo Parera later confirmed that the FAI had not participated in the aborted movement 'as an organisation.'"* [**We, the Anarchists**, p. 66] While the initial revolts, such as those of the miners of Alto Llobregat in January 1932, were spontaneous acts which caught the CNT and FAI by surprise, the following insurrections became increasingly organised and co-ordinated by those organisations. The January 1933 revolt, as noted above, was based around a planned strike by the CNT railway workers union. The revolt of December 1933 was organised by a National Revolutionary Committee. Both revolts aimed at uprisings all across Spain, based on the existing organisations of the CNT — the unions and their "Defence committees". Such a degree of planning belies any claims that Spanish Anarchists were *"primitive rebels"* or did not understand the complexities of modern society or what was required to change it.

Ultimately, Hobsbawm's thesis and its underlying model represents Marxist arrogance and sectarianism. His model assumes the validity of the Marxist claim that true working class movements are based on mass political parties based on hierarchical, centralised, leadership and those who reject this model and political action (electioneering) are sects and sectarians. It was for this reason that Marx, faced with the increased influence of Bakunin, overturned the First International's original basis of free discussion with his own concept of what a real workers' movement should be.

Originally, because the various sections of the International worked under different circumstances and had attained different degrees of development, the theoretical ideals which reflected the real movement would also diverge. The International, therefore, was open to all socialist and working class tendencies. The general policies of the International would be, by necessity, based on conference decisions that reflected the free political development that flowed from local needs. These decisions would be determined by free discussion within and between sections of all economic, social and political ideas. Marx, however, replaced this policy with a common program of *"political action"* (i.e. electioneering) by mass political parties via the fixed Hague conference of 1872. Rather than having this position agreed by the normal exchange of ideas and theoretical discussion in the sections guided by the needs of the practical struggle, Marx imposed what **he** considered as the future of the workers movement onto the International – and denounced those

who disagreed with him as sectarians. The notion that what Marx considered as necessary might be another sectarian position imposed on the workers' movement did not enter his head nor that of his followers — as can be seen, Hobsbawm (mis)interpreted anarchism and its history thanks to this Marxist model and vision.

However, once we look at the anarchist movement without the blinkers created by Marxism, we see that rather than being a movement of *"primitive rebels"* Spanish Anarchism was a movement of working class people using valid tactics to meet their own social, economic and political goals — tactics and goals which evolved to meet changing circumstances. Seeing the rise of anarchism and anarcho-syndicalism as the political expression of the class struggle, guided by the needs of the practical struggle they faced naturally follows when we recognise the Marxist model for what it is — just one possible interpretation of the future of the workers' movement rather than **the** future of that movement. Moreover, as the history of Social Democracy indicates, the predictions of Bakunin and the anarchists within the First International were proved correct. Therefore, rather than being *"primitive rebels"* or sectarian politics forced upon the working class, anarchism reflected the politics required to built a **revolutionary** workers' movement rather than a reformist mass party.

2. How accurate is Felix Morrow's book on the Spanish Revolution?

It is fair to say that most Marxists in Britain base their criticisms of the Spanish Anarchism, particularly the revolution of 1936, on the work of Trotskyist Felix Morrow. Morrow's book **Revolution and Counter-Revolution in Spain**, first published in 1938, actually is not that bad — for some kinds of information. However, it is basically written as Trotskyist propaganda. All too often Morrow is inaccurate, and over-eager to bend reality to fit the party line. This is particularly the case when discussing the actions and ideas of the CNT and FAI and when discussing the activities of his fellow Trotskyists in Spain, the Bolshevik-Leninists. We discuss the first set of inaccuracies in the following sections, here we mention the second, Morrow's comments on the Spanish Trotskyists.

The Bolshevik-Leninists, for example, an obscure sect who perhaps numbered 20 members at most, are, according to Morrow, transformed into the only ones who could save the Spanish Revolution — because they alone were members of the Fourth International, Morrow's own organisation. As he put it:

> *"Only the small forces of the Bolshevik-Leninists... clearly pointed the road for the workers."* [Felix Morrow, **Revolution and Counter-Revolution in Spain**, p. 191]
>
> *"Could that party [the party needed to lead the revolution] be any but a party standing on the platform of the Fourth International?"* [**Op. Cit.**, p. 248]

And so on. As we will make clear in the following discussion, Morrow was as wrong about this as he was about anarchism.

The POUM — a more significant Marxist party in Spain, though still tiny compared to the anarchists — is also written up as far more important than it was, and slagged off for failing to lead the masses to victory (or listening to the Bolshevik-Leninists). The Fourth Internationalists *"offered the POUM the rarest and most precious form of aid: a consistent Marxist analysis"* [**Op. Cit.**, p. 105] (never mind Spanish workers needing guns and solidarity!). But when such a programme

— prepared in advance — was offered to the POUM by the Fourth International representative — only two hours after arriving in Spain, and a quarter of an hour after meeting the POUM [**Op. Cit.**, p. 139] – the POUM were not interested. The POUM have been both attacked (and claimed as their own) by Trotskyists ever since.

It is Morrow's attacks on anarchism, though, that have most readily entered leftist folklore — even among Marxists who reject Leninism. Some of Morrow's criticisms are fair enough — but these were voiced by anarchists long before Morrow put pen to paper. Morrow, in fact, quotes and accepts the analyses of anarchists like Camillo Berneri (*"Berneri had been right"* etc. [**Op. Cit.**, p. 153]), and praises anarchists like Durruti (*"the greatest military figure produced by the war"* [**Op. Cit.**, p. 224]) — then sticks the boot into anarchism. Indeed, Durruti's analysis is praised but he is transformed into *"no theoretician, but an activist leader of masses... his words express the revolutionary outlook of the class-conscious workers."* [**Op. Cit.**, p. 250] Of course, his words, activity and *"outlook"* (i.e. political analysis) did not spring out of thin air but rather, to state the obvious, were informed by and reflected his anarchist politics, history, activity and vision (which in turn reflected his experiences and needs as a member of the working class). Morrow obviously wanted to have his cake and eat it.

Typically for today's left, perhaps, the most quoted sections of Morrow's book are the most inaccurate. In the next eight sections we discuss some of the most inaccurate claims. After that we point out that Morrow's analysis of the militias is deeply ironic given Trotsky's actions as leader of the Red Army. Then we discuss some of Morrow's inaccurate assertions about anarchism in general.

Of course, some of the errors we highlight in Morrow's work are the product of the conditions in which it was written — thousands of miles from Spain in America, dependent on papers produced by Spanish Marxists, Anarchists and others. We cannot blame him for such mistakes (although we can blame the Trotskyist publisher who reprints his account without indicating his factual errors and the Marxist writers who repeat his claims without checking their accuracy). We **do,** however, blame Morrow for his errors and misrepresentations of the activities and politics of the Spanish Anarchists and anarchism in general. These errors derive from his politics and inability to understand anarchism or provide an honest account of it.

By the end of our discussion we hope to show why anarchists argue that Morrow's book is deeply flawed and its objectively skewed by the authors politics and so cannot be taken at face value. Morrow's book may bring comfort to those Marxists who look for ready-made answers and are prepared to accept the works of hacks at face-value. Those who want to learn from the past — instead of re-writing it — will have to look elsewhere.

3. Did a *"highly centralised"* FAI control the CNT?

According to Morrow, *"Spanish Anarchism had in the FAI a highly centralised party apparatus through which it maintained control of the CNT"* [**Op. Cit.**, p. 100]

In reality, the FAI — the Iberian Anarchist Federation — was founded, in 1927, as a confederation of regional federations (including the Portuguese Anarchist Union). These regional federations, in turn, co-ordinated local and district federations of highly autonomous anarchist affinity groups. In the words of Murray Bookchin:

> *"Like the CNT, the FAI was structured along confederal lines: the affinity groups were linked together in a Local Federation and the Local Federation in District and Regional Federations. A Local Federation was administered by an ongoing secretariat, usually of three persons, and a committee composed of one mandated delegate from each affinity group. This body comprised a sort of local executive committee. To allow for a full expression of rank-and-file views, the Local Federation was obliged to convene assemblies of all the* ***faistas*** *in its area. The District and Regional Federations, in turn, were simply the Local federation writ large, replicating the structure of the lower body. All the Local Districts and Regional Federations were linked together by a Peninsular Committee whose tasks, at least theoretically, were administrative... [A FAI secretary] admits that the FAI 'exhibited a tendency towards centralism' ... Yet it must also be emphasised that the affinity groups were far more independent than any comparable bodies in the Socialist Party, much less the Communist... the FAI was not an internally repressive organisation ... Almost as a matter of second nature, dissidents were permitted a considerable amount of freedom in voicing and publishing material against the leadership and established policies."* [**The Spanish Anarchists**, pp. 197–8]

And:

> *"Most writers on the Spanish labour movement seem to concur in the view that, with the departure of the moderates, the CNT was to fall under the complete domination of the FAI ... But is this appraisal correct? The FAI ... was more loosely jointed as an organisation than many of its admirers and critics seem to recognise. It has no bureaucratic apparatus, no membership cards or dues, and no headquarters with paid officials, secretaries, and clerks... They jealously guarded the autonomy of their affinity groups from the authority of higher organisational bodies — a state of mind hardly conducive to the development of a tightly knit, vanguard organisation.*
>
> *"The FAI, moreover, was not a politically homogeneous organisation which followed a fixed 'line' like the Communists and many Socialists. It had no official program by which all* ***faistas*** *could mechanically guide their actions."* [**Op. Cit.**, p. 224]

So, while the FAI may have had centralising tendencies, a *"highly centralised"* political party it was not. Further, many anarcho-syndicalists and affinity groups were not in the FAI (though most seem to have supported it), and many FAI members put loyalty to the CNT (the anarcho-syndicalist union confederation) first. For instance, according to the minutes of the FAI national plenum of January-February 1936:

> *"The Regional Committee [of Aragon, Rioja, and Navarra] is completely neglected by the majority of the militants because they are absorbed in the larger activities of the CNT"*

And:

> *"One of the reasons for the poor condition of the FAI was the fact that almost all the comrades were active in the defence groups of the CNT"* (report from the Regional Federation of the North).

These are internal documents and so unlikely to be lies. [Juan Gomez Casas, **Anarchist Organisation: the History of the FAI**, p. 165 and p. 168]

Anarchists were obviously the main influence in the CNT. Indeed, the CNT was anarcho-syndicalist long before the FAI was founded — from its creation in 1910 the CNT had been anarcho-syndicalist and remained so for 17 years before the FAI existed. However, Morrow was not the only person to assert *"FAI control"* of the CNT. In fact, the claim of *"FAI control"* was an invention of a reformist minority within the organisation — people like Angel Pestana, ex-CNT National Secretary, who wanted to turn the CNT into a politically *"neutral"* union movement. Pestana later showed what he meant by forming the Syndicalist Party and standing for Parliament (the Cortes). Obviously, in the struggle against the reformists, anarcho-syndicalists — inside the FAI or not — voted for people they trusted to run CNT committees. The reformists (called **Treinistas**) lost, split from the CNT (taking about 10% of the membership with them), and the myth of *"FAI dictatorship"* was born. Rather than accept that the membership no longer supported them, the **Treinistas** consoled themselves with tales that a minority, the FAI, had taken control of the CNT.

In fact, due to its decentralised and federal structure, the FAI could not have had the sort of dominance over the CNT that is often attributed to it. At union congresses, where policies and the program for the movement were argued out:

> *"[D]elegates, whether or not they were members of the FAI, were presenting resolutions adopted by their unions at open membership meetings. Actions taken at the congress had to be reported back to their unions at open meetings, and given the degree of union education among the members, it was impossible for delegates to support personal, non-representative positions."* [Juan Gomez Casas, **Anarchist Organisation: The History of the FAI**, p. 121]

The union committees were typically rotated out of office frequently and committeemen continued to work as wage-earners. In a movement so closely based on the shop floor, the FAI could not maintain influence for long if they ignored the concerns and opinions of co-workers. Moreover, only a minority of the anarcho-syndicalist activists in the CNT belonged to the FAI and, as Juan Gomez Casas points out in his history of the FAI, FAI militants frequently had a prior loyalty to the CNT. Thus his summation seems correct:

> *"As a minority organisation, the FAI could not possibly have had the kind of control attributed to it ... in 1931 ... there were fifty CNT members for each member of a FAI group. The FAI was strongly federalist, with its groups at the base freely associated. It could not dominate an organisation like the CNT, which had fifty times as many members and was also opposed to hierarchy and centralism. We know that FAI militants were also CNT militants, and frequently they were loyal first to the CNT. Their influence was limited to the base of the organisation through participation in the plenums of militants or unions meetings."* [**Op. Cit.**, p. 133]

He sums up by arguing:

> *"The myth of the FAI as conqueror and ruler of the CNT was created basically by the **Treinistas**"* [**Op. Cit.**, p. 134]

Therefore, Morrow is re-cycling an argument which was produced by the reformist wing of the CNT after it had lost influence in the union rank-and-file. Perhaps he judges the FAI by his own standards? After all, the aim of Leninists is for the vanguard party to control the labour unions in their countries. Anarchists reject such a vision and believe in union autonomy — influence of political parties and groups should only exist in as much as they influence the rank-and-file who control the union. Rather than aim to control the CNT, the FAI worked to influence its membership. In the words of Francisco Ascaso (friend of Durruti and an influential anarchist militant in the CNT and FAI in his own right):

> *"There is not a single militant who as a 'FAIista' intervenes in union meetings. I work, therefore I am an exploited person. I pay my dues to the workers' union and when I intervene at union meetings I do it as someone who us exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the FAI or not."* [quoted by Abel Paz, **Durruti: The People Armed**, p. 137]

In other words, the FAI *"controlled"* the CNT only to the extent it influenced the membership — who, in fact, controlled the organisation. We must also note that Ascaso's comment echoes Bakunin's that the *"purpose of the Alliance [i.e. anarchist federation] is to promote the Revolution ... it will combat all ambition to dominate the revolutionary movement of the people, either by cliques or individuals. The Alliance will promote the Revolution only through the NATURAL BUT NEVER OFFICIAL INFLUENCE of all members of the Alliance."* [**Bakunin on Anarchism**, p. 387]

Regardless of Morrow's claims, the FAI was a federation of autonomous affinity groups in which, as one member put it, *"[e]ach FAI group thought and acted as it deemed fit, without bothering about what the others might be thinking or deciding ... they had no ... opportunity or jurisdiction ... to foist a party line upon the grass-roots."* [Francisco Carrasquer, quoted by Stuart Christie, **We, the Anarchists!**, p. 28] There was co-ordination in a federal structure, of course, but that did not create a *"highly centralised"* party-like organisation. Morrow judged the FAI according to his own standards, squeezing it into his ideological vision of the world rather than reporting the reality of the situation (see Stuart Christie's work for a more detailed refutation of the usual Marxist and Liberal inventions of the activities and nature of the FAI).

In addition, Morrow's picture of the FAI implicitly paints the CNT as a mere "transmission belt" for that organisation (and so a re-production of the Bolshevik position on the relationship of the labour unions and the revolutionary party). Such a picture, however, ignores the CNT's character as a non-hierarchical, democratic (self-managed) mass movement which had many tendencies within it. It also fails to understand the way anarchists seek to influence mass organisations — not by assuming positions of power but by convincing their fellow workers' of the validity of their ideas in policy making mass assemblies (see section J.3.6 for more details).

In other words, Morrow's claims are simply false and express a total lack of understanding of the nature of the CNT, the FAI and their relationship.

4. What is the history of the CNT and the Communist International?

Morrow states that the *"tide of the October Revolution had, for a short time, overtaken the CNT. It had sent a delegate to the Comintern [Communist International] Congress in 1921. The anarchists*

had then resorted to organised fraction work and recaptured it." He links this to the FAI by stating *"[t]henceforward ... the FAI ... maintained control of the CNT."* [**Op. Cit.**, p. 100] Given that the FAI was formed in 1927 and the CNT disassociated itself with the Comintern in 1922, five years before the FAI was created, *"thenceforward"* does not do the FAI's ability to control the CNT before it was created justice!

Partly it is the inability of the Communist Party and its Trotskyist off-shoots to dominate the CNT which explains Morrow's comments. Seeing anarchism as *"petty bourgeois"* it is hard to combine this with the obvious truth that a mass, revolutionary, workers' union could be so heavily influenced by anarchism rather than Marxism. Hence the need for FAI (or anarchist) "control" of the CNT. It allows Trotskyists ignore dangerous ideological questions. As J. Romero Maura notes, the question why anarchism influenced the CNT *"in fact raises the problem why the reformist social democratic, or alternatively the communist conceptions, did not impose themselves on the CNT as they managed to in most of the rest of Europe. This question ... is based on the false assumption that the anarcho-syndicalist conception of the workers' struggle in pre-revolutionary society was completely at odds with what the **real** social process signified (hence the constant reference to religious', 'messianic', models as explanations)."* He argues that the *"explanation of Spanish anarcho-syndicalist success in organising a mass movement with a sustained revolutionary **elan** should initially be sought in the very nature of the anarchist concept of society and of how to achieve revolution."* [J. Romero Maura, *"The Spanish Case"*, in **Anarchism Today**, D. Apter and J. Joll (eds.), p. 78 and p. 65] Once we do that, we can see the weakness of Morrow's (and others) *"Myth of the FAI"* — having dismissed the obvious reason for anarchist influence, namely its practicality and valid politics, there can only be "control by the FAI."

However, the question of affiliation of the CNT to the Comintern is worth discussing as it indicates the differences between anarchists and Leninists. As will be seen, the truth of this matter is somewhat different to Morrow's claims and indicates well his distorted vision.

Firstly to correct a factual error. The CNT in fact sent two delegations to the Comintern. At its 1919 national congress, the CNT discussed the Russian Revolution and accepted a proposition that stated it *"declares itself a staunch defender of the principles upheld by Bakunin in the First International. It declares further that it affiliates provisionally to the Third International on account of its predominantly revolutionary character, pending the holding of the International Congress in Spain, which must establish the foundations which are to govern the true workers' International."* [**No Gods, No Masters**, vol. 2, pp. 220–1] It went on to re-state its long-standing anarchist aims:

> *"Bearing in mind that the tendency that has the greatest force at the heart of the workers' organisations of all countries is that which leads to the complete, total and absolute liberation of humanity morally, economically and politically, and considering that this objective cannot be achieved until the land and the instruments of production and exchange are socialised, and the tyrannical power of the state disappears, [we] propose to the congress, that in agreement with the essence of the proposals of the workers' International, [it] declares that the ultimate goal of the Confederacion Nacional del Trabajo in Spain is libertarian communism."* [quoted by Jason Garner, *"Separated by an 'Ideological Chasm': The Spanish National Labour Confederation and Bolshevik Internationalism, 1917–1922"*, pp. 293–326, **Contemporary European History**, Vol. 15, No. 3, p. 303]

So while the CNT voted to provisionally affiliate with the Communist International, it also reiterated its libertarian politics — a politics fundamentally at odds with the Bolshevik ideology. This position is not surprising, given the lack of concrete information of what was happening in Russia under the Bolsheviks, lack of awareness of what the Bolsheviks actually stood for and libertarian support for the overthrow of the Tsarist regime and bourgeois Provisional government in 1917. Hence the need for the CNT to send a delegation to Russia in order to investigate at first hand the new regime and what it actually stood for.

In June 1920, Angel Pestana arrived in Moscow and represented the CNT at the Second Congress of the Communist International. He was arrested when he arrived back in Spain and so could not give his eye-witness account of the strangulation of the revolution and the deeply dishonest manipulation of the congress by the Communist Party. A later delegation arrived in April 1921, headed by Andres Nin and Joaquin Maurin professing to represent the CNT. Actually, Nin and Maurin represented virtually no one but the Lerida local federation (their stronghold). Their actions and clams were disavowed by a plenum of the CNT the following August.

How did Nin and Maurin manage to get into a position to be sent to Russia? Simply because of the repression the CNT was under at the time. This was the period when Catalan bosses hired gun men to assassinate CNT militants and members and the police exercised the notorious practice known as **ley de fugas** (shot while trying to escape). In such a situation, the normal workings of the CNT came under must stress and *"with the best known libertarian militants imprisoned, deported, exiled, if not murdered outright, Nin and his group managed to hoist themselves on to the National Committee ... Pestana's report not being available, it was decided that a further delegation should be sent ... in response to Moscow's invitation to the CNT to take part in the foundation of the Red International of Labour Unions."* [Ignaio de Llorens, **The CNT and the Russian Revolution**, p. 8] Juan Gomez Casas confirms this account:

> *"At a plenum held in Lerida in 1921, while the CNT was in disarray [due to repression] in Catalonia, a group of Bolsheviks was designated to represent the Spanish CNT in Russia ... The restoration of constitutional guarantees by the Spanish government in April 1922, permitted the anarcho-syndicalists to meet in Saragossa in June 11 ... [where they] confirmed the withdrawal of the CNT from the Third International and the entrance on principle into the new [revolutionary syndicalist] International Working Men's Association."* [**Anarchist Organisation: History of the FAI**, p. 61]

We should note that along with pro-Bolshevik Nin and Maurin was anarchist Gaston Leval. Leval quickly got in touch with Russian and other anarchists, helping some imprisoned Russia anarchists get deported after bringing news of their hunger strike to the assembled international delegates. By embarrassing Lenin and Trotsky, Leval helped save his comrades from the prison camp and so saved their lives.

By the time Leval arrived back in Spain, Pestana's account of his experiences had been published — along with accounts of the Bolshevik repression of workers, the Kronstadt revolt, the anarchist movement and other socialist parties. These accounts made it clear that the Russian Revolution had become dominated by the Communist Party and the *"dictatorship of the proletariat"* little more that dictatorship by the central committee of that party. Indeed, leading Bolshevik Grigory Zinoviev had openly admitted this at the Comintern's Second Congress in 1920:

> *"[t]oday, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... [T]he dictatorship of the proletariat is at the same time the dictatorship of the Communist Party."* [**Proceedings and Documents of the Second Congress 1920**, vol. 2, p. 928 and pp. 151–2]

Unsurprisingly, then, Pestana report was negative in terms of both the new regime and on whether the CNT should remain affiliated. [*"Report on the action taken by the delegate Angel Pestana at the second congress of the third international which was presented by him to the **Confederacion Nacional del Trabajo**"*, **Revolutionary Russia**, Vol. 8, No. 1, pp. 39–103]

Moreover, the way the two internationals operated violated basic libertarian principles. Firstly, the *"Red Labour International completely subordinated trade unions to the Communist Party."* [Peirats, **Anarchists in the Spanish Revolution**, p. 38] This completely violated the CNT principle of unions being controlled by their members (via self-management from the bottom up). Secondly, the congresses' methodology in its debates and decision-making were alien to the CNT tradition. In that organisation self-management was its pride and glory and its gatherings and congresses reflected this. Pestana could not fathom the fierce struggle surrounding the make-up of the chairmanship of the Comintern congress:

> *"Pestana says that he was particularly intrigued by the struggle for the chairmanship. He soon realised that the chair **was** the congress, and that the Congress was a farce. The chairman made the rules, presided over deliberations, modified proposals at will, changed the agenda, and presented proposals of his own. For a start, the way the chair handled the gavel was very inequitable. For example, Zinoviev gave a speech which lasted one and one-half hours, although each speaker was supposedly limited to ten minutes. Pestana tried to rebut the speech, but was cut off by the chairman, watch in hand. Pestana himself was rebutted by Trotsky who spoke for three-quarters of an hour, and when Pestana wanted to answer Trotsky's attack on him, the chairman declared the debate over."* [**Op. Cit.**, pp. 37–8]

In addition, *"[i]n theory, every delegate was free to table a motion, but the chair itself selected the ones that were 'interesting.' Proportional voting [by delegation or delegate] had been provided for, but was not implemented. The Russian Communist Party ensured that it enjoyed a comfortable majority."* Peirats continues by noting that *"[t]o top it all, certain important decisions were not even made in the congress hall, but were made begin the scenes."* That was how the resolution that *"[i]n forthcoming world congresses of the Third International, the national trade union organisations affiliated to it are to be represented by delegates from each country's Communist Party"* was adopted. He also noted that *"[o]bjections to this decision were quite simply ignored."* [**No Gods, No Masters**, vol. 2, p. 224]

Many of the syndicalist delegates to this *"pantomime"* congress later meet in Berlin and founded the anarcho-syndicalist **International Workers Association** based on union autonomy, self-management and federalism. Unsurprisingly, once Pestana and Leval reported back

to their organisation, the CNT rejected the Bolshevik Myth and re-affirmed the libertarian principles it had proclaimed at its 1919 congress. At a plenum of the CNT in 1922, the organisation withdrew its provisional affiliation and voted to join the syndicalist International formed in Berlin. As one historian summarises:

> *"The CNT withdrew from the Profintern because, in line with revolutionary syndicalist doctrine, the vast majority of its members opposed party political influence in the unions. The weakness of the communist-syndicalist position was amply demonstrated when a lull in the repression carried out against the CNT in early 1922 led to the release of the detained militants; as a result they were abruptly removed from their positions and their policy towards Moscow overturned ... Furthermore, the CNT was not alone: the other founder members of the [syndicalist] IWMA had rejected the Profintern for the same reasons. Although anarchists were influential in some, but by no means all, of the IWMA's member organisations, these were not anarchist but revolutionary syndicalist. [Leading CNT militant Salvador] Segui could have been speaking for all of them when he proclaimed at Zaragoza that the CNT's split from the Profintern resulted from the fact that 'a chasm separates us from Russia, both in ideology and in tactics'."* [Garner, **Op. Cit.**, pp. 325–6]

Therefore, rather than the anarchists conducting *"fraction work"* to *"recapture"* the CNT, the facts are the pro-Bolshevik National Committee of 1921 came about due to the extreme repression the CNT was suffering at the time. Militants were being assassinated in the streets, including committee members. In this context it is easy to see how an unrepresentative minority could temporarily gain influence in the National Committee. Moreover, it was CNT plenary session which revoked the organisations provisional affiliation to the Comintern — that is, a regular meeting of mandated and accountable delegates. In other words, by the membership itself who had been informed of what had actually been happening under the Bolsheviks. In addition, it was this plenum which agreed affiliation to the anarcho-syndicalist **International Workers Association** founded in Berlin during 1922 by syndicalists and anarchists horrified by the Bolshevik dictatorship, having seen it at first hand.

Thus the decision of the CNT in 1922 (and the process by which this decision was made) follow exactly the decisions and processes of 1919. That congress agreed to provisionally affiliate to the Comintern until such time as a real workers' International inspired by the ideas of Bakunin was created. The only difference was that this International was formed in Germany, not Spain. Given this, it is impossible to argue that the anarchists *"recaptured"* the CNT. The few pro-Bolsheviks in the CNT simply benefited from the impact of State repression against the union as well as the lack of reliable information on the Bolshevik regime from trusted (i.e., non-bourgeois) sources. Once both of these were reduced, their position became as untenable as continued CNT association with the Bolshevik regime and their controlled Internationals:

> *"Due to the ongoing repression borne by the CNT, its flirtation with Communism lasted longer than would otherwise have been the case. Angel Pestana, its only delegate to attend the second Comintern Congress in Moscow, in the summer of 1920, could not have been more disappointed by his experience. Arrested and held in Italy for two months on his return journey and then imprisoned in Barcelona for 15 more months, he was prevented for a long time from sharing his conclusions with his comrades but his stay in*

> *prison was largely used to prepare his report on Communism. In June 1922, at long last, Pestana was able to put forward his views in a national gathering at Zaragoza, where, by an overwhelming majority ... the CNT duly broke its links with the Comintern. It was ludicrous to expect that a federalist mass organization of this stamp would be prepared to subordinate its initiatives to a small [Spanish Communist Party] that itself was blindly following Moscow's dictates. Furthermore, Anarcho-Syndicalists were by then aware of the bitter attacks levelled against the Bolsheviks by leading European Anarchists and the growing frustration of many Leftists with the authoritarian and repressive character of the Soviet state. The brief romance with the Comintern of the CNT, the largest working-class force in Spain, thus ended."* [Francisco J. Romero Salvado, *"The Comintern Fiasco in Spain: The Borodin Mission and the Birth of the Spanish Communist Party"*, pp. 153–177, **Revolutionary Russia**, Vol. 21, No. 2, p. 166]

As can be seen, Morrow's comment presents radically false image of what happened during this period. Rather than resort to *"fraction work"* to *"recapture"* the CNT, the policies of the CNT in 1919 and 1922 were identical. Moreover, the decision to disaffiliate from the Comintern was made by a confederal meeting of mandated delegates representing the rank-and-file as was the original. The anarchists did not "capture" the CNT, rather they continued to influence the membership of the organisation as they had always done. Lastly, the concept of "capture" displays no real understanding of how the CNT worked — each syndicate was autonomous and self-managed. There was no real officialdom to take over, just administrative posts which were unpaid and conducted after working hours. To "capture" the CNT was impossible as each syndicate would ignore any unrepresentative minority which tried to do so.

However, Morrow's comments allow us to indicate some of the key differences between anarchists and Leninists — the CNT rejected the Comintern because it violated its principles of self-management, union autonomy and equality and built party domination of the union movement in its place.

5. Why did the CNT not join the Workers' Alliance?

Morrow in his discussion of the struggles of the 1930s implies that the CNT was at fault in not joining the Socialist UGT's *"Workers' Alliance"* (**Alianza Obrera**). These were first put forward by the Marxist-Leninists of the BOC (Workers and Peasants Bloc — later to form the POUM) after their attempts to turn the CNT into a Bolshevik vanguard failed [Paul Preston, **The Coming of the Spanish Civil War**, p. 154]. Socialist Party and UGT interest began only after their election defeat in 1933. By 1934, however, there existed quite a few alliances, including one in Asturias in which the CNT participated. Nationally, however, the CNT refused to join with the UGT and this, he implies, lead to the defeat of the October 1934 uprising (see next section for a discussion of this rebellion).

However, Morrow fails to provide any relevant historical background to understand the CNT's decision. Moreover, their reasons **why** they did not join have a striking similarity to Morrow's own arguments against the "Workers' Alliance" (which may explain why Morrow does not mention them). In effect, the CNT is dammed for having policies similar to Morrow's but having principles enough to stick to them.

First, we must discuss the history of UGT and CNT relationships in order to understand the context within which the anarchists made their decision. Unless we do this, Morrow's claims may seem more reasonable than they actually are. Once we have done this we will discuss the politics of that decision.

From 1931 (the birth of the Second Spanish Republic) to 1933 the Socialists, in coalition with Republicans, had attacked the CNT (a repeat, in many ways, of the UGT's collaboration with the quasi-fascist Primo de Rivera dictatorship of 1923–30). Laws were passed, with Socialist help, making lightening strikes illegal and state arbitration compulsory. Anarchist-organised strikes were violently repressed, and the UGT provided scabs — as against the CNT Telephone Company strike of 1931. This strike gives in indication of the role of the socialists during its time as part of the government (Socialist Largo Caballero was the Minister of Labour, for example):

> *"The UGT ... had its own bone to pick with the CNT. The telephone syndicate, which the CNT had established in 1918, was a constant challenge to the Socialists' grip on the Madrid labour movement. Like the construction workers' syndicate, it was a CNT enclave in a solidly UGT centre. Accordingly, the government and the Socialist Party found no difficulty in forming a common front to break the strike and weaken CNT influence.*
>
> *"The Ministry of Labour declared the strike illegal and the Ministry of the Interior called out the Civil Guard to intimidate the strikers ... Shedding all pretence of labour solidarity, the UGT provided the* ***Compania Telefonica*** *with scabs while* ***El Socialista****, the Socialist Party organ, accused the CNT of being run by* ***pistoleros.*** *Those tactics were successful in Madrid, where the defeated strikers were obliged to enrol in the UGT to retain their jobs. So far as the Socialists were concerned, the CNT's appeals for solidarity had fallen on deaf ears...*
>
> *"In Seville, however, the strike began to take on very serious dimensions... on July 20, a general strike broke out in Seville and serious fighting erupted in the streets. This strike ... stemmed from the walkout of the telephone workers ... pitched battles took place in the countryside around the city between the Civil Guard and the agricultural workers. Maura, as minister of interior, decided to crush the 'insurrection' ruthlessly. Martial law was declared and the CNT's headquarters was reduced to shambles by artillery fire. After nine days, during which heavily armed police detachments patrolled the streets, the Seville general strike came to an end. The struggle in the Andalusian capital left 40 dead and some 200 wounded."* [Murray Bookchin, **The Spanish Anarchists**, pp. 221–2]

Elsewhere, *"[d]uring a Barcelona building strike CNT workers barricaded themselves in and said they would only surrender to regular troops. The army arrived and then machine-gunned them as soon as they surrendered."* [Antony Beevor, **The Spanish Civil War**, p. 33] In other words, the republican-socialist government repressed the CNT with violence as well as using the law to undermine CNT activities and strikes.

Morrow fails to discuss this history of violence against the CNT. He mentions in passing that the republican-socialist coalition government *"[i]n crushing the CNT, the troops broadened the repression to the whole working class."* He states that *"[u]nder the cover of putting down an anarchist*

putsch in January 1933, the Civil Guard 'mopped up' various groups of trouble makers. And encounter with peasants at Casas Viejas, early in January 1933, became a ***cause celebre*** *which shook the government to its foundations."* However, his account of the Casas Viejas massacre is totally inaccurate. He states that *"the little village ..., after two years of patient waiting for the Institute of Agrarian Reform to divide the neighbouring Duke's estate, the peasants had moved in and begun to till the soil for themselves."* [**Op. Cit.**, p. 22]

Nothing could be further from the truth. Firstly, we must note that the land workers (who were not, in the main, peasants) were members of the CNT. Secondly, as we pointed in section 1, the uprising had nothing to do with land reform. The CNT members did not *"till the soil"*, rather they rose in insurrection as part of a planned CNT-FAI uprising based on an expected rail workers strike (the *"anarchist putsch"* Morrow mentions). The workers were too busy fighting the Civil and Assault Guards to till anything. He is correct in terms of the repression, of course, but his account of the events leading up to it is not only wrong, it is misleading (indeed, it appears to be an invention based on Trotskyist ideology rather than having any basis in reality). Rather than being part of a *"broadened ... repression [against] the whole working class,"* it was actually part of the *"putting down"* of the anarchist revolt. CNT members were killed — along with a dozen politically neutral workers who were selected at random and murdered. Thus Morrow downplays the role of the Socialists in repressing the CNT and FAI — he presents it as general repression rather than a massacre resulting from repressing a CNT revolt.

He even quotes a Stalinist paper stating that 9 000 political prisoners were in jail in June 1933. Morrow states that they were *"mostly workers."* [p. 23] Yes, they were mostly workers, CNT members in fact — *"[i]n mid-April [1933]. .. the CNT launched a massive campaign to release imprisoned CNT-FAI militants whose numbers had now soared to about 9 000."* [Bookchin, **Op. Cit.**, pp. 231–2]

Moreover, during and after CNT insurrections in Catalonia in 1932, and the much wider insurrections of January 1933 (9 000 CNT members jailed) and December 1933 (16 000 jailed) Socialist solidarity was nil. Indeed, the 1932 and January 1933 revolts had been repressed by the government which the Socialist Party was a member of.

In other words, and to state the obvious, the socialists had been part of a government which repressed CNT revolts and syndicates, imprisoned and killed their members, passed laws to restrict their ability to strike and use direct action and provided scabs during strikes. Little wonder that Peirats states *"[i]t was difficult for the CNT and the FAI to get used to the idea of an alliance with their Socialist oppressors."* [**Anarchists in the Spanish Revolution**, p. 94]

It is **only** in this context can we understand the events of 1934 and the refusal of the CNT to run into the UGT's alliance. Morrow, needless to say, does not present this essential context and so the reader cannot understand why the CNT acted as it did in response to Socialist appeals for "unity." Instead, Morrow implies that CNT-FAI opposition to "workers alliances" were due to them believing *"all governments were equally bad."* [p. 29] Perhaps if Morrow had presented an honest account of the repression the republican-socialist government had inflicted on the CNT then the reader could make an informed judgement on why anarchist opposition to the socialist proposals existed. Rather than being sectarian or against labour unity, they had been at receiving end of extensive socialist scabbing and state repression.

Moreover, as well as the recent history of socialist repression and scabbing, there was also the experience of a similar alliance between the CNT and UGT that had occurred in 1917. The first test of the alliance came with a miners strike in Andalusia, and a *"CNT proposal for a joint general*

strike, to be initiated by UGT miners and railway workers, had been rejected by the Madrid Socialists ... the miners, after striking for four months, returned to work in defeat." Little wonder that *"the pact was in shreds. It was to be eliminated completely when a general strike broke out in Barcelona over the arrests of the CNT leaders and the assassination of Layret. Once again the CNT called upon the UGT for support. Not only was aid refused but it was denied with an arrogance that clearly indicated the Socialists had lost all interest in future collaboration... The strike in Catalonia collapsed and, with it, any prospect of collaboration between the two unions for years to come."* [Bookchin, **Op. Cit.**, pp. 175–6]

Of course, such historical context would confuse readers with facts and so goes unmentioned by Morrow.

In addition, there was another reason for opposing the "workers' alliances" — particularly an alliance between the UGT and CNT. Given the history of UGT and CNT pacts plus the actions of the UGT and socialists in the previous government it was completely sensible and politically principled. This reason was political and flowed from the CNT's libertarian vision. As Durruti argued in 1934:

> *"The alliance, to be revolutionary, must be genuinely working class. It must be the result of an agreement between the workers' organisation, and those alone. No party, however, socialist it may be, can belong to a workers' alliance, which should be built from its foundations, in the enterprises where the workers struggle. Its representative bodies must be the workers' committee chosen in the shops, the factories, the mines and the villages. We must reject any agreement on a national level, between National Committees, but rather favour an alliance carried out at the base by the workers themselves. Then and only then, can the revolutionary drive come to life, develop and take root."* [quoted by Abel Paz, **Durruti: The People Armed**, p. 154]

In the Central Region, Orobon Fernandez argued along similar lines in Madrid's **La Tierra**:

> *"Revolutionary proletarian democracy is direct management of society by the workers, a certain bulwark against party dictatorships and a guarantee of the development of the revolution's forces and undertakings... what matters must is that general guidelines are laid down so that these may serve as a platform of the alliance and furnish a combative and constructive norm for the united forces ... [These include:] acceptance of revolutionary proletarian democracy, which is to say, the will of the majority of the proletariat, as the common denominator and determining factor of the new order of things... immediate socialisation of the means of production, transportation, exchange, accommodation and finance ... federated according to their area of interest and confederated at national level, the municipal and industrial organisations will maintain the principle of unity in the economic structure."* [quoted by Jose Peirats, **The CNT in the Spanish Revolution**, vol. 1, pp. 74–5]

The May 1936 Saragossa congress of the CNT passed a resolution concerning revolutionary alliances which was obviously based on these arguments. It stated that in order *"to make the social revolution an effective reality, the social and political system regulating the life of the country has to be utterly destroyed"* and that the *"new revolutionary order will be determined by the free choice of the working class."* [quoted by Jose Peirats, **Op. Cit.**, p. 100]

Only such an alliance, from the bottom up and based on workers' self-management could be a revolutionary one. Indeed, any pact not based on this but rather conducted between organisations would be a pact the CNT and the bureaucracy of the UGT — and remove any possibility of creating genuine bodies of working class self-management (as the history of the Civil War proved). Indeed, Morrow seems to agree:

> *"The broad character of the proletarian insurrection was explained by the Communist Left (Trotskyist). It devoted itself to efforts to build the indispensable instrument of the insurrection: workers' councils constituted by delegates representing all the labour parties and unions, the shops and streets; to be created in every locality and joined together nationally ... Unfortunately, the socialists failed to understand the profound need of these Workers' Alliances. The bureaucratic traditions were not to be so easily overcome ... the socialist leaders thought that the Workers' Alliances meant they would have merely to share leadership with the Communist Left and other dissident communist groups ... actually in most cases they [Workers' Alliances] were merely 'top' committees, without elected or lower-rank delegates, that is, little more than liaison committees between the leadership of the organisations involved."* [**Op. Cit.**, pp. 27–8]

As can be seen, this closely follows Durruti's arguments. Bar the reference of *"labour parties,"* Morrow's *"indispensable instrument"* is identical to Durruti's and other anarchist's arguments against taking part in the "Workers' Alliances" created by the UGT and the creation of genuine alliances from the bottom-up. Thus Morrow faults the CNT for trying to force the UGT to form a **real** workers' alliance by not taking part in what Morrow himself admits were *"little more than liaison committees between the leadership"*! Also, Morrow argues that *"[w]ithout developing soviets — workers' councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie"* and he asks *"[h]ow could party agreements be the substitute for the necessary vast network of workers' councils?"* [**Op. Cit.**, p. 89 and p. 114] Which was, of course, the CNT-FAI's argument. It seems strange that Morrow faults the CNT for trying to create real workers' councils, the *"indispensable instrument"* of the revolution, by not taking part in a *"party agreements"* urged by the UGT which would undermine real attempts at rank-and-file unity from below.

Of course, Morrow's statement that *"labour parties and unions"* should be represented by delegates as well as *"the shop and street"* contradicts claims it would be democratic. After all, that it would mean that some workers would have multiple votes (one from their shop, their union and their party). Moreover, it would mean that parties would have an influence greater than their actual support in the working class — something a minuscule group like the Spanish Trotskyists would obviously favour as would the bureaucrats of the Socialist and Communist Parties. Little wonder the anarchists urged a workers' alliance made up of actual workers rather than an organisation which would allow bureaucrats, politicians and sects more influence than they actually had or deserved.

In addition, the "Workers' Alliances" were not seen by the UGT and Socialist Party as an organisation of equals. Rather, in words of historian Paul Preston, *"from the first it seemed that the Socialists saw the Alianza Obrera was a possible means of dominating the workers movement in areas where the PSOE and UGT were relatively weak."* [**Op. Cit.**, p. 154] The Socialist Party only allowed regional branches of the Alianza Obrera to be formed only if they could guarantee

Party control would never be lost. [Adrian Schubert *"The Epic Failure: The Asturian Revolution of October 1934"*, in **Revolution and War in Spain**, Paul Preston (ed.), p. 127] Raymond Carr argues that the Socialists, *"in spite of professions to the contrary, wished to keep socialist domination of the **Alianza Obrera**"* [**Spain: 1808–1975**, pp. 634-5f] And only one month after the first alliance was set up, one of its founder members — the Catalan **Socialist Union** — left in protest over PSOE domination. [Preston, **The Coming of the Spanish Civil War**, p. 157] In Madrid, the Alianza was *"dominated by the Socialists, who imposed their own policy."* [**Op. Cit.**, p. 154] Indeed, as Jose Peirats notes, in Asturias where the CNT had joined the Alliance, *"despite the provisions of the terms of the alliance to which the CNT had subscribed, the order for the uprising was issued by the socialists. In Oviedo a specifically socialist, revolutionary committee was secretly at work in Oviedo, which contained no CNT representatives."* [**The CNT in the Spanish Revolution**, vol. 1, p. 78] Largo Caballero's desire for trade union unity in 1936 was from a similar mould — *"[t]he clear implication was that proletarian unification meant Socialist take-over."* Little wonder Preston states that *"[i]f the use that he [Caballero] made of the Alianza Obreras in 1934 had revealed anything, it was that the domination of the working class movement by the UGT meant far more to Largo Caballero than any future prospect of revolution."* [Preston, **Op. Cit.**, p. 270]

As can be seen, the CNT's position seemed a sensible one given the nature and activities of the "Workers' Alliance" in practice. Also it seems strange that, if unity was the UGT's aims, that a CNT call, made by the national plenary in February 1934, for information and for the UGT to clearly and publicly state its revolutionary objectives, met with no reply. [Peirats, **Op. Cit.**, p. 75] In addition, the Catalan Workers' Alliance called a general strike in March 1934 the day **after** the CNT's — hardly an example of workers' unity. [Norman Jones, *"Regionalism and Revolution in Catalonia"*, **Revolution and War in Spain**, Paul Preston (ed.), p. 102]

Thus, the reasons why the CNT did not join in the UGT's "Workers' Alliance" are clear. As well as the natural distrust towards organisations that had repressed them and provided scabs to break their strikes just one year previously, there were political reasons for opposing such an alliance. Rather than being a force to ensure revolutionary organisations springing from the workplace, the "Workers' Alliance" was little more than pacts between the bureaucrats of the UGT and various Marxist Parties. This was Morrow's own argument, which also provided the explanation why such an alliance would weaken any real revolutionary movement. To requote Morrow, *"[w]ithout developing soviets — workers' councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie."* [**Op. Cit.**, p. 89]

That is exactly what happened in July, 1936, when the CNT did forsake its anarchist politics and joined in a "Workers' Alliance" type organisation with other anti-fascist parties and unions to set up the *"Central Committee of Anti-Fascist Militias"* (see section 20). Thus Morrow himself provides the explanation of the CNT's **political** rationale for being wary of the UGT's *"Workers' Alliance"* while, of course, refusing to provide the historical context the decision was made.

However, while the CNT's refusal to join the "Workers' Alliance" outside of Asturias may have been principled (and sensible), it may be argued that they were the only organisation with revolutionary potential (indeed, this would be the only argument Trotskyists could put forward to explain their hypocrisy). Such an argument would be false for two reason.

Firstly, such Alliances may have potentially created a revolutionary situation but they would have hindered the formation of working class organs of self-management such as workers' councils (soviets). This was the experience of the Central Committee of Anti-Fascist Militias and of

the Asturias revolt — in spite of massive revolutionary upheaval such councils based on delegates from workplace and community assembles were **not** formed.

Secondly, the CNT policy of "Unity, yes, but by the rank-and-file" was a valid method of "from the bottom up solidarity." This can be seen from just two examples — Aragon in 1934 and Madrid in 1936. In Aragon, there was a *"general strike that had totally paralysed the Aragonese capital throughout April 1935, ending ... on 10 May... the Zaragoza general strike had been a powerful advertisement of the value of a united working-class front ... [However,] no formal agreement ... had been reached in Zaragoza. The pact there has been created on a purely circumstantial basis with a unity of trade-union action achieved in quite specific circumstances and generated to a considerable extent by the workers themselves."* [Graham Kelsey, **Anarchism in Aragon**, p. 72] In Madrid, April 1936 (in the words of Morrow himself) *"the CNT declared a general strike in Madrid ... The UGT had not been asked to join the strike, and at first had denounced it ... But the workers came out of all the shops and factories and public services ... because they wanted to fight, and only the anarchists were calling them to struggle."* [**Op. Cit.**, p. 41]

Thus Morrow's comments against the CNT refusing to join the Workers' Alliance do not provide the reader with the historical context required to make an informed judgement of the CNT's decision. Moreover, they seem hypocritical as the CNT's reasons for refusing to join is similar to Morrow's own arguments against the Workers' Alliance. In addition, the CNT's practical counter-proposal of solidarity from below had more revolutionary potential as it was far more likely to promote rank-and-file unity plus the creation of self-managed organisations such as workers' councils. The Workers' Alliance system would have hindered such developments.

6. Was the October 1934 revolt sabotaged by the CNT?

Again, following Morrow, Marxists have often alleged that the Socialist and Workers Alliance strike wave, of October 1934, was sabotaged by the CNT. To understand this allegation, you have to understand the background to October 1934, and the split in the workers' movement between the CNT and the UGT (unions controlled by the reformist Socialist Party, the PSOE).

Socialist conversion to "revolution" occurred only after the elections of November 1933. In the face of massive and bloody repression (see last section), the CNT-FAI had agitated for a mass abstention at the polling booth. Faced with this campaign, the republicans and socialists lost and all the laws they had passed against the CNT were used against themselves. When cabinet seats were offered to the non-republican (fascist or quasi-fascist) right, in October 1934, the PSOE/UGT called for a general strike. If the CNT, nationally, failed to take part in this — a mistake recognised by many anarchist writers – this was not (as reading Morrow suggests) because the CNT thought *"all governments were equally bad"* [Morrow, **Op. Cit.**, p. 29], but because of well-founded, as it turned out, mistrust of Socialist aims.

A CNT call, on the 13th of February 1934, for the UGT to clearly and publicly state its revolutionary objectives, had met with no reply. As Peirats argues, *"[t]hat the absence of the CNT did not bother them [the UGT and Socialist Party] is clear from their silence in regards to the [CNT's] National Plenary's request."* [Peirats, **Anarchists in the Spanish Revolution**, p. 96] Rhetoric aside, the Socialist Party's main aim in October seems to have been to force new elections, so they could again form a (mildly reformist) coalition with the Republicans (their programme for the revolt was written by right-wing socialist Indalecio Prieto and seemed more like an election manifesto prepared by the Liberal Republicans than a program for revolutionary change).

This was the viewpoint of the CNT, for example. Thus, the CNT, in effect, was to be used as cannon-fodder to help produce another government that would attack the CNT.

As we discussed in the last section, the UGT backed "Workers Alliances" were little better. To repeat our comments again, the Socialist Party (PSOE) saw the alliances as a means of dominating the workers movement in areas where the UGT was weak. The Socialist "Liaison Committee", for instance, set up to prepare for insurrection, only allowed regional branches to take part in the alliances if they could guarantee Party control (see last section). Raymond Carr argues that the Socialists, *"in spite of professions to the contrary, wished to keep socialist domination of the **Alianza Obrera.**"* [**Spain: 1808–1975**, pp. 634-5f] Only one month after the first alliance was set up, one of its founder members — the Socialist Union of Catalonia — left in protest over PSOE domination.

During October the only real centre of resistance was in Asturias (on the Spanish north coast). However, before discussing that area, we must mention Madrid and Barcelona. According to Morrow, Catalonia *"should have been the fortress of the uprising"* and that *"[t]erribly discredited for their refusal to join the October revolt, the anarchists sought to apologise by pointing to the repression they were undergoing at the time from Companys."* [**Op. Cit.**, p. 30 and p. 32] Morrow fails, however and yet again, to mention a few important facts.

Firstly, the uprising in Catalonia was pushed for and lead by Estat Catala which had *"temporary ascendancy over the other groups in the Esquerra"* (the Catalan Nationalist Party which was the Catalan government). *"Companys felt obliged to yield to Dencas' [the leader of Estat Catala] demand that Catalonia should take this opportunity for breaking with Madrid."* [Gerald Brenan, **The Spanish Labyrinth**, pp. 282–3] Estat Catala *"was a Youth movement ... and composed mostly of workmen and adventurers — men drawn from the same soil as the **sindicatos libres** [boss created anti-CNT yellow unions] of a dozen years before — with a violent antagonism to the Anarcho-Syndicalists. It had a small military organisation, the **escamots**, who wore green uniforms. It represented Catalan Nationalism in its most intransigent form: it was in fact Catalan Fascism."* [**Op. Cit.**, p. 282] Gabriel Jackson calls Estat Catala a *"quasi-fascist movement within the younger ranks of the Esquerra."* [**The Spanish Republic and the Civil War: 1931–1939**, p. 150] Ronald Fraser terms it *"the extreme nationalist and proto-fascist"* wing of the party. [**Blood of Spain**, p. 535] Hugh Thomas notes *"the fascist colouring of Dencas ideas."* [**The Spanish Civil War**, p. 135]

In other words, Morrow attacks the CNT for not participating in a revolt organised and led by Catalan Fascists (or, at best, near fascists)!

Secondly, far from being apologetics, the repression the CNT was suffering from Dencas police forces was very real and was occurring right up to the moment of the revolt. In the words of historian Paul Preston:

> *"[T]he Anarchists bitterly resented the way in which the Generalitat had followed a repressive policy against them in the previous months. This had been the work of the Generalitat's counsellor for public order, Josep Dencas, leader of the quasi-fascist, ultra-nationalist party Estat Catala."* [**The Coming of the Spanish Civil War**, p. 176]

This is confirmed by anarchist accounts of the rising. As Peirats points out:

> *"On the eve of the rebellion the Catalan police jailed as many anarchists as they could put their hands on ... The union offices had been shut for some time. The press censor*

> *had completely blacked out the October 6th issue of* ***Solidaridad Obrera*** *... When the woodworkers began to open their offices, they were attacked by the police, and a furious gunfight ensued. The official radio ... reported ... that the fight had already began against the FAI fascists ... In the afternoon large numbers of police and* ***escamots*** *turned out to attack and shut down the editorial offices of* ***Solidaridad Obrera****."* [Peirats, **Op. Cit.**, pp. 98–9]

In other words, the first shots fired in the Catalan revolt were against the CNT by those in revolt against the central government!

Why were the first shots of the revolt directed at the members of the CNT? Simply because they were trying to take part in the revolt in an organised and coherent manner as urged by the CNT's Regional Committee itself. In spite of the mass arrests of anarchists and CNT militants the night before by the Catalan rebels, the CNT's Catalan Regional Committee issued a clandestine leaflet that stated that the CNT *"must enter the battle in a manner consistent with its revolutionary anarchist principles ... The revolt which broke out this morning must acquire the characteristics of a popular act through the actions of the proletariat ... We demand the right to intervene in this struggle and we will take this."* A leaflet had to be issued as **Solidaridad Obrera** was several hours late in appearing due censorship by the Catalan state. The workers had tried to open their union halls (all CNT union buildings had been closed by the Catalan government since the CNT revolt of December 1933) because the CNT's leaflet had called for the *"[i]mmediate opening of our union buildings and the concentration of the workers on those premises."* [quoted by Peirats, **The CNT in the Spanish Revolution**, vol. 1, p. 85] The participation of the CNT in the revolt as an organised force was something the Catalan rebels refused to allow and so they fired on workers trying to open their union buildings. Indeed, after shutting down **Solidaridad Obrera**, the police then tried to break up the CNT's regional plenum that was then in session, but fortunately it was meeting on different premises and so they failed. [Peirats, **Op. Cit.**, pp. 85–6]

Juan Gomez Casas argues that:

> *"The situation [in October 1934] was especially difficult in Catalonia. The Workers' Alliance ... declared a general strike. Luis Companys, president of the Catalan Parliament, proclaimed the Catalan State within the Spanish Federal Republic ... But at the same time, militants of the CNT and the FAI were arrested ...* ***Solidaridad Obrera*** *was censored. The Catalan libertarians understood that the Catalan nationalists had two objectives in mind: to oppose the central government and to destroy the CNT. Jose Dencas, Counsellor of Defence, issued a strict order: 'Watch out for the FAI' ... Luis Companys broadcast a message on October 5 to all 'citizens regardless of ideology.' However, many anarchosyndicalist militants were held by his deputy, Dencas, in the underground cells of police headquarters."* [**Op. Cit.**, pp. 151–2]

Hence the paradoxical situation in which the anarchists, anarcho-syndicalists and FAI members found themselves in during this time. The uprising was organised by Catalan fascists who continued to direct their blows against the CNT. As Abel Paz argues, *"[f]or the rank and file Catalan worker ... the insurgents ... were actually orienting their action in order to destroy the CNT. After that, how could they collaborate with the reactionary movement which was directing its blows against the working class? Here was the paradox of the Catalan uprising of October 6, 1934."* [**Durruti: The People Armed**, p. 158]

In other words, during the Catalan revolt, *"the CNT had a difficult time because the insurgents were its worst enemies."* [Peirats, **The Anarchists in the Spanish Revolution**, p. 98] However, the complexity of the actual situation does not bother the reader of Morrow's work as it is not reported. Little wonder, as Peirats argues, the *"absurd contention according to which the confederal proletariat of Catalonia betrayed their brethren in Asturias melts away in the face of a truthful narration of the facts."* [**The CNT in the Spanish Revolution**, vol. 1, p. 86]

In summary, therefore, Morrow expected the membership of the Catalan CNT and FAI to join in a struggle started and directed by Catalan fascists, whose leaders in the government were arresting and shooting their members, censoring their press, closing their union offices and refusing them a role in the revolt as self-organised forces. We think that sums up the validity of Trotskyism as a revolutionary theory quite well.

In Madrid, the revolt was slightly less farcical. Here the CNT joined the general strike. However, the UGT gave the government 24 hours notice of the general strike, allowing the state to round up the Socialist "leaders," seize arm depots and repress the insurrection before it got started [Morrow, **Op. Cit.**, p. 30]. As Bookchin argues, the *"massive strike in Madrid, which was supported by the entire left, foundered for want of arms and a revolutionary sense of direction."* [**Op. Cit.**, p. 245] He continues:

> *"As usual, the Socialists emerged as unreliable allies of the Anarchists. A revolutionary committee, established by the CNT and FAI to co-ordinate their own operations, was denied direly needed weapons by the UGT. The arms, as it turned out, had been conveniently intercepted by government troops. But even if they had been available, it is almost certain that the Socialists would not have shared them with the Anarchists. Indeed, relationships between the two major sectors of the labour movement had already been poisoned by the failure of the Socialist Youth and the UGT to keep the CNT adequately informed of their plans or confer with Anarchosyndicalist delegates. Despite heavy fighting in Madrid, the CNT and FAI were obliged to function largely on their own. When, at length, a UGT delegate informed the revolutionary committee that Largo Caballero was not interested in common action with the CNT, the committee disbanded."* [**Op. Cit.**, p. 246]

Bookchin correctly states that *"Abad de Santillan was to observe with ample justification that Socialist attempts to blame the failure of the October Insurrection on Anarchist abstention was a shabby falsehood"* and quotes Santillan:

> *"Can there be talk of abstention of the CNT and censure of it by those who go on strike without warning our organisation about it, who refuse to meet with the delegates of the National Committee [of the CNT], who consent to let the Lerrous-Gil Robles Government take possession of the arms deposits and let them go unused before handing them over to the Confederation and the FAI?"* [**Ibid.**]

Historian Paul Preston confirms that in Madrid *"Socialists and Anarchists went on strike ..."* and that *"the Socialists actually rejected the participation of Anarchist and Trotskyist groups who offered to help make a revolutionary coup in Madrid."* [**The Coming of the Spanish Civil War**, p. 174] Moreover, *"when delegates travelled secretly to Madrid to try to co-ordinate support for*

the revolutionary Asturian miners, they were rebuffed by the UGT leadership." [Graham Kelsey, **Anarchism in Aragon**, p. 73]

Therefore, in two of the three centres of the revolt, the uprising was badly organised. In Catalonia, the revolt was led by fascist Catalan Nationalists who arrested and shot at CNT militants. In Madrid, the CNT backed the strike and was ignored by the Socialists. The revolt itself was badly organised and quickly repressed (thanks, in part, to the actions of the Socialists themselves). Little wonder Peirats asks:

> *"Although it seems absurd, one constantly has to ask whether the Socialists meant to start a true revolution [in October 1934] in Spain. If the answer is affirmative, the questions keep coming: Why did they not make the action a national one? Why did they try to do it without the powerful national CNT? Is a peaceful general strike revolutionary? Was what happened in Asturias expected, or were orders exceeded? Did they mean only to scare the Radical-CEDA government with their action?"* [**The Anarchists in the Spanish Revolution**, pp 95–6]

The only real centre of resistance was in Asturias (on the Spanish north coast). Here, the CNT had joined the Socialists and Communists in a "Workers Alliance". But, against the alliance's terms, the Socialists alone gave the order for the uprising — and the Socialist-controlled Provincial Committee starved the CNT of arms. This despite the CNT having over 22 000 affiliates in the area (to the UGT's 40 000). We discuss the activities of the CNT during the revolt in Asturias later (in section 20) and so will do so here.

Morrow states that the *"backbone of the struggle was broken ... when the refusal of the CNT railroad workers to strike enabled the government to transport goods and troops."* [Morrow, **Op. Cit.**, p. 30] Yet in Asturias (the only area where major troop transportation was needed) the main government attack was from a sea borne landing of Foreign Legion and Moroccan troops — against the port and CNT stronghold (15 000 affiliates) of Gijon (and, we must stress, the Socialists and Communists refused to provide the anarchists of these ports with weapons to resist the troop landings). Hence his claim seems somewhat at odds with the actual events of the October uprising.

Moreover, he seems alone in this claim. No other historian (for example, Hugh Thomas in **The Spanish Civil War**, Raymond Carr in **Spain: 1808–1975**, Paul Preston in **The Coming of the Spanish Civil War**, Gerald Brenan, **The Spanish Labyrinth**, Gabriel Jackson, **The Spanish Republic and the Civil War: 1931–1939**) makes this claim. But, of course, these are not Trotskyists and so can be ignored. However, for objective readers such an omission might be significant.

Indeed, when these other historians **do** discuss the crushing of the Asturias they all stress the fact that the troops came from the sea. For example, Paul Preston notes that *"[w]ith CEDA approval, Franco ... insisted on the use of troops from Africa ... they shipped Moorish mercenaries to Asturias."* [**The Coming of the Spanish Civil War**, p. 177] Gabriel Jackson argues that the government *"feared to send in the regular Army because of the strong possibility that the Spanish conscripts would refuse to fire on the revolutionaries — or even desert to them. The War Minister ... , acting on the advice of Generals Franco and Goded, sent in contingents of the Morrish **regulares** and of the Foreign Legions."* These troops arrived *"at the ports of Aviles and Gijon."* [**The Spanish Republic and the Civil War: 1931–1939**, p. 157]

Richard A. H. Robinson argues that it *"was soon decided that the [Asturias] rebellion could only be crushed by experienced, professional troops. The other areas of Spain could not be denuded of their garrisons in case there were other revolutionary outbreaks. Franco therefore called upon Colonel Yague to lead a force of Moorish regulars to help re-conquer the province from the rebels."* [**The Origins of Franco's Spain**, pp. 190–1] Stanley G. Payne gives a more detailed account of the state's attack:

> *"Army reinforcements were soon being rushed toward the region ... Eduardo Lopez Ochoa ... head[ed] the main relief column ... he began to make his way eastward [from Galicia] with a modest force of some 360 troops in trucks, half of whom had to be detached on the way to hold the route open. Meanwhile ... in the main Asturian coastal city of Gijon . .. reinforcements first arrived by sea on the seventh, followed by larger units from the Moroccan Protectorate on the tenth."* [**Spain's First Democracy**, p. 219]

No mention of trains in these accounts, so indicating that Morrow's assertions are false. The main attack on Asturias, and so the transportation of troops and goods, was by ***sea***, not by trains.

In addition, these historians point to other reasons for the defeat of the revolt — the amazingly bad organisation of it by the Socialist Party. Raymond Carr sums up the overwhelming opinion of the historians when he says that *"[a]s a national movement the revolution was a fiasco."* [**Op. Cit.**, p. 633] Hugh Thomas states that the revolt in Catalonia was *"crushed nearly as quickly as the general strike had been in Madrid."* [**The Spanish Civil War**, p. 136] Brenan correctly argues that *"[f]rom the moment that Barcelona capitulated and the rising in Madrid fizzled out, the miners were of course doomed."* [**Op. Cit.**, p. 286] The failure of both these revolts was directly attributable to the policies and actions of the Socialists who controlled the *"Workers' Alliances"* in both areas. Hence historian Paul Heywood:

> *"[A]n important factor which contributed to the strikes' collapse and made the state's task easier was the underlying attitude of the Socialists. For all the talk of united action by the Left, the Socialists still wished to dominate any combined moves. Unwilling to cede its traditional hegemony, the PSOE rendered the Alianze obrera necessarily ineffective ...*
>
> *"Thus, there was little genuine unity on the Spanish Left. Moreover, the strike was very poorly planned. Differences within the PSOE meant that there was no agreement even as to the programme of the strike. For the ... leftists, it represented the initiation of a full-scale Socialist revolution; for ... the centrists in the party, the aim of the strike was to force Alcala-Zamora to reconsider and invite the Socialists back into a coalition government with the Republicans."* [**Marxism and the Failure of Organised Socialism in Spain 1879–1936** pp. 144–5]

Significantly, Heywood argues that *"[o]ne thing, however, did emerge from the October strike. The example of Asturias provided a pointed lesson for the Left: crucially, the key to the relative success of the insurrection there was the participation of the CNT in an effective Alianza obrera. Without the CNT, the Asturian rising would have been as short-lived and as easily defeated as those in Madrid and Barcelona."* [**Op. Cit.**, p. 145]

Having discussed both Madrid and Barcelona above, we leave it to the reader to conclude whether Morrow's comments are correct or whether a more likely alternative explanation for the revolt's failure is possible.

However, even assuming Morrow's claims that the failure of the CNT rail workers' union to continue striking in the face of a completely farcical "revolt" played a key role in its defeat were true, it does not explain many facts. Firstly, the government had declared martial law — placing the railway workers in a dangerous position. Secondly, as Jerome R. Mintz points out, railway workers *"were represented by two competing unions — the Sindicato Nacional Ferroviario of the UGT ... and the CNT-affiliated FNIFF ... The UGT ... controlled the large majority of the workers. [In 1933] Trifon Gomez, secretary of the UGT union, did not believe it possible to mobilise the workers, few of whom had revolutionary aspirations."* [**The Anarchists of Casa Viejas**, p. 178] Outside of Catalonia, the majority of the railway workers belonged to the UGT [Sam Dolgoff, **The Anarchist Collectives**, p. 90f] Asturias (the only area where major troop transportation was needed) does not border Catalonia — apparently the army managed to cross Spain on a rail network manned by a minority of its workers.

However, these points are of little import when compared to the fact that Asturias the main government attack was, as we mentioned above, from a sea borne landing of Foreign Legion and Moroccan troops. Troops from Morocco who land by sea do not need trains. Indeed, The ports of Aviles and Gijon were the principle military bases for launching the repression against the uprising.

The real failure of the Asturias revolt did not lie with the CNT, it lay (unsurprisingly enough) with the Socialists and Communists. Despite CNT pleas the Socialists refused arms, Gjon fell after a bloody struggle and became the main base for the crushing of the entire region (*"Arriving at the ports of Aviles and Gijon on October 8, these troops were able to overcome the resistance of the local fishermen and stevedores. The revolutionary committees here were Anarchist dominated. Though they had joined the rising and accepted the slogan UHP [Unity, Proletarian Brothers], the Socialists and Communists of Oviedo clearly distrusted them and had refused arms to their delegate the day before."* [Gabriel Jackson, **Op. Cit.**, p. 157]).

This Socialist and Communist sabotage of Anarchist resistance was repeated in the Civil War, less than two years later.

As can be seen, Morrow's account of the October Insurrection of 1934 leaves a lot to be desired. The claim that the CNT was responsible for its failure cannot withstand a close examination of the events. Indeed, by providing the facts which Morrow does not provide we can safely say that the failure of the revolt across Spain rested squarely with the PSOE and UGT. It was badly organised, they failed to co-operate or even communicate with CNT when aid was offered, they relied upon the enemies of the CNT in Catalonia and refused arms to the CNT in both Madrid and Asturias (so allowing the government force, the main force of which landed by sea, easy access to Asturias). All in all, even if the minority of railway workers in the CNT had joined the strike it would have, in all probability, resulted in the same outcome.

Unfortunately, Morrow's assertions have become commonplace in the ranks of the Left and have become even more distorted in the hands of his Trotskyist readers. For example, we find Nick Wrack arguing that the *"Socialist Party called a general strike and there were insurrectionary movements in Asturias and Catalonia, In Madrid and Catalonia the anarchist CNT stood to one side, arguing that this was a 'struggle between politicians' and did not concern the workers even though this was a strike against a move to incorporate fascism into the government."* He continues, *"[i]n*

Asturias the anarchist militants participated under the pressure of the masses and because of the traditions of unity in that area. However, because of their abstentionist stupidity, the anarchists elsewhere continued to work, even working trains which brought the Moorish troops under Franco to suppress the Asturias insurrection." [*"Marxism, Anarchism and the State"*, pp. 31–7, **Militant International Review**, no. 46, p. 34]

Its hard to work out where to start in this travesty of history. We will start with the simple errors. The CNT **did** take part in the struggle in Madrid. As Paul Preston notes, in Madrid the *"Socialists and Anarchists went on strike"* [**The Coming of the Spanish Civil War**, p. 174] In Catalonia, as indicated above, the "insurrectionary movement" in Catalonia was organised and lead by Catalan Fascists, who shot upon CNT members when they tried to open their union halls and who arrested CNT and FAI militants the night before the uprising. Moreover, the people organising the revolt had been repressing the CNT for months previously. Obviously attempts by Catalan Fascists to become a government should be supported by socialists, including Trotskyists. Moreover, the UGT and PSOE had worked with the quasi-fascist Primo do Rivera dictatorship during the 1920s. The hypocrisy is clear. So much for the CNT standing *"to one side, arguing that this was a 'struggle between politicians' and did not concern the workers even though this was a strike against a move to incorporate fascism into the government."*

His comments that *"the anarchists ... work[ed] trains which brought the Moorish troops under Franco to suppress the Asturias insurrection"* is just plain silly. It was **not** anarchists who ran the trains, it was railway workers — under martial law — some of whom were in the CNT and some of whom were anarchists but, in fact, were mostly in the UGT and some of whom were state socialists of various kinds. Moreover, as noted above the Moorish troops under Franco arrived **by sea** and not by train. And, of course, no mention of the fact that the CNT-FAI in the strategically key port of Gijon was denied arms by the Socialists and Communists, which allowed the Moorish troops to disembark without real resistance.

Morrow has a lot to answer for.

7. Were the Friends of Durruti Marxists?

It is sometimes claimed that the **Friends of Durruti** Group which formed during the Spanish Revolution were Marxists or represented a "break" with anarchism and a move towards Marxism. Both these assertions are false. We discuss whether the Friends of Durruti (FoD) represented a "break" with anarchism in the following section. Here we indicate that claims of the FoD being Marxists are false.

The Friends of Durruti were formed, in March 1937, by anarchist militants who had refused to submit to Communist-controlled "militarisation" of the workers' militias. During the Maydays — the government attack against the revolution two months later — the Friends of Durruti were notable for their calls to stand firm and crush the counter-revolution. During and after the May Days, the leaders of the CNT asserted that the FoD were Marxists (which was quite ironic as it was the CNT leaders who were acting as Marxists in Spain usually did by joining with bourgeois governments). This was a slander, pure and simple.

The best source to refute claims that the FoD were Marxists (or becoming Marxist) or that they were influenced by, or moved towards, the Bolshevik-Leninists is Agustin Guillamon's book **The Friends of Durruti Group: 1937–1939**. Guillamon is a Marxist (of the "left-communist" kind) and no anarchist (indeed he states that the *"Spanish Revolution was the tomb of anarchism*

as a revolutionary theory of the proletariat." [p. 108]). That indicates that his account can be considered objective and not anarchist wishful thinking. Here we use his work to refute the claims that the FoD were Marxists. Section 9 discusses their links (or lack of them) with the Spanish Trotskyists.

So were the FoD Marxists? Guillamon makes it clear — no, they were not. In his words, *"[t]here is nothing in the Group's theoretical tenets, much less in the columns of* ***El Amigo del Pueblo*** *[their newspaper], or in their various manifestos and handbills to merit the description 'marxist' being applied to the Group [by the CNT leadership]. They were simply an opposition to the CNT's leadership's collaborationist policy, making their stand within the organisation and upon anarcho-syndicalist ideology.*" [p. 61] He stresses this in his conclusion:

> *"The Friends of Durruti was an affinity group, like many another existing in anarcho-syndicalist quarters. It was not influenced to any extent by the Trotskyists, nor by the POUM. Its ideology and watchwords were quintessentially in the CNT idiom: it cannot be said that they displayed a marxist ideology at any time ... They were against the abandonment of revolutionary objectives and of anarchism's fundamental and quintessential ideological principles, which the CNT-FAI leaders had thrown over in favour of anti-fascist unity and the need to adapt to circumstances.*" [p. 107]

In other words, they wanted to return the CNT *"to its class struggle roots."* [**Ibid.**] Indeed, Balius (a leading member of the group and writer of its 1938 pamphlet **Towards a Fresh Revolution**) was moved to challenge the charges of "marxist" levelled at him:

> *"I will not repay defamatory comment in kind. But what I cannot keep mum about is that a legend of marxism has been woven about my person and I should like the record put straight ... It grieves me that at the present time there is somebody who dares call me a Marxist when I could refute with unanswerable arguments those who hang such an unjustified label on me. As one who attends our union assemblies and specific gatherings, I might speak of the loss of class sensibility which I have observed on a number of occasions. I have heard it said that we should be making politics — in as many words, comrades — in an abstract sense, and virtually no one protested. And I, who have been aghast at countless such instances, am dubbed a marxist just because I feel, myself to be a one hundred percent revolutionary ... On returning from exile in France in the days of Primo de Rivera ... I have been a defender of the CNT and the FAI ever since. In spite of my paralysis, I have done time in prison and been taken in manacles to Madrid for my fervent and steadfast championship of our organisations and for fighting those who once were friends of mine Is that not enough? ... So where is this marxism of mine? Is it because my roots are not in the factory? ... The time has come to clarify my position. It is not good enough to say that the matter has already been agreed. The truth must shine through. As far as I am concerned, I call upon all the comrades who have used the press to hang this label upon me to spell out what makes me a marxist.*" [**El Amigo del Pueblo**, no. 4, p. 3]

As can be seen, the FoD were not Marxists. Two more questions arise. Were they a "break" with anarchism (i.e. moving towards Marxism) and were they influenced by the Spanish Trotskyists. We turn to these questions in the next two sections.

8. Did the Friends of Durruti *"break with"* anarchism?

Morrow claims that the Friends of Durruti (FoD) *"represented a conscious break with the anti-statism of traditional anarchism. They explicitly declared the need for democratic organs of power, juntas or soviets, in the overthrow of capitalism."* [**Op. Cit.**, p. 247] The truth of the matter is somewhat different.

Before discussing his assertion in more detail a few comments are required. Typically, in Morrow's topsy-turvy world, all anarchists like the Friends of Durruti (Morrow also includes the Libertarian Youth, the *"politically awakened"* CNT rank and file, local FAI groups, etc.) who remained true to anarchism and stuck to their guns (often literally) — represented a break with anarchism and a move towards Marxism, the revolutionary vanguard party (no doubt part of the 4th International), and a fight for the "workers state." Those anarchists, on the other hand, who compromised for "anti-fascist unity" (but mainly to try and get weapons to fight Franco) are the real anarchists because *"class collaboration ... lies concealed in the heart of anarchist philosophy."* [**Op. Cit.**, p. 101]

Morrow, of course, would have had a fit if anarchists pointed to the example of the Social Democrat's who crushed the German Revolution or Stalin's Russia as examples that "rule by an elite lies concealed in the heart of Marxist philosophy." It does not spring into Morrow's mind that those anarchists he praises are the ones who show the revolutionary heart of anarchism. This can best be seen from his comments on the Friends of Durruti, who we argue were not evolving towards "Marxism" but rather were trying to push the CNT and FAI back to its pre-Civil War politics and strategy. Moreover, as we argue in section 12, anarchism has always argued for self-managed working class organisations to carry out and defend a revolution. The FoD were simply following in the tradition founded by Bakunin.

In other words, we will show that they did not *"break with"* anarchism – rather they refused to compromise their anarchism in the face of "comrades" who thought winning the war meant entering the government. This is clear from their leaflets, paper and manifesto. Moreover, as will become obvious, their "break" with anarchism actually just restates pre-war CNT policy and organisation.

For example, their leaflets, in April 1937, called for the unions and municipalities to *"replace the state"* and for no retreat:

> *"We have the organs that must supplant a State in ruins. The Trade Unions and Municipalities must take charge of economic and social life."* [quoted by Agustin Guillamon, **Op. Cit.**, p. 38]

This clearly is within the CNT and anarcho-syndicalist tradition. Their manifesto, in 1938, repeated this call (*"the state cannot be retained in the face of the unions"*), and made three demands as part of their programme. It is worth quoting these at length:

> *"I — Establishment of a Revolutionary Junta or National Defence Council.*
>
> *"This body will be organised as follows: members of the revolutionary Junta will be elected by democratic vote in the union organisations. Account is to be taken of the number of comrades away at the front ... The Junta will steer clear of economic affairs, which are the exclusive preserve of the unions.*

"The functions of the revolutionary Junta are as follows:

"Posts to come up regularly for re-allocation so as to prevent anyone growing attached to them. And the trade union assemblies will exercise control over the Junta's activities.

"II — All economic power to the syndicates.

"Since July the unions have supplied evidence of the great capacity for constructive labour... It will be the unions that structure the proletarian economy.

"An Economic Council may also be set up, taking into consideration the natures of the Industrial Unions and Industrial federations, to improve on the co-ordination of economic activities.

"III — Free municipality.

[...]

"The Municipality shall take charge of those functions of society that fall outside the preserve of the unions. And since the society we are going to build shall be composed exclusively of producers, it will be the unions, no less, that will provide sustenance for the municipalities...

"The Municipalities will be organised at the level of local, comarcal and peninsula federations. Unions and municipalities will maintain liaison at local, comarcal and national levels." [**Towards a Fresh Revolution**, pp. 24–5]

This programme basically mimics the pre-war CNT policy and organisation and so cannot be considered as a *"break"* with anarchist or CNT politics or tradition.

Firstly, we should note that the *"municipality"* was a common CNT expression to describe a *"commune"* which was considered as *"all the residents of a village or hamlet meeting in assembly (council) with full powers to administer and order local affairs, primarily production and distribution."* In the cities and town the equivalent organisation was *"the union"* which *"brings individuals together, grouping them according to the nature of their work ... First, it groups the workers of a factory, workshop or firm together, this being the smallest cell enjoying autonomy with regard to whatever concerns it alone ... The local unions federate with one another, forming a local federation, composed of the committee elected by the unions, and of the general assembly that, in the last analysis, holds supreme sovereignty."* [Issac Puente, **Libertarian Communism**, p. 25 and p. 24]

In addition, the *"national federations [of unions] will hold as common property the roads, railways, buildings, equipment, machinery and workshops"* and the *"free municipality will federate with its counterparts in other localities and with the national industrial federations."* [**Op. Cit.**, p. 29 and p. 26] Thus Puente's classic pre-war pamphlet is almost identical to points two and three of the FoD Programme.

Moreover, the *"Economic Council"* urged by the FoD in point two of their programme is obviously inspired by the work of Abad Diego de Santillan, particularly his book **After the Revolution** (**El Organismo Economico de la Revolucion**). Discussing the role of the *"Federal Council of Economy"*, de Santillan says that it *"receives its orientation from below and operates in accordance with the resolutions of the regional and national assemblies."* [p. 86] Just as the CNT Congresses were the supreme policy-making body in the CNT itself, they envisioned a similar body emanating from the rank-and-file assemblies to make the guiding decisions for a socialised economy.

This leaves point one of their programme, the call for a *"Revolutionary Junta or National Defence Council."* It is here that Morrow and a host of other Marxists claim the FoD broke with anarchism towards Marxism. Nothing could be further from the truth.

Firstly, anarchists have long supported the idea of workers' councils (or soviets) as an expression of working class power to control their own lives (and so society) — indeed, far longer than Marxists. Thus we find Bakunin arguing that the *"future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal."* Anarchists *"attain this goal ... by the development and organisation, not of the political but of the social (and, by consequence, anti-political) power of the working masses."* [**Michael Bakunin: Selected Writings**, p. 206 and p. 198] These councils of workers' delegates (workers' councils) would be the basis of the commune and defence of the revolution:

> *"the federative Alliance of all working men's associations ... constitute the Commune .... Commune will be organised by the standing federation of the Barricades... [T]he federation of insurgent associations, communes and provinces ... [would] organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution."* [**Op. Cit.**, pp. 170–1]

This perspective can be seen in the words of the German anarcho-syndicalist H. Ruediger (member of the IWA's secretariat in 1937) when he argued that for anarchists *"social re-organisation, like the defence of the revolution, should be concentrated in the hands of* ***working class organisations*** *— whether labour unions or new organs of spontaneous creation, such as free councils, etc., which, as an expression of the will of the workers themselves, from* ***below up****, should construct the revolutionary social community."* [quoted in **The May Days in Barcelona**, Vernon Richards (ed.), p. 71]

Camillo Berneri sums up the anarchist perspective clearly when he wrote:

> *"The Marxists ... foresee the natural disappearance of theState as a consequence of the destruction of classes by the means of 'the dictatorship of the proletariat,' that is to say State Socialism, whereas the Anarchists desire the destruction of the classes by means of a social revolution which eliminates, with the classes, the State. The Marxists, moreover, do not propose the armed conquest of the Commune by the whole proletariat, but the propose the conquest of the State by the party which imagines that it represents the proletariat. The Anarchists allow the use of direct power by the proletariat, but they understand by the organ of this power to be formed by the entire corpus of systems of communist administration — corporate organisations [i.e. industrial unions], communal institutions, both regional and national — freely constituted outside and in opposition to all political monopoly by parties and endeavouring to a minimum administrational centralisation."* [*"Dictatorship of the Proletariat and State Socialism"*, **Cienfuegos Press Anarchist Review**, no. 4, p. 52]

In other words, anarchists **do** support democratic organs of power when they are **directly** democratic (i.e. self-managed). *"The basic idea of Anarchism is simple,"* argued Voline, *"no party*

*... placed above or outside the labouring masses ... ever succeeds in emancipating them ... Effective emancipation can only be achieved by the **direct, widespread, and independent action of those concerned, of the workers themselves**, grouped, not under the banner of a political party ... but in their own class organisations (productive workers' unions, factory committees, co-operatives, et cetra) on the basis of concrete action and self-government."* [**The Unknown Revolution**, p, 197]

Anarchists oppose **representative** organs of power as these are governments and so based on minority power and subject to bureaucratic deformations which ensure **un**-accountablity from below. Anarchists argue *"that, by its very nature, political power could not be exercised except by a very restricted group of men at the centre. Therefore this power — the **real** power — could not belong to the soviets. It would actually be in the hands of the party."* [Voline, **Op. Cit.**, p. 213]

Thus Morrow's argument is flawed on the basic point that he does not understand anarchist theory or the nature of an anarchist revolution (also see section 12).

Secondly, and more importantly given the Spanish context, the FoD's vision has a marked similarity to pre-Civil War CNT organisation, policy and vision. This means that the idea of a National Defence Council was not the radical break with the CNT that some claim. Before the civil war the CNT had long has its defence groups, federated at regional and national level. Historian Jerome Mintz provides a good summary:

> *"The policies and actions of the CNT were conducted primarily by administrative juntas, beginning with the sindicato, whose junta consisted of a president, secretary, treasurer, and council members. At each step in the confederation, a representative [sic! — delegate] was sent to participate at the next organisational level — from sindicato to the district to the regional confederation, then to the national confederation. In addition to the juntas, however, there were two major committee systems established as adjuncts to the juntas that had developed some autonomy: the **comites pro presos**, or committees for political prisoners, which worked for the release of prisoners and raised money for the relief of their families; and the **comites de defensa**, or defence committees, whose task was to stockpile weapons for the coming battle and to organise the shock troops who would bear the brunt of the fighting."* [**The Anarchists of Casas Viejas**, p. 141]

Thus we see that the CNT had its *"juntas"* (which means council or committee and so does not imply any authoritarianism) as well as *"defence committees"* which were elected by democratic vote in the union organisations decades before the FoD existed. The Defence Committees (or councils) were a CNT insurgent agency in existence well before July 1936 and had, in fact, played a key role in many insurrections and strikes, including the events of July 1936. In other words, the *"break"* with anarchism Morrow presents was, in fact, an exact reproduction of the way the CNT had traditionally operated and acted — it is the same program of a *"workers defence council"* and *"union management of the economy"* that the CNT had advocated prior to the outbreak of the Civil War. The only *"break"* that **did** occur post 19th of July was that of the CNT and FAI ignoring its politics and history in favour of "anti-fascist unity" and a UGT "Workers' Alliance" with all anti-fascist unions and parties (see section 20).

Moreover, the CNT insurrection of December 1933 had been co-ordinated by a National Revolutionary Committee [**No Gods, No Masters**, vol. 2, p. 235]. D.A. Santillan argued that the *"local Council of Economy will assume the mission of defence and raise voluntary corps for guard duty and if need be, for combat"* in the *"cases of emergency or danger of a counter-revolution."* [**After the**

Revolution, p. 80] During the war itself a CNT national plenum of regions, in September 1936, called for a National Defence Council, with majority union representation and based on Regional Defence Councils. The Defence Council of Aragon, set up soon after, was based on these ideas. The need for co-ordinated revolutionary defence and attack is just common sense — and had been reflected in CNT theory, policy and structure for decades.

An understanding of the basic ideas of anarchist theory on revolution combined with the awareness of the CNT's juntas (administrative councils or committees) had *"defence committees"* associated with them makes it extremely clear that rather than being a *"conscious break with the anti-statism of traditional anarchism"* the FoD's programme was, in fact, a conscious **return** to the anti-statism of traditional anarchism and the revolutionary program and vision of the pre-Civil War CNT.

This is confirmed if we look at the activities of the CNT in Aragon where they formed the *"Defence Council of Aragon"* in September 1936. In the words of historian Antony Beevor, *"[i]n late September delegates from the Aragonese collectives attended a conference at Bujaraloz, near where Durruti's column was based. They decided to establish a Defence Council of Aragon, and elected as president Joaquin Ascaso."* [**Op. Cit.**, p. 96] In February 1937, the first congress of the regional federation of collectives was held at Caspe to co-ordinate the activities of the collectives — an obvious example of a regional economic council desired by the FoD. Morrow does mention the Council of Aragon — *"the anarchist-controlled Council for the Defence of Aragon"* [**Op. Cit.**, p. 111] — however, he strangely fails to relate this fact to anarchist politics. After all, in Aragon the CNT-FAI remained true to anarchism, created a defence council and a federation of collectives. If Morrow had discussed the events in Aragon he would have had to draw the conclusion that the FoD were not a *"conscious break with the traditional anti-statism of anarchism"* but rather were an expression of it.

This can be seen from the comments made after the end of the war by the Franco-Spanish Group of **The Friends of Durruti**. They clearly argued for a return to the principles of anarchism and the pre-war CNT. They argued not only for workers' self-organisation and self-management as the basis of the revolution but also to the pre-war CNT idea of a workers' alliance from the bottom up rather than a UGT-style one at the top (see section 5). In their words:

> *"A revolution requires the absolute domination of the workers' organisations as was the case in July, 1936, when the CNT-FAI were masters ... We incline to the view that it is necessary to form a Revolutionary Alliance; a Workers' Front; where no one would be allowed to enter and take their place except on a revolutionary basis ... "* [*"The Friends of Durruti Accuse"*, **Class War on the Home Front**, Wildcat Group (ed.), p. 34]

As can be seen, rather than a "revolutionary government" the FoD were consistently arguing for a federation of workers' associations as the basis of the revolution. In this they were loyally following Bakunin's basic arguments and the ideas of anarchism. Rather than the FoD breaking with anarchism, it is clear that it was the leading committees of the CNT and FAI which actually broke with the politics of anarchism and the tactics, ideas and ideals of the CNT.

Lastly there are the words of Jaime Balius, one of the FoD's main activists, who states in 1976 that:

> *"We did not support the formation of Soviets; there were no grounds in Spain for calling for such. We stood for 'all power to the trade unions'. In no way were we politically*

> *orientated ... Ours was solely an attempt to save the revolution; at the historical level it can be compared to Kronstadt because if there the sailors and workers called for 'all power to the Soviets', we were calling for all power to the unions."* [quoted by Ronald Fraser, **Blood of Spain**, p. 381]

"Political" here meaning "state-political" — a common anarchist use of the word. According to Fraser, the *"proposed revolutionary junta was to be composed of combatants from the barricades."* [**Ibid.**] This echoes Bakunin's comment that the *"Commune will be organised by the standing federation of the Barricades and by the creation of a Revolutionary Communal Council composed of one or two delegates from each barricade ... vested with plenary but accountable and removable mandates."* [**Op. Cit.**, pp. 170–1]

As can be seen, rather than calling for power to a party or looking to form a government (i.e. being *"politically orientated"*) the FoD were calling for *"all power to the unions."* This meant, in the context of the CNT, all power to the union assemblies in the workplace. Decision making would flow from the bottom upwards rather than being delegated to a "revolutionary" government as in Trotskyism. To stress the point, the FoD did not represent a *"break"* with anarchism or the CNT tradition. To claim otherwise means to misunderstand anarchist politics and CNT history.

Our analysis, we must note, also makes a mockery of Guillamon's claim that because the FoD thought that libertarian communism had to be *"impose[d]"* and *"defended by force of arms"* their position represented an *"evolution within anarchist thought processes."* [**Op. Cit.**, p. 95] As has been made clear above, from Bakunin onwards revolutionary anarchism has been aware of the need for an insurrection to create an anarchist society by destroying both the state and capitalism (i.e. to *"impose"* a free society upon those who wish hierarchy to continue and are in a position of power) and for that revolution to be defended against attempts to defeat it. Similarly, his claim that the FoD's *"revolutionary junta"* was the equivalent of what *"others call the vanguard or the revolutionary party"* cannot be defended given our discussion above — it is clear that the junta was not seen as a form of delegated power by rather as a means of defending the revolution like the CNT's defence committees and under the direct control of the union assemblies.

It may be argued that the FoD did not actually mean this sort of structure. Indeed, their manifesto states that they are *"introducing a slight variation in anarchism into our program. The establishment of a Revolutionary Junta."* Surely this implies that they saw themselves as having moved away from anarchism and CNT policy? As can be seen from Balius' comments during and after the revolution, the FoD were arguing for *"all power to the unions"* and stating that *"apolitical anarchism had failed."* However, *"apolitical"* anarchism came about post-July 19th when the CNT-FAI (ignoring anarchist theory and CNT policy and history) **ignored** the state machine rather than destroying it and supplanting it with libertarian organs of self-management. The social revolution that spontaneously occurred after July 19th was essentially economic and social (i.e. *"apolitical"*) and not *"anti-political"* (i.e. the destruction of the state machine). Such a revolution would soon come to grief on the shores of the (revitalised) state machine — as the FoD correctly argued had happened.

To state that they had introduced a variation into their anarchism makes sense post-July 1936. The *"apolitical"* line of the CNT-FAI had obviously failed and a new departure was required. While it is clear that the FoD's "new" position was nothing of the kind, it was elemental anarchist principles, it was "new" in respect to the policy the CNT ("anarchism") had conducted during the Civil War — a policy they justified by selective use of anarchist theory and principles. In

the face of this, the FoD could claim they were presenting a new variation in spite of its obvious similarities to pre-war CNT policies and anarchist theory. Thus the claim that the FoD saw their ideas as some sort of departure from traditional anarchism cannot be maintained, given the obvious links this "new" idea had with the past policies and structure of the CNT. As Guillamon makes it clear, the FoD made *"their stand within the organisation and upon anarcho-syndicalist ideology"* and *"[a]t all times the Group articulated an anarcho-syndicalist ideology, although it also voiced radical criticism of the CNT and FAI leadership. But it is a huge leap from that to claiming that the Group espoused marxist positions."* [**Op. Cit.**, p. 61 and p. 95]

One last comment. Morrow states that the *"CNT leadership ... expelled the Friends of Durruti"* [**Op. Cit.**, p. 189] This is not true. The CNT leadership did **try** to expel the FoD. However, as Balius points out, the *"higher committees order[ed] our expulsion, but this was rejected by the rank and file in the trade union assemblies and at a plenum of FAI groups held in the Casa CNT-FAI."* [quoted by Agustin Guillamon, **Op. Cit.**, p. 73] Thus the CNT leadership could never get their desire ratified by any assembly of unions or FAI groups. Unfortunately, Morrow gets his facts wrong (and also presents a somewhat false impression of the relationship of the CNT leadership and the rank and file).

9. Were the Friends of Durruti influenced by Trotskyists?

Morrow implies that the Bolshevik-Leninists *"established close contacts with the anarchist workers, especially the 'Friends of Durruti'"* [**Op. Cit.**, p. 139] The truth, as usual, is somewhat different.

To prove this we must again turn to Guillamon's work in which he dedicates a chapter to this issue. He brings this chapter by stating:

> *"It requires only a cursory perusal of **El Amigo del Pueblo** or Balius's statements to establish that the Friends of Durruti were never marxists, nor influenced at all by the Trotskyists or the Bolshevik-Leninist Section. But there is a school of historians determined to maintain the opposite and hence the necessity for this chapter."* [**Op. Cit.**, p. 94]

He stresses that the FoD *"were not in any way **beholden** to Spanish Trotskyism is transparent from several documents"* and notes that while the POUM and Trotskyists displayed *"an interest"* in *"bringing the Friends of Durruti under their influence"* this was *"something in which they never succeeded."* [**Op. Cit.**, p. 96 and p. 110]

Pre-May, 1937, Balius himself states that the FoD *"had no contact with the POUM, nor with the Trotskyists."* [**Op. Cit.**, p. 104] Post-May, this had not changed as witness E. Wolf letter to Trotsky in July 1937 which stated that it *"will be impossible to achieve any collaboration with them ... Neither the POUMists nor the Friends would agree to the meeting [to discuss joint action]."* [**Op. Cit.**, pp. 97–8]

In other words, the Friends of Durruti did not establish *"close contacts"* with the Bolshevik-Leninists after the May Days of 1937. While the Bolshevik-Leninists may have wished for such contacts, the FoD did not (they probably remembered their fellow anarchists and workers imprisoned and murdered when Trotsky was in power in Russia). They were, of course, contacts of a limited kind but no influence or significant co-operation. Little wonder Balius stated in 1946 that the *"alleged influence of the POUM or the Trotskyists upon us is untrue."* [quoted, **Op. Cit.**, p. 104]

It is hardly surprising that the FoD were not influenced by Trotskyism. After all, they were well aware of the policies Trotsky introduced when he was in power. Moreover, the program of the Bolshevik-Leninists was similar in rhetoric to the anarchist vision — they differed on the question of whether they actually **meant** *"all power to the working class"* or not (see section 12 and 13). And, of course, the Trotskyists activities during the May Days amounted to little more that demanding that the workers' do what they were already doing (as can be seen from the leaflet they produced — as George Orwell noted, *"it merely demanded what was happening already"* [**Homage to Catalonia**, p. 221]). As usual, the "vanguard of the proletariat" were trying to catch up with the proletariat.

In theory and practice the FoD were miles ahead of the Bolshevik-Leninists — as to be expected, as the FoD were anarchists.

10. What does the Friends of Durruti's programme tell us about Trotskyism?

Morrow states that the FoD's *"slogans included the essential points of a revolutionary program: all power to the working class, and democratic organs of the workers, peasants and combatants, as the expression of the workers' power."* [**Op. Cit.**, p. 133] It is useful to compare Leninism to these points to see if that provides a revolutionary program.

Firstly, as we argue in more detail in section 11, Trotsky abolished the democratic organs of the Red Army. Lenin's rule also saw the elimination of the factory committee movement and its replacement with one-man management appointed from above (see section 17 and Maurice Brinton's **The Bolsheviks and Workers' Control** for details). Both these events occurred before the start of the Russian Civil War in May 1918. Moreover, neither Lenin nor Trotsky considered workers' self-management of production as a key aspects of socialism. On this level, Leninism in power did not constitute a *"revolutionary program."*

Secondly, Leninism does **not** call for *"all power to the working class"* or even *"workers' power"* to manage their own affairs. To quote Trotsky, in an article written in 1937, *"the proletariat can take power only through its vanguard."* The working classes' role is one of supporting the party:

> *"Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power. In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard."* [*"Stalinism and Bolshevism"*, **Writings 1936–7**, p. 426

Thus, rather than the working class as a whole seizing power, it is the *"vanguard"* which takes power — *"a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society."* [**Op. Cit.**, p. 424] So much for "workers' power" — unless you equate that with the "power" to give your power, your control over your own affairs, to a minority who claim to represent you. Indeed, Trotsky even attacks the idea that workers' can achieve power directly via organs of self-management like workers' councils (or soviets):

> *"Those who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [**Op. Cit.**, p. 430]

In other words, the dictatorship of the proletariat is, in fact, expressed by *"the party dictatorship."* In this Trotsky follows Lenin who asserted that:

> *"The very presentation of the question — 'dictatorship of the Party **or** dictatorship of the class, dictatorship (Party) of the leaders **or** dictatorship (Party) of the masses?' — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties... "* [**Left-wing Communism: An Infantile Disorder**, pp. 25–6]

As has been made clear above, the FoD being anarchists aimed for a society of generalised self-management, a system in which working people directly controlled their own affairs and so society. As these words by Lenin and Trotsky indicate they did not aim for such a society, a society based on *"all power to the working class."* Rather, they aimed for a society in which the workers would delegate their power into the hands of a few, the revolutionary party, who would exercise power **on their behalf.** The FoD meant exactly what they said when they argued for *"all power to the working class"* — they did not mean this as a euphemism for party rule. In this they followed Bakunin:

> *"[T]he federated Alliance of all labour associations ... will constitute the Commune ... there will be a federation of the standing barricades and a Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade ... these deputies being invested with binding mandates and accountable and revocable at all times... An appeal will be issued to all provinces, communes and associations inviting them to follow the example set ... [and] to reorganise along revolutionary lines ... and to then delegate deputies to an agreed place of assembly (all of those deputies invested with binding mandates and accountable and subject to recall), in order to found the federation of insurgent associations, communes and provinces . .. Thus it is through the very act of extrapolation and organisation of the Revolution with an eye to the mutual defences of insurgent areas that the ... Revolution, founded upon ... the ruins of States, will emerge triumphant...*
>
> *"Since it is the people which must make the revolution everywhere, and since the ultimate direction of it must at all times be vested in the people organised into a free federation of agricultural and industrial organisations ... being organised from the bottom up through revolutionary delegation ..."* [**No God, No Masters**, vol. 1, pp. 155–6]

And:

> *"Not even as revolutionary transition will we countenance national Conventions, nor Constituent Assemblies, nor provisional governments, nor so-called revolutionary dictatorships: because we are persuaded that revolution s sincere, honest and real only among the masses and that, whenever it is concentrated in the hands of a few governing individuals, it inevitably and immediately turns into reaction."* [**Op. Cit.**, p. 160]

As can be seen, Bakunin's vision is precisely, to use Morrow' words, *"all power to the working class, and democratic organs of the workers, peasants and combatants, as the expression of the*

workers' power." Thus the Friends of Durruti's program is not a *"break"* with anarchism (as we discussed in more detail in section 8) but rather in the tradition started by Bakunin — in other words, an anarchist program. It is Leninism, as can be seen, which rejects this *"revolutionary program"* in favour of all power to the representatives of the working class (i.e. party) which it confuses with the working class as a whole.

Given that Morrow asserts that *"all power to the working class"* was an *"essential"* point of *"a revolutionary program"* we can only conclude that Trotskyism does not provide a revolutionary program — rather it provides a program based, at best, on representative government in which the workers' delegate their power to a minority or, at worse, on party dictatorship **over** the working class (the experience of Bolshevik Russia would suggest the former quickly becomes the latter, and is justified by Bolshevik ideology).

By his own arguments, here as in so many other cases, Morrow indicates that Trotskyism is not a revolutionary movement or theory.

11. Why is Morrow's comments against the militarisation of the Militias ironic?

Morrow denounces the Stalinist militarisation of the militias (their *"campaign for wiping out the internal democratic life of the militias"*) as follows:

> *"The Stalinists early sought to set an 'example' by handing their militias over to government control, helping to institute the salute, supremacy of officers behind the lines, etc...*
>
> *"The example was wasted on the CNT masses ... The POUM reprinted for distribution in the militias the original Red Army Manual of Trotsky, providing for a democratic internal regime and political life in the army."* [**Op. Cit.**, p. 126]

Morrow states that he supported the *"democratic election of soldiers' committees in each unit, centralised in a national election of soldiers' delegates to a national council."* Moreover, he attacks the POUM leadership because it *"**forbade** election of soldiers' committees"* and argued that the *"simple, concrete slogan of elected soldier's committees was the only road for securing proletariat control of the army."* Thus the POUM ensured its *"ten thousand militiamen were controlled bureaucratically by officials appointed by the Central Committee of the party, election of soldiers' committees being expressly forbidden."* [**Op. Cit.**, p. 127, p. 128 and pp. 136–7]

Again, Morrow is correct. A revolutionary working class militia **does** require self-management, the election of delegates, soldiers' councils and so on. Bakunin, for example, argued that the fighters on the barricades would take a role in determining the development of the revolution as the *"Commune will be organised by the standing federation of the Barricades ... composed of one or two delegates from each barricade ... vested with plenary but accountable and removable mandates."* This would complement *"the federative Alliance of all working men's [and women's] associations ... which will constitute the Commune."* [**Michael Bakunin: Selected Writings**, pp. 170–1] That is **exactly** why the CNT militia organised in this fashion (and, we must note, they were only applying the organisational principles of the CNT and FAI — i.e. anarchism — to the militias). The militia columns were organised in a libertarian fashion from the bottom up:

> *"The establishment of war committees is acceptable to all confederal militias. We start from the individual and form groups of ten, which come to accommodations among themselves for small-scale operations. Ten such groups together make up one centuria, which appoints a delegate to represent it. Thirty centurias make up one column, which is directed by a war committee, on which the delegates from the centurias have their say... although every column retains its freedom of action, we arrive at co-ordination of forces, which is not the same thing as unity of command."* [**No Gods, No Masters**, vol. 2, pp. 256–7]

In other words, Morrow is arguing for an **anarchist** solution to the problem of defending the revolution and organising those who were fighting fascism. We say anarchist for good reason. What is ironic about Morrow's comments and description of *"workers' control of the army"* is that these features were **exactly** those eliminated by Trotsky when he created the Red Army in 1918! Indeed, Trotsky acted in **exactly** the same way as Morrow attacks the Stalinists for acting (and they used many of the same arguments as Trotsky did to justify it).

As Maurice Brinton correctly summarises:

> *"Trotsky, appointed Commissar of Military Affairs after Brest-Litovsk, had rapidly been reorganising the Red Army. The death penalty for disobedience under fire had been restored. So, more gradually, had saluting, special forms of address, separate living quarters and other privileges for officers. Democratic forms of organisation, including the election of officers, had been quickly dispensed with."* [**The Bolsheviks and Workers' Control**, p. 37]

He notes that *"[f]or years, Trotskyist literature has denounced these reactionary facets of the Red Army as examples of what happened to it 'under Stalinism.'"* [**Op. Cit.**, p. 37f] This claim was, amazingly enough, also made by Trotsky himself. In 1935 he re-wrote history by arguing that *"[i]n the fire of the cruel struggle [of the Civil War], there could not be even a question of a privileged position for officers: the very word was scrubbed out of the vocabulary."* Only *"after the victories had been won and the passage made to a peaceful situation"* did *"the military apparatus"* try to *"become the most influential and privileged part of the whole bureaucratic apparatus"* with *"the Stalinist bureaucracy ... gradually over the succeeding ten to twelve years"* ensuring for them *"a superior position"* and giving them *"ranks and decorations."* [*"How Did Stalin Defeat the Opposition?,"* **Writings, 1935–36**, pp. 175–6]

In fact, *"ranks and decorations"* and *"superior"* positions were introduced by Trotsky **before** the outbreak of the Civil War in May 1918. Having been responsible for such developments you would think he would remember them!

On March 28th, 1918, Trotsky gave a report to the Moscow City Conference of the Communist Party. In this report he stated that *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree"* and that the Bolsheviks *"fac[ed] the task of creating a regular Army."* Why the change? Simply because the Bolshevik Party held power (*"political power is in the hands of the same working class from whose ranks the Army is recruited"*). [*"Work, Discipline, Order"*, **How the Revolution Armed**, vol. I, pp. 46–7] Of course, power was actually held by the Bolshevik party, not the working class, but never fear:

> *"Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers', Peasants' and Soldiers' Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the* ***appointment*** *of members of the commanding staff by the organs of the Soviet Power."* [*"Work, Discipline, Order,"* **Op. Cit.**, vol. 1, p. 47]

Of course, most workers' are well aware that the administration of a trade union usually works against them during periods of struggle. Indeed, so are most Trotskyists as they often denounce the betrayals by that administration. Thus Trotsky's own analogy indicates the fallacy of his argument. Elected officials do not necessary reflect the interests of those who elected them. That is why anarchists have always supported **delegation** rather than representation combined with decentralisation, strict accountability and the power of instant recall. In a highly centralised system (as created by the Bolsheviks and as exists in most social democratic trade unions) the ability to recall an administration is difficult as it requires the agreement of **all** the people. Thus there are quite a few grounds for fearing the appointment of commanders by the government — no matter which party makes it up.

If, as Morrow argues, the *"simple, concrete slogan of elected soldier's committees was the only road for securing proletariat control of the army"* then Trotsky's regime in the Red Army ensured the defeat of proletarian control of that organisation. The question Morrow raises of who would control the army, the working class or the bourgeois failed to realise the real question — who was to control the army, the working class, the bourgeois or the state bureaucracy. Trotsky ensured that it would be the latter — indeed, the repression of strikes and other working class protest by the Red Army and Cheka under Lenin and Trotsky shows that this was the case (see section H.6.3).

Hence Morrow's own arguments indicate the anti-revolutionary nature of Trotskyism — unless, of course, we decide to look only at what people say and not what they do.

Of course some Trotskyists know what Trotsky actually did when he held power and try and present apologetics for his obvious destruction of soldiers' democracy. One argues that the *"Red Army, more than any other institution of the civil war years, embodied the contradiction between the political consciousness and circumstantial coercion. On the one hand the creation of a Red Army was a retreat: it was a conscripted not a voluntary army; officers were appointed not elected ... But the Red Army was also filled with a magnificent socialist consciousness."* [John Rees, *"In Defence of October"*, **International Socialism**, no. 52, pp. 3–82, p. 46]

This argument is somewhat weak for two reasons.

Firstly, the regressive features of the Red Army appeared **before** the start of the Civil War. It was a political decision to organise in this way, a decision **not justified at the time in terms of circumstantial necessity**. Indeed, far from it (like most of the other Bolshevik policies of the period). Rather it was justified under the rather dubious rationale that workers did not need to fear the actions of a workers' state. Circumstances were not mentioned at all nor was the move considered as a retreat or as a defeat. It was not even considered as a matter of principle.

This perspective was reiterated by Trotsky after the end of the Civil War. Writing in 1922, he argued that:

> *"There was and could be no question of controlling troops by means of elected committees and commanders who were subordinate to these committees and might be replaced at any moment ... [The old army] had carried out a social revolution within itself, casting aside the commanders from the landlord and bourgeois classes and establishing organs of revolutionary self-government, in the shape of the Soviets of Soldiers' Deputies. These organisational and political measures were correct and necessary from the standpoint of breaking up the old army. But a new army capable of fighting could certainly not grow directly out of them ... The attempt made to apply our old organisational methods to the building of a Red Army threatened to undermine it from the very outset ... the system of election could in no way secure competent, suitable and authoritative commanders for the revolutionary army. The Red Army was built from above, in accordance with the principles of the dictatorship of the working class. Commanders were selected and tested by the organs of the Soviet power and the Communist Party. Election of commanders by the units themselves — which were politically ill-educated, being composed of recently mobilised young peasants — would inevitably have been transformed into a game of chance, and would often, in fact, have created favourable circumstances for the machinations of various intriguers and adventurers. Similarly, the revolutionary army, as an army for action and not as an arena of propaganda, was incompatible with a regime of elected committees, which in fact could not but destroy all centralised control."* [*"The Path of the Red Army"*, **How the Revolution Armed**, vol. I, pp. 7–8]

If a *"circumstantial"* factor exists in this rationale, it is the claim that the soldiers were *"politically ill-educated."* However, **every** mass movement or revolution **starts** with those involved being *"politically ill-educated."* The very process of struggle educates them politically. A key part of this radicalisation is practising self-management and self-organisation — in other words, in participating in the decision making process of the struggle, by discussing ideas and actions, by hearing other viewpoints, electing and mandating delegates. To remove this ensures that those involved **remain** *"politically ill-educated"* and, ultimately, incapable of self-government. It also contains the rationale for continuing party dictatorship:

> *"If some people ... have assumed the right to violate everybody's freedom on the pretext of preparing the triumph of freedom, they will always find that the people are not yet sufficiently mature, that the dangers of reaction are ever-present, that the education of the people has not yet been completed. And with these excuses they will seek to perpetuate their own power."* [Errico Malatesta, **Errico Malatesta: His Life and Ideas**, p. 52]

As can be seen from their arguments for party dictatorship, this was a conclusion which Lenin, Trotsky and other leading Bolsheviks **did** draw (see, for example, section 12).

In addition, Trotsky's rationale refutes any claim that Bolshevism is somehow "fundamentally" democratic. The ramifications of it were felt everywhere in the soviet system as the Bolsheviks ignored the "wrong" democratic decisions made by the working masses and replaced their democratic organisations with appointees from above. Indeed, Trotsky admits that the *"Red Army was built from above, in accordance with the principles of the dictatorship of the working class."* [*"The Path of the Red Army"*, **How the Revolution Armed**, vol. I, p. 8] Which means, to state the

obvious, appointment from above, the dismantling of self-government, and so on are *"in accordance with the principles"* of Trotskyism. These comments were not made in the heat of the civil war, but afterward during peacetime. Notice Trotsky admits that a *"social revolution"* had swept through the Tsarist army. His actions, he also admits, reversed that revolution and replaced its organs of *"self-government"* with ones identical to the old regime. When that happens it is usually called by its true name, namely **counter**-revolution.

For a Trotskyist, therefore, to present themselves as a supporter of self-managed militias is the height of hypocrisy. The Stalinists repeated the same arguments used by Trotsky and acted in exactly the same way in their campaign against the CNT and POUM militias. Certain acts have certain ramifications, no matter who does them or under what government. In other words, abolishing democracy in the army will generate autocratic tendencies which will undermine socialistic ones **no matter who does it.** The same means cannot be used to serve different ends as there is an intrinsic relationship between the instruments used and the results obtained — that is why the bourgeoisie do not encourage democracy in the army or the workplace! Just as the capitalist workplace is organised to produce proletarians and capital along with cloth and steel, the capitalist army is organised to protect and reinforce minority power. The army and the capitalist workplace are not simply means or neutral instruments. Rather they are social structures which generate, reinforce and **protect** specific social relations. This is what the Russian masses instinctively realised and conducted a social-revolution in both the army and workplace to **transform** these structures into ones which would enhance rather than crush freedom and working class autonomy. The Bolsheviks reversed these movements in favour of structures which reproduced capitalist social relationships **and justified it in terms of "socialism."** Unfortunately, capitalist means and organisations would only generate capitalist ends.

It was for these reasons that the CNT and its militias were organised from the bottom up in a self-managed way. It was the only way **socialists** and a socialist society could be created — that is why anarchists are anarchists, we recognise that a socialist (i.e. libertarian) society cannot be created by authoritarian organisations. As the justly famous Sonvillier Circular argued *"[h]ow could one expect an egalitarian society to emerge out of an authoritarian organisation? It is impossible."* [quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 61] Just as the capitalist state cannot be utilised by the working class for its own ends, capitalist/statist organisational principles such as appointment, autocratic management, centralisation and delegation of power and so on cannot be utilised for social liberation. They are not designed to be used for that purpose (and, indeed, they were developed in the first place to stop it and enforce minority rule!).

As such, Kropotkin was right to argue that it was *"a tragic error"* to think that *"the old organisation, slowly developed in the course of history to crush freedom, to crush the individual, to establish oppression on a legal basis, to create monopolists, to lead minds astray by accustoming them to servitude — will lend itself perfectly to new functions: that it will become the instrument, the framework, to germinate a new life, to establish freedom and equality on economic foundations, to eradicate monopolies, to awaken society and march to the conquest of a future of freedom and equality!"* [**Modern Science and Anarchy**, p. 275]

In addition, to abolish democracy on the pretext that people are not ready for it ensures that it will never exist. Anarchists, in contrast, argue that *"[o]nly freedom or the struggle for freedom can be the school for freedom."* [Malatesta, **Op. Cit.**, p. 59]

Secondly, how can a *"socialist consciousness"* be encouraged, or continue to exist, without socialist institutions to express it? Such a position is idealistic nonsense, expressing the wishful notion that the social relationships people experiences does not impact on those involved. In effect, Rees is arguing that as long as the leaders have the "right ideas" it does not matter how an organisation is structured. However, how people develop, the ideas they have in their heads, are influenced by the relations they create with each other — autocratic organisations do not encourage self-management or socialism, they produce bureaucrats and subjects.

An autocratic organisation **cannot** encourage a socialist consciousness by its institutional life, only in spite of it. For example, the capitalist workplace encourages a spirit of revolt and solidarity in those subject to its hierarchical management and this is expressed in direct action — by **resisting** the authority of the boss. It only generates a socialist perspective via resistance to it. Similarly with the Red Army. Education programs to encourage reading and writing does not generate socialists, it generates soldiers who are literate. If these soldiers do not have the institutional means to manage their own affairs, a forum to discuss political and social issues, then they remain order takers and any socialist conscious will wither and die.

The Red Army was based on the fallacy that the structure of an organisation is unimportant and it is the politics of those in charge that matter (Marxists make a similar claim for the state, so we should not be too surprised). However, it is no co-incidence that bourgeois structures are always hierarchical — self-management is a politically educational experience which erodes the power of those in charge and transforms those who do it. It is to stop this development, to protect the power of the ruling few, that the bourgeois always turn to centralised, hierarchical structures — they reinforce elite rule. You cannot use the same form of organisation and expect different results — they are designed that way for a reason! To twitter on about the Red Army being *"filled with a magnificent socialist consciousness"* while justifying the elimination of the only means by which that consciousness could survive, prosper and grow indicates a complete lack of socialist politics and any understanding of materialist philosophy.

Moreover, one of the basic principles of the anarchist militia was equality between all members. Delegates received the same pay, ate the same food, wore the same clothes as the rest of the unit. Not so in the Red Army. Trotsky thought, when he was in charge of it, that inequality was *"in some cases ... quite explicable and unavoidable"* and that *"[e]very Red Army warrior fully accepts that the commander of his unit should enjoy certain privileges as regards lodging, means of transport and even uniform."* [*"More Equality!"*, **How the Revolution Armed**, vol II, p. 116]

Of course, Trotsky would think that, being the head commander of the Army. Unfortunately, because soldier democracy had been abolished by decree, we have no idea whether the rank and file of the Red Army agreed with him. For Trotsky, privilege *"is, in itself, in certain cases, inevitable"* but *"[o]stentatious **indulgence** in privilege is not just evil, it is a crime."* Hence his desire for *"more"* equality rather than equality — to aim for *"eliminating the most abnormal [!] phenomena, softening [!] the inequality that exists"* rather than abolish it as they did in the CNT militias. [**Op. Cit.**, p. 117 and p. 119]

But, of course, such inequalities that existed in the Red Army are to be expected in an autocratically run organisation. The inequality inherent in hierarchy, the inequality in power between the order giver and order taker, will, sooner or later, be reflected in material inequality. As happened in the Red Army (and all across the "workers' state"). All Trotsky wanted was for those in power to be respectable in their privilege rather than showing it off. The anarchist militias

did not have this problem because being libertarian, delegates were subject to recall and power rested with the rank and file, **not** an elected government.

As another irony of history, Morrow quotes a Bolshevik-Leninist leaflet (which *"points the road"*) as demanding *"[e]qual pay for officers and soldiers."* [**Op. Cit.**, p. 191] Obviously these good Trotskyists had no idea what their hero actually wrote on this subject or did when in power. We have to wonder how long their egalitarian demands would have survived once they had acquired power — if the experience of Trotsky in power is anything to go by, not very long.

Trotsky did not consider how the abolition of democracy and its replacement with an autocratic system would effect the morale or consciousness of the soldiers subject to it. He argued that in the Red Army *"the **best** soldier does not mean at all the **most submissive and uncomplaining.**"* Rather, *"the best soldier will nearly always be sharper, more observant and critical than the others... by his critical comments, based on facts accessible to all, he will pretty often undermine the prestige of the commanders and commissars in the eyes of the mass of the soldiers."* However, not having a democratic army the soldiers could hardly express their opinion other than rebellion or by indiscipline. Trotsky, however, adds a comment that makes his praise of critical soldiers seem less than sincere. He states that *"counter-revolutionary elements, agents of the enemy, make conscious and skilful use of the circumstances I have mentioned [presumably excessive privilege rather than critical soldiers, but who can tell] in order to stir up discontent and intensify antagonism between rank and file and the commanding personnel."* [**Op. Cit.**, p. 118] The question, of course, arises of who can tell the difference between a critical soldier and a *"counter-revolutionary element"*? Without a democratic organisation, soldier are dependent (as in any other hierarchy) on the power of the commanders, commissars and, in the Red Army, the Bolshevik Secret Police (the Cheka). In other words, members of the very class of autocrats their comments are directed against.

Without democratic organisation, the Red Army could never be a means for creating a socialist society, only a means of reproducing autocratic organisation. The influence of the autocratic organisation created by Trotsky had a massive impact on the development of the Soviet State. According to Trotsky himself:

> *"The demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war. Thus on all sides the masses were pushed away gradually from actual participation in the leadership of the country."* [**The Revolution Betrayed**, p. 90]

Obviously Trotsky had forgotten who created the regime in the Red Army in the first place! He also seems to have forgotten that after militarising the Red Army, he turned his power to militarising workers (starting with the railway workers). He also forgets that Lenin had been arguing that workers' must *"**unquestioningly obey the single will** of the leaders of labour"* from April 1918 along with granting *"individual executives dictatorial power (or 'unlimited' powers)"* and that *"the appointment of individuals, dictators with unlimited powers"* was, in fact, *"in general compatible with the fundamental principles of Soviet government"* simply because *"the history of revolutionary movements"* had *"shown"* that *"the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes."* He notes that

"[u]ndoubtably, the dictatorship of individuals was compatible with bourgeois democracy." [*"The Immediate Tasks of the Soviet Government"*, **Collected Works**, vol. 27, pp. 267–9]

In other words, Lenin urged the creation of, and implemented, **bourgeois** forms of workplace management based on the appointment of managers from above. To indicate that this was not in contradiction with Soviet principles, he points to the example of **bourgeois** revolutions! As if bourgeois methods do not reflect bourgeois interests and goals. In addition, these *"dictators"* were given the same autocratic powers Trotsky claimed the demobilisation of the Red Army four years later had *"persistently introduced everywhere."* Yes, *"on all sides the masses were pushed away gradually from actual participation in the leadership of the country"* but the process had started immediately after the October Revolution and was urged and organised by Lenin and Trotsky before the Civil War had started.

Lenin's support for appointment of (*"dictatorial"*) managers from above makes Trotsky's 1922 comment that the *"Red Army was built from above, in accordance with the principles of the dictatorship of the working class"* take on a new light. [*"The Path of the Red Army"*, **How the Revolution Armed**, vol. I, p. 8] After all, Lenin argued for an economy system built from above via the appointment of managers before the start of the Civil War. The Red Army was created from above via the appointment of officers before the start of the Civil War. Things had certainly changed since Lenin had argued in **The State and Revolution** that *"[a]ll officials, without exception, [would be] elected and subject to recall* ***at any time.***" This would *"serve as the bridge between capitalism and socialism."* [**The Essential Lenin**, p. 302] One major difference, given Trotsky's rationales, seems to be that the Bolsheviks were now in power and so election and recall without exception could be forgotten and replaced by appointment.

In summary, Trotsky's argument against functional democracy in the Red Army could, and was, used to justify the suppression of any democratic decision or organisation of the working class the Bolshevik government disapproved of. He used the same argument, for example, to justify the undermining of the Factory Committee movement and the struggle for workers' control in favour of one-man management — the form of management in the workplace was irrelevant as the workers' were now citizens of a workers' state and under a workers' government (see section 17). Needless to say, a state which eliminates functional democracy in the grassroots will not stay democratic for long (and to remain the sovereign power in society, any state will have to eliminate it or, at the very least, bring it under central control — as institutionalised in the USSR constitution of 1918).

Instead of seeing socialism as a product of free association, of working class self-organisation from the bottom up by self-managed organisations, Trotsky saw it as a centralised, top-down system. Of course, being a democrat of sorts he saw the Bolshevik Government as being elected by the mass of the population (or, more correctly, he saw it being elected by the national congress of soviets). However, his vision of centralisation of power provided the rationale for destroying functional democracy in the grass-roots — and without healthy roots, any plant will wither and die. Little wonder, then, that the Bolshevik experiment proved such a disaster — yes, the civil war did not help but the logic of Bolshevism has started to undermine working class self-management **before** is started.

Thus Trotsky's argument that the democratic nature of a workers' army or militia is irrelevant because a "workers' state" exists is flawed on many different levels. And the experience of Trotsky in power indicates well the poverty of Trotskyism and Morrow's criticism of the CNT — his

suggestion for a self-managed militia is pure anarchism with nothing to do with Leninism and the experience of Bolshevism in power.

12. What is ironic about Morrow's vision of revolution?

Equally ironic as Morrow's comments concerning democratic militias (see last section) is his argument that the revolution needed to *"give the factory committees, militia committees, peasant committees, a democratic character, by having them elected by all workers in each unit; to bring together these elected delegates in village, city, regional councils ... [and] a national congress."* [**Op. Cit.**, p. 100]

Such a position is correct, such developments were required to ensure the success of the revolution. However, it is somewhat ironic that a Trotskyist would present them as somehow being opposed to anarchism when, in fact, they are pure anarchism. Indeed, anarchists were arguing in favour of workers' councils more than five decades before Lenin discovered the importance of the Russian Soviets in 1917. Moreover, as we will indicate, what is even more ironic is the fact that Trotskyism does not actually see these organs as an expression of working class self-management and power but rather as a means of the party to take power. In addition, we must also note that it was Lenin and Trotsky who helped undermine the Russian workers' factory committees, militia committees and so on in favour of party rule. We will discuss each of these ironies in turn.

Firstly, as noted, such Morrow's stated position is exactly what Bakunin and the anarchist movement had been arguing since the 1860s. To quote Bakunin:

> *"the federative alliance of all working men's associations ... constitute the Commune ... all provinces, communes and associations . .. by first **reorganising** on revolutionary lines ... [will] constitute the federation of insurgent associations, communes and provinces ... [and] organise a revolutionary force capable defeating reaction ... [and for] self-defence ... [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation... "* [**Michael Bakunin: Selected Writings**, p. 170–2]
>
> *"The future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal."* [**Op. Cit.**, p. 206]

Here is Kropotkin presenting the same vision:

> *"what means can the State provide to abolish this [class] monopoly that the working class could not find in its own strength and groups? ... what advantages could the State provide for abolishing these same privileges? Could its governmental machine, developed for the creation and upholding of these privileges, now be used to abolish them? Would not the new function require new organs? And these new organs would they not have to be created by the workers themselves, in **their** unions, **their** federations, completely outside the State? ... independent Communes for the **territorial** groupings,*

> *and vast federations of trade unions for groupings* ***by functions*** *— the two interwoven and providing support to each to meet the needs of society — ... groupings* ***by personal affinities*** *... allow the satisfaction of all social needs: consumption, production and exchange, communications, sanitary arrangements, education, mutual protection against aggression, mutual aid, territorial defence"* [**Modern Science and Anarchy**, pp. 164–5]
>
> *"the complete independence of the Communes, the Federation of free communes and the social revolution in the communes, that is to say the formation of associated productive groups in place of the state organisation."* [quoted by Camillo Berneri, *"Peter Kropotkin: His Federalist Ideas"*, pp. 268–282, **The Raven**, Vol. 8, No. 2, p. 275]

Bakunin also mentions that those defending the revolution would have a say in the revolutionary structure — the *"Commune will be organised by the standing federation of the Barricades and by the creation of a Revolutionary Council composed of ... delegates from each barricade . .. vested with plenary but accountable and removable mandates."* [**Op. Cit.**, p. 171] This obviously parallels the democratic nature of the CNT militias.

Interestingly enough, Marx commented that *"odd barricades, these barricades of the Alliance [Bakunin's anarchist organisation], where instead of fighting they spend their time writing mandates."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 111] Obviously the importance of militia self-management was as lost on him as it was on Lenin and Trotsky — under Marx's state would its defenders just be cannon-fodder, obeying their government and officers without the ability to help determine the revolution they were fighting for? Apparently so. Moreover, Marx quotes Bakunin's support for *"responsible and recallable delegates, vested with their imperative mandates"* without commenting on the fact Bakunin **predicts** those features of the Paris Commune Marx praised in his **Civil War in France** by a number of years. Looks like Morrow is not the first Marxist to appropriate anarchist ideas without crediting their source.

As can be seen, Morrow's suggestion on how to push the Spanish Revolution forward just repeats the ideas of anarchism. Any one familiar with anarchist theory would not be surprised by this as they would know that we have seen a free federation of workplace and communal associations as the basis of a revolution and, therefore, a free society since the time of Proudhon. Thus Morrow's "Trotskyist" vision of a federation of workers' council actually reproduces basic anarchist ideas, ideas which pre-date Lenin's support for soviets as the basis of his "workers' state" by over half a century (we will indicate the fundamental difference between the anarchist vision and the Trotskyist in due course).

As an aside, and as we noted in section H.1.4, these quotes by Bakunin and Kropotkin make a mockery of Lenin's assertion that anarchists do not analysis *"**what** to put in the place of what has been destroyed [i.e. the old state machine] and **how**"* [**Essential Works of Lenin**, p. 362] Anarchists have always suggested a clear answer to what we should *"replace"* the state with — namely free federations of working class organisations created in the struggle against capital and state. To state otherwise is to either be ignorant of anarchist theory or seek to deceive.

Some anarchists like Bakunin and the anarcho-syndicalists and collectivists saw these organisations being based primarily on libertarian labour unions complemented by whatever organisations were created in the process of revolution (*"The future society must be nothing else than the universalisation of the organisation that the International has formed for itself" — "The Sonvillier Circular"* echoing Bakunin, quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p.

61] Others like Kropotkin and anarcho-communists saw it as a free federation of organisations created by the process of revolution itself. While anarchists did not present a blueprint of what would occur after the revolution (and rightly so) they did provide a general outline in terms of a decentralised, free federation of self-managed workers' associations as well as linking these future forms of working class self-government with the forms generated in the current class struggle in the here and now.

Similarly, Lenin's other assertion that anarchists do not study *"the **concrete** lessons of previous proletarian revolutions"* [**Ibid.**] is equally baseless, as any one reading, say, Kropotkin's work would soon realise (for example, **The Great French Revolution**, **Modern Science and Anarchy** or his pamphlet *"Revolutionary Government"*). Starting with Bakunin, anarchists analysed the experiences of the Paris Commune and the class struggle itself to generalise political conclusions from them (for example, the vision of a free society as a federation of workers' associations is clearly a product of analysing the class struggle and looking at the failures of the Commune). Given that Lenin states in the same work that *"anarchists had tried to claim the Paris Commune as their 'own'"* [p. 350] suggests that anarchists **had** studied the Paris Commune and he was aware of that fact. Of course, Lenin states that we had *"failed to give ... a true solution"* to its lessons — given that the solution anarchists proposed was a federation of workers councils to smash the state and defend the revolution his comments seem strange as this, according to **The State and Revolution**, is the "Marxist" solution as well (in fact, as we will soon see, Lenin played lip service to this and instead saw the solution as government by his party rather than the masses as a whole).

Thus, Morrow's vision of what was required for a successful revolution parallels that of anarchism. We shall now discuss where and how they differ.

The essential difference between the anarchist and Trotskyist vision of workers' councils as the basis of a revolution is what role these councils should play. For anarchists, these federations of self-managed assemblies is the actual framework of the revolution (and the free society it is trying to create). As Murray Bookchin puts it:

> *"There can be no separation of the revolutionary process from the revolutionary goal. **A society based on self-administration must be achieved by means of self-administration** ... Assembly and community must arise from within the revolutionary process itself; indeed, the revolutionary process must **be** the formation of assembly and community, and with it, the destruction of power. Assembly and community must become 'fighting words,' not distinct panaceas. They must be created as **modes of struggle** against the existing society, not as theoretical or programmatic abstractions... The factory committees .. . must be managed directly by workers' assemblies in the factories... neighbourhood committees, councils and boards must be rooted completely in the neighbourhood assemble. They must be answerable at every point to the assembly, they and their work must be under continual review by the assembly; and finally, their members must be subject to immediate recall by the assembly. The specific gravity of society, in short, must be shifted to its base — the armed people in permanent assembly."* [**Post-Scarcity Anarchism**, pp. 167–9]

Thus the anarchist social revolution sees workers' councils as organs of working class self-management, the means by which they control their own lives and create a new society based

on their needs, visions, dreams and hopes. They are not seen as means by which others, the revolutionary party, seized power **on behalf** of the people as Trotskyists do.

Harsh words? No, as can be seen from Morrow who is quite clear on the role of working class organisation — it is seen purely as the means by which the party can take power. As he argues, there is *"no magic in the soviet form: it is merely the most accurate, most quickly reflecting and responsively changing form of political representation of the masses.. . It would provide the arena in which the revolutionary party can win the support of the working class."* [**Op. Cit.**, p. 136]

He states that initially the *"reformist majority in the executive committee would decline the assumption of state power. But the workers could still find in the soviets their natural organs of struggle until the genuinely revolutionary elements in the various parties banded together to win a revolutionary majority in the congress and establish a workers' state."* In other words, the *"workers' state, the dictatorship of the proletariat ... can only be brought into existence by the direct, **political** intervention of the masses, through the factory and village councils (soviets) at that point where a majority in the soviets is wielded by the workers' party or parties which are determined to overthrow the bourgeois state. Such was the basic theoretical contribution of Lenin."* [**Op. Cit.**, p. 100 and p. 113]

From an anarchist perspective, this indicates well the fundamental difference between anarchism and Trotskyism. For anarchists, the existence of an *"executive committee"* indicates that the workers' council do not, in fact, have power in society — rather it is the minority in the executive committee who have been delegated power. Rather than govern themselves and society directly, workers are turned into voters implementing the decisions their leaders have made on their behalf. If revolutionary bodies like workers' councils **did** create a "workers' state" (as Morrow recommends) then their power would be transferred and centralised into the hands of a so-called "revolutionary" government. In this, Morrow follows his guru Trotsky:

> *"the proletariat can take power only through its vanguard. In itself the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity. In the revolutionary vanguard, organised in a party, is crystallised the aspirations of the masses to obtain their freedom. Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.*
>
> *"In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard."* [Trotsky, *"Stalinism and Bolshevism,"* **Writings 1936–37**, p. 426]

Thus, rather than the working class as a whole "seizing power", it is the **vanguard** which takes power — *"a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society."* [**Op. Cit.**, p. 424] He mocks the anarchist idea that a socialist revolution should be based on the self-management of workers within their own autonomous class organisations:

> *"Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [Trotsky, **Op. Cit.**, p. 430]

In this he followed comments made when he was in power. In 1920 he argued that *"[w]e have more than once been accused of having substituted for the dictatorships of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only be means of the dictatorship of the party. It is thanks to the ... party ... [that] the Soviets ... [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class these is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class."* [**Terrorism and Communism**, p. 109] Any claims that Trotsky's infamously authoritarian (indeed dictatorial) politics were a temporary aberration caused by the necessities of the Russian Civil War are refuted by these quotes — 17 years later he was still arguing the same point.

He had the same vision of party dictatorship being the basis of a revolution in 1924. Commenting on the Bolshevik Party conference of April 1917, he states that *"whole of ... Conference was devoted to the following fundamental question: Are we heading toward the conquest of power in the name of the socialist revolution or are we helping (anybody and everybody) to complete the democratic revolution? ... Lenin's position was this: ... the capture of the soviet majority; the overthrow of the Provisional Government; the seizure of power through the soviets."* Note, **through** the soviets not **by** the soviets thus indicating the fact the Party would hold the real power, not the soviets of workers' delegates. Moreover, he states that *"to prepare the insurrection and to carry it out under cover of preparing for the Second Soviet Congress and under the slogan of defending it, was of inestimable advantage to us."* He continued by noting that it was *"one thing to prepare an armed insurrection under the naked slogan of the seizure of power by the party, and quite another thing to prepare and then carry out an insurrection under the slogan of defending the rights of the Congress of Soviets."* The Soviet Congress just provided *"the legal cover"* for the Bolshevik plans rather than a desire to see the Soviets actually start managing society. [**The Lessons of October**, p. 134, p. 158 and p. 161]

We are not denying that Trotskyists do aim to gain a majority within working class conferences. That is clear. Anarchists also seek to gain the support of the mass of the population. It is what they do next that counts. Trotskyists seek to create a government above these organisations and dominate the executive committees that requires. Thus power in society shifts to the top, to the leaders of the centralised party in charge of the centralised state. The workers' become mere electors rather than actual controllers of the revolution. Anarchists, in contrast, seek to dissolve power back into the hands of society and empower the individual by giving them a direct say in the revolution through their workplace, community and militia assemblies and their councils and conferences.

Trotskyists, therefore, advocate workers councils because they see them as **the** means the vanguard party can take power. Rather than seeing socialism or "workers' power" as a society in which everyone would directly control their own affairs, Trotskyists see it in terms of working class people delegating their power into the hands of a government. Needless to say, the two things are not identical and, in practice, the government soon turns from being the people's servant into its master.

It is clear that Morrow always discusses workers councils in terms of the strategy and program of the party, not the value that workers councils have as organs of direct workers control of society. He clearly advocates workers councils because he sees them as the best way for the vanguard party to rally workers around its leadership and organise the seizure of state power.

At no time does he see then as means by which working class people can govern themselves directly — quite the reverse.

The danger of such an approach is obvious. The government will soon become isolated from the mass of the population and, due to the centralised nature of the state, difficult to hold accountable. Moreover, given the dominant role of the party in the new state and the perspective that it is the workers' vanguard, it becomes increasingly likely that it will place its power before that of those it claims to represent.

Certainly Trotsky's role in the Russian revolution tells us that the power of the party was more important to him than democratic control by workers through mass bodies. When the workers and sailors of the Kronstadt navy base rebelled in 1921, in solidarity with striking workers in Petrograd, they were demanding freedom of the press for socialist and anarchist groups and new elections to the soviets. But the reaction of the Bolshevik leadership was to crush the Kronstadt dissent in blood. Trotsky's attitude towards workers democracy was clearly expressed at the time:

> *"They [the dissent Bolsheviks of the Workers' Opposition] have placed the workers' right to elect representatives above the Party. As if the Party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the worker's democracy!"*

He spoke of the *"revolutionary historic birthright of the Party"* and that it *"is obliged to maintain its dictatorship ... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every given moment on the formal principle of a workers' democracy."* [quoted by M. Brinton, **Op. Cit.**, p. 78]

This perspective naturally follows from Trotsky's vanguardist politics. For Leninists, the party is the bearer of *"socialist consciousness"* and, according to Lenin in **What is to be Done?**, workers, by their own efforts, can only achieve a *"trade union"* consciousness and, indeed, *"there can be no talk of an independent ideology being developed by the masses of workers in the process of their struggle"* and so *"**the only choice is**: either bourgeois or socialist ideology"* (the later being developed not by workers but by the *"bourgeois intelligentsia"*). [**Essential Works of Lenin**, p. 82 and p. 74] To weaken or question the party means to weaken or question the socialist nature of the revolution and so weaken the *"dictatorship of the proletariat."* Thus we have the paradoxical situation of the "proletarian dictatorship" repressing workers, eliminating democracy and maintaining itself against the *"passing moods"* of the workers (which means rejecting what democracy is all about). Hence Lenin's comment at a conference of the Cheka (his political police) in 1920:

> *"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves."* [**Collected Works**, vol. 42, p. 170]

Significantly, of the 17 000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40 913 prisoners held in December 1921 (of whom 44% had been committed by

the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants of workers. [George Leggett, **The Cheka: Lenin's Political Police**, p. 178] Needless to say, Lenin failed to mention this aspect of his system in **The State and Revolution** (a failure shared by Morrow and later Trotskyists — see section H.1.7).

It is hard to combine these facts and Lenin's and Trotsky's comments with the claim that the "workers' state" is an instrument of class rule – after all, Lenin is acknowledging that coercion will be exercised against members of the working class as well. The question of course arises — who decides what a *"wavering"* or *"unstable"* element is? Given their comments on the role of the party and the need for the party to assume power, it will mean in practice whoever rejects the government's decisions (for example, strikers, local soviets who reject central decrees and instructions, workers who vote for anarchists or parties other than the Bolshevik party in elections to soviets, unions and so on, socialists and anarchists, etc.). Given a hierarchical system, Lenin's comment is simply a justification for state repression of its enemies (including elements within or even the whole working class).

It could be argued, however, that workers could use the soviets to recall the government. However, this fails for two reasons (we will ignore the question of the interests of the bureaucratic machine which will inevitably surround a centralised body — see section H.3.9 for further discussion).

Firstly, the Leninist state will be highly centralised, with power flowing from the top-down. This means that in order to revoke the government, all the soviets in all parts of the country must, at the same time, recall their delegates and organise a national congress of soviets (which, we stress, is not in permanent session). The local soviets are bound to carry out the commands of the central government (to quote the Soviet constitution of 1918 — they are to *"carry out all orders of the respective higher organs of the soviet power"*). Any independence on their part would be considered *"wavering"* or an expression of *"unstable"* natures and so subject to *"revolutionary coercion"*. In a highly centralised system, the means of accountability is reduced to the usual bourgeois level — vote in the general election every few years (which, in any case, can be annulled by the government to ensure that the soviets do not go back into the *"mud"* via the *"passing moods"* caused by the *"insufficient cultural level of the masses"*). In other words, the soviet form may be the *"most accurate, most quickly reflecting and responsively changing form of political representation of the masses"* (to use Morrow's words) but only **before** they become transformed into state organs.

Secondly, *"revolutionary coercion"* against *"wavering"* elements does not happen in isolation. It will encourage critical workers to keep quiet in case they, too, are deemed *"unstable"* and become subject to *"revolutionary"* coercion. As a government policy it can have no other effect than deterring democracy.

Thus Trotskyist politics provides the rationale for eliminating even the limited role of soviets for electing representatives they hold in that ideology.

Morrow argues that *"[o]ne must never forget ... that soviets **do not begin** as organs of state power"* rather they start as *"organs defending the workers' daily interests"* and include *"powerful strike committees."* [**Op. Cit.**, p. 136] That is true, initially workers' councils are expressions of working class power and are organs of working class self-management and self-activity. They are subject to direct control from below and unite from the bottom up. However, once they are turned into *"organs of state power"* their role (to re-quote the Soviet constitution of 1918) becomes that of *"carry[ing] out all orders of the respective higher organs of the soviet power."* Soviet power

is replaced by party power and they become a shell of their former selves — essentially rubber-stamps for the decisions of the party central committee.

Ironically, Morrow quotes the main theoretician of the Spanish Socialist Party as stating *"the organ of the proletarian dictatorship will be the Socialist Party"* and states that they *"were saying precisely what the anarchist leaders had been accusing both communists and revolutionary socialists of meaning by the proletarian dictatorship."* [**Op. Cit.**, p. 99 and p. 100] This is hardly surprising, as this was what the likes of Lenin and Trotsky **had** been arguing. As well as the quotes we have provided above, we may add Trotsky's comment that the *"fundamental instrument of proletarian revolution is the party."* [**Lessons of October**, p. 118] And the resolution of the Second World Congress of the Communist International which stated that *"[e]very class struggle is a political struggle. The goal of this struggle ... is the conquest of political power. Political power cannot be seized, organised and operated except through a political party."* [cited by Duncan Hallas, **The Comintern**, p. 35] In addition, we may quote Lenin's opinion that:

> *"The very presentation of the question — 'dictatorship of the Party **or** dictatorship of the class, dictatorship (Party) of the leaders **or** dictatorship (Party) of the masses?' — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties... "*

And:

> *"To go so far in this matter as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid."* [**Left-wing Communism: An Infantile Disorder**, pp. 25–6 and p. 27]

As Lenin and Trotsky constantly argued, proletarian dictatorship was impossible without the political party of the workers (whatever its name). Indeed, to even discuss any difference between the dictatorship of the class and that of the party just indicated a confused mind. Hence Morrow's comments are incredulous, particularly as he himself stresses that the soviet form is useful purely as a means of gaining support for the revolutionary party which would take over the executive of the workers' councils. He clearly is aware that the party is the **essential** organ of proletarian rule from a Leninist perspective — without the dictatorship of the party, Trotsky argues, the soviets fall back into the mud. Trotsky, indeed, stressed this need for the dictatorship of the party rather than of the proletariat in a letter written in 1937:

> *"The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history... The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution .. . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from*

> *the circumstance that capitalism does not permit the material and the moral development of the masses."* [Trotsky, **Writings 1936–37**, pp. 513–4]

The net result of Bolshevik politics in Russia was that Lenin and Trotsky undermined the self-management of working class bodies during the Russian Revolution and **before** the Civil War started in May 1918. We have already chronicled Trotsky's elimination of democracy and equality in the Red Army (see section 11). A similar fate befell the factory committees (see section 17) and soviet democracy (as noted above). The logic of Bolshevism is such that at no point did Lenin describe the suppression of soviet democracy and workers' control as a defeat (indeed, as far as workers' control went Lenin quickly moved to a position favouring one-man management). We discuss the Russian Revolution in more detail in section H.6 and so will not do so here.

All in all, while Morrow's rhetoric on the nature of the social revolution may sound anarchist, there are important differences between the two visions. While Trotskyists support workers' councils on purely instrumentalist grounds as the best means of gaining support for their party's assumption of governmental power, anarchists see workers' councils as the means by which people can revolutionise society and themselves by practising self-management in all aspects of their lives. The difference is important and its ramifications signify why the Russian Revolution became the "dictatorship **over** the proletariat" Bakunin predicted. His words still ring true:

> *"[b]y popular government they [the Marxists] mean government of the people by a small under of representatives elected by the people... [That is,] government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of **former** workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers' world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people."* [**Statism and Anarchy**, p. 178]

It was for this reason that he argued the anarchists do *"not accept, even in the process of revolutionary transition, either constituent assemblies, provisional governments or so-called revolutionary dictatorships; because we are convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction."* [**Michael Bakunin: Selected Writings**, p. 237] The history of the Russian Revolution proved him right. Hence anarchist support for popular assemblies and federations of workers' councils as the framework of the social revolution rather than as a means to elect a "revolutionary" government.

One last point. We must point out that Morrow's follows Lenin in favouring executive committees associated with workers' councils. In this he actually ignores Marx's (and Lenin's, in **State and Revolution**) comments that the Paris Commune was *"to be a working, not a parliamentary, body, executive and legislative at the same time."* [**Selected Writings**, p. 287] The existence of executive committees was coded into the Soviet Union's 1918 Constitution. This suggests two things. Firstly, Leninism and Trotskyism differ on fundamental points with Marx and so the claim that Leninism equals Marxism is difficult to support (the existence of libertarian Marxists like Anton Pannekoek and other council communists also disprove such claims). Secondly, it indicates that Lenin's claims in **State and Revolution** were ignored once the Bolsheviks took power so indicating that use of that work to prove the democratic nature of Bolshevism is flawed).

Moreover, Marx's support of the fusion of executive and legislative powers is not as revolutionary as some imagine. For anarchists, as Bookchin argues, *"[i]n point of fact, the consolidation of 'executive and legislative' functions in a single body was regressive. It simply identified the process of policy-making, a function that rightly should belong to the people in assembly, with the technical execution of these policies, a function that should be left to strictly administrative bodies subject to rotation, recall, limitations of tenure ... Accordingly, the melding of policy formation with administration placed the institutional emphasis of classical [Marxist] socialism on centralised bodies, indeed, by an ironical twist of historical events, bestowing the privilege of formulating policy on the 'higher bodies' of socialist hierarchies and their execution precisely on the more popular 'revolutionary committees' below."* [**Toward an Ecological Society**, pp. 215–6]

13. Why do anarchists reject the Marxist "workers' state"?

Morrow asserts two *"fundamental"* tenets of *"anarchism"* in his book [**Op. Cit.**, pp. 101–2]. Unfortunately for him, his claims are somewhat at odds with reality. Anarchism, as we will prove in section 14, does not hold one of the positions Morrow states it does. The first *"tenet"* of anarchism he fails to discuss at all and so the reader cannot understand **why** anarchists think as they do. We discuss this *"tenet"* here.

The first tenet is that anarchism *"has consistently refused to recognise the distinction between a bourgeois and a workers' state. Even in the days of Lenin and Trotsky, anarchism denounced the Soviet Union as an exploiters' regime."* [**Op. Cit.**, p. 101] It is due to this, he argues, the CNT co-operated with the bourgeois state:

> *"The false anarchist teachings on the nature of the state ... should logically have led them [the CNT] to refuse governmental participation in any event ... the anarchists were in the intolerable position of objecting to the necessary administrative co-ordination and centralisation of the work they had already begun. Their anti-statism 'as such' had to be thrown off. What **did** remain, to wreck disaster in the end, was their failure to recognise the distinction between a workers' and a bourgeois state."* [**Op. Cit.**, p. 101]

Needless to say, Morrow does not bother to explain **why** anarchists consider the bourgeois and workers' state to be similar. If he did then perhaps his readers would agree with the anarchists on this matter. However, before discussing that we have to address a misrepresentation of Morrow's. Rather than the expression of anarchist politics, the actions of the CNT were in direct opposition to them. As we showed in the section 12, anarchists see a social revolution in terms of creating federations of workers associations (i.e. workers' councils). It was this vision that had created the structure of the CNT (as Bakunin had argued, *"the organisation of the trade sections and their representation in the Chambers of Labour ... bear in themselves the living seeds of the new society which is to replace the old one. They are creating not only the ideas, but also the facts of the future itself"* [**Bakunin on Anarchism**, p. 255]).

Thus, the social revolution would see the workers' organisation (be they labour unions or spontaneously created organs) *"tak[ing] the revolution into its own hands ... an earnest international organisation of workers' associations ... [would] replac[e] this departing political world of States and bourgeoisie."* [**The Basic Bakunin**, p. 110] This is **precisely** what the CNT did not do — rather it decided against following anarchist theory and instead decided to co-operate with other parties

and unions in the *"Central Committee of Anti-Fascist Militias"* (at least temporarily until the CNT stronghold in Saragossa was liberated by CNT militias). In effect, it created a UGT-like "Alliance" with other anti-fascist parties and unions and rejected its pre-war policy of "unity from below." The CNT and FAI leadership decided not to talk of libertarian communism but only of the fight against fascism. A greater mistake they could not have made.

An anarchist approach in the aftermath of the fascist uprising would have meant replacing the Generalitat with a federal assembly of delegates from workplace and local community assemblies (a Defence Council, to use a CNT expression). Only popular assemblies (not political parties) would be represented (parties would have an influence only in proportion to their influence in the basic assemblies). All the CNT would have had do was to call a Regional Congress of unions and invite the UGT, independent unions and unorganised workplaces to send delegates to create the framework of this system. This, we must stress, was **not** done. We will discuss why in section 20 and so will refrain from doing so here. However, **because** the CNT in effect "postponed" the political aspects of the social revolution (namely, to quote Kropotkin, to *"smash the State and replace it with the Federation [of Communes]"* [**No Gods, No Masters**, vol. 1, p. 259]) the natural result would be exactly as Morrow explains:

> *"But isn't it a far cry from the failure to create the organs to overthrow the bourgeoisie, to the acceptance of the role of class collaboration with the bourgeoisie? Not at all ... Without developing soviets — workers' councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie."* [**Op. Cit.**, pp. 88–9]

As Kropotkin predicted, *"there can be no half-way house: either the Commune is to be absolutely free to endow itself with whatever institutions it wishes and introduce all reforms and revolutions it may deem necessary, or else it will remain ... a mere subsidiary of the State, chained in its every movement."* [**Op. Cit.**, p. 259] Without an alternative means of co-ordinating the struggle, the CNT would, as Morrow argued, have little choice but to collaborate with the state. However, rather than being a product of anarchist theory, as Morrow states, this came about by **ignoring** that theory (see section 20).

This can be seen from the false alternative used to justify the CNT's and FAI's actions — namely, *"either libertarian communism, which means anarchist dictatorship, or democracy, which means collaboration."* The creation of libertarian communism is done **from below** by those subject to capitalist and statist hierarchy overthrowing those with power over them by smashing the state machine and replacing it with self-managed organisations as well as expropriating capital and placing it under workers' self-management. As Murray Bookchin argues:

> *"Underlying all [the] errors [of the CNT], at least in theoretical terms, was the CNT-FAI's absurd notion that if it assumed power in the areas it controlled, it was establishing a 'State.' As long as the institutions of power consisted of armed workers and peasants as distinguished from a professional bureaucracy, police force, army, and cabal of politicians and judges, they were no[t] a State ... These institutions, in fact comprised a revolutionary people in arms ... not a professional apparatus that could be regarded as a State in any meaningful sense of the term... That the 'taking of power' by an armed people in militias, libertarian unions and federations, peasant communes and industrial*

> *collectives could be viewed as an 'anarchist dictatorship' reveals the incredible confusion that filled the minds of the 'influential militants.'"* [*"Looking Back at Spain,"* pp. 53–96, **The Radical Papers**, pp. 86–7]

This perspective explains why anarchists do not see any fundamental difference between a so-called "workers' state" and the existing state. For anarchists, the state is based fundamentally on hierarchical power – the delegation of power into the hands of a few, of a government, of an "executive" committee. Unlike Lenin, who stressed the "bodies of armed men" aspect of the state, anarchists consider the real question as one of who will tell these "bodies of armed men" what to do. Will it be the people as a whole (as expressed through their self-managed organisations) or will be it a government (perhaps elected by representative organisations)?

If it **was** simply a question of consolidating a revolution and its self-defence then there would be no argument:

> *"But perhaps the truth is simply this: ... [some] take the expression 'dictatorship of the proletariat' to mean simply the revolutionary action of the workers in taking possession of the land and the instruments of labour, and trying to build a society and organise a way of life in which there will be no place for a class that exploits and oppresses the producers.*
>
> *"Thus constructed, the 'dictatorship of the proletariat' would be the effective power of all workers trying to bring down capitalist society and would thus turn into Anarchy as soon as resistance from reactionaries would have ceased and no one can any longer seek to compel the masses by violence to obey and work for him. In which case, the discrepancy between us would be nothing more than a question of semantics. Dictatorship of the proletariat would signify the dictatorship of everyone, which is to say, it would be a dictatorship no longer, just as government by everybody is no longer a government in the authoritarian, historical and practical sense of the word.*
>
> *"But the real supporters of 'dictatorship of the proletariat' do not take that line, as they are making quite plain in Russia. Of course, the proletariat has a hand in this, just as the people has a part to play in democratic regimes, that is to say, to conceal the reality of things. In reality, what we have is the dictatorship of one party, or rather, of one' party's leaders: a genuine dictatorship, with its decrees, its penal sanctions, its henchmen and above all its armed forces, which are at present [1919] also deployed in the defence of the revolution against its external enemies, but which will tomorrow be used to impose the dictator's will upon the workers, to apply a break on revolution, to consolidate the new interests in the process of emerging and protect a new privileged class against the masses."* [Malatesta, **No Gods, No Masters**, vol. 2, pp. 38–9]

Maurice Brinton sums up the issue well when he argued that *"workers' power" "cannot be identified or equated with the power of the Party — as it repeatedly was by the Bolsheviks ... What 'taking power' really implies is that the vast majority of the working class at last realises its ability to manage both production and society — and organises to this end."* [**The Bolsheviks and Workers' Control**, p. xiv]

The question is, therefore, one of **who** "seizes power" — will it be the mass of the population or will it be a party claiming to represent the mass of the population. The difference is vital — and anyone who confuses the issue (like Lenin) does so either out of stupidity or vested interests.

If it **is** the mass of people then they have to express themselves and their power (i.e. the power to manage their own affairs). That requires that individuals — no matter where they are, be it in the workplace, community or on the front line — are part of self-managed organisations. Only by self-management in functional groups can working class people be said to controlling their own lives and determining their own fate. Such a system of popular assemblies and their means of defence would not be a state in the anarchist sense of the word.

As we argued in section 12, the Trotskyist vision of revolution, while seeming in some ways similar to that of anarchists, differ on this question. For Trotskyists, the **party** takes power, **not** the mass of the population directly. Only if you view "proletarian" seizure of power in terms of electing a political party to government could you see the elimination of functional democracy in the armed forces and the workplaces as no threat to working class power. Given Trotsky's actual elimination of democracy in the Red Army and Navy plus his comments on one-man management (and their justifications — see sections 11 and 17) it is clear that Trotskyists consider the workers' state in terms of party government, **not** self-management, **not** functional direct democracy.

Yes, the Trotskyists do claim that it is the workers, via their soviets, who will elect the government and hold it accountable but such a position fails to realise that a social revolution can only be created from below, by the direct action of the mass of the population. By delegating power into the hands of a few, the revolution is distorted. The initiative and power no longer rests in the hands of the mass of the population and so they can no longer take part in the constructive work of the revolution **and so it will not reflect their interests and needs.** As power flows from the top-down, bureaucratic distortions are inevitable.

Moreover, the government will inevitably clash with its subjects and Trotskyist theory provides the justification for the government imposing its wishes and negating workers' democracy (see section 12 for evidence for this claim). Moreover, in the centralised state desired by Trotskyists democratic accountability will inevitably suffer as power flows to the top:

> *"The power of the local soviets passed into the hands of the [National] Executive Committee, the power of the Executive Committee passed into the hands of the Council of People's Commissars, and finally, the power of the Council of People's Commissars passed into the hands of the Political Bureau of the Communist Party."* [Murray Bookchin, **Post-Scarcity Anarchism**, p. 152]

Little wonder, then, these CNT aphorisms:

> *"power corrupts both those who exercise it and those over whom it is exercised; those who think they can conquer the State in order to destroy it are unaware that the State overcomes all its conquerors... dictatorship of the proletariat is dictatorship without the proletariat and against them."* [Peter Marshall, **Demanding the Impossible**, p. 456]

That, in a nut shell, why anarchists consider the workers' state as no real change from the bourgeois state. Rather than creating a system in which working class people directly manage their own affairs, the workers' state, like any other state, involves the delegation of that power into the hands of a few. Given that state institutions generate specific social relations, specific relations of authority (namely those order giver and order taker) they cannot help becoming separated from society, becoming a new class based on the state's bureaucratic machine. Any state

structure (particularly a highly centralised one, as desired by Leninists) has a certain independence from society and so serves the interests of those within the State institutions rather than the people as a whole.

Perhaps a Leninist will point to **The State and Revolution** as evidence that Lenin desired a state based round the soviets — workers' council — and so our comments are unjustified. However, as Marx said, judge people by what they do, not what they say. The first act of the October Revolution was to form an executive power **over** the soviets (although, of course, in theory accountable to their national congress). In **The State and Revolution** Lenin praised Marx's comment that the Paris Commune was both administrative **and** executive. The "workers' state" created by Lenin did not follow that model (as Russian anarcho-syndicalists argued in August 1918, *"the Soviet of People's Commissars [i]s an organ which does not stem from the soviet structure but only interferes with its work"* [**The Anarchists in the Russian Revolution**, p. 118]).

Thus the Bolshevik state was not based around soviet self-management **nor** the fusion of executive and administrative in their hands but rather the use of the soviets to elect a government (a separate executive) which had the real power. The issue is quite simple — either *"All power to the Soviets"* means just that or it means *"All power to the government elected by the Soviets"*. The two are not the same as the first, for the obvious reason that in the second the soviets become simply ratification machines for the government and not organs in which the working masses can run their own affairs. We must also point out that the other promises made in Lenin's book went the same way as his support for the combining administration and executive tasks in the Paris Commune — and, we stress, all **before** the Civil War started in May 1918 (the usual Trotskyist defence of such betrayals is blame the Civil War which is hard to do as it had not started yet).

So it is unsurprising that Morrow does not explain why anarchists reject the "dictatorship of the proletariat" — to do so would be to show that Trotskyism is not the revolutionary movement for workers' liberty it likes to claim it is. Moreover, it would involve giving an objective account of anarchist theory and admitting that the CNT did not follow its teachings.

14. What is wrong with Morrow's *"fundamental tenet"* of anarchism?

According to Morrow the *"second fundamental tenet in anarchist teaching"* is, apparently, the following:

> *"Since Bakunin, the anarchists had accused Marxists of over-estimating the importance of state power, and had characterised this as merely the reflection of the petty-bourgeois intellectuals' pre-occupation with lucrative administrative posts. Anarchism calls upon workers to turn their backs on the state and seek control of the factories as the real source of power. The ultimate sources of power (property relations) being secured, the state power will collapse, never to be replaced."*

He then sums up by stating the Spanish anarchists *"thus failed to understand that it was only the collapse of state power ... which had enabled them to seize the factories."* [**Op. Cit.**, p. 102]

It would be interesting to discover in what work of Bakunin, or any anarchist, such a position could be found. Morrow gives us no references to help us in our quest — hardly surprising as no anarchist (Spanish or otherwise) ever argued this point before July 1936. However, in September 1936, we discover the CNT arguing that the *"withering away of the State is socialism's ultimate*

objective. Facts have demonstrated that in practice it is achieved by liquidation of the bourgeois State, brought to a state of asphyxiation by economic expropriation." [**No Gods, No Masters**, vol. 2, p. 261] This, we must note, was the same month the CNT decided to join the Catalan Government! So much for the state having withered away.

However, will soon be made clear, such comments were a revision of anarchist theory brought about by the apparent victory of the CNT on July 19th, 1936 (just as other revisions occurred to justify CNT participation in the state). In other words, Morrow's *"second fundamental tenet"* does not exist in anarchist theory. To prove this, we will quote Bakunin and a few other famous anarchists as well as giving an overview of some of the insurrections organised by the CNT before 1936. We start with Bakunin, Kropotkin and Malatesta.

Given that Bakunin thought that it was the *"power of the State"* which *"sustains the privileged classes"* against the *"legitimate indignation of the masses of the people"* it is hard to know what Morrow is talking about. [**The Political Philosophy of Bakunin**, p. 196] Given this perspective, it naturally follows that to abolish capitalism, to allow the seizure of factories by the workers, the state had to be abolished (or *"destroyed"*). Equally clear is that the *"natural and necessary consequence of this destruction will be ... [among others, the] dissolution of army, magistracy, bureaucracy, police and priesthood... confiscation of all productive capital and means of production on behalf of workers' associations, who are to put them to use ... the federative Alliance of all working men's associations ... will constitute the Commune."* [**Michael Bakunin: Selected Writings** p. 253 and p. 170]

Thus, the state has to be abolished in order to ensure that workers' can take over the means of production, so abolishing capitalism. This is the **direct opposite** of Morrow's claim that *"[s]ince Bakunin"* anarchism had *"call[ed] upon the workers to turn their backs to the state and seek control of the factories as the real source of power."* While control of the economy by workers is an important, indeed a key, aspect of a social revolution it is not a sufficient one for anarchists. It must be combined with the destruction of the state (as Bakunin argued, *"[n]o revolution could succeed ... today unless it was simultaneously a political and a social revolution"* [**No Gods, No Masters**, vol. 1, p. 141]). As the power of the state *"sustains"* the capitalists it clearly follows that the capitalist only has his property because the state protects his property claims — without the state, workers' would seize the means of production. Which means, contra Morrow, Bakunin was aware that in order for workers' to take over their workplaces the state had to be destroyed as it was by means of the state that capitalist property rights are enforced.

And, just to stress the obvious, you cannot *"turn your backs on the state"* while dissolving the state bureaucracy, the army, police and so on. This is clear for Bakunin. He argued that *"[l]iberty can only be created by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward."* And the nature of this workers' organisation? Workers' councils — the *"proletariat ... must enter the International [Workers' Association] en masse, form[ing] factory, artisan, and agrarian sections, and unite them into local federations."* [**Statism and Anarchy**, p. 179 and p. 49]

Similarly, we discover Kropotkin arguing that *"expropriation"* would occur at the same time as *"the capitalists' power to resist [had] been smashed"* and that *"the authorities"* will be *"overthrown."* He also recognised the need for self-defence, arguing that the revolution must *"withstand both the attempts to form a government that would seek to strangle it and any onslaughts which may emanate from without."* He argued the Commune *"must smash the State and replace it with the Federation and it will act accordingly."* [**No Gods, No Masters**, vol. 1, pp. 232–3 and p. 259]

You cannot do all this by *"turning your backs"* on the state. To smash the state you need to face it and fight it — there is no other way.

Elsewhere he argued that the commune of the future would base itself on *"the principles of anarchist communism"*, meaning they would have *"entirely abolished property, government, and the state."* They will *"proclaim and establish their independence by direct socialist revolutionary action, abolishing private property"* when *"governments are swept away by the people ... the insurgent people will not wait until some new government decrees, in its marvellous wisdom, a few economic reforms."* Rather, they *"will take possession on the spot and establish their rights by utilising it without delay. They will organise themselves in the workshops to continue the work, but what they will produce will be what is wanted by the masses, not what gives the highest profit to employers... they will organise themselves to turn to immediate use the wealth stored up in the towns; they will take possession of it as if it had never been stolen from them by the middle class."* [*"The Commune of Paris"*, **Selected Writings on Anarchism and Revolution**, pp. 127–9] Note that Kropotkin explicitly states that only **after** *"governments are swept away"* would the *"insurgent people . .. organise themselves in the workshops."*

As Malatesta noted, the anarchist principles formulated in 1872 at the Congress of St Imier (under the influence of Bakunin, obviously) stated that *"[d]estruction of all political power is the first duty of the proletariat"* who must *"establish solidarity in revolutionary action outside the framework of bourgeois politics."* He adds, *"[n]eedless to say, for the delegates of St. Imier as for us and for all anarchists, the abolition of political power is not possible without the simultaneous destruction of economic privilege."* [**Errico Malatesta: His Life and Ideas**, pp. 157–8]

Malatesta himself always stressed that revolution required *"the insurrectionary act which sweeps away the material obstacles, the armed forces of the government."* He argued that *"[o]nce the government has been overthrown ... it will be the task of the people ... to provide for the satisfaction of immediate needs and to prepare for the future by destroying privileges and harmful institutions."* [**Op. Cit.**, p. 163 and p. 161] In other words, the revolution needs to smash the state and at the same time abolish capitalism by expropriation by the workers.

Thus anarchism is clear on that you need to destroy the state in order to expropriate capital. Morrow's assertions on this are clearly false. Rather than urging *"workers to turn their backs on the state and seek control of the factories as the real source of power"* anarchism calls upon workers to *"overthrow," "smash," "sweep away," "destroy"*, *"dissolve"* the state and its bureaucratic machinery via an *"insurrectionary act"* and expropriate capital **at the same time** — in other words, a popular uprising probably combined with a general strike (*"an excellent means for starting the social revolution,"* in Malatesta's words, but not in itself enough to make *"armed insurrection unnecessary"* [Errico Malatesta, **The Anarchist Reader**, pp. 224–5]).

That, in itself, indicates that Morrow's *"fundamental tenet"* of anarchism does not, in fact, actually exist. In addition, if we look at the history of the CNT during the 1930s we discover that the union organised numerous insurrections which did not, in fact, involve workers *"turning their backs on the state"* but rather attacking the state. For example, in the spontaneous revolt of CNT miners in January 1932, the workers *"seized town halls, raised the black-and-red flags of the CNT, and declared **communismo liberatario.**"* In Tarassa, the same year, the workers again *"seiz[ed] town halls"* and the town *"swept by street fighting."* The revolt in January 1933 began with *"assaults by Anarchist action groups ... on Barcelona's military barracks ... Serious fighting occurred in working-class **barrios** and the outlying areas of Barcelona ... Uprising occurred in Tarassa, Sardanola-Ripollet, Lerida, in several **pueblos** in Valencia province, and in Andalusia."*

In Casas Viejas, as we discussed in section 1, the CNT members surrounded and attacked the barracks of the Civil Guard. In December 1933, the workers *"reared barricades, attacked public buildings, and engaged in heavy street fighting ... many villages declared libertarian communism."* [Murray Bookchin, **The Spanish Anarchists**, p. 225, p. 226, p. 227 and p. 238]

Moreover, *"[w]herever possible ... insurrections had carried out industrial and agrarian take-overs and established committees for workers' and peasant's control, libertarian systems of logistics and distribution — in short, a miniature society 'organised on the lines set down by Kropotkin.'"* [Bookchin, **Op. Cit.**, p. 239]

Now, does all that really sound like workers turning their backs on the state and only seizing control of their factories?

Perhaps it will be argued that Morrow is referring to **after** the insurrection (although he clearly is not). What about the defence of the revolution? Anarchists have always been clear on this too — the revolution would be defended by the people in arms. We have discussed this issue above (in sections 1 and 8 in particular) so we do not need to discuss it in much detail here. We will just provide another quote by Bakunin (although written in 1865, Bakunin made the same points over and over again until his death in 1876):

> *"While it [the revolution] will be carried out locally everywhere, the revolution will of necessity take a federalist format. Immediately after established government has been overthrown, communes will have to reorganise themselves along revolutionary lines ... In order to defend the revolution, their volunteers will at the same time form a communal militia. But no commune can defend itself in isolation. So it will be necessary for each of them to radiate outwards, to raise all its neighbouring communes in revolt ... and to federate with them for common defence."* [**No Gods, No Masters**, vol. 1, p. 142]

This was essentially the position agreed by the CNT in May 1936:

> *"The armed people will be the best guarantee against all attempts to restore the destroyed regime by interior or exterior forces ... Each Commune should have its arms and elements of defence."* [quoted by Robert Alexander, **The Anarchists in the Spanish Civil War**, vol. 1, p. 64]

Like the CNT with its *"Defence Committees"* the defence of the revolution would rest with the commune and its federation. Thus Morrow's *"fundamental tenet"* of anarchism does not exist. We have **never** urged the ignoring of the state nor the idea that seizing economic power will eliminate political power by itself. Nor is anarchism against the defence of a revolution. The position of the CNT in May 1936 was identical to that of Bakunin in 1865. The question is, of course, how do you organise a revolution and its defence — is it by the whole people or is it by a party representing that people. Anarchists argue for the former, Trotskyists the latter. Needless to say, a state structure (i.e. a centralised, hierarchical structure based on the delegation of power) is required only when a revolution is seen as rule by a party — little wonder anarchists reject the concept of a "workers' state" as a contradiction in terms.

The question of July 1936 however rears its head. If anarchism **does** stand for insurrection, workers councils and so on, then why did the CNT ignore the state? Surely that suggests anarchism is, as Morrow claims, flawed? No, it does not — as we argue in some detail in section 20 this

confuses mistakes by **anarchists** with errors in anarchist theory. The CNT-FAI did not pursue anarchist theory and so July 1936 does not invalidate anarchism. As Bakunin argued, *"[n]o revolution could succeed ... unless it was simultaneously a political and a social revolution."* [**No Gods, No Masters**, vol. 1, p. 141] The revolution of July 1936 was a social revolution (it expropriated capital and revolutionised social relationships across society) but it was not a political revolution — in other words, it did not destroy the state. The CNT refused to do this because of the danger of fascism and fear of isolation (see section 20). Little wonder the social revolution was defeated — the CNT did not apply basic anarchist theory. To dismiss anarchist ideas because they were not applied seems somewhat strange.

To finish this section we must indicate that Morrow's statement concerning anarchists "turning our backs" to the state and concentrating on property actually contradicts both Engels and Lenin.

As Lenin notes in **The State and Revolution**, *"Marx agreed with Proudhon on the necessity of 'smashing' the present state machine... [there is] similarity between Marxism and anarchism (Proudhon and Bakunin) ... on this point"* and that anarchists advocate *"the destruction of the state machine."* [**Essential Works of Lenin**, p. 310 and p. 358] You can hardly smash the state or destroy the state machine by "turning your back" to it. Similarly, Engels argued (although distorting his thought somewhat) that Bakunin saw *"the **state** as the main evil to be abolished ... [and] maintains that it is the **state** which has created capital, that the capitalist has his capital **only by the grace of the state** ... [Hence] it is above all the state which must be done away with ... organise, and when ALL workers are won over ... abolish the state and replace it with the organisation of the International."* [**The Marx-Engels Reader**, pp. 728–9] You cannot *"abolish"* and *"replace"* the state by ignoring it ("turning your back to it"). We must also stress that Engels comments disprove Lenin's assertion that anarchists *"have absolutely no clear idea of **what** the proletariat will put in its [the states] place."* [**Op. Cit.**, p. 358] We have always been clear, namely a federation of workers' associations (this was the organisation of the First International). In other, more modern, words, a system of workers' councils — a position Marxists only embraced six decades later when Lenin advocated them as the basis of his "workers' state."

Thus Morrow's comments against anarchism are in contradiction to usual Marxist claims against anarchism (namely, that we seek to smash the state but do not understand that the workers' state is necessary to abolish capitalism). Indeed, Engels attributed the opposite idea to Bakunin that Morrow implies anarchists think with regards to property — namely the idea that the capitalist has his property because of the state. Morrow's *"fundamental tenet"* of anarchism not only does not exist in anarchist theory, it does not even exist in the Marxist critique of that theory! It is impressive enough to assign a false doctrine to your enemies, it takes real ability to make a claim which contradicts your own theory's assertions!

15. Did Spanish Anarchism aim for the creation of *"collectives"* before the revolution?

The formation of the worker-managed enterprises called *"collectives"* in the Spanish revolution of 1936 has sometimes led people (particularly Marxists) to misconceptions about anarcho-syndicalist and communist-anarchist theory. These comments by a Marxist-Leninist are typical:

> *"Spanish anarchists believed that a system of autonomous collectives, with the weakest possible connections between them, was the alternative to capitalism and also to the Marxist view of society running the entire economy as one whole."*

And:

> *"The anarchist theory led to the ordinary anarchist considering each factory as owned simply by the workers that laboured there, and not by the working class as a whole."* [Joseph Green, *"Reply to the Open Letter of the Black Autonomy Collective"*, **Communist Voice**, no. 10]

This assertion is sometimes voiced by Libertarian Marxists of the council communist tendency (who should know better):

> *"At the time of the Civil War, a popular idea amongst the Spanish working class and peasants was that each factory, area of land, etc., should be owned collectively by its workers, and that these 'collectives' should be linked with each other on a 'federal' basis — that is, without any superior central authority.*
>
> *"This basic idea had been propagated by anarchists in Spain for more than 50 years. When the Civil War began, peasants and working class people in those parts of the country which had not immediately fallen under fascist control seized the opportunity to turn anarchist ideal into reality."* [*"Anarchism and the Spanish 'Revolution'"*, **Subversion**, no. 18]

Trotskyist Felix Morrow also presents a similar analysis when he states that the POUM *"recorded the tendency of CNT unions to treat collectivised property as their own. It never attacked the anarcho-syndicalist theories which created the tendency."* [**Op. Cit.**, p. 104]

However, the truth of the matter is somewhat different.

Firstly, as will soon become clear, CNT policy and anarchist theory was **not** in favour of workers' owning their individual workplaces. Instead both argued for **socialisation** of the means of life by a system of federations of workers' assemblies. Individual workplaces would be managed by their workers but they would not exist in isolation or independently of the others — they would be members of various federations (minimally an industrial one and one which united all workplaces regardless of industry in a geographical area). These would facilitate co-ordination and co-operation between self-managed workplaces. The workplace would, indeed, be autonomous but such autonomy did not negate the need for federal organs of co-ordination nor did federation negate that autonomy (as we will discuss later in section 18, autonomy means the ability to make agreements with others and so joining a federation is an expression of autonomy and not necessarily its abandonment, it depends on the nature of the federation).

Secondly, rather than being the product of *"more than 50 years"* of anarchist propaganda or of *"anarcho-syndicalist theories"*, the *"collectives"* instituted during the Civil War were seen by the CNT as merely a temporary stop-gap. They had not been advocated in the CNT's pre-Civil War program, but came into existence precisely because the CNT was unable to carry out its libertarian communist program, which would have required setting up workers congresses and federal councils to establish co-ordination and aid the planning of common activities between

the self-managed workplaces. In other words, the idea of self-managed workplaces was seen as one step in a process of socialisation, the basic building block of a federal structure of workers' councils. They were **not** seen as an end in themselves no matter how important they were as the base of a socialised economy.

Thus the CNT had never proposed that factories or other facilities would be owned by the people who happened to work there. The CNT's program called for the construction of *"libertarian communism."* This was the CNT's agreed goal, recognising it must be freely created from below. In addition, the Spanish Anarchists argued for *"free experimentation, free show of initiative and suggestions, as well as the freedom of organisation,"* recognising that *"[i]n each locality the degree of [libertarian] communism, collectivism or mutualism will depend on conditions prevailing. Why dictate rules? We who make freedom our banner, cannot deny it in economy."* [D. A. de Santillan, **After the Revolution**, p. 97] In other words, the CNT recognised that libertarian communism would not be created overnight and different areas will develop at different speeds and in different directions depending on the material circumstances they faced and what their population desired.

However, libertarian communism was the CNTs declared goal. This meant that the CNT aimed for a situation where the economy as a whole would be socialised and **not** an mutualist economy consisting independent co-operatives owned and controlled by their workers (with the producers operating totally independently of each other on the basis of market exchange). Instead, workers would manage their workplace directly, but would not own it — rather ownership would rest with society as a whole but the day-to-day management of the means of production would be delegated to those who did the actual work. Councils of workers' delegates, mandated by and accountable to workplace assemblies, would be created to co-ordinate activity at all levels of the economy.

A few quotes will be needed to show that this was, in fact, the position of the Spanish Anarchists. According to Issac Puente, the *"national federations will hold as common property all the roads, railways, buildings, equipment, machinery and workshops."* The village commune *"will federate with its counterparts in other localities and with the national industrial federations."* [**Libertarian Communism**, p. 29 and p. 26] In D. A. de Santillan's vision, libertarian communism would see workers' councils overseeing 18 industrial sectors. There would also be *"councils of the economy"* for local, regional and national levels (ultimately, international as well). [**Op. Cit.**, pp. 50–1 and pp. 80–7] These councils would be *"constitute[d] by delegations or through assemblies"* and *"receives [their] orientation from below and operates in accordance with the resolutions"* of their appropriate *"assemblies."* [**Op. Cit.**, p. 83 and p. 86]

The CNT's national conference in Saragossa during May 1936 stressed this vision. Its resolution declared that the revolution would abolish *"private property, the State, the principle of authority, and ... classes."* It argued that *"the economic plan of organisation, throughout national production, will adjust to the strictest principles of social economy, directly administered by the producers through their various organs of production, designated in general assemblies of the various organisations, and always controlled by them."* In urban areas, *"the workshop or factory council"* would make *"pacts with other labour centres"* via *"Councils of Statistics and Production"* which are the *"organ of relations of Union to Union (association of producers)"*, in other words, workers' councils. These would *"federate among themselves, forming a network of constant and close relations among all the producers of the Iberian Confederation."* In rural areas, *"the producers of the Commune"* would create a *"Council of Cultivation"* which would *"establish the same network of*

relations as the Workshop, Factory Councils and those of Production and Statistics, complementing the free federation represented by the Commune."

The resolution argues that *"[b]oth the Associations of industrial producers and Associations of agricultural producers will federate nationally"* and *"Communes will federate on a county and regional basis ... Together these Communes will constitute an Iberian Confederation of Autonomous Libertarian Communes."* Being anarchists, the CNT stressed that *"[n]one of these organs will have executive or bureaucratic character"* and their members *"will carry out their mission as producers, meeting after the work day to discuss questions of details which don't require the decision of the communal assemblies."* The assemblies themselves *"will meet as often as needed by the interests of the Commune... When problems are dealt with which affect a country or province, it must be the Federations which deliberate, and in the meetings and assemblies all Communities will be represented and the delegates will bring points of view previously agreed upon"* by the Commune assembly. [quoted by Robert Alexander, **The Anarchists in the Spanish Revolution**, vol. 1, p. 59, p. 60 and p. 62]

Joan Ferrer, a bookkeeper who was the secretary of the CNT commercial workers union in Barcelona, explained this vision:

> *"It was our idea in the CNT that everything should start from the worker, not — as with the Communists — that everything should be run by the state. To this end we wanted to set up industrial federations — textiles, metal-working, department stores, etc. — which would be represented on an overall Economics Council which would direct the economy. Everything, including economic planning, would thus remain in the hands of the workers."* [quoted by Ronald Fraser, **Blood of Spain**, p. 180]

However, social revolution is a dynamic process and things rarely develop exactly as predicted or hoped in pre-revolutionary times. The "collectives" in Spain are an example of this. Although the regional union conferences in Catalonia had put off overthrowing the government in July of 1936, workers began taking over the management of industries as soon as the street-fighting had died down. The initiative for this did not come from the higher bodies — the regional and national committees — but from the rank-and-file activists in the local unions. In some cases this happened because the top management of the enterprise had fled and it was necessary for the workers to take over if production was to continue. But in many cases the local union militants decided to take advantage of the situation to end wage labour by creating self-managed workplaces.

As to be expected of a real movement, mistakes were made by those involved and the development of the movement reflected the real problems the workers faced and their general level of consciousness and what they wanted. This is natural and to denounce such developments in favour of ideal solutions means to misunderstand the dynamic of a revolutionary situation. In the words of Malatesta:

> *"To organise a [libertarian] communist society on a large scale it would be necessary to transform all economic life radically, such as methods of production, of exchange and consumption; and all this could not be achieved other than gradually, as the objective circumstances permitted and to the extent that the masses understood what advantages could be gained and were able to act for themselves."* [**Errico Malatesta: His Life and Ideas**, p. 36]

This was the situation in revolutionary Spain. Moreover, the situation was complicated by the continued existence of the bourgeois state. As Gaston Leval, in his justly famous study of the collectives, states *"it was not ... true socialisation, but ... a self-management straddling capitalism and socialism, which we maintain would not have occurred had the Revolution been able to extend itself fully under the direction of our syndicates."* [Gaston Leval, **Collectives in the Spanish Revolution**, p. 227–8] Leval in fact terms it *"a form of workers neo-capitalism"* but such a description is inaccurate (and unfortunate) simply because wage labour had been abolished and so it was not a form of capitalism — rather it was a form of mutualism, of workers' co-operatives exchanging the product of their labour on the market.

However, Leval basic argument was correct — due to the fact the political aspect of the revolution (the abolition of the state) had been "postponed" until after the defeat of fascism, the economic aspects of the revolution would also remain incomplete. The unions that had seized workplaces were confronted with a dilemma. They had control of their individual workplaces, but the original libertarian plan for economic co-ordination was precluded by the continued existence of the State. It was in this context of a partial revolution, under attack by the counter-revolution, that the idea of "collectives" was first put forward to solve some of the problems facing the workers and their self-managed workplaces. Unfortunately, this very "solution" caused problems of its own. For example, Gaston Leval indicates that the collectivisation decree of October 1936 *"legalising collectivisation"*, *"distorted everything right from the start"* [**Op. Cit.**, p. 227] and did not allow the collectives to develop beyond a mutualist condition into full libertarian communism. It basically legalised the existing situation while hindering its development towards libertarian communism by undermining union control.

This dilemma of self-managed individual workplaces and lack of federations to co-ordinate them was debated at a CNT union plenary in September of 1936. The idea of converting the worker-managed workplaces into co-operatives, operating in a market economy, had never been advocated by the Spanish anarchists before the Civil War, but was now seen by some as a temporary stop-gap that would solve the immediate question of what to do with the workplaces that had been seized by the workers. It was at this meeting that the term "collective" was first adopted to describe this solution. This concept of "collectivisation" was suggested by Joan Fabregas, a Catalan nationalist of middle class origin who had joined the CNT after July of 1936. As one CNT militant recalled:

> *"Up to that moment, I had never heard of collectivisation as a solution for industry — the department stores were being run by the union. What the new system meant was that each collectivised firm would retain its individual character, but with the ultimate objective of federating all enterprises within the same industry."* [quoted by Ronald Fraser, **Blood of Spain**, p. 212]

However, a number of unions went beyond "collectivisation" and took over all the facilities in their industries, eliminating competition between separate firms. The many small barber and beauty shops in Barcelona were shut down and replaced with large neighbourhood haircutting centres, run through the assemblies of the CNT barbers' union. The CNT bakers union did something similar. The CNT Wood Industry Union shut down the many small cabinet-making shops, where conditions were often dangerous and unhealthy. They were replaced with two large factories, which included new facilities for the benefit of the workforce, such as a large swimming pool.

The union ran the entire industry, from the felling of timber in the Val d'Aran to the furniture showrooms in Barcelona. The railway, maritime shipping and water, gas and electric industry unions also pursued this strategy of industrial unification, as did the textile union in the industrial town of Badalona, outside Barcelona. This was considered to be a step in the direction of eventual socialisation.

At the Catalan union plenary of September, 1936, *"the bigger, more powerful unions, like the woodworkers, the transport workers, the public entertainment union, all of which had already socialised [i.e. unified their industries under union management], wanted to extend their solution to the rest of industry. The smaller, weaker unions wanted to form co-operatives..."* [Fraser, **Op. Cit.**, p. 212]

The collectives came out of this conflict and discussion as a sort of "middle ground" — however, it should be stressed that it did not stop many unions from ignoring the Catalan's governments' attempt to legalise (and so control) the collectives (the so-called *"collectivisation"* decree) as far as they could. As Albert Perez-Baro, a Catalan Civil Servant noted, *"the CNT ... pursued its own, unilateral objectives which were different. Syndical collectivisation or syndicalised collectives, I would call those objectives; that's to say, collectives run by their respective unions ... The CNT's policy was thus not the same as that pursued by the decree."* [quoted by Fraser, **Op. Cit.**, pp. 212–3] Indeed, Abad de Santillan stated later that he *"was an enemy of the decree because I considered it premature ... When I became [economics] councillor [of the Generalitat for the CNT], I had no intention of taking into account of carrying out the decree; I intended to allow our great people to carry on the task as they saw fit, according to their own aspiration."* [quoted, **Op. Cit.**, p. 212f]

Therefore, when Leninist Joseph Green argues the initial collectivisation of workplaces *"was the masses starting to take things into their own hands, and they showed that they could continue production in their workplaces ... The taking over of the individual workplaces and communities is one step in a revolutionary process. But there is yet more that must be done — the workplaces and communities must be integrated into an overall economy"* he is just showing his ignorance. The CNT, despite Green's assertions to the contrary, were well aware that the initial collectivisations were just one step in the revolution and were acting appropriately. It takes some gall (or extreme ignorance) to claim that CNT theory, policy and actions were, in fact, the exact opposite of what they were. Similarly, when he argues *"[h]ow did the anarchists relate the various workplace collectives to each other in Barcelona? ... they made use of a patchwork system including a Central Labour Bank, an Economic Council, credit ..."* he strangely fails to mention the socialisation attempts made by many CNT industrial unions during the revolution, attempts which reflected pre-war CNT policy. But such facts would get in the way of a political diatribe and so are ignored. [Green, **Op. Cit.**]

Green continues his inaccurate diatribe by arguing that:

> *"The problem is that, saddled with their false theory, they could not understand the real nature of the economic steps taken in the collectives, and thus they could not deal with the economic relations that arose among the collectives."* [**Op. Cit.**]

However, the only thing false about this is the false assertions concerning anarchist theory. As is crystal clear from our comments above, the Spanish anarchists (like all anarchists) were well aware of the need for economic relations between collectives (self-managed workplaces) before the revolution and acted to create them during it. These were the industrial federations and

federations of rural communities/collectives predicted in anarchist and CNT theory and actually created, in part at least, during the revolution itself.

Thus Green's "critique" of anarchism is, in fact, **exactly** what anarchist theory actually argues and what the Spanish anarchists themselves argued and tried to implement in all industries. Of course, there are fundamental differences between the anarchist vision of socialisation and the Leninist vision of Nationalisation but this does not mean that anarchism is blind to the necessity of integrating workplaces and communities into a coherent system of federations of workers' councils (as proven above). However, such federation has two sources — it is either imposed from above or agreed to from below. Anarchists choose the former as the latter negates any claim that a revolution is a popular, mass movement from below (and, incidentally, the Leninist claim that the "workers' state" is simply a tool of the workers to defeat capitalist oppression).

The actual process in Spain towards industrial federations and so socialisation was dependent on the wishes of the workers involved — as would be expected in a true social revolution. For example, the department stores were collectivised and an attempt to federate the stores failed. The works councils opposed it, considering the enterprises as their own and were unwilling to join a federation — the general assemblies of the collectives agreed. Joan Ferrer, the secretary of the CNT commercial union, considered it natural as *"[o]nly a few months before, the traditional relationship between employer and worker had been overthrown. Now the workers were being asked to make a new leap – to the concept of collective ownership. It was asking a lot to expect the latter to happen overnight."* [quoted by Fraser, **Op. Cit.**, p. 220]

However, before Leninists like Green rush in and assert that this proves that *"anarchist theory led to the ordinary anarchist considering each factory as owned simply by the workers that laboured there"* we should point out two things. Firstly, it was the "ordinary anarchists" who were trying to organise socialisation (i.e. CNT members and militants). Secondly, the Russian Revolution also saw workers taking over their workplaces and treating them as their own property. Leninists like Green would have a fit if we took these examples to "prove" that Leninism *"led to the ordinary Bolshevik worker considering each factory as owned simply by the workers that laboured there"* (which was what the Mensheviks **did** argue in 1917 when Martov *"blamed the Bolsheviks for creating the local, particularistic attitudes prevailing among the masses."* [Samuel Farber, **Before Stalinism**, p. 72]). In other words, such events are a natural part of the process of a revolution and are to be expected regardless of the dominant theory in that revolution.

To summarise.

The Spanish revolution does confirm anarchist theory and in no way contradicts it. While many of the aspects of the collectives were in accord with pre-war CNT policy and anarchist theory, other aspects of them were in contradiction to them. This was seen by the militants of the CNT and FAI who worked to transform these spontaneously created organs of economic self-management into parts of a socialised economy as required for libertarian communism. Such a transformation flowed from below and was not imposed from above, as would be expected in a libertarian social revolution.

As can be seen, the standard Marxist account of the collectives and its relationship to anarchist theory and CNT policy is simply wrong.

16. How does the development of the collectives indicate the differences between Bolshevism and anarchism?

As argued in the last section, the collectives formed during the Spanish Revolution reflected certain aspects of anarchist theory but not others. They were a compromise solution brought upon by the development of the revolution and did not, as such, reflect CNT or anarchist theory or vision bar being self-managed by their workers. The militants of the CNT and FAI tried to convince their members to federate together and truly socialise the economy, with various degrees of success. A similar process occurred during the Russian Revolution of 1917. There workers created factory committees which tried to introduce workers' self-management of production. The differences in outcome in these two experiences and the actions of the Bolsheviks and anarchists indicate well the fundamental differences between the two philosophies. In this section we discuss the contrasting solutions pursued by the CNT and the Bolsheviks in their respective revolutions.

The simple fact is that revolutions are complex and dynamic processes which involve many contradictory developments. The question is how do you push them forward — either from below or from above. Both the Spanish and the Russian revolution were marked by "localism" — when the workers in a factory consider it their own property and ignore wider issues and organisation.

Lenin and the Bolsheviks "solved" the problem of localism by eliminating workers' self-management in favour of one-man management appointed from above. Attempts by the workers and factory committees themselves to combat localism were stopped by the Bolshevik dominated trade unions which *"prevented the convocation of a planned All-Russian Congress of Factory Committees"* in November 1917 when *"called upon"* by the Bolsheviks *"to render a special serve to the nascent Soviet State and to discipline the Factory Committees."* [I. Deutscher, quoted by Maurice Brinton, **The Bolsheviks and Workers' Control**, p. 19] Instead, the Bolsheviks built from the top-down their system of *"unified administration"* based on converting the Tsarist system of central bodies which governed and regulated certain industries during the war. [Brinton, **Op. Cit.**, p. 36] The CNT, in comparison, tried to solve the problem of localism by a process of discussion and debate from below. Both were aware of the fact the revolution was progressing in ways different from their desired goal but their solution reflected their different politics — libertarian in the case of the CNT, authoritarian in the case of Bolshevism.

Therefore, the actual economic aspects of the Spanish revolution reflected the various degrees of political development in each workplace and industry. Some industries socialised according to the CNT's pre-war vision of libertarian communism, others remained at the level of self-managed workplaces in spite of the theories of the union and anarchists. This was the case with other aspects of the collectives. As Vernon Richards points out, *"[i]n some factories ... the profits or income were shared out among the workers ... As a result, wages fluctuated in different factories and even within the same industry .. . But fortunately ... the injustice of this form of collectivisation was recognised and combated by the CNT syndicates from the beginning."* [**Lessons of the Spanish Revolution**, pp. 106–7]

Thus the collectives, rather than expressing the economic vision of communist-anarchism or anarcho-syndicalism, came into existence precisely because the CNT was unable to carry out its libertarian communist program, which would have required setting up workers congresses and co-ordinating councils to establish common ownership and society wide self-management. To assert that the collectives were an exact reflection of anarchist or anarcho-syndicalist theory

is, therefore, incorrect. Rather, they reflected certain aspects of that theory (such as workers' self-management in the workplace) while others (industrial federations to co-ordinate economic activity, for example) were only partially meet. This, we must stress, is to be expected as a revolution is a **process** and not an event. As Kropotkin argued:

> *"It is a whole insurrectionary period of three, four, perhaps five years that we must traverse to accomplish our revolution in the property system and in social organisation."* [**Words of a Rebel**, p. 72]

Thus the divergence of the actual revolution from the program of the CNT was to be expected and so did not represent a failure or a feature of anarchist or anarcho-syndicalist theory as Morrow and other Marxists assert. Rather, it expresses the nature of a social revolution, a movement from below which, by its very nature, reflects real needs and problems and subject to change via discussion and debate. Bakunin's comments stress this aspect of the revolution:

> *"I do not say that the peasants [and workers], freely organised from the bottom up, will miraculously create an ideal organisation, confirming in all respects to our dreams. But I am convinced that what they construct will be living and vibrant, a thousands times better and more just than any existing organisation. Moreover, this ... organisation, being on the one hand open to revolutionary propaganda .. . , and on the other, not petrified by the intervention of the State .. . will develop and perfect itself through free experimentation as fully as one can reasonably expect in our times.*
>
> *"With the abolition of the State, the spontaneous self-organisation of popular life ... will revert to the communes. The development of each commune will take its point of departure the actual condition of its civilisation ..."* [**Bakunin on Anarchism**, p. 207]

To **impose** an "ideal" solution would destroy a revolution — the actions and decisions (**including what others may consider mistakes**) of a free people are infinitely more productive and useful than the decisions and decrees of the best central committee. Moreover, a centralised system by necessity is an imposed system (as it excludes by its very nature the participation of the mass of the people in determining their own fate). As Bakunin argued, *"Collectivism could be imposed only on slaves, and this kind of collectivism would then be the negation of humanity. In a free community, collectivism can come about only through the pressure of circumstances, not by imposition from above but by a free spontaneous movement from below."* [**Op. Cit.**, p. 200] Thus socialisation must proceed from below, reflecting the real development and desires of those involved. To "speed-up" the process via centralisation can only result in replacing socialisation with nationalisation and the elimination of workers' self-management with hierarchical management. Workers' again would be reduced to the level of order-takers, with control over their workplaces resting not in their hands but in those of the state.

Lenin argued that *"Communism requires and presupposes the greatest possible centralisation of large-scale production throughout the country. The all-Russian centre, therefore, should definitely be given the right of direct control over all the enterprises of the given branch of industry. The regional centres define their functions depending on local conditions of life, etc., in accordance with the general production directions and decisions of the centre."* He continued by explicitly arguing that *"[t]o deprive the all-Russia centre of the right to direct control over all the enterprises of the*

given industry . .. would be regional anarcho-syndicalism, and not communism." [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 292]

We expect that Morrow would subscribe to this "solution" to the problems of a social revolution generates. However, such a system has its own problems.

First is the basic fallacy that the centre will not start to view the whole economy as its property (and being centralised, such a body would be difficult to effectively control). Indeed, Stalin's power was derived from the state bureaucracy which ran the economy in its own interests. Not that it suddenly arose with Stalin. It was a feature of the Soviet system from the start. Samuel Farber, for example, notes that, *"in practice, [the] hypercentralisation [pursued by the Bolsheviks from early 1918 onwards] turned into infighting and scrambles for control among competing bureaucracies"* and he points to the *"not untypical example of a small condensed milk plant with few than 15 workers that became the object of a drawn-out competition among six organisations including the Supreme Council of National Economy, the Council of People's Commissars of the Northern Region, the Vologda Council of People's Commissars, and the Petrograd Food Commissariat."* [**Op. Cit.**, p. 73] In other words, centralised bodies are not immune to viewing resources as their own property (and compared to an individual workplace, the state's power to enforce its viewpoint against the rest of society is considerably stronger).

Secondly, to eliminate the dangers of workers' self-management generating "propertarian" notions, the workers' have to have their control over their workplace reduced, if not eliminated. This, by necessity, generates **bourgeois** social relationships and, equally, appointment of managers from above (which the Bolsheviks did embrace). Indeed, by 1920 Lenin was boasting that in 1918 he had *"pointed out the necessity of recognising the dictatorial authority of single individuals for the pursue of carrying out the Soviet idea"* and even claimed that at that stage *"there were no disputes in connection with the question"* of one-man management. [quoted by Brinton, **Op. Cit.**, p. 65] While the first claim is true (Lenin argued for one-man management appointed from above **before** the start of the Civil War in May 1918) the latter one is **not** true (excluding anarchists and anarcho-syndicalists, there were also the dissent Left-Communists in the Bolshevik party itself).

Thirdly, a centralised body effectively excludes the mass participation of the mass of workers — power rests in the hands of a few people which, by its nature, generates bureaucratic rule. This can be seen from the example of Lenin's Russia. The central bodies the Bolsheviks created had little knowledge of the local situation and often gave orders that contradicted each other or had little bearing to reality, so encouraging factories to ignore the centre. In other words the government's attempts to centralise actually led to localism (as well as economic mismanagement)! Perhaps this was what Green means when he argues for a *"new centralism"* which would be *"compatible with and requiring the initiative of the workers at the base"* [Green **Op. Cit.**]– that is, the initiative of the workers to ignore the central bodies and keep the economy going **in spite** of the *"new centralism"*?

The simple fact is, a socialist society **must** be created from below, by the working class itself. If the workers do not know how to create the necessary conditions for a socialist organisation of labour, no one else can do it for them or compel them to do it. If the state is used to combat "localism" and such things then it obviously cannot be in the hands of the workers' themselves. Socialism can only be created by workers' own actions and organisations otherwise it will not be set up at all — something else will be, namely state capitalism.

Thus, a close look at Lenin's "solution" indicates that Trotskyist claim that their state is the *"tool of the majority in their fight against exploitation by the few"* (to use Joseph Green's words)

is refuted by their assertion that this state will also bring the economy under centralised control and by the actions of the Bolsheviks themselves.

Why is this? Simply because **if** the mass of collectives are not interested in equality and mutual aid in society as a whole then how can the government actually be the "tool" of the majority when it imposes such "mutual aid" and "equality" upon the collectives? In other words, the interests of the government replace those of the majority. After all, if workers **did** favour mutual aid and equality then they would federate themselves to achieve it. (which the collectives were actually doing all across Spain, we must note). If they do not do this then how can the "workers' state" be said to be simply their tool when it has to **impose** the appropriate economic structure upon them? The government is elected by the whole people, so it will be claimed, and so must be their tool. This is obviously flawed — *"if,"* argued Malatesta, *"you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing a genius from the votes of a mass of fools? And what will happen to the minorities which are still the most intelligent, most active and radical part of a society?"* [Malatesta, **Anarchy**, p. 53]

What does all this mean? Simply that Trotskyists recognise, implicitly at least, that the workers' state is not, in fact, the simple tool of the workers. Rather, it is the means by which "socialism" will be imposed upon the workers by the party. If workers do not practice mutual aid and federation in their day-to-day running of their lives, then how can the state impose it if it is simply their tool? It suggests what is desired *"by all of the working people as a whole"* (nearly always a euphemism for the party in Trotskyist ideology) is different that what they actually want (as expressed by their actions). In other words, a conflict exists between the workers' and the so-called "workers' state" – in Russia, the party imposed **its** concept of the interests of the working class, even against the working class itself.

Rather than indicate some kind of failure of anarchist theory, the experience of workers' self-management in both Spain and Russia indicate the authoritarian core of Trotskyist ideology. If workers do not practice mutual aid or federation then a state claiming to represent them, to be simply their tool, cannot force them to do so without exposing itself as being an alien body with power **over** the workers.

For these reasons Bakunin was correct to argue that anarchists have *"no faith except in freedom. Both [Marxists and anarchists], equally supporters of science which is to destroy superstition and replace belief, differ in the former wishing to impose it, and the latter striving to propagate it; so human groups, convinced of its truth, may organise and federate spontaneously, freely, from the bottom up, by their own momentum according to their real interests, but never according to any plan laid down in advance and imposed upon the* ***ignorant masses*** *by some superior intellects."* Anarchists, he continues, *"think that there is much more practical and intellectual common sense in the instinctive aspirations and in the real needs of the mass of the people than in the profound intelligence of all these doctors and teachers of mankind who, after so many fruitless attempts to make humanity happy, still aspire to add their own efforts."* [**Michael Bakunin: Selected Writings**, p. 198]

In summary, the problem of "localism" and any other problems faced by a social revolution will be solved in the interests of the working class only if working class people solve them themselves. For this to happen it requires working class people to manage their own affairs directly and that implies self-managed organising from the bottom up (i.e. anarchism) rather than del-

egating power to a minority at the top, to a "revolutionary" party or government. This applies economically, socially and politically. As Bakunin argued, the *"revolution should not only be made for the people's sake; it should also be made by the people."* [**No Gods, No Masters**, vol. 1, p. 141]

Thus the actual experience of the collectives and their development, rather than refuting anarchism, indicates well that it is the only real form of socialism. Attempts to nationalise the means of production inevitably disempower workers and eliminate meaningful workers' self-management or control. It does not eliminate wage labour but rather changes the name of the boss. Socialism can only be built from below. If it is not, as the Russian experience indicated, then state capitalism will be the inevitable outcome.

17. Why is Morrow's support for *"proletarian methods of production"* ironic?

Morrow states *"[i]n the midst of civil war the factory committees are demonstrating the superiority of proletarian methods of production."* [**Op. Cit.**, p. 53] This is ironic as the Bolsheviks in power fought against the factory committees and their attempts to introduce the kind of workers' self-management Morrow praises in Spain (see Maurice Brinton's **The Bolsheviks and Workers' Control** for details). Moreover, rather than seeing workers' self-management as *"proletarian methods of production"* Lenin and Trotsky thought that how a workplace was managed was irrelevant under socialism. Trotsky argued that *"[i]t would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers [a euphemism for the Party — M.B.] and not at all in the form in which individual economic organisations are administered."* Indeed, *"I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully."* [quoted by Maurice Brinton, **Op. Cit.**, p. 66 and pp. 66–7]

In other words, Trotsky both in theory and in practice opposed *"proletarian methods of production"* — and if the regime introduced by Trotsky and Lenin in Russia was **not** based on *"proletarian methods of production"* then what methods was it based on? One-man management with *"the appointment of individuals, dictators with unlimited powers"* by the government and *"the people* ***unquestioningly obey[ing] the single will*** *of the leaders of labour."* [*"The Immediate Tasks of the Soviet Government"*, Collected Works, vol. 27, pp. 267–9] In other words, the usual **bourgeois** methods of production with the workers' doing what the boss tells them. As discussed in section H.3.14, at no time did the Bolsheviks support the kind of workers' self-management introduced by the anarchist influenced workers of Spain — indeed they hindered it and replaced it with one-man management at the first opportunity (see Maurice Brinton's classic **The Bolsheviks and Workers' Control** for further details).

To point out the obvious, bourgeois methods of production means bourgeois social relations and relations of production. In other words, Morrow comments allows us to see that Lenin and Trotsky's regime was not proletarian at the point of production. How ironic. And if it was not proletarian at the point of production (i.e. at the source of **economic** power) how could it remain proletarian at the political level? Unsurprisingly, it did not — party power soon replaced workers' power and the state bureaucracy replaced the party.

Yet again Morrow's book exposes the anti-revolutionary politics of Trotskyism by allowing anarchists to show the divergence between the rhetoric of that movement and what it did when it was in power. Morrow, faced with a workers' movement influenced by anarchism, inadvertently indicates the poverty of Trotskyism when he praises the accomplishments of that movement. The reality of Leninism in power was that it eliminated the very things Morrow praises — such as *"proletarian methods of production,"* democratic militias, workers' councils and so on. Needless to say, the irony of Morrow's work is lost on most of the Trotskyists who read it.

18. Were the federations of collectives an *"abandonment"* of anarchist ideas?

From our discussion in section 15, it is clear that anarchism does not deny the need for co-ordination and joint activity, for federations of self-managed workplaces, industries and rural collectives at all levels of society. Far from it. As proven in sections 12 and 15, such federations are a basic idea of anarchism. In anarchy co-ordination flows **from below** and not imposed by a few from above. Unfortunately Marxists cannot tell the difference between solidarity from below and unity imposed from above. Morrow, for example, argues that *"the anarchist majority in the Council of Aragon led in practice to the abandonment of the anarchist theory of the autonomy of economic administration. The Council acted as a centralising agency."* [**Op. Cit.**, pp. 205–6]

Of course it does nothing of the kind. Yes, anarchists are in favour of autonomy — including the autonomy of economic administration. We are also in favour of federalism to co-ordinate join activity and promote co-operation on a wide-scale (what Morrow would, inaccuracy, call "centralism" or "centralisation"). Rather than seeing such agreements of joint activity as the "abandonment" of autonomy, we see it as an **expression** of that autonomy. It would be a strange form of "freedom" that suggested making arrangements and agreements with others meant a restriction of your liberty. For example, no one would argue that to arrange to meet your friend at a certain place and time meant the elimination of your autonomy even though it obviously reduces your "liberty" to be somewhere else at the same time.

Similarly, when an individual joins a group and takes part in its collective decisions and abides by their decisions, this does not represent the abandonment of their autonomy. Rather, it is an expression of their freedom. If we took Morrow's comment seriously then anarchists would be against all forms of organisation and association as they would mean the *"abandonment of autonomy"* (of course some Marxists **do** make that claim, but such a position indicates an essentially **negative** viewpoint of liberty, a position they normally reject). In reality, of course, anarchists are aware that freedom is impossible outside of association. Within an association absolute "autonomy" cannot exist, but such "autonomy" would restrict freedom to such a degree that it would be so self-defeating as to make a mockery of the concept of autonomy and no sane person would seek it.

Of course anarchists are aware that even the best association could turn into a bureaucracy that **does** restrict freedom. Any organisation could transform from being an expression of liberty into a bureaucratic structure which restricts liberty because power concentrates at the top, into the hands of an elite. That is why we propose specific forms of organisation, ones based on self-management, decentralisation and federalism which promote decision-making from the bottom-up and ensure that the organisation remains in the hands of its members and its policies are agreements between them rather than ones imposed upon them. For this reason the basic building block of the federation is the autonomous group assembly. It is this body which de-

cides on its own issues and mandates delegates to reach agreements within the federal structure, leaving to itself the power to countermand the agreements its delegates make. In this way autonomy is combined with co-ordination in an organisation that is structured to accurately reflect the needs and interests of its members by leaving power in their hands. In the words of Murray Bookchin, anarchists *"do not deny the need for co-ordination between groups, for discipline, for meticulous planning, and for unity in action. But [we] believe that co-ordination, discipline, planning, and unity in action must be achieved* ***voluntarily,*** *by means of self-discipline nourished by conviction and understanding, not by coercion and a mindless, unquestioning obedience to orders from above."* [**Post-Scarcity Anarchism**, p. 215]

Therefore, anarchist support for *"the autonomy of economic administration"* does not imply the lack of co-operation and co-ordination, of joint agreements and federal structures which may, to the uninformed like Morrow, seem to imply the *"abandonment"* of autonomy. As Kropotkin argued, the commune *"cannot any longer acknowledge any superior: that, above it, there cannot be anything, save the interests of the Federation, freely embraced by itself in concert with other Communes."* [**No Gods, No Masters**, vol. 1, p. 259] This vision was stressed in the CNT's Saragossa resolution on Libertarian Communism made in May, 1936, which stated that the *"the foundation of this administration will be the commune. These communes are to be autonomous and will be federated at regional and national levels to achieve their general goals. The right to autonomy does not preclude the duty to implement agreements regarding collective benefits."* [quoted by Jose Peirats, **The CNT in the Spanish Revolution**, p. 106] Hence anarchists do not see making collective decisions and working in a federation as an abandonment of autonomy or a violation of anarchist theory.

The reason for this is simple. To exercise your autonomy by joining self-managing organisations and, therefore, agreeing to abide by the decisions you help make is not a denial of that autonomy (unlike joining a hierarchical structure, we must stress). That is why anarchists have always stressed the importance of the **nature** of the associations people join **as well as** their voluntary nature — as Kropotkin argued, the *"communes of the next revolution will not only break down the state and substitute free federation for parliamentary rule; they will part with parliamentary rule within the commune itself ... They will be anarchist within the commune as they will be anarchist outside it."* [*"The Commune of Paris"*, **Selected Writings on Anarchism and Revolution**, p. 132] Moreover, within the federal structures anarchists envision, the actual day-to-day running of the association would be autonomous. There would be little or no need for the federation to interfere with the mundane decisions a group has to make day in, day out. As the Saragossa resolution makes clear:

> *"[The] commune ... will undertake to adhere to whatever general norms may be agreed by majority vote after free debate ... The inhabitants of a commune are to debate among themselves their internal problems .. . Federations are to deliberate over major problems affecting a country or province and all communes are to be represented at their reunions and assemblies, thereby enabling their delegates to convey the democratic viewpoint of their respective communes ... every commune which is implicated will have its right to have its say ... On matters of a regional nature, it is the duty of the regional federation to implement agreements ... So the starting point is the individual, moving on through the commune, to the federation and right on up finally to the confederation."* [quoted by Jose Peirats, **Op. Cit.**, pp. 106–7]

Since the Council of Aragon and the Federation of Collectives were based on a federal structure, regular meetings of mandated delegates and decision-making from the bottom up, it would be wrong to call them a *"centralising agency"* or an *"abandonment"* of the principle of *"autonomy."* Rather, they were expressions of that autonomy based around a **federal** and not centralised organisation. The autonomy of the collective, of its mass assembly, was not restricted by the federation nor did the federation interfere with the day to day running of the collectives which made it up. The structure was a federation of autonomous collectives. The role of the Council was to co-ordinate the decisions of the federation delegate meetings — in other words, purely administrative implementation of collective agreements. To confuse this with centralisation is a mistake common to Marxists, but it is still a confusion.

To summarise, what Morrow claims is an *"abandonment"* of anarchism is, in fact, an expression of anarchist ideas. The Council of Aragon and the Aragon Federation of Collectives were following the CNT's vision of libertarian communism and not abandoning it, as Morrow claims. As anyone with even a basic understanding of anarchism would know.

19. Did the experience of the rural collectives refute anarchism?

Some Leninists attack the rural collectives on similar lines as they attack the urban ones (as being independent identities and without co-ordination — see section 15 for details). They argue that *"anarchist theory"* resulted in them considering themselves as being independent bodies and so they ignored wider social issues and organisation. This meant that anarchist goals could not be achieved:

> *"Let's evaluate the Spanish collectives according to one of the basic goals set by the anarchists themselves. This was to ensure equality among the toilers. They believed that the autonomous collectives would rapidly equalise conditions among themselves through 'mutual aid' and solidarity. This did not happen ... conditions varied greatly among the Spanish collectives, with peasants at some agricultural collectives making three times that of peasants at other collectives."* [Joseph Green, **Op. Cit.**]

Of course, Green fails to mention that in the presumably *"centralised"* system created by the Bolsheviks, the official rationing system had a differentiation of **eight to one** under the class ration of May 1918. By 1921, this, apparently, had fallen to around four to one (which is still higher than the rural collectives) but, in fact, remained at eight to one due to workers in selected defence-industry factories getting the naval ration which was approximately double that of the top civilian workers' ration. [Mary McAuley, **Bread and Justice: State and Society in Petrograd 1917–1922**, pp. 292–3] This, we note, ignores the various privileges associated with state office and Communist Party membership which would increase differentials even more (and such inequality extended into other fields, Lenin for example warned in 1921 against *"giving non-Party workers a false sense of having some increase in their rights"* [Marx, Engels and Lenin, **Op. Cit.**, p. 325]). The various resolutions made by workers for equality in rations were ignored by the government (all this long before, to use Green's words *"their party degenerated into Stalinist revisionism"*).

So, if equality is important, then the decentralised rural collectives were far more successful in achieving it than the "centralised" system under Lenin (as to be expected, as the rank-and-file were in control, not a few at the top).

Needless to the collectives could not unify history instantly. Some towns and workplaces started off on a more favourable position than others. Green quotes an academic (David Miller) on this:

> *"Such variations no doubt reflected historical inequalities of wealth, but at the same time the redistributive impact of the [anarchist] federation had clearly been slight."*

Note that Green implicitly acknowledges that the collectives **did** form a federation. This makes a mockery of his claims that earlier claims that the anarchists *"believed that the village communities would enter the realm of a future liberated society if only they became autonomous collectives. They didn't see the collectives as only one step, and they didn't see the need for the collectives to be integrated into a broader social control of all production."* [**Op. Cit.**] As proven above, such assertions are either the product of ignorance or a conscious lie. We quoted numerous Spanish anarchist documents that stated the exact opposite to Green's assertions. The Spanish anarchists were well aware of the need for self-managed communities to federate. Indeed, the federation of collectives fits **exactly** pre-war CNT policy and anarchist theory (see sections 15 and 18 for details). To re-quote a Spanish Anarchist pamphlet, the village commune *"will federate with its counterparts in other localities and with the national industrial federations."* [Issac Puente, **Libertarian Communism**, p. 26] Thus what Green asserts the CNT and FAI did not see the need of, they in fact **did** see the need for and argued for their creation before the Civil War and actually created during it! Green's comments indicate a certain amount of "doublethink" — he maintains that the anarchists rejected federations while acknowledging they did federate.

However, historical differences are the product of **centuries** and so it will take some time to overcome them, particularly when such changes are not imposed by a central government. In addition, the collectives were not allowed to operate freely and were soon being hindered (if not physically attacked) by the state within a year. Green dismisses this recognition of reality by arguing *"one could argue that the collectives didn't have much time to develop, being in existence for only two and a half years at most, with the anarchists only having one year of reasonably unhindered work, but one could certainly not argue that this experience confirmed anarchist theory."* However, his argument is deeply flawed for many reasons.

Firstly, we have to point out that Green quotes Miller who is using data from collectives in Castille. Green, however, was apparently discussing the collectives of Aragon and the Levante and their respective federations (as was Miller). To state the obvious, it is hard to evaluate the activities of the Aragon or Levante federation using data from collectives in the Castille federation. Moreover, in order to evaluate the redistributive activities of the federations you need to look at the differentials before and after the federation was created. The data Miller uses does not do that and so the lack of success of the federation cannot be evaluated using Green's source. Thus Green uses data which is, frankly, a joke to dismiss anarchism. This says a lot about the quality of his critique.

As far as the Castille federation goes, Robert Alexander notes *"[a]nother feature of the work of regional federation was that of aiding the less fortunate collectives. Thus, within a year, it spent 2 000 000 pesetas on providing chemical fertilisers and machines to poorer collectives, the money from this being provided by the sale of products of the wealthier ones."* [**The Anarchists in the Spanish Civil War**, vol. 1, p. 438] He also quotes an article from an anarchist paper which states *"there does not yet exist sufficient solidarity"* between rich and poor collectives and that notes *"the*

difficulties which the State has put in the way of the development of the collectives." [**Op. Cit.**, p. 439] Thus the CNT was open about the difficulties it was experiencing in the collectives and the problems facing it.

Secondly, the collectives may have been in existence for about one year before the Stalinists attacked but their federations had not. The Castille federation was born in April, 1937 (the general secretary stated in July of that year *"[w]e have fought terrible battles with the Communists"* [**Op. Cit.**, p. 446]). The Aragon federation was created in February 1937 (the Council of Aragon was created in October 1936) and the Communists under Lister attacked in August 1937. The Levante federation was formed a few weeks after the start of the war and the attacks against them started in March 1937. The longest period of free development, therefore, was only **seven** months and not a year. Thus the federations of collectives — the means seen by anarchist theory to co-ordinate economic and social activities and promote equality — existed for only a few months before they were physically attacked by the state. Green expects miracles if he thinks history can be nullified in half a year.

Thirdly, anarchists do not think communist-anarchism, in all its many aspects, is possible overnight. Anarchists are well aware, to quote Kropotkin, the *"revolution may assume a variety of characters and differing degrees of intensity among different peoples."* [**No Gods, No Masters**, vol. 1, p. 231] Also, as noted above, we are well aware that a revolution is a **process** (*"By revolution we do not mean just the insurrectionary act"* [Malatesta, **Errico Malatesta: His Life and Ideas**, p. 156]) which will take some time to fully develop once the state has been destroyed and capital expropriated. Green's assertion that the Spanish Revolution refutes anarchist theory is clearly a false one.

Green argues that a *"vast organisational task faces the oppressed masses who are rising up to eliminate the old exploiting system, but anarchist theory just brushes aside this problem — co-ordination between collective would supposedly be easily accomplished by 'mutual aid' or 'voluntary co-operation' or, if absolutely need be, by the weakest possible federation."* [**Op. Cit.**] As can be seen from our discussion, such a claim is a false one. Anarchists are well aware of difficulties involved in a revolution. That is why we stress that revolution must come from below, by the actions of the oppressed themselves — it is far too complex to left to a few party leaders to decree the abolition of capitalism. Moreover, as proven above anarchist theory and practice is well aware of the need for organisation, co-operation and co-ordination. We obviously do not *"brush it aside."* This can be seen from Green's reference to *"the weakest possible federation."* This obviously is a cover just in case the reader is familiar with anarchist theory and history and knows that anarchists support the federation of workers' associations and communes as the organisational framework of a revolution and of the free society.

This distorted vision of anarchism even extents to other aspects of the revolution. Green decides to attack the relative lack of international links the Spanish anarchist movement had in 1936. He blames this on anarchist theory and states *"again the localist anarchist outlook would go against such preparations. True, the anarchists had had their own International association in the 1870s, separate from the original First International and the Marxists. It had flopped so badly that the anarchists never tried to resuscitate it and seem to prefer to forget about it. Given anarchist localism, it is not surprising that this International doesn't even seem to be been missed by current-day anarchists."* [**Op. Cit.**]

Actually, the anarchist International came out of the First International and was made up of the libertarian wing of that association. Moreover, in 1936 the CNT was a member of the

International Workers' Association founded in 1922 in Berlin. The IWA was small, but this was due to state and Fascist repression. For example, the German FAUD, the Italian USI and the FORA in Argentina had all been destroyed by fascist governments. However, those sections which did exist (such as the Swedish SAC and French CGTSR) **did** send aid to Spain and spread CNT and FAI news and appeals (as did anarchist groups across the world). The IWA still exists today, with sections in over a dozen countries (including the CNT in Spain). In addition, the International Anarchist Federation also exists, having done so for a number of decades, and also has sections in numerous countries. In other words, Green either knows nothing about anarchist history and theory or he does and is lying.

He attacks the lack of CNT support for Moroccan independence during the war and states *"[t]hey just didn't seem that concerned with the issue during the Civil War."* Actually, many anarchists **did** raise this important issue. Just one example, Camillo Berneri argued that *"we must intensify our propaganda in favour of Morocco autonomy."* [*"What can we do?"*, **Cienfuegos Press Anarchist Review**, no. 4, p. 51] Thus to state *"the anarchists ... didn't seem that concerned"* is simply false. Many anarchists were and publicly argued for it. Trapped as a minority force in the government, the CNT could not push through this position.

Green also points out that inequality existed between men and woman. He even quotes the anarchist women's organisation Mujeres Libres to prove his point. He then notes what the Bolsheviks did to combat sexism, *"[a]mong the methods of influence was mobilising the local population around social measures promulgated throughout the country. The banner of the struggle was not autonomy, but class-wide effort."* Two points, Mujeres Libres was a nation wide organisation which aimed to end sexism by collective action inside and outside the anarchist movement by organising women to achieve their own liberation (see Martha Ackelsberg's , **Free Women of Spain** for more details). Thus its aims and mode of struggle **was** *"class-wide"* — as anyone familiar with that organisation and its activities would know. Secondly, why is equality between men and women important? Because inequality reduces the freedom of women to control their own lives, in a word, it hinders they **autonomy.** Any campaign against sexism is based on the banner of autonomy — that Green decides to forget this suggests a lot about his politics.

Thus Green gets it wrong again and again. Such is the quality of most Leninist accounts of the Spanish revolution.

20. Does the experience of the Spanish Revolution indicate the failure of anarchism or the failure of anarchists?

Marxists usually point to the events in Catalonia after July 19th, 1936, as evidence that anarchism is a flawed theory. They bemoan the fact that, when given the chance, the anarchists did not *"seize power"* and create a *"dictatorship of the proletariat."* To re-quote Trotsky:

> *"A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society."* ["Stalinism and Bolshevism,"**Writings 1936–7**, p. 424]

However, as we argued in section 12, the Trotskyist "definition" of "workers' power" and "proletarian dictatorship" is, in fact, party power, party dictatorship and party sovereignty — **not** working class self-management. Indeed, in a letter written in 1937, Trotsky clarified what he

meant: *"Because the leaders of the CNT renounced dictatorship **for themselves** they left the place open for the Stalinist dictatorship."* [our emphasis, **Writings 1936–7**, p. 514]

Hence the usual Trotskyist lament concerning the CNT is that the anarchist leaders did not seize power themselves and create the so-called *"dictatorship of the proletariat"* (i.e. the dictatorship of those claiming to represent the proletariat). A strange definition of *"workers' power,"* we must admit. The "leaders" of the CNT and FAI quite rightly rejected such a position — unfortunately they also rejected the anarchist position at the same time, as we will see.

Trotsky states that the *"leaders of the CNT ... explained their open betrayal of the theory of anarchism by the pressure of 'exceptional circumstances' ... Naturally, civil war is not a peaceful and ordinary but an 'exceptional circumstance.' Every serious revolutionary organisation, however, prepares precisely for 'exceptional circumstances.'"* [*"Stalinism and Bolshevism"*, **Op. Cit.**, pp. 423–4]

Trotsky is, for once, correct. We will ignore the obvious fact that his own (and every other Leninist) account of the degeneration of the Russian Revolution into Stalinism is a variation of the *"exceptional circumstances"* excuse and turn to his essential point. In order to evaluate anarchism and the actions of the CNT we have to evaluate **all** the revolutionary situations it found itself in, **not** just July, 1936 in Catalonia. This is something Trotsky and his followers seldom do — for reasons that will become clear.

Obviously space considerations does not allow us to discuss every revolutionary situation anarchism faced. We will, therefore, concentrate on the Russian Revolution and the activities of the CNT in Spain in the 1930s. These examples will indicate that rather than signifying the failure of anarchism, the actions of the CNT during the Civil War indicate the failure of anarchists to apply anarchist theory and so signifies a betrayal of anarchism. In other words, that anarchism is a valid form of revolutionary politics.

If we look at the Russian Revolution, we see anarchist theory gain its most wide scale influence in those parts of the Ukraine protected by the Makhnovist army. The Makhnovists fought against White (pro-Tsarist), Red and Ukrainian Nationalists in favour of a system of *"free soviets"* in which the *"working people themselves must freely choose their own soviets, which are to carry out the will and desires of the working people themselves. that is to say, **administrative**, not ruling councils."* As for the economy, the *"land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised."* [*"Some Makhnovist Proclamations"*, contained in Peter Arshinov, **The History of the Makhnovist Movement**, p. 273]

To ensure this end, the Makhnovists refused to set up governments in the towns and cities they liberated, instead urging the creation of free soviets so that the working people could govern themselves. Taking the example of Aleksandrovsk, once they had liberated the city the Makhnovists *"immediately invited the working population to participate in a general conference ... it was proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations ... The first conference was followed by a second. The problems of organising life according to principles of self-management by workers were examined and discussed with animation by the masses of workers, who all welcomed this ideas with the greatest enthusiasm ... Railroad workers took the first step ... They formed a committee charged with organising the railway network of the region ... From this point, the proletariat of Aleksandrovsk began systematically to the problem of creating organs of self-management."* [**Op. Cit.**, p. 149]

They also organised free agricultural communes which *"[a]dmittedly .. . were not numerous, and included only a minority of the population .. . But what was most precious was that these communes were formed by the poor peasants themselves. The Makhnovists never exerted any pressure on the peasants, confining themselves to propagating the idea of free communes."* [**Op. Cit.**, p. 87] Makhno played an important role in abolishing the holdings of the landed gentry. The local soviet and their district and regional congresses equalised the use of the land between all sections of the peasant community. [**Op. Cit.**, pp. 53–4]

Moreover, the Makhnovists took the time and energy to involve the whole population in discussing the development of the revolution, the activities of the army and social policy. They organised numerous conferences of workers', soldiers' and peasants' delegates to discuss political and social issues. They organised a regional congress of peasants and workers when they had liberated Aleksandrovsk. When the Makhnovists tried to convene the third regional congress of peasants, workers and insurgents in April 1919 and an extraordinary congress of several regions in June 1919 (including Red Army soldiers) the Bolsheviks viewed them as counter-revolutionary, tried to ban them and declared their organisers and delegates outside the law. For example, Trotsky issued order 1824 which stated the June 1919 congress was forbidden, that to inform the population of it was an act of high treason and all delegates should be arrested immediately as were all the spreading the call. [**Op. Cit.**, p. 98–105 and p. 122–31]

The Makhnovists replied by holding the conferences anyway and asking *"[c]an there exist laws made by a few people who call themselves revolutionaries, which permit them to outlaw a whole people who are more revolutionary than they are themselves?"* and *"[w]hose interests should the revolution defend: those of the Party or those of the people who set the revolution in motion with their blood?"* Makhno himself stated that he *"consider[ed] it an inviolable right of the workers and peasants, a right won by the revolution, to call conferences on their own account, to discuss their affairs."* [**Op. Cit.**, p. 103 and p. 129] These actions by the Bolsheviks should make the reader ponder if the elimination of workers' democracy during the civil war can fully be explained by the objective conditions facing Lenin's government or whether Leninist ideology played an important role in it. As Arshinov argues, *"[w]hoever studies the Russian Revolution should learn it [Trotsky's order no. 1824] by heart."* [**Op. Cit.**, p. 123] Obviously the Bolsheviks considered that soviet system was threatened if soviet conferences were called and the "dictatorship of the proletariat" was undermined if the proletariat took part in such events.

In addition, the Makhnovists *"full applied the revolutionary principles of freedom of speech, of thought, of the press, and of political association. In all cities and towns occupied by the Makhnovists, they began by lifting all the prohibitions and repealing all the restrictions imposed on the press and on political organisations by one or another power."* Indeed, the *"only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist-Revolutionaries and other statists was a prohibition on the formation of those 'revolutionary committees' which sought to impose a dictatorship over the people."* [**Op. Cit.**, p. 153 and p. 154]

The army itself, in stark contrast to the Red Army, was fundamentally democratic (although, of course, the horrific nature of the civil war did result in a few deviations from the ideal — however, compared to the regime imposed on the Red Army by Trotsky, the Makhnovists were much more democratic movement). Arshinov proves a good summary:

> *"The Makhnovist insurrectionary army was organised according to three fundamental principles: voluntary enlistment, the electoral principle, and self-discipline.*

> *"**Voluntary enlistment** meant that the army was composed only of revolutionary fighters who entered it of their own free will.*
>
> *"**The electoral principle** meant that the commanders of all units of the army, including the staff, as well as all the men who held other positions in the army, were either elected or accepted by the insurgents of the unit in question or by the whole army.*
>
> *"**Self-discipline** meant that all the rules of discipline were drawn up by commissions of insurgents, then approved by general assemblies of the various units; once approved, they were rigorously observed on the individual responsibility of each insurgent and each commander."* [**Op. Cit.**, p. 96]

Thus the Makhnovists indicate the validity of anarchist theory. They organised the self-defence of their region, refused to form of a "revolutionary" government and so the life of the region, its social and revolutionary development followed the path of self-activity of the working people who did not allow any authorities to tell them what to do. They respected freedom of association, speech, press and so on while actively encouraging workers' and peasants' self-management and self-organisation.

Moving to the Spanish movement, the various revolts and uprisings organised by the CNT and FAI that occurred before 1936 were marked by a similar revolutionary developments as the Makhnovists. We discuss the actual events of the revolts in 1932 and 1933 in more detail in section 14 and so will not repeat ourselves here. However, all were marked by the anarchist movement attacking town halls, army barracks and other sources of state authority and urging the troops to revolt and side with the masses (the anarchists paid a lot of attention to this issue — like the French syndicalists they produced anti-militarist propaganda arguing that soldiers should side with their class and refuse orders to fire on strikers and to join popular revolts). The revolts also saw workers taking over their workplaces and the land, trying to abolish capitalism while trying to abolish the state. In summary, they were **insurrections** which combined political goals (the abolition of the state) and social ones (expropriation of capital and the creation of self-managed workplaces and communes).

The events in Asturias in October 1934 gives a more detailed account of nature of these insurrections. The anarchist role in this revolt has not been as widely known as it should be and this is an ideal opportunity to discuss it. Combined with the other insurrections of the 1930s it clearly indicates that anarchism is a valid form of revolutionary theory.

While the CNT was the minority union in Asturias, it had a considerable influence of its own (the CNT had over 22 000 affiliates in the area and the UGT had 40 000). The CNT had some miners in their union (the majority were in the UGT) but most of their membership was above ground, particularly in the towns of Aviles and Gijon. The regional federation of the CNT had joined the Socialist Party dominated "Alianza Obrera," unlike the other regional federations of the CNT.

When the revolt started, the workers organised attacks on barracks, town halls and other sources of state authority (just as the CNT revolts of 1932 and 1933 had). Bookchin indicates that *"[s]tructurely, the insurrection was managed by hundreds of small revolutionary committees whose delegates were drawn from unions, parties, the FAI and even anti-Stalinist Communist groups. Rarely, if at all, were there large councils (or 'soviets') composed of delegates from factories."* [**The Spanish Anarchists**, p. 249] This, incidentally, indicates that Morrow's claims that in Asturias

"the Workers' Alliances were most nearly like soviets, and had been functioning for a year under socialist and Communist Left leadership" are false. [**Op. Cit.**, p. 31] The claims that the Asturias uprising had established soviets was simply Communist and government propaganda.

In fact, the Socialists *"generally functioned through tightly knit committees, commonly highly centralised and with strong bureaucratic proclivities. In Asturias, the UGT tried to perpetuate this form wherever possible ... But the mountainous terrain of Asturias made such committees difficult to co-ordinate, so that each one became an isolated miniature central committee of its own, often retaining its traditional authoritarian character."* The anarchists, on the other hand, *"favoured looser structures, often quasi-councils composed of factory workers and assemblies composed of peasants. The ambience of these fairly decentralised structures, their improvisatory character and libertarian spirit, fostered an almost festive atmosphere in Anarchist-held areas."* [**Op. Cit.**, p. 249] Bookchin quotes an account which compares anarchist La Felguera with Marxist Sama, towns of equal size and separated only by the Nalon river:

> *"[The October Insurrection] triumphed immediately in the metallurgical and in the mining town... . Sama was organised along military lines. Dictatorship of the proletariat, red army, Central Committee, discipline. authority ... La Felguera opted for* ***comunismo libertario****: the people in arms, liberty to come and go, respect for the technicians of the Duro-Felguera metallurgical plant, public deliberations of all issues, abolition of money, the rational distribution of food and clothing. Enthusiasm and gaiety in La Felguera; the sullenness of the barracks in Sama. The bridges [of Sama] were held by a corp of guards complete with officers and all. No one could enter or leave Sama without a safe-conduct pass, or walk through the streets without passwords. All of this was ridiculously useless, because the government troops were far away and the Sama bourgeoisie disarmed and neutralised ... The workers of Sama who did not adhere to the Marxist religion preferred to go to La Felguera, where at least they could breathe. Side by side there were two concepts of socialism: the authoritarian and the libertarian; on each bank of the Nalon, two populations of brothers began a new life: with dictatorship in Sama; with liberty in La Felguera."* [**Op. Cit.**, pp. 249–50]

Bookchin notes that *"[i]n contrast to the severely delimited Marxist committee in Sama, La Felguera workers met in popular assembly, where they socialised the industrial city's economy. The population was divided into wards, each of which elected delegates to supply and distribution committees... The La Felguera commune ... proved to be so successful, indeed so admirable, that surrounding communities invited the La Felguera Anarchists to advice them on reorganising their own social order. Rarely were comparable institutions created by the Socialists and, where they did emerge, it was on the insistence of the rank-and-file workers."* [**Op. Cit.**, p. 250]

In other words, the Asturias uprising saw anarchists yet again applying their ideas with great success in a revolutionary situation. As Bookchin argues:

> *"Almost alone, the Anarchists were to create viable revolutionary institutions structured around workers' control of industry and peasants' control of land. That these institutions were to be duplicated by Socialist workers and peasants was due in small measure to Anarchist example rather than Socialist precept. To the degree that the Asturian miners and industrial workers in various communities established direct control over the local*

economy and structured their committees along libertarian lines, these achievements were due to Anarchist precedents and long years of propaganda and education." [**Op. Cit.**, p. 250–1]

Unlike their Socialist and Communist allies, the anarchists in Asturias took the Alianza's slogan *"Unity, Proletarian Brothers"* seriously. A key factor in the defeat of the uprising (beyond its isolation due to socialist incompetence elsewhere — see section 6) was the fact that *"[s]o far as the Aviles and Gijon Anarchists were concerned ... their Socialist and Communist 'brothers' were to honour the slogan only in the breach. When Anarchist delegates from the seaports arrived in Oviedo on October 7, pleading for arms to resist the imminent landings of government troops, their requests were totally ignored by Socialists and Communists who, as [historian Gabriel] Jackson notes, 'clearly mistrusted them.' The Oviedo Committee was to pay a bitter price for its refusal. The next day, when Anarchist resistance, hampered by the pitiful supply of weapons, failed to prevent the government from landing its troops, the way into Asturias lay open. The two seaports became the principal military bases for launching the savage repression of the Asturian insurrection that occupied so much of October and claimed thousands of lives."* [Murray Bookchin, **Op. Cit.**, p. 248]

Therefore, to state as Morrow does that before July 1936, *"anarchism had never been tested on a grand scale"* and now *"leading great masses, it was to have a definite test"* is simply wrong. [**Op. Cit.**, p. 101] Anarchism had had numerous definite tests before involving *"great masses,"* both in Spain and elsewhere. The revolts of the 1930s, the Makhnovists in the Ukraine, the factory occupations in Italy in 1920 (see section A.5.5) and in numerous other revolutionary and near revolutionary situations anarchism had been tested **and had passed** those tests. Defeat came about by the actions of the Marxists (in the case of Asturias and Italy) or by superior force (as in the 1932 and 1933 Spanish insurrections and the Ukraine) **not** because of anarchist theory or activities. At no time did they collaborate with the bourgeois state or compromise their politics. By concentrating on July 1936, Marxists effectively distort the history of anarchism — a bit like arguing the actions of the Social Democratic Party in crushing the German discredits Marxism while ignoring the actions and politics of the council communists during it or the Russian Revolution.

But the question remains, why did the CNT and FAI make such a mess (politically at least) of the Spanish Revolution of 1936? However, even this question is unfair as the example of the Aragon Defence Council and Federation of Collectives indicate that anarchists **did** apply their ideas successfully in certain areas during that revolution.

Morrow is aware of that example, as he argues that the *"Catalonian [i.e. CNT] militia marched into Aragon as an army of social liberation . .. Arriving in a village, the militia committees sponsor the election of a village anti-fascist committee ... [which] organises production on a new basis"* and *"[e]very village wrested from the fascists was transformed into a forest of revolution."* Its *"municipal councils were elected directly by the communities. The Council of Aragon was at first largely anarchist."* He notes that *"[l]ibertarian principles were attempted in the field of money and wages"* yet he fails to mention the obvious application of libertarian principles in the field of **politics** with the state abolished and replaced by a federation of workers' associations. To do so would be to invalidate his basic thesis against anarchism and so it goes unmentioned, hoping the reader will not notice this confirmation of anarchist **politics** in practice. [**Op. Cit.**, p. 53, p. 204 and p. 205]

So, from the experience of the Ukraine, the previous revolts in 1932, 1933 and 1934 and the example of the Council of Aragon it appears clear that rather than exposing anarchist theory (as Marxists claim), the example of July 1936 in Catalonia is an aberration. Anarchist politics had

been confirmed as a valid revolutionary theory many times before and, indeed, shown themselves as the only one to ensure a free society. However, why did this aberration occur?

Most opponents of anarchism provide a rather (in)famous quote from FAI militant Juan Garcia Oliver, describing the crucial decision made in Catalonia in July of '36 to co-operate with Companys' government to explain the failure of the CNT to "seize power":

> *"The CNT and FAI decided on collaboration and democracy, eschewing revolutionary totalitarianism ... by the anarchist and Confederal dictatorship."* [quoted by Stuart Christie, **We, the Anarchists!**, p. 105]

In this statement Garcia Oliver describes the capitalist state as *"democracy"* and refers to the alternative of the directly democratic CNT unions taking power as "totalitarianism" and "dictatorship." Marxists tend to think this statement tells us something about the CNT's original program in the period leading up to the crisis of July 1936. As proven above, any such assertion would be false (see also section 8). In fact this statement was made in December of 1937, many months after Garcia Oliver and other influential CNT activists had embarked upon collaboration in the government ministries and Republican army command. The quote is taken from a report by the CNT leadership, presented by Garcia Oliver and Mariano Vazquez (CNT National Secretary in 1937) at the congress of the International Workers Association (IWA). The CNT was aware that government participation was in violation of the principles of the IWA and the report was intended to provide a rationalisation. That report is an indication of just how far Garcia Oliver and other influential CNT radicals had been corrupted by the experience of government collaboration.

Garcia Oliver's position in July of 1936 had been entirely different. He had been one of the militants to argue in favour of overthrowing the Companys government in Catalonia in the crucial union assemblies of July 20–21. As Juan Gomez Casas argues:

> *"The position supported by Juan Garcia Oliver [in July of '36] has been described as 'anarchist dictatorship' Actually, though, Oliver was advocating application of the goals of the Saragossa Congress in Barcelona and Catalonia at a time in history when, in his opinion, libertarian communism was a real possibility. It would always signify dissolution of the old parties dedicated to the idea of [state] power, or at least make it impossible for them to pursue their politics aimed at seizure of power. There will always be pockets of opposition to new experiences and therefore resistance to joining 'the spontaneity of the popular masses.' In addition, the masses would have complete freedom of expression in the unions and in the economic organisations of the revolution as well as in their political organisations."* [**Anarchist Organisation: The History of the FAI**, p. 188f]

Those libertarians who defended government participation in Spain argued that a non-hierarchical re-organisation of society in Catalonia in July of '36 could only have been imposed by force, against the opposition of the parties and sectors of society that have a vested interest in existing inequalities. They argued that this would have been a "dictatorship," no better than the alternative of government collaboration.

If this argument were valid, then it logically means that anarchism itself would be impossible, for there will always be sectors of society – bosses, judges, politicians, etc. — who will oppose

social re-organisation on a libertarian basis. As Malatesta once argued, some people *"seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the **freedom** of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!"* [**Anarchy**, p. 41] It is doubtful he would have predicted that certain anarchists would be included in such believers!

Neither anarchism nor the CNT program called for suppressing other viewpoints. The various viewpoints that existed among the workforce and population would be reflected in the deliberations and debates of the workplace and community assemblies as well as in the various local and regional congresses and conference and on their co-ordinating Councils. The various political groups would be free to organise, publish their periodicals and seek influence in the various self-managed assemblies and structures that existed. The CNT would be dominant because it had overwhelming support among the workers of Catalonia (and would have remained dominant as long as that continued).

What is essential to a state is that its authority and armed power be top-down, separate and distinct from the population. Otherwise it could not function to protect the power of a boss class. When a population in society directly and democratically controls the armed force (in fact, effectively **is** the armed force as in the case of the CNT militias), directly manages its own fairs in decentralised, federal organisations based on self-management from the bottom upwards and manages the economy, this is not a "state" in the historical sense. Thus the CNT would not in any real sense had "seized power" in Catalonia, rather it would have allowed the mass of people, previously disempowered by the state, to take control of their own lives — both individually and collectively — by smashing the state and replacing it by a free federation of workers' associations.

What this means is that a non-hierarchical society must be imposed by the working class against the opposition of those who would lose power. In building the new world we must destroy the old one. Revolutions are authoritarian by their very nature, but only in respect to structures and social relations which promote injustice, hierarchy and inequality. It is not "authoritarian" to destroy authority, in other words! Revolutions, above all else, must be libertarian in respect to the oppressed (indeed, they are acts of liberation in which the oppressed end their oppression by their own direct action). That is, they must develop structures that involve the great majority of the population, who have previously been excluded from decision making about social and economic issues.

So the dilemma of "anarchist dictatorship" or "collaboration" was a false one and fundamentally wrong. It was never a case of banning parties, etc. under an anarchist system, far from it. Full rights of free speech, organisation and so on should have existed for all but the parties would only have as much influence as they exerted in union, workplace, community, militia (and so on) assemblies, as should be the case! "Collaboration" yes, but within the rank and file and within organisations organised in a libertarian manner. Anarchism does not respect the "freedom" to be a capitalist, boss or politician.

Instead of this "collaboration" from the bottom up, the CNT and FAI committees favoured "collaboration" from the top down. In this they followed the example of the UGT and its "Workers' Alliances" rather than their own activities previous to the military revolt. Why? Why did the CNT and FAI in Catalonia reject their previous political perspective and reject the basis ideas of anarchism? As shown above, the CNT and FAI has successfully applied their ideas in many insurrections before hand. Why the change of direction? There were two main reasons.

Firstly, while a majority in Catalonia and certain other parts of Spain, the CNT and FAI were a minority in such areas as Castille and Asturias. To combat fascism required the combined forces of all parties and unions and by collaborating with a UGT-like "Anti-Fascist Alliance" in Catalonia, it was believed that such alliances could be formed elsewhere, with equality for the CNT ensured by the Catalan CNT's decision of equal representation for minority organisations in the Catalan Anti-Fascist Committee. This would, hopefully, also ensure aid to CNT militias via the government's vast gold reserves and stop foreign intervention by Britain and other countries to protect their interests if libertarian communism was declared.

However, as Vernon Richards argues:

> *"This argument contains ... two fundamental mistakes, which many of the leaders of the CNT-FAI have since recognised, but for which there can be no excuse, since they were not mistakes of judgement but the deliberate abandonment of the principles of the CNT. Firstly, that an armed struggle against fascism or any other form of reaction could be waged more successfully within the framework of the State and subordinating all else, including the transformation of the economic and social structure of the country, to winning the war. Secondly, that it was essential, and possible, to collaborate with political parties — that is politicians — honestly and sincerely, and at a time when power was in the hands of the two workers organisations...*
>
> *"All the initiative ... was in the hands of the workers. The politicians were like generals without armies floundering in a desert of futility. Collaboration with them could not, by any stretch of the imagination, strengthen resistance to Franco. On the contrary, it was clear that collaboration with political parties meant the recreation of governmental institutions and the transferring of initiative from the armed workers to a central body with executive powers. By removing the initiative from the workers, the responsibility for the conduct of the struggle and its objectives were also transferred to a governing hierarchy, and this could not have other than an adverse effect on the morale of the revolutionary fighters."* [**Lessons of the Spanish Revolution**, p. 42]

In addition, in failing to take the initiative to unite the working class independently of the Republican state at the crucial moment, in July of '36, the CNT of Catalonia was in effect abandoning the only feasible alternative to the Popular Front strategy. Without a libertarian system of popular self-management, the CNT and FAI had no alternative but to join the bourgeois state. For a revolution to be successful, as Bakunin and Kropotkin argued, it needs to create libertarian organisations (such as workers' associations, free communes and their federations) which can effectively replace the state and the market, that is to create a widespread libertarian organisation for social and economic decision making through which working class people can start to set their own agendas. Only by going this can the state and capitalism be effectively smashed. If this is not done and the state is ignored rather than smashed, it continue and get stronger as it will be the only medium that exists for wide scale decision making. This will result in revolutionaries having to work within it, trying to influence it since no other means exist to reach collective decisions.

The failure to smash the state, this first betrayal of anarchist principles, led to all the rest, and so the defeat of the revolution. Not destroying the state meant that the revolution could never

be fully successful economically as politics and economics are bound together so closely. Only under the political conditions of anarchism can its economic conditions flourish and vice versa.

The CNT had never considered a "strategy" of collaboration with the Popular Front prior to July of '36. In the months leading up to the July explosion, the CNT had consistently criticised the Popular Front strategy as a fake unity of leaders over the workers, a strategy that would subordinate the working class to capitalist legality. However, in July of '36, the CNT conferences in Catalonia had not seen clearly that their "temporary" participation in the Anti-Fascist Militia Committee would drag them inexorably into a practice of collaboration with the Popular Front. As Christie argues, *"the Militias Committee was a compromise, an artificial political solution ... It ... drew the CNT-FAI leadership inexorably into the State apparatus, until them its principle enemy, and led to the steady erosion of anarchist influence and credibility."* [**Op. Cit.**, p. 105]

Secondly, the fear of fascism played a key role. After all, this was 1936. The CNT and FAI had seen their comrades in Italy and Germany being crushed by fascist dictatorships, sent to concentration camps and so on. In Spain, Franco's forces were slaughtering union and political militants and members by the tens of thousands (soon to reach hundreds of thousands by the end of the war and beyond). The insurrection had not been initiated by the people themselves (as had the previous revolts in the 1930s) and this also had a psychological impact on the decision making process. The anarchists were, therefore, in a position of being caught between two evils — fascism and the bourgeois state, elements of which had fought with them on the streets. To pursue anarchist politics at such a time, it was argued, could have resulted in the CNT fighting on two fronts — against the fascists and also against the Republican government. Such a situation would have been unbearable and so it was better to accept collaboration than aid Fascism by dividing the forces of the anti-fascist camp.

However, such a perspective failed to appreciate the depth of hatred the politicians and bourgeois had for the CNT. Indeed, by their actions it would appear they preferred fascism to the social revolution. So, in the name of "anti-fascist" unity, the CNT worked with parties and classes which hated both them and the revolution. In the words of Sam Dolgoff *"both before and after July 19th, an unwavering determination to crush the revolutionary movement was the leitmotif behind the policies of the Republican government; irrespective of the party in power."* [**The Anarchist Collectives**, p. 40]

Rather than eliminate a civil war developing within the civil war, the policy of the CNT just postponed it — until such time as the state was stronger than the working class. The Republican government was quite happy to attack the gains of the revolution, physically attacking rural and urban collectives, union halls, assassinating CNT and FAI members of so on. The difference was the CNT's act only postponed such conflict until the balance of power had shifted back towards the status quo.

Moreover, the fact that the bourgeois republic was fighting fascism could have meant that it would have tolerated the CNT social revolution rather than fight it (and so weakening its own fight against Franco). However, such an argument remains moot.

It is clear that anti-fascism destroyed the revolution, not fascism. As a Scottish anarchist in Barcelona during the revolution argued, *"Fascism is not something new, some new force of evil opposed to society, but is only the old enemy, Capitalism, under a new and fearful sounding name ... Anti-Fascism is the new slogan by which the working class is being betrayed."* [Ethal McDonald, **Workers Free Press**, Oct. 1937] This was also argued by the **Friends of Durruti** who stated

that *"[d]emocracy defeated the Spanish people, not Fascism."* [*"The Friends of Durruti accuse"*, **Class War on the Home Front**, Wildcat Group (ed.), p. 30]

The majority at the July 20–21 conferences went along with proposal of postponing the social revolution, of starting the work of creating libertarian communism, and smashing the state and replacing it with a federation of workers' assemblies. Most of the CNT militants there saw it as a temporary expedient, until the rest of Spain was freed from Franco's forces (in particular, Aragon and Saragossa). Companys' (the head of the Catalan government) had proposed the creation of a body containing representatives of all anti-fascist parties and unions called the *"Central Committee of Anti-Fascist Militias,"* sponsored by his government. The CNT meeting agreed to this proposal, though only on condition that the CNT be given the majority on it. A sizeable minority of delegates were apparently disgusted by this decision. The delegation from Bajo Llobregat County (an industrial area south of Barcelona) walked out saying they would never go along with government collaboration.

Therefore, the decision to postpone the revolution and so to ignore the state rather than smashing was a product of isolation and the fear of a fascist victory. However, while "isolation" may explain the Catalan militants' fears and so decisions, it does not justify their decision. If the CNT of Catalonia had given Companys the boot and set up a federation of workplace and community assemblies in Catalonia, uniting the rank-and-file of the other unions with the CNT, this would have strengthened the resolve of workers in other parts of Spain, and it might have also inspired workers in nearby countries to move in a similar direction.

Isolation, the uneven support for a libertarian revolution across Spain and the dangers of fascism were real problems, but they do not excuse the libertarian movement for its mistakes. On the contrary, in following the course of action advised by leaders like Horacio Prieto and Abad Diego de Santillan, the CNT only weakened the revolution and helped to discredit libertarian socialism. After all, as Bakunin and Kropotkin continually stressed, revolutions break out in specific areas and then spread outward — isolation is a feature of revolution which can only be overcome by action, by showing a practical example which others can follow.

Most of the CNT militants at the July 20th meeting saw the compromise as a temporary expedient, until the rest of Spain was freed from Franco's forces (in particular, Aragon and Saragossa). As the official account states, *"[t]he situation was considered and it was unanimously decided not to mention Libertarian Communism until such time as we had captured that part of Spain that was in the hands of the rebels."* [quoted by Christie, **Op. Cit.**, p. 102] However, the membership of the CNT decided **themselves** to start the social revolution (*"very rapidly collectives ... began to spring up. It did not happen on instructions from the CNT leadership ... the initiative came from CNT militants"* [Ronald Fraser, **Blood of Spain**, p. 349]). The social revolution began anyway, from below, but without the key political aspect (abolition of the state) and so was fatally compromised from the beginning.

As Stuart Christie argues:

> *"The higher committees of the CNT-FAI-FIJL in Catalonia saw themselves caught on the horns of a dilemma: social revolution, fascism or bourgeois democracy. Either they committed themselves to the solutions offered by social revolution, regardless of the difficulties involved in fighting both fascism and international capitalism, or, through fear of fascism ... they sacrificed their anarchist principles and revolutionary objectives to bolster, to become part of the bourgeois state ... Faced with an imperfect state of*

affairs and preferring defeat to a possibly Pyrrhic victory, Catalan anarchist leadership renounced anarchism in the name of expediency and removed the social transformation of Spain from their agenda.

"But what the CNT-FAI leaders failed to grasp was that the decision whether or not to implement Libertarian Communism was not theirs to make. Anarchism was not something which could be transformed from theory to practice by organisational decree...

"What the CNT-FAI leadership had failed to take on board was the fact that the spontaneous defensive movement of 19 July had developed a political direction of its own. On their own initiative, without any intervention by the leadership of the unions or political parties, the rank and file militants of the CNT, representing the dominant force within the Barcelona working class, together with other union militants had, with the collapse of State power, ... been welded ... into genuinely popular non-partisan revolutionary committees ... in their respective neighbourhoods. They were the natural organisms of the revolution itself and direct expression of popular power." [**Op. Cit.**, p. 99]

In other words, the bulk of the CNT-FAI membership acted in an anarchist way while the higher committees compromised their politics and achievements in the name of anti-fascist unity. In this the membership followed years of anarchist practice and theory. It was fear of fascism which made many of the leading militants of the CNT abandon anarchist politics and instead embrace "anti-fascist unity" and compromise with the bourgeois republic. To claim that July 1936 indicated the failure of anarchism means to ignore the constructive work of millions of CNT members in their workplaces, communities and militias and instead concentrate on a few militants who made the terrible mistake of ignoring their political ideas in an extremely difficult situation. As we said above, this may explain the decision but it does not justify it.

Therefore, it is clear that the experiences of the CNT and FAI in 1936 indicate a failure of anarchists to apply their politics rather than the failure of those politics. The examples of the Makhnovists, the revolts in Spain between 1932 and 1934 as well as the Council of Aragon show beyond doubt that this is the case. Rather than act as anarchists in July 1936, the militants of the Catalan CNT and FAI ignored their basic ideas (not lightly, we stress, but in response to real dangers). They later justified their decisions by putting their options in a Marxist light — "either we impose libertarian communism, and so become an anarchist dictatorship, or we collaborate with the democratic government." As Vernon Richards makes clear:

"Such alternatives are contrary to the most elementary principles of anarchism and revolutionary syndicalism. In the first place, an 'anarchist dictatorship' is a contradiction in terms (in the same way as the 'dictatorship of the proletariat' is), for the moment anarchists impose their social ideas on the people by force, they cease being anarchists ... the arms of the CNT-FAI held could be no use for imposing libertarian communism ... The power of the people in arms can only be used in the defence of the revolution and the freedoms won by their militancy and their sacrificed. We do not for one moment assume that all social revolutions are necessarily anarchist. But whatever form the revolution against authority takes, the role of anarchists is clear: that of inciting the people to abolish capitalistic property and the institutions through which it exercises its power for the exploitation of the majority by a minority... the role of anarchists [is] to support, to incite and encourage the development of the social revolution and to frustrate any

attempts by the bourgeois capitalist state to reorganise itself, which it would seek to do." [**Op. Cit.**, pp. 43–6]

Their compromise in the name of anti-fascist unity contained the rest of their mistakes. Joining the "Central Committee of Anti-Fascist Militias" was the second mistake as at no time could it be considered as the embryo of a new workers' power. It was, rather, an organisation like the pre-war UGT "Workers' Alliances" — an attempt to create links between the top-level of other unions and parties. Such an organisation, as the CNT recognised before the war (see section 5), could not be a means of creating a revolutionary federation of workers' associations and communes and, in fact, a hindrance to such a development, if not its chief impediment.

Given that the CNT had rejected the call for revolution in favour of anti-fascist unit on July 20th, such a development does not reflect the CNT's pre-war program. Rather it was a reversion to Felix Morrow's Trotskyist position of joining the UGT's "Workers' Alliance" in spite of its non-revolutionary nature (see section 5).

The CNT did not carry out its program (and so apply anarchist politics) and so did not replace the Generalitat (Catalan State) with a Defence Council in which only union/workplace assemblies (not political parties) were represented. To start the process of creating libertarian communism all the CNT would have had do was to call a Regional Congress of unions and invite the UGT, independent unions and unorganised workplaces to send delegates. It could also have invited the various neighbourhood and village defence committees that had either sprung up spontaneously or were already organised before the war as part of the CNT. Unlike the other revolts it took part in the 1930s, the CNT did not apply anarchist politics. However, to judge anarchism by this single failure means to ignore the whole history of anarchism and its successful applications elsewhere, including by the CNT and FAI during numerous revolts in Spain during the 1930s and in Aragon in 1936.

Ironically enough, Kropotkin had attacked the official CNT line of not mentioning Libertarian Communism *"until such time as we had captured that part of Spain that was in the hands of the rebels."* In analysing the Paris Commune Kropotkin had lambasted those who had argued *"Let us first make sure of victory, and then see what can be done."* His comments are worth quoting at length:

> *"Make sure of victory! As if there were any way of forming a free commune without laying hands upon property! As if there were any way of conquering the foe while the great mass of the people is not directly interested in the triumph of the revolution, by seeing that it will bring material, moral and intellectual well-being to everybody! They tried to consolidate the Commune first and defer the social revolution until afterward, whereas the only way to go about it was* ***to consolidate the Commune by means of the social revolution****.*
>
> *"The same thing happened with regard to the principle of government. By proclaiming the free Commune, the people of Paris proclaimed an essential anarchist principle, which was the breakdown of the state.. .*
>
> *"And yet, if we admit that a central government to regulate the relations of communes between themselves is quite needless, why should we admit its necessity to regulate the mutual relations of the groups which make up each commune? ... There is no more reason for a government inside the commune than for a government outside."* [*"The*

Commune of Paris", **Selected Writings on Anarchism and Revolution**, pp. 126–7]

Kropotkin's argument was sound, as the CNT discovered. By waiting until victory in the war they were defeated. Kropotkin also indicated the inevitable effects of the CNT's actions in co-operating with the state and joining representative bodies. In his words:

> *"Paris sent her devoted sons to the town hall. There, shelved in the midst of files of old papers, obliged to rule when their instincts prompted them to be and to act among the people, obliged to discuss when it was needful to act, to compromise when no compromise was the best policy, and, finally, losing the inspiration which only comes from continual contact with the masses, they saw themselves reduced to impotence. Being paralysed by their separation from the people — the revolutionary centre of light and heat — they themselves paralysed the popular initiative."* [**Op. Cit.**, p. 127]

Which, in a nutshell, was what happened to the leading militants of the CNT who collaborated with the state. As anarchist turned Minister admitted after the war, *"[w]e were in the government, but the streets were slipping away from us. We had lost the workers' trust and the movement's unity had been whittled away."* [**No Gods, No Masters**, vol. 2, p. 274] The actions of the CNT-FAI higher committees and Ministers helped paralyse and defeat the May Days revolt of 1937. The CNT committees and leaders become increasingly isolated from the people, they compromised again and again and, ultimately, became an impotent force. Kropotkin was proved correct. Which means that far from refuting anarchist politics or analysis, the experience of the CNT-FAI in the Spanish Revolution

confirms it.

In summary, therefore, the Spanish Revolution of 1936 indicates the failure of anarchists rather than the failure of anarchism.

One last point, it could be argued that anarchist theory allowed the leadership of the CNT and FAI to paint their collaboration with the state as a libertarian policy. That is, of course, correct. Anarchism is against the so-called "dictatorship of the proletariat" just as much as it is against the actual dictatorship of the bourgeoisie (i.e. the existing system and its off-shoots such as fascism). This allowed the CNT and FAI leaders to argue that they were following anarchist theory by not destroying the state completely in July 1936. Of course, such a position cannot be used to discredit anarchism simply because such a revision meant that it can never be libertarian to abolish government and the state. In other words, the use made of anarchist theory by the leaders of the CNT and FAI in this case presents nothing else than a betrayal of that theory rather than its legitimate use.

Also, and more importantly, while anarchist theory was corrupted to justify working with other parties and unions in a democratic state, **Marxist** theory was used to justify the brutal one-party dictatorship of the Bolsheviks, first under Lenin and the Stalin. That, we feel, sums up the difference between anarchism and Leninism quite well.

Reply to errors and distortions in Phil Mitchinson's *Marxism and direct action*

Phil Mitchinson essay **Marxism and direct action** attempts to provide a "Marxist" (i.e. Leninist/ Trotskyist) critique of the current "Direct Action" based groups which came to notice at various demonstrations across the world — most famously in Seattle, November 1999. He, correctly, links these groups and currents with anarchism. However, his "critique" is nothing but a self-contradictory collection of false assertions, lies and nonsense, as we shall prove (indeed, his "critique" seems more the product of envy at anarchist influence in these movements than the product of scholarship or objectivity). That is why we have decided to reply to his article — it gives us an ideal possibility to indicate the depths to which some Marxists will swoop to distort anarchist politics and movements.

1. How does Mitchinson impoverish the politics of the direct action groups?

He begins by noting that the *"recent anti-capitalist demonstrations have brought together many different groups protesting against the destruction of the environment, racism, the exploitation of the third world, and also many ordinary young people protesting at the state of things in general. They have certainly shattered the myth that everyone is happy and that the capitalist system is accepted as the only possible form of society."* Of course, this is correct. What he fails to mention is that these demonstrations and groups managed to do this **without** the "guidance" of any Leninist party — indeed, the vanguard parties are noticeable by their absence and their frantic efforts to catch up with these movements. This, of course, is not the first time this has happened. Looking at every revolution we discover the "revolutionary" parties either playing no role in their early stages or a distinctly counter-productive role.

He states that *"[a]ll around us we see the misery this system causes. Famine, war, unemployment, homelessness and despair, these are the violent acts that the system perpetrates against millions every day."* However, as much as these aspects of capitalism are terrible, the anti-capitalist revolt expressed by many within the direct action groups is much wider than this (standard) leftist list. The movements, or at least parts of them, have a much more radical critique of the evils of capitalism — one that bases it self on abolishing alienation, domination, wage slavery, oppression, exploitation, the spiritual as well as material poverty of everyday life, by means of self-management, autonomy, self-organisation and direct action. They raise the possibility of playful, meaningful, empowering and productive self-activity to replace *"tedious, over-tiring jobs"* as well as the vision of a libertarian communist (i.e. moneyless, stateless) society. Mitchinson's account of the movements he is trying to critique is as poverty stricken intellectually as the capitalist system these movements are challenging. Leninists like Mitchinson, instead of a swallowing a dose of humility and learning from the very different ways this new wave of protest is being framed, are trying to squeeze the protest into their own particular one-dimensional model of revolution. Being unable to understand the movements he is referring to, he pushes their vision into the narrow confines of his ideology and distorts it.

He goes on to state that *"[w]itnessing and experiencing this destruction and chaos, young people everywhere are driven to protest."* Of course, anyone who is part of these movements will tell you that a wide cross-section of age groups are involved, not just *"young people."* However, Mitchinson's comments on age are not surprising — ever since Lenin, Bolshevik inspired Marxists

have attributed other, more radical, political theories, analyses and visions to the alleged youth of those who hold these opinions (in spite of the facts). In other words, these ideas, they claim, are the produce of immaturity, inexperience and youth and will, hopefully, be grown out of. Just as many parents mutter to themselves that their anarchist (or socialist, homosexual, whatever) children will "grow out of it", Lenin and his followers like Mitchinson consider themselves as the wiser, older relations (perhaps a friendly Uncle or a Big Brother?) of these "young" rebels and hope they will "grow out of" their infantile politics.

The word patronising does not do Mitchinson justice!

2. Does anarchism *"juxtapose"* theory and action?

Now Mitchinson launches into his first strawman of his essay. He asserts:

> *"However, the idea of getting involved in a political organisation is a turn off for many, who understandably want to do something, and do something now. In reality, the attempt to juxtapose organisation, discussion, and debate with 'direct action' is pure sophistry."*

We are not aware of any anarchist or direct action group which does not discuss and debate their actions, the rationale of their actions and the aims of their actions. These demonstrations that *"young people"* apparently turn up at are, in fact, organised by groups who have meetings, discuss their ideas, their objectives, their politics, and so on. That much should be obvious. In reality, it is Mitchinson who expresses *"pure sophistry,"* not the *"many"* who he claims act without thinking. And, of course, he fails to mention the two days of meetings, discussion and debate which took place the Saturday/Sunday before the May Day actions in London. To mention the May Day 2000 conference would confuse the reader with facts and so goes unmentioned.

He then asserts that the *"ideas of Marxism are not the subject of academic study, they are precisely a guide to action."* Of course, we have to point out here that the Marxist Parties Mitchinson urges us to build did not take part in organising the actions he praises (a few members of these parties did come along, on some of them, to sell papers, of course, but this is hardly a "vanguard" role). In general, the vanguard parties were noticeable by their absence or, **at best**, their lack of numbers and involvement. If we judge people by what they do, rather than what they say (as Marx urged), then we must draw the conclusion that the Marxism of Mitchinson is a guide to inaction rather than action.

Mitchinson continues by stating Marxists *"are all in favour of action, but it must be clearly thought out, with definite aims and objectives if it is to succeed. Otherwise we end up with directionless action."* It would be impolite to point out that no anarchist or member of a direct action organisation would disagree with this statement. Every anti-capitalist demonstration has had a definite aim and objective, was clearly thought out and organised. It did not "just happen." Mitchinson presents us with a strawman so fragile that even a breeze of reality would make it disintegrate.

The question is, of course, what kind of organisation do we create, how do we determine our aims and objectives. That is the key question, one that Mitchinson hides behind the strawman of organisation versus non-organisation, planned action versus *"directionless action."* To state it bluntly, the question is actually one of do we organise in an authoritarian manner or a libertarian

manner, not whether or not we organise. Mitchinson may not see the difference (in which case he thinks all organisation is "authoritarian") but for anarchists and members of direct action groups the difference is vital.

He goes on to state:

> *"Furthermore without political organisation who decides what action is to be taken, when and where? There can be no greater direct action than the seizing of control over our own lives by the vast majority of society. In that act lies the essence of revolution. Not just an aimless 'direct action' but mass, democratic and conscious action, the struggle not just against capitalism, but for a new form of society, socialism."*

Again Mitchinson presents us with the strawman of *"conscious"* action verses *"aimless"* action. As noted above, the anti-capitalist demonstrations **were** organised — non-hierarchical groups decided collectively what action was to be organised, when and where. The real question is not organisation versus non-organisation but rather authoritarian versus libertarian organisation. Either decision making from the bottom up or decision making from the top-down. As for there bring *"no greater direct action"* than revolution, well, anarchists have been saying that for over one hundred years — we don't need a Marxist to tell us our own ideas!

3. How does Mitchinson distort the London May Day demo?

He then gets to the crux of the issue — *"So, what comes next?"* He goes on to assert:

> *"The organisers of the demo tell us this was not a protest in order to secure changes, reforms apparently are a waste of time. No, simply by participating in what they call the 'carnival' we become better people, and eventually more and more people will participate, until a critical mass is reached and we all ignore capitalism, don't pay our bills, until they go away. What an infantile flight of fancy!"*

Yes, indeed, what an infantile flight of fancy! However, the flight is purely Mitchinson's. No one in RTS (or any other anarchist) makes such a claim. Yes, RTS urged people to take part in a carnival — as they argue, *"[m]any of the great moments of revolutionary history were carnivalesque … But we are not waiting for these moments of carnivalesque revolution, we are trying to merge them into every moment of everyday life. We cannot live on one-off days, a letting of stream, safety values for society enabling life to return to normal the next day or for hierarchical domination to return, as did in so many historical revolutions. Revolution is not an act but a process and carnival can prepare us for this process."* [**Maybe**, p. 9] Thus *"carnival"* is **not** seen as an end to itself (as Mitchinson asserts) but rather an aid to the creation of a revolutionary movement. Mitchinson confuses a celebration of May Day with an insurrection! In the words of **Maybe**:

> *"And although Mayday is just one day, it seeks to incite continuous creativity and action towards a radical remaking of everyday life. Steeped in a history of daily struggle, of 'day in day out' organising for social change, but pulsating with the celebration of renewal and fresh hope that returns with the coming of summer. Mayday will always be a pivotal moment."* [**Maybe**, p. 5]

Maybe is clear — we need to organise the daily struggle and enjoy ourselves while we are at it. Mitchinson' distortion of that message is pitiful.

4. Do anarchists really think *"the bosses will do nothing to defend their system"*?

He continues:

> *"The genuine intentions of those protesting is not open to question. However, the way to hell is paved with many such good intentions. Are we really to believe that whilst we all 'place ourselves outside of capitalism', the bosses will do nothing to defend their system? This ostrich like tactic of burying our heads in the sand until they go away is not serious. Nor is it action. In reality, it is irresponsible, indirect inaction."*

The comment about *"indirect inaction"* is somewhat funny coming from a political tendency which did not produce a movement of the importance of Seattle 1999 and is now trying to recruit from it. But it would be interesting to discover in which anarchist work comes the notion that we do not think the bosses will not defend their system. Yes, Lenin did claim that anarchists would *"lay down their arms"* after a revolution, but as Murray Bookchin notes, anarchists are *"not so naive as to believe anarchism could be established overnight. In imputing this notion to Bakunin, Marx and Engels wilfully distorted the Russian anarchist's views. Nor did the anarchists ... believe that the abolition of the state involved 'laying down arms' immediately after the revolution..."* [**Post-Scarcity Anarchism**, p. 213] Bakunin, for example, thought the *"Commune would be organised by the standing federation of the Barricades"* and that *"the federation of insurgent associations, communes and provinces ... [would] organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution."* [**Michael Bakunin: Selected Writings**, p. 170 and p. 171]

Moreover, RTS actions have continually came into conflict with the state and its forces of defence. Mitchinson seems to think that the participants of RTS and its demonstrations are incapable of actually understanding and learning from their experiences — they have seen and felt the capitalist system defending itself. Anyone on the J18, N30, A16 or M1 demos or just watching them on TV would have seen the capitalist system defending itself with vigour — and the protestors **fighting back.** Rather than acknowledge the obvious, Mitchinson asserts nonsense. The only person burying their head in the sand is Mitchinson if he ignores the experiences of his own senses (and the basic principles of materialism) in favour of an ideological diatribe with no basis in reality.

What **is** *"irresponsible"* is misrepresenting the viewpoints of your enemies and expecting them not to point our your errors.

5. How does Mitchinson misrepresent anarchist organisation?

Mitchinson now moves onto the real enemy, anarchism. He asserts that:

> *"Anarchist organisations have always hidden behind a facade of 'self-organisation'. They claim to have no leaders, no policy etc. Yet who decides?"*

Yes, anarchist groups claim to have no leaders but they do not claim to be without policies. Anyone with any comprehension of anarchist theory and history would know this (just one example, Bakunin argued that we needed to establish *"a genuine workers' program — the policy*

of the International [Workers Association]" [*"The Policy of the International"*, **The Basic Bakunin**, p. 100]).

Mitchinson asks the question, if we do not have leaders, *"who decides?"* That in itself exposes the authoritarian nature of his politics and the Bolshevik style party. He obviously cannot comprehend that, without leaders deciding things for us, we manage our own affairs – we decide the policy of our organisations collectively, by the direct democracy of the membership. Forgetting his early comment of that there is *"no greater direct action than the seizing of control over our own lives by the vast majority of society,"* he now asks how the vast majority of society can seize control over our own lives without leaders to tell us what to do!

Anarchists reject the idea of leaders — instead we argue for the

"leadership of ideas." As we discuss this concept in section J.3.6 and so will not do so here. However, the key concept is that anarchists seek to spread their ideas by discussing their politics **as equals** in popular organisations and convincing the mass assemblies of these bodies by argument. Rather than using these bodies to be elected to positions of power (i.e. leadership as it is traditionally understood) anarchists consider it essential that power remains in the hands of the base of an organisation and argue that the policies of the organisation be decided by the member directly in assemblies and co-ordinated by conferences of mandated, recallable delegates (see section A.2.9 for more discussion).

This is to be expected, of course, as anarchists believe that a free society can only be created by organisations which reflect the principles of that society. Hence we see policies being made by those affected by them and oppose attempts to turn self-managed organisations into little more than vehicles to elect "leaders." A free society is a self-managed one and can only be created by self-management in the class struggle or revolutionary process. All that revolutionaries should do is try and influence the decisions these organisations make by discussing our ideas with their membership — simply as any other member could in the mass assemblies the organisation is built upon. Any attempt by revolutionaries to seize power upon behalf of these organisations means destroying their revolutionary potential and the revolution itself by replacing the participation of all with the power of a few (the party).

Thus anarchist theory and practice is very clear on the question *"who decides"* — it is those who are affected by the question via group assemblies and conferences of mandated, recallable delegates. Rather than have *"no policy,"* policy in an anarchist organisation is decided directly by the membership. Without *"leaders"* — without power delegated into the hands of a few — who else **could** make the decisions and policy? That Mitchinson cannot comprehend this implies that he cannot envision a society without a few telling the many what to do.

He continues:

> *"If there was no leadership and no policy then there could be no action of any kind. The recent demonstrations have been highly organised and co-ordinated on an international scale. Good, so it should be. However, without organisation and democracy no-one, except a clique at the top, has any say in why, where and when. Such a movement will never bring international capital trembling to its knees."*

Firstly, we must point out that these demonstrations which have spread like wild-fire across the world have, most definitely, made international capital nervous. Secondly, we must point out that no Leninist vanguards were involved in organising them (a few members turned up

to sell papers later, once their significance had registered with the party leadership). Thirdly, we must point out that no Leninist vanguard has made *"international capital"* tremble in the knees for quite a few decades — since 1917, only Stalinist vanguards have had any effect (and, of course, *"international capital"* soon realised they could work with the Bolsheviks and other "Communist" leaders as one ruling elite with another). It seems somewhat ironic that a Leninist, whose movement was noticeable in its absence, mocks the first movement to scare the ruling class for nearly 30 years.

Secondly, we must note that the policy decided upon by the multitude of groups across the world was decided upon by the members of those groups. They practised organisation and **direct** democracy to make their policy decisions and implement them. Given that Mitchinson wonders how people can make decisions without leaders, his comments about rule by *"a clique at the top"* are somewhat ironic. As the history of the Russian Revolution indicates, a highly centralised state system (which mimics the highly centralised party) soon results in rule by the top party officials, not by the mass of people.

Mitchinson again decides to flog his fallacy of organisation versus non-organisation:

> *"One of the best known anarchist groups in Britain, Reclaim the Streets, save the game away in their spoof Mayday publication, 'Maybe'. Incidentally, who wrote these articles, who decided what went in and what didn't, who edited it, where did the money come from? Our intention here is not to accuse them of dodgy financing — simply to point out that this 'no leaders' stuff is a self-organised myth."*

It states who put together **MayDay** on page 5 of the paper. It was *"an organic group of 'guerrilla gardeners'"* — in other words, members of **Reclaim the Streets** who desired to produce the paper for that event. These people would have joined the group producing it via the weekly RTS open meetings and would have been held accountable to that same open meeting. No great mystery there — if you have even the slightest vision of how a non-hierarchical organisation works. Rather than being a *"myth"*, RTS shows that we do not need to follow leaders – instead we can manage our own organisations directly and freely participate in projects organised via the main open meeting. Writing articles, editing, and so on are not the work of *"leaders"* — rather they are simply tasks that need doing. They do not imply a leadership role — if they did then every hack journalist is a *"leader."*

He continues to attack what he cannot understand:

> "On page 20 they announce 'Reclaim the streets is non-hierarchical, spontaneous and self-organised. We have no leaders, no committee, no board of directors, no spokes people. There is no centralised unit for decision making, strategic planning and production of ideology. There is no membership and no formalised commitment. There is no master plan and no pre-defined agenda.'
>
> "There are two problems here. Firstly who is 'we', who made the above statement, and who decided it. Secondly, if it were true, it would not be something of which to be proud. Whether you like it or not, there is no way the capitalist system will ever be overthrown by such a haphazard and slipshod method."

Taking the first issue, *"who is 'we,' who made the above statement, and who decided it."* Why, it is the membership of RTS — decided via their weekly open meeting (as mentioned on that page).

That Mitchinson cannot comprehend this says a lot about his politics and vision. He cannot comprehend self-management, direct democracy. He seems not to be able to understand that groups can make decisions collectively, without having to elect leaders to make any decisions for them.

Taking the second issue, it is clear that Mitchinson fails to understand the role of RTS (and other anarchist groups). Anarchists do not try to overthrow capitalism **on behalf of others** — they urge them to overthrow it themselves, by their own direct action. The aim of groups like RTS is to encourage people to take direct action, to fight the powers that be and, in the process, create their own organs of self-management and resistance. Such a process of working class self-activity and self-organisation in struggle is the starting process of every revolution. People in struggle create their own organisations – such as soviets (workers' councils), factory committees, community assemblies — through which they start to manage their own affairs and, hopefully, overthrow the state and abolish capitalism. It is not the task of RTS to overthrow capitalism, it is the task of the whole population.

Moreover, many anarchists do see the need for a specific anarchist organisation — three national federations exist in the UK, for example. RTS does not need to organise in this fashion simply because such groups **already** exist. It is not its role — its role is a means to encourage self-activity and direct action as well as raising libertarian ideas in a popular manner. For more "serious" political organisation, people can and do turn to other anarchist groups and federations.

The street carnival principle of RTS is precisely the type of organising anarchists excel at — namely fun organising that catches the fun and excitement of popular direct action and, most importantly, **gets people out on the streets** — something Marxists have failed to do very well (if at all). It's a small step from organising a street carnival to further, "more serious" organising. Anarchist revolution is about bringing joy back into human lives, not endless (and often dishonest) polemics on the ideas of long dead philosophers. Rather, it is about creating a philosophy which, while inspired by past thinkers, is not subservient to them and aims to base itself on **current** struggles and needs rather than past ones. It is also about building a new political culture, one that is popular, active, street-based (versus ivory-tower elitist), and above all, fun. Only this way can we catch the imagination of everyday people and move them from resigned apathy to active resistance. The Marxists have tried their approach, and it has been a resounding failure — everyday people consider Marxism at best irrelevant, and at worst, inhuman and lifeless. Fortunately, anarchists are not following the Marxist model of organising, having learned from history

Thus Mitchinson fails to understand the role of RTS or its position in the UK anarchist movement.

He then asserts:

> *"There is no theory, no coherent analysis of society, no alternative programme. To brag of a lack of direction, a lack of purpose and a lack of coherence, in the face of such a highly organised and brutal enemy as international capital, is surely the height of irresponsibility."*

Firstly, anyone reading **Maybe** or other RTS publications will quickly see there is theory, coherent analysis and an alternative vision. As Mitchinson has obviously read **Maybe** we can only assume his claim is a conscious lie. Secondly, RTS in the quoted passage clearly do **not** *"brag of*

a lack of direction, a lack of purpose and a lack of coherence." They do state there is no *"centralised unit for decision-making"* — which is true, they have a **decentralised** unit for decision-making (direct democracy in open meetings). There is *"no master-plan,"* etc. as any plans are decided upon by these open meetings. There is no pre-defined agenda because, as a democratic organisation, it is up to the open meeting to define their own agenda.

It is only Mitchinson's **assumption** that only centralised parties, with leaders making the decisions, can have *"direction," "purpose"* and *"coherence."* As can be seen **by their actions** that RTS **does** have direction, purpose and coherence. Needless to say, while other anarchists may be critical about RTS and its actions, we do not deny that it has been an effective organisation, involving a great many people in its actions who would probably not be involved in political activities. Rather than being *"irresponsible,"* RTS shows the validity of libertarian organisation and its effectiveness. No Marxist Party has remotely approached RTS's successes in terms of involving people in political actions. This is hardly a surprise.

6. How does Mitchinson define anarchism wrongly?

Mitchinson states:

> *"In reality the leaders of these movements are not devoid of ideology, they are anarchists. Anarchism is not simply a term of abuse, it comes from the Greek word 'anarchos' meaning 'without government'. To anarchists the state — the institutions of government, the army, police, courts etc. — is the root cause of all that is wrong in the world. It must be destroyed and replaced not with any new form of government, but the immediate introduction of a stateless society."*

Firstly, *"anarchos"* actually means *"without authority,"* or *"contrary to authority"* (as Kropotkin put it). It does **not** mean "without government" as such (although it commonly is used that way). This means that anarchism does **not** consider the state as *"the root of all that is wrong with the world"* — we consider it, like capitalism (wage slavery), patriarchy, hierarchy in general, etc., as a symptom of a deeper problem, namely authority (or, more precisely, authoritarian social relations, hierarchical power — of which class power is a subset). Therefore anarchist theory is concerned with more than just the state — it is against capitalism just as much as it is against the state, for example.

Thus, to state the obvious, as anyone familiar with anarchist theory could tell you, anarchists do not think that *"the state"* is the root of all that is wrong in the world. Marxists have asserted this for years – unfortunately for them, repetition does not make something true! Rather, anarchists see the state as **one** of the causes of evil in the world and the main protector of all the rest. We also stress that in order to combat all the evils, we need to destroy the state so that we are in a position to abolish the other evils by being in control of our own lives. For example, in order to abolish capitalism — i.e. for workers' to seize the means of life — the state, which protects property rights, must be destroyed. Without doing so, the police and army will come and take back that which the workers' have taken. However, we do not claim that the state causes all of our problems — we do claim that getting rid of the state is an essential act, on which many others are dependent.

As Brian Morris argues:

> *"Another criticism of anarchism is that it has a narrow view of politics: that it sees the state as the fount of all evil, ignoring other aspects of social and economic life. This is a misrepresentation of anarchism. It partly derives from the way anarchism has been defined, and partly because Marxist historians have tried to exclude anarchism from the broader socialist movement. But when one examines the writings of classical anarchists... as well as the character of anarchist movements... it is clearly evident that it has never had this limited vision. It has always challenged all forms of authority and exploitation, and has been equally critical of capitalism and religion as it has been of the state."* ["Anthropology and Anarchism," **Anarchy: A Journal of Desire Armed**, no. 45, p, p. 40]

As can be seen, Mitchinson repeats into the usual Marxist straw man.

7. Does anarchism reject fighting for reforms?

After asserting the usual Marxist falsehoods about anarchism, he moves on:

> *"This opposition to the state and authority leads to a rejection of participation in any form of parliamentary activity, belonging to a political party or fighting for any reforms, that is political change through the state."*

Again Mitchinson smuggles in a falsehood into his "analysis." Anarchists do not reject *"fighting for any reforms"* — far from it. We do reject parliamentary activity, that is true, but we think that reforms can and must be won. We see such reforms coming via the direct action of those who desire them — for example, by workers striking for better working conditions, more wages and so. Anyone with even a passing awareness of anarchist thought would know this. Indeed, that is what direct action means — it was coined by French anarcho-syndicalists to describe the struggle for reforms within capitalism!

As for rejecting parliamentary activity, yes, anarchists do reject this form of "action." However, we do so for reasons Mitchinson fails to mention. Section J.2 of the FAQ discusses the reasons why anarchists support direct action and oppose electioneering as a means of both reform and for revolution.

Similarly, anarchists reject political parties but we do not reject political organisations — i.e. specific anarchist groups. The difference is that political parties are generally organised in a hierarchical fashion and anarchist federations are not — we try and create the new world when we organise rather than reproducing the traits of the current, bourgeois, one.

Needless to say, Mitchinson seeks to recruit the people he is slandering and so holds out an olive-branch by stating that *"[o]f course, Marxism is opposed to the brutal domination of the capitalist state too. Marx saw a future society without a state but instead 'an association in which the free development of each is the condition for the free development of all.' That is a self-governing people. The question however is how can this be achieved?"*

Yes, as Bakunin argued, Marxists do not reject our programme out of hand. They claim to also seek a free society and so Mitchinson is correct — the question is how can this be achieved. Anarchists argue that a self-governing people can only be achieved by self-governing means — *"Bakunin ... advocated socialist (i.e., libertarian) means in order to achieve a socialist (i.e., libertarian) society."* [Arthur Lehning, *"Introduction"*, **Michael Bakunin: Selected Writings**, p. 27] Thus

means and ends must be consistent — revolutionary movements must be organised in a way that reflects the society we want to create. Thus a self-governing society can only be created by self-governing organisations and a self-governing movement. If the revolutionary movement reflect bourgeois society — for example, is hierarchical — then it cannot create a free society. That is the rationale for the way anarchist groups organise, including RTS. Marxists, as we will see, disagree and consider how a revolutionary movement organises itself as irrelevant.

Also, we must note that earlier Mitchinson denied that a self-governing organisation could exist when he was discussing RTS. He asserted that *"[i]f there was no leadership and no policy then there could be no action of any kind."* Now he claims that it is possible, but only **after** the revolution. We will note the obvious contradiction — how do people become capable of self-government post-revolution if they do not practice it pre-revolution and, obviously, during the revolution?

8. Does anarchism see the state as the root of all problems?

Mitchinson moves on to assert that:

> *"Since anarchism sees in the state the root of all problems, it therefore believes these problems will be resolved by the destruction of the state."*

As noted above, anarchists do **not** see in the state the root of all problems. We do urge the destruction of the state but that is because the state is the protector of existing society and in order to transform that society we need get rid of it. Kropotkin, for example, was well aware of *"the evil done by Capitalism and the State that supports it."* [**Evolution and Environment**, p. 83] Rather than seeing the State as the root of all evil, anarchists are well aware that evil is caused by many things — particularly capitalism — and that the state, as well as causing its own evils, supports and protects others. Thus anarchists are aware that the state is a tool for minority rule and only one source of evil.

Mitchinson, after misrepresenting anarchist thought, states:

> *"Marxism, meanwhile, sees the division of society into classes, a minority who own the means of producing wealth, and the majority of us whose labour is the source of that wealth, as the crux of the matter. It is this class division of society which gives rise to the state — because the minority need a special force to maintain their rule over the majority — which has evolved over thousands of years into the complicated structures we see today."*

Anarchists would agree, as far as this goes. Bakunin argued that the State *"is authority, domination, and forced, organised by the property-owning and so-called enlightened classes against the masses."* He saw the social revolution as destroying capitalism and the state at the same time, that is *"to overturn the State's domination, and that of the privileged classes whom it solely represents."* [**The Basic Bakunin**, p. 140] The idea that the state is a means to ensure class rule is one anarchists, as can be seen, would agree with.

However, anarchists do not reduce their understanding of the state to this simplistic Marxist analysis. While being well aware that the state is the means of ensuring the domination of an economic elite, anarchists recognise that the state machine also has interests of its own. The

state, for anarchists, is the delegation of power into the hands of a few. This creates, by its very nature, a privileged position for those at the top of the hierarchy:

> *"A government, that is a group of people entrusted with making the laws and empowered to use the collective force to oblige each individual to obey them, is already a privileged class and cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put in a privileged position, the government is already at odds with the people whose strength it disposes of."* [Malatesta, **Anarchy**, p. 34]

Thus, while it is true that the state (particularly under capitalism) acts as the agent of the capitalist class, it does not mean that it does not have interests of its own. The State has developed as a means of imposing minority rule — that much anarchists and Marxists can agree upon. To do so it has developed certain features, notably delegation of power into the hands of a few. This feature of the state is a product of its function. However, function and feature are inseparable — retain the feature and the function will be re-established. In other words, maintain the state and minority rule will be re-established.

The simplistic class analysis of the state has always caused Marxists problems, particularly Trotskyists who used it to deny the obvious class nature of Stalinist Russia. Rather than see the USSR as a class society in which the State bureaucracy exploited and oppressed the working class for its own benefits, Trotskyists argued it was an autocratic, privileged bureaucracy in a classless society. As anarchist Camillo Berneri argued:

> *"In history there is no absurdity. An autocratic bureaucracy is a class, therefore it is not absurd that it should exist in a society where classes remain — the bureaucratic class and the proletarian class. If the USSR was a 'classless' society, it would also be a society without a bureaucratic autocracy, which is the natural fruit of the permanent existence of the State."* [*"The State and Classes"*, **Cienfuegos Press Anarchist Review**, no, 4, p. 49]

The weakness (or incompleteness) of the Marxist understanding of the state can best be seen by Trotsky's and his followers lack of understanding of Stalinism. As the state owned all the land and means of production, there could be no classes and so the Soviet Union must be a classless society. However, the obvious privileges of the bureaucracy could not be denied (as Trotsky was once a leading bureaucrat, he saw and experienced them at first hand). But as the state bureaucracy could not be a class and have class interests (by definition), Trotsky could not see the wood for the trees. The actual practice of Leninism in power is enough to expose its own theoretical weaknesses.

9. Why is Mitchinson wrong about the *"Abolishion [i.e. Abolition] of the state"*?

Mitchinson moves on to argue that the *"modern capitalist state can wear many guises, monarchy, republic, dictatorship, but in the end its purpose remains the same, to maintain the minority rule of the capitalist class. Marxism's goal therefore is not simply to abolish the state, but to put an end to class society."* Needless to say, that is also anarchism's goal. As Bakunin argued, *"political*

transformation .. . [and] economic transformation ... must be accomplished together and simultaneously." [**The Basic Bakunin**, p. 106] So, as can be seen, anarchism's goal is not simply abolishing the state, but to put an end to class society. That anarchists have always argued the state and capitalism must be destroyed at the same time is easily discovered from reading their works.

Continuing this theme he argues that the state *"was born with the split of society into classes to defend private property. So long as there are classes there will be a state. So, how can class society be ended? Not by its denial, but only by the victory of one of the contending classes. Triumph for capitalism spells ruin for millions."*

Of course, we could point out here that many anthropologists disagree with the claim that the state is a product of class society. As Michael Taylor summarises, the *"evidence does not give this proposition a great deal of support. Much of the evidence which has been offered in support of it shows only that the primary states, not long after their emergence, were economically stratified. But this is of course consistent also with the simultaneous rise ... of political and economic stratification, or with the **prior** development of the state – i.e. of **political** stratification — and the creation of economic stratification by the ruling class."* [**Community, Anarchy and Liberty**, p. 132]

Also, of course, as should be obvious from what we have said previously, anarchists do not think class society can be ended by "denial." As is clear from even a quick reading of any anarchist thinker, anarchists seek to end class society as well as the state. However, we reject as simplistic the Marxist notion that the state exists purely to defend classes. The state has certain properties **because it is a state** and one of these is that it creates a bureaucratic class around it due to its centralised, hierarchical nature. Within capitalism, the state bureaucracy is part of the ruling class and (generally) under the control of the capitalist class. However, to generalise from this specific case is wrong as the state bureaucracy is a class in itself — and so trying to abolish classes without abolishing the state is doomed to failure.

10. Why is Mitchinson's comment that we face either *"socialism or barbarism"* actually undermine his case?

Mitchinson continues:

> *"As Marx once explained the choice before us is not socialism or the status quo, but socialism or barbarism."*

We should point out that it Rosa Luxemburg who is usually associated with this quote. She made her famous comment during the First World War. The start of this war saw the Marxist German Social Democratic Party (and a host of others) vote for war credits in Parliament. This party was a mass workers' party which aimed to used every means, including elections, to gain reforms for the working class. The net end result of this strategy was the voting for war credits and the support of their state and ruling class in the war — that is, the betrayal of the fundamental principles of socialism.

This event did not happen out of the blue. It was the end result of years of working within the bourgeois political system, of using elections (*"political activity"*) as a means of struggle. The Social Democratic Parties had already been plagued with reformist elements for years. These elements, again, did not come from nowhere but were rather the response to what the party was actually doing. They desired to reform the party to bring its rhetoric in-line with its practice.

As one of the most distinguished historians of this period put it, the *"distinction between the contenders remained largely a subjective one, a difference of ideas in the evaluation of reality rather than a difference in the realm of action."* [C. Schorske, **German Social Democracy**, p. 38] The debacle of 1914 was a logical result of the means chosen, the evidence was already there for all to see (except, apparently, Lenin who praised the *"fundamentals of parliamentary tactics"* of the German and International Social Democracy and how they were *"at the same time implacable on questions of principle and always directed to the accomplishment of the final aim"* in his obituary of August Bebel in 1913! [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 248])

Needless to say, this result had been predicted by Bakunin over 40 years previously. And Mitchinson wants us to repeat this strategy? As Marx said, history repeats itself — first it is tragedy, second time it is farce.

11. Why is Mitchinson wrong to assert anarchists do not believe in defending a revolution?

Mitchinson argues that the *"victory of the working class can only mean the destruction of the capitalist state. Will the capitalists take defeat like sporting ladies and gentlemen, retiring quietly to the pavilion? No, all history suggests that they would not. The workers would need to create a new state, for the first time to defend the rule of the majority over the minority."*

Yes, indeed, all history **does** show that a ruling class will not retire quietly and a revolution will need to defend itself. If anarchists **did** believe that they would retire peacefully then Marxists would be correct to attack us. However, Marxist assertions are false. Indeed, they must think anarchists are morons if they genuinely do think we do not believe in defending a revolution. A few quotes should suffice to expose these Marxist claims as lies:

> *"Commune will be organised by the standing federation of the Barricades... [T]he federation of insurgent associations, communes and provinces ... [would] organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution."* [**Michael Bakunin: Selected Writings**, pp. 170–1]
>
> *"[L]et us suppose ... it is Paris that starts [the revolution] ... Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and **quartiers**, they will form the revolutionary federation of all the **quartiers**, the federative commune... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services ... and to organise common defence against the enemies of the Revolution."* [**Op. Cit.**, p. 178–9]

Bakunin was well aware that revolution implied "civil war" — i.e. attempts by the ruling class to maintain its power (see, for example, his *"Letters to a Frenchman"* in **Bakunin on Anarchism**). As can be seen, Bakunin was well aware of the needs to defend a revolution after destroying the state and abolishing capitalism. Similarly we discover Malatesta arguing that we should *"[a]rm*

all the population," and the *"creation of a voluntary militia, without powers to interfere as militia in the life of the community, but only to deal with any armed attacks by the forces of reaction to re-establish themselves, or to resist outside intervention by countries as yet not in a state of revolution."* [**Life and Ideas**, p. 170 and p. 166] In Malatesta's words:

> *"But, by all means, let us admit that the governments of the still unemancipated countries were to want to, and could, attempt to reduce free people to a state of slavery once again. Would this people require a government to defend itself? To wage war men are needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple, and regular armies composed of conscripts or mercenaries disappear... [Some people] seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the **freedom** of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!"* [**Anarchy**, pp. 40–1]

Not only do we have this theoretical position, we can also point to concrete historical examples — the Makhnovist movement in the Russian Revolution and the CNT militias during the Spanish Revolution, among others — that prove that anarchists do recognise the need and importance of defending a successful revolution.

Therefore, statements asserting that anarchists are against defending a revolution are either spreading a conscious lie or a product of deep ignorance.

Thus the question is **not** one of defending or not defending a revolution. The question is **how** do we defend it (and, another key question, what **kind** of revolution do we aim for). Marxists urge us to *"create a new state, for the first time to defend the rule of the majority over the minority."* Anarchists reply that every state is based on the delegation of power into the hands of a minority and so cannot be used to defend the rule of the majority over the minority. Rather, it would be the rule of those who claim to represent the majority. The confusion between people power and party power is at the root of why Leninism is not revolutionary.

Mitchinson then quotes Lenin and Trotsky to defend his assertion:

> *"The proletariat needs the state only temporarily. We do not at all disagree with the anarchists on the question of the abolition of the state as the aim. We maintain that, to achieve this aim, we must temporarily make use of the instruments resources and methods of state power against the exploiters."* [Lenin]
>
> *"Marxists are wholly in agreement with the anarchists in regard to the final goal: the liquidation of the state. Marxists are statist only to the extent that one cannot achieve the liquidation of the state simply by ignoring it."* [Trotsky]

Of course, quoting Lenin or Trotsky when they make a false assertion does not turn lies into truth. As proven above, anarchists are well aware of the necessity of overthrowing the state by revolution **and** defending that revolution against attempts to defeat it. To state otherwise is to

misrepresent anarchist theory on this subject. Moreover, despite Trotsky's claims, anarchists are aware that you do not destroy something by ignoring it. The real question is thus **not** whether to defend a revolution or whether to shatter the state machine. The questions are, **how** do you shatter the state, what do you replace existing society with and how do you defend a revolution. To state otherwise is to build a strawman — unfortunately much of Lenin's "masterpiece" **The State and Revolution** is based on destroying this self-created strawman.

12. Would the "workers' state" really be different, as Mitchinson claims?

Mitchinson argues that from *"the very beginning this would be like no previous state machine. From day one it would be in effect a semi-state."* The question is, for anarchists, whether this "semi-state" is marked by the delegation of power into the hands of a government. If so, then the "semi-state" is no such thing — it is a state like any other and so an instrument of minority rule. Yes, this minority may state it represents the majority but in practice it can only represent itself and claim that is what the majority desires.

Hence, for anarchists, *"the essence of the state ... [is] centralised power* ***or to put it another way the coercive authority*** *of which the state enjoys the monopoly, in that organisation of violence know as 'government'; in the hierarchical despotism, juridical, police and military despotism that imposes laws on everyone."* [Luigi Fabbri, **Op. Cit.**, pp. 24–5] The so-called "semi-state" is nothing of the kind — it is a centralised power in which a few govern the many. Therefore, the "workers' state" would be "workers" in name only.

Mitchinson continues:

> *"The task of all previous revolutions was to seize state power. From the experience of the Paris Commune of 1871 Marx and Engels concluded that it would not be possible for the workers to simply use the old state apparatus, they would instead have to replace it with an entirely new one, to serve the interests of the majority and lay the basis for a socialist society."*

Needless to say, he forgets the **key** question — **who** is to seize power. Is it the majority, directly, or a minority (the leaders of a party) who claim to represent the majority. Leninists are clear, it is to be the party, not the working class as a whole. They confuse party power with class power. In the words of Lenin:

> *"The very presentation of the question — 'dictatorship of the Party* ***or*** *dictatorship of the class, dictatorship (Party) of the leaders* ***or*** *dictatorship (Party) of the masses?' — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties... "*

And:

> *"To go so far in this matter as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid."* [**Left-wing Communism: An Infantile Disorder**, pp. 25–6 and p. 27]

However, what is **truly** stupid is confusing the rule by a minority with that of the majority managing their own affairs. The two things are different, they generate different social relationships and to confuse the two is to lay the ground work for the rule by a bureaucratic elite, a dictatorship of state officials **over** the working class.

Now we come to the usual Leninist claims about Bolshevik theory:

> *"To ensure that the workers maintain control over this state, Lenin argued for the election of all officials who should be held accountable and subject to recall, and paid no more than the wage of a skilled worker. All bureaucratic tasks should be rotated. There should be no special armed force standing apart from the people, and we would add, all political parties except fascists should be allowed to organise."*

This is what Lenin, essentially, said he desired in **The State and Revolution** (Mitchinson misses out one key aspect, to which we will return later). Anarchists reply in three ways.

Firstly, we note that *"much that passes for 'Marxism' in **State and Revolution** is pure anarchism — for example, the substitution of revolutionary militias for professional armed bodies and the substitution of organs of self-management for parliamentary bodies. What is authentically Marxist in Lenin's pamphlet is the demand for 'strict centralism,' the acceptance of a 'new' bureaucracy, and the identification of soviets with a state."* [Murray Bookchin, **Post-Scarcity Anarchism**, p. 213] As an example, let us look at the recall of "officials" (inspired by the Paris Commune). We find this in Bakunin's and Proudhon's work **before** it was applied by the Communards and praised by Marx. Bakunin in 1868 argued for a *"Revolutionary Communal Council"* composed of *"delegates ... vested with plenary but accountable and removable mandates."* [**Michael Bakunin: Selected Writings**, pp. 170–1] Proudhon's election manifesto of 1848 argued for *"universal suffrage and as a consequence of universal suffrage, we want implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy."* [**No Gods, No Masters**, vol. 1, p. 63] As can be seen, Lenin's recommendations were first proposed by anarchists.

Thus the positive aspects of Lenin's work are libertarian in nature, **not** Marxist as such. Indeed given how much time is spent on the Paris Commune (an essentially libertarian revolt obviously inspired by Proudhon's ideas) his work is more libertarian than Marxist, as Bookchin makes clear. It is the non-libertarian aspects which helped to undermine the anarchist elements of the work.

Secondly, Lenin does not mention, never mind discuss, the role of the Bolshevik Party would have in the new "semi-state." Indeed, the party is mentioned only in passing. That in itself indicates the weakness of using **The State and Revolution** as a guide book to Leninist theory or practice. Given the importance of the role of the party in Lenin's previous and latter works, it suggests that to quote **The State and Revolution** as proof of Leninism's democratic heart leaves much to be desired. And even **The State and Revolution**, in its one serious reference to the Party, is ambiguous in the extreme:

> *"By educating the workers' party, Marxism educates the vanguard of the proletariat which is capable of assuming power and **of leading the whole people** to Socialism, of directing and organising the new order, of being the teacher, the guide, the leader of all the toiling and exploited in the task of building up their social life without the bourgeoisie and against the bourgeoisie."* [**The Essential Lenin**, p. 288]

Is it the vanguard **or** the proletariat which is *"capable of assuming power"*? The answer is important as a **social** revolution requires the fullest participation of the formerly oppressed masses in the management of their own affairs. In the context of the rest of **The State and Revolution** it could be argued it is the proletariat. However, this cannot be squared with Lenin's (or Trotsky's) post-October arguments and practices or the resolution of the Second World Congress of the Communist International which stated that *"[e]very class struggle is a political struggle. The goal of this struggle ... is the conquest of political power. Political power cannot be seized, organised and operated except through a political party."* [cited by Duncan Hallas, **The Comintern**, p. 35] It is obvious that if the party rules, the working class does not. A socialist society cannot be built without the participation, self-activity and self-management of the working class. Thus the question of **who** makes decisions and **how** they do so is essential — if it is not the masses then the slide into bureaucracy is inevitable.

Thus to quote **The State and Revolution** proves nothing for anarchists – it does not discuss the key question of the party and so fails to present a clear picture of Leninist politics and their immediate aims. As soon becomes clear if you look at Leninism in power — i.e. what it actually did when it had the chance, to which we now turn.

Thirdly, we point to what he actually **did** in power. In this we follow Marx, who argued that we should judge people by what they do rather than what they say. We will concentrate on the pre-Civil War (October 1917 to May 1918) period to indicate that this breaking of promises started **before** the horrors of Civil War can be claimed to have forced these decisions onto the Bolsheviks.

Before the out-break of Civil War, the Bolsheviks had replaced election of *"all officials"* by appointment from above in many areas of life — for example, they abolished the election of officers in the Red Army and replaced workers' self-management in production with one-man management, both forms of democracy being substituted by appointed from above. In addition, by the end of April, 1918, Lenin **himself** was arguing *"[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected* ***or appointed*** *by Soviet institutions, vested with dictatorial powers."* [**Six Theses on the Immediate Tasks of the Soviet Government**, p. 44 – our emphasis] Moreover, the Soviet Constitution stated that *"[e]very commissar [of the Council of People's Commissars — i.e. the Soviet government] has a collegium (committee) of which he is the president, and the members of which are appointed by the Council of People's Commissars."* Appointment was the rule at the very heights of the state. The *"election of all officers"* (*"without exception"* [Lenin, **The State and Revolution**, p. 302]) had ended by month six of the revolution even in Lenin's own writings — and **before** the start of the Civil War.

Lenin also argued in mid-April 1918 that the *"socialist character of Soviet, i.e.* ***proletarian****, democracy"* lies, in part, in *"the people themselves determin[ing] the order and time of elections."* [**The Immediate Tasks of the Soviet Government**, pp. 36–7] Given that *"the government [had] continually postponed the new general elections to the Petrograd Soviet, the term of which had ended in March 1918"* because it *"feared that the opposition parties would show gains"* Lenin's comments seem hypocritical in the extreme. [Samuel Farber, **Before Stalinism**, p. 22]

Moreover, the Bolsheviks did not stay true to Lenin's claim in **The State and Revolution** that *"since the majority of the people* ***itself*** *suppresses its oppressors, a 'special force' is* ***no longer necessary***" as so *"in place of a* ***special*** *repressive force, the whole population itself came on the scene."* In this way the *"state machine"* would be *"the armed masses of workers who become transformed*

into a universal people's militia." [**Op. Cit.**, p. 301, p. 320 and p. 347] Instead they created a political police force (the Cheka) and a standing army (in which elections were a set aside by decree). These were special, professional, armed forces standing apart from the people and unaccountable to them. Indeed, they were used to repress strikes and working class unrest. So much for Mitchinson's claim that *"there should be no special armed force standing apart from the people"* — it did not last three months (the Cheka was founded two months into the revolution, the Red Army was created in early 1918 and elections set aside by March of that year).

Lastly, the Bolsheviks banned newspapers from the start — including other socialist papers. In addition, they did not allow other political tendencies to organise freely. The repression started **before** the Civil War with the attack, by the Cheka, in April 1918 on the anarchist movements in Petrograd and Moscow. While repression obviously existed during the Civil War, it is significant that it, in fact, started **before** it began. During the Civil War, the Bolsheviks repressed all political parties, including the Mensheviks even though they *"consistently pursued a policy of peaceable opposition to the Bolshevik regime, a policy conducted by strictly legitimate means"* and *"[i]ndividual Mensheviks who joined organisations aiming at the overthrow of the Soviet Government were expelled from the Menshevik Party."* [George Leggett, **The Cheka: Lenin's Political Police**, pp. 318–9 and p. 332] In fact, repression **increased** after the end of the Civil War — a strange fact if it was that war which necessitated repression in the first place.

Moreover, Mitchinson fails to mention Lenin's argument that, like the Paris Commune, the workers' state would be based on a fusion of executive and administrative functions in the hands of the workers' delegates. This is hardly surprising, as Lenin created an executive body (the Council of People's Commissars) immediately after the October Revolution. This division of executive and administrative powers was written into the Soviet Constitution. So much for **The State and Revolution** — its promises did not last a night.

Thus, his claims that the "semi-state" would not be like any other state are contradicted by the actual experience of Bolshevism in power. For anarchists, this comes as no surprise as they are well aware that the state machine does not (indeed, **cannot**) represent the interests of the working classes due to its centralised, hierarchical and elitist nature — all it can do is represent the interests of the party in power, its own bureaucratic needs and privileges and slowly, but surely, remove itself from popular control. Hence the movement away from popular control — it is the nature of centralised power to remove itself from control from below, control by the masses, particularly when all other focal points of working class self-management have been abolished as being no longer required as we have a "semi-state."

Mitchinson seems to want us to look purely at Bolshevik theory and not its practice. It is exactly what supporters of capitalism desire us to do — in theory, capitalism is based on free agreement and free exchange between autonomous individuals but in practice it is a system of inequality which violates the autonomy of individuals and makes a mockery of free agreement.

In a way, **The State and Revolution** laid out the foundations and sketched out the essential features of an alternative to Bolshevik power – as noted, that system would be essentially libertarian. Only the pro-Leninist tradition has used Lenin's work, almost to quiet their conscience, because Lenin, once in power, ignored it totally. Such is the nature of the state — as Kropotkin and all other anarchists have argued, there can be no such thing as a "revolutionary government." Conflict will inevitably arise between the party which aims to control the revolution and the actions of the masses themselves. To resolve the conflict the state must eliminate the organs of workers self-activity which the revolution creates otherwise the party cannot impose its de-

cisions — and this is what the Bolshevik state did, aided of course by the horrors of the civil war.

To state the obvious, to quote theory and not relate it to the practice of those who claim to follow that theory is a joke. It is little more than sophistry. If you look at the actions of the Bolsheviks before and after the Russian Revolution you cannot help draw the conclusion that Lenin's **State and Revolution** has nothing to do with Bolshevik policy and presents a false image of what Trotskyists desire.

13. Is the Marxist "worker's state" really the rule of one class over another?

Mitchinson argues that the *"task of this state would be to develop the economy to eradicate want. Less need, means less need to govern society, less need for a state. Class society and the state will begin to wither away as the government of people, the rule of one class over another, is replaced by the administration of things, the planned use of resources to meet society's needs."*

As Malatesta makes clear, this is pure sophistry:

> "Whoever has power over things has power over men; whoever governs production also governs the producers; who determines consumption is master over the consumer.
>
> "This is the question; either things are administered on the basis of free agreement of the interested parties, and this is anarchy; or they are administered according to laws made by administrators and this is government, it is the State, and inevitably it turns out to be tyrannical.
>
> "It is not a question of the good intentions or the good will of this or that man, but of the inevitability of the situation, and of the tendencies which man generally develops in given circumstances." [**Life and Ideas**, p. 145]

Moreover, it is debatable whether Trotskyists really desire the rule of one class over another in the sense of working class over capitalist class. To quote Trotsky:

> "the proletariat can take power only through its vanguard. In itself the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity. In the revolutionary vanguard, organised in a party, is crystallised the aspirations of the masses to obtain their freedom. Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.
>
> "In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard." [**Stalinism and Bolshevism**]

Thus, rather than the working class as a whole seizing power, it is the "vanguard" which takes power — *"a revolutionary party, even after seizing power … is still by no means the sovereign ruler of society."* [**Ibid.**] That is, of course, true — they are still organs of working class self-management (such as factory committees, workers councils, trade unions, soldier committees) through which working people can still exercise their sovereignty. Little wonder Trotsky abolished independent

unions, decreed the end of soldier committees and urged one-man management and the militarisation of labour when in power. Such working class organs do conflict with the sovereign rule of the party and so have to be abolished.

After being in power four years, Trotsky was arguing that the *"Party is obliged to maintain its dictatorship ... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every moment on the formal principle of a workers' democracy."* [quoted by Brinton, **The Bolsheviks and Workers' Control**, p. 78]

This position follows naturally from Trotsky's comments that the party *"crystallises"* the *"aspirations"* of the masses. If the masses reject the party then, obviously, their *"cultural level"* has fallen and so the party has the right, nay the duty, to impose its dictatorship over them. Similarly, the destruction of organs of working class self-management can be justified because the vanguard has taken power — which is **exactly** what Trotsky argued.

With regards to the Red Army and its elected officers, he stated in March 1918 that *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree"* because the Bolshevik Party held power or, as he put it, *"political power is in the hands of the same working class from whose ranks the Army is recruited."* Of course, power was actually held by the Bolshevik party, not the working class, but never fear:

> *"Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers', Peasants' and Soldiers' Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the* ***appointment*** *of members of the commanding staff by the organs of the Soviet Power."* [**Work, Discipline, Order**]

He made the same comments with regard the factory committees:

> *"It would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers [a euphemism for the Party — M.B.] and not at all in the form in which individual economic organisations are administered."* [quoted by Maurice Brinton, **Op. Cit.**, p. 66]

This point is reiterated in his essay, *"Bolshevism and Stalinism"* (written in 1937) when he argued that:

> *"Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [Trotsky, **Op. Cit.**, p. 18]

And, obviously, without party dictatorship the soviets would return to the *"mud."* In other words, the soviets are only important to attain party rule and if the two come into conflict then Trotskyism provides the rule of the party with an ideological justification to eliminate soviet

democracy. Lenin's and Trotsky's politics allowed them to argue that if you let the proletariat have a say then the dictatorship of the proletariat could be in danger.

Thus, for Trotsky, the *"dictatorship of the proletariat"* is independent of allowing the proletariat to manage their own affairs directly. However, without the means of manage their own affairs directly, control their own lives, the proletariat are placed into the position of passive electors, who vote for parties who rule for and over them, in their own name. Moreover, they face the constant danger of the *"vanguard"* nullifying even these decisions as *"temporary vacillations."* A fine liberation indeed.

Also, as libertarian socialist Maurice Brinton argues, none of the Bolshevik leaders *"saw the proletarian nature of the Russian regime as primarily and crucially dependent on the exercise of workers' power at the point of production (i.e. workers' management of production). It should have been obvious to them as Marxists that if the working class did not hold economic power, its 'political' power would at best be insecure and would in fact degenerate."* [**Op. Cit.**, p. 42]

With direct working class sovereignty eroded by the Bolsheviks in the name of indirect, i.e. party, sovereignty it is hardly surprising that the dictatorship of the proletariat becomes the dictatorship **over** the proletariat as Bakunin predicted. With the elimination of functional democracy and self-management, indirect democracy would not be able to survive for long in the face of centralised, top-down decision making by the ruling party.

So hopeless was Trotsky's understanding of socialism and the nature of a working class social revolution that he even considered the Stalinist dictatorship to be an expression of the *"dictatorship of the proletariat."* He argued that the *"bureaucracy has expropriated the proletariat politically in order to guard its social conquests with **its own** methods. The anatomy of society is determined by its economic relations. So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class."* [**The Class Nature of the Soviet State**]

Just to stress the point, according to Trotsky, under Stalinism **the proletariat was the ruling class** and that Stalin's dictatorship eliminated what remained (and it was not much) of working class political influence in order *"to guard its social conquests"*! What social conquests could remain if the proletariat was under the heel of a totalitarian dictatorship? Just one, state ownership of property — precisely the means by which the (state) bureaucracy enforced its control over production and so the source of its economic power (and privileges). To state the obvious, if the working class does not **control** the property it is claimed to own then someone else does. The economic relationship thus generated is a hierarchical one, in which the working class is an oppressed class. Thus Trotsky identified the source of the bureaucracy's economic power with "socialism" — no wonder his analysis of Stalinism (and vision of socialism) proved so disastrous.

Trotsky argues that the *"liberal-anarchist thought closes its eyes to the fact that the Bolshevik revolution, with all its repressions, meant an upheaval of social relations in the interests of the masses, whereas Stalin's Thermidorian upheaval accompanies the reconstruction of Soviet society in the interest of a privileged minority."* [**Stalinism and Bolshevism**] However, social relations are just that, **social** and so between individuals and classes — ownership of property cannot tell the whole story. What social relations did Bolshevism bring about?

As far as the wage labour social relationship goes (and do not forget that is the defining feature of capitalism), the Bolsheviks opposed workers' self-management in favour of, first, *"control"* over the capitalists and then one-man management. No change in social relationships there. Property relations did change in the sense that the state became the owner of capital rather than

individual capitalists, but the **social** relationship workers experienced during the working day and within society was identical. The state bureaucrat replaced the capitalist.

As for politics, the Bolshevik revolution replaced government with government. Initially, it was an elected government and so it had the typical social relationships of representative government. Later, it became a one party dictatorship — a situation that did not change under Stalin. Thus the social relationships there, again, did not change. The Bolshevik Party became the head of the government. That is all. This event also saw the reconstruction of Soviet Society in the interest of a privileged minority — it is well known that the Communists gave themselves the best rations, best premises and so on.

Thus the Bolshevik revolution did **not** change the social relations people faced and so Trotsky's comments are wishful thinking. The *"interests of the masses"* could not, and were not, defended by the Bolshevik revolution as it did not change the relations of authority in a society — the social relationships people experienced remain unchanged. Perhaps that is why Lenin argued that the proletarian nature of the Russian regime was ensured by the nature of the ruling party? There could be no other basis for saying the Bolshevik state was a workers' state. After all, nationalised property without workers' self-management **does not change social relationships** it just changes who is telling the workers what to do.

The important point to note is that Trotsky argued that the proletariat could be a ruling class when it had **no** political influence, never mind democracy, when subject to a one-party state and bureaucratic dictatorship and when the social relations of the society were obviously capitalistic. No wonder he found it impossible to recognise that dictatorship by the party did not equal dictatorship by the proletariat.

Therefore, the claim that Trotskyists see the *"dictatorship of the proletariat"* as *"the rule of one class over another"* is, as can be seen, a joke. Rather they see it as the rule of the party over the rest of society, **including** the working class. Even when that party had become a bureaucratic nightmare, murdering millions and sending hundreds of thousands to forced labour camps, Trotsky still argued that the *"working class"* was still the *"ruling class."* Not only that, his political perspective allowed him to justify the suppression of workers' democracy in the name of the *"rule"* of the workers. For this reason, anarchists feel that the real utopians are the Leninists who believe that party rule equals class rule and that centralised, hierarchical power in the hands of the few will not become a new form of class rule. History, we think, supports our politics on this issue (as in so many others).

Mitchinson argues that *"Anarchism's utopian calls to abolish the state overnight demonstrates neither the understanding of what the state is, nor the programme of action necessary to achieve the goal it sets itself."* However, as made clear, it is Marxism which is utopian, believing that rule by a party equals rule by a class and that a state machine can be utilised by the majority of the population. As Kropotkin argued, Anarchists *"maintain that the State organisation, having been the force to which minorities resorted for establishing and organising their power over the masses, cannot be the force which will serve to destroy these privileges."* [**Kropotkin's Revolutionary Pamphlets**, p. 170]

Luigi Fabbri sums up the difference well:

> *"The mistake of authoritarian communists in this connection is the belief that fighting and organising are impossible without submission to a government; and thus they regard anarchists ... as the foes of all organisation and all co-ordinated struggle. We, on*

> *the other hand, maintain that not only are revolutionary struggle and revolutionary organisation possible outside and in spite of government interference but that, indeed, that is the only effective way to struggle and organise, for it has the active participation of all members of the collective unit, instead of their passively entrusting themselves to the authority of the supreme leaders."* [*"Anarchy and 'Scientific' Communism"*, in **The Poverty of Statism**, pp. 13–49, Albert Meltzer (ed.), p. 27]

Mitchinson moves on to the usual Marxist slander that as *"a modern philosophy anarchism developed in the 19th century alongside the explosive growth of capitalism and its state machine. It represented a rebellion by a section of the petty bourgeoisie at the loss of their position in society, driven to the wall by the growth of monopoly."* We have refuted this assertion in another appendix (Reply to errors and distortions in David McNally's pamphlet "Socialism from Below") and so will not do so here.

14. Why do anarchists reject the Marxist notion of *"conquest of power"*?

Mitchinson now decides to quote some anarchists to back up his spurious argument:

> *"Their case was argued by Mikhail Bakunin and his supporters in the First International. At an anarchist conference in 1872 they argued 'The aspirations of the proletariat can have no other aim than the creation of an absolutely free economic organisation and federation based on work and equality and wholly independent of any political government, and such an organisation can only come into being through the spontaneous action of the proletariat itself...no political organisation can be anything but the organisation of rule in the interests of a class and to the detriment of the masses...the proletariat, should it seize power, would become a ruling, and exploiting, class...'"*

To understand this passage it is necessary to place it in historical context. In 1872, the proletariat was a **minority** class within all nations **bar** the UK. In almost all nations, the majority of the working class were either artisans or peasants (hence the reference to *"the masses"*). To urge that the proletariat seize power meant to advocate the class rule of a **minority** of the working masses. Minority rule could be nothing else but the dictatorship of a minority over the majority (a dictatorship in the usual sense of the word), and dictatorships always become exploitative of the general population.

Thus Mitchinson's "analysis" is ahistoric and, fundamentally, unscientific and a mockery of materialism.

Moreover, anarchists like Bakunin also made clear that the Marxist notion of *"proletarian dictatorship"* did not even mean that the proletariat **as a whole** would exercise power. In his words:

> "What does it mean, 'the proletariat raised to a governing class?' Will the entire proletariat head the government? The Germans number about 40 million. Will all 40 million be members of the government? The entire nation will rule, but no one would be ruled. Then there will be no government, there will be no state; but if there is a state, there will also be those who are ruled, there will be slaves.
>
> "In the Marxists' theory this dilemma is resolved in a simple fashion. By popular government they mean government of the people by a small number of representatives elected by the people. So-called popular representatives and rulers of the state

elected by the entire nation on the basis of universal suffrage — the last word of the Marxists, as well as the democratic school — is a lie behind which the despotism of a ruling minority is concealed, a lie all the more dangerous in that it represents itself as the expression of a sham popular will.

"So ... it always comes down to the same dismal result: government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of **former** workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers' world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people." [**Statism and Anarchy**, p. 178]

Thus anarchists reject the notion of the dictatorship of the proletariat for two reasons. Firstly, because it excluded the bulk of the working masses when it was first used by Marx and Engels. Secondly, because in practice it would mean the dictatorship of the party **over** the proletariat. Needless to say, Mitchinson does not mention these points.

Mitchinson argues that *"[a]lthough this sounds radical enough it nonetheless amounts to a recipe for inaction and disaster."* And quotes Trotsky to explain why:

"To renounce the conquest of power is voluntarily to leave the power with those who wield it, the exploiters. The essence of every revolution consisted and consists in putting a new class in power, thus enabling it to realise its own programme in life. It is impossible to wage war and to reject victory. It is impossible to lead the masses towards insurrection without preparing for the conquest of power."

For anarchists the question immediately is, *"power to who"*? As is clear from the writings of Lenin and Trotsky they see the *"conquest of power"* **not** in terms of *"putting a new class in power"* but, in fact, the **representatives** of that class, the vanguard party, into power. Anarchists, in contrast, argue that organs of working class self-management are the means of creating and defending a **social** revolution as it is the only means that the mass of people can actually run their own lives and any power over and above these organs means dictatorship **over** the working class, a new form of state and class power.

As Rudolf Rocker argues:

"Let no one object that the 'dictatorship of the proletariat' cannot be compared to run of the mill dictatorship because it is the dictatorship of a class. Dictatorship of a class cannot exist as such, for it ends up, in the last analysis, as being the dictatorship of a given party which arrogates to itself the right to speak for that class. Thus, the liberal bourgeoisie, in their fight against despotism, used to speak in the name of the 'people'...

"We already know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is,

and will continue to be, the fortress keeping the masses of the people under dominion. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.

"The fact that a large number of socialist parties have rallied to the idea of councils, which is the proper mark of libertarian socialist and revolutionary syndicalists, is a confession, recognition that the tack they have taken up until now has been the product of a falsification, a distortion, and that with the councils the labour movement must create for itself a single organ capable of carrying into effect the unmitigated socialism that the conscious proletariat longs for. On the other hand, it ought not to be forgotten that this abrupt conversion runs the risk of introducing many alien features into the councils concept, features, that is, with no relation to the original tasks of socialism, and which have to be eliminated because they pose a threat to the further development of the councils. These alien elements are able only to conceive things from the dictatorial viewpoint. It must be our task to face up to this risk and warn our class comrades against experiments which cannot bring the dawn of social emancipation any nearer — which indeed, to the contrary, positively postpone it.

"Consequently, our advice is as follows: Everything for the councils or soviets! No power above them! A slogan which at the same time will be that of the social revolutionary." [**Anarchism and Sovietism**]

Or, as the Bakunin influenced Jura Federation of the First International put it in 1874, *"the dictatorship that we want is one which the insurgent masses exercise directly, without intermediary of any committee or government."* [quoted by Peter Marshall, **Demanding the Impossible**, p. 631] In other words, a situation in which the working masses defend their freedom, their control over their own lives, from those who seek to replace it with minority rule.

15. What caused the degeneration of the Russian Revolution?

Mitchinson argues that:

> *"Anarchists see in the degeneration of the Soviet Union into a totalitarian dictatorship proof that Bakunin was right. In reality, only Leon Trotsky and Marxism have been able to explain the causes of that degeneration, finding its roots not in men's heads or personalities, but in the real life conditions of civil war, armies of foreign intervention, and the defeat of revolution in Europe."*

Needless to say, anarchism explains the causes of the degeneration in a far more rich way than Mitchinson claims. The underlying assumption of his "critique" of anarchism is that the **politics** of the Bolsheviks had no influence on the outcome of the revolution — it was a product purely of objective forces. He also subscribes to the contradictory idea that Bolshevik politics were essential for the success of that revolution. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions that they face. What decisions they make will be influenced by the ideas they hold – they will **not** occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus,

someone placed into a position of power over others will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations.

So, obviously the *"ideas in people's heads"* matter, particularly during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and federalism. In other words, **political ideas do matter** in society. Nor do anarchists leave our analysis at this obvious fact — as noted, we also argue that the types of organisation people create and work in shapes the way they think and act. This is because specific kinds of organisation have specific authority relations and so generate specific social relationships. These obviously affect those subject to them — a centralised, hierarchical system will create authoritarian social relationships which shape those within it in totally different ways than a decentralised, egalitarian system. That Mitchinson denies this obvious fact suggests he knows nothing of materialist philosophy.

Moreover, anarchists are aware of the problems facing the revolution. After all, anarchists were involved in that revolution and wrote some of the best works on that revolution (for example, Voline's **The Unknown Revolution**, Arshinov's **The History of the Makhnovist Movement** and Maximov's **The Guillotine at Work**). However, they point to the obvious fact that the politics of the Bolsheviks played a key role in how the revolution developed. While the terrible objective conditions may have shaped certain aspects of the actions of the Bolsheviks it cannot be denied that the impulse for them were rooted in Bolshevik theory. After all, anarchist theory could not justify the suppression of the functional democracy associated with the factory committees or the soldiers election of officers in the Red Army. Bolshevik theory could, and did.

Indeed, Trotsky was still claiming in 1937 that the *"Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics."* [**Stalinism and Bolshevism**] In other words, the Bolshevik policies implemented during the Civil War were the correct, Marxist, ones. Also, although Lenin described the NEP (New Economic Policy) of 1921 as a 'defeat', at no stage did he describe the suppression of soviet democracy and workers' control in such language. In other words, Bolshevik politics did play a role, a key role, in the degeneration of the Russian Revolution and to deny it is to deny reality. In the words of Maurice Brinton:

> *"[I]n relation to industrial policy there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practice of Stalinism. We know that many on the revolutionary left will find this statement hard to swallow. We are convinced however that any honest reading of the facts cannot but lead to this conclusion. The more one unearths about this period [1917–21], the more difficult it becomes to define — or even see — the 'gulf' allegedly separating what happened in Lenin's time from what happened later. Real knowledge of the facts also makes it impossible to accept ... that the whole course of events was 'historically inevitable' and 'objectively determined.' Bolshevik ideology and practice were* ***themselves*** *important and sometimes decisive factors in the equation, at every critical stage of this critical period."* [**Op. Cit.**, p. 84]

We should also point out that far from *"Leon Trotsky and Marxism"* explaining the degeneration of the Russian revolution, Trotsky could not understand that a *"totalitarian dictatorship"* could be an expression of a new minority class and presented a decidedly false analysis of the Soviet

Union as a *"degenerated workers' state."* That analysis led numerous Trotskyists to support these dictatorships and oppose workers' revolts against them. In addition, Trotsky's own reservations were only really voiced after he had lost power. Moreover, he never acknowledged how his own policies (such as the elimination of soldiers democracy, the militarisation of labour, etc.) played a key role in the rise of the bureaucracy and Stalin.

Ultimately, every explanation of the degeneration of the Russian revolution by Trotskyists ends up as an appeal to *"exception circumstances"* — they blame the rise of Stalinism on the Civil War, to the *"exceptional circumstances"* created by that war. This can be faulted for two reasons.

Firstly, as Trotsky himself argued (with respect to the Spanish Anarchists) *"did not the leaders of German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an 'exceptional circumstance.' ... we do severely blame the anarchist theory, which seemed wholly suitable for times of peace, but had to be dropped rapidly as soon as the 'exceptional circumstance' of the ... revolution had begun."* [**Stalinism and Bolshevism**] Needless to say, he did not apply his critique to his own politics, which were also a form of the *"exceptional circumstances"* excuse. Given how quickly Bolshevik "principles" (as expressed in **The State and Revolution**) were dropped, we can only assume that Bolshevik ideas are also suitable purely for *"times of peace"* as well.

Secondly, this "explanation" basically argues that, **if** the bourgeois did not defend their power in 1917, then Leninism would have worked out fine. As Mitchinson himself noted above, belief that the bourgeois will just go away without a fight is *"an infantile flight of fancy."* As Lenin argued, *"revolution ..., in its development, would give rise to exceptionally complicated circumstances"* and *"[r]evolution is the sharpest, most furious, desperate class war and civil war. Not a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances."* [**Will the Bolsheviks Maintain Power?**, p. 80 and p. 81]

If the Civil War did solely produce the degeneration of the Russian Revolution then all we can hope for is that in the next social revolution, the civil war Lenin argued was inevitable is not as destructive as the Russian one. Hope is not much of a basis to build a "scientific" socialism — but then again, neither is "fate" much of a basis to explain the degeneration of the Russian Revolution but that is what Trotskyists do argue.

We discuss the Russian Revolution in more detail in the appendix on " What happened during the Russian Revolution?" of the FAQ and will not do so here. However, we can point out the experience of the anarchist Makhnovist movement in the Ukraine during the Russian Revolution. Facing exactly the same objective conditions they encouraged soviet democracy, held regular congresses of workers and peasants (the Bolsheviks tried to ban two of them), defended freedom of the press and of association and so on. If objective conditions determined Bolshevik policies, why did they not also determine the policies of the Makhnovists? This practical example indicates that the usual Trotskyist explanation of the degeneration of the Revolution is false.

Perhaps it is because of this, that it showed an alternative to Bolshevik politics existed and worked, that Trotskyists slander it? Trotsky himself asserted that the Makhnovists were simply *"kulaks"* on horseback and that Makhno's *"followers ... [expressed] a militant anti-Semitism."* [Lenin and Trotsky, **Kronstadt**, p. 80] We discuss the Makhnovist movement in the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?" of the FAQ and there we refute claims that the Makhnovist movement was a kulak (rich peasant) one. How-

ever, the charge of *"militant anti-Semitism"* is a serious one and so we will expose its falsehood here and well as in section 9 of the specified appendix.

The best source to refute claims of anti-Semitism is to quote the work of the Jewish anarchist Voline. He summarises the extensive evidence against such claims:

> *"We could cover dozens of pages with extensive and irrefutable proofs of the falseness of these assertions. We could mention articles and proclamations by Makhno and the Council of Revolutionary Insurgents denouncing anti-Semitism. We could tell of spontaneous acts by Makhno himself and other insurgents against the slightest manifestation of the anti-Semitic spirit on the part of a few isolated and misguided unfortunates in the army and the population... One of the reasons for the execution of Grigoriev by the Makhnovists was his anti-Semitism and the immense pogrom he organised at Elizabethgrad... We could cite a whole series of similar facts, but we do not find it necessary ... and will content ourselves with mentioning briefly the following essential facts:*
>
> *"1. A fairly important part in the Makhnovist movement was played by revolutionists of Jewish origin.*
>
> *"2. Several members of the Education and Propaganda Commission were Jewish.*
>
> *"3. Besides many Jewish combatants in various units of the army, there was a battery composed entirely of Jewish artillery men and a Jewish infantry unit.*
>
> *"4. Jewish colonies in the Ukraine furnished many volunteers to the Insurrectionary Army.*
>
> *"5. In general the Jewish population ... took an active part in all the activities of the movement. The Jewish agricultural colonies ... participated in the regional assemblies of workers, peasants and partisans; they sent their delegates to the regional Revolutionary Military Council..."* [**The Unknown Revolution**, pp. 967–8]

Voline also quotes the eminent Jewish writer and historian M. Tcherikover about the question of the Makhnovists and anti-Semitism. The Jewish historian states *"with certainty that, on the whole, the behaviour of Makhno's army cannot be compared with that of the other armies which were operating in Russian during the events 1917–21 ... It is undeniable that, of all these armies, including the Red Army, the Makhnovists behaved best with regard the civil population in general and the Jewish population in particular ... The proportion of* ***justified*** *complaints against the Makhnovist army, in comparison with the others, is negligible... Do not speak of pogroms alleged to have been organised by Makhno himself. That is a slander or an error. Nothing of the sort occurred. As for the Makhnovist Army ...* ***[n]ot once*** *have I been able to prove the existence of a Makhnovist unit at the place a pogrom against the Jews took place. Consequently, the pogroms in question could not have been the work of the Makhnovists."* [quoted by Voline, **Op. Cit.**, p. 699]

Given that the Red Army agreed to two pacts with the Makhnovists, we can only surmise, if Trotsky thought he was telling the truth, that Trotsky was a hypocrite. However, Trotsky was either consciously lying or in error — unfortunately the Trotskyist publishers of his words did not bother to note that his assertion was false. We are sorry for this slight digression, but many Trotskyists take Trotsky's words at face value and repeat his slander — unless we indicate their false nature they may not take our argument seriously.

Mitchinson continues by stating:

> *"The position of anarchism only serves to endorse the bourgeois slander that Stalinism was inherent in Bolshevism."*

This appeal against slander is ironic from someone who writes an article full of it. But, of course, it is **bourgeois** slander that he objects too — Trotskyist slander (and falsification) is fine.

The question of whether it is a *"bourgeois slander"* to argue (with supporting evidence) that *"Stalinism was inherent in Bolshevism"* is an important one. Trotskyists often point out that anarchist and libertarian Marxist critiques of Bolshevism sound similar to bourgeois ones and that anarchist accounts of Bolshevik crimes against the revolution and working class give ammunition to the defenders of the status quo. However, this seems more like an attempt to stop critical analysis of the Russian Revolution than a serious political position. Yes, the bourgeois do argue that Stalinism was inherent in Bolshevism — however they do so to discredit all forms of socialism and radical social change. Anarchists, on the other hand, analyse the revolution, see how the Bolsheviks acted and draw conclusions from the facts in order to push forward revolutionary thought, tactics and ideas. Just because the conclusions are similar does not mean that they are invalid – to label criticism of Bolshevism as *"bourgeois slander"* is nothing less than attempt to put people off investigating the Russian Revolution.

There is are course essential differences between the *"bourgeois slanders"* against the Bolsheviks and the anarchist critique. The bourgeois slander is based on an opposition to the revolution **as such** while the anarchist critique affirms it. The bourgeois slanders are not the result of the experiences of the working masses and revolutionaries subject to the Bolshevik regime as the anarchist is. Similarly, the bourgeois slanders ignore the nature of capitalist society while the anarchist critique points out that the degeneration of the Bolshevik state and party were a result of it not breaking with bourgeois ideas and organisational structures. Ultimately, it is **not** a case of *"bourgeois slanders"* but rather an honest evaluation of the events of the Russian Revolution from a working class perspective.

To use an analogy, it is common place for the bourgeois press and ideologists to attack trade unions as being bureaucratic and unresponsive to the needs of their members. It is also common place for members of those same trade unions to think exactly the same. Indeed, it is a common refrain of Trotskyists that the trade unions **are** bureaucratic and need to be reformed in a more democratic fashion (indeed, Mitchinson calls for the unions to be *"transformed"* in his essay). Needless to say, the bourgeois comments are "correct" in the sense that the trade unions do have a bureaucracy — their reasons for stating that truth serve their interests and their solutions aid those interests and not those of the members of the unions. Could a Trotskyist say that it was a *"bourgeois slander"* if the capitalist press point to the bureaucratic nature of the unions when their own papers do the same?

While it may be in the interests of the ruling elite and its apologists to scream about *"bourgeois slanders"*, it hinders the process of working class self-emancipation to do so. As intended, in all likelihood.

16. Did anarchists reject *"the need for organisation in the shape of trade unions"*?

Mitchinson now decides to "expose" anarchism:

> *"In its early days, this modern anarchism found a certain support amongst the workers. However, through the course of struggle workers learned the need for organisation in the shape of the trade unions, and also for political organisation which led to the building of the mass workers parties."*

To see the total nonsense of this claim we need only to turn to Marx. In his words, Bakunin thought that the *"working class ... must only organise themselves by trades-unions."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 48] Bakunin himself argued *"the natural organisation of the masses ... is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association."* [**The Basic Bakunin**, p. 139] Kropotkin argued that the *"union [**syndicat**] is absolutely necessary. It is the only form of workers' grouping which permits the direct struggle to be maintained against capital without falling into parliamentarism."* [quoted by Caroline Cahm, **Kropotkin and the Rise of Revolutionary Anarchism**, p. 269]

So much for anarchism being against trade unions (as Mitchinson implies). As for mass workers parties, well, history proved Bakunin right — such parties became corrupted, bureaucratic and reformist. For Mitchinson the last 130 years have not existed.

He goes on to argue that *"Bakunin and co. denounced participation in parliament, or the fight for reforms as a betrayal of the revolution, they 'rejected all political action not having as its immediate and direct objective the triumph of the workers over capitalism, and as a consequence, the abolition of the state.'"*

We must first note that the Bakunin quote presented does not support Mitchinson's assertions — unless you think that reforms can only be won via participation in parliament (something anarchists reject). The reason **why** Bakunin rejected *"all political action"* (i.e. bourgeois politics — electioneering in other words) is not explained. We will now do so.

Bakunin did denounce participation in parliament. History proved him right. Participation in parliament ensured the corruption of the Social Democratic Parties, the Greens and a host of other radical and socialist organisations. Mitchinson seems to have forgotten the fights against reformism that continually occurred in the Social Democratic Parties at end of the nineteenth and start of the twentieth centuries, a fight which ended with the defeat of the revolutionary wing and the decision to support the nation state in the first world war. The actual experience of using parliament confirmed Bakunin's prediction that when *"the workers ... send common workers ... to Legislative Assemblies ... The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois ... For men do not make their situations; on the contrary, men are made by them."* [**The Basic Bakunin**, p. 108]

What is not true, however, is that claim that Bakunin thought that *"the fight for reforms [w]as a betrayal of the revolution."* Bakunin was a firm believer in the importance of struggles for reforms, but struggles of a specific kind — namely struggles to win reforms which are based on the **direct action** by workers themselves:

> "What policy should the International [Workers' Association] follow during th[e] somewhat extended time period that separates us from this terrible social revolution ... the International will give labour unrest in all countries an **essentially economic** character, with the aim of reducing working hours and increasing salary, by means of

> the **association of the working masses** ... It will [also] propagandise its principles ... [**Op. Cit.**, p. 109]
>
> "And indeed, as soon as a worker believes that the economic state of affairs can be radically transformed in the near future, he begins to fight, in association with his comrades, for the reduction of his working hours and for an increase in his salary... through practice and action ... the progressive expansion and development of the economic struggle will bring him more and more to recognise his true enemies: the privileged classes, including the clergy, the bourgeois, and the nobility; and the State, which exists only to safeguard all the privileges of those classes." [**Op. Cit.**, p. 103]

This argument for reforms by direct action and workers' associations was a basic point of agreement in those sections of the First International which supported Bakunin's ideas. In the words of an anarchist member of the Jura Federation writing in 1875:

> *"Instead of begging the State for a law compelling employers to make them work only so many hours, the trade associations* ***directly impose*** *this reform on the employers; in this way, instead of a legal text which remains a dead letter, a real economic change is effected* ***by the direct initiative of the workers*** *... if the workers devoted all their activity and energy to the organisation of their trades into societies of resistance, trade federations, local and regional, if, by meetings, lectures, study circles, papers and pamphlets, they kept up a permanent socialist and revolutionary agitation; if by linking practice to theory, they* ***realised directly****, without any bourgeois and governmental intervention, all immediately possible reforms, reforms advantageous not to a few workers but to the labouring mass — certainly then the cause of labour would be better served than ... legal agitation."* [quoted by Caroline Cahm, **Kropotkin and the Rise of Revolutionary Anarchism**, p. 226]

So much for Bakunin or the libertarian wing of the First International being against reforms or the struggle for reforms. Anarchists have not changed their minds on this issue.

17. Why do anarchists reject political activity?

After spreading falsehoods against Bakunin, Mitchinson states that:

> *"Marxism fights for the conquest of political power by the working class and the building of a socialist society, under which the state will wither away.*
>
> *"Until then should workers refrain from political activity? Should they reject all reforms that might improve their existence? Nothing would please Blair or the bosses more."*

It is ironic that Mitchinson mentions Blair. He is, after all, the leader of the Labour Party — as mass workers party formed from the trade unions to use political action to gain reforms within capitalism. The current state of Labour indicates well the comment that *"in proportion as the socialists become a power in the present bourgeois society and State, their socialism must die out."* [Kropotkin, **Kropotkin's Revolutionary Pamphlets**, p. 189] It is as if the history of Social Democracy (or even the German Greens) does not exist for Mitchinson — he points

to Blair to refute anarchist analysis that Parliamentary politics corrupts the parties that use it! How strange, to ignore the results of socialists actually using *"political activity"* (and we must stress that anarchists traditionally use the term *"political action"* to refer to electioneering, i.e. bourgeois politics, only). Obviously reality is something which can be ignored when creating a political theory.

Needless to say, as noted above, anarchists do not *"reject all reforms."* We have quoted Bakunin, now we quote Kropotkin — *"the Anarchists have always advised taking an active part in those workers' organisations which carry on the **direct** struggle of Labour against Capital and its protector, the State."* He continued by arguing that such struggle, *"better than any other indirect means, permits the worker to obtain some temporary improvements in the present conditions of work, while it opens his eyes to the evil done by Capitalism and the State that supports it, and wakes up his thoughts concerning the possibility of organising consumption, production, and exchange without the intervention of the capitalist and the State."* [**Evolution and Environment**, pp. 82–3]

Thus we do not think that political action (electioneering) equates to reforms nor even is the best means of winning reforms in the first place. Anarchists argue that by direct action we can win reforms.

Mitchinson continues his diatribe:

> *"Of course not, we must advocate the struggle for every gain no matter how minor, and use any and every field open to us. Only the dilettante can reject better wages or a health care system. Precisely through these struggles, and the struggles to transform the workers organisations the unions and the parties, we learn and become more powerful and bring closer the day when it will be possible to transform society for good."*

As noted, anarchists do not reject reforms. Only a dilettante misrepresents the position of his enemies. And, as can be seen from the above quotes by Bakunin and Kropotkin, anarchists agree with Mitchinson's comments. Anarchists agree on the need to win reforms by direct action, which necessitates the creation of new forms of working class organisation based on firm libertarian principles and tactics — organisations like workers' councils, factory committees, community assemblies and so on.

However, when looking at the fields of struggle open to us, we evaluate them based on a materialist basis — looking at the implications of the tactics in theory and how they **actually worked out in practice.** Mitchinson obviously refuses to do this. Anarchists, on the other hand, base their politics on such an evaluation. For example, Bakunin would have been aware of Proudhon's experiences in the French National Assembly during the 1848 revolution:

> *"As soon as I set foot in the parliamentary Sinai, I ceased to be in touch with the masses; because I was absorbed by my legislative work, I entirely lost sight of current events ... One must have lived in that isolator which is called the National Assembly to realise how the men who are most completely ignorant of the state of the country are almost always those who represent it ... fear of the people is the sickness of all those who belong to authority; the people, for those in power, are the enemy."* [Proudhon, quoted by Peter Marshall, **Demanding the Impossible**, p. 244]

Similarly, the practical experiences of a socialist elected into Parliament would be easy to predict — they would be swamped by bourgeois politics, issues and activities. Anarchism gained

such socialists elected to parliament as Johann Most and Ferdinand Nieuwenhuis who soon released the correctness of the anarchist analysis. Thus actual experience confirmed the soundness of anarchist politics. Mitchinson, on the other hand, has to deny history — indeed, he fails to mention the history of Social Democracy at all in his article.

Thus the claim that we should use *"every field open to us"* is idealistic nonsense, at total odds with any claim to use scientific techniques of analysis (i.e. to being a scientific socialist) or a supporter of materialist philosophy. It means the rejection of historical analysis and the embrace of ahistoric wishful thinking.

Moreover, why do the workers need to *"transform"* their own organisations in the first place? Perhaps because they are bureaucratic organisations in which power is centralised at the top, in a few hands? Why did this happen, if fighting for reforms by any suitable means (including electioneering) was their rationale? Perhaps because the wrong people are in positions of power? But why are they the wrong people? Because they are right-wing, have reformist ideas, etc. Why do they have reformist ideas? Here Mitchinson must fall silent, because obviously they have reformist ideas because the organisations and activities they are part of are reformist through and through. The tactics (using elections) and organisational structure (centralisation of power) bred such ideas — as Bakunin and other anarchists predicted. Mitchinson's politics cannot explain why this occurs, which explains why Lenin was so surprised when German Social Democracy supported its ruling class during the First World War.

18. How do anarchists struggle for reforms under capitalism?

Mitchinson continues his distortion of anarchism by arguing:

> *"Marxists fight for every reform, whilst at the same time explaining that while capitalism continues none of these advances are safe. Only socialism can really solve the problems of society."*

As noted above, anarchists also fight for every reform possible — but by direct action, by the strength of working people in their *"natural organisations"* and *"social power"* (to use Bakunin's words). We also argue that reforms are always in danger — that is why we need to have strong, direct action based organisations and self-reliance. If we leave it to leaders to protect (never mind **win** reforms) we would not have them for long. Given that Labour governments have whittled previous reforms just as much as Conservative ones, anarchists feel our strategy is the relevant one.

Mitchinson continues:

> *"Our modern day anarchists, Reclaim the Streets and others, have no support in Britain amongst the organised workers."*

Which is not true, as RTS and other anarchists do seek influence with the organised workers (and the unorganised ones, and the unemployed, etc.). They have invited rank-and-file trade union activists to their demonstrations to speak, trade unionists are members of anarchist organisations, etc. Anarchists are at the forefront of supporting strikers, particularly when their union betrays their struggle and does not support them. For example, during the Liverpool dockers strike RTS and the dockers formed a common front, organised common demonstrations and so

on. The trade unions did nothing to support the dockers, RTS and other anarchist groups did. That in itself indicates the weakness of Mitchinson's claims. It would also be useful to point out that Trotskyists have little support amongst organised workers as well.

Moreover, anarchists do not seek to become part of the trade union bureaucracy and so their influence cannot be easily gauged.

After asserting these dubious "facts" about anarchist influence, he continues:

> *"Some radicalised youth however are attracted to their 'direct action' stance. There is a vacuum left by the absence of a mass Labour youth organisation which, fighting for a socialist programme, could attract these young workers and students. With no lead being given by the tops of the unions, and Labour in government attacking young people, that vacuum can be temporarily and partly filled by groups like Reclaim the Streets."*

Needless to say, Mitchinson does not pose the question **why** the Labour government is attacking *"young people"* (and numerous other sections of the working class). Why has the Labour Party, a mass workers party which uses elections to gain reforms, been attacking (as it has always done, we must note) its support? If its because the leaders are "right-wing" then why have the membership supported them? Why have the "right-wing" gained such influence? Also, why is there no *"mass Labour youth organisation"*? And why should *"young people"* join an organisation which is part of the party which is attacking them? And why are the *"tops of the unions"* not giving a *"lead"*? Perhaps because its not in their interests to do so? Because they hate direct action and radical workers as much as the bosses?

Mitchinson's "analysis" is question begging in the extreme.

He continues:

> *"What action do they propose though? In their press statement (2/5/00) they explain, 'We were not protesting. Under the shadow of an irrelevant parliament we were planting the seeds of a society where ordinary people are in control of their land, their resources, their food and their decision making. The garden symbolised an urge to be self-reliant rather than dependent on capitalism.'"*

Firstly, we should point out that having access to land **is** a key way for workers to be independent of capitalism. Perhaps Mitchinson forgets Marx's discussion of the colonies in chapter 33 of **Capital**? In it Marx discusses how access to land allowed immigrants to America and Australia to reject wage labour (i.e. capitalism) by providing them with the means to survive without selling themselves on the labour market to survive. The state had to be used to enforce the laws of supply and demand by restricting access to the land. Or, perhaps, he had forgotten Marx's discussion in chapter 27 of **Capital** of the role of enclosures in creating a dispossessed mass of people who were forced, by necessity, to become the first generation of wage slaves? Either way, access to the land **was** (and still is, in many countries) a means of being independent of capitalism — and one which the state acts to destroy.

Secondly, the garden was a **symbol** of a communist society, not an expression of the type of society RTS and other anarchists desire. So, as a **symbol** of a anti-capitalist vision, the garden is a good one given the history of state violence used to separate working people from the land and propel them into the labour market. However, it is only a **symbol** and not, obviously, to be

taken as an example of the future society RTS or other anarchists desire. Only someone lacking in imagination could confuse a symbol with a vision — as the press release states it *"celebrated the possibility of a world that encourages co-operation and sharing rather than one which rewards greed, individualism and competition."*

Thirdly, as their press release states, *"Guerrilla Gardening is not a protest; by its very nature it is a creative peaceful celebration of the growing global anticapitalist movement."* Mitchinson attacks the action for being something it was never intended to be.

He "analyses" the RTS press release:

> *"The fact that parliament appears powerless to prevent job losses or the destruction of the environment, only demonstrates that it serves the interests of capitalism."*

Very true, as Kropotkin argued the *"State is there to protect exploitation, speculation and private property; it is itself the by-product of the rapine of the people. The proletariat must rely on his own hands; he can expect nothing of the State. It is nothing more than an organisation devised to hinder emancipation at all costs."* [**Words of a Rebel**, p. 27] He argues elsewhere that *"small groups of men [and women] were imbued with the ... spirit of revolt. They also rebelled – sometimes with the hope of partial success; for example winning a strike and of obtaining bread for their children ... Without the menace contained in such revolts, no serious concession has ever been wrung by the people from governing classes."* [**Evolution and Environment**, p. 103]

Mitchinson seems to agree:

> *"However, under pressure from below it is possible to introduce reforms through parliament that are in the interests of ordinary people."*

Thus reforms **are** possible, but only if we rely on ourselves, organise pressure from below and use direct action to force parliament to act (if that is required). Which is what anarchists have always argued. Without anti-parliamentary action, parliament will ignore the population. That is what anarchists have always argued — we have to reply on our own organisations, solidarity and direct action to change things for the better. Faced with such a movement, parliament would introduce reforms regardless of who was a member of it. Without such a movement, you end up with Tony Blair. Thus Mitchinson is confused — by his own logic, the anarchists are correct, we have to work outside parliament and electioneering in order to be effective.

He continues:

> *"It is no use declaring parliament to be irrelevant, and turning your back on it when the majority do not agree, and still look to government to make their lives better. This is the mirror image of the sects attitude to the Labour Party. Any and every avenue which can be used to improve our lives must be used."*

How do you change the opinion of the majority? By changing your position to match theirs? Of course not. You change their position by argument and proving that direct action is more effective in making their lives better than looking to government. Mitchinson would have a fit if someone argued *"it is no use declaring capitalism to be wrong and fighting against it when the majority do not agree and still look to it to make their lives better."* If the majority do not agree

with you, then you try and change their opinion — you do not accept that opinion and hope it goes away by itself!

Mitchinson seems to be following Lenin when he argued *"[y]ou must not sink to the level of the masses ... You must tell them the bitter truth. You are duty bound to call their bourgeois-democratic and parliamentary prejudices what they are — prejudices. But at the same time you must **soberly** follow the **actual** state of the class-consciousness ... of **all** the toiling masses."* [**Left-wing Communism: An Infantile Disorder**, p. 41] Obviously, you cannot tell workers the bitter truth and at the same time follow their prejudices. In practice, if you follow their prejudices you cannot help but encourage faith in parliament, social democratic parties, leaders and so on. Progress is achieved by discussing issues with people, not ducking the question of political issues in favour of saying what the majority want to hear (which is what the capitalist media and education system encourage them to believe in the first place). As a means of encouraging revolutionary thought it is doomed to failure.

Also, just to stress the point, any and every avenue which can be used to improve our lives must be used but only if it actually is revolutionary and does not place obstacles in the process of social change. Parliamentary action has been proven time and time again to be a false way for radical change — it only ends up turning radicals into supporters of the status quo. It makes as much sense as arguing that any and every avenue must be used to cure a disease, including those which give you a new disease in its place.

19. How does Mitchinson distorts the use of the term *"Self-reliance"*?

Mitchinson argues that:

> *"In any case this 'self-reliance' is no alternative. Self-reliance won't get electricity into your house, educate your children or treat you when you are ill."*

No anarchist and no one in RTS ever claimed it would. We use the term *"self-reliance"* in a totally different way — as anyone familiar with anarchist or RTS theory would know. We use it to describe individuals who think for themselves, question authority, act for themselves and do not follow leaders. No anarchist uses the term to describe some sort of peasant life-style. But then why let facts get in the way of a nice diatribe?

He continues:

> *"We have the resources to cater for all of society's needs, the only problem is that we do not own them."*

Actually, the **real** problem is that we do not **control** them. The examples of Nationalised industries and the Soviet Union should make this clear. In theory, they were both owned by their populations but, in practice, they were effectively owned by those who managed them — state bureaucrats and managers. They were not used to cater for our needs, but rather the needs of those who controlled them. For this reason anarchists argue that common ownership without workers' self-management in the workplace and community would be little more than state capitalism (wage labour would still exist, but the state would replace the boss).

He continues with his distortion of the concept of *"self-reliance"*:

> *"Individualism (self-reliance) cannot be an alternative to socialism, where all the resources of society are at all of our disposal, and equally we all contribute what we can to society."*

Firstly, anarchists are socialists and mostly seek a (libertarian) communist society where the resources of the world are at our disposal.

Secondly, self-reliance has little to do with *"individualism"* — it has a lot to do with **individuality,** however. The difference is important.

Thirdly, in a part of the press release strangely unquoted by Mitchinson, RTS argue that their action *"celebrated the possibility of a world that encourages co-operation and sharing rather than one which rewards greed, individualism and competition."* RTS are well aware that self-reliance does not equal individualism and they are very clear that oppose individualism and desire co-operation. Given that Mitchinson quotes from their press release, he must know this and yet he asserts the opposite.

Mitchinson seems to equate self-reliance with *"individualism"* and so, presumably, capitalism. However, capitalists do not want self-reliant workers, they want order takers, people who will not question their authority. As David Noble points out, after an experiment in workers' control General Electric replaces it with a the regime that was *"designed to 'break' the pilots of their new found 'habits' of self-reliance, self-discipline, and self-respect."* [**Forces of Production**, p. 307]

Capitalists know the danger of self-reliant people. Self-reliant people question authority, think for themselves, do not follow leaders and bring these abilities into any groups they join. Thus self-reliance is not purely an individual thing, it also refers to groups **and** classes. Anarchists desire to see a self-reliant working class — a class which makes its own decisions and does not follow leaders. Thus, for anarchists, self-reliance refers to **both** individuals and groups (just as self-management and self-liberation does). Needless to say, for those in authority or those seeking authority self-reliance is an evil thing which must be combated. Hence Mitchinson's diatribe — it is the cry of the would-be leader who is afraid his followers will not respect his authority.

20. Is anarchism an example of *"Philosophical idealism"*?

He turns to the May Day demonstration:

> *"Guerrilla gardening and its related varieties that have sprung up in various places, is nothing more than an offshoot of the old utopian idea of changing society by example."*

Actually, it was a specific demonstration to encourage people to get involved in collective action, to have a good time and challenge authority and the status quo. It was an attempt to change society by example only in the sense that it would encourage others to act, to challenge the status quo and get involved in collective action. If Mitchinson was consistent he would have to oppose **every** demonstration that occurred before the final insurrection that created the "workers' state" — a demonstration is, by its very nature, an example to others of what is possible, an example of our collective strength and our desire for change. You may be critical of the nature of the guerrilla gardening action (and many anarchists are), but you cannot misrepresent its nature as Mitchinson does and be expected to be taken seriously.

He continues:

> *"The roots of this scheme lie in idealist philosophy. Philosophical idealism refers to the notion that people's actions are a consequence of their thoughts, that ideas and not our conditions of life determine our outlook. When, through a long process of accumulation, we change people's minds, then they will live differently, capitalism will simply be redundant. The capitalist class themselves will presumably sit idly by and watch their system fall apart."*

Given that the "anti-capitalist" demonstrations have meet extensive state violence, it is clear that those involved are well aware that capitalist class will not just watch its power disappear.

Also, calling RTS's action *"idealist philosophy"* is quite ironic for someone who seems intent in ignoring the history of Social Democracy and dismisses attempts to analyse the Bolsheviks in power as *"bourgeois slanders."* However, Mitchinson in his diatribe forgets one of the basic arguments of materialism — namely that ideas themselves are part of the material world and so influence society and how it develops. He rejects the notion that peoples thoughts and ideas determine their actions. He obviously thinks that people operate on auto-pilot, not thinking about their actions. However, in reality, what people do is dependent on their thoughts — they think about their actions and what motivates them influences their activity. If thoughts did not determine people's actions then Mitchinson would not have spent so much time writing this article!

Thus Mitchinson is well aware of the importance of ideas in social change, at least implicitly. Indeed, he argues for the need for a *"mass Labour youth organisation which, fighting for a socialist programme, could attract these young workers and students."* To state the obvious, a socialist programme is a means to *"change people's minds"* and present the possibility of creating a new society. Does he seriously think a socialist revolution is possible without changing people's minds, getting them to desire a socialist society?

Moreover, if he had read Bakunin he would be aware that anarchists consider the class struggle as the way to change people's ideas. As Bakunin argued:

> *"the germs of [socialist thought] ... [are to] be found in the instinct of every earnest worker. The goal ... is to make the worker fully aware of what he wants, to unjam within him a stream of thought corresponding to his instinct ... What impedes the swifter development of this salutary though among the working masses? Their ignorance to be sure, that is, for the most part the political and religious prejudices with which self-interested classes still try to obscure their conscious and their natural instinct. How can we dispel this ignorance and destroy these harmful prejudices? By education and propaganda? ... they are insufficient ... [and] who will conduct this propaganda? ... [The] workers' world ... is left with but a single path, that of* ***emancipation through practical action*** *... It means workers' solidarity in their struggle against the bosses. It means* ***trade-unions, organisation*** *... To deliver [the worker] from that ignorance [of reactionary ideas], the International relies on collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses ... As soon as he begins to take an active part in this wholly material struggle, ... Socialism replaces religion in his mind... through practice and collective experience ... the progressive and development of the economic struggle will bring him more and more to recognise his true enemies ... The workers thus enlisted in the struggle will necessarily*

> *... recognise himself to be a revolutionary socialist, and he will act as one.*" [**The Basic Bakunin**, pp. 102–3]

Thus anarchists are aware that experience determines thought but we are also aware that thought is essential for action. We recognise the importance of ideas in the class struggle but we also realise that the ideas people have change as a result of that struggle. To state otherwise is to misrepresent anarchist thought.

21. How is Mitchinson's critique self-contradictory?

He continues his distortion:

> *"Whilst believing in a revolutionary struggle to overthrow capitalism, anarchists argue that it must be replaced by...nothing."*

This is ironic for quite a few reasons. Firstly, above Mitchinson claimed that anarchists did not aim to overthrow capitalism, just the state. Now he is claiming we **do** believe in overthrowing capitalism. Secondly, he quoted Trotsky saying that anarchists just ignore the state. Now Mitchinson states we aim to overthrow the capitalism via revolutionary struggle. How do you overthrow something via revolutionary struggle by ignoring it? His critique is not even internally consistent.

Moreover, he is well aware what anarchists want to replace capitalism with, after all he quotes an anarchist conference which stated that they aimed for *"the creation of an absolutely free economic organisation and federation based on work and equality"*! Bakunin was always arguing that the International Workers Association should become *"an earnest organisation of workers associations from all countries, capable of replacing this departing world of States and bourgeoisie."* [**The Basic Bakunin**, p. 110] In other words, the *"future social organisation must be made solely from the bottom upwards, by the free association of workers, first in their unions, then in the communes, regions, nations and finally in a great federation, international and universal."* [**Michael Bakunin: Selected Writings**, p. 206] Even Engels acknowledged that the anarchists aimed to *"dispose all the authorities, abolish the state and replace it with the organisation of the International."* [Marx, Engels and Lenin, **Op. Cit.**, p. 72] Anyone with even a basic knowledge of anarchist theory would know this. And given that Mitchinson stated that *"Marx saw a future society without a state"* as well and that he quotes Trotsky as arguing *"Marxists are wholly in agreement with the anarchists in regard to the final goal: the liquidation of the state"* we can only assume that Marxists also aim at replacing it, eventually, when the state *"withers away,"* with *"nothing."*

This sentence, more than any other, shows the level which some Marxists will sink to when discussing anarchism. It shows that the standard Marxist critique of anarchism is little more than an inconsistent collection of lies, distortion and misrepresentation. Mitchinson not only contradicts his ideological gurus, he even contradicts himself! That is truly impressive.

22. How did Trotsky make the trains run on time?

Mitchinson asks:

> *"Yet with no central apparatus, no organisation, how would the trains run on time, how could organ transplants be organised, how could the world's resources be channelled into permanently overcoming famine."*

Firstly, we must note the usual fallacy — being opposed to a *"central apparatus"* does not imply *"no organisation."* Instead of centralised organisation, anarchists propose **federal** organisations in which co-ordination is achieved by collective decision making from the bottom up. In other words, rather than delegate power into the hands of *"leaders"*, an anarchist organisation leaves power at the bottom and co-ordination results from collective agreements that reflect the needs of those directly affected by them. Thus a federal organisation co-ordinates activities but in a bottom-up fashion rather than top-down, as in a centralised body.

Secondly, needless to say, anarchists are quite clear on who would make the trains run on time — the railway workers. Anarchists are firm supporters of workers' self-management. Anyone with even a basic understanding of anarchist theory would know that. Moreover, the experience of workers' self-management of the railways by the anarchist union the CNT during the Spanish Revolution indicates that such anarchism can, and does, ensure that the trains run on time In contrast, the experience of Russia — when the Bolsheviks did create a *"central apparatus"* — proved a total failure. It is quite appropriate that Mitchinson uses the *"trains running on time"* example, after all it is what apologists for Italian fascism praised Mussolini for! This is because Trotsky (when he ran the railways) did so in a way that Mussolini would have been proud of — he subjected the railway workers to military discipline:

> *"Due to the Civil War — and to other factors less often mentioned, such as the attitude of the railway workers to the 'new' regime — the Russian railways had virtually ceased to function. Trotsky, Commissar for Transport, was granted wide emergency powers [in August 1920] to try out his theories of 'militarisation of labour.' He started out placing the railwaymen and the personnel of the repair workshops under martial law. When the railwaymen's trade union objected, he summarily ousted its leaders and,* ***with the full support and endorsement of the Party leadership,*** *'appointed others willing to do his bidding. He repeated the procedure in other unions of transport workers.'"* [Maurice Brinton, **The Bolsheviks and Workers' Control**, p. 67]

He ruled the *"central apparatus"* he created, called the Tsektran, *"along strict military and bureaucratic lines."* [**Ibid.**] The trains did start moving again, of course. The question is — do workers manage their own activity or does some other group. Trotsky and Lenin in power decided for the latter — and built the *"centralised apparatus"* required to ensure that result. Needless to say, Trotsky did not justify his militarisation of work in terms of necessary evils resulting from appalling objective conditions. Rather he saw it as a matter of *"principle"*:

> "The working class cannot be left wandering all over Russia. They must be thrown here and there, appointed, commanded, just like soldiers."
>
> "The very principle of compulsory labour is for the Communist quite unquestionable ... the only solution to economic difficulties from the point of view of both principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power ... and to introduce strict order into the work of its registration, mobilisation and utilisation."

> "The introduction of compulsory labour service is unthinkable without the application ... of the methods of militarisation of labour." [quoted by M. Brinton, **Op. Cit.**, p. 61 and p. 66]

Why *"principle"*? Perhaps because Marx and Engels had stated in **The Communist Manifesto** that one of the measures required during the revolution was the *"[e]stablishment of industrial armies"*? [**Selected Writings**, p. 53]

Moreover, the experience of *"central apparatus"* in Bolshevik Russia helped create famine — the vast bureaucracy spawned by the "workers' state" could not handle the information a centralised distribution system required. Food rotted in trains waiting for bureaucrats to *"channel"* resources (and, needless to say, the bureaucrats never went hungry).

23. Can centralised planning meet the needs of the whole of society?

Our Marxist friend then quotes **Maybe**:

> *"The radical social movements that are increasingly coming together don't want to seize power but to dissolve it. They are dreaming up many autonomous alternative forms of social organisation, forms that are directly linked to the specific needs of locality. What might be an alternative to capitalism for people living currently in a housing estate in Croydon is completely different to what might be suitable for the inhabitants of the slums of Delhi."*

He comments on these very sensible words:

> *"It cannot be of no concern to us what form a new society will take in different countries or even different regions. The economic power we have created over centuries can and must be used in a planned, rational way to eradicate hunger, disease and illiteracy. It must be used in the interests of the whole of society."*

Obviously, the needs of actual people, what sort of society they want, is irrelevant to Marxism. Also ignored is the fact that different cultures will have different visions of what a free society will be like. Thus, for Mitchinson, everyone, everywhere, will be subject to the same form of society — *"in the interests of society."* However, as Bakunin argued, the state *"is an arbitrary creature in whose breast all the positive, living, individual or local interests of the people clash, destroy and absorb each other into the abstraction known as the common interest, the* ***public good*** *or the* ***public welfare****, and where all real wills are dissolved into the other abstraction that bears the name of* ***the will of the people.*** *It follows that this alleged will of the people is never anything but the sacrifice and dissolution of all the real wants of the population, just as this so-called public good is nothing but the sacrifice of their interests."* [**Michael Bakunin: Selected Writings**, pp. 265–6]

The different needs of different areas and regions must be the starting point of any social reconstruction, the basis on which we create specific programmes to improve our societies, ecosystems and world. If we do not recognise the diversity inherent in a world of billions of people, millions of eco-systems, thousands of cultures, hundreds of regions then we cannot use the resources of society to improve our lives. Instead we would have uniform plan imposed on everything which, by its very nature, cannot take into accounts the real needs of those who make up

"the whole of society." In other words, the resources of the world must not be used by an abstraction claiming to act *"in the interests of society"* but rather by the people who actually make up society themselves — if we do that we ensure that their interests are meet directly as they manage their own affairs and that their use reflects the specific requirements of specific people and eco-systems and not some abstraction called *"the interests of society"* which, by its centralised nature, would sacrifice those interests.

Of course, it seems somewhat strange that Mitchinson thinks that people in, say, New Delhi or Croyden, will not seek to eradicate hunger, disease and illiteracy as they see fit, co-operating with others as and when they need to and creating the federative organisations required to do so. The need to share experiences and resources does not conflict with the different areas experimenting in different ways, expressing themselves in ways which suit their particular needs and difficulties. As any ecologist could tell you, different eco-systems need different forms of care. The same with communities — Mitchinson would drown local needs in the name of an artificial construct.

He continues:

> *"That can only be achieved by the democratic planning of society where the power at our fingertips could be used with due respect for the future of the planet, the conservation of it's resources, our own working conditions, and living standards. Whether we like it or not, growing a few carrots on empty plots of land will not eradicate hunger and famine."*

How can *"democratic planning"* of the whole *"of society"* take into account the needs of specific localities, eco-systems, communities? It cannot. Respect for the future of our planet means respecting the fundamental law of nature — namely that conformity is death. Diversity is the law of life — which means that a future socialist society must be libertarian, organised from the bottom up, based on local self-management and a respect for diversity. Such a federal structures does not preclude co-ordinated activity (or the creation of democratic **plans**) — the reverse in fact, as federalism exists to allow co-ordination — but instead of being imposed by a few *"leaders"* as in a centralised system, it is the product of local needs and so reflective of the needs of real people and eco-systems.

As for his comment about *"due respect of the future of the planet"* is obviously inspired by *"the youth"* being concerned about ecological issues. However, Leninism's desire for centralised states and planning excludes an ecological perspective by definition. As Bakunin argued:

> *"What man, what group of individuals, no matter how great their genius, would dare to think themselves able to embrace and understand the plethora of interests, attitudes and activities so various in every country, every province, locality and profession."* [**Op. Cit.**, p. 240]

Diversity is the basis of any eco-system. Centralism cannot, as Bakunin makes clear, embrace it.

Needless to say, Mitchinson's comments about carrots is pure stupidity and an insult to the intelligence of his audience.

24. Is technology neutral?

Mitchinson goes on:

> *"We have the power to do just that, but only if we combine new technology, industry and the talents and active participation of millions."*

Needless to say, he fails to indicate how the millions **can** participate in a *"centralised apparatus"* beyond electing their *"leaders."* Which indicates the fallacy of Marxism — it claims to desire a society based on the participation of everyone yet favours a form of organisation — centralisation — that precludes that participation.

In addition, he fails to note that technology and industry have been developed by capitalists to enhance their own power. As we argued in section D.10, technology cannot be viewed in isolation from the class struggle. This means that industry and technology was not developed to allow the active participation of millions. The first act of any revolution will be seizing of the means of life — including industry and technology — by those who use it and, from that moment on, their radical transformation into **appropriate** technology and industry, based on the needs of the workers, the community and the planet. Mitchinson obvious shares the common Marxist failing of believing technology and industry is neutral. In this he follows Lenin. As S.A. Smith correctly summarises:

> *"Lenin believed that socialism could be built only on the basis of large-scale industry as developed by capitalism, with its specific types of productivity and social organisation of labour. Thus for him, capitalist methods of labour-discipline or one-man management were not necessarily incompatible with socialism. Indeed, he went so far as to consider them to be inherently progressive, failing to recognise that such methods undermined workers' initiative at the point of production. This was because Lenin believed that the transition to socialism was guaranteed, ultimately, not by the self-activity of workers, but by the 'proletarian' character of state power... There is no doubt that Lenin did conceive proletarian power in terms of the central state and lacked a conception of localising such power at the point of production."* [**Red Petrograd**, pp. 261–2]

The Russian workers, unsurprisingly, had a different perspective:

> *"Implicit in the movement for workers' control was a belief that capitalist methods cannot be used for socialist ends. In their battle to democratise the factory, in their emphasis on the importance of collective initiatives by the direct producers in transforming the work situation, the factory committees had become aware — in a partial and groping way, to be sure — that factories are not merely sites of production, but also of reproduction — the reproduction of a certain structure of social relations based on the division between those who give orders and those who take them, between those who direct and those who execute ... inscribed within their practice was a distinctive vision of socialism, central to which was workplace democracy."* [**Op. Cit.**, p. 261]

The movement for workers' control was undermined and finally replaced by one-man management by the kind of *"central apparatus"* Mitchinson urges us to build (see M. Brinton's classic

work **The Bolsheviks and Workers' Control** for more details). Those who do not study history are doomed to repeat it.

He goes on:

> *"The economic power we have created can be compared to the destructive force of lightning, untamed and anarchic under the market, yet organised into cables and wires electricity transforms our lives. Industry is not the enemy, nor are machines. The state is, but it is a symptom not the disease. It is capitalism and its ownership of the economy, its stewardship of society that we have to replace."*

However, unlike electricity, *"economic power"* requires people to operate it. The question is not whether *"machines"* are the enemy (often they are, as machines are used by capitalists to weaken the power of workers and control them). The question is whether the future society we aim at is one based on workers' and community self-management or whether it is based on an authoritarian system of delegated power. It is clear that Marxists like Mitchinson desire the latter — indeed, as is clear from his diatribe, he cannot comprehend an alternative to hierarchical organisation.

Given that one of the things capitalism and the state have in common is a hierarchical, top-down structure, it is clear that any revolutionary movement must fight both — at the same time.

25. Do anarchists ignore the *"strength of the working class"*?

Mitchinson argues that:

> *"The task of our time is to combine the strength and experience of the working class and its mighty organisations with the power and energy of the youth internationally, on the basis of a clear understanding of what capitalism is, what the state is, and a programme for changing society. That requires a combination of theory and action. In that combination lies the strength of Marxism."*

The first question is surely **what** *"mighty organisations"* of the working class is he talking about. Is it the Labour Party? Or is it the trade unions? Probably the latter — if so, the question is how effective have these *"mighty organisations"* been recently? The answer must, surely, be "not very." Why is that? In union there is strength, as anarchists have long been aware. Why has this strength been so lacking? Simply because the unions are centralised, bureaucratic and run from the top down. They have placed numerous barriers in front of their members when they have taken militant action. That is why anarchists urge workers to form rank-and-file controlled organisations to manage their own struggles and take back the power they have delegated to their so-called leaders. Only in this way, by building truly revolutionary organisations like workers' councils (soviets), factory committees, community assemblies and so on can they really create a *"mighty"* force. In other words, anarchists are well aware of the strength of working class people and their power to change society — indeed, as proven above, anarchism is based on that awareness and organise appropriately!

The second question is surely to ask whether Mitchinson is aware that **Reclaim the Streets** have been building links with rank and file trade union militants for years — long before Mitchinson decided to enlighten them with *"the strength of Marxism."* In other words, *"the strength of*

Marxism" seems to rest in telling radical working class people to do what they have already doing! Such strength is truly amazing and must explain the prominent role Leninists have had in the numerous anti-capitalist demonstrations and organisations recently.

Needless to say, **anarchism** provides *"a clear understanding of what capitalism is, what the state is, and a programme for changing society. That requires a combination of theory and action."* This has been proven above when we corrected Mitchinson's numerous errors regarding anarchist theory. Moreover, as far as combining theory and action goes, it is clear that **anarchism** has been doing that of late, **not** Marxism. While anarchists have been at the forefront of the anti-capitalist demonstrations, working with others as equals, Marxists have been noticeable by their absence. Combining theory and practice, non-hierarchically organised direct action closed down the WTO and presented a clear message to the oppressed around the world — **resistance is fertile.** What have Marxists achieved? Apparently producing articles such as these, distorting the politics and activities of those who actually **are** changing the world rather than just interpreting it. That they cannot produce an honest critique of anarchism indicates the uselessness of their politics.

26. What does Mitchinson's article tell about the nature of Trotskyism?

He finishes his diatribe as follows:

> *"If you want to fight against capitalism, do so fully armed with a socialist programme and perspective. Join with us in the struggle for the socialist transformation of the planet."*

It is clear that to be *"fully armed with a socialist programme"* means to critique that which you know nothing about, spread slanders and lie about what your opponents actually think. There **is** much to be critical of in the recent anti-capitalist demonstrations and the various groups that have helped organise and take part in them. Anarchists have been the first to point these out. However, we have a lot to learn from them as well — they are struggling against capitalism and, as Kropotkin argues, *"Anarchism ... originated in everyday struggles"* and *"the Anarchist movement was renewed each time it received an impression from some great practical lesson: it derived its origin from the teachings of life itself."* [**Evolution and Environment**, p. 58 and p. 57]

Thus we must critique these movements honestly and as equals — Mitchinson, as can be seen, does neither. He slanders those involved and dismisses out of hand their experiences and the reasons that have brought them to struggle in a specific way against the dominant society. In this he follows Lenin, who argued in **Left-Wing Communism: An Infantile Disorder** that western revolutionaries ignore their own experiences in their own — and similar — countries and instead follow the "lessons" of experiences gained in a near pre-capitalist, absolutist state. The stupidity of such an approach is clear.

Mitchinson presents those in struggle with the ultimatum "subscribe to our platform or be denounced." Little wonder that Leninists are non-existent in the groups that have taken part and organised the anti-capitalist demonstrations — not willing to learn from those involved in the class struggle, all they can do is act as petty sectarians. Sectarians expect working class people to relate to their predetermined political positions, whereas revolutionaries apply our politics to the conditions we face as members of the working class. For Leninists revolutionary consciousness is not generated by working class self-activity, but is embodied in the party. The important

issues facing the working class — and how to fight — are to be determined not by the workers ourselves, but by the leadership of the party, who are the "vanguard of the working class". Hence Mitchinson's dismissal (in a particularly dishonest manner, we must stress) of those involved in struggle and their experiences. True "revolution" obviously lies in the unchanging ideas generated at the start of the twentieth century in a monarchy developing towards capitalism, **not** in the experiences and desires of living people fighting for freedom in the here and now. Yes, these ideas and movements can be confused and unclear — but they are living and subject to change by the influence of revolutionaries who act in a libertarian manner (i.e. as equals, willing to learn as well as teach).

The Italian Marxist Antonio Gramsci once wrote that *"to tell the truth is a communist and revolutionary act."* However, even he did not apply this when discussing anarchism and the activities of anarchists (see Gwyn Williams' **Proletarian Order**, pp. 193–4). Be that as it may, Gramsci's point is correct. Telling the truth is a revolutionary act. If we judge Mitchinson's article by this standard then we can only conclude that neither he nor the politics he defends are revolutionary or communist.

Thus we find his ending comment truly a *"flight of fancy"* — after reading our comments above, we hope you agree with us. If you seek a **true** socialist transformation of this planet rather than its degeneration into centralised state capitalism, discover more about anarchism.

Reply to errors and distortions in the SWP's *"Marxism and Anarchism"*

In issue no. 1714 of *Socialist Worker* (dated 16th September 2000) the British Socialist Workers Party (SWP) decided to expose anarchism in an article entitled *"Marxism and Anarchism."* However, their article is little more than a series of errors and distortions. We shall indicate how the SWP lies about anarchist ideas and discuss the **real** differences between anarchism and Marxism. Moreover, we will indicate that the bulk of the SWP's article just recycles common Leninist slanders about anarchism, slanders that have been refuted many times over.

1. What does the anti-globalisation movement tell us about the effectiveness of the "vanguard" parties like the SWP?

The inspiration for their diatribe is clear — they are worried about anarchist influence in the various anti-capitalist and anti-globalisation movements and demonstrations which are currently occurring across the world. As they put it:

> *"The great revolt against capitalism in Seattle last year, and similar demonstrations since, have attracted diverse groups of protesters. Anarchists, amongst others, have taken part in all of those protests."*

Yes, indeed, anarchists have been involved in these demonstrations from the start, unlike "vanguard" parties like the SWP who only became aware of the significance of these movements once they exploded in the streets. That in itself should tell us something about the effectiveness of the Bolshevik inspired politics the SWP raise as an alternative to anarchism. Rather than being at the

vanguard of these demonstrations and movements, parties like the SWP have been, post-Seattle, busy trying to catch up with them. Nor is this the only time this has happened.

In Russia, in February 1917, for example, the Bolshevik party opposed the actions that produced the revolution which overthrew the Tsar. After weeks of strikes with police attacks on factories, the most oppressed part of the working class, the women textile workers, took the initiative. Demands for bread and attacks on bakeries were superseded by a massive demonstration of women workers on International Women's Day. The women had ignored a local Bolshevik directive to wait until May Day! The early slogan of *"Bread!"* was quickly followed by *"Down with the autocracy! Down with the war!"* By February 24th, half of Petrograd was on strike. The workers did go to their factories, not to work, but to hold meetings, pass resolutions and then go out to demonstrate. The Vyborg committee of the Bolsheviks opposed the strikes. Luckily for the Russian workers, and unfortunately for the Tsar, the Bolsheviks were ignored. If they had followed the Bolsheviks, the February Revolution would not have occurred!

The backward nature of the Bolshevik style of party can also be seen from events 12 years earlier. In 1905, workers spontaneously organised councils of workers' delegates ("soviets" in Russian). The soviets were based on workplaces electing recallable delegates to co-ordinate strikes and were created by the Russian workers themselves, independently of political parties.

Far from being at the vanguard of these developments the Bolsheviks were, in fact, deeply hostile to them. The Bolshevik Central Committee members in Petersburg were uneasy at the thought of a *"non-Party"* mass organisation existing side by side with their party. Instead of seeing the Soviet as a form of workers' self-organisation and self-activity (and so a key area for area for activity), they regarded it with hostility. They saw it as a rival to the party.

The St. Petersburg Bolsheviks organised a campaign against the Soviet due to its *"non-Party"* nature. They presented an ultimatum to the Soviet that it must place itself under the leadership of their party. On 24 October they had moved a resolution along the same lines in meetings at the various factories, demanding that the Soviet accept the Social Democratic programme and tactics and demanding that it must define its political stance.

The Bolshevik Central Committee then published a resolution, that was binding upon all Bolsheviks throughout Russia, insisting that the soviets must accept the party programme. Agitation against the soviet continued. On 29 October, the Bolshevik's Nevsky district committee declared inadmissible for Social Democrats to participate in any kind of *"workers' parliament"* like the Soviet.

The Bolshevik argument was that the Soviet of Workers' Deputies should not have existed as a political organisation and that the social democrats must withdraw from it, since its existence acted negatively upon the development of the social democratic movement. The Soviet of Delegates could remain as a trade union organisation, or not at all. Indeed, the Bolsheviks presented the Soviet with an ultimatum: either accept the programme of the Bolsheviks or else disband! The Bolshevik leaders justified their hostility to the Soviet on the grounds that it represented *"the subordination of consciousness to spontaneity"* — in this they followed Lenin's arguments in **What is to be Done?**. When they moved their ultimatum in the Soviet it was turned down and the Bolshevik delegates, led by the Central Committee members, walked out. The other delegates merely shrugged their shoulders and proceeded to the next point on the agenda.

If workers had followed the Bolsheviks the 1905 revolution would not have occurred and the first major experience of workers' councils would never have happened. Rather than being in favour of working class self-management and power, the Bolsheviks saw revolution in terms

of party power. This confusion remained during and after 1917 when the Bolsheviks finally supported the soviets (although purely as a means of ensuring a Bolshevik government).

Similarly, during the British Poll Tax rebellion of the late 1980s and early 1990s, the SWP dismissed the community based mass non-payment campaign. Instead they argued for workers to push their trade unions leadership to call strikes to overthrow the tax. Indeed, the even argued that there was a *"danger that community politics divert people from the means to won, from the need to mobilise working class activity on a collective basis"* by which they meant trade union basis. They argued that the state machine would *"wear down community resistance if it cannot tap the strength of the working class."* Of course it goes without saying that the aim of the community-based non-payment campaign was working class activity on a collective basis. This explains the creation of anti-poll tax unions, organising demonstrations, occupations of sheriff officers/bailiffs offices and council buildings, the attempts to resist warrant sales by direct action, the attempts to create links with rank-and-file trade unionists and so on. Indeed, the SWP's strategy meant mobilising **fewer** people in collective struggle as trade union members were a minority of those affected by the tax as well as automatically excluding those workers **not** in unions, people who were unemployed, housewives, students and so on. Little wonder the SWP failed to make much of an impact in the campaign.

However, once non-payment began in earnest and showed hundreds of thousands involved and refusing to pay, overnight the SWP became passionate believers in the collective class power of community based non-payment. They argued, in direct contradiction to their earlier analysis, that the state was *"shaken by the continuing huge scale of non-payment."* [quoted by Trotwatch, **Carry on Recruiting**, pp. 29–31]

The SWP proved to be totally unresponsive to new forms of struggle and organisation produced by working class people when resisting the government. In this they followed the Bolshevik tradition closely — the Bolsheviks initially ignored the soviets created during the 1905 Russian Revolution and then asked them to disband. They only recognised their importance in 1917, 12 years after that revolution was defeated and the soviets had re-appeared.

Therefore, the fact that the self-proclaimed "vanguard of the proletarian" is actually miles behind the struggle comes as no surprise. Nor are their slanders against those, like anarchists, who are at the front of the struggle unsurprising. They produced similar articles during the poll tax rebellion as well, to counter anarchist influence by smearing our ideas.

2. What does the SWP miss out in its definition of anarchism?

The SWP continue:

> *"Anarchism is generally taken to mean a rejection of all authority."*

One question immediately arises. What do anarchists mean by the term *"authority"*? Without knowing that, it will be difficult to evaluate the SWP's arguments.

Kropotkin provides the answer. He argued that *"the origin of the anarchist inception of society ... [lies in] the criticism ... of the hierarchical organisations and the authoritarian conceptions of society; and ... the analysis of the tendencies that are seen in the progressive movements of mankind."* He stresses that anarchism *"refuses all hierarchical organisation."* [**Kropotkin's Revolutionary Pamphlets**, p. 158 and p. 137]

Thus anarchism rejects authority in the sense, to use Malatesta's words, of *"the delegation of power, that is the abdication of initiative and sovereignty of all into the hands a few."* [**Anarchy**, p. 40] Once this is clearly understood, it will quickly been seen that the SWP create a straw man to defeat in argument.

Moreover, by concentrating on what anarchism is **against** the SWP can ignore what anarchism is **for**. This is important as to discuss the positive ideas of anarchism would mean having to discuss anarchists ideas on organisation, why we oppose centralisation, favour federalism as a means of co-ordinating decisions, why we propose self-management in place of government, and so on. To do this would mean accurately presenting libertarian theory rather than a just series of slanders, which, of course, the SWP would hate to do.

So what is anarchism for?

Anarchism derives from the Greek for

"without authority" or

"without rulers" and this informs anarchist theory and visions of a better world. This means that anarchism is against the *"domination of man by man"* (and woman by woman, woman by man, and so on). However, *"[a]s knowledge has penetrated the governed masses ... the people have revolted against the form of authority then felt most intolerable. This spirit of revolt in the individual and the masses, is the natural and necessary fruit of the spirit of domination; the vindication of human dignity, and the saviour of social life."* Thus *"freedom is the necessary preliminary to any true and equal human association."* [Charlotte Wilson, **Anarchist Essays**, p. 54 and p. 40] In other words, anarchist comes from the struggle of the oppressed against their rulers and is an expression of individual and social freedom. Anarchism was born from the class struggle.

This means, positively, that anarchists stress the need for ***self-government*** (often called ***self-management***) of both individuals and groups. Self-management within free associations and decision making from the bottom-up is the only way domination can be eliminated. This is because, by making our own decisions ourselves, we automatically end the division of society into governors and governed (i.e. end hierarchy). In other words, those affected by a decision make that decision. Anarchism clearly means support for freedom and equality and so all forms of hierarchical organisation (such as the state and the capitalist workplace) and authoritarian social relationship (such as sexism, racism, homophobia and wage labour) must be abolished. This means that anarchist organisations must be self-managed, decentralised and based on federalism. Only this form of organisation can end the division of society into rulers and ruled, oppressor and oppressed, exploiter and exploited and create a society of free and equal individuals.

This is why anarchists stress such things as decision making by mass assemblies and the co-ordination of decisions by mandated and recallable delegates. The federal structure which unites these basic assemblies would allow local affairs to be decided upon locally and directly, with wider issues discussed and decided upon at their appropriate level and by all involved. This would allow those affected by a decision to have a say in it, so allowing them to manage their own affairs directly and without hierarchy. This, in turn, would encourage the self-reliance, self-confidence and initiative of those involved. As a necessary complement of our opposition to authority is support for

"direct action." This means that people, rather than looking to leaders or politicians to act for them, look to themselves and the own individual and collective strength to solve their own problems. This also encourages self-liberation, self-reliance and self-confidence as the prevailing

culture would be *"if we want something sorted out, we have to do it ourselves"* — in other words, a *"do it yourself"* mentality.

Therefore, the **positive** side of anarchism (which naturally flows from its opposition to authority) results in a political theory which argues that people must control their own struggles, organisations and affairs directly. This means we support mass assemblies and their federation via councils of mandated delegates subject to recall if they break their mandates (i.e. they act as they see fit, i.e. as politicians or bureaucrats, and not as the people who elected them desire). This way people directly govern themselves and control their own lives. It means we oppose the state and support free federations of self-governing associations and communes. It means we oppose capitalism and support workers' self-management. It means we reject hierarchy, centralism and authoritarian structures and argue for self-managed organisations, built from the bottom up and always accountable to the base. It means we consider the direct control of struggles and movements by those involved as not only essential in the here and now but also essential training for living in a free, libertarian socialist society (for example, workers direct and total control of their strikes and unions trains them to control their workplaces and communities during and after the revolution). It means we oppose hierarchy in all its forms and support free association of equals. In other words, anarchism can generally be taken to mean support for self-government or self-management.

By discussing only the negative side of anarchism, by missing out what kinds of authority anarchists oppose, the SWP ensure that these aspects of our ideas are not mentioned in their article. For good reason as it puts Marxism in a bad light.

3. Why does mentioning the history of anarchism weaken the SWP's argument?

The SWP correctly argue that we *"live in a world of bullying line managers, petty school rules, oppressive police, and governments that serve the rich and powerful."* However, they trivialise anarchism (and the natural feelings that result from such domination) by stating *"[e]veryone who hates that has, at least at times, felt a streak of 'anarchist' revolt against authority."* Thus anarchism is presented as an emotional response rather than as valid, coherent intellectual opposition to the state, wage labour, inequality and hierarchical authority in general. But, of course, anarchism is more than this, as the SWP acknowledge:

> *"Anarchism, however, is more than a personal reaction against the tyrannies of capitalism. It is a set of political beliefs which have been held up as an alternative to the revolutionary socialist ideas of Karl Marx. Anarchist ideas have, on occasion, had a mass influence on movements against capitalism."*

Given that the *"revolutionary socialist ideas"* of Marx have been proven wrong on numerous occasions while Bakunin's predictions were proven right, anarchists humbly suggest that anarchism is a valid alternative to Marxism. For example, Bakunin correctly predicted that when *"the workers ... send common workers ... to Legislative Assemblies ... The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois ... For men do not make their situations; on the contrary, men are made by them."* [**The Basic Bakunin**, p. 108] The history of the Marxist Social Democratic Parties across the world proved him right.

Similarly, Bakunin predicted that Marx's *"dictatorship of the proletariat"* would become the *"dictatorship over the proletariat."* The experience of the Russian Revolution proved him correct — once the Bolshevik party had become the government power became centralised at the top, the workers' soviets quickly became a cog in the state machinery rubber-stamping the decrees of the Bolshevik government, workers' control of production by factory committees was replaced by state appointed managers and so on. The "socialist" state quickly became a bureaucratic monster without real control from below (indeed, the Bolsheviks actually disbanded soviets when opposition parties won a majority in them at the start of 1918). The start of the Civil War in May 1918 just made things worse.

The SWP continue by arguing:

> *"Socialists and anarchists share a hatred of capitalism. They have often fought alongside each other in major battles against the capitalist system. They struggled together in the Europe-wide mass strikes at the end of the First World War and the inspiring Spanish Revolution in 1936, as well as in countless smaller battles today."*

Which is true. They also fail to mention that the mass-strikes at the end of the First World War were defeated by the actions of the Social-Democratic Parties and trade unions. These parties were self-proclaimed revolutionary Marxist organisations, utilising (as Marx had argued) the ballot box and centralised organisations. Unsurprisingly, given the tactics and structure, reformism and bureaucracy had developed within them. When workers took strike action, even occupying their factories in Italy, the bureaucracy of the Social Democratic Parties and trade unions acted to undermine the struggle, isolating workers and supporting capitalism. Indeed, the German Social Democratic Party (which was, pre-1914, considered the jewel in the crown of Marxism and the best means to refute the anarchist critique of Marxist tactics) actually organised an alliance with the right-wing para-military Freikorps to violently suppress the revolution. The Marxist movement had degenerated into bourgeois parties, as Bakunin predicted.

It is also strange that the SWP mention the *"inspiring Spanish Revolution in 1936"* as this revolution was mainly anarchist in its *"inspiring"* features. Workers took over workplaces and the land, organising them under workers' self-management. Direct democracy was practised by hundreds of thousands of workers in line with the organisational structures of the anarchist union the C.N.T. In contrast, the Russian Revolution saw power become centralised into the hands of the Bolshevik party leadership and workers' self- management of production was eliminated in favour of one-man management imposed from above (see M. Brinton's **The Bolsheviks and Workers' Control** for details).

4. How is the SWP wrong about centralisation?

The SWP continue by arguing that *"there are differences between revolutionary socialism and anarchism. Both understand the need for organisation but disagree over what form that organisation takes."* This is a vast step forward in the usual Marxist slander that anarchists reject the need for organisation and so should be welcomed. Unfortunately the rest of the discussion on this issue falls back into the usual swamp of slander.

They argue that *"[e]very struggle, from a local campaign against housing privatisation to a mass strike of millions of workers, raises the need for organisation. People come together and need mechanisms for deciding what to do and how to do it."* They continue by arguing that *"Anarchism says*

that organisation has nothing to do with centralisation. For anarchism, any form of centralisation is a type of authority, which is oppressive."

This is true, anarchists do argue that centralisation places power at the centre, so disempowering the people at the base of an organisation. In order to co-ordinate activity anarchists propose federal structures, made up on mandated delegates from autonomous assemblies. In this way, co-ordination is achieved while ensuring that power remains at the bottom of the organisation, in the hands of those actually fighting or doing the work. Federalism does not deny the need to make agreements and to co-ordinate decisions. Far from it — it was put forward by anarchists precisely to ensure co-ordination of joint activity and to make agreements in such a way as to involve those subject to those decisions in the process of making them. Federalism **involves** people in managing their own affairs and so they develop their initiative, self-reliance, judgement and spirit of revolt so that they can **act** intelligently, quickly and autonomously during a crisis or revolutionary moment and show solidarity as and when required instead of waiting for commands from above as occurs with centralised movements. In other words, federalism is the means to combine participation and co-ordination and to create an organisation run from the bottom up rather than the top-down. As can be seen, anarchists do not oppose co-ordination and co-operation, making agreements and implementing them together.

After mentioning centralisation, the SWP make a massive jump of logic and assert:

> *"But arguing with someone to join a struggle, and trying to put forward tactics and ideas that can take it forward are attempts to lead.*
>
> *"It is no good people coming together in a struggle, discussing what to do and then doing just what they feel like as if no discussion had taken place. We always need to take the best ideas and act on them in a united way."*

Placing ideas before a group of people is a "lead" but it is not centralisation. Moreover, anarchists are not against making agreements! Far from it. The aim of federal organisation is to make agreements, to co-ordinate struggles and activities. This does not mean ignoring agreements. As Kropotkin argued, the commune *"cannot any longer acknowledge any superior: that, above it, there cannot be anything, save the interests of the Federation, freely embraced by itself in concert with other Communes."* [**No Gods, No Masters**, vol. 1, p. 259] This vision was stressed in the C.N.T.'s resolution on Libertarian Communism made in May, 1936, which stated that *"the foundation of this administration will be the Commune. These Communes are to be autonomous and will be federated at regional and national levels for the purpose of achieving goals of a general nature. The right of autonomy is not to preclude the duty of implementation of agreements regarding collective benefits."* [quoted by Jose Pierats, **The C.N.T. in the Spanish Revolution**, p. 68] In the words of Malatesta:

> *"But an organisation, it is argued, presupposes an obligation to co-ordinate one's own activities with those of others; thus it violates liberty and fetters initiative. As we see it, what really takes away liberty and makes initiative impossible is the isolation which renders one powerless. Freedom is not an abstract right but the possibility of acting ... it is by co-operation with his fellows that man finds the means to express his activity and his power of initiative."* [**Life and Ideas**, pp. 86–7]

Hence anarchists do not see making collective decisions and working in a federation as an abandonment of autonomy or a violation of anarchist theory and principles. Rather, we see such co-operation and co-ordination, generated from below upwards, as an essential means of exercising and protecting freedom.

The SWP's comment against anarchism is a typical Marxist position. The assumption seems to be that "centralisation" or "centralism" equals co-ordination and, because we reject centralisation, anarchists must reject co-ordination, planning and agreements. However, in actuality, anarchists have always stressed the need for federalism to co-ordinate joint activities, stressing that decision-making and organisation must flow from below upwards so that the mass of the population can manage their own affairs directly (i.e. practice self-management and so anarchy). Unfortunately, Marxists fail to acknowledge this, instead asserting we are against co-operation, co-ordination and making agreements. The SWP's arguments are an example of this, making spurious arguments about the need for making agreements.

In this the SWP are following in a long-line of Marxist inventions. For example, Engels asserted in his infamous diatribe *"The Bakuninists at work"* that Bakunin *"[a]s early as September 1870 (in his **Lettres a un francais** [Letters to a Frenchman]) ... had declared that the only way to drive the Prussians out of France by a revolutionary struggle was to do away with all forms of centralised leadership and leave each town, each village, each parish to wage war on its own."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 141]

In fact, the truth is totally different. Bakunin does, of course, reject *"centralised leadership"* as it would be *"necessarily very circumscribed, very short-sighted, and its limited perception cannot, therefore, penetrate the depth and encompass the whole complex range of popular life."* However, it is a falsehood to state that he denies the need for co-ordination of struggles and federal organisation from the bottom up in that or any other work. As he puts it, the revolution must *"foster the self-organisation of the masses into autonomous bodies, federated from the bottom upwards."* With regards to the peasants, he thinks they will *"come to an understanding, and form some kind of organisation ... to further their mutual interests ... the necessity to defend their homes, their families, and their own lives against unforeseen attack ... will undoubtedly soon compel them to contract new and mutually suitable arrangements."* The peasants would be *"freely organised from the bottom up."* [*"Letters to a Frenchman"*, **Bakunin on Anarchism**, p. 196, p. 206 and p. 207] In this he repeated his earlier arguments concerning social revolution — claims Engels was well aware of, just as he was well aware of the statements by Bakunin in his *"Letters to a Frenchman."* In other words, Engels deliberately lied about Bakunin's political ideas. It appears that the SWP is simply following the Marxist tradition in their article.

5. Why does the SWP's *"picket line is 'authoritarian'"* argument totally miss the point?

They continue by arguing:

> *"Not all authority is bad. A picket line is 'authoritarian.' It tries to impose the will of the striking workers on the boss, the police and on any workers who may be conned into scabbing on the strike."*

What should strike the reader about this example is its total lack of class analysis. In this the SWP follow Engels. In his essay **On Authority**, Engels argues that a *"revolution is certainly the*

most authoritarian thing there is; it is the act whereby one part of the population imposes its will upon the other part by means of rifles, bayonets and cannon-authoritarian means, if such there be at all; and if the victorious party does not want to have fought in vain, it must maintain this rule by means of the terror its arms inspire in the reactionaries." [**The Marx-Engels Reader**, p. 733]

However, such an analysis is without a class basis and so will, by necessity, mislead the writer and the reader. Engels argues that revolution is the imposition by *"one part of the population"* on another. Very true — but Engels fails to indicate the nature of class society and, therefore, of a social revolution. In a class society *"one part of the population"* constantly *"imposes its will upon the other part"* all the time. In other words, the ruling class imposes its will on the working class everyday in work by the hierarchical structure of the workplace and in society by the state. Discussing the *"population"* as if it was not divided by classes, and so subject to specific forms of authoritarian social relationships, is liberal nonsense. Once we recognise that the *"population"* in question is divided into classes we can easily see the fallacy of Engels argument. In a social revolution, the act of revolution is the overthrow of the power and authority of an oppressing and exploiting class by those subject to that oppression and exploitation. In other words, it is an act of liberation in which the hierarchical power of the few over the many is eliminated and replaced by the freedom of the many to control their own lives. It is hardly authoritarian to destroy authority! Thus a social revolution is, fundamentally, an act of liberation for the oppressed who act in their own interests to end the system in which *"one part of population imposes its will upon the other"* everyday.

This applies equally to the SWP's example of a picket line. Is a picket line really authoritarian because it tries to impose its will on the boss, police or scabs? Rather, is it not defending the workers' freedom against the authoritarian power of the boss and their lackeys (the police and scabs)? Is it *"authoritarian"* to resist authority and create a structure — a strike assembly and picket line — which allows the formally subordinated workers to manage their own affairs directly and without bosses? Is it *"authoritarian"* to combat the authority of the boss, to proclaim your freedom and exercise it? Of course not. The SWP are playing with words.

Needless to say, it is a large jump from the "authority" of a strikers' assembly to that of a highly centralised "workers' state" but that, of course, is what the SWP wish the reader to do. Comparing a strikers' assembly and picket line — which is a form of self-managed association – with a state cannot be done. It fails to recognise the fundamental difference. In the strikers' assembly and picket line the strikers themselves decide policy and do not delegate power away. In a state, power is delegated into the hands of a few who then use that power as they see fit. This by necessity disempowers those at the base, who are turned into mere electors and order takers. Such a situation can only spell death of a social revolution, which requires the active participation of all if it is to succeed. It also exposes the central fallacy of Marxism, namely that it claims to desire a society based on the participation of everyone yet favours a form of organisation — centralisation — that precludes that participation.

6. Why are the SWP's examples of *"state functions"* wrong?

The SWP continue their diatribe against anarchism:

> *"Big workers' struggles throw up an alternative form of authority to the capitalist state. Militant mass strikes throw up workers' councils. These are democratic bodies, like strike*

committees. But they take on organising 'state functions' — transport, food distribution, defence of picket lines and workers' areas from the police and army, and so on."

To state the obvious, transportation and food distribution are not *"state functions."* They are economic functions. Similarly, defence is not a *"state function"* as such — after all, individuals can and do defend themselves against aggression, strikers organise themselves to defend themselves against cops and hired strike breakers, and so on. This means that defence can be organised in a **libertarian** fashion, directly by those involved and based on self-managed workers' militias and federations of free communes. It need not be the work of a state nor need it be organised in a statist (i.e. hierarchical) fashion like, for example, the current bourgeois state and military or the Bolshevik Red Army (where the election of officers, soldiers' councils and self-governing assemblies were abolished by Trotsky in favour of officers appointed from above). So "defence" is **not** a state function.

What is a *"state function"* is imposing the will of a minority — the government, the boss, the bureaucrat — onto the population via professional bodies such as the police and military. This is what the Bolshevik state did, with workers' councils turned into state bodies executing the decrees of the government and using a specialised and hierarchical army and police force to do so. The difference is important. Luigi Fabbri sums up it well:

"The mistake of authoritarian communists in this connection is the belief that fighting and organising are impossible without submission to a government; and thus they regard anarchists ... as the foes of all organisation and all co-ordinated struggle. We, on the other hand, maintain that not only are revolutionary struggle and revolutionary organisation possible outside and in spite of government interference but that, indeed, that is the only effective way to struggle and organise, for it has the active participation of all members of the collective unit, instead of their passively entrusting themselves to the authority of the supreme leaders.

"Any governing body is an impediment to the real organisation of the broad masses, the majority. Where a government exists, then the only really organised people are the minority who make up the government; and ... if the masses do organise, they do so against it, outside it, or at the very least, independently of it. In ossifying into a government, the revolution as such would fall apart, on account of its awarding that government the monopoly of organisation and of the means of struggle." [*"Anarchy and 'Scientific' Communism"*, in **The Poverty of Statism**, pp. 13–49, Albert Meltzer (ed.), p. 27]

Thus the difference between anarchists and Leninists is not whether the organisations workers' create in struggle will be the framework of a free society (or the basis of the Commune). Indeed, anarchists have been arguing this for longer than Marxists have. The difference is whether these organisations remain self-managed or whether they become part of a centralised state. In the words of Camillo Berneri:

"The Marxists ... foresee the natural disappearance of the State as a consequence of the destruction of classes by the means of 'the dictatorship of the proletariat,' that is to say State Socialism, whereas the Anarchists desire the destruction of the classes by means of

> *a social revolution which eliminates, with the classes, the State. The Marxists, moreover, do not propose the armed conquest of the Commune by the whole proletariat, but the propose the conquest of the State by the party which imagines that it represents the proletariat. The Anarchists allow the use of direct power by the proletariat, but they understand by the organ of this power to be formed by the entire corpus of systems of communist administration-corporate organisations [i.e. industrial unions], communal institutions, both regional and national-freely constituted outside and in opposition to all political monopoly by parties and endeavouring to a minimum administrational centralisation."* [*"Dictatorship of the Proletariat and State Socialism"*, **Cienfuegos Press Anarchist Review**, no. 4, p. 52]

So, anarchists agree, in *"big workers' struggles"* organisation is essential and can form an alternative to the capitalist state. However, such a framework only becomes an "authority" when power is transferred from the base into the hands of an executive committee at the top. Strike and community assemblies, by being organs of self-management, are not an "authority" in the same sense that the state is or the boss is. Rather, they are the means by which people can manage their own struggles (and so affairs) directly, to govern themselves and so do without the need for hierarchical authority.

The SWP, in other words, confuse two very different things.

7. What is ironic about the SWP's comment that workers' councils must *"break up"* the capitalist state?

After misunderstanding basic concepts, the SWP treat us to a history lesson:

> *"Such councils were a feature of the Russian revolutions of 1905 and 1917, the German Revolution after the First World War, the Spanish Revolution of 1936, and many other great struggles. Socialists argue that these democratic workers' organisations need to take power from the capitalists and break up their state."*

Anarchists agree. Indeed, they argued that workers' organisations should *"break up"* and replace the state long before Lenin discovered this in 1917. For example, Bakunin argued in the late 1860s that the International Workers' Association, an *"international organisation of workers' associations from all countries"*, would *"be able to take the revolution into its own hands"* and be *"capable of replacing this departing political world of States and bourgeoisie."* The *"natural organisation of the masses"* was *"organisation by trade association,"* in other words, by unions, *"from the bottom up."* The means of creating socialism would be *"**emancipation through practical action** ... workers' solidarity in their struggle against the bosses. It means **trades unions, organisation**"* The very process of struggle would create the framework of a new society, a federation of workers' councils, as *"strikes indicate a certain collective strength already, a certain understanding among the workers ... each strike becomes the point of departure for the formation of new groups."* He stresses the International was a product of the class war as it *"has not created the war between the exploiter and the exploited; rather, the requirements of that war have created the International."* Thus the seeds of the future society are created by the class struggle, by the needs of workers to organise themselves to resist the boss and the state. [**The Basic Bakunin**, p. 110, p. 139, p. 103 and p. 150]

He stressed that the revolution would be based on federations of workers' associations, in other words, workers' councils:

> *"the federative alliance of all working men's associations ... [will] constitute the Commune ... [the] Communal Council [will be] composed of ... delegates ... vested with plenary but accountable and removable mandates... all provinces, communes and associations ... by first reorganising on revolutionary lines ... [will] constitute the federation of insurgent associations, communes and provinces ... [and] organise a revolutionary force capable defeating reaction ... [and for] self-defence ... [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation..."* [**Michael Bakunin: Selected Writings**, pp. 170–2]

And:

> *"The future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal."* [**Op. Cit.**, p. 206]

Thus it is somewhat ironic to have Leninists present basic anarchist ideas as if they had thought of them first!

Then again, the ability of the Marxists to steal anarchist ideas and claim them as their own is well know. They even rewrite history to do so. For example, the SWP's John Rees in the essay *"In Defence of October"* argues that *"since Marx's writings on the Paris Commune"* a *"cornerstone of revolutionary theory"* was *"that the soviet is a superior form of democracy because it unifies political and economic power."* [**International Socialism**, no. 52, p. 25] Nothing could be further from the truth, as Marx's writings on the Paris Commune prove.

The Paris Commune, as Marx himself argued, was *"formed of the municipal councillors, chosen by universal suffrage in the various wards of the town."* [*"The Civil War in France"*, **Selected Works**, p. 287] As Marx made clear, it was definitely **not** based on delegates from workplaces and so could **not** unify political and economic power. Indeed, to state that the Paris Commune was a soviet is simply a joke, as is the claim that Marxists supported soviets as revolutionary organs to smash and replace the state from 1871. In fact Marxists did not subscribe to this *"cornerstone of revolutionary theory"* until 1917 when Lenin argued that the Soviets would be the best means of ensuring a Bolshevik government.

Indeed the **only** political movement which took the position Rees falsely ascribes to Marxism was anarchism. This can be clearly seen from Bakunin's works, a few representative quotes we have provided above. Moreover, Bakunin's position dates, we must stress, from **before** the Paris Commune. This position has been argued by revolutionary anarchists ever since — decades before Marxists did.

Similarly, Rees argues that *"the socialist revolution must counterpose the soviet to parliament ... because it needs an organ which combines economic power — the power to strike and take control of the workplaces – with an insurrectionary bid for political power, breaking the old state."* [**Ibid.**]

However, he is just repeating anarchist arguments made decades before Lenin's temporary conversion to the soviets. In the words of the anarchist Jura Federation (written in 1880):

> *"The bourgeoisie's power over the popular masses springs from economic privileges, political domination and the enshrining of such privileges in the laws. So we must strike at the wellsprings of bourgeois power, as well as its various manifestations.*
>
> *"The following measures strike us as essential to the welfare of the revolution, every bit as much as armed struggle against its enemies:*
>
> *"The insurgents must confiscate social capital, landed estates, mines, housing, religious and public buildings, instruments of labour, raw materials, gems and precious stones and manufactured products:*
>
> *"All political, administrative and judicial authorities are to be abolished.*
>
> *"... What should the organisational measures of the revolution be?*
>
> "Immediate and spontaneous establishment of trade bodies: provisional assumption by those of ... social capital ...: local federation of a trades bodies and labour organisation:
>
> "Establishment of neighbourhood groups and federations of same ...
>
> *[...]*
>
> *"[T]he federation of all the revolutionary forces of the insurgent Communes ... Federation of Communes and organisation of the masses, with an eye to the revolution's enduring until such time as all reactionary activity has been completely eradicated.*
>
> *[...]*
>
> *"Once trade bodies have been have been established, the next step is to organise local life. The organ of this life is to be the federation of trades bodies and it is this local federation which is to constitute the future Commune."* [**No Gods, No Masters**, vol. 1, pp. 246–7]

As can be seen, long before Lenin's turn towards the soviets as a means of the Bolsheviks taking power, **anarchists**, not Marxists, had argued that we must counterpose the council of workers' delegates (by trade in the case of the Jura federation, by workplace in the case of the later anarcho-syndicalist unions, anarchist theory and the soviets). Anarchists clearly saw that, to quote Bakunin, *"[n]o revolution could succeed ... today unless it was simultaneously a political and a social revolution."* [**Op. Cit.**, p. 141] Unlike Marx, who clearly saw a political revolution (the conquest of state power) coming **before** the economic transformation of society (*"The political rule of the producer cannot coexist with the perpetuation of his social slavery. The Commune was therefore to serve as a lever for uprooting the economical foundations upon which rests the existence of classes and therefore of class-rule."* [Marx, **Op. Cit.**, p. 290]). This is why anarchists saw the social revolution in terms of economic and social organisation and action as its first steps were to eliminate both capitalism and the state.

Rees, in other words, is simply stating anarchist theory as if Marxists have been arguing the same thing since 1871!

Moreover, anarchists predicted other ideas that Marx took from the experience of the Paris Commune. Marx praised the fact that each delegate to the Commune was *"at any time revocable and bound by the* ***mandat imperatif*** *(formal instructions) of his constituents ... [and so] strictly responsible agents."* [**Op. Cit.**, p. 288] Anarchists had held this position a number of years **before** the Commune introduced it. Proudhon was arguing in 1848 for *"universal suffrage and as a consequence of universal suffrage, we want implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy."* [**No Gods, No Masters**, vol. 1, p. 63] We find Bakunin arguing exactly the same. For example, in 1868 he wrote that the *"Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade ... these deputies being invested with binding mandates and accountable and revocable at all times."* [**Op. Cit.**, p. 155]). In addition, the similarities with the Commune's political ideas and Proudhon's are clear, as are the similarities between the Russian Soviets and Bakunin's views on revolution.

So, as well as predicting the degeneration of social democracy and the Russian revolution, anarchists have also predicted such key aspects of revolutionary situations as organising on the basis of workplace and having delegates mandated and subject to instant recall. Such predictions flow from taking part in social movements and analysing their tendencies. Moreover, a revolution is the resisting of current authorities and an act of self-liberation and so its parallels with anarchism are clear. As such the class struggle, revolutionary movements and revolutions have a libertarian basis and tendencies and, therefore, it is unsurprising that anarchist ideas have spontaneously developed in them. Thus we have a two way interaction between ideas and action. Anarchist ideas have been produced spontaneously by the class struggle due to its inherent nature as a force confronting authority and its need for self-activity and self-organisation. Anarchism has learned from that struggle and influenced it by its generalisations of previous experiences and its basis in opposing hierarchy. Anarchist predictions, therefore, come as no surprise.

Therefore, Marxists have not only been behind the class struggle itself, they have also been behind anarchism in terms of practical ideas on a social revolution and how to organise to transform society. While anarchist ideas have been confirmed by the class struggle, Marxist ones have had to be revised to bring them closer to the actual state of the struggle and to the theoretical ideas of anarchism. And the SWP have the cheek to present these ideas as if their tradition had thought of them!

Little wonder the SWP fail to present an honest account of anarchism.

8. How do the SWP re-write the history of the Russian Revolution?

Their history lesson continues:

> *"This happened in Russia in October 1917 in a revolution led by the Bolshevik Party."*

In reality, this did not happen. In October 1917, the Bolshevik Party took power in the name of the workers' councils, the councils themselves did not take power. This is confirmed by Trotsky, who notes that the Bolshevik Party conference of April 1917 *"was devoted to the following fundamental question: Are we heading toward the conquest of power in the name of the socialist revolution or are we helping (anybody and everybody) to complete the democratic revolution? ...*

Lenin's position was this: ... the capture of the soviet majority; the overthrow of the Provisional Government; the seizure of power through the soviets." Note, **through** the soviets not **by** the soviets thus indicating the fact the Party would hold the real power, not the soviets of workers' delegates. Moreover, he states that *"to prepare the insurrection and to carry it out under cover of preparing for the Second Soviet Congress and under the slogan of defending it, was of inestimable advantage to us."* He continued by noting that it was *"one thing to prepare an armed insurrection under the naked slogan of the seizure of power by the party, and quite another thing to prepare and then carry out an insurrection under the slogan of defending the rights of the Congress of Soviets."* The Soviet Congress just provided *"the legal cover"* for the Bolshevik plans rather than a desire to see the Soviets actually start managing society. [**The Lessons of October**]

In 1920, he argued that *"[w]e have more than once been accused of having substituted for the dictatorships of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only be means of the dictatorship of the party. It is thanks to the ... party ... [that] the Soviets ... [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class these is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class."* [**Terrorism and Communism**, p. 109]

In 1937 he continued this theme by arguing that *"the proletariat can take power only through its vanguard."* Thus, rather than the working class as a whole *"seizing power"*, it is the *"vanguard"* which takes power — *"a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society."* He mocked the anarchist idea that a socialist revolution should be based on the self-management of workers within their own autonomous class organisations:

> *"Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [**Stalinism and Bolshevism**]

As can be seen, over a 17 year period Trotsky argued that it was the party which ruled, not the councils. The workers' councils became little more than rubber-stamps for the Bolshevik government (and not even that, as the central government only submitted a fraction of its decrees to the Central Executive of the national soviet, and that soviet was not even in permanent session). As Russian Anarchist Voline made clear *"for, the anarchists declared, if 'power' really should belong to the soviets, it could not belong to the Bolshevik Party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets."* [**The Unknown Revolution**, p. 213] In the words of Kropotkin:

> "The idea of soviets ... councils of workers and peasants ... controlling the economic and political life of the country is a great idea. All the more so, since it is necessarily follows that these councils should be composed of all who take part in the real production of national wealth by their own efforts.
>
> "But as long as the country is governed by a party dictatorship, the workers' and peasants' councils evidently lose their entire significance. They are reduced to the passive rule formerly played by the 'States General,' when they were convoked by

> the king and had to combat an all-powerful royal council." [**Kropotkin's Revolutionary Pamphlets**, pp. 254–5]

In other words, the workers' councils took power in name only. Real power rested with the central government and the workers' councils become little more than a means to elect the government. Rather than manage society directly, the soviets simply became a transmission belt for the decrees and orders of the Bolshevik party. Hardly a system to inspire anyone.

However, the history of the Russian Revolution has two important lessons for members of the various anti-globalisation and anti-capitalist groups. Firstly, as we noted in section 1, is usually miles behind the class struggle and the ideas developed in it. As another example, we can point to the movement for workers' control and self-management that developed around the factory committees during the summer of 1917. It was the workers themselves, **not** the Bolshevik Party, which raised the issue of workers' self-management and control during the Russian Revolution. As historian S.A. Smith correctly summarises, the *"factory committees launched the slogan of workers' control of production quite independently of the Bolshevik party. It was not until May that the party began to take it up."* [**Red Petrograd**, p. 154] Given that the defining aspect of capitalism is wage labour, the Russian workers' raised a clearly socialist demand that entailed its abolition. It was the Bolshevik party, we must note, who failed to raise above a *"trade union conscious"* in this and so many other cases.

Therefore, rather than being at the forefront of struggle and ideas, the Bolsheviks were, in fact, busy trying to catch up. History has repeated itself in the anti-capitalist demonstrations We should point out that anarchists have supported the idea of workers' self-management of production since 1840 and, unsurprisingly enough, were extremely active in the factory committee movement in 1917.

The second lesson to be gained from the Russian Revolution is that while the Bolsheviks happily (and opportunistically) took over popular slogans and introduced them into their rhetoric, they rarely meant the same thing to the Bolsheviks as they did to the masses. For example, as noted above, the Bolsheviks took up the slogan *"All Power to the Soviets"* but rather than mean that the Soviets would manage society directly they actually meant the Soviets would delegate their power to a Bolshevik government which would govern society in their name. Similarly with the term *"workers' control of production."* As S.A. Smith correctly notes, Lenin used *"the term ['workers' control'] in a very different sense from that of the factory committees."* In fact Lenin's *"proposals ... [were] thoroughly statist and centralist in character, whereas the practice of the factory committees was essentially local and autonomous."* [**Op. Cit.**, p. 154] Once in power, the Bolsheviks systematically undermined the popular meaning of workers' control and replaced it with their own, statist conception. This ultimately resulted in the introduction of *"one-man management"* (with the manager appointed from above by the state). This process is documented in Maurice Brinton's **The Bolsheviks and Workers' Control**, who also indicates the clear links between Bolshevik practice and Bolshevik ideology as well as how both differed from popular activity and ideas.

Hence the comments by Russian Anarchist Peter Arshinov:

> *"Another no less important peculiarity is that [the] October [revolution of 1917] has two meanings — that which the working' masses who participated in the social revolution gave it, and with them the Anarchist-Communists, and that which was given it by the*

> *political party [the Marxist-Communists] that captured power from this aspiration to social revolution, and which betrayed and stifled all further development. An enormous gulf exists between these two interpretations of October. The October of the workers and peasants is the suppression of the power of the parasite classes in the name of equality and self-management. The Bolshevik October is the conquest of power by the party of the revolutionary intelligentsia, the installation of its 'State Socialism' and of its 'socialist' methods of governing the masses."* [**The Two Octobers**]

The members of the "anti-capitalist" movements should bear that in mind when the SWP uses the same rhetoric as they do. Appearances are always deceptive when it comes to Leninists. The history of the Russian Revolution indicates that while Leninists like the SWP can use the same words as popular movements, their interpretation of them can differ drastically.

Take, for example, the expression "anti-capitalist." The SWP will claim that they, too, are "anti-capitalist" but, in fact, they are only opposed to "free market" capitalism and actually support state capitalism. Lenin, for example, argued that workers' must *"**unquestioningly obey the single will** of the leaders of labour"* in April 1918 along with granting *"individual executives dictatorial power (or 'unlimited' powers)"* and that *"the appointment of individuals, dictators with unlimited powers"* was, in fact, *"in general compatible with the fundamental principles of Soviet government"* simply because *"the history of revolutionary movements"* had *"shown"* that *"the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes."* He notes that *"[u]ndoubtably, the dictatorship of individuals was compatible with bourgeois democracy."* [**The Immediate Tasks of the Soviet Government**, p. 34 and p. 32]

He confused state capitalism with socialism. *"State capitalism,"* he wrote, *"is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps."* [**Collected Works**, vol. 24, p. 259] He argued that socialism *"is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly **made to benefit the whole people**; by this token it **ceases** to be capitalist monopoly."* [**The Threatening Catastrophe and how to avoid it**, p. 37]

As Peter Arshinov argued, a *"fundamental fact"* of the Bolshevik revolution was *"that the workers and the peasant labourers remained within the earlier situation of 'working classes' — producers managed by authority from above."* He stressed that Bolshevik political and economic ideas may have *"remov[ed] the workers from the hands of individual capitalists"* but they *"delivered them to the yet more rapacious hands of a single ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital ... Wage labour has remained what it was before, expect that it has taken on the character of an obligation to the State... . It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism."* [**The History of the Makhnovist Movement**, p. 35 and p. 71] Therefore, looking at Bolshevism in power and in theory it is clear that it is not, in fact, "anti-capitalist" but rather in favour of state capitalism and any appropriation of popular slogans was always under the firm understanding that the Bolshevik interpretation of these ideas is what will be introduced.

Therefore the SWP's attempt to re-write Russian History. The actual events of the Russian Revolution indicate well the authoritarian and state-capitalist nature of Leninist politics.

9. How do the SWP re-write the history of the Spanish Revolution?

The SWP, after re-writing Russian history, move onto Spanish history:

> *"It did not happen in Spain in 1936. The C.N.T., a trade union heavily influenced by anarchist ideas, led a workers' uprising in the city of Barcelona that year. Workers' councils effectively ran the city.*
>
> *"But the capitalist state machine did not simply disappear. The government and its army, which was fighting against Franco's fascist forces, remained, although it had no authority in Barcelona.*
>
> *"The government even offered to hand power over to the leaders of the C.N.T. But the C.N.T. believed that any form of state was wrong. It turned down the possibility of forming a workers' state, which could have broken the fascists' coup and the capitalist state.*
>
> *"Worse, it accepted positions in a government that was dominated by pro-capitalist forces.*
>
> *"That government crushed workers' power in Barcelona, and in doing so fatally undermined the fight against fascism."*

It is hard to know where to start with this distortion of history.

Firstly, we have to point out that the C.N.T. did lead a workers' uprising in 1936 but in was in response to a military coup and occurred all across Spain. The army was not *"fighting against Franco's fascist forces"* but rather had been the means by which Franco had tried to impose his version of fascism. Indeed, as the SWP know fine well, one of the first acts the CNT did in the Spanish Revolution was to organise workers' militias to go fight the army in those parts of Spain in which the unions (particularly the CNT which lead the fighting) did not defeat it by street fighting. Thus the C.N.T. faced the might of the Spanish army rising in a fascist coup. That, as we shall see, influenced its decisions.

By not mentioning (indeed, lying about) the actual conditions the CNT faced in July 1936, the SWP ensure the reader cannot understand what happened and why the CNT made the decisions it did. Instead the reader is encouraged to think it was purely a result of anarchist theory. Needless to say, the SWP have a fit when it is suggested the actions of the Bolsheviks during the Russian Civil War were simply the result of Leninist ideology and unaffected by the circumstances they were made in. The logic is simple: the mistakes of Marxists are **never** their fault, **never** derive from Marxist politics and are always attributable to circumstances (regardless of the facts); the mistakes of anarchists, however, **always** derive from their politics and can never be explained by circumstances (regardless of counter-examples and those circumstances). Once this is understood, the reason why the SWP distorted the history of the Spanish Revolution becomes clear.

Secondly, anarchism does not think that the *"capitalist state machine"* will *"simply disappear."* Rather, anarchists think that (to quote Kropotkin) the revolution *"must smash the State and replace it with the Federation [of workers' associations and communes] and it will act accordingly."* [**No Gods, No Masters**, vol. 1, p. 259] In other words, the state does not disappear, it is destroyed and replaced with a new, libertarian, form of social structure. Thus the SWP misrepresents anarchist theory.

Thirdly, yes, the Catalan government did offer to stand aside for the C.N.T. and the C.N.T. rejected the offer. Why? The SWP claim that *"the C.N.T. believed that any form of state was wrong"* and that is why it did not take power. That is true, but what the SWP fail to mention is more important. The C.N.T. refused to implement libertarian communism after the defeat of the army uprising in July 1936 simply because it did not want to be isolated nor have to fight the republican government as well as the fascists (needless to say, such a decision, while understandable, was wrong). But such historical information would confuse the reader with facts and make their case against anarchism less clear-cut.

Ironically the SWP's attack on the CNT indicates well the authoritarian basis of its politics and its support of soviets simply as a means for the party leaders to take power. After all, they obviously consider it a mistake for the *"leaders of the CNT"* to refuse power. Trotsky made the same point, arguing that:

> *"A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society."* [**Stalinism and Bolshevism**]

Yet the SWP say they, and their political tradition, are for *"workers' power"* yet, in practice, they clearly mean that power will be seized, held and exercised by the workers' leaders. A strange definition of "workers' power," we must admit but one that indicates well the differences between anarchists and Marxists. The former aim for a society based on workers' self-management. The latter desire a society in which workers' delegate their power to control society (i.e. their own lives) to the "leaders," to the "workers' party" who will govern on their behalf. The "leaders" of the CNT quite rightly rejected such this position — unfortunately they also rejected the anarchist position at the same time and decided to ignore their politics in favour of collaborating with other anti-fascist unions and parties against Franco.

Simply put, either the workers' have the power or the leaders do. To confuse the rule of the party with workers' self-management of society lays the basis for party dictatorship (as happened in Russia). Sadly, the SWP do exactly this and fail to learn the lessons of the Russian Revolution.

Therefore, the SWP's argument against anarchism is logically flawed. Yes, the CNT did not take state power. However, neither did it destroy the state, as anarchist theory argues. Rather it ignored the state and this was its undoing. Thus the SWP attacks anarchism for anarchists failing to act in an anarchist manner! How strange.

One last point. The events of the Spanish Revolution are important in another way for evaluating anarchism and Marxism. Faced with the military coup, the Spanish government did nothing, even refusing to distribute arms to the workers. The workers, however, took the initiative, seized arms by direct action and took to the streets to confront the army. Indeed, the dynamic response of the CNT members to Franco's coup compared to the inaction of the Marxist inspired German workers movement faced with Hitler's taking of power presents us with another example of the benefits of federalism against centralism, of anarchism against Marxism. The federal structure of the CNT had accustomed its members to act for themselves, to show initiative and act without waiting for orders from the centre. The centralised German system did the opposite.

The SWP will argue, of course, that the workers were mislead by their leaders ("who were only Marxists in name only"). The question then becomes: why did they not act for themselves? Perhaps because the centralised German workers' movement had eroded their members initiative, self-reliance and spirit of revolt to such a degree that they could no longer act without their

leaders instructions? It may be argued that with **better** leaders the German workers would have stopped the Nazis, but such a plea fails to understand **why** better leaders did not exist in the first place. A centralised movement inevitably produces bureaucracy and a tendency for leaders to become conservative and compromised.

All in all, rather than refute anarchism the experience of the Spanish Revolution **confirms** it. The state needs to be destroyed, **not** ignored or collaborated with, and replaced by a federation of workers' councils organised from the bottom-up. By failing to do this, the CNT did ensure the defeat of the revolution but it hardly indicates a failure of anarchism. Rather it indicates a failure of anarchists who made the wrong decision in extremely difficult circumstances.

Obviously it is impossible to discuss the question of the C.N.T. during the Spanish Revolution in depth here. We address the issue of Marxist interpretations of Spanish Anarchist history in the appendix *"Marxism and Spanish Anarchism."* Section 20 of that appendix discusses the C.N.T.'s decision to collaborate with the Republican State against Franco as well as its implications for anarchism.

10. Do anarchists ignore the fact that ideas change through struggle?

The SWP try and generalise from these experiences:

> *"In different ways, the lessons of Russia and Spain are the same. The organisational questions thrown up in particular struggles are critical when it comes to the working class challenging capitalism.*
>
> *"Workers face conflicting pressures. On the one hand, they are forced to compete in the labour market. They feel powerless, as an individual, against the boss.*
>
> *"That is why workers can accept the bosses' view of the world. At the same time constant attacks on workers' conditions create a need for workers to unite and fight back together.*
>
> *"These two pressures mean workers' ideas are uneven. Some see through the bosses' lies. Others can be largely taken in. Most part accept and part reject capitalist ideas. The overall consciousness of the working class is always shifting. People become involved in struggles which lead them to break with pro-capitalist ideas."*

That is very true and anarchists are well aware of it. That is why anarchists organise groups, produce propaganda, argue their ideas with others and encourage direct action and solidarity. We do so because we are aware that the ideas within society are mixed and that struggle leads people to break with pro-capitalist ideas. To quote Bakunin:

> *"the germs of [socialist thought] ... [are to] be found in the instinct of every earnest worker. The goal ... is to make the worker fully aware of what he wants, to unjam within him a stream of thought corresponding to his instinct ... What impedes the swifter development of this salutary though among the working masses? Their ignorance to be sure, that is, for the most part the political and religious prejudices with which self-interested classes still try to obscure their conscious and their natural instinct. How can we dispel this ignorance and destroy these harmful prejudices? By education and propaganda? ... they are insufficient ... [and] who will conduct this propaganda? ... [The] workers' world ... is left with but a single path, that of* ***emancipation through***

> ***practical action*** *... It means workers' solidarity in their struggle against the bosses. It means* ***trade-unions, organisation*** *... To deliver [the worker] from that ignorance [of reactionary ideas], the International relies on collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses ... As soon as he begins to take an active part in this wholly material struggle, ... Socialism replaces religion in his mind... through practice and collective experience ... the progressive and development of the economic struggle will bring him more and more to recognise his true enemies ... The workers thus enlisted in the struggle will necessarily ... recognise himself to be a revolutionary socialist, and he will act as one."* [**The Basic Bakunin**, p. 102–3]

Therefore anarchists are well aware of the importance of struggle and propaganda in winning people to anarchist ideas. No anarchist has ever argued otherwise.

11. Why do anarchists oppose the Leninist "revolutionary party"?

The SWP argue that:

> "So there is always a battle of ideas within the working class. That is why political organisation is crucial. Socialists seek to build a revolutionary party not only to try to spread the lessons from one struggle to another.
>
> "They also want to organise those people who most clearly reject capitalism into a force that can fight for their ideas inside the working class as a whole. Such a party is democratic because its members constantly debate what is happening in today's struggles and the lessons that can be applied from past ones."

That, in itself, is something most anarchists would agree with. That is why they build specific anarchist organisations which discuss and debate politics, current struggles, past struggles and revolutions and so on. In Britain there are three national anarchist federations (the Anarchist Federation, the Solidarity Federation and the Class War Federation) as well as numerous local groups and regional federations. The aim of these organisations is to try and influence the class struggle towards anarchist ideas (and, equally important, **learn** from that struggle as well — the *"program of the Alliance [Bakunin's anarchist group], expanded to keep pace with developing situations."* [Bakunin, **Bakunin on Anarchism**, p. 406]). The need for a specific political organisation is one most anarchists would agree with.

Thus few anarchists are believers in spontaneous revolution and see the need for anarchists to organise **as anarchists** to spread anarchist ideas and push the struggle towards anarchist ends (smashing the state and capitalism and the creation of a free federation of workers' councils and communes) via anarchist tactics (direct action, solidarity, general strikes, insurrection and encouraging working class self-organisation and self-management). Hence the need for specific anarchist organisations:

> *"The Alliance [Bakunin's anarchist group] is the necessary complement to the International [the revolutionary workers' movement]. But the International and the Alliance,*

> *while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses ... regardless of nationality and national boundaries or religious and political beliefs, into one compact body; the Alliance ... tries to give these masses a really revolutionary direction. The programs of one and the other, without being opposed, differ in the degree of their revolutionary development. The International contains in germ, but only in germ, the whole program of the Alliance. The program of the Alliance represents the fullest unfolding of the International."* [**Bakunin on Anarchism**, p. 157]

However, anarchists also argue that the revolutionary organisation must also reflect the type of society we want. Hence an anarchist federation must be self-organised from below, rejecting hierarchy and embracing self-management. For anarchists an organisation is not democratic because it debates, as the SWP claims. It is democratic only if the membership actually decides the policy of the organisation. That the SWP fail to mention this is significant and places doubt on whether their organisation is democratic in fact (as we indicate in section 22, the SWP may debate but it is not democratic). The reason why democracy in the SWP may not be all that it should be can be found in their comment that:

> *"It is also centralised, as it arrives at decisions which everyone acts on."*

However, this is not centralisation. Centralisation is when the centre decides everything and the membership follow those orders. That the membership may be in a position to elect those at the centre does not change the fact that the membership is simply expected to follow orders. It is the organisational principle of the army or police, not of a free society. That this is the principle of Leninism can be seen from Trotsky's comment that the *"statues [of the party] should express the leadership's organised distrust of the members, a distrust manifesting itself in vigilant control from above over the Party."* [quoted by M. Brinton, **The Bolsheviks and Workers' Control**, p. xi] Thus the centre controls the membership, not vice versa.

In **What is to be Done?** Lenin discussed *"the confusion of ideas concerning the meaning of democracy."* He dismisses the idea of self-management as *"Primitive Democracy."* He uses the example of the early British unions, where workers *"thought that it was an indispensable sign of democracy for all the members to do all the work of managing the unions; not only were all questions decided by the vote of all the members, but all the official duties were fulfilled by all the members in turn."* He considered *"such a conception of democracy"* as *"absurd"* and saw it as historical necessity that it was replaced by *"representative institutions"* and *"full-time officials"*. [**Essential Works of Lenin**, pp. 162–3] In other words, the Leninist tradition rejects self-management in favour of hierarchical structures in which power is centralised in the hands of *"full-time officials"* and *"representative institutions."*

In contrast, Bakunin argued that trade unions which ended *"primitive democracy"* and replaced it with representative institutions became bureaucratic and *"simply left all decision-making to their committees . .. In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership."* The membership become subject to *"the arbitrary power"* of the committees and *"ruled by oligarchs."* In other words, bureaucracy set in and democracy **as such** was eliminated and while *"very good for the committees ... [it was] not at all favourable for the social,*

intellectual, and moral progress of the collective power" of the workers' movement. [**Bakunin on Anarchism**, pp. 246–7] Who was correct can quickly be seen from the radical and pro-active nature of the British trade union leadership. Ironically, the SWP always bemoan trade union bureaucracies betraying workers in struggle yet promote an organisational structure that ensures that power flows to the centre and into the hands of bureaucrats.

At best, Leninism reduces "democracy" to mean that the majority designates its rulers, copied from the model of bourgeois parliamentary democracy. In practice it is drained of any real meaning and quickly becomes a veil thrown over the unlimited power of the rulers. The base does not run the organisation just because once a year it elects delegates who designate the central committee, no more than the people are sovereign in a parliamentary-type republic because they periodically elect deputies who designate the government. That the central committee is designated by a "democratically elected" congress makes no difference once it is elected, it is de facto and de jure the absolute ruler of the organisation. It has complete (statutory) control over the body of the Party (and can dissolve the base organisations, kick out militants, etc.).

Therefore it is ironic that the SWP promote themselves as supporters of democracy as it is anarchists who support the *"primitive democracy"* (self-management) contemptuously dismissed by Lenin. With their calls for centralisation, it is clear that SWP still follow Lenin, wishing to place decision-making at the centre of the organisation, in the hands of leaders, in the same way the police, army and bureaucratic trade unions do. Anarchists reject this vision as non-socialist and instead argue for the fullest participation in decision making by those subject to those decisions. Only in this way can government — inequality in power — be eliminated from society.

Just to stress the point, anarchists are not opposed to people making decisions and everyone who took part in making the decision acting on them. Such a system is not "centralised," however, when the decisions flow from the bottom-up and are made by mandated delegates, accountable to the people who mandated them. It is centralised when it is decided upon by the leadership and imposed upon the membership. Thus the issue is not whether we organise or not organise, nor whether we co-ordinate joint activity or not, it is a question of how we organise and co-ordinate — from the bottom up or from the top down. As Bakunin argued:

> *"Discipline, mutual trust as well as unity are all excellent qualities when properly understood and practised, but disastrous when abused ... [one use of the word] discipline almost always signifies despotism on the one hand and blind automatic submission to authority on the other.. .*
>
> *"Hostile as I am to [this,] the authoritarian conception of discipline, I nevertheless recognise that a certain kind of discipline, not automatic but voluntary and intelligently understood is, and will ever be, necessary whenever a greater number of individuals undertake any kind of collective work or action. Under these circumstances, discipline is simply the voluntary and considered co-ordination of all individual efforts for a common purpose. At the moment of revolution, in the midst of the struggle, there is a natural division of functions according to the aptitude of each, assessed and judged by the collective whole...*
>
> *"In such a system, power, properly speaking, no longer exists. Power is diffused to the collectivity and becomes the true expression of the liberty of everyone, the faithful and*

> *sincere realisation of the will of all ... this is the only true discipline, the discipline necessary for the organisation of freedom. This is not the kind of discipline preached by the State ... which wants the old, routine-like, automatic blind discipline. Passive discipline is the foundation of every despotism."* [**Bakunin on Anarchism**, pp. 414–5]

Therefore, anarchists see the need to make agreements, to stick by them and to show discipline but we argue that this must be to the agreements we helped to make and subject to our judgement. We reject "centralisation" as it confuses the necessity of agreement with hierarchical power, of solidarity and agreement from below with unity imposed from above as well as the need for discipline with following orders.

12. Why do the SWP make a polemical fetish of *"unity"* and *"democracy"* to the expense of common sense and freedom?

The SWP argue that *"unity"* is essential:

> *"Without unity around decisions there would be no democracy — minorities would simply ignore majority decisions."*

Anarchists are in favour of free agreement and so argue that minorities should, in general, go along with the majority decisions of the groups and federations they are members of. That is, after all, the point behind federalism — to co-ordinate activity. Minorities can, after all, leave an association. As Malatesta argued, *"anarchists recognise that where life is lived in common it is often necessary for the minority to come to accept the opinion of the majority. When there is an obvious need or usefulness in doing something and, to do it requires the agreement of all, the few should feel the need adapt to the wishes of the many."* [**The Anarchist Revolution**, p. 100] The Spanish C.N.T. argued in its vision of Libertarian Communism that:

> *"Communes are to be autonomous and will be federated at regional and national levels for the purpose of achieving goals of a general nature. ... communes ... will undertake to adhere to whatever general norms [that] may be majority vote after free debate... The inhabitants of a Commune are to debate their internal problems ... among themselves. Whenever problems affecting an entire comarca [district] or province are involved, it must be the Federations [of communes] who deliberate and at every reunion or assembly these may hold all of the Communes are to be represented and their delegates will relay the viewpoints previously approved in their respective Communes ... On matters of a regional nature, it will be up to the Regional Federation to put agreements into practice and these agreements will represent the sovereign will of all the region's inhabitants. So the starting point is the individual, moving on through the Commune, to the Federation and right on up finally to the Confederation."* [quoted by Jose Pierats, **The C.N.T. in the Spanish Revolution**, pp. 68–9]

Therefore, as a general rule-of-thumb, anarchists have little problem with the minority accepting the decisions of the majority after a process of free debate and discussion. As we argue in section A.2.11, such collective decision making is compatible with anarchist principles — indeed,

is based on them. By governing ourselves directly, we exclude others governing us. However, we do not make a fetish of this, recognising that, in certain circumstances, the minority must and should ignore majority decisions. For example, if the majority of an organisation decide on a policy which the minority thinks is disastrous then why should they follow the majority? In 1914, the representatives of the German Social Democratic Party voted for war credits. The anti-war minority of that group went along with the majority in the name of *"democracy," "unity"* and *"discipline"*. Would the SWP argue that they were right to do so? Similarly, if a majority of a community decided, say, that homosexuals were to be arrested, would the SWP argue that minorities must not ignore that decision? We hope not.

In general, anarchists would argue that a minority should ignore the majority when their decisions violate the fundamental ideas which the organisation or association are built on. In other words, if the majority violates the ideals of liberty, equality and solidarity then the minority can and should reject the decisions of the majority. So, a decision of the majority that violates the liberty of a non-oppressive minority — say, restricting their freedom of association — then minorities can and should ignore the decisions and practice civil disobedience to change that decision. Similarly, if a decision violates the solidarity and the feelings of equality which should inform decisions, then, again, the minority should reject the decision. We cannot accept majority decisions without question simply because the majority can be wrong. Unless the minority can judge the decisions of the majority and can reject them then they are slaves of the majority and the equality essential for a socialist society is eliminated in favour of mere obedience.

However, if the actions of the majority are simply considered to be disastrous but breaking the agreement would weaken the actions of the majority, then solidarity should be the overwhelming consideration. As Malatesta argued, *"[t]here are matters over which it is worth accepting the will of the majority because the damage caused by a split would be greater than that caused by error; there are circumstances in which discipline becomes a duty because to fail in it would be to fail in the solidarity between the oppressed and would mean betrayal in face of the enemy ... What is essential is that individuals should develop a sense of organisation and solidarity, and the conviction that fraternal co-operation is necessary to fight oppression and to achieve a society in which everyone will be able to enjoy his [or her] own life."* [**Life and Ideas**, pp. 132–3]

He stresses the point:

> *"But such an adaptation [of the minority to the decisions of the majority] on the one hand by one group must be reciprocal, voluntary and must stem from an awareness of need and of goodwill to prevent the running of social affairs from being paralysed by obstinacy. It cannot be imposed as a principle and statutory norm...*
>
> *"So ... anarchists deny the right of the majority to govern in human society in general ... how is it possible ... to declare that anarchists should submit to the decisions of the majority before they have even heard what those might be?"* [**The Anarchist Revolution**, pp. 100–1]

Therefore, while accepting majority decision making as a key aspect of a revolutionary movement and a free society, anarchists do not make a fetish of it. We recognise that we must use our own judgement in evaluating each decision reached simply because the majority is not always right. We must balance the need for solidarity in the common struggle and needs of common life with critical analysis and judgement.

Needless to say, our arguments apply with even more force to the decisions of the **representatives** of the majority, who are in practice a very small minority. Leninists usually try and confuse these two distinct forms of decision making. When groups like the SWP discuss majority decision making they almost always mean the decisions of those elected by the majority — the central committee or the government — rather than the majority of the masses or an organisation.

So, in practice the SWP argue that the majority of an organisation cannot be consulted on every issue and so what they actually mean is that the decisions of the central committee (or government) should be followed at all times. In other words, the decisions of a minority (the leaders) should be obeyed by the majority. A minority owns and controls the "revolutionary" organisation and "democracy" is quickly turned into its opposite. Very "democratic."

As we shall indicate in the next two sections, the SWP do not, in fact, actually follow their own arguments. They are quite happy for minorities to ignore majority decisions — as long as the minority in question is the leadership of their own parties. As we argue in section 14, such activities flow naturally from the vanguardist politics of Leninism and should not come as a surprise.

13. How does the Battle of Prague expose the SWP as hypocrites?

To evaluate the sincerity of the SWP's proclaimed commitment to *"democracy"* and *"centralism"* we just have to look at the actions of their contingent at the demonstration against the WTO and IMF in Prague on September 26th, 2000.

Let us recall that on September 16th, the SWP had argued as follows:

> *"It is no good people coming together in a struggle, discussing what to do and then doing just what they feel like as if no discussion had taken place."*

They stressed that importance of *"centralisation"* which they defined as *"arriv[ing] at decisions which everyone acts on. Without unity around decisions there would be no democracy — minorities would simply ignore majority decisions."*

In practice, the International Socialist (IS) section of the Prague demonstration (the SWP and its sister parties) totally ignored their own arguments. Instead of ending up in the Pink sector (for which they had put themselves down) they somehow ended up behind *"Ya Basta"* in the yellow sector. As they were at the front of the march this should have been impossible. It turns out they deliberately entered the wrong sector because they refused to accept the agreed plan to split the march in three.

The protests had been co-ordinated by INPEG. INPEG was established as a democratic implement of communication and co-ordination among individuals and groups which want to protest against the annual summit of IMF in Prague on September 2000. It included a variety groups — for instance reformists (e.g. NESEHNUTI), anarchists (e.g. CSAF or Solidarity) and Leninists (i.e. Socialist Solidarity, sister organisation of the British SWP). The IS group had argued at INPEG committee meetings earlier in the year for a single march on the centre (which of course could not have shut the conference down). They failed to win this argument and so had betrayed the rest of the protesters on the day by simply marching directly onto the bridge themselves (in the yellow sector) instead of continuing into the Pink sector as they were supposed to.

Why did the SWP do what they did? Presumably they put themselves down for the Pink section because it was at the front of the march and so offered the best media coverage for their

placards and banners. Similarly, they joined the Yellow Section because it was marching directly to the conference centre and not, like Pink, going round to the rear and so, again, offered the best media coverage. In other words, they *"did their own thing"*, ignored the agreements they made and weakened the protests simply to look the dominant group in the press. Ironically, the Czech media made sure that the Leninist parties got onto their front pages simply because many of them chose to march in Prague with red flags emblazoned with hammer and sickles. Flags associated with the Soviet occupation and the old regime are hardly "popular" and so useful to smear the protests.

The decision of the SWP to ignore the agreed plan was applauded by other Leninists. According to the post-Prague issue of the Communist Party of Great Britain's paper **Weekly Worker**:

> *"Farcically, the organisers had decided to split the march into three, each with its own route and composition — blue (anarchist), pink (trade unions and left organisations) and yellow (NGOs and Jubilee 2000). Ostensibly, this started as a tactic designed to facilitate forming a human chain around the conference centre, although by the day of the action this aim had, apparently, been abandoned. Whether these truly stupid arrangements had been accepted beforehand by all on the INPEG (Initiative Against Economic Globalisation) remains hazy, given the paucity of information about the debates and differences on this self-appointed body."*

The splitting of the march into three, as a matter of fact, was a great success. It allowed the demonstrators to encircle the conference centre. The marches splitting off from the back working beautifully, catching the police and media by surprise who were clustered at the front of the march (indeed, the police later admitted that they had been caught off guard by the splitting of the march). From the splitting points to the centre the marches were unaccompanied by both police and media. A clear victory. Indeed, what would have been *"truly stupid"* was doing what the police had expected (and SWP wanted) — to have one big march.

How was the demonstration's organised? According to eye-witness Katharine Viner (writing in **The Guardian** on Friday September 29, 2000):

> *"In the run-up to Tuesday's demonstration I attended the convergence centre, where 'spokes council' meetings took place, and found the sense of community and organisation there astonishing and moving. Every 'affinity group' — NGO or group of friends — sent a spokesperson to meetings to make decisions and work out strategy. It sounds impossible to contain, and it was laborious, but it worked and consensus was found. It felt like proper democracy in a way that the ballot box does not."*

Julie Light, of **Corporate Watch**, indicates the same process at work in her account entitled **Spirits, Tensions Run High in Prague** (dated September 25, 2000):

> *"the activist coalition called the Initiative Against Economic Globalisation (INPEG) is training hundreds of people in civil disobedience at the Convergence Centre. The Centre, a converted warehouse space located under Prague's Libensky Bridge, serves as an information and strategy clearinghouse for the protesters. A 'spokes council' made up of representatives of dozens of groups makes decisions by consensus for this international ad-hoc coalition that has never worked together before. They have an elaborate system*

of hand signals to indicate their views as they discuss the details of the protests. Given the logistical obstacles, things seem to be running remarkably smoothly."

Obviously *"proper democracy"* and a council of group spokespeople discussing the protests were not good enough for the SWP and other Leninist groups. Nor, of course, making an agreement and sticking to it.

The **Weekly Worker** complements the SWP's decision:

"Come the march itself, the damage was partially repaired by the decision of a majority of the 'pink' contingent (with the SWP and its international sections to the fore) to simply veer off the agreed route. This pink section then partially merged with the yellow to advance on the conference."

We must point out that the International Socialists appear to have lied about the numbers they were bringing to Prague. The day before the demonstration they claimed they said they would contribute 2,500 to the Pink section — since then their own press has reported 1,000 in their delegation (**Socialist Worker** no. 1716 stated that the *"day began when over 1,000 marched from the Florenc bus station ...led by supporters of Socialist Worker and its sister papers elsewhere in Europe"*). This would have left the Pink block seriously under strength even if they had not unilaterally left their block.

Their defection from the agreed plan had very serious repercussions on the day — one gate in the Pink sector was never covered. In the Blue sector, where the anarchists were concentrated, this meant that at the height of a battle with hundreds of riot police, a water cannon and two Armoured Personnel Carriers they were forced to send 300 people on a 2 km hike to attempt to close this gate. Shortly after they left a police charge broke the Blue Block lines leading to arrests and injuries.

Thus, by ignoring the plan and doing their own thing, they not only made a mockery of their own arguments and the decision making process of the demonstration, weakened the protest and placed others in danger.

And the net effect of their defection? As the **Weekly Worker** pathetically comments:

"Of course, it was blocked by ranks of riot police ..."

As the bridge was a very narrow front this resulted in a huge amount of people stuck behind *"Ya Basta!"* with nothing to do except sit around. So the "International Socialists" and other Leninists who undertook the act of sabotage with them were stuck doing nothing behind *"Ya Basta"* at the bottom of the bridge (as would be expected — indeed, this exposes another failing of centralism, its inability to know local circumstances, adapt to them and plan taking them into account). The tiny number of anarchists who marched around to cover their gate on the other hand, took the police by surprise and broke through to the conference centre until driven back by hundreds of riot police. Worse, there were some problems in the "Yellow Block" as the Leninists were pushing from behind and it took some serious explaining to get them to understand that they should stop it because otherwise people in the front line could be crushed to death. Moreover, they demanded to be allowed up alongside *"Ya Basta"* at the front, next to the riot cops, but when *"Ya Basta"* did pull out and invited the SWP to take their place in the front they refused to do so.

Moreover, the actual result of the SWP's disgraceful actions in Prague also indicates the weakness of centralism. Having centrally decided to have one big march (regardless of what the others thought or the majority wished or agreed to) the decision was made with clearly no idea of the local geography otherwise they would have known that the front at the bridge would have been small. The net result of the "efficient" centralisation of the SWP? A mass of protestors stuck doing nothing due to a lack of understanding of local geography and the plan to blockade the conference seriously weakened. A federal organisation, on the other hand, would have had information from the local activists who would have been organising the protests and made their plans accordingly.

Therefore, to summarise. Ten days after denouncing anarchism for refusing to accept majority decisions and for being against "centralisation" (i.e. making and keeping agreements), the SWP ignore majority decisions, break agreements and do their own thing. Not only that, they weaken the demonstration and place their fellow protestors in difficulties simply so they could do nothing someplace else as, unsurprisingly enough, their way was blocked by riot cops. An amazing example of "democratic centralism" in practice and sure to inspire us all to follow the path of Marxism-Leninism!

The hypocrisy of their actions and arguments are clear. The question now arises, what do anarchists think of their action. As we argued in the last section, while anarchists favour direct democracy (self-management) when making decisions we also accept that minorities can and should ignore a majority decision if that decision is considered to be truly disastrous. However, any such decision must be made based on evaluating the damage caused by so making it and whether it would be a violation of solidarity to do so. This is what the SWP clearly failed to do. Their decision not only made a mockery of their own argument, it failed to take into account **solidarity** with the rest of the demonstration.

From an anarchist perspective, therefore, the SWP's decision and actions cannot be justified. They violated the basic principles of a revolutionary movement, the principles of liberty, equality and solidarity. They ignored the liberty of others by violating their agreements with them, they violated their equality by acting as if the other groups ideas and decisions did not matter and they violated solidarity by ignoring the needs of the common struggle and so placing their fellow demonstrators in danger. While anarchists **do** respect the rights of minorities to act as they see fit, we also recognise the importance of solidarity with our fellow workers and protestors. The SWP by failing to consider the needs of the common struggle sabotaged the demonstration and should be condemned not only as hypocrites but also as elitists — the party is not subject to the same rules as other demonstrators, whose wishes are irrelevant when they conflict with the party. The implications for the SWP's proclaimed support for democracy is clear.

So it appears that minorities **can** and **should** ignore agreements – as long as the minority in question are the leaders of the SWP and its sister parties. They have exposed themselves as being hypocrites. Like their heroes, Lenin and Trotsky, they will ignore democratic decisions when it suits them (see next section). This is sickening for numerous reasons — it placed the rest of the demonstrators in danger, it weakened the demonstration itself and it shows that the SWP say one thing and do the exact opposite. They, and the political tradition they are part of, clearly are not to be trusted. The bulk of the membership went along with this betrayal like sheep. Hardly a good example of revolutionary consciousness. In fact it shows that the "revolutionary" discipline of the SWP **is** like that of the cops or army) and that SWP's centralised system **is** based on typically bourgeois notions. In other words, the organisational structure desired by the SWP

does not encourage the autonomy, initiative or critical thinking of its members (as anarchists have long argued).

Prague shows that their arguments for "centralisation" as necessary for "democracy" are hypocrisy and amount to little more than a call for domination by the SWP's leadership over the anti-capitalist movement — a call hidden begin the rhetoric of "democracy." As can be seen, in practice the SWP happily ignores democracy when it suits them. The party always comes first, regardless of what the people it claims to represent actually want. In this they follow the actions of the Bolsheviks in power (see next section). Little wonder Marxism-Leninism is dying — the difference between what they claim and what they do is becoming increasingly well know.

14. Is the Leninist tradition actually as democratic as the SWP like to claim?

While the SWP attack anarchism for being undemocratic for being against "centralism" the truth is that the Leninist tradition is fundamentally undemocratic. Those, like the SWP, who are part of the Bolshevik tradition have no problem with minorities ignoring majority decisions — as long as the minority in question is the leadership of the vanguard party. We discussed the example of the *"battle of Prague"* in the last section, now we turn to Bolshevism in power during the Russian Revolution.

For example, the Bolsheviks usually overthrew the results of provincial soviet elections that went against them [Samuel Farber, **Before Stalinism**, pp 22–24]. It was in the spring of 1918 that the Bolsheviks showed how little they really supported the soviets. As discontent grew soviet after soviet fell to Menshevik-SR blocs. To stay in power they had to destroy the soviets and they did. Opposition victories were followed by disbanding of the soviets and often martial law. [Vladimir Brovkin, *"The Menshevik's Political Comeback: The elections to the provincial soviets in spring 1918"*, **Russian Review** no. 42 (1983), pp. 1–50]

In addition, the Bolsheviks abolished by decree soldiers' councils and the election of officers in the Red Army in favour of officers appointed from above (see section 11 of the appendix *"Marxism and Spanish Anarchism"* for details). They replaced self-managed factory committees with appointed, autocratic managers (see M. Brinton's **The Bolsheviks and Workers Control** or section 17 of the appendix *"Marxism and Spanish Anarchism"* for details). All this before the start of the Russian Civil War. Similarly, Lenin and Trotsky happily replaced the democratically elected leaders of trade unions with their followers when it suited them.

As Trotsky argued in 1921, you cannot place *"the workers' right to elect representatives above the party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the passing moods of the workers' democracy!"* He continued by stating the *"Party is obliged to maintain its dictatorship ... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every moment on the formal principle of a workers' democracy."* [quoted by M. Brinton, **The Bolsheviks and Workers' Control**, p. 78]

Of course, such a position follows naturally from Lenin's theory from **What is to be Done?** that *"the working class, exclusively by their own effort, is able to develop only trade union consciousness ... The theory of socialism [i.e. Marxism], however, grew out of the philosophic, historical and economic theories that were elaborated by the educated representatives of the propertied classes, the intellectuals ... the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas*

among the revolutionary socialist intelligentsia." This meant that *"Social Democratic [i.e. socialist] consciousness ... could only be brought to them from without."* [**Essential Lenin**, pp. 74–5]

For Leninists, if the workers' act in ways opposed to by the party, then the party has the right to ignore, even repress, the workers — they simply do not (indeed, cannot) understand what is required of them. They cannot reach *"socialist consciousness"* by their own efforts — indeed, their opinions can be dismissed as *"there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement* ***the only choice is****: either bourgeois or socialist ideology ... to belittle socialist ideology* ***in any way****, to* ***deviate from it in the slightest degree*** *means strengthening bourgeois ideology ... the* ***spontaneous*** *development of the labour movement leads to it becoming subordinated to bourgeois ideology."* [**Op. Cit.**, p. 82] Given that the socialist ideology cannot be communicated without the vanguard party, this means that the **party** can ignore the wishes of the masses simply because such wishes **must be** influenced by "bourgeois" ideology. Thus Leninism contains within itself the justification for eliminating democracy within the revolution. From Lenin's arguments to Bolshevik actions during the revolution and Trotsky's assertions in 1921 is only a matter of time — and **power**.

In other words, the SWP's *"Battle of Ideas"* becomes, once the vanguard is in power, just a battle:

> *"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves."* [Lenin, **Collected Works**, vol. 24, p. 170]

Significantly, of the 17 000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40 913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants of workers. [George Leggett, **The Cheka: Lenin's Political Police**, p. 178] Needless to say, Lenin failed to mention this aspect of his system in **The State and Revolution**, as do the SWP in their article.

It is hard to combine these facts and the SWP's comments with the claim that the "workers' state" is an instrument of class rule — after all, Lenin is acknowledging that coercion will be exercised against members of the working class as well. The question of course arises — who decides what a *"wavering"* or *"unstable"* element is? Given their comments on the role of the party and the need for the party to assume power, it will mean in practice whoever rejects the government's decisions (for example, strikers, local soviets which reject central decrees and instructions, workers who vote for anarchists or parties other than the Bolshevik party in elections to soviets, unions and so on, socialists and anarchists, etc.). Given a hierarchical system, Lenin's comment is simply a justification for state repression of its enemies (including elements within, or even the whole of, the working class).

It could be argued, however, that workers could use the soviets to recall the government. However, this fails for two reasons.

Firstly, the Leninist state will be highly centralised, with power flowing from the top-down. This means that in order to revoke the government, all the soviets in all parts of the country

must, at the same time, recall their delegates and organise a national congress of soviets (which, we note, is not in permanent session). The local soviets are bound to carry out the commands of the central government (to quote the Soviet constitution of 1918 — they are to *"carry out all orders of the respective higher organs of the soviet power"*). Any independence on their part would be considered *"wavering"* or an expression of *"unstable"* natures and so subject to *"revolutionary coercion"*. In a highly centralised system, the means of accountability is reduced to the usual bourgeois level — vote in the general election every few years (which, in any case, can be annulled by the government if its dislikes the *"passing moods"* expressed by them). As can be seen above, the Bolsheviks did disband soviets when they considered the wrong (i.e. *"wavering"* or *"unstable"*) elements had been elected to them and so a highly centralised state system cannot be responsive to real control from below.

Secondly, *"revolutionary coercion"* against *"wavering"* elements does not happen in isolation. It will encourage critical workers to keep quiet in case they, too, are deemed *"unstable"* and become subject to *"revolutionary"* coercion. As a government policy it can have no other effect than deterring democracy.

Thus Leninist politics provides the rationale for eliminating even the limited role of soviets for electing the government they hold in that ideology. The Leninist conception of workers' councils is purely instrumental. In 1907, Lenin argued that:

> *"the Party ... has never renounced its intention of utilising certain non-party organisations, such as the Soviets of Workers' Deputies ... to extend Social-Democratic influence among the working class and to strengthen the Social-Democratic labour movement ... the incipient revival creates the opportunity to organise or utilise non-party working-class institutions, such as Soviets ... for the purpose of developing the Social-Democratic movement; at the same time the Social-Democratic Party organisations must bear in mind if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous."* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, pp. 209–10]

As can be seen from the experiences of Russia under Lenin, this perspective did not fundamentally change — given a conflict between the councils and the party, the party always came first and soviets simply superfluous.

15. Why is the SWP's support for centralisation anti-socialist?

The SWP continue:

> *"Centralism is needed above all because the capitalist state is centralised. The police, media moguls, employers, the state bureaucracy and governments act in a concerted way to protect the system."*

Very true. However, the SWP fail to analyse ***why*** the state is centralised. Simply put, the state is centralised to **facilitate minority rule** by excluding the mass of people from taking part in the decision making processes within society. This is to be expected as social structures do not evolve by chance — rather they develop to meet specific needs and requirements. The specific need of the ruling class is to rule and that means marginalising the bulk of the population. Its requirement is

for minority power and this is transformed into the structure of the state and capitalist company. The SWP assume that centralisation is simply a tool without content. Rather, it is a tool that has been fashioned to do a specific job, namely to exclude the bulk of the population from the decision making process. It is designed that way and can have no other result. For that reason anarchists reject centralisation. As the justly famous Sonvillier Circular argued: *"How could one expect an egalitarian society to emerge out of an authoritarian organisation? It is impossible."* [quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 61]

Thus Rudolf Rocker:

> *"For the state centralisation is the appropriate form of organisation, since it aims at the greatest possible uniformity in social life for the maintenance of political and social equilibrium. But for a movement whose very existence depends on prompt action at any favourable moment and on the independent thought and action of its supporters, centralism could but be a curse by weakening its power of decision and systematically repressing all immediate action. If, for example, as was the case in Germany, every local strike had first to be approved by the Central, which was often hundreds of miles away and was not usually in a position to pass a correct judgement on the local conditions, one cannot wonder that the inertia of the apparatus of organisation renders a quick attack quite impossible, and there thus arises a state of affairs where the energetic and intellectually alert groups no longer serve as patterns for the less active, but are condemned by these to inactivity, inevitably bringing the whole movement to stagnation. Organisation is, after all, only a means to an end. When it becomes an end in itself, it kills the spirit and the vital initiative of its members and sets up that domination by mediocrity which is the characteristic of all bureaucracies."* [**Anarcho-Syndicalism**, p. 54]

Just as the capitalist state cannot be utilised by the working class for its own ends, capitalist/statist organisational principles such as appointment, autocratic management, centralisation and delegation of power and so on cannot be utilised for social liberation. They are not designed to be used for that purpose (and, indeed, they were developed in the first place to stop it and enforce minority rule!).

The implication of the SWP's argument is that centralisation is required for co-ordinated activity. Anarchists disagree. Yes, there is a need for co-ordination and joint activity, but that must be created from below, in new ways that reflect the goals we are aiming for. During the Spanish Revolution anarchists organised militias to fight the fascists. One was lead by anarchist militant Durruti. His military adviser, P'rez Farras, a professional soldier, was concerned about the application of libertarian principles to military organisation. Durruti replied:

> *"I have already said and I repeat; during all my life, I have acted as an anarchist. The fact of having been given political responsibility for a human collective cannot change my convictions. It is under these conditions that I agreed to play the role given to me by the Central Committee of the Militias.*
>
> *"I thought — and what has happened confirms my belief — that a workingmen's militia cannot be led according to the same rules as an army. I think that discipline, co-ordination and the fulfilment of a plan are indispensable. But this idea can no longer*

be understood in the terms of the world we have just destroyed. We have new ideas. We think that solidarity among men must awaken personal responsibility, which knows how to accept discipline as an autonomous act.

"Necessity imposes a war on us, a struggle that differs from many of those that we have carried on before. But the goal of our struggle is always the triumph of the revolution. This means not only victory over the enemy, but also a radical change in man. For this change to occur, man must learn to live in freedom and develop in himself his potentialities as a responsible individual. The worker in the factory, using his tools and directing production, is bringing about a change in himself. The fighter, like the worker, uses his gun as a tool and his acts must lead to the same goals as those of the worker.

"In the struggle he cannot act like a soldier under orders but like a man who is conscious of what he is doing. I know it is not easy to get such a result, but what one cannot get by reason, one can never get through force. If our revolutionary army must be maintained through fear, we will have changed nothing but the colour of fear. It is only by freeing itself from fear that a free society can be built." [quoted by Abel Paz, **Durruti: The People Armed**, p. 224]

Durruti's words effectively refute the SWP's flawed argument. We need to organise, co-ordinate, co-operate our activities but we cannot do so in bourgeois ways. We need to discover new ways, based on libertarian ideas and not capitalist ones like centralisation.

Indeed, this conflict between the Leninist support for traditional forms of organisational structure and the new forms produced by workers in struggle came into conflict during the Russian Revolution. One such area of conflict was the factory committee movement and its attempts at workers' self-management of production. As historian A.S. Smith summarises:

"Implicit in the movement for workers' control was a belief that capitalist methods cannot be used for socialist ends. In their battle to democratise the factory, in their emphasis on the importance of collective initiatives by the direct producers in transforming the work situation, the factory committees had become aware — in a partial and groping way, to be sure — that factories are not merely sites of production, but also of reproduction — the reproduction of a certain structure of social relations based on the division between those who give orders and those who take them, between those who direct and those who execute ... inscribed within their practice was a distinctive vision of socialism, central to which was workplace democracy.

"Lenin believed that socialism could be built only on the basis of large-scale industry as developed by capitalism, with its specific types of productivity and social organisation of labour. Thus for him, capitalist methods of labour-discipline or one-man management were not necessarily incompatible with socialism. Indeed, he went so far as to consider them to be inherently progressive, failing to recognise that such methods undermined workers' initiative at the point of production. This was because Lenin believed that the transition to socialism was guaranteed, ultimately, not by the self-activity of workers, but by the 'proletarian' character of state power... There is no doubt that Lenin did conceive proletarian power in terms of the central state and lacked a conception of localising such power at the point of production." [**Red Petrograd**, pp. 261–2]

The outcome of this struggle was the victory of the Bolshevik vision (as it had state power to enforce it) and the imposition of apparently "efficient" capitalist methods of organisation. However, the net effect of using (or, more correctly, imposing) capitalist organisations was, unsurprisingly, the re-introduction of capitalist social relations. Little wonder the Russian Revolution quickly became just another form of capitalism —

state capitalism where the state appointed manager replaced the boss and the workers' position remained identical. Lenin's attempts to centralise production simply replaced workers' power at the point of production with that of state bureaucrats.

We must point out the central fallacy of the SWP's argument. Essentially they are arguing you need to fight fire with fire. They argue that the capitalist class is centralised and so, in order to defeat them, so must we. Unfortunately for the SWP, you do not put a fire out with fire, you put fire out with water. Therefore, to defeat centralised system you need decentralised social organisation. Such decentralisation is required to include the bulk of the population in the revolutionary struggle and does not imply isolation. A decentralised movement does not preclude co-ordination or co-operation but that co-ordination must come from below, based on federal structures, and not imposed from above.

So a key difference between anarchism and Marxism on how the movement against capitalism should organise in the here and now. Anarchists argue that it should prefigure the society we desire — namely it should be self-managed, decentralised, built and organised from the bottom-up in a federal structure. This perspective can be seen from the justly famous Sonvillier Circular:

> *"The future society should be nothing but a universalisation of the organisation which the International will establish for itself. We must therefore take care to bring this organisation as near as possible to our ideal ... How could one expect an egalitarian and free society to grow out of an authoritarian organisation? That is impossible. The International, embryo of the future human society, must be, from now on, the faithful image of our principles of liberty and federation."* [quoted by Marx, **Fictitious Splits in the International**]

Of course, Marx replied to this argument and, in so doing, misrepresented the anarchist position. He argued that the Paris Communards *"would not have failed if they had understood that the Commune was 'the embryo of the future human society' and had cast away all discipline and all arms — that is, the things which must disappear when there are no more wars!"* [**Ibid.**] Needless to say this is simply a slander on the anarchist position. Anarchists, as the Circular makes clear, recognise that we cannot totally reflect the future and so the current movement can only be *"as near as possible to our ideal."* Thus we have to do things, such as fighting the bosses, rising in insurrection, smashing the state or defending a revolution, which we would not have to do in a socialist society but that does not imply we should not try and organise in a socialist way in the here and now. Such common sense, unfortunately, is lacking in Marx who instead decided to utter nonsense for a cheap polemical point.

Therefore, if we want a revolution which is more than just a change in who the boss is, we must create new forms of organisation and struggle which do not reproduce the traits of the world we are fighting. To put out the fire of class society, we need the water of a classless society and so we should organise in a libertarian way, building the new world in the shell of the old.

16. Why is the SWP wrong about the A16 Washington D.C. demo?

As an example of why Marxism is better than anarchism they give an example:

> *"Protesters put up several roadblocks during the major anti-capitalist demonstration in Washington in April of this year. The police tried to clear them. The question arose of what the protesters should do.*
>
> *"Some wanted to try to maintain the roadblocks. Others thought the best tactic was to reorganise the protests into one demonstration. Instead of coming to a clear decision and acting on it, the key organiser of the whole event told people at each roadblock to do what they thought was right.*
>
> *"The resulting confusion weakened all the protests."*

Firstly, we must point out that this argument is somewhat ironic coming from a party that ignored the agreed plan during the Prague anti-WTO demonstration and did *"what they thought was right"* (see section 13). Indeed, the various anti-capitalist demonstrations have been extremely effective and have been organised in an **anarchist** manner thus refuting the SWP.

Secondly, unfortunately for the SWP, they have the facts all wrong. The World Bank/IMF complex in Washington DC was extremely difficult to blockade. The police blocked over 50 blocks on the day of the demonstration to travel. DC has very wide streets. Many World Bank and IMF Delegates spent the night in those buildings, or came in early in the morning long before sunrise. This calls into question whether a blockade was the best strategy considering the logistic details involved (the Blockade strategy was abandoned for the Republican and Democratic Party Conference demonstrations). In addition to the blockades, there was an officially permitted rally blocks away from the action.

The tactical process worked in practice like this. While there was an original plan agreed to by consensus at the beginning of the blockades by all affinity groups, with groups picking which intersection to occupy and which tactics to use, there was a great deal of flexibility as well. There were several flying columns that moved from intersection to intersection reinforcing barricades and increasing numbers where it looked like police might charge. The largest of these was the Revolutionary Anti-Capitalist Bloc (*"the Black Bloc"*) made up mostly of class-struggle anarchists but included a number of other left libertarians (such as council communists and autonomists). The RACB officially maintained its autonomy within the demonstration and worked with others when and where it could. The affinity groups of the RACB would come to quick decisions on what to do. Often, they would quickly respond to the situation; usually their appearance was enough for the cops to fall back after a few tense moments.

By early afternoon, the various affinity groups manning the blockades were informed that the blockades had failed, and enough delegates had made it inside that the meeting was continuing inside with only a short delay. So the question came of what to do next? There were varying opinions. Some affinity groups favoured maintaining their blockades symbolically as an act of defiance and hoping to slow the dispersion of World Bank/IMF representatives as they left the meeting. Others wished to have a victory march around the area. Others wanted to join the rally. Some wanted to march on the World Bank and try for an occupation. There was no consensus. After much discussion between the affinity groups, a decision was reached.

The RACB was divided between two choices — either join with the rally or march on the Bank. There was a lot of negotiation back and forth between affinity groups. A compromise was reached. The RACB would move to each blockade in order and provide cover for those locked down to unlock and safely merge with the growing march so that attempts could be made the next day do blockade. The march continued to swell as it made its way along the route, eventually merging with the crowd at the permitted demonstration.

A decision was made. Perhaps it wasn't the most militant. Perhaps it did not foresee that the next day would lack the numbers to even attempt a successful blockade. But arrests on the demonstration were kept to a minimum, a large show of strength was put on and strong feelings of solidarity and camaraderie grew. The cops could only control a few square blocks, the rest of the city was ours. And it was a decision that everyone had a part in making, and one that everyone could live with. It's called self-management, perhaps it isn't always the fastest method of making decisions, but it is the best one if you desire freedom.

Of course, the last thing the SWP would want to admit is that anarchists led the victory march around Washington D.C. without a permit, without marshals, without many arrests and a minimal amount of violence! Of all the recent demonstrations in the U.S. the black bloc was the largest and most well received at Washington. Moreover, that demonstration showed that decentralised, federal organisation worked in practice. Each affinity group participated in the decision making process and an agreement reached between all involved. Centralisation was not required, no centre imposed the decision. Rather than weaken the protests, decentralisation strengthened it by involving all in the decision making process. Little wonder the SWP re-wrote history.

17. Why does the SWP's Washington example refute the SWP's own argument and not anarchism?

However, let us assume that the SWP's fictional account of the A16 demonstration (see last section) was, in fact, true. What does it actually mean? We must point out its interesting logic. They argue that the protests had a *"key organiser"* which means they were centralised. They argue that the protestors looked to that person for direction. Unfortunately that person could not come to a *"clear decision"* and instead handed back decision making to each roadblock. In other words, centralisation failed, not federalism. Moreover, the state would have had a simple means to destroy the demonstration — arrest the *"key organiser."* In a centralised system, without a centre, the whole structure collapses — without someone giving orders, nothing is done.

In a federal structure each roadblock would have sent a delegate to a council to co-ordinate struggle (which, we stress, was what actually did happen). To quote Bakunin, *"there will be a federation of the standing barricades and a Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade ... these deputies being invested with binding mandates and accountable and revocable at all times."* [**No Gods, No Masters**, vol. 1, p. 155] In the SWP's version of history, the blockades did not do this and so, unsurprisingly, without organisation, there was confusion. As an argument against anarchism it is useless. So the SWP's fictional example is an argument against centralisation — of placing decision-making power at the centre. In their story, faced with the task of co-ordinating actions which they had no knowledge of, the *"key organiser"* could not act and by not having a federal structure, the roadblocks were weakened due to lack of co-ordination. In reality, a federal structure existed within the demonstration, each roadblock and affinity group could take effective action instantly to counter the police, without

waiting for instructions from the centre, as well as communicate what has happening to other roadblocks and come to common agreements on what action to take. The Washington demonstration — like the other anti-capitalist demonstrations — showed the effectiveness of anarchist principles, of decentralisation and federalism from the bottom up.

So the SWP's analysis of the Washington demonstration is faulty on two levels. Firstly, their account is not accurate. The demonstration was organised in a decentralised manner and worked extremely well. Secondly, even if their account was not fiction, it proves the failure of centralisation, not federalism.

They draw a lesson from their fictional account:

> *"The police, needless to say, did not 'decentralise' their decision making. They co-ordinated across the city to break the protests."*

Such an analogy indicates the bourgeois and authoritarian nature of the SWP's politics. They do not understand that the capitalist state and workplace is centralised for a reason. It is to concentrate power into the hands of a few, with the many reduced to mere order takers. It is the means by which bourgeois rule is enforced

Moreover, they seem to be arguing that if we followed the example of the bourgeois state, of the organisational structure of the police or the army, then we would be as "effective" as they are. They are, in effect, arguing that the anti-capitalist movement should reproduce the regulated docility of the police force into its ranks, reproduce the domination of a few bosses at the top over a mass of unquestioning automations at the bottom. As Murray Bookchin argued, the Leninist *"has always had a grudging admiration and respect for that most inhuman of all hierarchical institutions, the military."* [**Toward an Ecological Society**, p. 254f] The SWP prove him right.

18. Why is a "revolutionary party" a contradiction in terms?

They continue by arguing that *"Anarchists say a revolutionary party is at best unnecessary and at worst another form of authoritarianism. But they cannot avoid the problems that a revolutionary party addresses."* In reality, while anarchists reject the "revolutionary" party, they do not reject the need for an anarchist federation to spread anarchist ideas, convince others of our ideas and to give a lead during struggles. We reject the Bolshevik style "revolutionary party" simply because it is organised in a centralised, bourgeois, fashion and so produces all the problems of capitalist society within so-called revolutionary organisations. As the anarchists of Trotwatch explain, such a party leaves much to be desired:

> *"In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly 'revolutionary' organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class."* [**Carry on Recruiting!**, p. 41]

Such an organisation can never create a socialist society. In contrast, anarchists argue that socialist organisations should reflect as much as possible the future society we are aiming to create. To build organisations which are statist/capitalistic in structure cannot do other than

reproduce the very problems of capitalism/statism into them and so undermine their liberatory potential. As Murray Bookchin puts it:

> *"The 'glorious party,' when there is one, almost invariably lags behind the events ... In the beginning ... it tends to have an inhibitory function, not a 'vanguard' role. Where it exercises influence, it tends to slow down the flow of events, not 'co- ordinate' the revolutionary forced. This is not accidental. The party is structured along hierarchical lines* ***that reflect the very society it professes to oppose*** *... Its membership is schooled in obedience ... The party's leadership, in turn, is schooled in habits born of command, authority, manipulation ... Its leaders ... lose contact with the living situation below. The local groups, which know their own immediate situation better than any remote leaders, are obliged to subordinate their insights to directives from above. The leadership, lacking any direct knowledge of local problems, responds sluggishly and prudently.. .*
>
> *"The party becomes less efficient from a revolutionary point of view the more it seeks efficiency by means of hierarchy, cadres and centralisation. Although everyone marches in step, the orders are usually wrong, especially when events begin to move rapidly and take unexpected turns-as they do in all revolutions. The party is efficient in only one respect-in moulding society in its own hierarchical imagine if the revolution is successful. It recreates bureaucracy, centralisation and the state. It fosters the bureaucracy, centralisation and the state. It fosters the very social conditions which justify this kind of society. Hence, instead of 'withering away,' the state controlled by the 'glorious party' preserves the very conditions which 'necessitate' the existence of a state — and a party to 'guard' it.*
>
> *"On the other hand, this kind of party is extremely vulnerable in periods of repression. The bourgeoisie has only to grab its leadership to destroy virtually the entire movement. With its leaders in prison or in hiding, the party becomes paralysed; the obedient membership had no one to obey and tends to flounder ...*
>
> *"[T]he Bolshevik leadership was ordinarily extremely conservative, a trait that Lenin had to fight throughout 1917 — first in his efforts to reorient the Central Committee against the provisional government (the famous conflict over the 'April Theses'), later in driving the Central Committee toward insurrection in October. In both cases he threatened to resign from the Central Committee and bring his views to 'the lower ranks of the party.'"* [**Post-Scarcity Anarchism**, pp. 194–9]

Thus the example of the "successful" Russian Revolution indicates the weakness of Leninism — Lenin had to fight the party machine he helped create in order to get it do anything revolutionary. Hardly a good example of a "revolutionary" party.

But, then again, the SWP know that anarchists do not reject the need for anarchists to organise as anarchists to influence the class struggle. As they argue, *"Anarchism's attempts to deal with them have been far less effective and less democratic."* The question is not of one of **whether** revolutionaries should organise together but **how** they do this. And as we shall see in the next four sections, the SWP's examples of revolutionary anarchist organisations are either unique and so cannot be generalised from (Bakunin's ideas on revolutionary organisation), or false (the F.A.I. was **not** organised in the way the SWP claim). Indeed, the simple fact is that the SWP **ignore** the

usual ways anarchists organise as anarchists and yet try and draw conclusions about anarchism from their faulty examples.

19. Do anarchists operate *"in secret"*?

They continue:

> *"All the major anarchist organisations in history have been centralised but have operated in secret."*

It is just as well they say *"all the major anarchist organisations,"* it allows them to ignore counter-examples. We can point to hundreds of anarchist organisations that are/were not secret. For example, the Italian Anarchist Union (IAU) was a non-secret organisation. Given that the IAU had around 20 000 members in 1920, we wonder by what criteria the SWP excludes it from being a *"major anarchist organisation"*? After all, estimates of the membership of the F.A.I. (one of the SWP's two *"major"* anarchist organisations) vary from around 6 000 to around 30 000. Bakunin's "Alliance" (the other SWP example) amounted to, at most, under 100. In terms of size, the IAU was equal to the F.A.I. and outnumbered the "Alliance" considerably. Why was the UAI not a *"major anarchist organisation"*?

Another, more up to date, example is the French Anarchist Federation which organises today. It as a weekly paper and groups all across France as well as in Belgium. That is not secret and is one of the largest anarchist organisations existing today (and so, by anyone's standards *"a major anarchist organisation"*). We wonder why the SWP excludes it? Simply because they know their generalisation is false?

Therefore, as can be seen, the SWP's claim is simply a lie. Few anarchist organisations have been secret. Those that have been secret have done so when conditions demanded it (for example, during periods of repression and when operating in countries with authoritarian governments). Just as Marxist organisations have done. For example, the Bolsheviks were secret for great periods of time under Tsarism and, ironically enough, the Trotskyist-Zinovievist **United Opposition** had to resort to secret and conspiratorial organisation to reach the Russian Communist Party rank and file in the 1920s. Therefore, to claim that anarchists have some sort of monopoly of secret organising is simply a lie — Marxists, like anarchists, have sometimes organised in secret when they have been forced to by state repression or likelihood of state repression. It is not a principle but, rather, sometimes a necessity. As anyone with even a basic grasp of anarchist history would know.

Similarly for the SWP's claims that *"all the major anarchist organisations in history have been centralised."* Such a claim is also a lie, as we shall prove in the sections 20 and 22.

20. Why is the SWP wrong about Bakunin's organisation?

As an example of a *"major anarchist organisation"* the SWP point to Bakunin and the organisations he created:

> *"The 19th century theorist of anarchism Mikhail Bakunin's organisation had a hierarchy of committees, with half a dozen people at the top, which were not under the democratic control of its members."*

Firstly, we have to wonder why anyone would have wanted to join Bakunin's group if they had no say in the organisation. Also, given that communication in the 19th century was extremely slow, such an organisation would have spent most of its time waiting for instructions from above. Why would anyone want to join such a group? Simple logic undermines the SWP's argument.

Secondly, we should also point out that the Bolshevik party itself was a secret organisation for most of its life in Tsarist Russia. Bakunin, an exile from that society, would have been aware, like the Bolsheviks, of the necessity of secret organising. Moreover, having spent a number of years imprisoned by the Tsar, Bakunin would not have desired to end up **back** in prison after escaping from Siberia to the West. In addition, given that the countries in which anarchists were operating at the time were not democracies, in the main, a secret organisation would have been considered essential. As Murray Bookchin argues, *"Bakunin's emphasis on conspiracy and secrecy can be understood only against the social background of Italy, Spain, and Russia the three countries in Europe where conspiracy and secrecy were matters of sheer survival."* [**The Spanish Anarchists**, p. 24] The SWP ignore the historical context.

Thirdly, the reality of Bakunin's organisation is slightly different from the SWP's claims. We have discussed this issue in great detail in section J.3.7 of the FAQ. However, it is useful to indicate the type of organisation Bakunin thought was necessary to aid the revolution. If we do, it soon becomes clear that the SWP's claim that it was *"not under the democratic control of its members"* is not true. To do so we shall quote from his letter to the Russian Nihilist Sergy Nechayev in which he explains the differences in their ideas. He discusses the *"principles and mutual conditions"* for a *"new society"* of revolutionaries in Russia (noting that this was an *"outline of a plan"* which *"must be developed, supplemented, and sometimes altered according to circumstances"*):

> *"Equality among all members and the unconditional and absolute solidarity — one for all and all for one — with the obligation for each and everyone to help each other, support and save each other...*
>
> *"Complete frankness among members and proscription of any Jesuitical methods in their relationships ... When a member has to say anything against another member, this must be done at a general meeting and in his presence.* ***General fraternal control*** *of each other ...*
>
> *"Everyone's personal intelligence vanished like a river in the sea in the collective intelligence and all members obey unconditionally the decisions of the latter.*
>
> *"All members are equal; they know all their comrades and discuss and decide with them all the most important and essential questions bearing on the programme of the society and the progress of the cause. The decision of the general meeting is absolute law...*
>
> *"The society chooses an Executive Committee from among their number consisting of three or five members who should organise the branches of the society and manage its activities in all the regions of the [Russian] Empire on the basis of the programme and general plan of action adopted by the decision of the society as a whole...*
>
> *"This Committee is elected for an indefinite term. If the society ... the People's Fraternity is satisfied with the actions of the Committee, it will be left as such; and while it remains a Committee each member . .. and each regional group have to obey it unconditionally, except in such cases where the orders of the Committee contradict either the general*

programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have participated equally in the discussion of them...

"In such a case members of the group must halt the execution of the Committee's orders and call the Committee to judgement before the general meeting ... If the general meeting is discontented with the Committee, it can always substitute another one for it...

"Any member or any group is subject to judgement by the general meeting ...

"No new Brother can be accepted without the consent of all or at the very least three-quarters of all the members...

*"The Committee divides the members ... among the Regions and constitutes Regional groups of leaderships from them ... Regional leadership is charged with organising the second tier of the society — the **Regional Fraternity**, on the basis of the same programme, the same rules, and the same revolutionary plan...*

*"All members of the **Regional Fraternity** know each other, but do not know of the existence of the **People's Fraternity.** They only know that there exists a **Central Committee** which hands down to them their orders for execution through **Regional Committee** which has been set up by it, i.e. by the **Central Committee** ...*

*"Each Regional Committee will set up **District** Committees from members of the **Regional Fraternity** and will appoint and replace them... .*

*"District Committees can, if necessary and only with the consent of the Regional Committee, set up a third tier of the organisation — **District Fraternity** with a programme and regulations as near as possible to the general programme and regulations of the People's Fraternity. The programme and regulations of the District Fraternity will not come into force until they are discussed and passed by the general meeting of the Regional Fraternity and have been confirmed by the Regional Committee...*

"Jesuitical control ... are totally excluded from all three tiers of the secret organisation ... The strength of the whole society, as well as the morality, loyalty, energy and dedication of each member, is based exclusively and totally on the shared truth, sincerity and trust, and on the open fraternal control of all over each one." [cited by Michael Confino, **Daughter of a Revolutionary**, pp. 264–6]

As can be seen, while there is much in Bakunin's ideas that few anarchists would agree to, it cannot be said that it was **not** under the *"democratic control of its members."* The system of committees is hardly libertarian but neither is it the top-down dictatorship the SWP argue it was. For example, the central committee was chosen by the *"general meeting"* of the members, which also decided upon the *"programme of the society and the progress of the cause."* Its *"decision"* was *"absolute law"* and the central committee could be replaced by it. Moreover, the membership could ignore the decisions of the central committee if it *"contradict[ed] either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have participated equally in the discussion of them."* Each tier of the organisation had the same *"programme and regulations."* Anarchists today would agree that Bakunin's plan was extremely flawed. The appointment of committees from above is hardly libertarian, even given

that each tier had the same *"regulations"* and so general meetings of each Fraternity, for example. However, the SWP's summary of Bakunin's ideas, as can be seen, is flawed.

Given that no other anarchist group or federation operated in this way, it is hard to generalise from Bakunin's flawed ideas on organisation to a conclusion about anarchism. But, of course, this is what the SWP do — and such a generalisation is simply a lie. The example of the F.A.I., the SWP's other example, indicates how most anarchist organisations work in practice — namely, a decentralised federation of autonomous groups (see section 22).

Moreover, as we will indicate in the next section, the SWP have little reason to attack Bakunin's ideas. This is because Lenin had similar (although not identical) ones on the question of organising revolutionaries in Tsarist Russia and because the SWP are renown for their leadership being secretive, centralised, bureaucratic and top-down.

In summary, anarchists agree with the SWP that Bakunin's ideas are not to be recommended while pointing out that the likes of the SWP fail to provide an accurate account of their internal workings (i.e. they were more democratic than the SWP suggest), the role Bakunin saw for them in the labour movement and revolution or the historical context in which they were shaped. Moreover, we also argue that their comments against Bakunin, ironically, apply with equal force to their own party which is renown, like all Bolshevik-style parties, as being undemocratic, top-down and authoritarian. We turn to this issue in the next section.

21. Why is the SWP's attack on Bakunin's organisation ironic?

That the SWP attack Bakunin's organisational schema (see last section) is somewhat ironic. After all, the Bolshevik party system had many of the features of Bakunin's organisational plan. If Bakunin, quite rightly, should be attacked for certain aspects of these ideas, then so must Bolshevik parties like the SWP.

For example, Lenin argued in favour of centralisation and secrecy in his work **What is to be Done?**. In this work he argued as follows:

> *"The active and widespread participation of the masses will not suffer; on the contrary, it will benefit by the fact that a 'dozen' experienced revolutionaries, no less professionally trained than the police, will centralise all the secret side of the work — prepare leaflets, work out approximate plans and* ***appoint bodies of leaders*** *for each urban district, for each factory district and for each educational institution, etc. [our emphasis] (I know that exception will be taken to my 'undemocratic' views, but I shall reply to this altogether unintelligent objection later on.) The centralisation of the most secret functions in an organisation of revolutionaries will not diminish, but rather increase the extent and the quality of the activity of a large number of other organisations that are intended for wide membership and which, therefore, can be as loose and as public as possible, such as trade unions; workers' circles for self-education and the reading illegal literature, and socialist and also democratic, circles for* ***all other sections of the population****, etc., etc. We must have* ***as large a number as possible*** *of such organisations having the widest possible variety of functions, but it would be absurd and dangerous* ***to confuse them with the organisation of revolutionaries****, to erase the line of demarcation between them, to make still more the masses' already incredibly hazy appreciation of the fact that in order to 'serve' the mass movement we must have people who will de-*

> *vote themselves exclusively to Social-Democratic activities, and that such people must* ***train*** *themselves patiently and steadfastly to be professional revolutionaries."* [**The Essential Lenin**, p. 149]

And:

> *"The only serious organisational principle the active workers of our movement can accept is* ***strict secrecy, strict selection of members****, and the training of professional revolutionaries. If we possessed these qualities, something even more than 'democratism' would be guaranteed to us, namely, complete, comradely, mutual confidence among revolutionaries. And this is absolutely essential for us, because in Russia it is useless thinking that democratic control can substitute for it."* [our emphasis, **Op. Cit.**, p. 162]

Thus we have Lenin advocating *"strict secrecy, strict selection of members"* as well as a centralised party which will *"appoint bodies of leaders for each urban district, for each factory district and for each educational institution."* The parallels with Bakunin's system are clear and are predominately the result of the identical political conditions both revolutionaries experienced. While anarchists are happy to indicate and oppose the non-libertarian aspects of Bakunin's ideas, it is hard for the likes of the SWP to attack Bakunin while embracing Lenin's ideas on the party, justifying their more "un-democratic" aspects as a result of the objective conditions of Tsarism.

Similar top-down perspectives can be seen from Bolshevism in Power. The 1918 constitution of the Soviet Union argued that local soviets were to *"carry out all orders of the respective higher organs of the soviet power."* In 1919, the Bolshevik's Eighth Party Congress strengthened party discipline. As Maurice Brinton notes, the *"Congress ruled that each decision must above all be fulfilled. Only after this is an appeal to the corresponding Party organ permissible."* [**The Bolsheviks and Workers' Control**, p. 55] He quotes the resolution:

> *"The whole matter of posting of Party workers is in the hands of the Central Committee. Its decisions are binding for everyone."* [**Op. Cit.**, pp. 55–6]

This perspective was echoed in the forerunner of the SWP, the **International Socialists**. In September 1968, the Political Committee of International Socialism submitted the *"Perspectives for I.S."* Point 4 said:

> *"Branches must accept directives from the Centre, unless they fundamentally disagree with them, in which case they should try to accord with them, while demanding an open debate on the matter."* [quoted by Brinton, **Op. Cit.**, p. 55f]

The parallels with Bakunin's ideas are clear (see last section). However, it is to Bakunin's credit that he argued that while *"each regional group have to obey it [the central committee] unconditionally"* he recognised that there existed *"cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have participated equally in the discussion of them."* when this happened, *"members of the group must halt the execution of the Committee's orders and call the Committee to judgement before the general meeting ... If the general meeting is discontented with*

the Committee, it can always substitute another one for it." Thus, rather than the unquestioning obedience of the Bolshevik party, who have to obey, then complain, the members of Bakunin's group did not negate their judgement and could refuse to carry out orders.

Therefore, the SWP have a problem. On the one hand, they denounce Bakunin's ideas of a centralised, secret top-down organisation of revolutionaries. On the other, the party structure that Lenin recommends is also a tightly disciplined, centralised, top-down structure with a membership limited to those who are willing to be professional revolutionaries. They obviously want to have their cake and eat it too. Unfortunately for them, they cannot. If they attack Bakunin, they must attack Lenin, not to do so is hypocrisy.

The simple fact is that the parallels between Bakunin's and Lenin's organisational ideas cannot be understood without recognising that both revolutionaries were operating in an autocratic state under conditions of complete illegality, with a highly organised political police trying to infiltrate and destroy any attempt to change the regime. Once this is recognised, the SWP's comments can be seen to be hypocritical in the extreme. Nor can their feeble attempt to use Bakunin to generalise about all anarchist organisations be taken seriously as Bakunin's organisations were not *"major"* nor were his ideas on secret organisation and organising followed after his death. They were a product of Bakunin's experiences in Tsarist Russian and not generic to anarchism (as the SWP know fine well).

Moreover, many people leave the SWP due to its undemocratic, authoritarian and bureaucratic nature. The comments by one group of ex-SWP dissidents indicate the hypocrisy of the SWP's attack on Bakunin:

> *"The SWP is not democratic centralist but bureaucratic centralist. The leadership's control of the party is unchecked by the members. New perspectives are initiated exclusively by the central committee (CC), who then implement their perspective against all party opposition, implicit or explicit, legitimate or otherwise.*
>
> *"Once a new perspective is declared, a new cadre is selected from the top down. The CC select the organisers, who select the district and branch committees — any elections that take place are carried out on the basis of 'slates' so that it is virtually impossible for members to vote against the slate proposed by the leadership. Any members who have doubts or disagreements are written off as 'burnt out' and, depending on their reaction to this, may be marginalised within the party and even expelled.*
>
> *[...]*
>
> *"The outcome is a party whose conferences have no democratic function, but serve only to orientate party activists to carry out perspectives drawn up before the delegates even set out from their branches. At every level of the party, strategy and tactics are presented from the top down, as pre-digested instructions for action. At every level, the comrades 'below' are seen only as a passive mass to be shifted into action, rather than as a source of new initiatives."* [ISG, **Discussion Document of Ex-SWP Comrades**]

They argue that a *"democratic"* party would involve the *"[r]egular election of all party full-timers, branch and district leadership, conference delegates, etc. with the right of recall,"* which means that in the SWP appointment of full-timers, leaders and so on is the norm. They argue for the *"right of branches to propose motions to the party conference"* and for the *"right for members to*

communicate horizontally in the party, to produce and distribute their own documents." They stress the need for *"an independent Control Commission to review all disciplinary cases (independent of the leadership bodies that exercise discipline), and the right of any disciplined comrades to appeal directly to party conference."* They argue that in a democratic party *"no section of the party would have a monopoly of information"* which indicates that the SWP's leadership is essentially secretive, withholding information from the party membership. [**Op. Cit.**] As can be seen, the SWP have little grounds on which to attack Bakunin given this damning account of its internal workings.

Other dissidents argue the same point. In 1991 members in Southampton SWP asked *"When was the last time a motion or slate to conference was opposed?"* and pointed out:

> *"The CC usually stays the same or changes by one member. Most of the changes to its composition are made between Conferences. None of the CC's numerous decisions made over the preceding year are challenged or brought to account. Even the Pre-Conference bulletins contain little disagreements."*

They stress that:

"There is real debate within the SWP, but the framework for discussion is set by the Central Committee. The agenda's national events ... are set by the CC or its appointees and are never challenged ... Members can only express their views through Conference and Council to the whole party indirectly." [quoted by Trotwatch, **Carry On Recruiting!**, p. 39 and pp. 40–1]

Therefore, the SWP does not really have a leg to stand on. While Bakunin's ideas on organisation are far from perfect, the actual practice of the SWP places their comments in context. They attack Bakunin while acting in similar ways while claiming they do not. Anarchists do not hold up Bakunin's ideas on how anarchists should organise themselves as examples to be followed nor as particularly democratic (in contrast to his ideas on how the labour movement and revolution should be organised, which we **do** recommend) — as the SWP know. However, the SWP claim they are a revolutionary party and yet their organisational practices are deeply anti-democratic with a veneer of (bourgeois) democracy. The hypocrisy is clear.

Ironically, the ISG dissidents who attack the SWP for being *"bureaucratic centralist"* note that *"[a]nybody who has spent time involved in 'Leninist' organisations will have come across workers who agree with Marxist politics but refuse to join the party because they believe it to be undemocratic and authoritarian. Many draw the conclusion that Leninism itself is at fault, as every organisation that proclaims itself Leninist appears to follow the same pattern."* [**Lenin vs. the SWP: Bureaucratic Centralism Or Democratic Centralism?**] This is a common refrain with Leninists — when reality says one thing and the theory another, it must be reality that is at fault. Yes, every Leninist organisation may be bureaucratic and authoritarian but it is not the theory's fault that those who apply it are not capable of actually doing it. Such an application of scientific principles by the followers of *"scientific socialism"* is worthy of note — obviously the usual scientific method of generalising from facts to produce a theory is inapplicable when evaluating "scientific socialism" itself.

One last point. While some may argue that the obvious parallels between Bakunin's ideas and Lenin's should embarrass anarchists, most anarchists disagree. This is for four reasons.

Firstly, anarchists are **not** *"Bakuninists"* or followers of *"Bakuninism."* This means that we do not blindly follow the ideas of individuals, rather we take what we find useful and reject the flawed and non-libertarian aspects of their ideas. Therefore, if we think Bakunin's specific ideas

on how revolutionaries should organise are flawed and not libertarian then we reject them while keeping the bulk of Bakunin's useful and libertarian ideas as inspiration. We do not slavishly follow individuals or their ideas but apply critical judgement and embrace what we find useful and reject what we consider nonsense.

Secondly, anarchism did not spring fully formed out of Bakunin's (or Proudhon's or Kropotkin's or whoever's) mind. We expect individuals to make mistakes, not to be totally consistent, not totally break with their background. Bakunin clearly did not manage to break completely with his background as a political exile and an escapee from Tsarist Russia. Hence his arguments and support for secret organisation — his experiences, like Lenin's, pushed him in that direction. Moreover, we should also remember that Russia was not the only country which the anarchist and labour movements were repressed during this time. In France, after the defeat of the Paris Commune, the International was made illegal. The Spanish section of the International had been proscribed in 1872 and the central and regional authorities repressed it systematically from the summer of 1873, forcing the organisation to remain underground between 1874 and 1881. As can be seen, the SWP forget the historical context when attacking Bakunin's secrecy.

Thirdly, Bakunin did not, like Lenin, think that *"socialist consciousness"* had to be introduced into the working class. He argued that due to the *"economic struggle of labour and capital"* a worker who joined the International Workers' Association *"would inevitably discover, through the very force of circumstances and through the develop of this struggle, the political, socialist, and philosophical principles of the International."* He thought that working class people were ***"socialists without knowing it"*** as *"their most basic instinct and their social situation makes them ... earnestly and truly socialist ... They are socialist because of all the conditions of their material existence and all the needs of their being... The workers lack neither the potential for socialist aspirations nor their actuality; they lack socialist thought."* Thus the *"germs"* of *"socialist thought"* are to *"be found in the instinct of every earnest worker. The goal ... is to make the worker fully aware of what he wants."* The method? The class struggle itself — *"the International relies on the collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses."* [**The Basic Bakunin**, p. 100 and pp. 101–3]

Bakunin did not deny the importance of those who already are socialists to organise themselves and *"influence"* those who were not socialists so that in *"critical moments [they will] ... follow the International's lead."* However, this influence was **not** to inject socialist ideas into the working class but rather to aid their development by the *"propagation of its [the International] ideas and ... the organisation of its members' natural effect on the masses."* As can be seen, Bakunin's ideas on this subject differ considerably from Lenin's. [**Op. Cit.**, p. 139 and p. 140]

Unsurprisingly, the programme of the revolutionary organisation had to reflect the instincts and needs of the working population and must never be imposed on them. As he argued, the working masses were *"not a blank page on which any secret society can write whatever it wishes ... It has worked out, partly consciously, probably three-quarters unconsciously, its own programme which the secret society must get to know or guess and to which it must adapt itself."* He stresses that once the state *"is destroyed ... the people will rise ... for **their own** [ideal]"* and anyone *"who tries to foist **his own** programme on the people will be left holding the baby."* [quoted in **Daughter of a Revolutionary**, Michael Confino (ed.), p. 252, p. 254 and p. 256] As he stresses, libertarian socialist ideas come from the masses and not from outside them:

> *"In opposition to ... oppressive statist orientations ... an entirely new orientation finally arose from the depths of the proletariat itself ... It proceeds directly to the abolition of all exploitation and all political or juridical as well as governmental and bureaucratic oppression, in other words, to the abolition of all classes ... and the abolition of their last buttress, the state.*
>
> *"That is the program of social revolution."* [**Statism and Anarchy**, pp. 48–9]

Therefore, for Bakunin, the revolutionary organisation did not play the same role as for Lenin. It existed to aid the development of socialist consciousness within the working class, not inject that consciousness into a mass who cannot develop it by their own efforts. The difference is important as Lenin's theory justified the substitution of party power for workers power, the elimination of democracy and the domination of the party over the class it claimed to represent. Bakunin, recognising that socialist ideas are *"instinctive"* in the working class due to their position in society and their everyday experiences, could not do this as the organisation existed to clarify these tendencies, not create them in the first place and inject them into the masses.

Lastly, the role the organisation plays in the workers' movement and revolution are distinctly different. As Bakunin constantly stressed, the secret organisation must never take state power. As he put it, the *"main purpose and task of the organisation"* would be to *"help the people to achieve self-determination."* It would *"not threaten the liberty of the people because it is free from all official character"* and *"not placed above the people like state power."* Its programme *"consists of the fullest realisation of the liberty of the people"* and its influence is *"not contrary to the free development and self-determination of the people, or its organisation from below according to its own customs and instincts because it acts on the people only by the natural personal influence of its members who are not invested with any power."* Thus the revolutionary group would be the *"helper"* of the masses, with an *"organisation within the people itself."* [quoted by Michael Confino, **Op. Cit.**, p. 259, p. 261, p. 256 and p. 261] The revolution itself would see *"an end to all masters and to domination of every kind, and the free construction of popular life in accordance with popular needs, not from above downward, as in the state, but from below upward, by the people themselves, dispensing with all governments and parliaments — a voluntary alliance of agricultural and factory worker associations, communes, provinces, and nations; and, finally, ... universal human brotherhood triumphing on the ruins of all the states."* [**Statism and Anarchy**, p. 33]

As can be seen, instead of seeking state power, as Lenin's party desired, Bakunin's would seek *"natural influence"* rather than *"official influence."* As we argued in section J.3.7, this meant influencing the class struggle and revolution within the mass assemblies of workers' associations and communes and in their federations. Rather than seek state power and official leadership positions, as the Leninist party does, Bakunin's organisation rejected the taking of hierarchical positions in favour of working at the base of the organisation and providing a *"leadership of ideas"* rather than of people (see section J.3.6). While Bakunin's organisational structures are flawed from a libertarian perspective (although more democratic than Marxists claim) the way it works within popular organisations **is** libertarian and in stark contrast with the Leninist position which sees these bodies as stepping stones for party power.

Therefore, Bakunin rejected key Leninist ideas and so cannot be considered as a forefather of Bolshevism in spite of similar organisational suggestions. The similarity in structure is due to a similarity in political conditions in Russia and **not** similarities in political ideas. If we look at Bakunin's ideas on social revolution and the workers' movement we see a fully libertarian

perspective — of a movement from the bottom-up, based on the principles of direct action, self-management and federalism. Anarchists since his death have applied **these** ideas to the specific anarchist organisation as well, rejecting the non-libertarian elements of Bakunin's ideas which the SWP correctly (if somewhat hypocritically and dishonestly) denounce.

22. Was the F.A.I. a *"centralised and secret"* organisation that shunned *"open debate and common struggle"*?

They move onto Spanish Anarchism:

> *"The anarchist organisation inside the Spanish C.N.T., the F.A.I., was centralised and secret. A revolutionary party thrives on open debate and common struggle with wider groups of workers."*

We discuss this Marxist myth in more detail in section 3 of the appendix on *"Marxists and Spanish Anarchism"*. However a few points are worth making. The F.A.I., regardless of what the SWP assert, was not centralised. It was a federation of autonomous affinity groups. As one member put it:

> *"It was never its aim to act as a leadership or anything of the sort — to begin with they had no slogans, nor was any line laid down, let alone any adherence to any hierarchical structure ... This is what outside historians ought to grasp once and for all: that neither Durruti, nor Ascaso, nor Garcia Oliver — to name only the great C.N.T. spokesmen — issued any watchwords to the 'masses,' let alone delivered any operational plan or conspiratorial scheme to the bulk of the C.N.T. membership."*

He stresses that:

> *"Each F.A.I. group thought and acted as it deemed fit, without bothering about what the others might be thinking or deciding ... they had no ... opportunity or jurisdiction ... to foist a party line upon the grass-roots."* [Francisco Carrasquer, quoted by Stuart Christie, **We, the Anarchists!**, p. 25 and p. 28]

Murray Bookchin paints a similar picture:

> *"The F.A.I... . was more loosely jointed as an organisation than many of its admirers and critics seem to recognise. It has no bureaucratic apparatus, no membership cards or dues, and no headquarters with paid officials, secretaries, and clerks... They jealously guarded the autonomy of their affinity groups from the authority of higher organisational bodies-a state of mind hardly conducive to the development of a tightly knit, vanguard organisation.*
>
> *"The F.A.I., moreover, was not a politically homogeneous organisation which followed a fixed 'line' like the Communists and many Socialists. It had no official program by which all faistas could mechanically guide their actions."* [**The Spanish Anarchists**, p. 224]

Stuart Christie argues that the decentralised nature of the F.A.I. helped it survive the frequent repression directed against it and the C.N.T:

> *"The basic units of the F.A.I. were ... small autonomous affinity groups of anarchist militants. This cohesive quasi-cellular form of association had evolved, gradually, over the period of time it takes for relationships to be established and for mutual trust to grow. The affinity groups consisted, usually, of between three and 10 members bound by ties of friendship, and who shared well defined aims and agreed methods of struggle. Once such a group had come into existence it could, if it so wished, solicit affiliation to the F.A.I... The affinity groups were also highly resistant to police infiltration. Even if filtration did occur, or police agents did manage to set up their own 'affinity' groups it would not have been a particularly efficient means of intelligence gathering; the atomic structure of the F.A.I. meant there was no central body to provide an overview of the movement as a whole."* [**We, the Anarchists!**, p. 28]

He stresses its decentralised nature:

> *"Above all, it was not a representative body and involved* ***no*** *delegation of power either within the affinity groups or in the regional or national administrative bodies to empower those bodies to make decisions on behalf of the collectivity. Drawing on many years of revolutionary experience the F.A.I. was firmly rooted in federal principles and structured in such a way that its co-ordinating function did not deprive its constituent members of their autonomous power... . In situations where it was necessary for delegates to take decisions, e.g. at plenary meetings during times of crisis or clandestinity, those decisions were required to be ratified by the whole membership who, in effect, constituted the administration... The groups in a city or town constituted a Local Federation while the rural groups, combined, formed a District Federation. These were administered by a secretariat and a committee composed of one mandated delegate from each affinity group. The Local and District Federations were obliged to convene regular assemblies of all groups in its area... Local and District Federations constituted a Regional Federation. These, in turn, were co-ordinated by a Peninsular Committee. None of these committees, local, district, regional or national, could be described as having a bureaucratic apparatus. Nor did they wield executive power of any description. Their function was purely administrative."* [**Op. Cit.**, pp. 29–30]

Therefore, the claim that the F.A.I. was a centralised organisation is simply false. Rather it was a federation of autonomous groups, as can be seen (see also section 3 of the appendix on *"Marxists and Spanish Anarchism"* for more discussion on this topic).

Was the F.A.I. a *"secret"* organisation? When it was founded in 1927, Spain was under the dictatorship of Primo de Rivera and so it was illegal and secret by necessity. As Stuart Christie correctly notes, *"[a]s an organisation publicly committed to the overthrow of the dictatorship, the F.A.I. functioned, from 1927 to 1931, as an illegal rather than a secret organisation. From the birth of the Republic in 1931 onwards, the F.A.I. was simply an organisation which, until 1937, refused to register as an organisation as required by Republican Law."* [**We, the Anarchists!**, p. 24] Thus it was illegal rather than secret. As one anarchist militant asked, *"[i]f it was secret, how come I was*

able to attend F.A.I. meetings without ever having joined or paid dues to the 'specific' organisation?" [Francesco Carrasquer, quoted by Christie, **Op. Cit.**, p. 24]

Moreover, given the periods of repression suffered by the Spanish libertarian movement throughout its history (including being banned and forced underground) being an illegal organisation made perfect sense. The anarchist movement was made illegal a number of times. Nor did the repression end during the Republic of 1931–6. This means that for the F.A.I. to be illegal was a sensible thing to do, particularly after failed revolutionary attempts resulted in massive arrests and the closing of union halls. Again, the SWP ignore historical context and so mislead the reader.

Did the F.A.I. ignore *"open debate and common struggle."* No, of course not. The members of the F.A.I. were also members of the C.N.T. The C.N.T. was based around mass assemblies in which all members could speak. It was here that members of the F.A.I. took part in forming C.N.T. policy along with other C.N.T. members. Anarchists in the C.N.T. who were not members of the F.A.I. indicate this. Jose Borras Casacarosa notes that *"[o]ne has to recognise that the F.A.I. did not intervene in the C.N.T. from above or in an authoritarian manner as did other political parties in the unions. It did so from the base through militants ... the decisions which determined the course taken by the C.N.T. were taken under constant pressure from these militants."* Jose Campos notes that F.A.I. militants *"tended to reject control of confederal committees and only accepted them on specific occassions .. . if someone proposed a motion in assembly, the other F.A.I. members would support it, usually successfully. It was the individual standing of the faista in open assembly."* [quoted by Stuart Christie, **Op. Cit.**, p. 62] As Francisco Ascaso (friend of Durruti and an influential anarchist militant in the C.N.T. and F.A.I. in his own right) put it:

> *"There is not a single militant who as a 'F.A.I.ista' intervenes in union meetings. I work, therefore I am an exploited person. I pay my dues to the workers' union and when I intervene at union meetings I do it as someone who us exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the F.A.I. or not."* [cited by Abel Paz, **Durruti: The People Armed**, p. 137]

This meant that it was at union meetings and congresses where policies and the program for the movement were argued out:

> *"[D]elegates, whether or not they were members of the F.A.I., were presenting resolutions adopted by their unions at open membership meetings. Actions taken at the congress had to be reported back to their unions at open meetings, and given the degree of union education among the members, it was impossible for delegates to support personal, non-representative positions."* [Juan Gomez Casas, **Anarchist Organisation: The History of the F.A.I.**, p. 121]

As can be seen, open debate with their fellow workers in the union assemblies. In this they followed Bakunin's arguments that anarchist organisation *"rules out any idea of dictatorship and of a controlling and directive power"* and it *"will promote the Revolution only through the* ***natural but never official influence*** *of all members of the Alliance."* This influence would be exerted in the union assemblies, as the union members *"could only defend their rights and their autonomy in*

only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees more than these popular assemblies… In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed…" This would ensure that the assemblies had *"real autonomy"* and actually were the real power in the organisation. Any committees would be made up of *"delegates who conscientiously fulfilled all their obligations to their respective sections as stipulated in the statues," "reporting regularly to the membership the proposals made and how they voted"* and *"asking for further instructions (plus instant recall of unsatisfactory delegates)"* [**Bakunin on Anarchism**, p. 154, p. 387 and p. 247]

The anarchist revolution would be organised in an identical fashion, and, in Bakunin's words, *"must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations … organised from the bottom upwards by means of revolutionary delegations … [who] will set out to administer public services, not to rule over peoples."* [**Michael Bakunin: Selected Writings**, p. 172]

As can be seen, the F.A.I. (like all anarchists) influenced the class struggle and revolution via their natural influence in winning debates with their fellow workers in union assemblies. They did not seek power but rather influence for their ideas. To claim otherwise, to claim that anarchists reject open debate with their fellow workers is false. Instead of seeking to power — and so limiting debates to during elections — anarchists argue that people must control their own organisations (and so the revolution) directly and all the time. This means, as can be seen, we encourage open debate and discussion far more than those, like the SWP, who seek centralised political power for themselves. In such a system, the only people who debate regularly are the members of the government — everyone else is just a voter and an order taker.

23. Do anarchists wait for *"spontaneous upsurges by workers"*?

After lying about the F.A.I., they move on to lying about anarchist theory:

> *"Anarchists instead look to spontaneous upsurges by workers. In the struggle anarchists will declare themselves and urge the workers on. They hope this will lead to the toppling of capitalism. History is full of mass struggles which have been able to win significant gains, but which have not had a clear leadership that can carry the struggle over to victory against capitalism."*

Nothing could be further from the truth. Their own article exposes their lies. They mention the C.N.T., which was organised in an anarchist way and in which anarchists were heavily involved. Anarchists from Bakunin onward have all argued in favour of organising as anarchists as well as organising workers and fighting for reforms in the here and now. For Bakunin, *"the natural organisation of the masses … is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association."* [**The Basic Bakunin**, p. 139] He stressed the importance of anarchists being involved in unions as well as union struggle for reforms by direct action:

> *"What policy should the International [Workers' Association] follow during th[e] somewhat extended time period that separates us from this terrible social revolution … the International will give labour unrest in all countries an essentially economic character,*

with the aim of reducing working hours and increasing salary, by means of the association of the working masses ... It will [also] propagandise its principles ..." [**Op. Cit.**, p. 109]

Indeed, he saw the labour movement as the means to create a socialist society:

> *"The masses are a force, or at least the essential elements of a force. What do they lack? They lack two things which up till now constituted the power of all government: organisation and knowledge.*
>
> *"The organisation of the International [Workers' Association], having for its objective not the creation of new despotisms but the uprooting of all domination, will take on an essentially different character from the organisation of the State... But what is the organisation of the masses? ... It is the organisation by professions and trades ...*
>
> *"The organisation of the trade sections and their representation in the Chambers of Labour ... bear in themselves the living seeds of the new society which is to replace the old world. They are creating not only the ideas, but also the facts of the future itself."* [**Bakunin on Anarchism**, pp. 254–5]

All anarchists have stressed the importance of working in and outside the labour movement to gain influence for anarchist ideas of direct action, solidarity, self-management and federalism in the here and now, rather than waiting for a *"spontaneous uprising"* to occur. As Kropotkin argued, *"Revolutionary Anarchist Communist propaganda with Labour Unions had always been a favourite mode of action in the Federalist [or libertarian] ... section of the International Working Men's Association."* [**Act For Yourselves**, p. 119] Malatesta makes the same point:

> *"anarchists, convinced of the validity of our programme, must strive to acquire overwhelming influence in order to draw the movement towards the realisation of our ideas. But such influence must be won by doing more and better than others, and will only be useful if won in that way.*
>
> *"Today we must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement to prevent it being limited to and corrupted by the exclusive pursuit of small improvements compatible with the capitalist system; and we must act in such a way that it contributes to preparing for a complete social transformation. We must work with the unorganised, and perhaps unorganisable, masses to awaken a spirit of revolt and the desire and hope for a free and happy life. We must initiate and support all movements that tend to weaken the forces of the State and of capitalism and to raise the mental level and material conditions of the workers. We must, in short, prepare, and prepare ourselves, morally and materially, for the revolutionary act which will open the way to the future."* [**The Anarchist Revolution**, p. 109]

Therefore, as can be seen, the SWP's assertions are totally at odds with the actual ideas of anarchists, as would be known by anyone with even a basic understanding of anarchist theory. After all, if spontaneous uprisings were sufficient in themselves we would be living in an anarchist society. As Bakunin argued *"if instinct alone had been sufficient for the liberation of peoples,*

they would have long since freed themselves." [**Bakunin on Anarchism**, p. 254] This explains why anarchists organise **as anarchists** in groups and federations to influence the class struggle. We are aware of the need for revolutionaries to organise to influence the class struggle, spread anarchist ideas and tactics and present the case for revolutionary change. An anarchist society will not come about by accident, it must be consciously desired and created by the mass of the population. As Kropotkin argued:

> *"Communist organisations ... must be the work of all, a natural growth, a product of the constructive genius of the great mass. Communism cannot be imposed from above; it could not live even for a few months if the constant and daily co-operation of all did not uphold it. It must be free."* [**Kropotkin's Revolutionary Pamphlets**, p. 140]

So, clearly, anarchists see the importance of working class organisation and struggle in the here and now. Anarchists are active in industrial disputes and (as the SWP note) the anti-globalisation movement and were heavily involved in the anti-poll-tax and anti-Criminal Justice Act struggles in the UK, for example. The role of anarchists is not to wait for *"upsurges"* but rather to encourage them by spreading our ideas and encouraging workers to organise and fight their bosses and the state. It is for this reason anarchists form groups and federations, to influence workers today rather than waiting for a *"spontaneous uprising"* to occur. Moreover, it is quite ironic that the SWP say that anarchists wait for upsurges before declaring themselves to the masses. After all, that is what the SWP do. They turn up at picket lines and try and sell their paper and party to the strikers. Obviously, if anarchist do this, it is bad, if the SWP do it, then it is *"revolutionary."*

Therefore, rather than believing in or waiting for *"spontaneous upsurges"* anarchists, like the SWP, spread their message, try and convince people to become revolutionaries. That is why there are numerous anarchist federations across the world, involved in numerous struggles and working class organisations, with magazines, papers and leaflets being produced and distributed. Anarchists stress the importance of winning people over to anarchist ideas and of giving a *"lead"* in struggle rather than as a *"leadership"* (which implies a hierarchical relationship between the mass of people and a group of leaders). To state otherwise, to argue we wait for spontaneous uprisings, is simply a lie.

Anarchist organisations see themselves in the role of aiders, not leaders. As Voline argued, the politically aware minority *"should intervene. But, in every place and under all circumstances, ... [they] should freely participate in the common work, **as true collaborators, not as dictators**. It is necessary that they especially create an example, and employ themselves... without dominating, subjugating, or oppressing anyone... Accordingly to the libertarian thesis, it is the labouring masses themselves, who, by means of the various class organisations, factory committees, industrial and agricultural unions, co-operatives, et cetera, federated... should apply themselves everywhere, to solving the problems of waging the Revolution... As for the 'elite' [i.e. the politically aware], their role, according to the libertarians, is to **help** the masses, enlighten them, teach them, give them necessary advice, impel them to take initiative, provide them with an example, and support them in their action — **but not to direct them governmentally**."* [**The Unknown Revolution**, pp. 177–8]

Sadly, Leninists like the SWP confuse giving a led with taking power themselves. They seek to take over positions of responsibility in a movement and turn them into positions of power which they can use to tell the others what to do. Instead of being the servants of the organisation, they

become its masters. For this reason anarchist organisations try to influence movements from below, in the mass assemblies which make it up, rather than seek power.

24. Do anarchists blame workers *"for being insufficiently revolutionary"*?

After creating a straw man about anarchist theory, they draw some thoughts from it:

> *"When struggles have not spontaneously broken capitalism, anarchists have tended to end up blaming workers for being insufficiently revolutionary. So 19th century French anarchist Pierre-Joseph Proudhon started off talking of his 'love of the people' but ended up saying he 'despised' humanity because they had not overthrown capitalism."*

Strange that they picked Proudhon as he was not a revolutionary anarchist. Rather he favoured the reform of capitalism via mutual credit and workers' co-operatives and rejected the idea of "uprisings" and/or revolution (spontaneous or not). Anyone with even a limited knowledge of Proudhon's work would know this. In addition, Proudhon's last book (**The Political Capacity of the Working Classes**), finished on his death bed, was an attempt to influence the workers' movement towards his ideas of mutualism and federalism. Hardly to be expected from someone who "despised" humanity for not overthrowing capitalism. As examples go, the SWP is clearly clutching at straws.

Moreover, as we argued in the last section, revolutionary anarchists like Bakunin, Malatesta, Kropotkin, Goldman, Berkman, Rocker, etc., all placed a great deal of time and energy in trying to work within and influence workers' struggles and the labour movement in the here and now. They did not think that workers struggles would necessarily "spontaneously" break capitalism. While recognising, as we indicated in section 10, that the class struggle changed the ideas of those involved, they recognised the need for anarchist groups, papers, pamphlets to influence the class struggle in a libertarian way and towards a revolution. They were well aware that "spontaneous" uprisings occurred but were not enough in themselves — anarchists would need to organise as anarchists to influence the class struggle, particularly when "uprisings" were not occurring and the daily struggle between governed and governor, exploited and exploiter was taking less spectacular forms (hence anarchist support and involvement in the labour movement and unions like the C.N.T.).

The SWP then move onto an even greater factual error. They claim that the *"biggest anarchist groups today, the 'autonomists' in Europe, treat workers who have not fully broken with capitalist ideas as an enemy rather than a potential ally."* Unfortunately for them, the "autonomists" are not generally anarchists (the name should have given the SWP some clue, as anarchists are quite proud of their name and generally use it, or libertarian, to describe themselves). Rather the "autonomists" are non-Leninist Marxists whose ideas (and name) originally came from the Marxist left in Italy during the 1960s. It is also probable that the various European anarchist federations (such as the French and Italian) and anarcho-syndicalist unions are bigger than the autonomists. However, without any examples of the groups meant it is hard to evaluate the accuracy of the SWP's claims as regards their size or opinions. Suffice it to say, the leading theorists of "autonomism" such as Toni Negri and Harry Cleaver do not express the opinions the SWP claim "autonomists" have.

25. Why does the history of centralised parties refute the SWP's arguments?

The SWP admit that their analysis leaves much to be desired by mentioning that *"[m]any anarchists understand the way that capitalism works and organise to change the world."* In other words, if an anarchist points out the flaws in their argument or a reader knows an anarchist who does not match the SWP's distorted picture, then the SWP can say that they are part of the *"many."* Extremely handy, if dishonest, comment to make.

The SWP continue by arguing that our *"rejection of centralisation means that at critical moments their intervention in the struggle is fatally flawed."* This is ironic. Given that their example of the benefits of centralisation showed the flaws in that method of organising, their conclusion seems without basis. Moreover, as argued above, centralisation is the key means by which minorities govern majorities. It is a tool used to impose minority rule — the rule of the *"revolutionary"* party over the masses. As they argue:

> *"The working class needs what anarchism rejects — a clear and determined revolutionary party which can lead the working class as a whole, and is not afraid to overthrow capitalism and set up a workers' state."*

Yes, indeed. The examples of the current anti-capitalist movement, the poll tax revolt and the 1917 February Russian revolution indicate well that a revolutionary party works. If such a party had led the working class in each of these events, they would not have occurred. The workers would have done nothing, as the Bolsheviks desired. People would have paid their poll tax waiting for the trade union bureaucrats to act. The anti-globalisation demonstrations would not have happened as the "vanguard" party did not recognise their importance.

The Russian Revolution quickly resulted in the marginalisation of the workers' councils by the centralised, *"clear and determined"* Bolsheviks who turned them into rubber stamps of their government, it suggests that the politics of the SWP leave much to be desired. Given that the one "success" of Leninist politics — the Russian Revolution of October 1917 — created state capitalism, with workers' soviets and factory committees undermined in favour of party power (**before**, we must stress, the start of the civil war — what most Leninists blame the rise of Stalinism on) we may suggest that **anarchist** ideas have been proven correct again and again. After all, the validity of a theory surely lies in its ability to **explain** and **predict** events. Anarchists, for example, predicted both the degeneration of both Social Democracy and the Russian revolution, the two main examples of Marxism in action, and presented coherent reasons **why** this would happen. Marxists have had to generate theories to explain these events **after** they have occurred, theories which conveniently ignore the role of Marxist politics in historical events.

This, we suggest, provides the explanation of why they have spent so much time re-writing history and smearing anarchism. Not being able to discuss our ideas honesty — for that would expose the authoritarian ideas of Bolshevism and its role in the degeneration of the Russian Revolution — the SWP invent a straw man they call anarchism and beat him to death. Unfortunately for them, anarchists are still around and can expose their lies for what they are.

Reply to errors and distortions in John Fisher's *"Why we must further Marxism and not Anarchism"*

On the Trotskyist "New Youth" webpage there is an article entitled "Why we must further Marxism and not Anarchism" by John Fisher. This article contains numerous distortions of anarchist ideas and positions. Indeed, he makes so many basic errors that only two possible explanations are possible: either he knows nothing about anarchism or he does and is consciously lying.

We will compare his assertions to what anarchist theory actually argues in order to show that this is the case.

1. Why should *"the so-called Anarchistic youth of today"* be concerned that Trotskyists consider them allies?

Fisher starts his diatribe against anarchism with some thoughts on the radical youth active in the anti-globalisation demonstrations and movements:

> *"The so-called Anarchistic youth of today, year 2001, for the most part simply use the term 'Anarchist' as an indication of not wanting to go along with the 'system' in not wanting to assimilate, which is a giant leap forward on their part considering all their lives they've constantly been bombarded with the huge American Corporate propaganda machine. For this achievement, they are already more our ally than our enemy."*

It makes you wonder how Fisher knows this. Has there been a poll of "anarchistic youth" recently? It would be interesting to discover the empirical basis for this statement. Given the quality of the rest of the article, we can hazard a guess and say that these particular facts are just assertions and express wishful thinking rather than any sort of reality.

Needless to say, these *"anarchistic youth"* had better watch out. We all know what happens to the *"ally"* of the vanguard party once that party takes power. Anarchists remember the fate of our comrades when Lenin and Trotsky ruled the "proletarian" state.

The Russian anarchists were at the forefront of the struggle between the February and October revolutions in 1917. As socialist historian Samuel Farber notes, the anarchists *"had actually been an unnamed coalition partner of the Bolsheviks in the October Revolution."* [**Before Stalinism**, p. 126] The anarchists were the "allies" of the Bolsheviks before they took power as both shared the goals of abolishing the provisional government and for a social revolution which would end capitalism.

This changed once the Bolsheviks had taken power. On the night of April 11th, 1918, the Cheka surrounded 26 Anarchist clubs in Moscow, in the insuring fighting Anarchists suffered 40 casualties and 500 were taken prisoner. The Petrograd anarchists protested this attack:

> *"The Bolsheviks have lost their senses. They have betrayed the proletariat and attacked the anarchists. They have joined ... the counter-revolutionary bourgeoisie. They have declared war on revolutionary anarchism... . We regarded you [Bolsheviks] as our revolutionary brothers. But you have proved to be traitors. You are Cains — you have killed your brothers ... There can be no peace with the traitors to the working class. The executioners of the revolution wish to become the executioners of anarchism."* [quoted by Paul Avrich, **The Anarchists in the Russian Revolution**, p. 113]

Fifteen days later similar raids were carried out in Petrograd. This repression, we must note, took place months before the outbreak of the Russian Civil War (in late May 1918). In May of that year, leading anarchist periodicals (including **Burevestnik**, **Anarkhia** and **Golos Truda**) were closed down by the government. The repression continued during the war and afterwards. Many imprisoned anarchists were deported from the "workers' state" in 1921 after they went on hunger strike and their plight was raised by libertarian delegates to the founding congress of the Red International of Labour Unions held that year.

Unsurprisingly, the Bolsheviks denied they held anarchists. French anarchist Gaston Leval accounted how Lenin had *"reiterated the charges made by Dzerzhinsky [founder of the Bolsheviks secret police, the Cheka] ... Those in prison were not true anarchists nor idealists — just bandits abusing our good intentions."* Leval, having gathered the facts, indicated this was not true, making Lenin backtrack. [**No Gods, No Masters**, vol. 2, p. 213]

Unsurprisingly, when the libertarian delegates to the congress reported back on conditions in Russia to their unions, they withdrew from the Trade-Union International.

In the Ukraine, the anarchist influenced Makhnovist movement also became an "ally" with the Bolsheviks in the common struggle against the counter-revolutionary White armies. The Bolsheviks betrayed their allies each time they formed an alliance.

The first alliance was in March 1919 during the struggle against Denikin, In May of that year, two Cheka agents sent to assassinate Makhno (the main leader of the movement) were caught and executed. The following month Trotsky, the commander of the Red Army, outlawed the Makhnovists and Communist troops attacked their headquarters at Gulyai-Polye.

Denikin's massive attack on Moscow in September 1919 saw the shaky alliance resumed in the face of a greater threat. Once Denikin had been defeated, the Bolsheviks ordered the Makhnovists to the Polish front. This was obviously designed to draw them away from their home territory, so leaving it defenceless against Bolshevik rule. The Makhnovists refused and Trotsky, again, outlawed and attacked them.

Hostilities were again broken off when the White General Wrangel launched a major offensive in the summer of 1920. Again the Bolsheviks signed a pact with Makhno. This promised amnesty for all anarchists in Bolshevik prisons, freedom for anarchist propaganda, free participation to the Soviets and *"in the region where the Makhnovist Army is operating, the population of workers and peasants will create its own institutions of economic and political self-management."* [quoted by Peter Arshinov, **The History of the Makhnovist Movement**, pp. 177–9] Once Wrangel had been defeated, the Bolsheviks ripped up the agreement and turned their forces, once again, against their "ally" and finally drove them out of the Soviet Union in 1921.

These events should be remembered when the authoritarian left argue that we aim for the same thing and are allies.

2. What else do people learn about when they discover anarchism is not *"utter rebellion"*?

Fisher continues:

> *"In some cases, 'Anarchist' youth begin to try to learn about what Anarchism truly is instead of seeing it merely as utter rebellion. They learn Anarchism is a form of Socialism, they learn they have much in common with Marxists, they learn the state*

must be smashed, they learn the state is a tool of suppression used by one class against another."

They learn much more than this. They learn, for example, about the history of Marxism and how anarchism differs from it.

They learn, for example, about the history of Marxist Social Democracy. Many forget that Social Democracy was the first major Marxist movement. It was formed initially in Germany in 1875 when the followers of Lassalle and Marx united to form the Social Democratic Party of Germany (SPD). This party followed Marx and Engels recommendations that workers should form a distinct political party and conquer political power. It rejected the anarchist argument that workers should *"abstain from politics"* (i.e. elections) and instead, to use an expression from Marx's preamble of the French Workers' Party, turn the franchise *"from a means of deception ... into an instrument of emancipation."* [**Marx and Engels Reader**, p. 566]

Rather than confirm Marx's politics, Social Democracy confirmed Bakunin's. It quickly degenerated into reformism. As Bakunin predicted, when *"the workers ... send common workers ... to Legislative Assemblies ... The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois ... For men do not make their situations; on the contrary, men are made by them."* [**The Basic Bakunin**, p. 108]

Form the early 1890s, Social Democracy was racked by arguments between reformists (the "revisionist" wing) and revolutionaries. The former wanted to adapt the party and its rhetoric to what it was doing. As one of the most distinguished historians of this period put it, the *"distinction between the contenders remained largely a subjective one, a difference of ideas in the evaluation of reality rather than a difference in the realm of action."* [C. Schorske, **German Social Democracy**, p. 38]

In 1914, the majority of social democrats in Germany and across the world supported their state in the imperialist slaughter of the First World. This disgraceful end would not have surprised Bakunin.

Anarchists also learn about the Russian Revolution. They learn how Lenin and Trotsky eliminated democracy in the armed forces, in the workplace and in the soviets.

They learn, for example, that the Bolsheviks had disbanded soviets which had been elected with non-Bolshevik majorities in the spring and summer of 1918. [Samuel Farber, ****Op. Cit.****, p. 24]

They learn that at the end of March, 1918, Trotsky reported to the Communist Party that *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree"* in the Red Army. [quoted by M. Brinton, **The Bolsheviks and Workers' Control**, pp. 37–8]

They learn that Lenin opposed workers' management of production. Before the October Revolution he saw "workers' control" purely in terms of the *"universal, all-embracing workers' control over the capitalists."* [**Will the Bolsheviks Maintain Power?**, p. 52] He did not see it in terms of workers' management of production itself (i.e. the abolition of wage labour) via federations of factory committees. Anarchists and the workers' factory committees did. *"On three occasions in the first months of Soviet power, the [factory] committee leaders sought to bring their model into being. At each point the party leadership overruled them. The result was to vest both managerial*

and *control powers in organs of the state which were subordinate to the central authorities, and formed by them."* [Thomas F. Remington, **Building Socialism in Bolshevik Russia**, p. 38]

Lenin himself quickly supported *"one-man management"* invested with *"dictatorial powers"* after *"control over the capitalists"* failed. By 1920, Trotsky was advocating the *"militarisation of labour"* and implemented his ideas on the railway workers.

They learn that Leninism is just another form of capitalism (state capitalism). As Lenin put it, socialism *"is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly* ***made to benefit the whole people****; by this token it* ***ceases*** *to be capitalist monopoly."* [**The Threatening Catastrophe and how to avoid it**, p. 37]

They learn that Lenin and Trotsky argued for party dictatorship and centralised, top-down rule (see section 4).

They also learn that this should not come as a surprise. Anarchism argues that the state is a tool to allow minorities to rule and has been designed to ensure minority power. They learn that it cannot, by its very nature, be a tool for liberation — no matter who is in charge of it.

3. What do anarchists think will *"replace the smashed state machine"*?

Fisher now makes a common Marxist assertion. He states:

> *"But what they do not learn, and never will from an Anarchist perspective is what is to replace the smashed state machine?"*

In reality, if you read anarchist thinkers you will soon discover what anarchists think will "replace" the state: namely the various working class organisations created by the class struggle and revolution. In the words of Kropotkin, the *"elaboration of new social forms can only be the collective work of the masses."* [**Words of a Rebel**, p. 175] He stressed that *"[to] make a revolution it is not ... enough that there should be ... [popular] risings ... It is necessary that after the risings there should be something new in the institutions [that make up society], which would permit new forms of life to be elaborated and established."* [**The Great French Revolution**, vol. 1, p. 200]

Thus the framework of a free society would be created by the process of the revolution itself. As such, as Kropotkin put it, *"[d]uring a revolution new forms of life will always germinate on the ruins of the old forms ... It is impossible to legislate for the future. All we can do is vaguely guess its essential tendencies and clear the road for it."* [**Evolution and Environment**, pp. 101–2] So while the specific forms these organisations would take cannot be predicted, their general nature can be.

So what is the general nature of these new organisations? Anarchists have consistently argued that the state would be replaced by a free federation of workers' associations and communes, self-managed and organised from the bottom-up. In Malatesta's words, anarchy is the *"free organisation from below upwards, from the simple to the complex, through free agreement and the federation of associations of production and consumption."* In particular, he argued anarchists aim to *"push the workers to take possession of the factories, to federate among themselves and work for the community"* while the peasants *"should take over the land and produced usurped by the landlords, and come to an agreement with the industrial workers."* [**Life and Ideas**, p. 147 and p. 165]

This vision of revolution followed Bakunin's:

> *"the federative alliance of all working men's associations ... [will] constitute the Commune ... [the] Communal Council [will be] composed of ... delegates ... vested with plenary but accountable and removable mandates... all provinces, communes and associations ... by first reorganising on revolutionary lines .... [will] constitute the federation of insurgent associations, communes and provinces ... [and] organise a revolutionary force capable defeating reaction ... [and for] self-defence ... [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation..."* [**Michael Bakunin: Selected Writings**, pp. 170–2]

Similarly, Proudhon argued federations of workers associations and communes to replace the state. While seeing such activity as essentially reformist in nature, he saw the germs of anarchy as being the result of *"generating from the bowels of the people, from the depths of labour, a greater authority, a more potent fact, which shall envelop capital and the State and subjugate them"* as *"it is of no use to change the holders of power or introduce some variation into its workings: an agricultural and industrial combination must be found by means of which power, today the ruler of society, shall become its slave."* [**System of Economical Contradictions**, p. 399 and p. 398] What, decades later, Proudhon called an *"agro-industrial federation"* in his **Principle of Federation**.

Kropotkin, unsurprisingly enough, had similar ideas. He saw the revolution as the *"expropriation of the whole of social wealth"* by the workers, who *"will organise the workshops so that they continue production"* once *"the governments are swept out by the people."* The *"coming social revolution"* would see *"the complete abolition of States, and reorganisation from the simple to the complex through the free federation of the popular forces of producers and consumers,"* the *"federation of workers' corporations and groups of consumers."* The *"Commune will know that it must break the State and replace it by the Federation"* (which is *"freely accepted by itself as well as the other communes"*). [**Words of a Rebel**, p. 99, p. 91, p. 92 and p. 83]

Thus *"independent Communes for the territorial organisation, and of federations of Trade Unions [i.e. workplace associations] for the organisation of men [and women] in accordance with their different functions, gave a* ***concrete*** *conception of society regenerated by a social revolution."* [Peter Kropotkin, **Evolution and Environment**, p. 79]

In his classic history of the French Revolution he pointed to *"the popular Commune"* as an example of the *"something new"* required to turn an uprising into a revolution. He argued that *"the Revolution began by creating the Commune ... and through this institution it gained ... immense power."* He stressed that it was *"by means of the 'districts' [of the Communes] that ... the masses, accustoming themselves to act without receiving orders from the national representatives, were practising what was to be described later as Direct Self-Government."* Such a system did not imply isolation, for while *"the districts strove to maintain their own independence"* they also *"sought for unity of action, not in subjection to a Central Committee, but in a federative union."* The Commune *"was thus made* ***from below upward****, by the federation of the district organisations; it spring up in a revolutionary way, from popular initiative."* [**The Great French Revolution**, vol. 1, p. 200 and p. 203]

During the 1905 and 1917 revolutions, Kropotkin expressed his support for the soviets created by the workers in struggle. He argued that anarchists should *"enter the Soviets, but certainly only as far as the Soviets are organs of the struggle against the bourgeoisie and the state, and not organs*

of authority." [quoted by Graham Purchase, **Evolution and Revolution**, p. 30] After the 1917 revolution, he re-iterated this point, arguing that *"idea of soviets ... of councils of workers and peasants ... controlling the economic and political life of the country is a great idea. All the more so, since it necessarily follows that these councils should be composed of all who take part in the production of natural wealth by their own efforts."* [**Kropotkin's Revolutionary Pamphlets**, p. 254]

Therefore, Fisher's comments are totally untrue. Anarchists have been pretty clear on this issue from Proudhon onwards (see section I.2.3 for a further discussion of this issue).

4. What did Trotsky and Lenin think must replace the bourgeois state?

Fisher continues his inaccurate attack:

> "What we as Marxists explain is what must replace the smashed bourgeois state machine.
>
> "Engels explains that the state is a 'special coercive force'. So what must come after the bourgeoisie is overthrown to keep it down? As Lenin explains in the State and Revolution: the bourgeois state 'must be replaced by a "special coercive force" for the suppression of the bourgeois by the proletariat (the dictatorship of the proletariat)' (pg 397 vol. 25 collected works) that is workers' democracy."

There are numerous issues here. Firstly, of course, is the question of how to define the state. Fisher implicitly assumes that anarchists and Marxists share the same definition of what marks a "state." Secondly, there is the question of whether quoting Lenin's **State and Revolution** without relating it to Bolshevik practice is very convincing. Thirdly, there is the question of the defence of the revolution. We will discuss the second question here, the first in the next section and the third in section 6.

There is a well-known difference between Lenin's work **The State and Revolution** and actual Bolshevik practice. In the former, Lenin promised the widest democracy, although he also argued that *"[w]e cannot imagine democracy, not even proletarian democracy, without representative institutions."* [*"The State and Revolution"*, **Essential Works of Lenin**, p. 306] Clearly, he saw "democracy" in the normal, bourgeois, sense of electing a government who will make the decisions for the electors. Indeed, the *"dictatorship of the proletariat"* is described as *"the organisation of the vanguard of the oppressed as the ruling class."* [**Op. Cit.**, p. 337] This *"vanguard"* is the party:

> *"By educating the workers' party, Marxism educates the vanguard of the proletariat which is capable of assuming power and* ***of leading the whole people*** *to Socialism, of directing and organising the new order, of being the teacher, the guide, the leader of all the toiling and exploited in the task of building up their social life without the bourgeoisie and against the bourgeoisie."* [**Op. Cit.**, p. 288]

So the vanguard of the oppressed would become the *"ruling class"*, **not** the oppressed. This means that *"workers' democracy"* is simply reduced to meaning the majority designates its rulers but does not rule itself. As such, the "workers' state" is just the same as any other state (see next section).

Thus, before taking power Lenin argued for party power, not workers' power. The workers can elect representatives who govern on their behalf, but they do not actually manage society themselves. This is the key contradiction for Bolshevism — it confuses workers' power with party power.

Post-October, the ideas of Lenin and Trotsky changed. If their works are consulted, it is soon discovered what they thought should "replace" the bourgeois state: party dictatorship.

In the words of Lenin (from 1920):

> *"In the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers ... What happens is that the Party, shall we say, absorbs the vanguard of the proletariat, and this vanguard exercises the dictatorship of the proletariat."* [**Collected Works**, vol. 21, p. 20]

He stressed that this was an inevitable aspect of revolution, applicable in all countries:

> *"the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... Such is the basic mechanism of the dictatorship of the dictatorship of the proletariat, and the essentials of transitions from capitalism to communism ... for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation."* [**Op. Cit.**, vol. 32, p. 21]

Trotsky agreed with this lesson and argued it to the end of his life:

> *"The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history... The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution .. . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses."* [**Writings 1936–37**, pp. 513–4]

Lenin and Trotsky are clearly explaining the need for party dictatorship over the working class. This was seen as a **general** lesson of the Russian Revolution. How many Marxists "explain" this to anarchists?

Clearly, then, Fisher is not being totally honest when he argues that Trotskyism is based on "workers' democracy." Lenin, for example, argued that *"Marxism teaches — and this tenet has*

not only been formally endorsed by the whole of the Communist International in the decisions of the second Congress ... . but has also been confirmed in practice by our revolution — that only the political party of the working class, i.e. the Communist Party, is capable of uniting, training and organising a vanguard of the proletariat and of the whole working people that alone will be capable of withstanding the inevitable petty-bourgeois vacillations of this mass." [**Op. Cit.**, vol. 32, p. 246]

Lenin is, of course, rejecting what democracy is all about, namely the right and duty of representative bodies to carry out the wishes of the electors (i.e. their "vacillations"). Instead of workers' democracy, he is clearly arguing for the right of the party to ignore it and impose its own wishes on the working class.

Trotsky argued along the same lines (again in 1921):

> *"They [the dissent Bolsheviks of the Workers' Opposition] have placed the workers' right to elect representatives above the Party. As if the Party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the worker's democracy!"*

He spoke of the *"revolutionary historic birthright of the Party"* and that it *"is obliged to maintain its dictatorship .... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every given moment on the formal principle of a workers' democracy."* [quoted by M. Brinton, **The Bolsheviks and Workers' Control**, p. 78]

Needless to say, they did not explain how these lessons and arguments are compatible with Lenin's **State and Revolution** where he had argued that *"[a]ll officials, without exception,"* must be *"elected and subject to recall **at any time.**"* [**The Essential Lenin**, p. 302] If they **are** subject to election and recall at any time, then they will reflect the *"passing moods"* (the *"vacillations"*) of the workers' democracy. Therefore, to combat this, soviet democracy must be replaced by party dictatorship and neither Lenin nor Trotsky were shy in both applying and arguing this position.

It is a shame, then, for Fisher's argument that both Lenin and Trotsky also explained why party dictatorship was more important than workers' democracy. It is doubly harmful for his argument as both argued that this "lesson" was of a **general** nature and applicable for all revolutions.

It is also a shame for Fisher's argument that the Leninists, once in power, overthrew every soviet that was elected with a non-Bolshevik majority (see section 6 of the appendix on "What happened during the Russian Revolution?"). They also repressed those who demanded real workers' democracy (as, for example, in Kronstadt in 1921 — see the appendix on "What was the Kronstadt Rebellion?" — or during the numerous strikes under Lenin's rule — see sections 3 and 5 of the appendix on "What caused the degeneration of the Russian Revolution?").

Clearly, Fisher's account of Trotskyism, like his account of anarchism, leaves a lot to be desired.

5. Is the "proletarian 'state'" really a new kind of state?

Fisher, after keeping his readers ignorant of Lenin and Trotsky **real** position on workers' democracy, argues that:

> *"The proletariat 'state' is no longer a state in the proper sense of the word, Lenin explains, because it is no longer the minority suppressing the majority, but the vast majority suppressing a tiny minority! The Proletariat suppressing the Bourgeoisie."*

If it is not a state *"in the proper sense of the word"* then why use the term state at all? Marxists argue because its function remains the same — namely the suppression of one class by another. However, every state that has ever existed has been the organ by which a **minority** ruling class suppresses the majority. As such, the Marxist definition is a-historic in the extreme and extracts a metaphysical essence of the state rather than producing a definition based on empirical evidence.

In order to show the fallacy of Fisher's argument, it is necessary to explain what anarchists think the state is.

The assumption underlying Fisher's argument is that anarchists and Marxists share identical definitions of what a state is. This is not true. Marxists, as Fisher notes, think of a state as simply as an instrument of class rule and so concentrate solely on this function. Anarchists disagree. While we agree that the main function of the state is to defend class society, we also stress the structure of the state has evolved to ensure that role. In the words of Rudolf Rocker:

> *"[S]ocial institutions ... do not arise arbitrarily, but are called into being by special needs to serve definite purposes ... The newly arisen possessing classes had need of a political instrument of power to maintain their economic and social privileges over the masses of their own people ... Thus arose the appropriate social conditions for the evolution of the modern state, as the organ of political power of privileged castes and classes for the forcible subjugation and oppression of the non-possessing classes ... Its external forms have altered in the course of its historical development, but its functions have always been the same ... And just as the functions of the bodily organs of ... animals cannot be arbitrarily altered, so that, for example, one cannot at will hear with his eyes and see with his ears, so also one cannot at pleasure transform an organ of social oppression into an instrument for the liberation of the oppressed. The state can only be what it is: the defender of mass-exploitation and social privileges, and creator of privileged classes."* [**Anarcho-Syndicalism**, p. 20]

This means that the structure of the state has evolved to ensure its function. Organ and role are interwoven. Keep one and the other will develop. And what is the structure (or organ) of the state? For anarchists, the state means *"the sum total of the political, legislative, judiciary, military and financial institutions through which the management of their own affairs ... are taken away from the people and entrusted to others who ...are vested with the powers to make the laws for everything and everybody, and to oblige the people to observe them, if need be, by the use of collective force."* In summary, it *"means the delegation of power, that is the abdication of initiative and sovereignty of all into the hands of a few."* [**Anarchy**, p. 13 and p. 40]

This structure has not evolved by chance. It is required by its function as the defender of minority class power. As Kropotkin stressed, the bourgeois needed the state:

> *"To attack the central power, to strip it of its prerogatives, to decentralise, to dissolve authority, would have been to abandon to the people the control of its affairs, to run the risk of a truly popular revolution. That is why the bourgeoisie sought to reinforce the central government even more..."* [Kropotkin, **Words of a Rebel**, p. 143]

This means that to use the structure of the state (i.e. centralised, hierarchical power in the hands of a few) would soon mean the creation of a new minority class of rulers as the state *"could not survive without creating about it a new privileged class."* [Malatesta, **Anarchy**, p. 35]

Therefore, for a given social organisation to be a state it must be based on delegated **power.** A state is marked by the centralisation of power into a few hands at the top of the structure, in other words, it is hierarchical in nature. This is, of course, essential for a minority class to remain control over it. Thus a social system which places power at the base, into the hands of the masses, is not a state as anarchists understand it. As Bakunin argued, *"[w]here all rule, there are no more ruled, and there is no State."* [**The Political Philosophy of Bakunin**, p. 223] Therefore, real workers democracy — i.e. self-management — existed, then the state would no longer exist.

The question now arises, does the Marxist "workers' state" meet this definition? As indicated in section 4, the answer is a clear yes. In **The State and Revolution**, Lenin argued that the workers' state would be based on representative democracy. This meant, according to Bakunin, that political power would be *"exercised by proxy, which means entrusting it to a group of men elected to represent and govern them, which in turn will unfailingly return them to all the deceit and subservience of representative or bourgeois rule."* [**Michael Bakunin: Selected Writings**, p. 255]

Rather than "the vast majority suppressing a tiny minority" we have a tiny minority, elected by the majority, suppressing those who disagree with what the government decrees, including those within the class which the state claims to represent. In the words of Lenin:

> *"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves."* [**Collected Works**, vol. 42, p. 170]

And who exercises this *"revolutionary coercion"*? The majority? No, the vanguard. As Lenin argued, *"the correct understanding of a Communist of his tasks"* lies in *"correctly gauging the conditions and the moment when the vanguard of the proletariat can successfully seize power, when it will be able during and after this seizure of power to obtain support from sufficiently broad strata of the working class and of the non-proletarian toiling masses, and when, thereafter, it will be able to maintain, consolidate, and extend its rule, educating, training and attracting ever broader masses of the toilers."* He stressed that *"to go so far ... as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid."* [**Left-Wing Communism: An Infantile Disorder**, p. 35, p. 27]

In other words, for Lenin, if the leaders exercised their dictatorship, then so did the masses. Such a position is pure and utter nonsense. If the party leaders govern, then the masses do not. And so the "workers' state" is a state in the normal sense of the word, with the *"minority suppressing the majority."* This was made clear by Trotsky in 1939:

> *"The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves."* [**The Moralists and Sycophants**, p. 59]

Thus the party (a minority) holds power and uses that power against the masses themselves. Little wonder, given that, once in power, the Bolsheviks quickly forgot their arguments in favour of representative democracy and argued for party dictatorship (see section 4).

Such a transformation of representative democracy into minority class rule was predicted by anarchists:

> *"[I]t is not true that once the social conditions are changed the nature and role of government would change. Organ and function are inseparable terms. Take away from an organ its function and either the organ dies or the function is re-established ... A government, that is a group of people entrusted with making laws and empowered to use the collective power to oblige each individual to obey them, is already a privileged class cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put into a privileged position, the government is already at odds with the people whose strength it disposes of."* [Malatesta, **Anarchy**, pp. 33–4]

Which, of course, is what happened in Russia. As we indicated in section 4, both Lenin and Trotsky defended the imposition of party rule, its need to be beyond public control, by the necessities generated by the revolution (the "vacillations" within the masses meant that democracy, public control, had to be eliminated in favour of party dictatorship).

Therefore, from an anarchist perspective, the so-called "workers' state" is still a state in "the proper sense of the word" as it is based on centralised, top-down power. It is based on the tiny minority (the party leaders) governing everyone else and suppressing anyone who disagreed with them — the vast majority.

If the vast majority did have real power then the state would not exist. As the "proletarian" state is based on delegated power, it is still a state and, as such, an instrument of minority class rule. In this case, the minority is the party leaders who will use their new powers to consolidate their position over the masses (while claiming that their rule equals that of the masses).

6. Do anarchists *"hope the capitalists do not make any attempts of counterrevolution"*?

Fisher continues his inventions:

> *"Instead of organising an instrument for the coercion of the bourgeois by the proletariat, the Anarchists wish to simply abolish the state overnight and hope that the capitalists do not make any attempts of counterrevolution, an absurd and unrealistic idea."*

Yes, it would be, if anarchists actually believed that. Sadly for Fisher, we do not and have stated so on many, many, many occasions. Indeed, to make an assertion like this is to show either a total ignorance of anarchist theory or a desire to deceive.

So do anarchists *"hope that the capitalists do not make any attempts of counterrevolution"*? Of course not. We have long argued that a revolution would need to defend itself. In the words of Malatesta:

> *"But, by all means, let us admit that the governments of the still unemancipated countries were to want to, and could, attempt to reduce free people to a state of slavery once again. Would this people require a government to defend itself? To wage war men are*

needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple, and regular armies composed of conscripts or mercenaries disappear... [Some people] seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the freedom of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!" [**Anarchy**, pp. 40–1]

Elsewhere he argued that a revolution would *"reorganise things in such a way that it will be impossible for bourgeois society to be reconstituted. And all this, and whatever else would be required to satisfy public needs and the development of the revolution would be the task of ... al kinds of committees, local, inter-communal, regional and national congresses which would attend to the co-ordination of social activity ... The creation of voluntary militia ... to deal with any armed attacks by the forces of reaction to re-establish themselves, or to resist outside intervention by countries as yet not in a state of revolution."* [**Life and Ideas**, pp. 165–6]

He was not alone in this position. Every revolutionary anarchist argued along these lines. Bakunin, for example, clearly saw the need to defend a revolution:

"Commune will be organised by the standing federation of the Barricades... [T]he federation of insurgent associations, communes and provinces ... [would] organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution." [**Michael Bakunin: Selected Writings**, pp. 170–1]

And:

*"[L]et us suppose ... it is Paris that starts [the revolution] ... Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and **quartiers**, they will form the revolutionary federation of all the **quartiers**, the federative commune... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services ... and to organise common defence against the enemies of the Revolution."* [**Op. Cit.**, p. 178–9]

He stressed the need to organise and co-ordinate the defence of the revolution by armed workers:

"Immediately after established government has been overthrown, communes will have to reorganise themselves along revolutionary lines ... In order to defend the revolution, their volunteers will at the same time form a communal militia. But no commune can defend itself in isolation. So it will be necessary for each of them to radiate outwards, to

raise all its neighbouring communes in revolt ... and to federate with them for common defence." [**No Gods, No Masters**, vol. 1, p. 142]

Similarly, the Spanish anarcho-syndicalist CNT union recognised the need for defending a revolution in its 1936 resolution on Libertarian Communism:

> *"We acknowledge the necessity to defend the advances made through the revolution ... So ... the necessary steps will be taken to defend the new regime, whether against the perils of a foreign capitalist invasion ... or against counter-revolution at home. It must be remembered that a standing army constitutes the greatest danger for the revolution, since its influence could lead to dictatorship, which would necessarily kill off the revolution...*
>
> *"The people armed will be the best assurance against any attempt to restore the system destroyed from either within or without...*
>
> *"Let each Commune have its weapons and means of defence ... the people will mobilise rapidly to stand up to the enemy, returning to their workplaces as soon as they may have accomplished their mission of defence... .*
>
> *"1. The disarming of capitalism implies the surrender of weaponry to the communes which be responsible for ensuring defensive means are effectively organised nationwide.*
>
> *"2. In the international context, we shall have to mount an intensive propaganda drive among the proletariat of every country so that it may take an energetic protest, calling for sympathetic action against any attempted invasion by its respective government. At the same time, our Iberian Confederation of Autonomous Libertarian Communes will render material and moral assistance to all the world's exploited so that these may free themselves forever from the monstrous control of capitalism and the State."* [quoted by Jose Peirats, **The CNT in the Spanish Revolution**, vol. 1, p. 110]

If it was simply a question of consolidating a revolution and its self-defence then there would be no argument. Rather the question is one of power — will power be centralised, held by a handful of leaders and exercised from the top downwards or will it be decentralised and society run from the bottom-up by working people themselves?

Fisher distorts the real issue and instead invents a straw man which has no bearing at all on the real anarchist position (for further discussion, see sections H.2.1 and J.7.6).

7. Are Anarchists simply *"potential Marxists"*?

After creating the straw man argument that anarchists have not thought about counter-revolution, Fisher asserts:

> *"The majority of our 'Anarchist' friends never thought about this little loop hole, and as for the rest of them they shrug it off, or say something to the effect of the armed proletariat themselves will stop capitalist reaction, which, an armed proletariat in reality, is a proletarian 'state'! In conclusion our 'Anarchists' are simply potential Marxists who need access to genuinely revolutionary ideas."*

Of course, anarchists have thought about this and have came up with, as Fisher puts it, *"the armed proletariat."* Indeed, anarchists have held this position since the days of Bakunin, as we proved in the last section.

Moreover, from an anarchist perspective, an "armed proletariat" is not a "state" as there is not minority of rulers telling the proletariat what to do (see section 5). The "proletariat" state of Lenin was a real state simply because it was the Bolshevik party leaders who were telling the armed forces of the state what to do and who to repress (including striking workers, anarchists and rebelling peasants). These forces, we must note, were organised from the top-down, with the government appointing officers. It was an "armed proletariat" only in the same sense that the bourgeois army is an "armed proletariat" (i.e. working class people made by the rank and file, fought the battles and followed the orders decided upon by a handful of people at the top).

So, if defence of a revolution by the armed proletariat makes you a Marxist then Bakunin, Malatesta, Kropotkin, Goldman, Berkman, Makhno and Durruti were all "Marxists"! As is every revolutionary anarchist. Needless to say, this is impossible and, as such, Fisher's "little loop hole" in anarchism does not exist.

Clearly, Fisher has no understanding of anarchist thought and prefers invention rather than research.

Our Trotskyist then states that:

> *"It is our job, as Marxists to explain these ideas to them!"*

In other words, the Marxist job is to explain anarchist ideas to anarchists and call them Marxism. How impressive!

8. Is Marxism scientific?

Fisher finishes by arguing that:

> *"As Lenin states, 'the ideas of Marx are all powerful, because they are true'! We have the science of dialectics on our side, not idealism, mysticism or theology. Our philosophy is solid as a rock."*

Firstly, dialectics is not a science. Secondly, quoting Lenin on the wonders of Marxism is like quoting the Pope on the joys of Catholicism. Thirdly, the only rocks around are in the heads of Trotskyists if they really think this nonsense about anarchism.

Simply put, a science involves investigating the facts of what is being investigated and generating theories based on those facts. Clearly, our Trotskyist has not bothered to discover the facts about anarchism. He has made numerous assertions about anarchism which are contradicted by the works of anarchism. He has, as such, ignored the fundamental nature of science and has, instead, embraced the approach of the fiction writer.

As such, if Fisher's article is an example of the "science" of Marxism then we can safely state that Marxism is not a science. Rather it is based on invention and slander.

9. What does the Russian Revolution tell us about Trotskyism?

Our Trotskyist decides to quote another Trotskyist, Ted Grant, on the dangers of anarchism:

"However, the setting up of soviets and strike committees — important as it is — does not solve the fundamental problem facing the Russian workers. In and of themselves, soviets solve nothing. What is decisive is the party that leads them. In February 1917, the workers and soldiers set up soviets — a step of enormous importance to the revolution. But in the hands of the Mensheviks and SRs they were reduced to impotence.. . In Germany in November 1918, the soviets were in the hands of the Social Democratic leaders who betrayed the revolution and handed power back to the bourgeoisie. Under these conditions the soviets soon dissolved, and were merely transient phenomena. The same would have happened in Russia, if it had not been for the Bolshevik Party and the leadership of Lenin and Trotsky."

Grant is, of course, just paraphrasing Trotsky in his analysis. Moreover, like Trotsky's, his comments indicate the fundamentally dictatorial nature of Trotskyism.

Simply put, if the "leadership" of the party is the key to soviet power, then if the workers' reject that leadership via soviet elections then the Trotskyist is on the horns of a dilemma. Without party "leadership" then the soviets will be "reduced to impotence" and be "merely transient phenomena." To maintain this party "leadership" (and ensure the soviet power) then the democratic nature of the soviets must be undermined. Therefore the Trotskyist is in the ironic situation of thinking that soviet democracy will undermine soviet power.

This dilemma was solved, in practice, by Trotsky during the Russian Revolution — he simply placed party "leadership" above soviet democracy. In other words, he maintained soviet power by turning the soviets into "nothing." He argued this position numerous times in his life, when he was in power and after he had been expelled from Russia by Stalin.

In 1920, we find Trotsky's thoughts on this subject in his infamous work **Terrorism and Communism**. In this work he defended the fact of Communist Party dictatorship:

"We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class. It is quite natural that, in the period in which history brings up those interests, in all their magnitude, on to the order of the day, the Communists have become the recognised representatives of the working class as a whole."

Needless to say, this is incredulous. How can the replacement of soviet power by party power mean the "supremacy of labour"? It means the supremacy of the Bolshevik party, not "labour." The transformation of the soviets from genuine democratic organs of working class self-government ("shapeless parliaments of labour") into an instrument of Bolshevik party rule ("the apparatus of the supremacy of labour") cannot be seen as a victory of democracy, quite the reverse. The dictatorship of the Bolshevik party marginalised the soviets just as much as the

events of the German Revolution. The only difference is that under the Bolsheviks they maintained a symbolic existence.

Therefore, rather than the "leadership" of the Bolshevik party ensuring soviet rule it meant, in practice, party dictatorship. The soviets played no role in the decision making process as power rested firmly in the hands of the party.

This position was repeated in 1937, in his essay *"Bolshevism and Stalinism."* There he argued that a *"revolutionary party, even having seized power ... is still by no means the sovereign ruler of society."* He stressed that *"the proletariat can take power only through its vanguard"* and that *"[t]hose who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* [Trotsky, **Stalinism and Bolshevism**]

Therefore, we have the same position. Without party dictatorship, the soviets would fall back into the *"mud of reformism."* He argued that the *"fact that this party subordinates the Soviets politically to its leaders has in itself abolished the Soviet system no more than the domination of the conservative majority has abolished the British parliamentary system."* [**Op. Cit.**] This analogy is flawed for two reasons.

Firstly, the parliamentary system is based on a division between executive and legislative functions. Lenin argued that the soviet system would, like the Paris Commune, abolish this division and so ensure *"the conversion of the representative institutions from mere 'talking shops' into working bodies."* [**The Essential Lenin**, p. 304] If the decisions being made by the Soviets have been decided upon by the leaders of the Bolshevik party then the soviets represent those leaders, not the people who elected them. As in the bourgeois system, the representatives of the people govern them rather than express the wishes of the majority. As such, the idea that the Soviets are organs of working class self-government **has** been abolished. Instead, they are mere "talking shops" with power resting in the hands of the party leadership.

Secondly, when elections take place parliamentary system it is generally recognised that the majority of representatives can become the government. The system is therefore based on the assumption that the government is accountable to parliament, not parliament to the government. This means that the "domination" of the majority within Parliament is an expression of parliamentary democracy. The majority party does not maintain that only its existence in power ensures that parliamentary democracy can continue, therefore necessitating the suppression of elections. However, that is the position of Trotsky (and of Lenin) and, let us not forget, the actual actions of the Bolsheviks.

That this is the logical conclusion of Trotsky's position can be seen when he discusses the Kronstadt rebellion of March 1921 (see the appendix on "What was the Kronstadt Rebellion?"). In 1938, he argued that the *"Kronstadt slogan"* was *"soviets without Communists."* [Lenin and Trotsky, **Kronstadt**, p. 90] This, of course, is factually incorrect. The Kronstadt slogan was *"all power to the soviets but not to the parties"* (or *"free soviets"*). From this incorrect assertion, Trotsky argued as follows:

> *"to free the soviets from the leadership [!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from*

> *the proletarian dictatorship. They could play no other role, regardless of the 'ideas' of their participants. The Kronstadt uprising thus had a counterrevolutionary character.*" [**Op. Cit.**, p. 90]

Interesting logic. Let us assume that the result of free elections would have been the end of Bolshevik "leadership" (i.e. dictatorship), as seems likely. What Trotsky is arguing is that to allow workers to vote for their representatives would *"only serve as a bridge from the proletarian dictatorship"*!

This argument was made (in 1938) as a **general point** and is **not** phrased in terms of the problems facing the Russian Revolution in 1921. In other words Trotsky is clearly arguing for the dictatorship of the party and contrasting it to soviet democracy. As he put it elsewhere, the *"revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution."* [**Writings 1936–7**, pp. 513–4] So much for "All Power to the Soviets" or "workers' power"!

Clearly, Grant's and Trotsky's arguments contain a deeply undemocratic core. The logic of their position — namely that party rule is essential to ensure soviet rule — in practice means that soviet rule is replaced by party dictatorship. To include the masses into the decision making process by soviet democracy means loosening the tight political control of the party on the soviets and allowing the possibility that opposition forces may win in the soviets. However, if that happens then it means the end of soviet power as that is only possible by means of party "leadership." This, in turn, necessitates party dictatorship to maintain "soviet power", as Trotsky and Lenin admitted and implemented.

Simply put, Grant's argument shows the dangers of Trotskyism, not of anarchism.

10. Do anarchists reject "leadership"?

Grant continues by asserting the need for leaders:

> *"Some say that such a party is not necessary, that the workers do not need a party, that it leads to bureaucracy, and so on. That is a fatal error. The whole history of the international workers' movement shows the absolute need for a revolutionary party. Anarchism is an expression of impotence, which can offer no way out. Of course, the reason why some honest workers and young people turn towards anarchism is because of their revulsion against Stalinism and the bureaucratic and class collaborationist policies of the existing leaderships, both on the political and trade union field. This is understandable, but profoundly mistaken. The answer to a bad leadership is not no leadership, but to create a leadership that is worthy of the workers' cause. To refuse to do this, to abstain from the political struggle ... amounts to handing over the workers to the existing leaders without a struggle. In order to combat the policy of class collaboration, it is necessary to pose an alternative in the form of a revolutionary policy, and therefore also a revolutionary tendency."*

There are so many fallacies in this argument it is hard to know where to start.

Firstly, we should note that anarchists do not deny the need for "leaders" nor for the need for revolutionaries to organise together to influence the class struggle. To claim so indicates a failure to present the anarchist case honestly.

In the words of Kropotkin:

> *"The idea of anarchist communism, today represented by ... minorities, but increasingly finding popular expression, will make its way among the mass of the people. Spreading everywhere, the anarchist groups ... will take strength from the support they find among the people."* [**Words of a Rebel**, p. 75]

Bakunin considered it essential that revolutionaries organise and influence the masses. As he put it, *"the chief aim and purpose of this organisation"* is to *"help the people towards self-determination on the lines of the most complete equality."* [**Michael Bakunin: Selected Writings**, p. 191]

Therefore, to claim that anarchists deny the need for political organisation and "leaders" is a misrepresentation. As we argue in more depth in section J.3, this is not the case. However, we must stress that anarchists do not seek positions of power ("leadership") in organisations. Rather, they aim to influence by the power of our ideas, *"through the natural, personal influence of its members, who have not the slightest power."* [Bakunin, **Op. Cit.**, p. 193] This is because "leadership" positions in hierarchical organisations are a source of corruption, which is the second major fallacy in Grant's argument.

While acknowledging that the existing leadership of working class organisations and unions are *"bureaucratic and class collaborationist,"* he does not indicate why this is so. He argued that we need a "new" leadership, with the correct ideas, to replace the current ones. However, the *"policy of class collaboration"* within these leaderships did not develop by chance. Rather they are a product of both the tactics (such as electioneering, in the case of political parties) and structures used in these organisations.

Looking at structures, we can clearly see that hierarchy is key. By having leadership positions separate from the mass of workers (i.e. having hierarchical structures), an inevitable division develops between the leaders and the rank and file. The "leaders" are insulated from the life, interests and needs of the membership. Their views adjust to their position, not vice versa, and so "leadership" becomes institutionalised and quickly becomes bureaucratic. As Bakunin argued, the only way to avoid bureaucracy is to empower the rank and file.

Taking the Geneva section of the IWMA, Bakunin noted that the construction workers' section *"simply left all decision-making to their committees ... In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership."* [**Bakunin on Anarchism**, p. 246] To combat this bureaucracy, *"the construction workers ... sections could only defend their rights and their autonomy in only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees more than these popular assemblies... In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed..."* [**Op. Cit.**, p. 247]

This did not mean the end of organisations and committees, but rather a change in power. Any committees would be made up of *"delegates who conscientiously fulfilled all their obligations to their respective sections as stipulated in the statues," "reporting regularly to the membership the proposals made and how they voted"* and *"asking for further instructions (plus instant recall of unsatisfactory delegates)."* [**Ibid.**] Power would be in the hands of the rank and file, not the committees.

It is in this context that anarchists try and give a lead. Anarchist organisation *"rules out any idea of dictatorship and of a controlling and directive power"* and it *"will promote the Revolution only through the **natural but never official influence** of all members of the Alliance."* [**Op. Cit.**, p. 154 and p. 387] This influence would be exerted in the basic assemblies of the organisation, which would retain the power to decide their own fates: *"In such a system, power, properly speaking, no longer exists. Power is diffused to the collectivity and becomes the true expression of the liberty of everyone, the faithful and sincere realisation of the will of all."* [**Op. Cit.**, p. 415]

Only in this way can the bad effects of having institutionalised "leadership" positions be avoided. Instead of ignoring "bad" leadership, anarchists encourage workers to rely on their own initiative and power. They do not "refuse" to combat bureaucratic leaderships, rather they combat them from below by ensuring that workers manage their own affairs directly. As such, anarchists are well aware of the need *"to pose an alternative in the form of a revolutionary policy, and therefore also a revolutionary tendency."*

As Malatesta argued, we *"do not want to **emancipate** the people; we want the people to **emancipate themselves.**"* Thus anarchists *"advocate and practise direct action, decentralisation, autonomy and individual initiative; they should make special efforts to help members [of popular organisations] learn to participate directly in the life of the organisation and to dispense with leaders and full-time functionaries."* However, *"[w]e must not wait to achieve anarchy, in the meantime limiting ourselves to simple propaganda ... We must seek to get all people ... to make demands, and impose itself and take for itself all the improvements and freedoms that it desires as and when it reaches the state of wanting them, and the power to demand them: and in always propagating all aspects of our programme, and always struggling for its complete realisation, we must push people to want always more and to increase its pressures, until it has reached complete emancipation."* [**Life and Ideas**, p. 90, p. 125 and p. 189]

He, like all anarchists, stressed there were different kinds of "leadership":

> *"It is possible to direct ["lead"] through advice and example, leaving the people — provided with the opportunities and means of supplying their own needs themselves — to adopt our methods and solutions if these are, or seem to be, better than those suggested and carried out by others. But it is also possible to direct by taking over command, that is by becoming a government and imposing one's own ideas and interests through police methods."* [**The Anarchist Revolution**, p. 108]

Unsurprisingly, anarchists favour the first way of "leading" people and utterly reject the second.

Clearly, then, anarchists do not reject being "leaders" in the sense of arguing our ideas and combating the influence and power of bureaucratic leaderships. However, this "lead" is based on the influence of our ideas and, as such, is a non-hierarchical relationship between anarchist activists and other workers. Thus Grant's argument is a straw man.

Finally, his comment that *"whole history of the international workers' movement shows the absolute need for a revolutionary party"* is simply false. Every example of a "revolutionary party" has been a failure. They have never created a socialist society which, let us not forget, was their aim. The first "revolutionary" party was Social Democracy. That quickly became reformist and, in Germany, crushed the revolution that broke out there after the end of the First World War.

The Bolshevik party was no better. It soon transformed itself for being the masses servant to being its master (see section 4). It justified its repression against the working class in terms of its

"vanguard" position. When it degenerated into Stalinism, Communist Parties across the world followed it — no matter how insane its policies became.

This is unsurprising. As the anarchists of Trotwatch explain, such a "revolutionary" party leaves much to be desired:

> *"In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly 'revolutionary' organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class."* [**Carry on Recruiting!**, p. 41]

Therefore, while anarchists stress the need to organise as anarchists (i.e. into political associations) they reject the need for a "revolutionary party" in the Marxist or Leninist mold. Rather than seeking power on behalf of the masses, anarchist groups work within the mass organisations of the working class and urge them to take and exercise power directly, without governments and without hierarchy. We seek to win people over to our ideas and, as such, we work with others as equals using debate and discussion to influence the class struggle (see section J.3.6 for fuller details and a discussion of how this differs from the Trotskyist position).

Therefore, Grant's whole argument is flawed. Anarchists do not reject "leadership," they reject hierarchical leadership. We clearly see the need to organise politically to influence the class struggle but do so as equals, by the strength of our ideas. We do not seek to create or seize positions of "leadership" (i.e. power) but rather seek to ensure that the masses manage their own affairs and are influenced by political tendencies only in-so-far as they can convinced of the validity of the politics and ideas of those tendencies.

11. Does the Spanish Revolution show anarchism is flawed?

As usual, Grant brings up the question of the Spanish Revolution:

> *"The anarchist workers of the CNT played a heroic role in the struggle against fascism. In July 1936, they rose up and stormed the barracks armed with just sticks and knives and a few old hunting rifles, and beat the fascists. They set up soviets and established a workers' militia and workers' control in the factories. The CNT and the POUM (a centrist party led by ex-Trotskyists) were the only power in Barcelona. Soon the whole of Catalonia was in the hands of the workers. The bourgeois President of Catalonia, LLuis Companys, actually invited the CNT to take power! But the anarchist leaders refused to take power, and the opportunity was lost."*

Needless to say, this summary leaves much to be desired.

Firstly, there are the factual errors. The offer to the CNT from Companys occurred on July 20th, immediately after the uprising had been defeated in Barcelona. The situation in the rest of Catalonia, never mind Spain, was unknown. This fact is essential to understanding the decisions made by the CNT. Faced with a military coup across the whole of Spain intent on introducing fascism, the outcome of which was unknown, the CNT in Barcelona was in a difficult situation. If it tried to implement libertarian communism then it would have had to fight both the fascist army and the Republican state. Faced with this possibility, the CNT leaders decided to ignore

their politics and collaborate with other anti-fascists within the bourgeois state. Needless to say, to fail to indicate the rationale for the CNT's decision and the circumstances it was made in means to misinform the reader. This does not mean the CNT's decision was correct, it is just to indicate the extremely difficult circumstances in which it was made.

Secondly, Grant lets the cat out of the bag by admitted that he sees the Spanish Revolution in terms of the anarchist *"leaders"* taking power. In this he followed Trotsky, who had argued that:

> *"A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society."* [**"Stalinism and Bolshevism"**]

Clearly, rather than the masses taking power, Trotskyism sees the party (the leaders) having the real power in society. Trotsky stressed this fact elsewhere when he argued that *"[b]ecause the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship."* [**Writings 1936–7**, p. 514]

The *"anarchist leaders"* quite rightly rejected this position, but they also rejected the anarchist one as well. Let us not forget that the anarchist position is the destruction of the state by means of federations of workers associations (see section 3). The CNT refused to do this. Which, of course, means that Grant is attacking anarchist theory in spite of the fact that the CNT **ignored** that theory!

As we have discussed this issue in depth elsewhere (namely sections I.8.10, I.8.11 and section 20 of the appendix *"Marxists and Spanish Anarchism"*) we will leave our discussion of the Spanish Revolution to this short summary.

12. Does anarchism believe in spontaneous revolution?

Grant now asserts another erroneous position to anarchism, namely the believe that anarchists believe in spontaneous revolution. He presents the case of the Albanian revolution:

> *"However, the most crushing answer to anarchism is the fate of the Albanian revolution. The Albanian masses, as the result of the nightmare brought about by the collapse of so-called market reform ... rose up in a spontaneous insurrection. With no organisation, no leadership, and no conscious plan, they stormed the barracks with their bare hands. The army fraternised ... opened the gates of the barracks and distributed arms. Revolutionary committees were established, especially in the South, and the armed militias spread the revolt from one town to the next. The forces of reaction sent by Berisha were routed by the armed people. There was nothing to stop them from entering Tirana ... But here the importance of leadership becomes clear. Lacking a revolutionary leadership with the perspective of taking power and transforming society, the insurrectionists failed to take Tirana."*

Needless to say, the argument for *"a revolutionary leadership"* with *"the perspective of taking power"* is hard to combine with his later argument that *"the Russian workers, basing themselves on their own strength and organisation, [must] take power into their own hands."* As Grant has argued throughout this excerpt, the idea that the workers should take power themselves is utopian as a Bolshevik style leadership is required to seize power. As Trotsky and Lenin made clear, the

working class as a whole cannot exercise the "proletariat dictatorship" — only party dictatorship can ensure the transition from capitalism to communism. In summary, Grant is simply using the old Bolshevik technique of confusing the party with the proletariat.

However, this is besides the point. Grant asserts that anarchists think a revolution can occur spontaneously, without the need for anarchists to organise as anarchists and argue their politics. Needless to say, anarchists do not hold such a position and never have. If we did then anarchists would not write books, pamphlets and leaflets, they would not produce papers and take part in struggles and they would not organise anarchist groups and federations. As we do all that, clearly we do not think that an anarchist society will come about without us trying to create it. As such, Grant's comments misrepresent the anarchist position.

This can be seen from Bakunin, who argued that the 1848 revolutions failed *"for a quite a simple reason: it was rich in instinct and in negative theoretical ideas ... but it was still totally devoid of the positive and practical ideas which would have been necessary to build a new system ... on the ruins of the bourgeois world. The workers who fought for the emancipation of the people in June were united by instinct, not ideas ... This was the principal cause of their defeat."* [**Michael Bakunin: Selected Writings**, p. 104]

Given that *"instinct as a weapon is not sufficient to safeguard the proletariat against the reactionary machinations of the privileged classes,"* instinct *"left to itself, and inasmuch as it has not been transformed into consciously reflected, clearly determined thought, lends itself easily to falsification, distortion and deceit."* [**The Political Philosophy of Bakunin**, p. 215] Therefore, the *"goal, then, is to make the worker fully aware of what he [or she] wants, to unjam within him [or her] a steam of thought corresponding to his [or her] instinct."* This is done by *"a single path, that of* ***emancipation through practical action****,"* by *"workers' solidarity in their struggle against the bosses,"* of *"collective struggle of the workers against the bosses."* This would be complemented by socialist organisations *"propagandis[ing] its principles."* [**The Basic Bakunin**, p. 102, p. 103 and p. 109]

Hence the need for anarchists to organise as anarchists:

> *"The Alliance [Bakunin's anarchist group] is the necessary complement to the International [the revolutionary workers' movement]. But the International and the Alliance, while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses ... regardless of nationality and national boundaries or religious and political beliefs, into one compact body; the Alliance ... tries to give these masses a really revolutionary direction. The programs of one and the other, without being opposed, differ in the degree of their revolutionary development. The International contains in germ, but only in germ, the whole program of the Alliance. The program of the Alliance represents the fullest unfolding of the International."* [**Bakunin on Anarchism**, p. 157]

Thus only by arguing for anarchist ideas can anarchy come about. It will not come about by accident. Hence Malatesta's argument that anarchists *"must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement ... [W]e must act in such a way that it contributes to preparing for a complete social transformation. We must work with the unorganised .... masses to awaken the spirit of revolt and the desire and hope for a free and happy life. We must initiate and support all movements that tend to weaken the forces*

of the State and of capitalism and to raise the mental level and material conditions of the workers... And then, in the revolution, we must take an energetic part (if possible before and more effectively than the others) in the essential material struggle and drive it to the utmost limit in destroying all the repressive forces of the State. We must encourage the workers to take possession of the means of production ... and of stocks of manufactured goods; to organise immediately, on their own, an equitable distribution of ... products . .. and for the continuation and intensification of production and all services useful to the public. We must ... promote action by the workers' associations, the co-operatives, the voluntary groups — to prevent the emergence of new authoritarian powers, new governments, opposing them with violence if necessary, but above all rendering them useless." [**The Anarchist Revolution**, pp. 109–110]

A key process of this is to argue that workers' organisations become the framework of the new world and smash the state. As Murray Bookchin argues, anarchists *"seek to persuade the factory committees, assemblies [and other organisations created by people in struggle] ... to make themselves into* ***genuine organs of popular self-management****, not to dominate them, manipulate them, or hitch them to an all-knowing political party."* [**Post-Scarcity Anarchism**, p. 217] For more discussion of this issue, see section J.7.5 (What is the role of anarchists in a social revolution?).

Clearly, rather than being *"the most crushing answer to anarchism,"* the fate of the Albanian revolution rather shows how inaccurate Grant's argument is. Anarchists do not hold the position he states we do, as we have proven. Anarchists were not surprised by the fate of the Albanian revolution as the Albanian workers were not fighting **for** an anarchist society but rather were protesting **against** the existing system. The role of anarchists in such a struggle would have been to convince those involved to smash the existing state and create a new society based on federations of workers' associations. That this was not done suggests that anarchist ideas were not the dominant ones in the revolt and, therefore, it is hardly surprising that the revolution failed.

Appendix — The Russian Revolution

This appendix of the FAQ exists to discuss in depth the Russian revolution and the impact that Leninist ideology and practice had on its outcome. Given that the only reason why Leninism is taken seriously in some parts of the revolutionary movement is the Russian Revolution, it is useful to expose what Alexander Berkman called "the Bolshevik Myth." This means discussing certain aspects of the revolution and indicating exactly how Leninism helped destroy any libertarian potential it had. It also means analysing common, modern-day, Leninist excuses for the actions of the Bolsheviks to see if they hold water. It also means analysing in depth specific events of the revolution (such as the Kronstadt uprising of March 1921 and the libertarian influenced Makhnovist movement) to see if there was an alternative to Leninism at the time. Luckily, the answer is yes.

As will become clear from this appendix, Bolshevik actions and ideology had a decisive impact on the development and degeneration of the Revolution. With its centralised, top-down statist political vision, its (openly) state capitalist economic vision and its aim for party power, Leninism had pushed the revolution in an authoritarian direction before the Russian Civil War started (the most common Leninist explanation of what went wrong). Leninism, ironically enough, proved the anarchist critique of Marxism to be correct. Anarchists are confident that in depth analysis of the Russian Revolution will confirm the limitations of Bolshevism as a revolutionary movement and point to libertarian ideas for anyone who wants to change the world.

What happened during the Russian Revolution?

This appendix of the FAQ is not a full history of the Russian Revolution. The scope of such a work would simply be too large. Instead, this section will concentrate on certain key issues which matter in evaluating whether the Bolshevik revolution and regime were genuinely socialist or not. This is not all. Some Leninists acknowledge that that Bolshevik policies had little to do with socialism as such were the best that were available at the time. As such, this section will look at possible alternatives to Bolshevik policies and see whether they were, in fact, inevitable.

So for those seeking a comprehensive history of the revolution will have to look elsewhere. Here, we concentrate on those issues which matter when evaluating the socialist content of the revolution and of Bolshevism. In other words, the development of working class self-activity and self-organisation, workers' resistance to their bosses (whether capitalist or "red"), the activity of opposition groups and parties and the fate of working class organisations like trade unions, factory committees and soviets. Moreover, the role of the ruling party and its ideals also need to be indicated and evaluated somewhat (see "How did Bolshevik ideology contribute to the failure of the Revolution?" for a fuller discussion of the role of Bolshevik ideology in the defeat of the revolution).

This means that this section is about two things, what Alexander Berkman termed ***"the Bolshevik Myth"*** and what Voline called ***"the Unknown Revolution"*** (these being the titles of their

respective books on the revolution). After his experiences in Bolshevik Russia, Berkman came to the conclusion that it was *"[h]igh time the truth about the Bolsheviki were told. The whited sepulchre must unmasked, the clay feet of the fetish beguiling the international proletariat to fatal will o' wisps exposed. The Bolshevik myth must be destroyed."* By so doing, he aimed to help the global revolutionary movement learn from the experience of the Russian revolution. Given that *"[t]o millions of the disinherited and enslaved it became a new religion, the beacon of social salvation"* it was an *"imperative to unmask the great delusion, which otherwise might lead the Western workers to the same abyss as their brothers in Russia."* Bolshevism had *"failed, utterly and absolutely"* and so it was *"incumbent upon those who have seen though the myth to expose its true nature ... Bolshevism is of the past. The future belongs to man and his liberty."* [**The Bolshevik Myth**, p. 318 and p. 342]

Subsequent events proved Berkman correct. Socialism became linked to Soviet Russia and as it fell into Stalinism, the effect was to discredit socialism, even radical change as such, in the eyes of millions. And quite rightly too, given the horrors of Stalinism. If more radicals had had the foresight of Berkman and the other anarchists, this association of socialism and revolution with tyranny would have been combated and an alternative, libertarian, form of socialism would have risen to take the challenge of combating capitalism in the name of a **genuine** socialism, rooted in the ideals of liberty, equality and solidarity.

However, in spite of the horrors of Stalinism many people seeking a radical change in society are drawn to Leninism. This is partly to do with the fact that in many countries Leninist parties have a organised presence and many radicalised people come across them first. It is also partly to do with the fact that many forms of Leninism denounce Stalinism for what it was and raise the possibility of the "genuine" Leninism of the Bolshevik party under Lenin and Trotsky. This current of Leninism is usually called "Trotskyism" and has many offshoots. For some of these parties, the differences between Trotskyism and Stalinism is pretty narrow. The closer to orthodox Trotskyism you get, the more Stalinist it appears. As Victor Serge noted of Trotsky's "Fourth International" in the 1930s, *"in the hearts of the persecuted I encountered the same attitudes as in their persecutors [the Stalinists] ... Trotskyism was displaying symptoms of an outlook in harmony with the very Stalinism against which it had taken its stand ... any person in the circles of the 'Fourth International' who went so far as to object to [Trotsky's] propositions was promptly expelled and denounced in the same language that the bureaucracy had] employed against us in the Soviet Union."* [**Memoirs of a Revolutionary**, p. 349] As we discuss in section 3 of the appendix on "Were any of the Bolshevik oppositions a real alternative?", perhaps this is unsurprising given how much politically Trotsky's "Left Opposition" had shared with Stalinism.

Other Trotskyist parties have avoided the worse excesses of orthodox Trotskyism. Parties associated with the **International Socialists**, for example portray themselves as defending what they like to term *"socialism from below"* and the democratic promise of Bolshevik as expressed during 1917 and in the early months of Bolshevik rule. While anarchists are somewhat sceptical that Leninism can be called *"socialism from below"* (see section H.3.3), we need to address the claim that the period between February 1917 to the start of the Russian civil war at the end of May 1918 shows the real nature of Bolshevism. In order to do that we need to discuss what the Russian anarchist Voline called *"The Unknown Revolution."*

So what is the *"Unknown Revolution"*? Voline, an active participant in 1917 Russian Revolution, used that expression as the title of his classic account of the Russian revolution. He used it to refer to the rarely acknowledged independent, creative actions of the revolutionary people themselves.

As Voline argued, *"it is not known how to study a revolution"* and most historians *"mistrust and ignore those developments which occur silently in the depths of the revolution ... at best, they accord them a few words in passing ... [Yet] it is precisely these hidden facts which are important, and which throw a true light on the events under consideration and on the period."* This section of the FAQ will try and present this *"unknown revolution,"* those movements *"which fought the Bolshevik power in the name of true liberty and of the principles of the Social Revolution which that power had scoffed at and trampled underfoot."* [**The Unknown Revolution**, p. 19 and p. 437] Voline gives the Kronstadt rebellion (see the appendix on "What was the Kronstadt Rebellion?") and the Makhnovist movement (see the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?") pride of place in his account. Here we discuss other movements and the Bolshevik response to them.

Leninist accounts of the Russian Revolution, to a surprising extent, fall into the official form of history — a concern more with political leaders than with the actions of the masses. Indeed, the popular aspects of the revolution are often distorted to accord with a predetermined social framework of Leninism. Thus the role of the masses is stressed during the period before the Bolshevik seizure of power. Here the typical Leninist would agree, to a large extend, with summarised history of 1917 we present in section 1. They would undoubtedly disagree with the downplaying of the role of the Bolshevik party (although as we discuss in section 2, that party was far from the ideal model of the vanguard party of Leninist theory and modern Leninist practice). However, the role of the masses in the revolution would be praised, as would the Bolsheviks for supporting it.

The real difference arises once the Bolsheviks seize power in November 1917 (October, according to the Old Style calendar then used). After that, the masses simply disappear and into the void steps the leadership of the Bolshevik party. For Leninism, the *"unknown revolution"* simply stops. The sad fact is that very little is known about the dynamics of the revolution at the grassroots, particularly after October. Incredible as it may sound, very few Leninists are that interested in the realities of "workers' power" under the Bolsheviks or the actual performance and fate of such working class institutions as soviets, factory committees and co-operatives. What is written is often little more than vague generalities that aim to justify authoritarian Bolshevik policies which either explicitly aimed to undermine such bodies or, at best, resulted in their marginalisation when implemented.

This section of the FAQ aims to make known the *"unknown revolution"* that continued under the Bolsheviks and, equally important, the Bolshevik response to it. As part of this process we need to address some of the key events of that period, such as the role of foreign intervention and the impact of the civil war. However, we do not go into these issues in depth here and instead cover them in depth in the appendix on "What caused the degeneration of the Russian Revolution?". This is because most Leninists excuse Bolshevik authoritarianism on the impact of the civil war, regardless of the facts of the matter. As we discuss in the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", the ideology of Bolshevism played its role as well — something that modern day Leninists strenuously deny (again, regardless of the obvious). As we indicate in this section, the idea that Bolshevism came into conflict with the *"unknown revolution"* is simply not viable. Bolshevik ideology and practice made it inevitable that this conflict erupted, as it did **before** the start of the civil war (also see section 3 of the appendix on "What caused the degeneration of the Russian Revolution?").

Ultimately, the reason why Leninist ideas still have influence on the socialist movement is due to the apparent success of the Russian Revolution. Many Leninist groups, mainly Trotskyists and derivatives of Trotskyism, point to "Red October" and the creation of the first ever workers state as concrete examples of the validity of their ideas. They point to Lenin's **State and Revolution** as proving the "democratic" (even "libertarian") nature of Leninism while, at the same time, supporting the party dictatorship he created and, moreover, rationalising the utter lack of working class freedom and power under it. We will try to indicate the falseness of such claims. As will become clear from this section, the following summation of an anonymous revolutionary is totally correct:

> ***"Every notion about revolution inherited from Bolshevism is false."***

In this, they were simply repeating the conclusions of anarchists. As Kropotkin stressed in 1920:

> *"It seems to me that this attempt to build a communist republic on the basis of a strongly centralised state, under the iron law of the dictatorship of one party, has ended in a terrible fiasco. Russia teaches us how not to impose communism."* [Peter Kropotkin, quoted by Guerin, **Anarchism**, p. 106]

Ultimately, the experience of Bolshevism was a disaster. And as the Makhnovists in the Ukraine proved, Bolshevik ideology and practice was **not** the only option available (see the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?"). There **were** alternatives, but Bolshevik ideology simply excluded using them (we will discuss some possibilities in this various sub-sections below). In other words, Bolshevik ideology is simply not suitable for a real revolutionary movement and the problems it will face. In fact, its ideology and practice ensures that any such problems will be magnified and made worse, as the Russian revolution proves.

Sadly many socialists cannot bring themselves to acknowledge this. While recognising the evils of the Stalinist bureaucracy, these socialists deny that this degeneration of Bolshevism was inevitable and was caused by outside factors (namely the Russian Civil War or isolation). While not denying that these factors did have an effect in the outcome of the Russian Revolution, the seeds for bureaucracy existed from the first moment of the Bolshevik insurrection. These seeds where from three sources: Bolshevik politics, the nature of the state and the post-October economic arrangements favoured and implemented by the ruling party.

As we will indicate, these three factors caused the new "workers' state" to degenerate long before the out break of the Civil war in May of 1918. This means that the revolution was **not** defeated primarily because of isolation or the effects of the civil war. The Bolsheviks had already seriously undermined it from within **long before** the effects of isolation or civil war had a chance to take hold. The civil war which started in the summer of 1918 did take its toll in what revolutionary gains survived, not least because it allowed the Bolsheviks to portray themselves and their policies as the lessor of two evils. However, Lenin's regime was already defending (state) capitalism against genuine socialist tendencies before the outbreak of civil war. The suppression of Kronstadt in March 1921 was simply the logical end result of a process that had started in the spring of 1918, at the latest. As such, isolation and civil war are hardly good excuses —

particularly as anarchists had predicted they would affect every revolution decades previously and Leninists are meant to realise that civil war and revolution are inevitable. Also, it must be stressed that Bolshevik rule was opposed by the working class, who took collective action to resist it and the Bolsheviks justified their policies in ideological terms and **not** in terms of measures required by difficult circumstances (see the appendix on "What caused the degeneration of the Russian Revolution?").

One last thing. We are sure, in chronicling the "excesses" of the Bolshevik regime, that some Leninists will say "they sound exactly like the right-wing." Presumably, if we said that the sun rises in the East and sets in the West we would also "sound like the right-wing." That the right-wing also points to certain **facts** of the revolution does not in any way discredit these facts. How these facts are used is what counts. The right uses the facts to discredit socialism and the revolution. Anarchists use them to argue for libertarian socialism and support the revolution while opposing the Bolshevik ideology and practice which distorted it. Similarly, unlike the right we take into account the factors which Leninists urge us to use to excuse Bolshevik authoritarianism (such as civil war, economic collapse and so on). We are simply not convinced by Leninist arguments.

Needless to say, few Leninists apply their logic to Stalinism. To attack Stalinism by describing the facts of the regime would make one sound like the "right-wing." Does that mean socialists should defend one of the most horrific dictatorships that ever existed? If so, how does that sound to non-socialists? Surely they would conclude that socialism **is** about Stalinism, dictatorship, terror and so on? If not, why not? If "sounding like the right" makes criticism of Lenin's regime anti-revolutionary, then why does this not apply to Stalinism? Simply because Lenin and Trotsky were not at the head of the dictatorship as they were in the early 1920s? Does the individuals who are in charge override the social relations of a society? Does dictatorship and one-man management become less so when Lenin rules? The apologists for Lenin and Trotsky point to the necessity created by the civil war and isolation within international capitalism for their authoritarian policies (while ignoring the fact they started **before** the civil war, continued after it **and were justified at the time** in terms of Bolshevik ideology). Stalin could make the same claim.

Other objections may be raised. It may be claimed that we quote "bourgeois" (or even worse, **Menshevik**) sources and so our account is flawed. In reply, we have to state that you cannot judge a regime based purely on what it says about itself. As such, critical accounts are required to paint a full picture of events. Moreover, it is a sad fact that few, if any, Leninist accounts of the Russian Revolution actually discuss the class and social dynamics (and struggles) of the period under Lenin and Trotsky. This means we have to utilise the sources which **do,** namely those historians who do not identify with the Bolshevik regime. And, of course, any analysis (or defence) of the Bolshevik regime will have to account for critical accounts, either by refuting them or by showing their limitations. As will become obvious in our discussion, the reason why latter day Bolsheviks talk about the class dynamics post-October in the most superficial way is that it would be hard, even impossible, to maintain that Lenin's regime was remotely socialist or based on working class power. Simply put, from early 1918 (at the latest) conflict between the Bolsheviks and the Russian working masses was a constant feature of the regime. It is only when that conflict reached massive proportions that Leninists do not (i.e. cannot) ignore it. In such cases, as the Kronstadt rebellion proves, history is distorted in order to defend the Bolshevik state (see the appendix on "What was the Kronstadt Rebellion?" for details).

The fact that Leninists try to discredit anarchists by saying that we sound like the right is sad. In effect, it **blocks** any real discussion of the Russian Revolution and Bolshevism (as intended, probably). This ensures that Leninism remains above critique and so no lessons can be learnt from the Russian experience. After all, if the Bolsheviks had no choice then what lessons **are** there to learn? None. And if we are to learn no lessons (bar, obviously, mimic the Bolsheviks) we are doomed to repeat the same mistakes — mistakes that are partly explained by the objective circumstances at the time and partly by Bolshevik politics. But given that most of the circumstances the Bolsheviks faced, such as civil war and isolation, are likely to reappear in any future revolution, modern-day Leninists are simply ensuring that Karl Marx was right — history repeats itself, first time as tragedy, second time as farce.

Such a position is, of course, wonderful for the pro-Leninist. It allows them to quote Lenin and Trotsky and use the Bolsheviks as the paradigm of revolution while washing their hands of the results of that revolution. By arguing that the Bolsheviks were *"making a virtue of necessity,"* (to use the expression of Leninist Donny Gluckstein [**The Tragedy of Bukharin**, p. 41]), they are automatically absolved of proving their arguments about the "democratic" essence of Bolshevism in power. Which is useful as, logically, no such evidence could exist and, in fact, there is a whole host of evidence pointing the other way which can, by happy co-incidence, be ignored. Indeed, from this perspective there is no point even discussing the revolution at all, beyond praising the activities and ideology of the Bolsheviks while sadly noting that "fate" (to quote Leninist Tony Cliff) ensured that they could not fulfil their promises. Which, of course, almost Leninist accounts **do** boil down to. Thus, for the modern Leninist, the Bolsheviks cannot be judged on what they did nor what they said while doing it (or even after). They can only be praised for what they said and did **before** they seized power.

However, anarchists have a problem with this position. It smacks more of religion than theory. Karl Marx was right to argue that you cannot judge people by what they say, only by what they do. It is in this revolutionary spirit that this section of the FAQ analyses the Russian revolution and the Bolshevik role within it. We need to analyse what they did when they held power as well as the election manifesto. As we will indicate in this section, neither was particularly appealing.

Finally, we should note that Leninists today have various arguments to justify what the Bolsheviks did once in power. We discuss these in the appendix on "What caused the degeneration of the Russian Revolution?". We also discuss in the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?" the ideological roots of the counter-revolutionary role of the Bolsheviks during the revolution. That the politics of the Bolsheviks played its role in the failure of the revolution can be seen from the example of the anarchist influenced Makhnovist movement which applied basic libertarian principles in the same difficult circumstances of the Russian Civil War (see "Why does the Makhnovist movement show there is an alternative to Bolshevism?" on this important movement).

1 Can you give a short summary of what happened in 1917?

2 How did the Bolsheviks gain mass support?

3 Surely the Russian Revolution proves that vanguard parties work?

No, far from it. Looking at the history of vanguardism we are struck by its failures, not its successes. Indeed, the proponents of *"democratic centralism"* can point to only one apparent

success of their model, namely the Russian Revolution. However, we are warned by Leninists that failure to use the vanguard party will inevitably condemn future revolutions to failure:

> *"The proletariat can take power only through its vanguard... Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power .. . The Soviets are the only organised form of the tie between the vanguard and the class. A revolutionary content can be given this form only by the party. This is proved by the positive experience of the October Revolution and by the negative experience of other countries (Germany, Austria, finally, Spain). No one has either shown in practice or tried to explain articulately on paper how the proletariat can seize power without the political leadership of a party that knows what it wants."* [Trotsky, **Stalinism and Bolshevism**]

To anarchist ears, such claims seem out of place. After all, did the Russian Revolution actually result in socialism or even a viable form of soviet democracy? Far from it. Unless you picture revolution as simply the changing of the party in power, you have to acknowledge that while the Bolshevik party **did** take power in Russian in November 1917, the net effect of this was **not** the stated goals that justified that action. Thus, if we take the term *"effective"* to mean "an efficient means to achieve the desired goals" then vanguardism has not been proven to be effective, quite the reverse (assuming that your desired goal is a socialist society, rather than party power). Needless to say, Trotsky blames the failure of the Russian Revolution on *"objective"* factors rather than Bolshevik policies and practice, an argument we address in detail in "What caused the degeneration of the Russian Revolution?" and will not do so here.

So while Leninists make great claims for the effectiveness of their chosen kind of party, the hard facts of history are against their positive evaluation of vanguard parties. Ironically, even the Russian Revolution disproves the claims of Leninists. The fact is that the Bolshevik party in 1917 was very far from the *"democratic centralist"* organisation which supporters of *"vanguardism"* like to claim it is. As such, its success in 1917 lies more in its divergence from the principles of *"democratic centralism"* than in their application. The subsequent degeneration of the revolution and the party is marked by the increasing **application** of those principles in the life of the party.

Thus, to refute the claims of the *"effectiveness"* and *"efficiency"* of vanguardism, we need to look at its one and only success, namely the Russian Revolution. As the Cohen-Bendit brothers argue, *"far from leading the Russian Revolution forwards, the Bolsheviks were responsible for holding back the struggle of the masses between February and October 1917, and later for turning the revolution into a bureaucratic counter-revolution — in both cases because of the party's very nature, structure and ideology."* Indeed, *"[f]rom April to October, Lenin had to fight a constant battle to keep the Party leadership in tune with the masses."* [**Obsolete Communism**, p. 183 and p. 187] It was only by continually violating its own *"nature, structure and ideology"* that the Bolshevik party played an important role in the revolution. Whenever the principles of *"democratic centralism"* were applied, the Bolshevik party played the role the Cohen-Bendit brothers subscribed to it (and once in power, the party's negative features came to the fore).

Even Leninists acknowledge that, to quote Tony Cliff, throughout the history of Bolshevism, *"a certain conservatism arose."* Indeed, *"[a]t practically all sharp turning points, Lenin had to rely on the lower strata of the party machine against the higher, or on the rank and file against the machine as a whole."* [**Lenin**, vol. 2, p. 135] This fact, incidentally, refutes the basic assumptions

of Lenin's party schema, namely that the broad party membership, like the working class, was subject to bourgeois influences so necessitating central leadership and control from above.

Looking at both the 1905 and 1917 revolutions, we are struck by how often this *"conservatism"* arose and how often the higher bodies were behind the spontaneous actions of the masses and the party membership. Looking at the 1905 revolution, we discover a classic example of the inefficiency of "democratic centralism." Facing in 1905 the rise of the soviets, councils of workers' delegates elected to co-ordinate strikes and other forms of struggle, the Bolsheviks did not know what to do. *"The Petersburg Committee of the Bolsheviks,"* noted Trotsky, *"was frightened at first by such an innovation as a non-partisan representation of the embattled masses, and could find nothing better to do than to present the Soviet with an ultimatum: immediately adopt a Social-Democratic program or disband. The Petersburg Soviet as a whole, including the contingent of Bolshevik workingmen as well ignored this ultimatum without batting an eyelash."* [**Stalin**, vol. 1, p. 106] More than that, *"[t]he party's Central Committee published the resolution on October 27, thereby making it the binding directive for all other Bolshevik organisations."* [Oskar Anweiler, **The Soviets**, p. 77] It was only the return of Lenin which stopped the Bolshevik's open attacks against the Soviet (also see section 8 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?").

The rationale for these attacks is significant. The St. Petersburg Bolsheviks were convinced that *"only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent."* [quoted by Anweiler, **Op. Cit.**, p. 77] In other words, the soviets could not reflect workers' interests because they were elected by the workers! The implications of this perspective came clear in 1918, when the Bolsheviks gerrymandered and disbanded soviets to remain in power (see section 6). That the Bolshevik's position flowed naturally from Lenin's arguments in **What is to be Done?** is clear. Thus the underlying logic of Lenin's vanguardism ensured that the Bolsheviks played a negative role with regards the soviets which, combined with "democratic centralism" ensured that it was spread far and wide. Only by ignoring their own party's principles and staying in the Soviet did rank and file Bolsheviks play a positive role in the revolution. This divergence of top and bottom would be repeated in 1917.

Given this, perhaps it is unsurprising that Leninists started to rewrite the history of the 1905 revolution. Victor Serge, a "Left Oppositionist" and anti-Stalinist asserted in the late 1920s that in 1905 the Petrograd Soviet was *"led by Trotsky and inspired by the Bolsheviks."* [**Year One of the Russian Revolution**, p. 36]. While the former claim is correct, the latter is not. As noted, the Bolsheviks were initially opposed the soviets and systematically worked to undermine them. Unsurprisingly, Trotsky at that time was a Menshevik, not a Bolshevik. After all, how could the most revolutionary party that ever existed have messed up so badly? How could democratic centralism faired so badly in practice? Best, then, to suggest that it did not and give the Bolsheviks a role better suited to the rhetoric of Bolshevism than its reality.

Trotsky was no different. He, needless to say, denied the obvious implications of these events in 1905. While admitting that the Bolsheviks *"adjusted themselves more slowly to the sweep of the movement"* and that the Mensheviks *"were preponderant in the Soviet,"* he tries to save vanguardism by asserting that *"the general direction of the Soviet's policy proceeded in the main along Bolshevik lines."* So, in spite of the lack of Bolshevik influence, in spite of the slowness in adjusting to the revolution, Bolshevism was, in fact, the leading set of ideas in the revolution! Ironically,

a few pages later, he mocks the claims of Stalinists that Stalin had *"isolated the Mensheviks from the masses"* by noting that the *"figures hardly bear [the claims] out."* [**Op. Cit.**, p. 112 and p. 117] Shame he did not apply this criteria to his own claims.

Of course, every party makes mistakes. The question is, how did the *"most revolutionary party of all time"* fare in 1917. Surely that revolution proves the validity of vanguardism and "democratic centralism"? After all, there was a successful revolution, the Bolshevik party did seize power. However, the apparent success of 1917 was not due to the application of "democratic centralism," quite the reverse. While the myth of 1917 is that a highly efficient, democratic centralist vanguard party ensured the overthrow of the Provisional Government in November 1917 in favour of the Soviets (or so it seemed at the time) the facts are somewhat different. Rather, the Bolshevik party throughout 1917 was a fairly loose collection of local organisations (each more than willing to ignore central commands and express their autonomy), with much internal dissent and infighting and no discipline beyond what was created by common loyalty. The "democratic centralist" party, as desired by Lenin, was only created in the course of the Civil War and the tightening of the party dictatorship. In other words, the party became more like a "democratic centralist" one as the revolution degenerated. As such, the various followers of Lenin (Stalinists, Trotskyists and their multitude of offshoots) subscribe to a myth, which probably explains their lack of success in reproducing a similar organisation since. So assuming that the Bolsheviks did play an important role in the Russian revolution, it was because it was **not** the centralised, disciplined Bolshevik party of Leninist myth. Indeed, when the party **did** operate in a vanguardist manner, failure was soon to follow.

This claim can be proven by looking at the history of the 1917 revolution. The February revolution started with a spontaneous protests and strikes. As Murray Bookchin notes, *"the Petrograd organisation of the Bolsheviks opposed the calling of strikes precisely on the eve of the revolution which was destined to overthrow the Tsar. Fortunately, the workers ignored the Bolshevik 'directives' and went on strike anyway. In the events which followed, no one was more surprised by the revolution than the 'revolutionary' parties, including the Bolsheviks."* [**Post-Scarcity Anarchism**, p. 194] Trotsky quotes one of the Bolshevik leaders at the time:

> *"Absolutely no guiding initiative from the party centres was felt ... the Petrograd Committee had been arrested and the representative of the Central Committee ... was unable to give any directives for the coming day."* [quoted by Trotsky, **History of the Russian Revolution**, vol. 1, p. 147]

Not the best of starts. Of course rank and file Bolsheviks took part in the demonstrations, street fights and strikes and so violated the principles their party was meant to be based on. As the revolution progressed, so did the dual nature of the Bolshevik party (i.e. its practical divergence from "democratic centralism" in order to be effective and attempts to force it back into that schema which handicapped the revolution). However, during 1917, "democratic centralism" was ignored in order to ensure the the Bolsheviks played any role at all in the revolution. As one historian of the party makes clear, in 1917 and until the outbreak of the Civil War, the party operated in ways that few modern "vanguard" parties would tolerate:

> "The committees were a law unto themselves when it came to accepting orders from above. Democratic centralism, as vague a principle of internal administration as

there ever has been, was commonly held at least to enjoin lower executive bodies that they should obey the behests of all higher bodies in the organisational hierarchy. But town committees in practice had the devil's own job in imposing firm leadership ... Insubordination was the rule of the day whenever lower party bodies thought questions of importance were at stake.

"Suburb committees too faced difficulties in imposing discipline. Many a party cell saw fit to thumb its nose at higher authority and to pursue policies which it felt to be more suited to local circumstances or more desirable in general. No great secret was made of this. In fact, it was openly admitted that hardly a party committee existed which did not encounter problems in enforcing its will even upon individual activists." [Robert Service, **The Bolshevik Party in Revolution 1917–1923**, pp. 51–2]

So while Lenin's ideal model of a disciplined, centralised and top-down party had been expounded since 1902, the operation of the party never matched his desire. As Service notes, *"a disciplined hierarchy of command stretching down from the regional committees to party cells"* had *"never existed in Bolshevik history."* In the heady days of the revolution, when the party was flooded by new members, the party ignored what was meant to be its guiding principles. As Service constantly stresses, Bolshevik party life in 1917 was the exact opposite of that usually considered (by both opponents and supporters of Bolshevism) as it normal mode of operation. *"Anarchist attitudes to higher authority,"* he argues, *"were the rule of the day"* and *"no Bolshevik leader in his right mind could have contemplated a regular insistence upon rigid standards of hierarchical control and discipline unless he had abandoned all hope of establishing a mass socialist party."* This meant that *"in the Russia of 1917 it was the easiest thing in the world for lower party bodies to rebut the demands and pleas by higher authority."* He stresses that *"[s]uburb and town committees ... often refused to go along with official policies ... they also ... sometimes took it into their heads to engage in active obstruction."* [**Op. Cit.**, p. 80, p. 62 p. 56 and p. 60]

This worked both ways, of course. Town committees did *"snub their nose at lower-echelon viewpoints in the time before the next election. Try as hard as they might, suburb committees and ordinary cells could meanwhile do little to rectify matters beyond telling their own representative on their town committee to speak on their behalf. Or, if this too failed, they could resort to disruptive tactics by criticising it in public and refusing it all collaboration."* [**Op. Cit.**, pp. 52–3] Even by early 1918, the Bolshevik party bore little resemblance to the "democratic centralist" model desires by Lenin:

> *"The image of a disciplined hierarchy of party committees was therefore but a thin, artificial veneer which was used by Bolshevik leaders to cover up the cracked surface of the real picture underneath. Cells and suburb committees saw no reason to kow-tow to town committees; nor did town committees feel under compulsion to show any greater respect to their provincial and regional committees then before."* [**Op. Cit.**, p. 74]

It is this insubordination, this local autonomy and action in spite of central orders which explains the success of the Bolsheviks in 1917. Rather than a highly centralised and disciplined body of "professional" revolutionaries, the party in 1917 saw a *"significant change ... within the membership of the party at local level ... From the time of the February revolution requirements for party*

membership had been all but suspended, and now Bolshevik ranks swelled with impetuous recruits who knew next to nothing about Marxism and who were united by little more than overwhelming impatience for revolutionary action." [Alexander Rabinowitch, **Prelude to Revolution**, p. 41]

This mass of new members (many of whom were peasants who had just recently joined the industrial workforce) had a radicalising effect on the party's policies and structures. As even Leninist commentators argue, it was this influx of members who allowed Lenin to gain support for his radical revision of party aims in April. However, in spite of this radicalisation of the party base, the party machine still was at odds with the desires of the party. As Trotsky acknowledged, the situation *"called for resolute confrontation of the sluggish Party machine with masses and ideas in motion."* He stressed that *"the masses were incomparably more revolutionary than the Party, which in turn was more revolutionary than its committeemen."* Ironically, given the role Trotsky usually gave the party, he admits that *"[w]ithout Lenin, no one had known what to make of the unprecedented situation."* [**Stalin**, vol. 1, p. 301, p. 305 and p. 297]

Which is significant in itself. The Bolshevik party is usually claimed as being the most "revolutionary" that ever existed, yet here is Trotsky admitting that its leading members did not have a clue what to do. He even argued that *"[e]very time the Bolshevik leaders had to act without Lenin they fell into error, usually inclining to the Right."* [**Op. Cit.**, p. 299] This negative opinion of the Bolsheviks applied even to the *"left Bolsheviks, especially the workers"* whom we are informed *"tried with all their force to break through this quarantine"* created by the Bolshevik leaders policy *"of waiting, of accommodation, and of actual retreat before the Compromisers"* after the February revolution and before the arrival of Lenin. Trotsky argues that *"they did not know how to refute the premise about the bourgeois character of the revolution and the danger of an isolation of the proletariat. They submitted, gritting their teeth, to the directions of their leaders."* [**History of the Russian Revolution**, vol. 1, p. 273] It seems strange, to say the least, that without one person the whole of the party was reduced to such a level given that the aim of the "revolutionary" party was to develop the political awareness of its members.

Lenin's arrival, according to Trotsky, allowed the influence of the more radical rank and file to defeat the conservatism of the party machine. By the end of April, Lenin had managed to win over the majority of the party leadership to his position. However, as Trotsky argues, this *"April conflict between Lenin and the general staff of the party was not the only one of its kind. Throughout the whole history of Bolshevism ... all the leaders of the party at all the most important moments stood to the **right** of Lenin."* [**Op. Cit.**, p. 305] As such, if "democratic centralism" had worked as intended, the whole party would have been arguing for incorrect positions the bulk of its existence (assuming, of course, that Lenin was correct most of the time).

For Trotsky, *"Lenin exerted influence not so much as an individual but because he embodied the influence of the class on the Party and of the Party on its machine."* [**Stalin**, vol. 1, p. 299] Yet, this was the machine which Lenin had forged, which embodied his vision of how a "revolutionary" party should operate and was headed by him. In other words, to argue that the party machine was behind the party membership and the membership behind the class shows the bankruptcy of Lenin's organisational scheme. This *"backwardness,"* moreover, indicates an independence of the party bureaucracy from the membership and the membership from the masses. As Lenin's constantly repeated aim was for the party to seize power (based on the dubious assumption that class power would only be expressed, indeed was identical to, party power) this independence held serious dangers, dangers which became apparent once this goal was achieved.

Trotsky asks the question *"by what miracle did Lenin manage in a few short weeks to turn the Party's course into a new channel?"* Significantly, he answers as follows: *"Lenin's personal attributes and the objective situation."* [**Ibid.**] No mention is made of the democratic features of the party organisation, which suggests that without Lenin the rank and file party members would not have been able to shift the weight of the party machine in their favour. Trotsky seems close to admitting this:

> *"As often happens, a sharp cleavage developed between the classes in motion and the interests of the party machines. Even the Bolshevik Party cadres, who enjoyed the benefit of exceptional revolutionary training, were definitely inclined to disregard the masses and to identify their own special interests and the interests of the machine on the very day after the monarchy was overthrown."* [**Stalin**, vol. 1, p. 298]

Thus the party machine, which embodied the principles of "democratic centralism" proved less than able to the task assigned it in practice. Without Lenin, it is doubtful that the party membership would have over come the party machine:

> *"Lenin was strong not only because he understood the laws of the class struggle but also because his ear was faultlessly attuned to the stirrings of the masses in motion. He represented not so much the Party machine as the vanguard of the proletariat. He was definitely convinced that thousands from among those workers who had borne the brunt of supporting the underground Party would now support him. The masses at the moment were more revolutionary than the Party, and the Party more revolutionary than its machine. As early as March the actual attitude of the workers and soldiers had in many cases become stormily apparent, and it was widely at variance with the instructions issued by all the parties, including the Bolsheviks."* [**Op. Cit.**, p. 299]

Little wonder the local party groupings ignored the party machine, practising autonomy and initiative in the face of a party machine inclined to conservatism, inertia, bureaucracy and remoteness. This conflict between the party machine and the principles it was based on and the needs of the revolution and party membership was expressed continually throughout 1917:

> *"In short, the success of the revolution called for action against the 'highest circles of the party,' who, from February to October, utterly failed to play the revolutionary role they ought to have taken in theory. The masses themselves made the revolution, with or even against the party — this much at least was clear to Trotsky the historian. But far from drawing the correct conclusion, Trotsky the theorist continued to argue that the masses are incapable of making a revolution without a leader."* [Daniel & Gabriel Cohn-Bendit, **Op. Cit.**, p. 188]

Looking at the development of the revolution from April onwards, we are struck by the sluggishness of the party hierarchy. At every revolutionary upsurge, the party simply was not to the task of responding to the needs of masses and the local party groupings closest to them. The can be seen in June, July and October itself. At each turn, the rank and file groupings or Lenin had to constantly violate the principles of their own party in order to be effective. The remoteness and conservatism of the party even under Lenin can be constantly seen.

For example, when discussing the cancellation by the central committee of a demonstration planned for June 10th by the Petrograd Bolsheviks, the unresponsiveness of the party hierarchy can be seen. The *"speeches by Lenin and Zinoviev [justifying their actions] by no means satisfied the Petersburg Committee. If anything, it appears that their explanations served to strengthen the feeling that at best the party leadership had acted irresponsibly and incompetently and was seriously out of touch with reality."* Indeed, many *"blamed the Central Committee for taking so long to respond to Military Organisation appeals for a demonstration."* [Rabinowitch, **Op. Cit.**, p. 88 and p. 92]

During the discussions in late June, 1917, on whether to take direct action against the Provisional Government there was a *"wide gulf"* between lower organs evaluations of the current situation and that of the Central Committee. [Rabinowitch, **Op. Cit.**, p. 129] Indeed, among the delegates from the Bolshevik military groups, only Lashevich (an old Bolshevik) spoke in favour of the Central Committee position and he noted that *"[f]requently it is impossible to make out where the Bolshevik ends and the Anarchist begins."* [quoted by Rabinowitch, **Op. Cit.**, p. 129]

In the July days, the breach between the local party groups and the central committee increased. As we noted in the section 1, this spontaneous uprising was opposed to by the Bolshevik leadership, in spite of the leading role of their own militants (along with anarchists) in fermenting it. While calling on their own militants to restrain the masses, the party leadership was ignored by the rank and file membership who played an active role in the event. Sickened by being asked to play the role of *"fireman,"* the party militants rejected party discipline in order to maintain their credibility with the working class. Rank and file activists, pointing to the snowballing of the movement, showed clear dissatisfaction with the Central Committee. One argued that it *"was not aware of the latest developments when it made its decision to oppose the movement into the streets."* Ultimately, the Central Committee appeal *"for restraining the masses ... was removed from ... **Pravda** ... and so the party's indecision was reflected by a large blank space on page one."* [Rabinowitch, **Op. Cit.**, p. 150, p. 159 and P. 175] Ultimately, the indecisive nature of the leadership can be explained by the fact it did not think it could seize state power for itself. As Trotsky noted, *"the state of popular consciousness ... made impossible the seizure of power by the Bolsheviks in July."* [**History of the Russian Revolution**, vol. 2, p. 81]

The indecision of the party hierarchy did have an effect, of course. While the anarchists at Kronstadt looked at the demonstration as the start of an uprising, the Bolsheviks there were *"wavering indecisively in the middle"* between them and the Left-Social Revolutionaries who saw it as a means of applying pressure on the government. This was because they were *"hamstrung by the indecision of the party Central Committee."* [Rabinowitch, **Op. Cit.**, p. 187] Little wonder so many Bolshevik party organisations developed and protected their own autonomy and ability to act!

Significantly, one of the main Bolshevik groupings which helped organise and support the July uprising, the Military Organisation, started their own paper after the Central Committee had decreed after the failed revolt that neither it, nor the Petersburg Committee, should be allowed to have one. It *"angrily insisted on what it considered its just prerogatives"* and in *"no uncertain terms it affirmed its right to publish an independent newspaper and formally protested what is referred to as 'a system of persecution and repression of an extremely peculiar character which had begun with the election of the new Central Committee.'"* [Rabinowitch, **Op. Cit.**, p. 227] The Central Committee backed down, undoubtedly due to the fact it could not enforce its decision.

As the Cohn-Bendit brothers argue, *"five months after the Revolution and three months before the October uprising, the masses were still governing themselves, and the Bolshevik vanguard simply*

had to toe the line." [**Op. Cit.**, p. 186] Within that vanguard, the central committee proved to be out of touch with the rank and file, who ignored it rather than break with their fellow workers.

Even by October, the party machine still lagged behind the needs of the revolution. In fact, Lenin could only impose his view by going over the head of the Central Committee. According to Trotsky's account, *"this time he [wa]s not satisfied with furious criticism"* of the *"ruinous Fabianism of the Petrograd leadership"* and *"by way of protest he resign[ed] from the Central Committee."* [**History of the Russian Revolution**, vol. 3, p. 131] Trotsky quotes Lenin as follows:

> *"I am compelled to request permission to withdraw from the Central Committee, which I hereby do, and leave myself freedom of agitation in the lower ranks of the party and at the party congress."* [quoted by Trotsky, **Op. Cit.**, p. 131]

Thus the October revolution was precipitated by a blatant violation of the principles Lenin spent his life advocating. Indeed, if someone else other than Lenin had done this we are sure that Lenin, and his numerous followers, would have dismissed it as the action of a *"petty-bourgeois intellectual"* who cannot handle party *"discipline."* This is itself is significant, as is the fact that he decided to appeal to the *"lower ranks"* of the party. Simply put, rather than being "democratic" the party machine effectively blocked communication and control from the bottom-up. Looking at the more radical party membership, he *"could only impose his view by going over the head of his Central Committee."* [Daniel and Gabriel Cohn-Bendit, **Op. Cit.**, p. 187] He made sure to send his letter of protest to *"the Petrograd and Moscow committees"* and also made sure that *"copies fell into the hands of the more reliable party workers of the district locals."* By early October (and *"over the heads of the Central Committee"*) he wrote *"directly to the Petrograd and Moscow committees"* calling for insurrection. He also *"appealed to a Petrograd party conference to speak a firm word in favour of insurrection."* [Trotsky, **Op. Cit.**, p. 131 and p. 132]

In October, Lenin had to fight what he called *"a wavering"* in the *"upper circles of the party"* which lead to a *"sort of dread of the struggle for power, an inclination to replace this struggle with resolutions protests, and conferences."* [quoted by Trotsky, **Op. Cit.**, p. 132] For Trotsky, this represented *"almost a direct pitting of the party against the Central Committee,"* required because *"it was a question of the fate of the revolution"* and so *"all other considerations fell away."* [Trotsky, **Op. Cit.**, pp. 132–3] On October 8th, when Lenin addressed the Bolshevik delegates of the forthcoming Northern Congress of Soviets on this subject, he did so *"personally"* as there *"was no party decision"* and the *"higher institutions of the party had not yet expressed themselves."* [Trotsky, **Op. Cit.**, p. 133] Ultimately, the Central Committee came round to Lenin's position but they did so under pressure of means at odds with the principles of the party.

This divergence between the imagine and reality of the Bolsheviks explains their success. If the party had applied or had remained true to the principles of "democratic centralism" it is doubtful that it would have played an important role in the movement. As Alexander Rabinowitch argues, Bolshevik organisational unity and discipline is *"vastly exaggerated"* and, in fact, Bolshevik success in 1917 was down to *"the party's internally relatively democratic, tolerant, and decentralised structure and method of operation, as well as its essentially open and mass character — in striking contrast to the traditional Leninist model."* In 1917, he goes on, *"subordinate party bodies with the Petersburg Committee and the Military Organisation were permitted considerable independence and initiative ... Most importantly, these lower bodies were able to tailor their tactics and appeals to suit their own particular constituencies amid rapidly changing conditions. Vast numbers of new*

members were recruited into the party ... The newcomers included tens of thousands of workers and soldiers ... who knew little, if anything, about Marxism and cared nothing about party discipline." For example, while the slogan *"All Power to the Soviets"* was *"officially withdrawn by the Sixth [Party] Congress in late July, this change did not take hold at the local level."* [**The Bolsheviks Come to Power**, p. 311, p. 312 and p. 313]

It is no exaggeration to argue that if any member of a current vanguard party acted as the Bolshevik rank and file did in 1917, they would quickly be expelled (this probably explains why no such party has been remotely successful since). However, this ferment from below was quickly undermined within the party with the start of the Civil War. It is from this period when "democratic centralism" was actually applied within the party and clarified as an organisational principle:

> *"It was quite a turnabout since the anarchic days before the Civil War. The Central Committee had always advocated the virtues of obedience and co-operation; but the rank-and-filers of 1917 had cared little about such entreaties as they did about appeals made by other higher authorities. The wartime emergency now supplied an opportunity to expatiate on this theme at will."* [Service, **Op. Cit.**, p. 91]

Service stresses that *"it appears quite remarkable how quickly the Bolsheviks, who for years had talked idly about a strict hierarchy of command inside the party, at last began to put ideas into practice."* [**Op. Cit.**, p. 96]

In other words, the conversion of the Bolshevik party into a fully fledged *"democratic centralist"* party occurred during the degeneration of the Revolution. This was both a consequence of the rising authoritarianism within the party and society as well as one of its causes. As such, it is quite ironic that the model used by modern day followers of Lenin is that of the party during the decline of the revolution, not its peak. This is not surprising. Once in power, the Bolshevik party imposed a state capitalist regime onto the Russian people. Can it be surprising that the party structure which it developed to aid this process was also based on bourgeois attitudes and organisation? Simply put, the party model advocated by Lenin may not have been very effective during a revolution but it was exceedingly effective at prompting hierarchy and authority in the post-revolutionary regime. It simply replaced the old ruling elite with another, made up of members of the radical intelligentsia and odd ex-worker or ex-peasant.

This was due to the hierarchical and top-down nature of the party Lenin had created. While the party base was largely working class, the leadership was not. Full-time revolutionaries, they were either middle-class intellectuals or (occasionally) ex-workers and (even rarer) ex-peasants who had left their class to become part of the party machine. Even the delegates at the party congresses did not truly reflect class basis of the party membership. For example, the number of delegates was still dominated by white-collar or others (59.1% to 40.9%) at the sixth party congress at the end of July 1917. [Cliff, **Lenin**, vol. 2, p. 160] So while the party gathered more working class members in 1917, it cannot be said that this was reflected in the party leadership which remained dominated by non-working class elements. Rather than being a genuine working class organisation, the Bolshevik party was a hierarchical group headed by non-working class elements whose working class base could not effectively control them even during the revolution in 1917. It was only effective because these newly joined and radicalised working class members ignored their own party structure and its defining ideology.

After the revolution, the Bolsheviks saw their membership start to decrease. Significantly, *"the decline in numbers which occurred from early 1918 onwards"* started happening *"contrary to what is usually assumed, some months before the Central Committee's decree in midsummer that the party should be purged of its 'undesirable' elements."* These lost members reflected two things. Firstly, the general decline in the size of the industrial working class. This meant that the radicalised new elements from the countryside which had flocked to the Bolsheviks in 1917 returned home. Secondly, the lost of popular support the Bolsheviks were facing due to the realities of their regime. This can be seen from the fact that while the Bolsheviks were losing members, the Left SRS almost doubled in size to 100,000 (the Mensheviks claimed to have a similar number). Rather than non-proletarians leaving, *"[i]t is more probable by far that it was industrial workers who were leaving in droves. After all, it would have been strange if the growing unpopularity of Sovnarkom in factory milieu had been confined exclusively to non-Bolsheviks."* Unsurprisingly, given its position in power, *"[a]s the proportion of working-class members declined, so that of entrants from the middle-class rose; the steady drift towards a party in which industrial workers no longer numerically predominated was under way."* By late 1918 membership started to increase again but *"[m]ost newcomers were not of working-class origin ... the proportion of Bolsheviks of working-class origin fell from 57 per cent at the year's beginning to 48 per cent at the end."* It should be noted that it was not specified how many were classed as having working-class origin were still employed in working-class jobs. [Robert Service, **Op. Cit.**, p. 70, pp. 70–1 and p. 90] A new ruling elite was thus born, thanks to the way vanguard parties are structured and the application of vanguardist principles which had previously been ignored.

In summary, the experience of the Russian Revolution does not, in fact, show the validity of the "vanguard" model. The Bolshevik party in 1917 played a leading role in the revolution only insofar as its members violated its own organisational principles (Lenin included). Faced with a real revolution and an influx of more radical new members, the party had to practice anarchist ideas of autonomy, local initiative and the ignoring of central orders which had no bearing to reality on the ground. When the party did try to apply the top-down and hierarchical principles of "democratic centralism" it failed to adjust to the needs of the moment. Moreover, when these principles were finally applied they helped ensure the degeneration of the revolution. As we discussed in section H.5, this was to be expected.

4 Was Lenin's "State and Revolution" applied after October?

In a nutshell, no. In fact the opposite was the case. Post-October, the Bolsheviks not only failed to introduce the ideas of Lenin's **State and Revolution**, they in fact introduced the exact opposite. As one historian puts it:

> *"To consider 'State and Revolution' as the basic statement of Lenin's political philosophy — which non-Communists as well as Communists usually do — is a serious error. Its argument for a utopian anarchism never actually became official policy. The Leninism of 1917 ... came to grief in a few short years; it was the revived Leninism of 1902 which prevailed as the basis for the political development of the USSR."* [Robert V. Daniels, **The Conscience of the Revolution**, pp. 51–2]

Daniels is being far too lenient with the Bolsheviks. It was not, in fact, *"a few short years"* before the promises of 1917 were forgotten. In some cases, it was a few short hours. In others,

a few short months. However, in a sense Daniels is right. It did take until 1921 before all hope for saving the Russian Revolution finally ended. With the crushing of the Kronstadt rebellion, the true nature of the regime became obvious to all with eyes to see. Moreover, the banning of factions within the party at the same time did mark a return to the pattern of *"What is to be Done?"* rather than the more fluid practice Bolshevism exhibited in, say, 1917 (see section 3). However, as we discuss in the appendix "Were any of the Bolshevik oppositions a real alternative?", the various Bolshevik oppositions were, in their own way, just as authoritarian as the mainstream of the party.

In order to show that this is the case, we need to summarise the main ideas contained in Lenin's work. Moreover, we need to indicate what the Bolsheviks did, in fact, do. Finally, we need to see if the various rationales justifying these actions hold water.

So what did Lenin argue for in **State and Revolution**? Writing in the mid-1930s, anarchist Camillo Berneri summarised the main ideas of that work as follows:

> *"The Leninist programme of 1917 included these points: the discontinuance of the police and standing army, abolition of the professional bureaucracy, elections for all public positions and offices, revocability of all officials, equality of bureaucratic wages with workers' wages, the maximum of democracy, peaceful competition among the parties within the soviets, abolition of the death penalty."* [*"The Abolition and Extinction of the State,"* **Cienfuegos Press Anarchist Review**, no. 4, p. 50]

As he noted, *"[n]ot a single one of the points of this programme has been achieved."* This was, of course, under Stalinism and most Leninists will concur with Berneri. However what Leninists tend not to mention is that in the 7 month period from November 1917 to May 1918 none of these points was achieved. So, as an example of what Bolshevism "really" stands for it seems strange to harp on about a work which was never implemented when the its author was in a position to do so (i.e. before the onslaught of a civil war Lenin thought was inevitable anyway!).

To see that Berneri's summary is correct, we need to quote Lenin directly. Obviously the work is a wide ranging defence of Lenin's interpretation of Marxist theory on the state. As it is an attempt to overturn decades of Marxist orthodoxy, much of the work is quotes from Marx and Engels and Lenin's attempts to enlist them for his case (we discuss this issue in section H.3.10). Equally, we need to discount the numerous straw men arguments about anarchism Lenin inflicts on his reader (see sections H.1.3, H.1.4 and H.1.5 for the truth about his claims). Here we simply list the key points as regards Lenin's arguments about his "workers' state" and how the workers would maintain control of it:

1) Using the Paris Commune as a prototype, Lenin argued for the abolition of *"parliamentarianism"* by turning *"representative institutions from mere 'talking shops' into working bodies."* This would be done by removing *"the division of labour between the legislative and the executive."* [**Essential Works of Lenin**, p. 304 and p. 306]

2) *"All officials, without exception, to be elected and subject to recall* ***at any time****"* and so *"directly responsible to their constituents." "Democracy means equality."* [**Op. Cit.**, p. 302, p. 306 and p. 346]

3) The *"immediate introduction of control and superintendence by* ***all,*** *so that* ***all*** *shall become 'bureaucrats' for a time and so that, therefore,* ***no one*** *can become a 'bureaucrat'."* Proletarian democracy would *"take immediate steps to cut bureaucracy down to the roots ... to the complete*

abolition of bureaucracy" as the *"**essence** of bureaucracy"* is officials becoming transformed *"into privileged persons divorced from the masses and **superior to** the masses."* [**Op. Cit.**, p. 355 and p. 360]

4) There should be no *"special bodies of armed men"* standing apart from the people *"since the majority of the people itself suppresses its oppressors, a 'special force' is no longer necessary."* Using the example of the Paris Commune, Lenin suggested this meant *"abolition of the standing army."* Instead there would be the *"armed masses."* [**Op. Cit.**, p. 275, p. 301 and p. 339]

5) The new (workers) state would be *"the organisation of violence for the suppression of ... the exploiting class, i.e. the bourgeoisie. The toilers need a state only to overcome the resistance of the exploiters"* who are *"an insignificant minority,"* that is *"the landlords and the capitalists."* This would see *"an immense expansion of democracy ... for the poor, democracy for the people"* while, simultaneously, imposing *"a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists... their resistance must be broken by force: it is clear that where is suppression there is also violence, there is no freedom, no democracy."* [**Op. Cit.**, p. 287 and pp. 337–8]

This would be implemented after the current, bourgeois, state had been smashed. This would be the *"dictatorship of the proletariat"* and be *"the introduction of complete democracy for the people."* [**Op. Cit.**, p. 355] However, the key practical ideas on what the new "semi-state" would be are contained in these five points. He generalised these points, considering them valid not only for Russia in 1917 but in all countries. In this his followers agree. Lenin's work is considered valid for today, in advanced countries as it was in revolutionary Russia.

Three things strike anarchist readers of Lenin's work. Firstly, as we noted in section H.1.7, much of it is pure anarchism. Bakunin had raised the vision of a system of workers' councils as the framework of a free socialist society in the 1860s and 1870s. Moreover, he had also argued for the election of mandated and recallable delegates as well as for using a popular militia to defend the revolution (see section H.2.1). What is not anarchist is the call for centralisation, equating the council system with a state and the toleration of a "new" officialdom. Secondly, the almost utter non-mention of the role of the party in the book is deeply significant. Given the emphasis that Lenin had always placed on the party, it's absence is worrying. Particularly (as we indicate in section 5) he had been calling for the party to seize power all through 1917. When he does mention the party he does so in an ambiguous way which suggests that it, not the class, would be in power. As subsequent events show, this was indeed what happened in practice. And, finally, the anarchist reader is struck by the fact that every one of these key ideas were not implemented under Lenin. In fact, the opposite was done. This can be seen from looking at each point in turn.

The first point as the creation of "working bodies", the combining of legislative and executive bodies. The first body to be created by the Bolshevik revolution was the "Council of People's Commissars" (CPC) This was a government separate from and above the Central Executive Committee (CEC) of the soviets congress. It was an executive body elected by the soviet congress, but the soviets themselves were not turned into "working bodies." Thus the promises of Lenin's **State and Revolution** did not last the night.

As indicated in section 5, the Bolsheviks clearly knew that the Soviets had alienated their power to this body. However, it could be argued that Lenin's promises were kept as this body simply gave itself legislative powers four days later. Sadly, this is not the case. In the Paris Commune the delegates of the people took executive power into their own hands. Lenin reversed this. His executive took legislative power from the hands of the people's delegates. In the former case, power was decentralised into the hands of the population. In the latter case, it was centralised

into the hands of a few. This concentration of power into executive committees occurred at all levels of the soviet hierarchy (see section 6 for full details). Simply put, legislative and executive power was taken **from** the soviets assemblies and handed to Bolshevik dominated executive committees.

What of the next principle, namely the election and recall of all officials? This lasted slightly longer, namely around 5 months. By March of 1918, the Bolsheviks started a systematic campaign against the elective principle in the workplace, in the military and even in the soviets. In the workplace, Lenin was arguing for appointed one-man managers *"vested with dictatorial powers"* by April 1918 (see section 10). In the military, Trotsky simply decreed the end of elected officers in favour of appointed officers (see section 14). And as far as the soviets go, the Bolsheviks were refusing to hold elections because they *"feared that the opposition parties would show gains."* When elections were held, *"Bolshevik armed force usually overthrew the results"* in provincial towns. Moreover, the Bolsheviks *"pack[ed] local soviets"* with representatives of organisations they controlled *"once they could not longer count on an electoral majority."* [Samuel Farber, **Before Stalinism**, p. 22, p. 24 and p. 33] This gerrymandering was even practised at the all-Russian soviet congress (see section 6 for full details of this Bolshevik onslaught against the soviets). So much for competition among the parties within the soviets! And as far as the right of recall went, the Bolsheviks only supported this when the workers were recalling the opponents of the Bolsheviks, not when the workers were recalling them.

In summary, in under six months the Bolsheviks had replaced election of *"all officials"* by appointment from above in many areas of life. Democracy had simply being substituted by appointed from above (see section 4 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?"for the deeply undemocratic reasoning used to justify this top-down and autocratic system of so-called democracy). The idea that different parties could compete for votes in the soviets (or elsewhere) was similarly curtailed and finally abolished.

Then there was the elimination of bureaucracy. As we show in section 7 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", a new bureaucratic and centralised system quickly emerged. Rather than immediately cutting the size and power of the bureaucracy, it steadily grew. It soon became the real power in the state (and, ultimately, in the 1920s became the social base for the rise of Stalin). Moreover, with the concentration of power in the hands of the Bolshevik government, the *"essence"* of bureaucracy remained as the party leaders became *"privileged persons divorced from the masses and* ***superior to*** *the masses."* They were, for example, more than happy to justify their suppression of military democracy in terms of them knowing better than the general population what was best for them (see section 4 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?" for details).

Then there is the fourth point, namely the elimination of the standing army, the suppression of *"special bodies of armed men"* by the *"armed masses."* This promise did not last two months. On the 20th of December, 1917, the Council of People's Commissars decreed the formation of a political (secret) police force, the *"Extraordinary Commission to Fight Counter-Revolution."* This was more commonly known by the Russian initials of the first two terms of its official name: The Cheka. Significantly, its founding decree stated it was to *"watch the press, saboteurs, strikers, and the Socialist-Revolutionaries of the Right."* [contained in Robert V. Daniels, **A Documentary History of Communism**, vol. 1, p. 133]

While it was initially a small organisation, as 1918 progressed it grew in size and activity. By April 1918, it was being used to break the anarchist movement across Russia (see section 23 for details). The Cheka soon became a key instrument of Bolshevik rule, with the full support of the likes of Lenin and Trotsky. The Cheka was most definitely a *"special body of armed men"* and not the same as the *"armed workers."* In other words, Lenin's claims in **State and Revolution** did not last two months and in under six months the Bolshevik state had a mighty group of *"armed men"* to impose its will.

This is not all. The Bolsheviks also conducted a sweeping transformation of the military within the first six months of taking power. During 1917, the soldiers and sailors (encouraged by the Bolsheviks and other revolutionaries) had formed their own committees and elected officers. In March 1918, Trotsky simply abolished all this by decree and replaced it with appointed officers (usually ex-Tsarist ones). In this way, the Red Army was turned from a workers' militia (i.e. an armed people) into a *"special body"* separate from the general population (see section 15 for further discussion on this subject).

So instead of eliminating a *"special force"* above the people, the Bolsheviks did the opposite by creating a political police force (the Cheka) and a standing army (in which elections were a set aside by decree). These were special, professional, armed forces standing apart from the people and unaccountable to them. Indeed, they were used to repress strikes and working class unrest, a topic we now turn to.

Then there is the idea of that Lenin's "workers' state" would simple be an instrument of violence directed at the exploiters. This was not how it turned out in practice. As the Bolsheviks lost popular support, they turned the violence of the "worker's state" against the workers (and, of course, the peasants). As noted above, when the Bolsheviks lost soviet elections they used force to disband them (see section 6 for further details). Faced with strikes and working class protest during this period, the Bolsheviks responded with state violence (see section 5 of the appendix on "What caused the degeneration of the Russian Revolution?" for details). We will discuss the implications of this for Lenin's theory below. So, as regards the claim that the new ("workers") state would repress only the exploiters, the truth was that it was used to repress whoever opposed Bolshevik power, including workers and peasants.

As can be seen, after the first six months of Bolshevik rule not a single measure advocated by Lenin in **State and Revolution** existed in "revolutionary" Russia. Some of the promises were broken in quiet quickly (overnight, in one case). Most took longer. For example, the democratisation of the armed forces had been decreed in late December 1917. However, this was simply acknowledging the existing revolutionary gains of the military personnel. Similarly, the Bolsheviks passed a decree on workers' control which, again, simply acknowledged the actual gains by the grassroots (and, in fact, limited them for further development — see section 9). This cannot be taken as evidence of the democratic nature of Bolshevism as most governments faced with a revolutionary movement will acknowledge and "legalise" the facts on the ground (until such time as they can neutralise or destroy them). For example, the Provisional Government created after the February Revolution also legalised the revolutionary gains of the workers (for example, legalising the soviets, factory committees, unions, strikes and so forth). The real question is whether Bolshevism continued to encourage these revolutionary gains once it had consolidated its power. Which they did not. Indeed, it can be argued that the Bolsheviks simply managed to do what the Provisional Government it replaced had failed to do, namely destroy the various organs of popular self-management created by the revolutionary masses. So the significant fact is not

that the Bolsheviks recognised the gains of the masses but that their toleration of the application of what their followers say were their real principles did not last long and was quickly ended. Moreover, when the leading Bolsheviks looked back at this abolition they did not consider it in any way in contradiction to the principles of "communism" (see section 14).

We have stressed this period for a reason. This was the period **before** the out-break of major Civil War and thus the policies applied show the actual nature of Bolshevism, it's essence if you like. This is a significant date as most Leninists blame the failure of Lenin to live up to his promises on this even. In reality, the civil war was **not** the reason for these betrayals — simply because it had not started yet (see section 16 on when the civil war started and its impact). Each of the promises were broken in turn months before the civil war happened. *"All Power to the Soviets"* became, very quickly, *"All Power to the Bolsheviks."* In the words of historian Marc Ferro:

> *"In a way,* ***The State and Revolution*** *even laid the foundations and sketched out the essential features of an alternative to Bolshevik power, and only the pro-Leninist tradition has used it, almost to quieten its conscience, because Lenin, once in power, ignored its conclusions. The Bolsheviks, far from causing the state to wither away, found endless reasons for justifying its enforcement."* [**October 1917**, pp. 213–4]

Where does that leave Lenin's **State and Revolution**? Well, modern-day Leninists still urge us to read it, considering it his greatest work and the best introduction to what Leninism really stands for. For example, we find Leninist Tony Cliff calling that book *"Lenin's real testament"* while, at the same time, acknowledging that its *"message ... which was the guide for the first victorious proletarian revolution, was violated again and again during the civil war."* Not a very good *"guide"* or that convincing a *"message"* if it was not applicable in the very circumstances it was designed to be applied in (a bit like saying you have an excellent umbrella but it only works when it is not raining). Moreover, Cliff is factually incorrect. The Bolsheviks *"violated"* that *"guide"* before the civil war started (i.e. when *"the victories of the Czechoslovak troops over the Red Army in June 1918, that threatened the greatest danger to the Soviet republic,"* to quote Cliff). Similarly, much of the economic policies implemented by the Bolsheviks had their roots in that book and the other writings by Lenin from 1917 (see section 5 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?"). [**Lenin**, vol. 3, p. 161 and p. 18]

Given this, what use is Lenin's **State and Revolution**? If this really was the *"guide"* it is claimed to be, the fact that it proved totally impractical suggests it should simply be ignored. Simply put, if the side effects of a revolution (such as civil war) require it to be ripped up then modern Leninists should come clean and admit that revolution and workers' democracy simply do not go together. This was, after all, the conclusion of Lenin and Trotsky (see section H.3.8). As such, they should not recommend Lenin's work as an example of what Bolshevism aims for. If, however, the basic idea of workers' democracy and freedom are valid and considered the only way of achieving socialism then we need to wonder **why** the Bolsheviks did not apply them when they had the chance, particularly when the Makhnovists in the Ukraine did. Such an investigation would only end up by concluding the validity of anarchism, **not** Leninism.

This can be seen from the trajectory of Bolshevik ideology post-October. Simply put, it was not bothered by the breaking of the promises of **State and Revolution** and 1917 in general. As such, Cliff is just wrong to assert that while the message of **State and Revolution** was

"violated again and again" it *"was also invoked again and again against bureaucratic degeneration."* [Cliff, **Op. Cit.**, p. 161] Far from it. Lenin's **State and Revolution** was rarely invoked against degeneration by the mainstream Bolshevik leadership. Indeed, they happily supported party dictatorship and one-man management. Ironically for Cliff, it **was** famously invoked against the state capitalist policies being implemented in early 1918. This was done by the "Left Communists" around Bukharin in their defence of workers' self-management against Lenin's policy! Lenin told them to reread it (along with his other 1917 works) to see that "state capitalism" was his aim all along! Not only that, he quoted from **State and Revolution**. He argued that *"accounting and control"* was required *"for the proper functioning of the first stage of communist society."* *"And this control,"* he continued, *"must be established not only over 'the insignificant capitalist minority, over the gentry ... ', but also over the workers who 'have been thoroughly corrupted by capitalism ... '"* He ended by saying it was *"significant that Bukharin did **not** emphasise **this**."* [**Collected Works**, vol. 27, pp. 353–4] Needless to say, the Leninists who urge us to read Lenin's work do not emphasis that either.

As the Bolsheviks lost more and more support, the number of workers *"thoroughly corrupted by capitalism"* increased. How to identify them was easy: they did not support the party. As historian Richard summarises, a *"lack of identification with the Bolshevik party was treated as the absence of political consciousness altogether."* [**Soviet Communists in Power**, p. 94] This is the logical conclusion of vanguardism, of course (see section H.5.3). However, to acknowledge that state violence was also required to "control" the working class totally undermines the argument of **State and Revolution**.

This is easy to see and to prove theoretically. For example, by 1920, Lenin was more than happy to admit that the "workers' state" used violence against the masses. At a conference of his political police, the Cheka, Lenin argued as follows:

> *"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves."* [**Collected Works**, vol. 42, p. 170]

This was simply summarising Bolshevik practice from the start. However, in **State and Revolution** Lenin had argued for imposing *"a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists."* In 1917 he was *"clear that where is suppression there is also violence, there is no freedom, no democracy."* [**Op. Cit.**, pp. 337–8] So if violence is directed against the working class then, obviously, there can be *"no freedom, no democracy"* for that class. And who identifies who the *"wavering and unstable"* elements are? Only the party. Thus any expression of workers' democracy which conflicts with the party is a candidate for *"revolutionary coercion."* So it probably just as well that the Bolsheviks had eliminated military democracy in March, 1918.

Trotsky expands on the obvious autocratic implications of this in 1921 when he attacked the Workers' Opposition's ideas on economic democracy:

> *"The Party ... is ... duty bound to retain its dictatorship, regardless of the temporary vacillations of the amorphous masses, regardless of the temporary vacillations even of the working class. This awareness is essential for cohesion; without it the Party is in danger of perishing ... At any given moment, the dictatorship does not rest on the formal*

principle of workers' democracy ... if we look upon workers' democracy as something unconditional ... then ... every plant should elect its own administrative organs and so on ... From a formal point of view this is the clearest link with workers' democracy. But we are against it. Why? ... Because, in the first place, we want to retain the dictatorship of the Party, and, in the second place, because we think that the [democratic] way of managing important and essential plants is bound to be incompetent and prove a failure from an economic point of view ..." [quoted by Jay B. Sorenson, **The Life and Death of Soviet Trade Unionism**, p. 165]

Thus the Russian Revolution and the Bolshevik regime confirmed anarchist theory and predictions about state socialism. In the words of Luigi Fabbri:

> "It is fairly certain that between the capitalist regime and the socialist there will be an intervening period of struggle, during which proletariat revolutionary workers will have to work to uproot the remnants of bourgeois society ... But if the object of this struggle and this organisation is to free the proletariat from exploitation and state rule, then the role of guide, tutor or director cannot be entrusted to a new state, which would have an interest in pointing the revolution in a completely opposite direction...
>
> "The outcome would be that a new government — battening on the revolution and acting throughout the more or less extended period of its 'provisional' powers — would lay down the bureaucratic, military and economic foundations of a new and lasting state organisation, around which a compact network of interests and privileges would, naturally, be woven. Thus in a short space of time what one would have would not be the state abolished, but a state stronger and more energetic than its predecessor and which would come to exercise those functions proper to it — the ones Marx recognised as being such — 'keeping the great majority of producers under the yoke of a numerically small exploiting minority.'
>
> "This is the lesson that the history of all revolutions teaches us, from the most ancient down to the most recent; and it is confirmed ... by the day-to-day developments of the Russian revolution ...
>
> "Certainly, [state violence] starts out being used against the old power ... But as the new power goes on consolidating its position ... ever more frequently and ever more severely, the mailed fist of dictatorship is turned against the proletariat itself in whose name that dictatorship was set up and is operated! ... the actions of the present Russian government [of Lenin and Trotsky] have shown that in real terms (and it could not be otherwise) the 'dictatorship of the proletariat' means police, military, political and economic dictatorship exercised over the broad mass of the proletariat in city and country by the few leaders of the political party.
>
> "The violence of the state always ends up being used AGAINST ITS SUBJECTS, of whom the vast majority are always proletarians ... The new government will be able to expropriate the old ruling class in whole or in part, but only so as to establish a new ruling class that will hold the greater part of the proletariat in subjection.

> "That will come to pass if those who make up the government and the bureaucratic, military and police minority that upholds it end up becoming the real owners of wealth when the property of everyone is made over exclusively to the state. In the first place, the failure of the revolution will be self evident. In the second, in spite of the illusions that many people create, the conditions of the proletariat will always be those of a subject class." [*"Anarchy and 'Scientific' Communism"*, in **The Poverty of Statism**, pp. 13–49, Albert Meltzer (ed.), pp. 26–31]

The standard response by most modern Leninists to arguments like this about Bolshevism is simply to downplay the authoritarianism of the Bolsheviks by stressing the effects of the civil war on shaping their ideology and actions. However, this fails to address the key issue of why the reality of Bolshevism (even before the civil war) was so different to the rhetoric. Anarchists, as we discuss in "How did Bolshevik ideology contribute to the failure of the Revolution?", can point to certain aspects of Bolshevik ideology and the social structures its favoured which can explain it. The problems facing the revolution simply brought to the fore the limitations and dangers inherent in Leninism and, moreover, shaping them in distinctive ways. We draw the conclusion that a future revolution, as it will face similar problems, would be wise to avoid applying Leninist ideology and the authoritarian practices it allows and, indeed, promotes by its support of centralisation, confusion of party power with class power, vanguardism and equation of state capitalism with socialism. Leninists, in contrast, can only stress the fact that the revolution was occurring in difficult circumstances and hope that "fate" is more kind to them next time — as if a revolution, as Lenin himself noted in 1917, would not occur during nor create "difficult" circumstances! Equally, they can draw no lessons (bar repeat what the Bolsheviks did in 1917 and hope for better objective circumstances!) from the Russian experience simply because they are blind to the limitations of their politics. They are thus doomed to repeat history rather than make it.

So where does this analysis of Lenin's **State and Revolution** and the realities of Bolshevik power get us? The conclusions of dissent Marxist Samuel Farber seem appropriate here. As he puts it, *"the very fact that a Sovnarkom had been created as a separate body from the CEC [Central Executive Committee] of the soviets clearly indicates that, Lenin's* ***State and Revolution*** *notwithstanding, the separation of at least the top bodies of the executive and the legislative wings of the government remained in effect in the new Soviet system."* This suggests *"that* ***State and Revolution*** *did not play a decisive role as a source of policy guidelines for 'Leninism in power.'"* After all, *"immediately after the Revolution the Bolsheviks established an executive power ... as a clearly separate body from the leading body of the legislature... Therefore, some sections of the contemporary Left appear to have greatly overestimated the importance that* ***State and Revolution*** *had for Lenin's government. I would suggest that this document ... can be better understood as a distant, although doubtless sincere [!], socio-political vision ... as opposed to its having been a programmatic political statement, let alone a guide to action, for the period immediately after the successful seizure of power."* [Farber, **Op. Cit.**, pp. 20–1 and p. 38]

That is **one** way of looking at it. Another would be to draw the conclusion that a *"distant ... socio-political vision"* drawn up to sound like a *"guide to action"* which was then immediately ignored is, at worse, little more than a deception, or, at best, a theoretical justification for seizing power in the face of orthodox Marxist dogma. Whatever the rationale for Lenin writing his book, one thing is true — it was never implemented. Strange, then, that Leninists today urge use to

read it to see what "Lenin really wanted." Particularly given that so few of its promises were actually implemented (those that were just recognised the facts on the ground) and **all** of were no longer applied in less than six months after the seize of power.

The best that can be said is that Lenin did want this vision to be applied but the realities of revolutionary Russia, the objective problems facing the revolution, made its application impossible. This is the standard Leninist account of the revolution. They seem unconcerned that they have just admitted that Lenin's ideas were utterly impractical for the real problems that any revolution is most likely to face. This was the conclusion Lenin himself drew, as did the rest of the Bolshevik leadership. This can be seen from the actual practice of "Leninism in power" and the arguments it used. And yet, for some reason, Lenin's book is still recommended by modern Leninists!

5 Did the Bolsheviks really aim for Soviet power?

It seems a truism for modern day Leninists that the Bolsheviks stood for "soviet power." For example, they like to note that the Bolsheviks used the slogan *"All Power to the Soviets"* in 1917 as evidence. However, for the Bolsheviks this slogan had a radically different meaning to what many people would consider it to mean.

As we discuss in section 25, it was the anarchists (and those close to them, like the SR-Maximalists) who first raised the idea of soviets as the means by which the masses could run society. This was during the 1905 revolution. At that time, neither the Mensheviks nor the Bolsheviks viewed the soviets as the possible framework of a socialist society. This was still the case in 1917, until Lenin returned to Russia and convinced the Bolshevik Party that the time was right to raise the slogan *"All Power to the Soviets."*

However, as well as this, Lenin also advocated a somewhat different vision of what a Bolshevik revolution would result in. Thus we find Lenin in 1917 continually repeating the basic idea: *"The Bolsheviks must assume power."* The Bolsheviks *"can and **must** take state power into their own hands."* He raised the question of *"will the Bolsheviks dare take over full state power alone?"* and answered it: *"I have already had occasion ... to answer this question in the affirmative."* Moreover, *"a political party ... would have no right to exist, would be unworthy of the name of party ... if it refused to take power when opportunity offers."* [**Selected Works**, vol. 2, p 328, p. 329 and p. 352]

He equated party power with popular power: *"the power of the Bolsheviks – that is, the power of the proletariat."* Moreover, he argued that Russia *"was ruled by 130,000 landowners ... and they tell us that Russia will not be able to be governed by the 240,000 members of the Bolshevik Party — governing in the interest of the poor and against the rich."* He stresses that the Bolsheviks *"are not Utopians. We know that just any labourer or any cook would be incapable of taking over immediately the administration of the State."* Therefore they *"demand that the teaching should be conducted by the class-consciousness workers and soldiers, that this should be started immediately."* Until then, the *"conscious workers must be in control."* [**Will the Bolsheviks Maintain Power?** p. 102, pp. 61–62, p. 66 and p. 68]

As such, given this clear and unambiguous position throughout 1917 by Lenin, it seems incredulous, to say the least, for Leninist Tony Cliff to assert that *"[t]o start with Lenin spoke of the **proletariat,** the **class** — not the Bolshevik Party — assuming state power."* [**Lenin**, vol. 3, p. 161] Surely the title of one of Lenin's most famous pre-October essays, usually translated as *"Can the Bolsheviks Retain State Power?"*, should have given the game away? As would, surely, quoting numerous calls by Lenin for the Bolsheviks to seize power? Apparently not.

This means, of course, Lenin is admitting that the working class in Russia would **not** have power under the Bolsheviks. Rather than "the poor" governing society directly, we would have **the Bolsheviks** governing in their interests. Thus, rather than soviet power as such, the Bolsheviks aimed for "party power through the soviets" — a radically different position. And as we discuss in the next section, when soviet power clashed with party power the former was always sacrificed to ensure the latter. As we indicate in section H.1.2, this support for party power before the revolution was soon transformed into a defence for party dictatorship after the Bolsheviks had seized power. However, we should not forget, to quote one historian, that the Bolshevik leaders *"anticipated a 'dictatorship of the proletariat,' and that concept was a good deal closer to a party dictatorship in Lenin's 1917 usage than revisionist scholars sometimes suggest."* [Sheila Fitzpatrick, *"The Legacy of the Civil War,"* pp. 385–398, **Party, State, and Society in the Russian Civil War**, Diane P. Koenker, William G. Rosenberg and Ronald Grigor Suny (eds.), p. 388]

While modern-day Leninists tend to stress the assumption of power by the soviets as the goal of the Bolshevik revolution, the Bolsheviks themselves were more honest about it. For example, Trotsky quotes Lenin at the first soviet congress stating that it was *"not true to say that no party exists which is ready to assume power; such a party exists: this is our party."* Moreover, *"[o]ur party is ready to assume power."* As the Second Congress approached, Lenin *"rebuked those who connected the uprising with the Second Congress of the Soviets."* He protested against Trotsky's argument that they needed a Bolshevik majority at the Second Congress, arguing (according to Trotsky) that *"[w]e have to win power and not tie ourselves to the Congress. It was ridiculous and absurd to warn the enemy about the date of the rising ... First the party must seize power, arms in hand, and then we could talk about the Congress."* [**On Lenin**, p. 71, p. 85]

Trotsky argued that *"the party could not seize power by itself, independently of the Soviets and behind its back. This would have been a mistake ... [as the] soldiers knew their delegates in the Soviet; it was through the Soviet that they knew the party. If the uprising had taken place behind the back of the Soviet, independently of it, without its authority ... there might have been a dangerous confusion among the troops."* Significantly, Trotsky made no mention of the proletariat. Finally, Lenin came over to Trotsky's position, saying *"Oh, all right, one can proceed in this fashion as well, provided we seize power."* [**Op. Cit.**, p. 86 and p. 89]

Trotsky made similar arguments in his **History of the Russian Revolution** and his article **Lessons of October**. Discussing the July Days of 1917, for example, Trotsky discusses whether (to quote the title of the relevant chapter) *"Could the Bolsheviks have seized the Power in July?"* and noted, in passing, the army *"was far from ready to raise an insurrection in order to give the power to the Bolshevik Party."* As far as the workers were concerned, although *"inclining toward the Bolsheviks in its overwhelming majority, had still not broken the umbilical cord attaching it to the Compromisers"* and so the Bolsheviks could not have *"seized the helm in July."* He then lists other parts of the country where the soviets were ready to take power. He states that in *"a majority of provinces and county seats, the situation was incomparably less favourable"* simply because the Bolsheviks were not as well supported. Later he notes that *"[m]any of the provincial soviets had already, before the July days, become organs of power."* Thus Trotsky was only interested in whether the workers could have put the Bolsheviks in power or not rather than were the soviets able to take power themselves. Party power was the decisive criteria. [**History of the Russian Revolution**, vol. 2, p. 78, p. 77, p. 78, p. 81 and p. 281]

This can be seen from the October insurrection. Trotsky again admits that the *"Bolsheviks could have seized power in Petrograd at the beginning of July"* but *"they could not have held it."* However,

by September the Bolsheviks had gained majorities in the Petrograd and Moscow soviets. The second Congress of Soviets was approaching. The time was considered appropriate to think of insurrection. By in whose name and for what end? Trotsky makes it clear. *"A revolutionary party is interested in legal coverings,"* he argued and so the party could use the defending the second Congress of Soviets as the means to justify its seizure of power. He raises the question: *"Would it not have been simpler ... to summon the insurrection directly in the name of the party?"* and answers it in the negative. *"It would be an obvious mistake,"* he argued, *"to identify the strength of the Bolshevik party with the strength of the soviets led by it. The latter was much greater than the former. However, without the former it would have been mere impotence."* He then quotes numerous Bolshevik delegates arguing that the masses would follow the soviet, not the party. Hence the importance of seizing power in the name of the soviets, regardless of the fact it was the Bolshevik party who would in practice hold *"all power."* Trotsky quotes Lenin are asking *"Who is to seize power?" "That is now of no importance,"* argued Lenin. *"Let the Military Revolutionary Committee take it, or 'some other institution,' which will declare that it will surrender the power only to the genuine representatives of the interests of the people."* Trotsky notes that *"some other institution"* was a *"conspirative designation for the Central Committee of the Bolsheviks."* And who turned out to be the *"genuine representatives of the interests of the people"*? By amazing co-incidence the Bolsheviks, the members of whose Central Committee formed the first "soviet" government. [**Op. Cit.**, vol. 3, p. 265, p. 259, p. 262, p. 263 and p. 267]

As we discuss in section H.3.11, Trotsky was simply repeating the same instrumentalist arguments he had made earlier. Clearly, the support for the soviets was purely instrumental, simply a means of securing party power. For Bolshevism, the party was the key institution of proletarian revolution:

> *"The party set the soviets in motion, the soviets set in motion the workers, soldiers, and to some extent the peasantry ... If you represent this conducting apparatus as a system of cog-wheels — a comparison which Lenin had recourse at another period on another theme – you may say that the impatient attempt to connect the party wheel directly with the gigantic wheel of the masses — omitting the medium-sized wheel of the soviets — would have given rise to the danger of breaking the teeth of the party wheel."* [Trotsky, **Op. Cit.**, p. 264]

Thus the soviets existed to allow the party to influence the workers. What of the workers running society directly? What if the workers reject the decisions of the party? After all, **before** the revolution Lenin *"more than once repeated that the masses are far to the left of the party, just as the party is to the left of the Central Committee."* [Trotsky, **Op. Cit.**, p. 258] What happens when the workers refuse to be set in motion by the party but instead set themselves in motion and reject the Bolsheviks? What then for the soviets? Looking at the logic of Trotsky's instrumentalist perspective, in such a case we would predict that the soviets would have to be tamed (by whatever means possible) in favour of party power (the real goal). And this is what did happen. The fate of the soviets after October prove that the Bolsheviks did not, in fact, seek soviet power without doubt (see next section). And as we discuss in section 4 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", the peculiar Bolshevik definition of "soviet power" allowed them to justify the elimination of from the bottom-up grassroots democracy in the military and in the workplace with top-down appointments.

Thus we have a distinctly strange meaning by the expression *"All Power to the Soviets."* In practice, it meant that the soviets alienate its power to a Bolshevik government. This is what the Bolsheviks considered as "soviet power," namely party power, pure and simple. As the Central Committee argued in November 1917, *"it is impossible to refuse a purely Bolshevik government without treason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets ... handed power over to this government."* [contained in Robert v. Daniels (ed.), **A Documentary History of Communism**, vol. 1, pp. 128–9] Lenin was clear, arguing mere days after the October Revolution that *"our present slogan is: No Compromise, i.e. for a homogeneous Bolshevik government."* [quoted by Daniels, **Conscience of the Revolution**, p. 65]

In other words, "soviet power" exists when the soviets hand power over the someone else (namely the Bolshevik leaders)! The difference is important, *"for the Anarchists declared, if 'power' really should belong to the soviets, it could not belong to the Bolshevik party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets."* [Voline, **The Unknown Revolution**, p. 213]

Which means that while anarchists and Leninists both use the expression *"All Power to the Soviets"* it does not mean they mean exactly the same thing by it. In practice the Bolshevik vision simply replaced the power of the soviets with a "soviet power" above them:

> *"The success of the Bolsheviks in the October Revolution — that is to say, the fact that they found themselves in power and from there subordinated the whole Revolution to their Party is explained by their ability to substitute the idea of a Soviet power for the social revolution and the social emancipation of the masses. A priori, these two ideas appear as non-contradictory for it was possible to understand Soviet power as the power of the soviets, and this facilitated the substitution of the idea of Soviet power for that of the Revolution. Nevertheless, in their realisation and consequences these ideas were in violent contraction to each other. The conception of Soviet Power incarnated in the Bolshevik state, was transformed into an entirely traditional bourgeois power concentrated in a handful of individuals who subjected to their authority all that was fundamental and most powerful in the life of the people — in this particular case, the social revolution. Therefore, with the help of the 'power of the soviets' — in which the Bolsheviks monopolised most of the posts — they effectively attained a total power and could proclaim their dictatorship throughout the revolutionary territory ... All was reduced to a single centre, from where all instructions emanated concerning the way of life, of thought, of action of the working masses."* [Peter Arshinov, **The Two Octobers**]

Isolated from the masses, holding power on their behalf, the Bolshevik party could not help being influenced by the realities of their position in society and the social relationships produced by statist forms. Far from being the servants of the people, they become upon the seizing of power their masters. As we argue in section 7 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", the experience of Bolshevism in power confirmed anarchist fears that the so-called "workers' state" would quickly become a danger to the revolution, corrupting those who held power and generating a bureaucracy around the new state bodies which came into conflict with both the ruling party and the masses. Placed above the people, isolated from them by centralisation of power, the Bolsheviks pre-revolutionary aim for party power unsurprising became in practice party dictatorship.

In less than a year, by July 1918, the soviet regime was a **de facto** party dictatorship. The theoretical revisions soon followed. Lenin, for example, was proclaiming in early December 1918 that while legalising the Mensheviks the Bolsheviks would *"reserve state power for ourselves, **and for ourselves alone.**"* [**Collected Works**, vol. 28, p. 213] Victor Serge records how when he arrived in Russia in the following month he discovered *"a colourless article"* signed by Zinoviev on *"The Monopoly of Power"* which said *"Our Party rules alone ... it will not allow anyone ... The false democratic liberties demanded by the counter-revolution."* [**Memoirs of a Revolutionary**, p. 69] Serge, like most Bolsheviks, embraced this perspective wholeheartedly. For example, when the Bolsheviks published Bakunin's "confession" to the Tsar in 1921 (in an attempt to discredit anarchism) *"Serge seized on Bakunin's passage concerning the need for dictatorial rule in Russia, suggesting that 'already in 1848 Bakunin had presaged Bolshevism.'"* [Lawrence D. Orton, *"introduction,"* **The Confession of Mikhail Bakunin**, p. 21] At the time Bakunin wrote his "confession" he was not an anarchist. At the time Serge wrote his comments, he was a leading Bolshevik and reflecting mainstream Bolshevik ideology.

Indeed, so important was it considered by them, the Bolsheviks revised their theory of the state to include this particular lesson of their revolution (see section H.3.8 for details). As noted in section H.1.2, all the leading Bolsheviks were talking about the *"dictatorship of the party"* and continued to do so until their deaths. Such a position, incidentally, is hard to square with support for soviet power in any meaningful term (although it is easy to square with an instrumentalist position on workers' councils as a means to party power). It was only in the mid-30s that Serge started to revise his position for this position (Trotsky still subscribed to it). By the early 1940s, he wrote that *"[a]gainst the Party the anarchists were right when they inscribed on their black banners, 'There is no worse poison than power' — meaning absolute power. From now on the psychosis of power was to captive the great majority of the leadership, especially at the lower levels."* [Serge, **Op. Cit.**, p. 100]

Nor can the effects of the civil war explain this shift. As we discuss in the next section, the Bolshevik assault on the soviets and their power started in the spring of 1918, months before the start of large scale civil war. And it should be stressed that the Bolsheviks were not at all bothered by the creation of party dictatorship over the soviets. Indeed, in spite of ruling over a one party state Lenin was arguing in November 1918 that *"Soviet power is a million times more democratic than the most democratic bourgeois republic."* How can that be when the workers do not run society nor have a say in who rules them? When Karl Kautsky raised this issue, Lenin replied by saying he *"fails to see the **class** nature of the state apparatus, of the machinery of state ... The Soviet government is the **first** in the world ... to **enlist** the people, specifically the **exploited** people in the work of administration."* [**Collected Works**, vol. 28, p. 247 and p. 248]

However, the key issue is not whether workers take part in the state machinery but whether they determine the policies that are being implemented, i.e. whether the masses are running their own lives. After all, as Ante Ciliga pointed out, the Stalinist GPU (secret police) *"liked to boast of the working class origin of its henchmen."* One of his fellow prisoners retorted to such claims by pointing out they were *"wrong to believe that in the days the Tsar the gaolers were recruited from among the dukes and the executioners from among the princes!"* [**The Russian Engima**, pp. 255–6] Simply put, just because the state administration is made up of bureaucrats who were originally working class does not mean that the working class, as a class, manages society.

In December of that year Lenin went one further and noted that at the Sixth Soviet Congress *"the Bolsheviks had 97 per cent"* of delegates, i.e. "practically all representatives of the workers

and peasants of the whole of Russia." This was proof of *"how stupid and ridiculous is the bourgeois fairy-tale about the Bolsheviks only having minority support."* [**Op. Cit.**, pp. 355–6] Given that the workers and peasants had no real choice in who to vote for, can this result be surprising? Of course not. While the Bolsheviks **had** mass support a year previously, pointing to election results under a dictatorship where all other parties and groups are subject to state repression is hardly convincing evidence for current support. Needless to say, Stalin (like a host of other dictators) made similar claims on similarly dubious election results. If the Bolsheviks were sincere in their support for soviet power then they would have tried to organise genuine soviet elections. This was possible even during the civil war as the example of the Makhnovists showed.

So, in a nutshell, the Bolsheviks did not fundamentally support the goal of soviet power. Rather, they aimed to create a "soviet power," a Bolshevik power above the soviets which derived its legitimacy from them. However, if the soviets conflicted with that power, it were the soviets which were repudiated **not** party power. Thus the result of Bolshevik ideology was the marginalisation of the soviets and their replacement by Bolshevik dictatorship. This process started before the civil war and can be traced to the nature of the state as well as the underlying assumptions of Bolshevik ideology (see "How did Bolshevik ideology contribute to the failure of the Revolution?").

6 What happened to the soviets after October?

As indicated in the last question, the last thing which the Bolsheviks wanted was ***"all power to the soviets."*** Rather they wanted the soviets to hand over that power to a Bolshevik government. As the people in liberal capitalist politics, the soviets were "sovereign" in name only. They were expected to delegate power to a government. Like the "sovereign people" of bourgeois republics, the soviets were much praised but in practice ignored by those with real power.

In such a situation, we would expect the soviets to play no meaningful role in the new "workers' state." Under such a centralised system, we would expect the soviets to become little more than a fig-leaf for party power. Unsurprisingly, this is **exactly** what they did become. As we discuss in section 7 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", anarchists are not surprised by this as the centralisation so beloved by Marxists is designed to empower the few at the centre and marginalise the many at the circumference.

The very first act of the Bolshevik revolution was for the Second Congress of Soviets to alienate its power and hand it over to the "Council of People's Commissars." This was the new government and was totally Bolshevik in make-up (the Left SRs later joined it, although the Bolsheviks always maintained control). Thus the first act of the revolution was the creation of a power **above** the soviets. Although derived from the soviet congress, it was not identical to it. Thus the Bolshevik "workers' state" or "semi-state" started to have the same characteristics as the normal state (see section H.3.7 for a discussion of what marks a state).

The subsequent marginalisation of the soviets in the "soviet" state occurred from top to bottom should not, therefore be considered an accident or a surprise. The Bolshevik desire for party power within a highly centralised state could have no other effect. At the top, the Central Executive Committee (CEC or VTsIK) was quickly marginalised from power. This body was meant to be the highest organ of soviet power but, in practice, it was sidelined by the Bolshevik government. This can be seen when, just four days after seizing power, the Bolshevik Council of People's Commissars (CPC or Sovnarkom) *"unilaterally arrogated to itself legislative power sim-*

ply by promulgating a decree to this effect. This was, effectively, a Bolshevik ***coup d'etat*** *that made clear the government's (and party's) pre-eminence over the soviets and their executive organ. Increasingly, the Bolsheviks relied upon the appointment from above of commissars with plenipotentiary powers, and they split up and reconstituted fractious Soviets and intimidated political opponents."* [Neil Harding, **Leninism**, p. 253] Strange actions for a party proclaiming it was acting to ensure "All power to the soviets" (as we discussed in the last section, this was always considered by Lenin as little more than a slogan to hide the fact that the party would be in power).

It is doubtful that when readers of Lenin's **State and Revolution** read his argument for combining legislative and executive powers into one body, they had this in mind! But then, as we discussed in section 4, that work was never applied in practice so we should not be too surprised by this turn of events. One thing is sure, four days after the "soviet" revolution the soviets had been replaced as the effective power in society by a handful of Bolshevik leaders. So the Bolsheviks immediately created a power **above** the soviets in the form of the CPC. Lenin's argument in **The State and Revolution** that, like the Paris Commune, the workers' state would be based on a fusion of executive and administrative functions in the hands of the workers' delegates did not last one night. In reality, the Bolshevik party was the **real** power in "soviet" Russia.

Given that the All-Russian central Executive Committee of Soviets (VTsIK) was dominated by Bolsheviks, it comes as no surprise to discover it was used to augment this centralisation of power into the hands of the party. The VTsIK (*"charged by the October revolution with controlling the government,"* the Sovnarkom) was *"used not to control but rather extend the authority and centralising fiat of the government. That was the work of Iakov Sverdlov, the VTsIK chairman, who — in close collaboration with Lenin as chairman of the Sovnarkom — ensured that the government decrees and ordinances were by the VTsIK and that they were thus endowed with Soviet legitimacy when they were sent to provincial soviet executive committees for transmission to all local soviets ... To achieve that, Sverdlov had to reduce the 'Soviet Parliament' to nothing more than an 'administrative branch' (as Sukhanov put it) of the Sovnarkom. Using his position as the VTsIK chairman and his tight control over its praesidium and the large, disciplined and compliant Bolshevik majority in the plenary assembly, Sverdlov isolated the opposition and rendered it impotent. So successful was he that, by early December 1917, Sukhanov had already written off the VTsIK as 'a sorry parody of a revolutionary parliament,' while for the Bolshevik, Martin Latsis-Zurabs, the VTsIL was not even a good rubberstamp. Latsis campaigned vigorously in March and April 1918 for the VTsIK's abolition: with its 'idle, long-winded talk and its incapacity for productive work' the VTsIK merely held up the work of government, he claimed. And he may have had a point: during the period of 1917 to 1918, the Sovnarkom issued 474 decrees, the VTsIK a mere 62."* [Israel Getzler, **Soviets as Agents of Democratisation**, p. 27]

This process was not an accident. Far from it. In fact, the Bolshevik chairman Sverdlov knew exactly what he was doing. This included modifying the way the CEC worked:

> *"The structure of VTsIK itself began to change under Sverdlov. He began to use the presidium to circumvent the general meeting, which contained eloquent minority spokesmen ... Sverdlov's used of the presidium marked a decisive change in the status of that body within the soviet hierarchy. In mid-1917 ... [the] plenum had directed all activities and ratified bureau decisions which had a 'particularly important social-political character.' The bureau ... served as the executive organ of the VTsIK plenum ... Only in extraordinary cases when the bureau could no be convened for technical reason could*

the presidium make decisions. Even then such actions remained subject to review by the plenum." [Charles Duval, *"Yakov M. Sverdlov and the All-Russian Central Executive Committee of Soviets (VTsIK)"*, pp. 3–22, **Soviet Studies**, vol. XXXI, no. 1, January 1979, pp. 6–7]

Under the Bolsheviks, the presidium was converted *"into the **de facto** centre of power within VTsIK."* It *"began to award representations to groups and factions which supported the government. With the VTsIK becoming ever more unwieldy in size by the day, the presidium began to expand its activities."* The presidium was used *"to circumvent general meetings."* Thus the Bolsheviks were able *"to increase the power of the presidium, postpone regular sessions, and present VTsIK with policies which had already been implemented by the Sovnarkon. Even in the presidium itself very few people determined policy."* [Charles Duval, **Op. Cit.**, p.7, p. 8 and p. 18]

So, from the very outset, the VTsIK was overshadowed by the "Council of People's Commissars" (CPC). In the first year, only 68 of 480 decrees issued by the CPC were actually submitted to the Soviet Central Executive Committee, and even fewer were actually drafted by it. The VTsIK functions *"were never clearly delineated, even in the constitution, despite vigorous attempts by the Left SRs ... that Lenin never saw this highest soviet organ as the genuine equal of his cabin and that the Bolsheviks deliberated obstructed efforts at clarification is [a] convincing"* conclusion to draw. It should be stressed that this process started before the outbreak of civil war in late May, 1918. After that the All-Russian Congress of soviets, which convened every three months or so during the first year of the revolution, met annually thereafter. Its elected VTsIK *"also began to meet less frequently, and at the height of the civil war in late 1918 and throughout 1919, it never once met in full session."* [Carmen Sirianni, **Workers' Control and Socialist Democracy**, pp. 203–4]

The marginalisation of the soviets can be seen from the decision on whether to continue the war against Germany. As Cornelius Castoriadis notes, under Lenin *"[c]ollectively, the only real instance of power is the Party, and very soon, only the summits of the Party. Immediately after the seizure of power the soviets as institutions are reduced to the status of pure window-dressing (we need only look at the fact that, already at the beginning of 1918 in the discussions leading up to the Brest-Litovsk Peace Treaty, their role was absolutely nil)."* [**The role of Bolshevik Ideology in the birth of the Bureaucracy**, p. 97] In fact, on the 26th of February, 1918, the Soviet Executive *"began a survey of 200 local soviets; by 10 March 1918 a majority (105–95) had come out in favour of a revolutionary war, although the soviets in the two capitals voted ... to accept a separate peace."* [Geoffrey Swain, **The Origins of the Russian Civil War**, p. 128] This survey was ignored by the Bolshevik Central Committee which voted 4 against, 4 abstain and 5 for it. This took Russia out of the Great War but handed over massive areas to imperialist Germany. The controversial treaty was ratified at the Fourth Soviet Congress, unsurprisingly as the Bolshevik majority simply followed the orders of their Central Committee. It would be pointless to go over the arguments of the rights and wrongs of the decision here, the point is that the 13 members of the Bolshevik Central Committee decided the future faith of Russia in this vote. The soviets were simply ignored in spite of the fact it was possible to consult them fully. Clearly, "soviet power" meant little more than window-dressing for Bolshevik power.

Thus, at the top summits of the state, the soviets had been marginalised by the Bolsheviks from day one. Far from having "all power" their CEC had given that to a Bolshevik government. Rather than exercise real power, it's basic aim was to control those who did exercise it. And the Bolsheviks successfully acted to undermine even this function.

If this was happening at the top, what was the situation at the grassroots? Here, too, oligarchic tendencies in the soviets increased post-October, with *"[e]ffective power in the local soviets relentlessly gravitated to the executive committees, and especially their presidia. Plenary sessions became increasingly symbolic and ineffectual."* The party was *"successful in gaining control of soviet executives in the cities and at* ***uezd*** *and* ***guberniya*** *levels. These executive bodies were usually able to control soviet congresses, though the party often disbanded congresses that opposed major aspects of current policies."* Local soviets *"had little input into the formation of national policy" and "[e]ven at higher levels, institutional power shifted away from the soviets."* [C. Sirianni, **Op. Cit.**, p. 204 and p. 203] The soviets quickly had become rubber-stamps for the Communist government, with the Soviet Constitution of 1918 codifying the centralisation of power and top-down decision making. Local soviets were expected to *"carry out all orders of the respective higher organs of the soviet power"* (i.e. to carry out the commands of the central government).

This was not all. While having popular support in October 1917, the realities of "Leninism in power" soon saw a backlash develop. The Bolsheviks started to loose popular support to opposition groups like the Mensheviks and SRs (left and right). This growing opposition was reflected in two ways. Firstly, a rise in working class protests in the form of strikes and independent organisations. Secondly, there was a rise in votes for the opposition parties in soviet elections. Faced with this, the Bolsheviks responded in three ways, delaying elections. gerrymandering or force. We will discuss each in turn.

Lenin argued in mid-April 1918 that the *"socialist character of Soviet, i.e.* ***proletarian****, democracy"* lies, in part, in because *"the people themselves determine the order and time of elections."* [**The Immediate Tasks of the Soviet Government**, pp. 36–7] However, the reality in the grassroots was somewhat different. There *"the government [was] continually postponed the new general elections to the Petrograd Soviet, the term of which had ended in March 1918"* because it *"feared that the opposition parties would show gains. This fear was well founded since in the period immediately preceding 25 January, in those Petrograd factories where the workers had decided to hold new elections, the Mensheviks, SRs, and non-affiliated candidates had won about half the seats."* [Samuel Farber, **Before Stalinism**, p. 22] In Yaroslavl, the *more the Bolsheviks tried to postpone the elections, the more the idea of holding new elections became an issue itself."* When the Bolsheviks gave in and held elections in early April, the Mensheviks won 47 of the 98 seats, the Bolsheviks 38 and the SRs 13. [*"The Mensheviks' Political Comeback: The Elections to the Provincial City Soviets in Spring 1918"*, **The Russian Review**, vol. 42, pp. 1–50, p. 18] The fate of the Yaroslavl soviet will be discussed shorted. As Geoffrey Swain summaries, Menshevik and SR *"successes in recalling Bolshevik delegates from the soviets had forced the Bolsheviks increasingly to delay by-elections."* [**The Origins of the Russian Civil War**, p. 91]

As well as postponing elections and recall, the Bolsheviks also quickly turned to gerrymandering the soviets to ensure the stability of their majority in the soviets. In this they made use of certain institutional problems the soviets had had from the start. On the day which the Petrograd soviet was formed in 1917, the Bolshevik Shlyapnikov *"proposed that each socialist party should have the right to two seats in the provisional executive committee of the soviet."* This was *"designed, initially, to give the Bolsheviks a decent showing, for they were only a small minority of the initiating group."* It was agreed. However, the *"result was that members of a dozen different parties and organisations (trades unions, co-operative movements, etc.) entered the executive committee. They called themselves 'representatives' (of their organisations) and, by virtue of this, they speedily eliminated from their discussions the committee members chosen by the general assembly although*

they were the true founders of the Soviet." This meant, for example, Bolshevik co-founders of the soviet made way for such people as Kamenev and Stalin. Thus the make-up of the soviet executive committee was decided upon by *"the leadership of each organisation, its executive officers, and not with the [soviet] assembly. The assembly had lost its right to control."* Thus, for example, the Bolshevik central committee member Yoffe became the presidium of the soviet of district committees without being elected by anyone represented at those soviets. *"After October, the Bolsheviks were more systematic in their use of these methods, but there was a difference: there were now no truly free elections that might have put a brake to a procedure that could only benefit the Bolshevik party."* [Marc Ferro, **October 1917**, p. 191 and p. 195]

The effects of this can be seen in Petrograd soviet elections of June 1918. In these the Bolsheviks *"lost the absolute majority in the soviet they had previously enjoyed"* but remained its largest party. However, the results of these elections were irrelevant. This was because *"under regulations prepared by the Bolsheviks and adopted by the 'old' Petrograd soviet, more than half of the projected 700-plus deputies in the 'new' soviet were to be elected by the Bolshevik-dominated district soviets, trade unions, factory committees, Red Army and naval units, and district worker conferences: thus, the Bolsheviks were assured of a solid majority even before factory voting began."* [Alexander Rabinowitch, **Early Disenchantment with Bolshevik Rule**, p. 45] To be specific, the number of delegates elected directly from the workplace made up a mere third of the new soviet (i.e. only 260 of the 700 plus deputies in the new soviet were elected directly from the factories): *"It was this arbitrary 'stacking' of the new soviet, much more than election of 'dead souls' from shut-down factories, unfair campaign practices, falsification of the vote, or direct repression, that gave the Bolsheviks an unfair advantage in the contest."* [Alexander Rabinowitch, **The Petrograd First City District Soviet during the Civil War**, p. 140]

In other words, the Bolsheviks gerrymandered and packed soviets to remain in power, so distorting the soviet structure to ensure Bolshevik dominance. This practice seems to have been commonplace. In Saratov, as in Petrograd, *"the Bolsheviks, fearing that they would lose elections, changed the electoral rules ... in addition to the delegates elected directly at the factories, the trade unions — but only those in favour of soviet power, in other words supporters of the Bolsheviks and Left SRs — were given representation. Similarly, the political parties supporting Soviet power automatically received twenty-five seats in the soviets. Needless to say, these rules heavily favoured the ruling parties"* as the Mensheviks and SRs *"were regarded by the Bolsheviks as being against Soviet power."* [Brovkin, **Op. Cit.**, p. 30]

A similar situation existed in Moscow. For example, the largest single union in the soviet in 1920 was that of soviet employees with 140 deputies (9% of the total), followed by the metal workers with 121 (8%). In total, the bureaucracies of the four biggest trade unions had 29.5% of delegates in the Moscow soviet. This packing of the soviet by the trade union bureaucracy existed in 1918 as well, ensuring the Bolsheviks were insulated from popular opposition and the recall of workplace delegates by their electors. Another form of gerrymandering was uniting areas of Bolshevik strength *"for electoral purposes with places where they were weak, such as the creation of a single constituency out of the Moscow food administration (MPO) and the Cheka in February 1920."* [Richard Sakwa, **Soviet Communists in Power**, p. 179 and p. 178]

However, this activity was mild compared to the Bolshevik response to soviet elections which did not go their way. According to one historian, by the spring of 1918 *"Menshevik newspapers and activists in the trade unions, the Soviets, and the factories had made a considerable impact on a working class which was becoming increasingly disillusioned with the Bolshevik regime, so much*

so that in many places the Bolsheviks felt constrained to dissolve Soviets or prevent re-elections where Mensheviks and Socialist Revolutionaries had gained majorities." [Israel Getzler, **Martov**, p. 179] This is confirmed by other sources. *"By the middle of 1918,"* notes Leonard Schapiro, *"the Mensheviks could claim with some justification that large numbers of the industrial working class were now behind them, and that for the systematic dispersal and packing of the soviets, and the mass arrests at workers' meetings and congresses, their party could eventually have won power by its policy of constitutional opposition. In the elections to the soviets which were taking place in the spring of 1918 throughout Russia, arrests, military dispersal, even shootings followed whenever Mensheviks succeeded in winning majorities or a substantial representation."* [**The Origin of the Communist Autocracy**, p. 191]

For example, the Mensheviks *"made something of a comeback about Saratov workers in the spring of 1918, for which the Bolsheviks expelled them from the soviet."* [Donald J. Raleigh, **Experiencing Russia's Civil War**, p. 187] Izhevsk, a town of 100,000 with an armaments industry which was the main suppliers of rifles to the Tzar's Army, experienced a swing to the left by the time of the October revolution. The Bolsheviks and SR-Maximalists became the majority and with a vote 92 to 58 for the soviet to assume power. After a revolt by SR-Maximalist Red Guards against the Bolshevik plans for a centralised Red Army in April, 1918, the Bolsheviks became the sole power. However, in the May elections the Mensheviks and [right] SRs *"experienced a dramatic revival"* and for *"the first time since September 1917, these two parties constituted a majority in the Soviet by winning seventy of 135 seats."* The Bolsheviks *"simply refused to acquiesce to the popular mandate of the Mensheviks and Socialist Revolutionaries."* In June, the Bolshevik leadership *"appealed to the Karzan' Soviet ... for assistance."* The troops sent along with the Bolshevik dominated Red Guards *"abrogated the results of the May and June elections"* and imprisoned the SR and Menshevik soviet delegates. The summer of 1918 also saw victories for the SRs and Mensheviks in the soviet elections in Votkinsk, a steel town near Izhevsk. *"As in Izhevsk the Bolsheviks voided the elections."* [Stephan M. Merk, *"The 'Class-Tragedy' of Izhevsk: Working Class Opposition to Bolshevism in 1918"*, pp. 176–90, **Russian History**, vol. 2, no. 2, p. 181 and p. 186]

However, the most in depth account of this destruction of soviet is found in the research of Vladimir Brovkin. According to him, there *"are three factors"* which emerge from the soviet election results in the spring of 1918. These are, firstly, *"the impressive success of the Menshevik-SR opposition"* in those elections in all regions in European Russia. The second *"is the Bolshevik practice of outright disbandment of the Menshevik-SR-controlled soviets. The third is the subsequent wave of anti-Bolshevik uprisings."* In fact, *"in all provincial capitals of European Russia where elections were held on which there are data, the Mensheviks and the SRs won majorities on the city soviets in the spring of 1918."* Brovkin stresses that the *"process of the Menshevik-SR electoral victories threatened Bolshevik power. That is why in the course of the spring and summer of 1918, the soviet assemblies were disbanded in most cities and villages. To stay in power, the Bolsheviks had to destroy the soviets... These steps generated a far-reaching transformation in the soviet system, which remained 'soviet' in name only."* Brovkin presents accounts from numerous towns and cities. As an example, he discusses Tver' where the *"escalation of political tensions followed the already familiar pattern"* as the *"victory of the opposition at the polls"* in April 1918 *"brought about an intensification of the Bolshevik repression. Strikes, protests, and marches in Tver' lead to the imposition of martial law."* [Brovkin, **Op. Cit.**, p. 46, p. 47, p. 48 and p. 11] Thus Bolshevik armed force not only overthrew the election results, it also suppressed working class protest against

such actions. (Brovkin's book **The Mensheviks after October** contains the same information as his article).

This Bolshevik attack on the soviets usually started with attempts to stop new elections. For example, after a demonstration in Petrograd in favour of the Constituent Assembly was repressed by the Bolsheviks in mid-January 1918, calls for new elections to the soviet occurred in many factories. *"Despite the efforts of the Bolsheviks and the Factory Committees they controlled, the movement for new elections to the soviet spread to more than twenty factories by early February and resulted in the election of fifty delegates: thirty-six SRs, seven Mensheviks and seven non-party."* However, the Bolsheviks *"unwillingness to recognise the elections and to seat new delegates pushed a group of Socialists to ... lay plans for an alternative workers' forum ... what was later to become the Assembly of Workers' Plenipotentiaries."* [Scott Smith, *"The Social-Revolutionaries and the Dilemma of Civil War"*, **The Bolsheviks in Russian Society**, pp. 83–104, Vladimir N. Brovkin (Ed.), pp. 85–86] This forum, like all forms of working class protest, was crushed by the Bolshevik state. By the time the elections were held, in June 1918, the civil war had started (undoubtedly favouring the Bolsheviks) and the Bolsheviks had secured their majority by packing the soviet with non-workplace "representatives."

In Tula, again in the spring of 1918, local Bolsheviks reported to the Bolshevik Central Committee that the *"Bolshevik deputies began to be recalled one after another ... our situation became shakier with passing day. We were forced to block new elections to the soviet and even not to recognise them where they had taken place not in our favour."* In the end, the local party leader was forced to abolish the city soviet and to vest power in the Provincial Executive Committee. This refused to convene a plenum of the city soviet for more than two months, knowing that newly elected delegates were non-Bolshevik. [Smith, **Op. Cit.**, p. 87]

In Yaroslavl', the newly elected soviet convened on April 9th, 1918, and when it elected a Menshevik chairman, *"the Bolshevik delegation walked out and declared the soviet dissolved. In response, workers in the city went out on strike, which the Bolsheviks answered by arresting the strike committee and threatening to dismiss the strikers and replace them with unemployed workers."* This failed and the Bolsheviks were forced to hold new elections, which they lost. Then *"the Bolsheviks dissolved this soviet as well and places the city under martial law."* A similar event occurred in Riazan' (again in April) and, again, the Bolsheviks *"promptly dissolved the soviet and declared a dictatorship under a Military-Revolutionary Committee."* [**Op. Cit.**, pp. 88–9]

The opposition parties raised such issues at the All-Russian Central Executive Committee of Soviets (VTsIK), to little avail. On the 11th of April, one *"protested that non-Bolshevik controlled soviets were being dispersed by armed force, and wanted to discuss the issue."* The chairman *"refus[ed] to include it in the agenda because of lack of supporting material"* and such information be submitted to the presidium of the soviet. The majority (i.e. the Bolsheviks) *"supported their chairman"* and the facts were *"submitted ... to the presidium, where they apparently remained."* It should be noted that the *"same fate befell attempts to challenge the arrests of Moscow anarchists by the government on 12 April."* The chairman's *"handling of the anarchist matter ended its serious discussion in the VTsIK."* [Charles Duval, **Op. Cit.**, pp. 13–14] Given that the VTsIK was **meant** to be the highest soviet body between congresses, the lack of concern for Bolshevik repression against soviets and opposition groups clearly shows the Bolshevik contempt for soviet democracy.

Needless to say, this destruction of soviet democracy continued during the civil war. For example, the Bolsheviks simply rejected the voice of people and would refuse to accept an election

result. Emma Goldman attended an election meeting of bakers in Moscow in March, 1920. *"It was,"* she said, *"the most exciting gathering I had witnessed in Russia."* However the *"chosen representative, an Anarchist, had been refused his mandate by the Soviet authorities. It was the third time the workers gathered to re-elect their delegate ... and every time they elected the same man. The Communist candidate opposing him was Semashko, the Commissar of the Department of Health ... [who] raved against the workers for choosing a non-Communist, called anathema upon their heads, and threatened them with the Tcheka and the curtailment of their rations. But he had no effect on the audience except to emphasise their opposition to him, and to arouse antagonism against the party he represented. The workers' choice was repudiated by the authorities by the authorities and later even arrested and imprisoned."* After a hunger strike, they were released. In spite of chekists with loaded guns attending union meetings, the bakers *"would not be intimidated"* and threatened a strike unless they were permitted to elect their own candidate. This ensured the bakers' demands were met. [**My Disillusionment in Russia**, pp. 88–9]

Unsurprisingly, *"there is a mass of evidence to support the Menshevik accusations of electoral malpractice"* during elections in May 1920. And in spite of Menshevik *"declaration of support for the Soviet regime against the Poles"* the party was *"still subject to harassment."* [Skawa, **Op. Cit.**, p. 178]

This gerrymandering was not limited to just local soviets. The Bolsheviks used it at the fifth soviet congress as well.

First, it should be noted that in the run up to the congress, *"on 14 June 1918, they expelled Martov and his five Menshevikstogether with the Socialist Revolutionaries from the Central Executive Committee, closed down their newspapers .. and drove them underground, just on the eve of the elections to the Fifth Congress of Soviets in which the Mensheviks were expected to make significant gains."* [Israel Getzler, **Martov**, p. 181] The rationale for this action was the claim that the Mensheviks had taken part in anti-soviet rebellions (as we discuss in section 23, this was not true). The action was opposed by the Left SRs, who correctly questioned the legality of the Bolshevik expulsion of opposition groupings. They *"branded the proposed expulsion bill illegal, since the Mensheviks and SRs had been sent to the CEC by the Congress of Soviets, and only the next congress had the right to withdraw their representation. Furthermore, the Bolsheviks had no right to pose as defenders of the soviets against the alleged SR counter-revolution when they themselves has been disbanding the peasants' soviets and creating the committees of the poor to replace them."* [Brovkin, **The Mensheviks After October**, p. 231] When the vote was taken, only the Bolsheviks supported it. Their votes were sufficient to pass it.

Given that the Mensheviks had been winning soviet elections across Russia, it is clear that this action was driven far more by political needs than the truth. This resulted in the Left Social Revolutionaries (LSRs) as the only significant party left in the run up to the fifth Congress. The LSR author (and ex-commissar for justice in the only coalition soviet government) of the only biography of LSR leader (and long standing revolutionary who suffered torture and imprisonment in her fight against Tsarism) Maria Spiridonova states that *"[b]etween 900 and 100 delegates were present. Officially the LSR numbered 40 percent of the delegates. They own opinion was that their number were even higher. The Bolsheviks strove to keep their majority by all the means in their power."* He quotes Spiridonova's address to the Congress: *"You may have a majority in this congress, but you do have not a majority in the country."* [I. Steinberg, **Spiridonova**, p. 209]

Historian Geoffrey Swain indicates that the LSRs had a point:

> *"Up to the very last minute the Left SRs had been confident that, as the voice of Russia's peasant masses, they would receive a majority when the Fifth Congress of Soviets assembled ... which would enable them to deprive Lenin of power and launch a revolutionary war against Germany. Between April and the end of June 1918 membership of their party had almost doubled, from 60,000 to 100,000, and to prevent them securing a majority at the congress Lenin was forced to rely on dubious procedures: he allowed so-called committees of poor peasants to be represented at the congress. Thus as late as 3 July 1918 returns suggested a majority for the Left SRs, but a Congress of Committees of Poor Peasants held in Petrograd the same day 'redressed the balance in favour of the Bolsheviks,' to quote the* ***Guardian****'s Philips-Price, by deciding it had the right to represent the all those districts where local soviets had not been 'cleansed of kulak elements and had not delivered the amount of food laid down in the requisitioning lists of the Committees of Poor Peasants.' This blatant gerrymandering ensured a Bolshevik majority at the Fifth Congress of Soviets."* [**The Origins of the Russian Civil War**, p. 176]

Historian Alexander Rabinowitch confirms this gerrymandering. As he put it, by the summer of 1918 *"popular disenchantment with Bolshevik rule was already well advanced, not only in rural but also in urban Russia"* and the *"primary beneficiaries of this nationwide grass-roots shift in public opinion were the Left SRs. During the second half of June 1918, it was an open question which of the two parties would have a majority at the Fifth All-Russian Congress of Soviets ... On the evening of 4 July, virtually from the moment the Fifth Congress of Soviets opened in Moscow's Bolshoi Theatre, it was clear to the Left SRs that the Bolsheviks had effectively 'fabricated' a sizeable majority in the congress and consequently, that there was no hope whatever of utilising it to force a fundamental change in the government's pro-German, anti-peasant policies."* While he acknowledges that an *"exact breakdown of properly elected delegates may be impossible to ascertain"* it was possible (*"based on substantial but incomplete archival evidence"*) to conclude that *"it is quite clear that the Bolshevik majority was artificially inflated and highly suspect."* He quotes the report of one leading LSR, based on data from LSR members of the congress's Credentials Committee, saying that the Bolsheviks *"conjured up"* 299 voting delegates. *"The Bible tells us,"* noted the report's author, *"that God created the heavens and the earth from nothing ... In the twentieth century the Bolsheviks are capable of no lesser miracles: out of nothing, they create legitimate credentials."* [*"Maria Spiridonova's 'Last Testament'"*, **The Russian Review**, pp. 424–46, vol. 54, July 1995, p. 426]

This gerrymandering played a key role in the subsequent events. *"Deprived of their democratic majority,"* Swain notes, *"the Left SRs resorted to terror and assassinated the German ambassador Mirbach."* [Swain, **Op. Cit.**, p. 176] The LSR assassination of Mirbach and the events which followed were soon labelled by the Bolsheviks an *"uprising"* against "soviet power" (see section 23 for more details). Lenin *"decided that the killing of Mirbach provided a fortuitous opportunity to put an end to the growing Left SR threat."* [Rabinowitch, **Op. Cit.**, p. 427] After this, the LSRs followed the Mensheviks and Right SRs and were expelled from the soviets. This in spite of the fact that the rank and file knew nothing of the plans of the central committees and that their soviet delegates had been elected by the masses. The Bolsheviks had finally eliminated the last of their more left-wing opponents (the anarchists had been dealt with the in April, see section 24 for details).

As discussed in section 21, the Committees of Poor Peasants were only supported by the Bolsheviks. Indeed, the Left SRs opposed then as being utterly counter-productive and an example of Bolshevik ignorance of village life. Consequently, we can say that the "delegates" from the committees were Bolsheviks or at least Bolshevik supporters. Significantly, by early 1919 Lenin admitted the Committees were failures and ordered them disbanded. The new policy reflected Left SR arguments against the Committees. It is hard not to concur with Vladimir Brovkin that by *"establishing the committees of the poor to replace the [rural] soviets ... the Bolsheviks were trying to create some institutional leverage of their own in the countryside for use against the SRs. In this light, the Bolshevik measures against the Menshevik-led city soviets ... and against SR-led village soviets may be seen as a two-pronged attempt to stem the tide that threatened to leave them in the minority at the Fifth Congress of Soviets."* [**The Mensheviks after October**, p. 226]

Thus, by July 1918, the Bolsheviks had effectively secured a monopoly of political power in Russia. When the Bolsheviks (rightly, if hypocritically) disbanded the Constituent Assembly in January 1918, they had claimed that the soviets (rightly) represented a superior form of democracy. Once they started losing soviet elections, they could find no better way to "secure" workers' democracy than to destroy it by gerrymandering soviets, disbanding them and expelling opposition parties from them. All peaceful attempts to replace them had been destroyed. The soviet CEC was marginalised and without any real power. Opposition parties had been repressed, usually on little or no evidence. The power of the soviets had been replaced by a soviet power in less than a year. However, this was simply the culmination of a process which had started when the Bolsheviks seized power in November 1917. Simply put, the Bolsheviks had always aimed for "all power to the party via the soviets" and once this had been achieved, the soviets could be dispensed with. Maurice Brinton simply stated the obvious when he wrote that *"when institutions such as the soviets could no longer be influenced by ordinary workers, the regime could no longer be called a soviet regime."* [**The Bolsheviks and Workers' Control**, p. xiii] By this obvious criteria, the Bolshevik regime was no longer soviet by the spring of 1918, i.e. before the outbreak of civil war. While opposition groups were not finally driven out of the soviets until 1923 (i.e. three years **after** the end of the civil war) their presence *"does not indicate the existence of a multi-party system since they in no way threatened the dominating role of the Bolsheviks, and they had not done so from mid-1918."* [Richard Sakwa, **Op. Cit.**, p. 168]

Tony Cliff, leader of the British Leninist party the SWP, justified the repression of the Mensheviks and SRs on the grounds that they were not prepared to accept the Soviet system and rejected the role of *"constitutional opposition."* He tries to move forward the repression until after the outbreak of full civil war by stating that *"[d]espite their strong opposition to the government, for some time, i.e. until after the armed uprising of the Czechoslovakian Legion [in late May, 1918] — the Mensheviks were not much hampered in their propaganda work."* If having papers banned every now and then, members arrested and soviets being disbanded as soon as they get a Menshevik majority is *"not much hampered"* then Cliff does seem to be giving that phrase a new meaning. Similarly, Cliff's claim that the *"civil war undermined the operation of the local soviets"* also seems lacking based on this new research. [**Lenin: Revolution Besieged**, vol. 3, p. 163, p. 167 and p. 150]

However, the Bolshevik assault on the soviets started during the spring of 1918 (i.e. in March, April and May). That is **before** the Czech rising and the onset of full scale civil war which occurred in late May (see section 3 of the appendix on "What caused the degeneration of the Russian Revolution?" on Bolshevik repression before the Czech revolt). Nor is it true that the

Mensheviks rejected constitutional methods. Though they wished to see a re-convocation of the Constituent Assembly they believed that the only way to do this was by winning a majority of the soviets (see section 23). Clearly, attempts to blame the Civil War for the elimination of soviet power and democracy seems woefully weak given the actions of the Bolsheviks in the spring of 1918. And, equally clearly, the reduction of local soviet influence cannot be fully understood without factoring in the Bolshevik prejudice in favour of centralisation (as codified in the Soviet Constitution of 1918) along with this direct repression.

The simple fact is that the soviets were marginalised and undermined after the October Revolution simply because they **did** reflect the wishes of the working class, in spite of their defects (defects the Bolsheviks exploited to consolidate their power). The problem was that the workers no longer supported Lenin. Few Leninists would support such an obvious conclusion. For example, John Rees states that *"[i]n the cities the Reds enjoyed the fierce and virtually undivided loyalty of the masses throughout the civil war period."* [*"In Defence of October"*, pp. 3–82, **International Socialism**, no. 52, p. 47] Which, of course, explains the vast number of strikes and protests directed against the Bolshevik regime and the workers' resolutions calling its end! It also explains why the Bolsheviks, in the face of such *"undivided loyalty"*, had to suppress opposition parties and impose a party dictatorship!

Simply put, **if** the Bolsheviks did have the support Rees states they did then they had no need to repress soviet democracy and opposition parties. Such *"fierce"* loyalty would not have been amenable to opposition arguments. Strange, then, that the Bolsheviks continually explained working class unrest in terms of the influence of Mensheviks, Left SRs and so on during the civil war. Moreover, Rees contradicts himself by arguing that if the Kronstadt revolt had succeeded, then it would have resulted in *"the fall of the Bolsheviks."* [**Op. Cit.**, p. 63] Now, given that the Kronstadt revolt called for free soviet elections (and **not** *"soviets without parties"* as Rees asserts), why did the Bolsheviks not agree to them (at least in the cities)? If, as Rees argues, the Reds had the fierce loyalty of the city workers, then why did the Bolsheviks not introduce soviet democracy in the cities after the end of the Civil War? Simply because they knew that such "loyalty" did not, in fact, exist. Zinoviev, for example, declared that the Bolsheviks' support had been reduced to 1 per cent in early 1920. [Farber, **Before Stalinism**, p. 188]

So much for working class "loyalty" to the Bolsheviks. And, needless to say, Rees' comments totally ignore the election results **before** the start of the civil war which prompted the Bolsheviks to pack or disband soviets. As Bertrand Russell summarised from his experiences in Lenin's Russia during the civil war (in 1920): *"No conceivable system of free elections would give majorities to the Communists, either in the town or country."* [**The Practice and Theory of Bolshevism**, pp. 40–1] Thus we have a major contradiction in the pro-Leninist argument. On the one hand, they stress that the workers supported the Bolsheviks wholeheartedly during the civil war. On the other, they argue that party dictatorship had to be imposed. If the Bolsheviks had the support they claimed they had, then they would have won soviet elections easily. They did not and so free soviet elections were not held.

This fact also explains the fate of the so-called *"non party"* conferences favoured by the Bolsheviks in late 1920. In spite of praising the soviets as *"more democratic"* than anything in the *"best democratic republics of the bourgeois world,"* Lenin also argued that non-Party conferences were also required *"to be able to watch the mood of the masses, to come closer to them, to respond to their demands."* [**Left-Wing Communism**, p. 33 and p. 32] If the soviets were as democratic as Lenin claimed, then the Bolsheviks would have no need of "non-party" conferences. Significantly, the

Bolsheviks "responded" to these conferences and "their demands" by disbanding them. This was because *"[d]uring the disturbances"* of late 1920, *"they provided an effective platform for criticism of Bolshevik policies."* Their frequency was decreased and they "were discontinued soon afterward." [Richard Sakwa, **Soviet Communists in Power**, p. 203] In other words, they meet the same fate as the soviets in the spring and summer of 1918.

Perhaps we should not be too surprised by these developments. After all, as we discuss in section 8 of the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", the Bolsheviks had long had a distinctly undemocratic political ideology. Their support for democratic norms were less than consistent. The one thing they **were** consistent was their hypocrisy. Thus democratic decisions were to be binding on their opponents (even if that majority had to be manipulated into being) but not upon them. Before the revolution Lenin had openly espoused a double standard of discipline. *"We will not permit,"* he argued, *"the idea of unity to tie a noose around our necks, and we shall under no circumstances permit the Mensheviks to lead us by the rope."* [quoted by Robert V. Daniels, **The Conscience of the Revolution**, p. 17] Once in power, their political perspectives had little trouble ignoring the will of the working class when it classed with what they, as that class's self-proclaimed vanguard, had decided what was in its best interests. As we discussed in section H.5, such a autocratic perspective is at the heart of vanguardism. If you aim for party power, it comes as no surprise that the organs used to achieve it will wither under it. Just as muscles only remain strong if you use them, so soviets can only work if it is used to run society, not nominate the handful of party leaders who do. As Kropotkin argued in 1920:

> "The idea of soviets ... of councils of workers and peasants ... controlling the economic and political life of the country is a great idea. All the more so, since it necessarily follows that these councils should be composed of all who take part in the production of natural wealth by their own efforts.
>
> "But as long as the country is governed by a party dictatorship, the workers' and peasants' councils evidently lose their entire significance. They are reduced to ... [a] passive role ... A council of workers ceases to be free and of any use when liberty of the press no longer exists ... [and they] lose their significance when the elections are not preceded by a free electoral campaign, and when the elections are conducted under pressure of a party dictatorship ... It means the death-knell of the new system." [**Kropotkin's Revolutionary Pamphlets**, pp. 254–5]

Clearly, the fate of the soviets after October shows the dangers of Bolshevism to popular self-management and autonomy. We should be try and learn the lessons from the experience rather than, as pro-Bolsheviks do, rationalise and justify the usurpation of power by the party. The most obvious lesson to learn is to oppose the creation of any power **above** the soviets. This was not lost on Russian anarchists active in the revolution. For this reason, anarcho-syndicalists resolved, in August 1918, that they *"were for the soviets but categorically against the Soviet of People's Commissars as an organ which does not stem from the soviet structure but only interferes with its work."* Thus they were *"for the establishment of **free soviets** of workers' and peasants' representatives, and the abolition of the Soviet of People's Commissars as an organisation inimical to the interests of the working class."* [contained in Paul Avrich, **The Anarchists in the Russian**

Revolution, p. 118 and p. 117] This resolution was driven by the experience of the Bolshevik dominated "soviet" regime.

It is also worth quoting Rudolf Rocker at length on this issue:

> *"Let no one object that the 'dictatorship of the proletariat' cannot be compared to run of the mill dictatorship because it is the dictatorship of a class. Dictatorship of a class cannot exist as such, for it ends up, in the last analysis, as being the dictatorship of a given party which arrogates to itself the right to speak for that class. Thus, the liberal bourgeoisie, in their fight against despotism, used to speak in the name of the 'people'...*
>
> *"We already know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is, and will continue to be, the fortress keeping the masses of the people under dominion. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.*
>
> *"The fact that a large number of socialist parties have rallied to the idea of councils, which is the proper mark of libertarian socialist and revolutionary syndicalists, is a confession, recognition that the tack they have taken up until now has been the product of a falsification, a distortion, and that with the councils the labour movement must create for itself a single organ capable of carrying into effect the unmitigated socialism that the conscious proletariat longs for. On the other hand, it ought not to be forgotten that this abrupt conversion runs the risk of introducing many alien features into the councils concept, features, that is, with no relation to the original tasks of socialism, and which have to be eliminated because they pose a threat to the further development of the councils. These alien elements are able only to conceive things from the dictatorial viewpoint. It must be our task to face up to this risk and warn our class comrades against experiments which cannot bring the dawn of social emancipation any nearer — which indeed, to the contrary, positively postpone it.*
>
> *"Consequently, our advice is as follows: Everything for the councils or soviets! No power above them! A slogan which at the same time will be that of the social revolutionary."* [**Anarchism and Sovietism**]

The validity of this argument can be seen, for example, from the expulsion of opposition parties from the soviets in June and July 1918. This act exposes the hollowness of Bolshevik claims of their soviet system presented a form of "higher" democracy. If the Bolshevik soviet system was, as they claimed, based on instant recall then why did they, for example, have to expel the Mensheviks and Right SRs from the soviet CEC in the first place? Why did the electors not simply recall them? It was two weeks after the Czech revolt before the Bolsheviks acted, surely enough time for voters to act? Perhaps this did not happen because the CEC was not, in fact, subject to instant recall at all? Being nominated at the quarterly soviet congress, they were effectively

isolated from popular control. It also means that the Bolshevik government was even more insulated from popular control and accountability. To "recall" it, electors would have to either wait for the next national soviet congress or somehow convince the CEC to call an emergency one. As an example of workers' running society, the Bolshevik system leaves much to be desired.

Another obvious lesson to learn was the use of appointments to the soviets and their executives from other organisations. As seen above, the Bolsheviks used the "representation" of other bodies they control (such as trade unions) to pack soviet assemblies in their favour. Similarly, allowing political parties to nominate representatives in soviet executives also marginalised the soviet assemblies and those delegates actually elected in the workplaces.

This was obvious to the Russian anarchists, who argued *"for effective soviets organised on collective lines with the direct delegation of workers and peasants from every factory, workshop, village, etc., and not political chatterboxes gaining entry through party lists and turning the soviets into talking shops."* [contained in Paul Avrich, **The Anarchists in the Russian Revolution**, p. 118] The Makhnovists, likewise, argued that *"[o]nly labourers who are contributing work necessary to the social economy should participate in the soviets. Representatives of political organisations have no place in worker-peasant soviets, since their participation in a workers' soviet will transform the latter into deputies of the party and can lead to the downfall of the soviet system."* [contained in Peter Arshinov's **History of the Makhnovist Movement**, p. 266] As we discuss in section 15 of the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?", Leninists sometimes distort this into a claim that the Makhnovists opposed members of political standing for election.

This use of party lists meant that soviet delegates could be anyone. For example, the leading left-wing Menshevik Martov recounts that in early 1920 Bolsheviks in a chemical factory *"put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he-eight (in an open vote)."* [quoted by Israel Getzler, **Martov**, p. 202] How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be "delegates" of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected to a soviet?

However, in spite of these problems, the Russian soviets were a key means of ensuring working class participation in the revolution. As recognised by all the socialist oppositions to the Bolsheviks, from the anarchists to the Mensheviks. As one historian put it:

> *"Small wonder that the principal political demand of Mensheviks, Left SRs, SR Maximalists, Kronstadt sailors and of many oppositionists ... has been for freely elected soviets which would this be restored to their original role as agents of democratisation."* [Israel Getzler, **Soviets as Agents of Democratisation**, p. 30]

The sad fate of the soviets after the Bolshevik seizure of power simply confirms the opinion of the left Menshevik Martov who had *"rubbed it in to the Bolsheviks ... at the first All-Russian Congress of Trade Unions [in January 1918], that they who were now extolling the Soviets as the 'highest forms of the socialist development of the proletariat,' had shown little love of them in 1905 or in 1917 after the July days; they loved Soviets only when they were 'in the hands of the Bolshevik party.'"* [Getlzer, **Martov**, p. 174] As the next few months showed, once the soviets left those hands, then the soviets themselves were destroyed. The civil war did not start this process, it just gave the latter-day supporters of Bolshevism something to use to justify these actions.

7 How did the factory committee movement develop?

8 What was the Bolshevik position on "workers' control" in 1917?

9 What happened to the factory committees after October?

10 What were the Bolshevik economic policies in 1918?

11 Did Bolshevik economic policies work?

12 Was there an alternative to Lenin's "state capitalism" and "war communism"?

13 Did the Bolsheviks allow independent trade unions?

14 Was the Red Army really a revolutionary army?

15 Was the Red Army "filled with socialist consciousness"?

16 How did the civil war start and develop?

17 Was the civil war between just Reds and Whites?

18 How extensive was imperialist intervention?

19 Did the end of the civil war change Bolshevik policies?

20 Can the Red Terror and the Cheka be justified?

21 Did Bolshevik peasant policies work?

22 Was there an alternative to grain requisition?

23 Was the repression of the socialist opposition justified?

24 What did the anarchists do during the revolution?

25 Did the Russian revolution refute anarchism?

What was the Kronstadt Rebellion?

The Kronstadt rebellion took place in the first weeks of March 1921. Proclaimed by Trotsky himself as being the *"pride and glory of the Russian Revolution,"* its sailors were renowned for their revolutionary ideas and activities and had turned the naval base and city into a de facto soviet republic soon after the February revolution. However, in 1921 Red Kronstadt had turned against the Communist dictatorship and raised the slogan of the 1917 revolution *"All Power to the Soviets"*, to which it added *"and not to parties."* The rebels called this revolt the *"Third Revolution"* and saw it as completing the work began in the first two Russian Revolutions in 1917 by instituting a true toilers republic based on freely elected, self-managed, soviets. As the Russian Anarchist Voline put it, while *" Kronstadt fell and State Socialism triumphed"* it *"exposed ... the real character of the Communist dictatorship"* and *"[i]n the complex and shadowy labyrinth which opens out to the masses in revolt, Kronstadt is a bright beacon that lights up the right road."* [**The Unknown Revolution**, p. 537–8]

Given this, it is important to know and understand this revolt, what it says of Bolshevik ideology and practice and to refute the many slanders Leninists have hurled against it. These issues are addressed in the various sections below. First, though, it is necessary to summarise the events of the revolt itself.

Kronstadt was (and is) a naval fortress on an island in the Gulf of Finland. Traditionally, it has served as the base of the Russian Baltic Fleet and to guard the approaches to the city of St. Petersburg (which during the first world war was re-named Petrograd, then later Leningrad, and is now St. Petersburg again) thirty kilometres away. As noted, the Kronstadt sailors had been in the vanguard of the revolutionary events of 1905 and 1917 and far-left influence was high: Left-SRs, Maximalist-SRs, Bolsheviks and anarchists all had significant influence (in roughly that order, as discussed in section 9 below, Kronstadt was never a Bolshevik stronghold in 1917). The inhabitants of Kronstadt had been early supporters and practitioners of soviet democracy, forming a free commune in 1917 which was independent of the Provisional Government. In the words of Israel Getzler, an expert on Kronstadt, *"it was in its commune-like self-government that Red Kronstadt really came into its own, realising the radical, democratic and egalitarian aspirations of its garrison and working people, their insatiable appetite for social recognition, political activity and public debate, their pent up yearning for education, integration and community. Almost overnight, the ship's crews, the naval and military units and the workers created and practised a direct democracy of base assemblies and committees."* In the centre of the fortress an enormous public square served as a popular forum holding as many as 30,000 people. The Kronstadters *"proved convincingly the capacity of ordinary people to use their 'heads, too' in governing themselves, and managing Russia's largest naval base and fortress."* [**Kronstadt 1917–1921**, p. 248 and p. 250]

The Russian Civil War had ended in Western Russia in November 1920 with the defeat of General Wrangel in the Crimea. All across Russia popular protests were erupting in the countryside and in the towns and cities. Peasant uprisings were occurring against the Communist Party policy of grain requisitioning (a policy the Bolsheviks and their supporters argue had been thrust upon them by the circumstances but which involved extensive, barbaric and counter-productive repression). In urban areas, a wave of spontaneous strikes occurred in protest against the militarisation of labour, lack of food, Bolshevik dictatorship and a host of other issues. So, *"[b]y the beginning of 1921 a revolutionary situation with workers in the vanguard had emerged in Soviet Russia"* with *"the simultaneous outbreak of strikes in Petrograd and Moscow and in other industrial regions." "General strikes, or very widespread unrest"* took place in all bar one major industrial region and strikes were combined with *"factory occupations, 'Italian strikes', demonstrations, mass meetings, the beating up of communists and so on."* [Jonathan Aves, **Workers Against Lenin**, p. 3, p. 109, and p. 112] The rebel workers and peasants raised both economic and political demands.

In late February a general strike broke out in Petrograd along which immediately saw Bolshevik repression against it. On February 26th, in response to these events, the crews of the battleships ***Petropavlovsk*** and ***Sevastopol*** held an emergency meeting and agreed to send a delegation to the city to investigate and report back on events. On their turn two days later, the delegates informed their fellow sailors of the strikes and the government repression directed against them at another mass meeting on the ***Petropavlovsk*** which then approved a resolution which raised 15 demands which were primarily political (including free elections to the soviets, freedom of speech, press, assembly and organisation to workers, peasants, anarchists and left-socialists) along with a few economic ones (equal rations for all workers, the end of roadblock

detachments restricting travel and the ability of workers to bring food into the city as well as *"full freedom of action"* for all peasants and artisans who did not hire labour) — see section 3 for full details. These demands, it must be stressed, reflected those many of those first raised by the striking Petrograd workers.

Unknown to the sailors, the Bolshevik leader in Petrograd (Zinoviev) sent a telegram to Lenin at 11pm that day: *"Kronstadt: The two biggest ships, **Sevastopol'** and **Petropavlovsk**, have adopted SR/Black Hundreds' resolutions and presented an ultimatum to be answered in 24 hours. Among the workers in Petrograd the disposition is as before unsteady. Large plants do not work. We expect that the SRs are going to speed up events"* (SR stood for "Social Revolutionaries", a party with a traditional peasant base and whose right-wing had fought against the Bolsheviks in the name of the Constituent Assembly and were complicit with White reactionary forces while the "Black Hundreds" were a reactionary, indeed proto-fascist, force dating back to before the revolution which attacked Jews, labour militants, radicals and so on). [quoted by Vladimir N. Brovkin, **Behind the Front Lines of the Civil War**, p. 394]

A mass meeting of fifteen to sixteen thousand people was held in Anchor Square on March 1st and what has become known as the ***Petropavlovsk*** resolution was passed with only two Bolshevik officials voting against it. At this meeting it was decided to send another delegation to Petrograd to explain to the strikers and the city garrison the demands of Kronstadt and to request that non-partisan delegates be sent by the Petrograd workers to Kronstadt to learn first-hand what was happening there. This delegation of thirty members was arrested by the Bolshevik government.

As the term of office of the Kronstadt soviet was about to expire, the mass meeting also decided to call a Conference of Delegates for March 2nd to discuss the manner in which the new soviet elections would be held (Kronstadt had not had a freely elected soviet since the Bolsheviks *"dissolving [of] the Kronstadt Soviet and establishing a puppet committee in its place"* in July 1918 [Alexander Rabinowitch, **The Bolsheviks in Power**, p. 302]). This conference consisted of two delegates from the ship's crews, army units, the docks, workshops, trade unions and Soviet institutions. This meeting of 303 delegates endorsed the ***Petropavlovsk*** resolution and elected a five-person Provisional Revolutionary Committee (this was enlarged to 15 members two days later by another conference of delegates). This committee was charged with organising the defence of Kronstadt, a move decided upon in part by the threats of the Bolshevik officials there and the rumour that the Bolsheviks had dispatched forces to attack the meeting.

The Communist Government issued an ultimatum on March 2nd which built upon Zinoviev's telegram of the 28th and asserted that the revolt had *"expected by, and undoubtedly been prepared by, French counterintelligence"* and that the ***Petropavlovsk*** resolution was a *"SR-Black Hundred resolution"*. The Bolsheviks claimed that the revolt had been organised by an ex-Tsarist officers led by *"former general Kozlovsky and three of his officers"* and so *"[b]ehind the SRs again stands a tsarist general."* [Lenin and Trotsky, **Kronstadt**, pp. 65–6] This was the official line throughout the revolt and any awkward facts (such as Kozlovsky, ironically, being placed in the fortress as a military specialist by Trotsky) ignored.

Basing himself on documents from the Soviet Archives, historian Israel Getzler states that *"[b]y 5 March, if not earlier, the Soviet leaders had decided to crush Kronstadt. Thus, in a cable to ... [a] member of the Council of Labour and Defence, on that day, Trotsky insisted that 'only the seizure of Kronstadt will put an end to the political crisis in Petrograd.' On the same day, acting as chairman of the RVSR [the Revolutionary Military Council of the Army and Navy], he ordered the reformation*

and mobilisation of the Seventh Army 'to suppress the uprising in Kronstadt,' and appointed General Mikhail Tukhachevskii as its commander changed with suppressing the uprising in Kronstadt 'in the shortest possible time.'" [*"The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents"*, **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, p. 32]

As the Bolshevik regime sought to mobilise forces to crush the rebels, Kronstadt started to re-organise itself from the bottom up. The trade union committees were re-elected and a Council of Trade Unions formed. The Conference of Delegates met to discuss issues relating to the interests of Kronstadt and the struggle against the Bolshevik government. Around 300 Communists were arrested and treated humanely in prison while many more (at least 780) left the party, expressing support for the revolt and its aim of *"all power to the soviets and not to parties"*, in protest of the actions the party was taking against Kronstadt or its general role in the revolution). Significantly, up to one-third of the delegates elected to Kronstadt's rebel conference of March 2nd were Communist Party members. [Avrich, **Kronstadt 1921**, pp. 184–7 and p. 81] While *"[t]here can be no doubt that the [arrested] Kronstadt Communists were frightened and expected to be treated in the same way as their own Cheka treated its prisoners ... The fact is no Communists were shot, none were court-martialled, and the Provisional Revolutionary Committee showed no vindictiveness."* [George Katkov, *"The Kronstadt Rising,"*, **St. Anthony's Papers**, No. 6, p. 44]

The Kronstadt revolt was a non-violent one, but from the start the attitude of the authorities was not one of serious negotiation but rather one of delivering an ultimatum on March 5th: either come to your senses and surrender or suffer the consequences. A leaflet issued by the Petrograd Defence Committee threatened that they would shoot the rebels *"like partridges"* while any of their families in Petrograd were taken hostage. [Avrich, **Op. Cit.**, pp. 144–6] While there was at least three to four weeks before the ice was due to melt after the March 2nd Conference of Delegates meeting which marked the real start of the revolt, the Bolsheviks started military operations at 6.45pm on March 7th.

There were possible means for a peaceful resolution of the conflict. On March 5th, two days before the bombardment of Kronstadt began, anarchists led by Emma Goldman and Alexander Berkman offered themselves as intermediates to facilitate negotiations between the rebels and the government (anarchist influence had been strong in Kronstadt in 1917). [Emma Goldman, **Living My Life**, vol. 2, pp. 882–3] This was ignored by the Bolsheviks. Years later, the Bolshevik Victor Serge (and eye-witness to the events) acknowledged that *"[e]ven when the fighting had started, it would have been easy to avoid the worst: it was only necessary to accept the mediation offered by the anarchists (notably Emma Goldman and Alexander Berkman) who had contact with the insurgents. For reasons of prestige and through an excess of authoritarianism, the Central Committee refused this course."* [**The Serge-Trotsky Papers**, p. 164] Trotsky, it should be noted, in 1937 proclaimed that the *"anarchist and Menshevik elements ... did their best to lead things to an uprising. They succeeded. So nothing remained but armed struggle."* [Lenin and Trotsky, **Kronstadt**, p. 82] Sadly, he never explained how this was achieved — particularly given that many of the leading Mensheviks were already in prison before Kronstadt rebelled and soon joined by others.

Another possible solution, namely the Petrograd Soviet suggestion of March 6th that a delegation of party and non-party members of the Soviet visit Kronstadt was not pursued by the government. The rebels, unsurprisingly enough, had reservations about the **real** status of the non-party delegates and made the very reasonable request that the elections to the delegation take place within factories with observers from Kronstadt present. Nothing came of this (un-

surprisingly, as such a delegation would have reported the truth that Kronstadt was a popular revolt of working people so exposing Bolshevik lies and making the planned armed attack more difficult). A delegation *"sent by Kronstadt to explain the issues to the Petrograd Soviet and people was in the prisons of the Cheka"* and so *"right from the first moment, at a time when it was easy to mitigate the conflict, the Bolshevik leaders had no intention of using anything but forcible methods."* [Victor Serge, **Memoirs of a Revolutionary**, p. 127] As Alexander Berkman noted, the Communist government would *"make no concessions to the proletariat, while at the same time they were offering to compromise with the capitalists of Europe and America."* [*"The Kronstadt Rebellion"*, **The Russian Tragedy**, p. 62]

The Communist government started to attack Kronstadt on March 7th and the first assault was a failure: *"After the Gulf had swallowed its first victims, some of the Red soldiers, including a body of Peterhof **kursanty**, began to defect to the insurgents. Others refused to advance, in spite of threats from the machine gunners at the rear who had orders to shoot any wavers. The commissar of the northern group reported that his troops wanted to send a delegation to Kronstadt to find out the insurgents' demands."* The revolt was isolated and received no external support. The Petrograd workers were under martial law and could little or no action to support Kronstadt (assuming they refused to believe the Bolshevik lies about the uprising). The attacks continued, with Trotsky at one stage sanctioning the use of chemical warfare against the rebels [Avrich, **Op. Cit.**, pp. 153–4, p. 146 and pp. 211–2] However, this poison gas attack was not needed in the end for Kronstadt was taken by the Red Army on March 17th — yet even in the final assault occurred the Bolsheviks had to force their troops to fight, for on the night of 16–17 March *"the extraordinary **troika** of Aleksei Nikolaev had arrested over 100 so-called instigators, 74 of whom he had publicly shot."* [Getzler, **Op. Cit.**, p. 35] The Red Army troops has also seen their ranks swell with Communist Party members — many from the Tenth Party Congress — who were happy to shoot any who hesitated or expressed sympathy for the rebels while behind them were machine guns ready to open fire at the slightest sign of dissent or retreat. Once the Bolshevik forces finally entered the city of Kronstadt *"the attacking troops took revenge for their fallen comrades in an orgy of bloodletting."* [Avrich, **Op. Cit.**, p. 211] Eight thousand sailors, soldiers and civilians escaped over the ice to Finland. The crews of the ***Petropavlovsk*** and ***Sevastopol*** fought to the bitter end, as did the cadets of the mechanics school, the torpedo detachment and the communications unit.

The next day, as an irony of history, the Bolsheviks celebrated the fiftieth anniversary of the Paris Commune:

> *"On March 17th the Communist Government completed its 'victory' over the Kronstadt proletariat and on the 18th of March it commemorated the martyrs of the Paris Commune. It was apparent to all who were mute witnesses to the outrage committed by the Bolsheviki that the crime against Kronstadt was far more enormous than the slaughter of the Communards in 1871, for it was done in the name of the Social Revolution, in the name of the Socialist Republic."* [Emma Goldman, **My Disillusionment in Russia**, p. 199]

The repression did not end there. According to Serge, the *"defeated sailors belonged body and soul to the Revolution; they had voiced the suffering and the will of the Russian people"* yet *"[h]undreds of prisoners were taken away to Petrograd; months later they were still being shot in small batches, a senseless and criminal agony"* (particularly as they were *"prisoners of war ... and*

the Government had for a long time promised an amnesty to its opponents on condition that they offered their support"). *"This protracted massacre was either supervised or permitted by Dzerzhinsky"* (the head of the Cheka). The *"responsibilities of the Bolshevik Central Committee had been simply enormous"* and *"the subsequent repression ... needlessly barbarous."* [**Op. Cit.**, p. 131 and p. 348]

There are no reliable figures of casualties on either side. According to official Soviet figures, around 700 were killed and 2,500 wounded or shell-shocked on the government side. Others suggest over 10,000 killed, wounded or missing as a result of storming Kronstadt. One report puts the rebel deaths at 600 and more than 1,000 wounded. [Avrich, **Op. Cit.**, p. 211] There are also no reliable figures on how many rebels were later shot by the Cheka or sent to prison camps. The figures that exist are fragmentary. For example, *"4,836 Kronstadt sailors were arrested and deported to the Crimea and the Caucasus. But when Lenin learned of this on the 19 April, he expressed 'great misgivings regarding the location of these sailors' [in these areas]. As a result these ... were eventually ... sent to forced labour camps in the Archangelsk, Vologda and Murmansk regions."* The families of the rebels were also deported, with one Bolshevik official *"pointed at Siberia as 'undoubtedly the only suitable region' for these people."* [Gelzter, **Op. Cit.**, pp. 35–6 and p. 37] Many other rebels were executed:

> *"[One] 20 April report on 'The Results of the Reprisals Against the Mutineers in the Period of 20 March to 15 April' contains the following data: out of 3,000 active participants in the mutiny, 40 per cent (1,200) were sentenced to death, 25 per cent to five years of forced labour, and 35 per cent were released. [It] complained that in carrying out their work, the* ***troika*** *had had to rely exclusively on information provided by the Special Section of the* ***Vecheka*** *: 'neither commissars nor local Communists provided any material'.*
>
> *"The statistical communique of the Special Section of the Extraordinary* ***Troikas*** *of 1 May has the following data: 6,528 were arrested, of whom 2,168 had been shot, 1,955 had been sentenced to forced labour (of whom 1,486 received a five year sentence), and 1,272 were released. In a statistical review of the mutiny made in 1935–36, the figure of those arrested is given as 10,026, but the review also says, 'It has not been possible to establish accurately the number of the repressed'."* [Getzler, **Op. Cit.**, p. 36]

After the revolt had been put down, the Bolshevik government reorganised the fortress. While it had attacked the revolt in the name of defending "Soviet Power" Kronstadt's newly appointed military commander *"abolish[ed] the [Kronstadt] soviet altogether"* and ran the fortress *"with the assistance of a revolutionary troika"* (i.e. an appointed three man committee). [Getzler, **Kronstadt 1917–1921**, p. 244] Kronstadt's newspaper was renamed ***Krasnyi Kronshtadt*** (from ***Izvestiia***) and stated in an editorial that the *"fundamental features"* of Kronstadt's restored *"dictatorship of the proletariat"* during its *"initial phases"* were *"[r]estrictions on political liberty, terror, military centralism and discipline and the direction of all means and resources towards the creation of an offensive and defensive state apparatus."* [quoted by Getzler, **Op. Cit.**, p. 245] The victors quickly started to eliminate all traces of the revolt. Anchor square became Revolutionary Square and the rebel battleships ***Petropavlovsk*** and ***Sevastopol*** were renamed the ***Marat*** and the ***Paris Commune***, respectively.

In terms of wider changes, the revolt and the mass strike waves saw the Bolshevik dictatorship change some of its policies during the revolt and after it had been crushed. While none of the

political demands were granted, the economic ones were to a certain degree by means of the New Economic Policy (or NEP). That Lenin did this does not stop Leninists then or now denouncing these economic demands as expressing the Kronstadt's revolt's allegedly counter-revolutionary "petty-bourgeois" nature.

That, in summary, was the Kronstadt revolt. Obviously we cannot cover all the details and we recommend readers to consult the books and articles we list at the end of this section for fuller accounts of the events. Now we must analyse the revolt and indicate why it is so important in evaluating Bolshevism in both practice and as an ideology.

In the sections which follow, we indicate why the revolt is so important (section 1) and place it in historical context (section 2). We then present and discuss the Kronstadt demands, indicating their sources in working class rebellion and radicalism (see sections <verbatim>3/<verbatim> and 4). We indicate the lies the Bolsheviks said about the rebellion at the time (section 5), whether it was, in fact, a White plot (section 6) and indicate the revolts real relationship to the Whites (section 7). We also disprove Trotskyist assertions that the sailors in 1921 were different from those in 1917 (section 8) or that their political perspectives had fundamentally changed (section 9). We indicate that state coercion and repression explains why the Kronstadt revolt did not spread to the Petrograd workers (section 10). Then we discuss the possibility of White intervention during and after the revolt (section 11). We follow this with a discussion of Leninist arguments that the country was too exhausted to allow soviet democracy (section 12) or that soviet democracy would have resulted in the defeat of the revolution (section 13).We will also show the depths to which more recent supporters of Leninism will sink to defend their heroes (section 14). Lastly, we discuss what the Kronstadt revolt tells us about Leninism (section 15).

As we will prove, Kronstadt was a popular uprising from below by many of the same sailors, soldiers and workers who made the 1917 October revolution, seeking to restore the liberties and rights they had seized and practiced then. While, undoubtedly, the Bolshevik repression of the revolt **can** be justified in terms of defending the state power of the Bolsheviks over the Russian working class, it **cannot** be defended as socialist. Indeed, it indicates that Bolshevism is a flawed political theory which cannot create a socialist society but only a state capitalist regime based on party dictatorship. This is what Kronstadt shows above all else: given a choice between workers' power and party power, Bolshevism will destroy the former to ensure the latter. In this, Kronstadt is no isolated event (see section H.6 for more details).

There are many essential resources on the revolt available. The best in depth studies are by historians Paul Avrich (**Kronstadt 1921**) and Israel Getzler (**Kronstadt 1917–1921**). Anarchist works include Ida Mett's **The Kronstadt Uprising** (included in the anthology **Bloodstained: One Hundred Years of Leninist Counterrevolution** as **The Kronstadt Commune**), Alexander Berkman's **The Kronstadt Rebellion** (included in the collection of Berkman's pamphlets entitled **The Russian Tragedy**), Voline's **The Unknown Revolution** has a good chapter on Kronstadt (and quotes extensively from the Kronstadters' paper ***Izvestiia***) while Anton Ciliga's **Kronstadt Revolt** is also a good introduction to the issues relating to the uprising from a libertarian socialist perspective. Eye-witness accounts include chapters in Berkman's **The Bolshevik Myth** as well as Emma Goldman's **My Disillusionment in Russia** and Chapter LII of her autobiography **Living My Life**. Daniel Guerin's anthology **No Gods, No Masters** has an excellent section on the rebellion which includes a lengthy extract from Goldman's **Living my Life** as well as extracts from the Kronstadters' paper.

For the Leninist account, the anthology **Kronstadt** contains Lenin and Trotsky's articles on the revolt plus supplementary essays trying to refute the anarchist analysis of the revolt. This work is recommended for those seeking the official Trotskyist version of events as it contains all the relevant documents by the Bolshevik leaders as well the articles relating to the debate on Kronstadt which arose in the late 1930s. Victor Serge, an individualist-anarchist turned Bolshevik, was another eye-witness to the Kronstadt revolt and his **Memoirs of a Revolutionary** is worth consulting to discover why he supported what the Bolsheviks did, albeit reluctantly (in private at least). Finally, it must be noted that Emma Goldman's **Trotsky Protests too Much** is a lively reply to Trotsky's, Serge's and Wright's (one of Trotsky's American followers) attempts to defend the Bolshevik repression of the revolt.

1 Why is the Kronstadt rebellion important?

The Kronstadt rebellion is important because, as Voline put it, it was *"the first entirely independent attempt of the people to liberate itself from all yokes and achieve the Social Revolution, an attempt made directly, resolutely, and boldly by the working masses themselves without political shepherds, without leaders or tutors. It was the first step towards the third and social revolution."* [**The Unknown Revolution**, pp. 537–8] Moreover, the Bolshevik response to the revolt *"sounded the death knell Bolshevism with its Party dictatorship, mad centralization, Tcheka terrorism and bureaucratic castes. It struck into the very heart of Communist autocracy. At the same time it shocked the intelligent and honest minds of Europe and America into a critical examination of Bolshevik theories and practices. It exploded the Bolshevik myth of the Communist State being the 'Workers' and Peasants' Government'. It proved that the Communist Party dictatorship and the Russian Revolution are opposites, contradictory and mutually exclusive. It demonstrated that the Bolshevik regime is unmitigated tyranny and reaction, and that the Communist State is itself the most potent and dangerous counter-revolution."* [Alexander Berkman, *"The Kronstadt Rebellion"*, **The Russian Tragedy**, p. 91]

The Kronstadt sailors, solders and workers in 1917 had been the one of the first groups to support the slogan *"All power to the Soviets"* as well as one of the first towns to put it into practice. The focal point of the 1921 revolt — the sailors of the warships ***Petropavlovsk*** and ***Sevastopol*** — had, in 1917, been well-known revolutionaries who had actively supported attempts to create a soviet system. They had been considered, until those fateful days in 1921, the pride and glory of the revolution, considered by all — including the Bolsheviks themselves — to be thoroughly revolutionary in spirit and action. They were the staunchest supporters of the Soviet system but, as the revolt showed, they were opposed to the dictatorship of any political party.

The Kronstadt revolt was a popular movement from below aiming at restoring soviet democracy, to create a genuine soviet power in the sense of soviets themselves running society rather than being a fig leaf for party rule. As Alexander Berkman notes, the *"spirit of the Conference [of delegates which elected the Provisional Revolutionary Committee] was thoroughly Sovietist: Kronstadt demanded Soviets free from interference by any political party; it wanted non-partisan Soviets that should truly reflect the needs and express the will of the workers and peasants. The attitude of the delegates was antagonistic to the arbitrary rule of bureaucratic commissars, but friendly to the Communist Party as such. They were staunch adherents of the Soviet **system** and they were earnestly seeking to find, by means friendly and peaceful, a solution of the pressing problems"* facing the revolution. [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 67] The attitude of the Bolsheviks

indicated that, for them, soviet power was only useful in so far as it ensured their party's power and if the two came into conflict then the latter must survive over the corpse of the former:

> *"But the 'triumph' of the Bolsheviks over Kronstadt held within itself the defeat of Bolshevism. It exposes the true character of the Communist dictatorship. The Communists proved themselves willing to sacrifice Communism, to make almost any compromise with international capitalism, yet refused the just demands of their own people — demands that voiced the October slogans of the Bolsheviks themselves: Soviets elected by direct and secret ballot, according to the Constitution of the Russian Socialist Federal Soviet Republic; and freedom of speech and press for the revolutionary parties."* [Berkman, *"The Kronstadt Rebellion"*, **Op. Cit.**, p. 90]

Occurring as it did after the end of the civil war, Kronstadt played a key role in opening the eyes of anarchists like Emma Goldman and Alexander Berkman to the real role of Bolshevism in the revolution. Until then, they (like many others) supported the Bolsheviks, rationalising their dictatorship as a temporary measure necessitated by the civil war. Kronstadt smashed that illusion, *"broke the last thread that held me to the Bolsheviki. The wanton slaughter they had instigated spoke more eloquently against them than aught else. Whatever the pretences of the past, the Bolsheviki now proved themselves the most pernicious enemies of the Revolution. I would have nothing further to do with them."* [Emma Goldman, **My Disillusionment in Russia**, p. 200]

Therefore Kronstadt is important in evaluating the honesty of Leninist claims to be in favour of soviet democracy and power. The civil war was effectively over, yet the regime showed no signs of changing and, as before, the Bolsheviks were repressing strikes and protests in the name of *"the political power of the proletariat"* (see section H.6.3 for an account of labour struggles and their repression under Lenin from early 1918 onwards). In the countryside, they continued their futile and counterproductive policies against the peasants (ignoring the facts that their government was meant to be at the head of a workers **and** peasants' state and that peasants made up the vast majority of the population). They proclaimed themselves to be defending "soviet power" while also placing the necessity of party dictatorship into the heart of their ideology and practice. In short, it goes to the heart of what socialism is as Maurice Brinton suggests:

> *"Attitudes to the Kronstadt events, expressed ... after the event often provide deep insight into the political thinking of contemporary revolutionaries. They may in fact provide a deeper insight into their conscious or unconscious aims than many a learned discussion about economics, or philosophy, or about other episodes of revolutionary history.*
>
> *"It is a question of one's basic attitude as to what socialism is all about. What are epitomised in the Kronstadt events are some of the most difficult problems of revolutionary strategy and revolutionary ethics: the problems of ends and means, of the relations between Party and masses, in fact of whether a Party is necessary at all. Can the working class by itself only develop a trade union consciousness [as Lenin claimed]. Should it even be allowed, at all times, to go that far?*
>
> *"Or can the working class develop a deeper consciousness and understanding of its interests than can any organization allegedly acting on its behalf? When the Stalinists or Trotskyists speak of Kronstadt as 'an essential action against the class enemy', when more 'sophisticated' revolutionaries refer to it as a 'tragic necessity', one is entitled to*

> *pause for a moment. One is entitled to ask how seriously they accept Marx's dictum that 'the emancipation of the working class is the task of the working class itself. Do they take this seriously or do they pay mere lip-service to the words? Do they identify socialism with the autonomy (organizational and ideological) of the working class? Or do they see themselves, with their wisdom as to the 'historical interests' of others, and with their judgments as to what should be 'permitted', as the leadership around which the future elite will crystallise and develop? One is entitled not only to ask ... but also to suggest the answer!"* [*"Preface to Ida Mett's 'The Kronstadt Commune'"*, **Bloodstained: One Hundred Years of Leninist Counterrevolution**, pp. 137–8]

The events at Kronstadt cannot be looked at in isolation, but rather as part of a general struggle of the Russian working people against "their" government. Indeed, as we indicate in the next section, this repression **after** the end of the Civil War followed the same pattern as that started **before** it. Just as the Bolsheviks had repressed soviet democracy in Kronstadt in 1921 in favour of party dictatorship, they had done so regularly elsewhere from early 1918. Investigating the Kronstadt revolt forces revolutionaries into a critical examination of Bolshevik ideology and practice, it forces them to consider what their socialism stands for — as we argue in section 15, the logic of Bolshevik rationales for crushing Kronstadt simply mean that modern day Leninists will, if in the same position, destroy soviet democracy to defend "soviet power" (i.e. the power of their party). In short, Kronstadt was the clash between the reality of Leninism and its rhetoric. Yet while it raises many important issues as regards Bolshevism, it is wider than that. *"The Kronstadt experience,"* as Berkman argues, *"proves once more that government, the State — whatever its name or form — is ever the mortal enemy of liberty and popular self-determination. The state has no soul, no principles. It has but one aim — to secure power and hold it, at any cost. That is the political lesson of Kronstadt."* [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 89]

As noted, the Leninist justifications for their power and actions at Kronstadt have direct implications for current activity and future revolutions. Not least, because the Russian Revolution as a whole confirmed anarchist analysis and predictions with regards to State Socialism. Echoing the warnings of the likes of Bakunin and Kropotkin, Russian anarchists in 1917 predicted that *"if the 'transfer of power to the soviets' comes in fact to signify the seizure of political authority by a new political party with the aim of guiding reconstruction from above, 'from the centre'"* then *"there is no doubt that this 'new power' can in no way satisfy even the most immediate needs and demands of the people, much less begin the task of 'socialist reconstruction' . .. Then, after a more or less prolonged interruption, the struggle will inevitably be renewed. Then will begin a third and last stage of the Great Revolution. There will begin a struggle between the living forces arising from the creative impulse of the popular masses on the spot, on the one hand, namely the local workers' and peasants' organisations acting directly ... and the centralist Social Democratic [i.e., Marxist] power defending its existence, on the other; a struggle between authority and freedom."* [quoted by Paul Avrich, **Anarchists in the Russian Revolution**, p. 94] Thus Kronstadt is a symbol of the fact that state power cannot be utilised by the working class and always becomes a force for minority rule (in this case of former workers and revolutionaries, as Bakunin predicted — see section H.1.1).

There is another reason why the study of Kronstadt is important. Since the suppression of the revolt, Leninist and Trotskyist groups have continually **justified** the acts of the Bolsheviks. Moreover, they have followed Lenin and Trotsky in slandering the revolt and, indeed, have con-

tinually lied about it. When Trotskyist John Wright states — in the ironically entitled *"The Truth About Kronstadt"* — that the supporters of Kronstadt have *"distort[ed] historical facts, monstrously exaggerat[ed] every subsidiary issue or question ... and throw[n] a veil ... over the **real** program and aims of the mutiny"* he is, in fact, describing his and his fellow Trotskyists. [*"The Truth about Kronstadt"*, Lenin and Trotsky, **Kronstadt**, p. 102] As we will prove, anarchist accounts have been validated by later research while Trotskyist assertions have been exploded time and time again.

Similarly, when Trotsky argues that anarchists like Goldman and Berkman *"do not have the slightest understanding of the criteria and methods of scientific research"* and just *"quote the proclamations of the insurgents like pious preachers quoting Holy Scriptures"* he is, in fact, just describing himself and his followers (as we shall see, the latter just repeat his and Lenin's assertions regardless of how silly or refuted they are). Ironically, he states that *"Marx has said that it is impossible to judge either parties or peoples by what they say about themselves"* while he himself justifies his actions by his claim that he and Lenin represented the "proletarian" revolution and the real class interests of workers. [Lenin and Trotsky, **Op. Cit.**, p. 88] In reality, Kronstadt shows what the Bolsheviks said about their regime was the opposite of what it really was as show by its actions: *"How pathetic that he does not realise how much this applies to him!"* [Emma Goldman, *"Trotsky Protests Too Much"*, **Writings of Emma Goldman**, p. 257]

Then there is the bad faith of most Trotskyist accounts (Victor Serge's belated account in his **Memoirs of a Revolutionary** is noteworthy in being an exception to this). What becomes clear from our discussion is the way Trotskyists have selectively quoted the academic accounts to fit their ideological account of the uprising. Likewise, they regularly change the demands of the revolt — often simply inventing demands (like "Soviets without Bolsheviks") — and ignore the ideological context (so ignoring how party dictatorship was a core Leninist principle before, during and after the rebellion). The reason for this should be obvious – the supporters of Bolshevism cannot help lie about the Kronstadt revolt as it so clearly exposes the **real** nature of Bolshevik ideology and the regime it created. Hence the repetition of the slanders, inventions and self-serving justifications the Bolsheviks made at the time, with varying degrees of sophistication (the most superficially convincing usually utilise Serge's defence of the Bolsheviks' actions).

These defences of the Bolshevism are a classic expression of Leninist double-think (the ability to know two contradictory facts and maintain both are true). Yet this can be explained for once it is understood that *"workers' power"* and *"soviet power"* actually mean **party power** then the contradictions disappear. Party power had to be maintained at all costs, including the destruction of those who desired real soviet and workers' power (and so soviet democracy). It is, surely, an utter absurdity to claim that a state apparatus which divests the workers of any control over society — or even itself — can be regarded as a "workers' state"? Apparently not.

So, for example, Trotsky argued that in 1921 *"the proletariat had to hold political power in its hands"* yet later Trotskyists argue that the proletariat was too exhausted, atomised and decimated to do so. [Lenin and Trotsky, **Kronstadt**, p. 81] Similarly, the Trotskyist Pierre Frank states that for the Bolsheviks, *"the dilemma was posed in these terms: either keep the workers' state under their leadership, or see the counterrevolution begin, in one or other political disguise, ending in a counterrevolutionary reign of terror that would leave not the slightest room for democracy."* [**Op. Cit.**, p. 15] Of course the fact that there was *"not the slightest room for democracy"* under Lenin is not mentioned, nor is the fact that the *"dictatorship of the party"* had been a fundamental aspect of Bolshevik ideology since early 1919 and practice since mid-1918 (by the latest). Nor does Frank

consider it important to note that a *"counterrevolutionary reign of terror"* did develop under Stalin from the counterrevolutionary terror, repression and dictatorship practised in 1921 (and before) by Lenin and Trotsky — but, then, he also fails to mention that Trotsky's Left Opposition was only in favour of democracy within the party. (see section 3 of the appendix *"Were any of the Bolshevik oppositions a real alternative?"*)

A more trivial example can be seen with the dismissal of Kronstadt's economic demands as being impossible to agree to, as they reflected the "peasant counter-revolution" while the Bolsheviks in Petrograd announced the withdrawal of all road-blocks and demobilised the Red Army soldiers assigned to labour duties in Petrograd on 1st March and introduced the New Economic Policy afterwards. [Avrich, **Op. Cit.**, pp. 48–9] Likewise, Leninist Chris Harman argued against the Stalinists that *"people who seriously believe that workers at the height of revolution need a police guard to stop them handing their factories over to capitalists certainly have no real faith in the possibilities of a socialist future."* [**Bureaucracy and Revolution in Eastern Europe**, p. 144] Yet this did not stop him asserting that *"Kronstadt in 1921 was not Kronstadt of 1917. The class composition of its sailors had changed. The best socialist elements had long ago gone off to fight in the army in the front line. They were replaced in the main by peasants whose devotion to the revolution was that of their class. This was reflected in the demands of the uprising: Soviets without Bolsheviks and a free market in agriculture. The Bolshevik leaders could not accede to such demands. It would have meant liquidation of the socialist aims of the revolution without struggle."* [Chris Harman, *"How the Revolution was Lost,"* Binns, Cliff and Harman, **Russia from Workers' State to State Capitalism**, p. 20] Yet as we discuss in this appendix, the ship crews were remarkably consistent over the period in question and, as such, his claims are as factual as his account of their demands — the Kronstadt rebels **never** raised the call for Soviets with Bolsheviks (they called for soviet democracy) and the Bolsheviks **did**, in the shape of the New Economic Policy announced just after the revolt was crushed *"accede"* to the demand for a free market in agriculture (although, it must be stressed, this allowed wage-labour which the rebels, as socialists, explicitly rejected). Nor should we forget that this Kronstadt demand — like so many others — simply repeated those of *"the [striking] workers [in Petrograd who] wanted the special squads of armed Bolsheviks, who carried out a purely police function, withdrawn from the factories."* [Paul Avrich, **Op. Cit.**, p. 42]

Leninists generally argue that the suppression of the rebellion was essential to defend the "gains of the revolution." These are usually left unspecified, for good reason. What exactly were these gains? Not soviet democracy, freedom of speech, assembly and press, trade union freedom and workers' control for the Kronstadters were crushed for demanding these. No, apparently the "gains" of the revolution were a Bolshevik government and state ownership and control of property. Never mind the obvious fact this was a state-capitalist dictatorship with an already strong and privileged bureaucratic machine: that Lenin and Trotsky were in power is enough for their followers to justify the repression of Kronstadt and subscribe to the notion of a "workers' state" which excludes workers from power. As such, the Kronstadters and Petrograd strikers *"struggled for the socialism which the bureaucracy were already in the process of liquidating. That is the fundamental point of the whole problem."* [Anton Ciliga, *"The Kronstadt Revolt"*, **The Raven**, No. 8, p. 334]

Thus the double-think of Bolshevism is clearly seen from the Kronstadt events. The Bolsheviks and their supporters argue that Kronstadt was suppressed to defend soviet power yet argue that the Kronstadt demand for free soviet elections was *"counter-revolutionary"*, *"backward"*, *"petty-bourgeois"* and so on. How soviet power could mean anything without free elections is never

explained. Similarly, they argue that it was necessary to defend the "workers state" by slaughtering those who called for workers to have some kind of say in how that state operated. It appears that the role of workers in a workers' state was simply that of following orders without question. This explains why Trotsky was able to argue in the 1930s that the Russian working class was still the ruling class under Stalin: *"So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class."* [*"The Class Nature of the Soviet State"*, **Writings of Leon Trotsky 1933–34**, p. 125] To be fair to Trotsky, the workers were in the same position in the social hierarchy and had the same say under Stalin as they had when he ruled the roost (i.e., less than in most democratic capitalist states) and he considered them to the ruling class then.

How can the Bolshevik repression be justified in terms of defending workers power when the workers were powerless? How can it be defended in terms of soviet power when the soviets were rubber stamps of a party dictatorship? Simply put, the logic of the Bolsheviks and their latter-day apologists and supporters is the same character as that of the U.S. Officer during the Vietnam War who explained that in order to save the village, they had to destroy it.

One last point, while the Kronstadt revolt is a key event in the Russian Revolution, one that signified its end, we must not forget that it is just one in a long series of Bolshevik attacks on the working class. As we indicate in the next section, the Bolshevik state had proven itself to be anti-revolutionary continually since October 1917. Yet Kronstadt is important simply because it so clearly pitted soviet democracy against "soviet power" and occurred **after** the end of the civil war. As it brought the Russian Revolution to an end and all the conditions for Stalinism were prepared by its defeat and the repression of the mass strike wave which produced it, it deserves to be remembered, analysed and discussed by all revolutionaries who seek to learn from, rather than repeat, history.

2 What was the context of the Kronstadt revolt?

The Kronstadt revolt cannot be understood in isolation. Indeed, to do so misses the real reason why Kronstadt is so important. The actions of the Bolsheviks in 1921 and their ideological justifications for their actions (justifications, of course, when they got beyond lying about the revolt — see section 5) merely reproduced in concentrated form what had been occurring ever since they had seized power in 1917.

Therefore it is necessary to present a short summary of Bolshevik activities before the events of Kronstadt (see section H.6 for fuller details). In addition, we have to sketch the developing social stratification under Lenin and the events immediate before the revolt which sparked it off (namely the strike wave across Russia which reached Petrograd in late February 1921). Once this has been done, we will soon see that Kronstadt was not an isolated event but rather an act of solidarity with the oppressed workers of Russia and an attempt to save the Russian Revolution from Communist dictatorship and its bureaucracy.

Alexander Berkman provides an excellent overview of what had happened in Russia after the October Revolution:

> *"The elective system was abolished, first in the army and navy, then in the industries. The Soviets of peasants and workers were castrated and turned into obedient Communist Committees, with the dreaded sword of the Cheka [political para-military police]*

ever hanging over them. The labour unions governmentalised, their proper activities suppressed, they were turned into mere transmitters of the orders of the State. Universal military service, coupled with the death penalty for conscientious objectors; enforced labour, with a vast officialdom for the apprehension and punishment of 'deserters'; agrarian and industrial conscription of the peasantry; military Communism in the cities and the system of requisitioning in the country ... ; the suppression of workers' protests by the military; the crushing of peasant dissatisfaction with an iron hand..." [*"The Russian Tragedy"*, **The Russian Tragedy**, p. 27]

Here we will simply indicate that the Bolsheviks had systematically undermined the effective power of the soviets. Both locally and nationally, post-October power was centralised into the hands of the soviet executives rather than the general assemblies. At the top, power was concentrated even further with the creation of a Bolshevik government **above** the Central Executive Council elected by the (then) quarterly soviet congress. This is not all. Faced with growing opposition to their policies, the Bolsheviks responded in two ways. Either the soviet was packaged and gerrymandered to make the workplace soviet elections irrelevant (as in, say, Petrograd) or they simply disbanded any soviet elected with a non-Bolshevik majority (as in **all** provincial soviets for which records exist). So Bolshevik opposition to the soviet democracy demanded by the Kronstadt revolt had a long pedigree. It had started a few months after the Bolsheviks seizure of power in the name of the soviets, during the spring of 1918 (i.e. in March, April and May) and so **before** the Czech rising and the onset of full scale civil war which occurred in late May. Given this, any attempt to blame the Civil War for the elimination of soviet power and democracy seems woefully weak. Likewise, the reduction of soviet influence cannot be fully understood without factoring in the Bolshevik prejudice in favour of centralisation and party power which could not help but ensure the marginalisation of the soviets as did its vanguardism (see section H.5).

It must be remembered that the Bolshevik aim was always party power and their turn to the soviets in 1917 was made precisely because this was considered the most likely means to achieve this long-standing aim (see section H.3.11). To be fair, many workers accepted the idea of "workers' government" and a "workers' state," assuming the new power was their own and, of course, initially the Bolsheviks did have popular support (at least in the main urban areas, they could count on passive support due to the Bolshevik appropriation of the SR's land reform policy). Yet, this soon changed — which, incidentally, answers Brian Bambery's rhetorical question of *"why would the most militant working class in the world, within which there was a powerful cocktail of revolutionary ideas, and which had already made two revolutions (in 1905 and in February 1917), allow a handful of people to seize power behind its back in October 1917?"* [*"Leninism in the 21st Century"*, **Socialist Review**, no. 248, January 2001] Once the Russian workers realised that a handful of people **had** seized power they **did** protest the usurpation of their power and rights by the Bolsheviks — and the Bolsheviks repressed them. With the start of the Civil War, the Bolsheviks played their trump card — essentially, "Us or the Whites" — and this helped ensure their power as the workers had few choices but to agree. This, however, did not stop mass resistance and strikes breaking out periodically during the civil war when workers and peasants could no longer put up with Bolshevik policies or the effects of the war (see section 5 of the appendix on "What caused the degeneration of the Russian Revolution?"). Given this, it comes as no real surprise that while the Bolsheviks repeatedly repressed opposition parties and groups during the civil war, these were finally eliminated (along with factions within the Communist

Party itself) only **after** its end: with the Whites gone, the opposition were rising in influence again within dissident workers and the "White card" could no longer be played to get them to begrudgingly support the Bolsheviks as during the war. *"Paradoxical as it may sound,"* Alexander Berkman noted, *"the Communist dictatorship had no better ally, in the sense of strengthening and prolonging its life, than the reactionary forces which fought against it."* [**The Bolshevik Myth**, p. 340]

Moreover, the reality of the new regime confirmed that the "new" centralised structures preferred by the Bolsheviks soon produced the same alienation as previous states along with a bureaucracy which, rather than start to decline, immediately *"grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between 'people' and 'officials,' which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about 'bureaucratic excesses,' lack of contact with voters, and new proletarian bureaucrats grew louder and louder."* [Oskar Anweiler, **The Soviets**, p. 242] Thus the early months of "soviet rule" saw *"the widespread view that trade unions, factory committees, and soviets ... were no longer representative, democratically run working-class institutions; instead they had been transformed into arbitrary, bureaucratic government agencies. There was ample reason for this concern."* [Alexander Rabinowitch, **The Bolsheviks in Power**, p. 224] In Moscow, in August 1918, state officials represented 30 per cent of the workforce there and by 1920 the general number of office workers *"still represented about a third of those employed in the city"* (200,000 in November, 1920, rising to 228,000 in July, 1921 and, by October 1922, to 243,000). Thus *"red tape and vast administrative offices typified Soviet reality"* as the Bolsheviks *"rapidly created their own [state] apparatus to wage the political and economic offensive against the bourgeoisie and capitalism. As the functions of the state expanded, so did the bureaucracy"* and so *"following the revolution the process of institutional proliferation reached unprecedented heights ... a mass of economic organisations [were] created or expanded."* Worse, the *"prevalence of bureaucracy, of committees and commissions ... permitted, and indeed encouraged, endless permutations of corrupt practices. These raged from the style of living of communist functionaries to bribe-taking by officials. With the power of allocation of scare resources, such as housing, there was an inordinate potential for corruption."* [Richard Sakwa, **Soviet Communists in Power**, pp. 190–3]

Emma Goldman recounted from experience *"how paralysing was the effect of the bureaucratic red tape which delayed and often frustrated the most earnest and energetic efforts ... Materials were very scarce and it was most difficult to procure them owing to the unbelievably centralised Bolshevik methods. Thus to get a pound of nails one had to file applications in about ten or fifteen bureaus; to secure some bed linen or ordinary dishes one wasted days."* Thus *"the newly fledged officialdom was as hard to cope with as the old bureaucracy"* while the *"bureaucratic officials seemed to take particular delight in countermanding each other's orders."* In short, *"the terrorism practiced by the Bolsheviki against every revolutionary criticism ... the new Communist bureaucracy and inefficiency, and the hopelessness of the whole situation ... was a crushing indictment against the Bolsheviki, their theories and methods."* [**My Disillusionment in Russia**, p. 40, p. 45, p. 46 and p. 92] Thus, as anarchists had long warned, a new class — the state and party bureaucracy — had been created within the new regime, living like other ruling classes on the labour of others.

The dynamics of the class struggle under the Bolshevik regime, that is the conflict between the workers and "their" state, played its part in the evolution of Bolshevik ideology. Having lost popular support, the Bolshevik used their control of the state and its forces of coercion to remain in power. Being a **de facto** party dictatorship since it had packed the Fifth All-Russian Congress

of soviets in July 1918, the Bolsheviks soon sought to incorporate its practice into its ideology. Thus, we find Victor Serge in the 1930s noting that *"at the start of 1919 I was horrified to read an article by Zinoviev ... on the monopoly of the party in power."* [**The Serge-Trotsky Papers**, p. 188] Serge, however, kept his horror well-hidden as he was soon publically seeking to convince anarchists in France and elsewhere of the necessity of this monopoly (see section H.1.2) while Lenin proclaimed in July 1919 that *"it is a dictatorship of one party! This is what we stand for and shall not shift from this position because it is the party that has won, in the course of decades, the position of vanguard of the entire factory and industrial proletariat."* [**Collected Works**, vol. 29, p. 535] This orthodoxy was proclaimed by Trotsky the following year:

> *"We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class... . The dictatorship of the proletariat, in its very essence, signifies the immediate supremacy of the revolutionary vanguard, which relies upon the heavy masses, and, where necessary, obliges the backward tail to dress by the head".* [**Communism and Terrorism**, pp. 109–10]

At the Second Congress of the Communist International in the summer of 1920 the assembled revolutionaries heard leading Bolshevik Zinoviev proclaim that *"[t]oday, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class"* This meant that *"the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party."* [**Proceedings and Documents of the Second Congress 1920**, vol. 2, pp. 151–2] Unsurprisingly, then, the Kronstadt demand for soviet democracy was rejected by the party for it was incompatible with the party dictatorship predicated by the party ideology. This, of course, did not stop Trotsky proclaiming that Kronstadt had to be crushed as *"the proletariat had to hold political power in its hands with redoubled energy"*. [Lenin and Trotsky, **Kronstadt**, pp. 81–2]

Economically, the Bolshevik regime imposed a policy later called *"War Communism"* although, as Victor Serge later noted, *"any one who, like myself, went so far as to consider it purely temporary was looked upon with disdain"*. [**Memoirs of a Revolutionary**, p. 115] This regime was marked by extreme hierarchical and dictatorial practices, although it was building upon tendencies well in place before the civil war started (for example, the one-man management advocated by Lenin in April 1918 — see section H.3.14). The leading lights of the Communist Party were expressing themselves on the nature of the "socialist" regime they desired with Trotsky, for example, implementing – and ideologically justifying — the *"militarisation of labour"* and a corresponding empowerment of the state's power over the working class now that the *"internal civil war is coming to an end"*. [**Op. Cit.**, p. 132] These authoritarian policies included:

> *"The very principle of compulsory labour service is for the Communist quite unquestionable… . But hitherto it has always remained a mere principle. Its application has always had an accidental, impartial, episodic character. Only now, when along the whole line we have reached the question of the economic re-birth of the country, have problems of compulsory labour service arisen before us in the most concrete way possible. The only solution of economic difficulties that is correct from the point of view both of principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power … and to introduce strict order into the work of its registration, mobilisation, and utilisation."* [**Op. Cit.**, p. 135]
>
> *"The introduction of compulsory labour service is unthinkable without the application, to a greater or less degree, of the methods of militarisation of labour."* [**Op. Cit.**, p. 137]
>
> *"Why do we speak of militarisation? Of course, this is only an analogy – but an analogy very rich in content. No social organisation except the army has ever considered itself justified in subordinating citizens to itself in such a measure, and to control them by its will on all sides to such a degree, as the State of the proletarian dictatorship considers itself justified in doing, and does."* [**Op. Cit.**, p. 141]
>
> *"Both economic and political compulsion are only forms of the expression of the dictatorship of the working class in two closely connected regions … under Socialism there will not exist the apparatus of compulsion itself, namely, the State: for it will have melted away entirely into a producing and consuming commune. None the less, the road to Socialism lies through a period of the highest possible intensification of the principle of the State … Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless form of State, which embraces the life of the citizens authoritatively in every direction … No organisation except the army has ever controlled man with such severe compulsion as does the State organisation of the working class in the most difficult period of transition. It is just for this reason that we speak of the militarisation of labour."* [**Op. Cit.**, pp. 169–70]
>
> *"It would consequently be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy over the whole Soviet mechanism of the collective will of the workers [i.e., the party], and not at all in the form in which individual economic enterprises are administered … I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully."* [**Op. Cit.**, pp. 162–3]

This vision of strict centralisation and top-down economic structures built upon Bolshevik ideology and policies of the first months after the October revolution. The attempts at workers' self-management organised by the factory committees was opposed in favour of a centralised state capitalist system, with Lenin arguing for appointed managers with *"dictatorial"* powers

(see Maurice Brinton's **The Bolsheviks and Workers' Control** for full details). These policies ensured that *"with unshakeable firmness [the Bolsheviks] wrested the factories from the workers (Communist and non-party) wrenched from them from their essential conquest, the one weapon they could use to take another step towards their emancipation, towards socialism. The Russian proletariat became once more the wage-earning manpower in other people's factories. Of socialism there remained in Russia no more than the word."* [Anton Ciliga, **The Russian Enigma**, p. 286] With workers reduced to wage-workers as before the revolution, it comes as no surprise that labour protests and strikes — and their repression by the State — were a recurring feature of the Bolshevik regime before, during and after the civil war (see section H.6.3 for examples). Strikers faced the denial of rations, lock-outs, selective rehiring, and imprisonment at best, death at worse, at the hands of the troops and Cheka (the secret police) of the "workers' state." Ironically, those *"who had seized power in 1917 in the name of the politically conscious proletariat were in fact weeding out all these conscious workers."* [Brovkin, **Op. Cit.**, p. 298]

In the countryside, grain requisitioning resulted in peasant uprisings as food was taken from the peasants by force. While the armed detachments were *"instructed to leave the peasants enough for their personal needs, it was common for the requisitioning squads to take at gun-point grain intended for personal consumption or set aside for the next sowing."* The villagers predictably used evasive tactics and cut back on the amount of land they tilled as well as practising open resistance. [Avrich, **Op. Cit.**, pp. 9–10] Famine was a constant problem as a result, made even worse by the Bolshevik centralised economic structures whose *"inefficiency ... saw [the seized food] products lying at side stations and rotting away."* [Goldman, **My Disillusionment in Russia**, p. 96] The lack of food — and Bolshevik policies which exacerbated the problem — was a common theme in workers' strikes and protests, including those in Petrograd which directly inspired the Kronstadt revolt.

Thus the ruling party had in practice eliminated the political and economic power of the working class and, moreover, embedded this into its ideology. This was not seen as a temporary policy imposed upon the Bolsheviks by the war but rather, as can be seen, as an expression of principle and justified as such. Indeed, much of Bolshevik practice could be easily related to the demands of the **Communist Manifesto**, including its calls *"to centralise all instruments of production in the hands of the State,"* for the *"[c]entralisation of credit"* and *"the means of communication and transport in the hands of the State"*, the *"[e]xtension of factories and instruments of production owned by the State"* and the *"[e]stablishment of industrial armies, especially for agriculture"*. Likewise, its suggestion that *"Communists ... theoretically ... have over the great mass of the proletariat the advantage of clearly understanding the line of march, the conditions, and the ultimate general results of the proletarian movement"* contains within it the Bolshevik rationale for its rule over the proletariat in its higher interests (as defined, of course, by the Communist leaders). [**Marx-Engels Collected Works**, vol. 6, p. 504, p. 505 and p. 498]

All this required loyal troops and unsurprisingly the Bolsheviks quickly worked to recreate special bodies of armed men standing apart from the people (see section H.1.7). A political police force, the Cheka, was created in December 1917 while in the Red Army and Navy, anti-democratic principles were imposed. At the end of March, 1918, Trotsky proclaimed that *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree."* Soldiers, he disingenuously suggested, did not have to fear this system of top-down appointment as *"political power is in the hands of the same working class from whose ranks the Army is recruited"* (i.e. in the hands of the Bolshevik party). There could *"be no antagonism*

between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the ***appointment*** *of members of the commanding staff by the organs of the Soviet Power."* [*"Work, Discipline, Order"*, **How the Revolution Armed**, vol. 1, p. 47] Of course, as any worker in struggle can tell you, they almost always come into conflict with the union's bureaucracy (as Trotskyists themselves often point out).

In the Navy, a similar process occurred — much to the disgust and opposition of the sailors. As Paul Avrich notes, *"Bolshevik efforts to liquidate the ship committees and impose the authority of the centrally appointed commissars aroused a storm of protest in the Baltic Fleet. For the sailors, whose aversion to external authority was proverbial, any attempt to restore discipline meant a betrayal of the freedoms for which they had struggles in 1917."* [**Kronstadt 1921**, p. 66] This process *"began in earnest on 14 May 1918 with the* ***appointment*** *of Ivan Flerovsky as general commissar of the Baltic Fleet and chairman of its Council of Commissars, a body which replaced the disbanded elective Central Committee of the Baltic Fleet. Flerovsky promptly appointed bridge commissars to whom all ships' committees were subordinated ... Naval democracy was finally destroyed on 18 January 1919 when Trotsky . .. decreed the abolition of all ships' committees, the appointment of commissars to all ships, and the setting up of revolutionary tribunals to maintain discipline, a function previously vested in elected 'comradely courts.'"* [Getzler, **Kronstadt 1917–1921**, p. 191]

Thus Voline:

> *"the Bolshevik government evidently understood the slogan 'power to the soviets' in a peculiar way. It applied it in reverse. Instead of giving assistance to the working masses and permitting them to conquer and enlarge their own autonomous activity, it began by taking all 'power' from them and treating them like subjects. It bent the factories to its will and liberated the workers from the right to make their own decisions; it took arbitrary and coercive measures, without even asking the advice of the workers' concerned; it ignored the demands emanating from the workers' organisations. And, in particular, it increasingly curbed, under various pretexts, the freedom of action of the Soviets and of other workers' organisations, everywhere imposing its will arbitrarily and even by violence."* [**The Unknown Revolution**, pp. 459–60]

From before the start of Civil War, the Russian people had been slowly but surely eliminated from any meaningful say in the progress of the revolution. The Bolsheviks undermined (when not abolishing) workers' democracy, freedom and rights in workplaces, soviets, unions, the army and the navy. Unsurprisingly, the lack of any real control from below heightened the corrupting effects of power. Inequality, privilege and abuses were everywhere in the ruling party and bureaucracy (*"Within the party, favouritism and corruption were rife. The Astoria Hotel, where many high officials lived, was the scene of debauchery, while ordinary citizens went without the bare necessities."* [Paul Avrich, *"Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers' Group"*, **The Russian Review**, Vol. 43, No. 1, p. 7]).

With the end of the Civil War in November 1920, many expected a change of policy. However, months passed and the same policies were followed. *"The Communist State,"* as Alexander Berkman summarised, *"showed no intention of loosening the yoke. The same policies continued, with labour militarisation still further enslaving the people, embittering them with added oppression and tyranny, and in consequence paralysing every possibility of industrial revival."* [*"The Kronstadt*

Rebellion", **Op. Cit.**, p. 61] As in early 1920, the Bolsheviks took success in the Civil War as meaning success of their policies and sought to continue and widen their application — workers' opposition was taken as being an example of the "declassing" of the working class and so ignored (given the party reflected their "real" interests, this was a logical position to take if its circular nature is ignored).

Finally, in the middle of February, 1921, *"a rash of spontaneous factory meetings"* began in Moscow. Workers called for the immediate scrapping of War Communism. These meetings were *"succeeded by strikes and demonstrations."* Workers took to the streets demanding *"free trade"*, higher rations and *"the abolition of grain requisitions."* Some demanded the restoration of political rights and civil liberties. Troops had to be called in to restore order. Then a far more serious wave of strikes and protests swept Petrograd. The Kronstadt revolt was sparked off by these protests. Like Moscow, these *"street demonstrations were heralded by a rash of protest meetings in Petrograd's numerous but depleted factories and shops."* Like Moscow, speakers *"called for an end to grain requisitioning, the removal of roadblocks, the abolition of privileged rations, and permission to barter personal possessions for food."* On the 24th of February, the day after a workplace meeting, the Trubochny factory workforce downed tools and walked out. Workers from nearby factories joined in. The crowd of 2,000 was dispersed by armed military cadets. The next day, the Trubochny workers again took to the streets and visited other workplaces, bringing them out on strike too. [Paul Avrich, **Op. Cit.**, pp. 35–6 and pp. 37–8] The strikers started to organise themselves: *"As in 1918, workers from various plants elected delegates to the Petrograd Assembly of Plenipotentiaries."* [Brovkin, **Op. Cit.**, p. 393] Alexander Berkman noted in his diary the events unfolding before his eyes:

> *"Several factories have been closed for lack of fuel, and the employees put on half rations. They called a meeting to consult about the situation, but the authorities did not permit it to take place.*
>
> *"The Trubotchny millworkers have gone on strike. In the distribution of winter clothing, they complain, the Communists received undue advantage over the non-partisans. The Government refuses to consider the grievances till the men return to work.*
>
> *"Crowds of strikers gathered in the street near the mills, and soldiers were sent to disperse them. They were **kursanti**, Communist youths of the military academy. There was no violence.*
>
> *"Now the strikers have been joined by the men from the Admiralty shops and Galernaya docks. There is much resentment against the arrogant attitude of the Government. A street demonstration was attempted, but mounted troops suppressed it ... The strike situation is growing more serious. The Patronny mills, the Baltiysky and Laferm factories have suspended operations. The authorities have ordered the strikers to resume work. Martial law in the city. The special Committee of Defense (**Komitet Oboroni**) is vested with exceptional powers, Zinoviev at its head.*
>
> *"At the Soviet session last evening a military member of the Defense Committee denounced the strikers as traitors to the Revolution ... and demanded drastic measures against them. The Soviet passed a resolution locking out the men of the Trubotchny mill. It means deprivation of rations — actual starvation ... Strikers' proclamations*

have appeared on the streets today ... Some of the circulars protest against the suppression of factory meetings ... Many arrests are taking place. Groups of strikers surrounded by Tchekists, on their way to prison, are a common sight. Much indignation in the city. I hear that several unions have been liquidated and their active members turned over to the Tcheka. But proclamations continue to appear." [**The Bolshevik Myth**, pp. 291–3]

A three-man Defence Committee was formed and Zinoviev *"proclaimed martial law"* on February 24th. [Avrich, **Op. Cit.**, p. 39] A state of siege was imposed, along with a curfew of 11pm and the banning of all meetings and gatherings (indoor and out) unless approved of by the Defence Committee and *"[a]ll infringements would be dealt with according to military law."* [quoted by Mett, **Op. Cit.**, p. 147] The workers *"were ordered to return to the shops on pain of being deprived of their rations. This entirely failed of any effect, whereupon a number of unions were liquidated, their officials and the more recalcitrant strikers placed in prison ... by armed Chekists and soldiers ... The strike kept spreading, all extreme measures notwithstanding. Arrests followed upon arrests ... The workers were determined, but it was apparent that they would soon be starved into submission ... All avenues of approach to the industrial districts of the city were cut off by massed troops ... the odds between the dictatorship and the workers were too uneven to permit the strikers to hold out much longer. "* [Emma Goldman, **Living My Life**, vol. 2, p. 875] As part of this process of repression, the Bolshevik government had to rely on the ***kursanty*** (Communist officer cadets) as the local garrisons had been caught up the general ferment and could not be relied upon to carry out the government's orders. *"Overnight Petrograd became an armed camp. In every quarter pedestrians were stopped and their documents checked ... the curfew [was] strictly enforced,"* while the Petrograd Cheka made widespread arrests. [Avrich, **Op. Cit.**, pp. 46–7]

The Bolsheviks also stepped up their propaganda drive. The strikers were warned not to play into the hands of the counterrevolution. As well as their normal press, popular party members were sent to agitate in the streets, factories and barracks. They also made a series of concessions such as providing extra rations. On March 1st the Petrograd soviet announced the withdrawal of all road-blocks and demobilised the Red Army soldiers assigned to labour duties in Petrograd. [Avrich, **Op. Cit.**, pp. 48–9] This, ironically, was one of the "counterrevolutionary" demands raised by Kronstadt which, according to Trotskyists, showed the "peasant" nature of the sailor's revolt.

Thus a combination of force, propaganda and concessions was used to defeat the strike (which had quickly reached a near general strike level). As Paul Arvich notes, *"there is no denying that the application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities had been indispensable in restoring order. Particularly impressive in this regard was the discipline shown by the local party organisation. Setting aside their internal disputes, the Petrograd Bolsheviks swiftly closed ranks and proceeded to carry out the unpleasant task of repression with efficiency and dispatch."* [**Op. Cit.**, p. 50]

This indicates the immediate context of the Kronstadt rebellion. Yet Trotskyist J. G. Wright wonders whether the Kronstadt's paper *"lied when in the very first issue ... it carried a sensational headline: 'General Insurrection in Petrograd'"* and states that people *"spread . .. lies about the insurrection in Petrograd."* [Lenin and Trotsky, **Kronstadt**, p. 109] Yes, of course a near general strike, accompanied by mass meetings and demonstrations which was being repressed by force and martial law is an everyday occurrence and has nothing in common with an insurrection! If

such events occurred in a state not headed by Lenin and Trotsky it is unlikely Mr. Wright would have such difficulty in recognising them for what there were. Historian V. Brovkin states the obvious: *"To anyone who had lived through the events of February 1917, this chain of events appeared strikingly similar. It looked as if a popular insurrection had begun."* [**Op. Cit.**, p. 393] Indeed, this was a key concern of the Bolshevik authorities as they sought, unfortunately successfully, to end the possibility of it repeating the events of four years before.

Unsurprisingly, the crew of the battleships ***Petropavlovsk*** and ***Sevastopol*** decided to act once *"the news of strikes, lockouts, mass arrests and martial law"* in Petrograd reached them. They *"held a joint emergency meeting in the face of protests and threats of their commissars"* and *"elected a fact-finding delegation of thirty-two sailors which, on 27 February, proceeded to Petrograd and made the round of the factories... They found the workers whom they addressed and questioned too frightened to speak up in the presence of the hosts of Communist factory guards, trade union officials, party committee men and Chekists."* [Gelzter, **Kronstadt 1917–1921**, p. 212] The delegation returned the next day to Kronstadt and reported its findings to a general meeting of the ship's crews and adopted the resolutions which were to be the basis of the revolt (see next section). The Kronstadt rebellion had started.

It was these labour protests and their repression which started the events in Kronstadt. While many sailors had undoubtedly read or listened to the complaints of their relatives in the villages and had protested on their behalf to the Soviet authorities, it took the Petrograd strikes to be the catalyst for the revolt (after years of increasingly autocratic and bureaucratic Bolshevik rule) Moreover, they had other political reasons for protesting against the policies of the government: navy democracy had been abolished, the soviets had been turned into fig-leaves of party dictatorship, workers were back to being wages-slaves of new, State-appointed, bosses. They saw the revolution had failed and sought ways to save it, as can be seen when ***Izvestiia*** (the paper produced during the rebellion by the Provisional Revolutionary Committee) argued that in Kronstadt *"there have been laid the foundations of the Third Revolution, which will break the last chains of the workers and lay open the new highway to socialist construction."* [quoted by Voline, **The Unknown Revolution**, p. 508]

3 What was the Kronstadt Programme?

It is rare for a Trotskyist to actually list the demands of the Kronstadt revolt in their entirety. A more-or-less (often less) accurate summary of certain points is the best the reader can expect. For example, the standard Trotskyist book on the rebellion could spare no space in its 150 pages for the resolution although a very short summary is provided in its *"Editorial Preface"*:

> *"The resolution demanded free elections in the soviets with the participation of anarchists and Left SRs, legalisation of the socialist parties and the anarchists, abolition of the Political Departments [in the fleet] and the Special Purpose Detachments, removal of the **zagraditelnye ottyady** [Armed troops used to prevent unauthorised trade], restoration of free trade, and the freeing of political prisoners."* [Lenin and Trotsky, **Kronstadt**, pp. 5–6]

It also asserts in its *"Glossary"* that sailors' *"demanded political and economic changes, many of which were soon realised with the adoption of the NEP"*. Which contradicts Trotsky who claimed

that it was an *"illusion"* to think *"it would have been sufficient to inform the sailors of the NEP decrees to pacify them"* and that the *"insurgents did not have a conscious program, and they could not have had one because of the very nature of the petty bourgeoisie. They themselves did not clearly understand that their fathers and brothers needed first of all was free trade."* [**Op. Cit.**, p. 148 and p. 91–2]

So we have an uprising which demanded free trade and did not demand it. It was similar to the NEP but the NEP would not have satisfied it. It produced a platform of political and economic demands but did not, apparently, have a *"conscious program."* The contradictions abound. Why these contradictions exist will become clear after we — like all the libertarian books and pamphlets on the rebellion — list the 15 demands:

> *"1. Immediate new elections to the Soviets. The present Soviets no longer express the wishes of the workers and peasants. The new elections should be by secret ballot, and should be preceded by free electoral propaganda.*
>
> *2. Freedom of speech and of the press for workers and peasants, for the Anarchists, and for the Left Socialist parties.*
>
> *3. The right of assembly, and freedom for trade union and peasant organisations.*
>
> *4. The organisation, at the latest on 10th March 1921, of a Conference of non-Party workers, soldiers and sailors of Petrograd, Kronstadt and the Petrograd District.*
>
> *5. The liberation of all political prisoners of the Socialist parties, and of all imprisoned workers and peasants, soldiers and sailors belonging to working class and peasant organisations.*
>
> *6. The election of a commission to look into the dossiers of all those detained in prisons and concentration camps.*
>
> *7. The abolition of all political sections in the armed forces. No political party should have privileges for the propagation of its ideas, or receive State subsidies to this end. In the place of the political sections various cultural groups should be set up, deriving resources from the State.*
>
> *8. The immediate abolition of the militia detachments set up between towns and countryside.*
>
> *9. The equalisation of rations for all workers, except those engaged in dangerous or unhealthy jobs.*
>
> *10. The abolition of Party combat detachments in all military groups. The abolition of Party guards in factories and enterprises. If guards are required, they should be nominated, taking into account the views of the workers.*
>
> *11. The granting to the peasants of freedom of action on their own soil, and of the right to own cattle, provided they look after them themselves and do not employ hired labour.*
>
> *12. We request that all military units and officer trainee groups associate themselves with this resolution.*
>
> *13. We demand that the Press give proper publicity to this resolution.*
>
> *14. We demand the institution of mobile workers' control groups.*

15. We demand that handicraft production be authorised provided it does not utilise wage labour." [quoted by Ida Mett, **Op. Cit.**, pp. 147–8]

This is the programme described by the Soviet government as a *"SR-Black Hundreds resolution"*! This is the programme which Trotsky maintains was drawn up by *"a handful of reactionary peasants and soldiers."* [Lenin and Trotsky, **Op. Cit.**, p. 65 and p. 98] As can be seen, it was nothing of the kind. In the words of Paul Avrich, *"[i]n effect, the* **Petropavlovsk** *resolution was an appeal to the Soviet government to live up to its own constitution, a bold statement of those very rights and freedom which Lenin himself had professed in 1917. In spirit, it was a throwback to October, evoking the old Leninist watchword of 'All power to the soviets.'"* [**Kronstadt 1921**, pp. 75–6] These demands, then, were *"impregnated with the spirit of October; and no calumny in the world can cast a doubt on the intimate connection existing between this resolution and the sentiments which guided the expropriations of 1917."* [Anton Ciliga, *"The Kronstadt Revolt"*, **Op. Cit.**, p. 333]

If the ideas of the Kronstadt revolt are reactionary, then so is the slogan *"all power to the soviets."* Perhaps unsurprisingly, given the programme and the initial Bolshevik response, *"Soviet historians had no choice but to claim that the resolution which was published was an amended version of a 'Black Hundreds' resolution (a copy of which could not be found in 1931 [or later]) and to invent a second meeting of the ships' companies at which the resolution was re-written."* [George Katkov, **Op. Cit.**, p. 23]

While these fifteen demands are central to the revolt, looking at the paper produced during it helps us understand the nature of these demands and place them in a fuller political context. *"The pages of* **Izvestiia***"*, as Voline argued, *"give abundant proof of th[e] general enthusiasm, which re-appeared once the masses felt they had regained, in the free Soviets, the true road to emancipation and the hope of achieving the real revolution."* [**The Unknown Revolution**, p. 495] For example, food rations were equalised, except for the sick and to children, who received a larger one. Left-wing political parties were legalised. The Provisional Revolutionary Committee was elected by a *"Conference of Delegates"* made up of over two hundred delegates from military units and workplaces. This body elected the Provisional Revolutionary Committee on March 2nd and enlarged it (again by election) on March 4th as well as *"decid[ing] that all workers, without exception, should be armed and put in charge of guarding the interior of the city"* and to organise re-elections for *"the administrative commissions of all the unions and also of the Council of Unions"* (which could *"become the principle organ of the workers"*). [***Izvestiia*** quoted by Voline, **Op. Cit.**, p. 494]

In the article *"The Goals for Which We Fight,"* ***Izvestiia*** argued that *"[w]ith the aid of state unions"* the Communists have *"chained the workers to the machines, and transformed work into a new slavery instead of making it pleasant."* To the *"protests of the peasants, which have gone so far as spontaneous revolts, to the demands of the workers, compelled by the very conditions of their life to resort to strikes, they reply with mass shootings and a ferocity that the Tsarist generals might have envied."* An *"inevitable third revolution"* was coming, shown by *"increasing"* workers' strikes, which will be *"achieved by the labouring masses themselves."* This would be based on *"freely elected soviets"* and the reorganisation of *"the state unions into free associations of workers, peasants and intellectuals."* Thus ***Izvestiia*** saw clearly the real nature of nationalisation. Rather than being the basis of socialism, it simply produced more wage-labour this time to the state: *"From a slave of the capitalist the worker was transformed into a slave of state enterprises"*. [quoted by Voline, **Op. Cit.**, pp. 507–8 and p. 518] They clearly saw the need to replace wage slavery to the state (via nationalised property) with free associations of free workers and peasants. Such a

transformation would come from the collective direct action and self-activity of working people, as expressed in the strikes which had so recently swept across the country.

This transformation from the bottom up was stressed elsewhere. The unions, ***Izvestiia*** argued, would *"fulfil the great and urgent task of educating the masses for an economic and cultural renovation of the country ... The Soviet Socialist Republic cannot be strong unless its administration be exercised by the working class, with the help of renovated unions."* These should *"become real representatives of the interests of the people."* The current unions did *"nothing"* to promote *"economic activity of a co-operative nature"* or the *"cultural education"* of their members due centralised system imposed by the Communist regime. This would change with *"true union activity by the working class."* A strong syndicalist perspective can be seen here, urging self-managed unions to be at the forefront of transforming the economy into a free association of producers. They opposed any "socialist" system in which the peasant *"has been transformed into a serf"*, the worker *"a simple wage-worker in the State factories"* and those who protest are *"thrown into the jails of the Cheka."* [quoted by Voline, **Op. Cit.**, p. 510 and p. 512]

The rebels wrote in ***Izvestiia*** that soviet power cannot exist while a political party dominated the soviets, rightly noting that Russia was just *"State Socialism with Soviets of functionaries who vote docilely what the authorities and their infallible commissars dictate to them."* Without real working class power, without *"the will of the worker"* expressed in their free soviets, corruption had become rampant (*"Communists ... live in ease and the commissars get fat."*). Rather than a *"time of free labour in the fields, factories and workshops,"* where *"power"* was in *"the hands of the workers,"* the *"Communists have brought in the rule of the commissars, with all the despotism of personal power."* Against this travesty of socialism, the paper proclaimed that *"Revolutionary Kronstadt ... fights for the true Soviet Republic of the workers in which the producer himself will be owner of the products of his labour and can dispose of them as he wishes"*. This would create *"a life animated by free labour and the free development of the individual"* which could only be based on *"All power to the Soviets and not to the parties"* and *"the power of the free soviets."* [quoted by Voline, **Op. Cit.**, p. 519, p. 518, p. 511, p. 518 and p. 519]

Finally, we must note that many — with pro-Bolsheviks at the forefront – have proclaimed that the Kronstadt revolt raised the slogan "Soviets without Communists" or "Soviets without Bolsheviks". Thus we find Trotsky stating that the *"Kronstadt slogan"* was *"soviets without Communists."* [Lenin and Trotsky, **Kronstadt**, p. 90] Yet, as Paul Avrich notes in his essential work on the rebellion, *"'Soviets without Communists' was not, as is often maintained by both Soviet and non-Soviet writers, a Kronstadt slogan."* Nor did they agitate under the banner "soviets without parties", instead they argued for *"all power to the soviets and not to parties."* Political parties were not to be excluded from the soviets, simply stopped from dominating them and substituting themselves for them. The Kronstadt programme *"did allow a place for the Bolsheviks in the soviets, alongside the other left-wing organisations ... Communists ... participated in strength in the elected conference of delegates, which was the closest thing Kronstadt ever had to the free soviets of its dreams."* [**Kronstadt 1921**, p. 181] Indeed, *"the proportion of Communists among the delegates finally elected to the delegates' meeting was about one third."* [George Katkov, **Op. Cit.**, p. 30]

As can be seen, while the 15 demands are the essence of the revolt, looking at ***Izvestiia*** confirms its revolutionary nature. The rebels of 1921, as in 1917, looked forward to a system of free soviets in which working people could transform their society into one based on free associations which would encourage individual freedom and be based on working class power. They looked to a combination of renewed and democratic soviets and unions to transform Russian

society into a **real** socialist system rather than the system of state capitalism the Bolsheviks had imposed.

Clearly, Kronstadt's political programme was deeply socialist in nature. It opposed the new wage slavery of the workers to the state and argued for free associations of free producers. It was based on the key slogan of 1917, *"All power to the soviets"* but built upon it by adding the rider *"but not to parties."* The sailors had learned the lesson of the October revolution, namely that if a party held power the soviets did not. The politics of the revolt were not dissimilar to those of libertarian socialists and, as we show in section 9, identical to the dominant ideas of Kronstadt in 1917. Yet, according to Trotskyists, these demands and politics represent the interests of the peasantry and it was these which motivated them. For anarchists, it is an expression of the interests of all working people (proletarian, peasant and artisan) against all those who would exploit and govern them (be it private capitalists or state bureaucrats). We discuss this issue in the next section.

4 Did the Kronstadt rebellion reflect *"the exasperation of the peasantry"*?

The notion that the Kronstadt rebellion reflected the needs and interests of the peasantry a common argument of Trotskyists. As a typical example, we see John Rees — who needless to say does not provide a summary of revolt's 15 point programme — assert that the *"sailors represented the exasperated of the peasantry with the War Communism regime"*. [*"In Defence of October"*, pp. 3–82, **International Socialism**, no. 52, p. 63] In this he simply repeats Trotsky's comments that the ideas of the rebellion *"were deeply reactionary"* and *"reflected the hostility of the backward peasantry toward the worker, the self-importance of the soldier or sailor in relation to 'civilian' Petrograd, the hatred of the petty bourgeois for revolutionary discipline."* The revolt *"represented the tendencies of the land-owning peasant, the small speculator, the kulak."* [Lenin and Trotsky, **Kronstadt**, p. 80 and p. 81]

Before discussing these claims, we must note that the Kronstadt sailors had been smeared before by those less revolutionary than themselves. The ex-Bolshevik turned Menshevik Vladimir Voitinsky, for example, who had visited the base in May 1917 later remembered them as being *"degraded and demoralised"* and *"lack[ing] proletarian class-consciousness. It has the psychology of a **Lumpenproletariat**, a stratum that is a danger to a revolution rather than its support."* They were *"material suitable for a rebellion **a la** Bakunin."* [quoted by Getzler, **Kronstadt 1917–1921**, p. 253] Four years later, it was the Bolsheviks denouncing them for being non-proletarian — this time they were peasants.

How true are such claims? Even the most superficial analysis of the ***Petropavlovsk*** resolution (see last section) and the events leading up to the revolt itself can allow the reader to dismiss Trotsky's assertions.

First, according to the definition of *"kulak"* proved by the Trotskyists themselves, we discover that kulak refers to *"well-to-do peasants who owned land and hired poor peasants to work it."* [Lenin and Trotsky, **Op. Cit.**, p. 146] Point 11 of the Kronstadt demands explicitly states their opposition to rural wage labour. How could Kronstadt represent *"the kulak"* when it called for the abolition of hired labour on the land? If it did, then so did the Bolshevik's own land decree of 26 October 1917 which proclaimed that the *"right to use the land shall be accorded to all citizens of the Russian state ... desiring to cultivate it by their own labour, with the help of their families, or in partnership, but only as long as they are able to cultivate it. The employment of hired labour is not permitted."*

[*"Decree on the Land"*, Robert V. Daniels (ed.), **A Documentary History of Communism**, vol. 1, p. 122] Moreover, Trotsky seems to have forgotten that the land decree was inspired by peasant rebellion and this revolutionary movement had transformed the countryside as Lenin admitted in 1921:

> *"There are far more middle peasants now than before, the antagonisms have been smoothed out, the land has been distributed for use far more equally, the kulak's position has been undermined and he has been in considerable measure expropriated ... statistics show quite definitely that there has been a levelling out, an equalisation, in the village, that is, the old sharp division into kulaks and cropless peasants has disappeared. Everything has become more equable, the peasantry in general has acquired the status of the middle peasant."* [**Collected Works**, vol. 32, p. 216]

Official Bolshevik figures later estimated that the percentage of peasants owning more than ten hectares had fallen from 3.7% in 1917 to 0.5% in 1920 and so the number of well-off peasants had *"become quite negligible"* as *"the circumstances of peasants had levelled out"* [Alexander Skirda, **Nestor Makhno: Anarchy's Cossack**, pp. 173–4] So, as Ida Mett argued, *"[i]n their resolution, the Kronstadt sailors were taking up once again one of the big demands of October. They were supporting those peasant claims demanding the land and the right to own cattle for those peasants who did not exploit the labour of others. In 1921, moreover, there was another aspect to this particular demand. It was an attempt to solve the food question, which was becoming desperate. Under the system of forced requisition, the population of the towns was literally dying of hunger. Why, incidentally, should the satisfaction of these demands be deemed 'tactically correct' when advocated by Lenin, in March 1921, and 'counter-revolutionary' when put forward by the peasants themselves a few weeks earlier?"* [**Op. Cit.**, p. 151]

Secondly, the Kronstadt revolt started after the sailors at Kronstadt sent delegates to investigate the plight of striking workers in Petrograd. Their actions were inspired by solidarity for these workers and civilians. This clearly shows that Trotsky's assertion that the revolt *"reflected the hostility of the backward peasantry toward the worker, the self-importance of the soldier or sailor in relation to 'civilian' Petrograd"* to be utter and total nonsense.

Rather than being *"deeply reactionary,"* the ideas that motivated the revolt clearly were not. They called for soviet democracy, free speech, assembly and organisation for workers and peasants. These express the demands of most, if not all, Marxist parties (including the Bolsheviks in 1917) before they take power. They simply repeat the demands of the revolutionary period of 1917 and reflected the Soviet Constitution.

So did the demands represent the interests of the (non-kulak) peasantry? To determine whether this is the case, we must see whether the demands reflected those of industrial workers or not. If the demands do, in fact, match those of striking workers and other proletarian elements then we can easily dismiss this claim as it is impossible to say that they simply reflected the needs of peasants (of course, Trotskyists will argue that these proletarians were also *"backward"* but, in effect, they are arguing that any worker who did not quietly follow Bolshevik orders was *"backward"* — hardly a sound definition of the term).

We can quickly note that the demands echoed those raised during the Moscow and Petrograd strikes that preceded the Kronstadt revolt. For example, Paul Avrich records that the demands raised in the February strikes included *"removal of roadblocks, permission to make foraging trips*

into the countryside and to trade freely with the villagers, [and] elimination of privileged rations for special categories of working men." The workers also *"wanted the special guards of armed Bolsheviks, who carried out a purely police function, withdrawn from the factories"* and raised *"pleas for the restoration of political and civil rights."* One manifesto which appeared (unsigned but bore signs of Menshevik origin) argued that *"the workers and peasants need freedom. They do not want to live by the decrees of the Bolsheviks. They want to control their own destinies."* It urged the strikers to demand the liberation of all arrested socialists and non-party workers, abolition of martial law, freedom of speech, press and assembly for all who labour, free elections of factory committees, trade unions, and soviets. [Avrich, **Kronstadt 1921**, pp. 42–3] According to one Bolshevik Commissar) the *"basic demands are everywhere the same: free trade, free labour, freedom of movement, and so on."* Two key demands raised in these strikes dated back to at least 1920, namely *"for free trade and an end to privilege"*, while in March 1919, *"the Rechkin coach-building plant demanded equal rations for all* ***workers****"* and that one of the *"most characteristic demands of the striking workers at that time were for the free bringing-in of food."* [Mary McAuley, **Bread and Justice**, p. 299 and p. 302] The following proclamation appeared on the walls:

> *"A complete change is necessary in the policies of the Government ... First of all, the workers and peasants need freedom. They don't want to live by the decrees of the Bolsheviki; they want to control their own destinies. We demand the liberation of all arrested Socialists and non-partisan workingmen; abolition of martial law; freedom of speech, press, and assembly for all who labor; free election of shop and factory committees, of labor union and Soviet representatives."* [quoted by Alexander Berkman, **The Bolshevik Myth**, p. 292]

As can be seen, these reflect points 1, 2, 3, 5, 8, 9, 10, 11 and 13 of the revolt. As Paul Avrich summarises, the Kronstadt demands *"echoed the discontents not only of the Baltic Fleet but of the mass of Russians in towns and villages throughout the country. Themselves of plebeian stock, the sailors wanted relief for their peasant and worker kinfolk. Indeed, of the resolution's 15 points, only one — the abolition of the political departments in the fleet — applied specifically to their own situation. The remainder ... was a broadside aimed at the policies of War Communism, the justification of which, in the eyes of the sailors and of the population at large, had long since vanished."* He argues that many of the sailors had returned home on leave to see the plight of the villagers with their own eyes played a part in framing the resolution (particularly of point 11, the **only** peasant specific demand raised) but *"[b]y the same token, the sailors' inspection tour of Petrograd's factories may account for their inclusion of the workingmen's chief demands — the abolition of road-blocks, of privileged rations, and of armed factory squads — in their program."* [Avrich, **Op. Cit.**, pp. 74–5] Simply put, the Kronstadt resolution *"merely reiterated long standing workers' demands."* [V. Brovkin, **Op. Cit.**, p. 395]

Ignoring all this, Rees informs his readers that Kronstadt revolt *"[a]lthough it was preceded by a wave of serious but quickly resolved strikes, the motivation of the Kronstadt rebellion was much closer to that of the peasantry than it was to dissatisfaction among what remained of the urban working class."* [**Op. Cit.**, 61] In reality, Ida Mett had been correct to argue that the *"Kronstadt revolution had the merit of stating things openly and clearly. But it was breaking no new ground. Its main ideas were being discussed everywhere. For having, in one way or another, put forward precisely such ideas, workers and peasants were already filling the prisons and the recently set up*

concentration camps." Nor can it be claimed that these workers were non-proletarians (as if class is determined by thought rather than social position). Rather than being those workers with the closest relations with the countryside who were protesting, the opposite was the case. By 1921 *"[a]ll who had relatives in the country had rejoined them. The authentic proletariat remained till the end, having the most slender connections with the countryside."* [**Op. Cit.**, p. 149 and p. 145] Indeed, *"an analysis of the industrial unrest in 1921 shows that long-standing workers were prominent in protest"* and the *"strongest reason for accepting the idea that it was established workers who were behind the* ***volynka*** *[i.e. the strike wave] is the form and course of protest. Traditions of protest reaching back through the spring of 1918 to 1917 and beyond were an important factor in the organisation of the* ***volynka.*** *... There was also a degree of organisation ... which belies the impression of a spontaneous outburst."* [Jonathan Aves, **Workers Against Lenin**, p. 91 and p. 126]

Given that the Russian urban working class were also calling for free trade (and often without the political, anti-capitalist, riders Kronstadt added) it seems dishonest to claim that the sailors purely expressed the interests of the peasantry. Perhaps this explains why point 11 becomes summarised as *"restoration of free trade"* by most Trotskyists. [*"Editorial Preface"*, Lenin and Trotsky, **Kronstadt**, p. 6] Yet, by focusing on the *"free trade"* issue, Leninists distort the real reasons for the revolt as the Kronstadt rebellion did not call for "free trade" as Trotskyists argue but rather something far more important:

> *"In the Kronstadt Isvestia of March 14th we find a characteristic passage on this subject. The rebels proclaimed that 'Kronstadt is not asking for freedom of trade but for genuine power to the Soviets.' The Petrograd strikers were also demanding the reopening of the markets and the abolition of the road blocks set up by the militia. But they too were stating that freedom of trade by itself would not solve their problems."* [Ida Mett, **Op. Cit.**, p. 77]

Thus we have the Petrograd (and other) workers calling for free trade (and so, presumably, expressing their economic interests) while the Kronstadt sailors were demanding first and foremost soviet power. Their programme called for the *"granting to the peasants of freedom of action on their own soil, and of the right to own cattle, provided they look after them themselves and do not employ hired labour."* This was point 11 of the 15 demands, which showed the importance it ranked in their eyes. This would have been the basis of exchange between town and village, but exchange between worker and peasant and not between worker and kulak. This indicates a level of political awareness, an awareness of the fact that wage labour is the essence of capitalism. Thus Ante Ciliga:

> *"People often believe that Kronstadt forced the introduction of the New Economic Policy (NEP) — a profound error. The Kronstadt resolution pronounced in favour of the defence of the workers, not only against the bureaucratic capitalism of the State, but also against the restoration of private capitalism. This restoration was demanded — in opposition to Kronstadt — by the social democrats, who combined it with a regime of political democracy. And it was Lenin and Trotsky who to a great extent realised it (but without political democracy) in the form of the NEP. The Kronstadt resolution declared for the opposite since it declared itself against the employment of wage labour in agriculture and small industry. This resolution, and the movement underlying, sought for a*

> *revolutionary alliance of the proletarian and peasant workers with the poorest sections of the country labourers, in order that the revolution might develop towards socialism. The NEP, on the other hand, was a union of bureaucrats with the upper layers of the village against the proletariat; it was the alliance of State capitalism and private capitalism against socialism. The NEP is as much opposed to the Kronstadt demands as, for example, the revolutionary socialist programme of the vanguard of the European workers for the abolition of the Versailles system, is opposed to the abrogation of the Treaty of Versailles achieved by Hitler."* [*"The Kronstadt Revolt"*, **Op. Cit.**, pp. 334–5]

Point 11 did, as Ida Mett noted, *"reflected the demands of the peasants to whom the Kronstadt sailors had remained linked — as had, as a matter of fact, the whole of the Russian proletariat ... In their great majority, the Russian workers came directly from the peasantry. This must be stressed. The Baltic sailors of 1921 were, it is true, closely linked with the peasantry. But neither more nor less than had been the sailors of 1917."* To ignore the peasantry in a country in which the vast majority were peasants would have been insane (as the Bolsheviks proved) and so a *"workers and peasants' regime that did not wish to base itself exclusively on lies and terror, had to take account of the peasantry."* [**Op. Cit.**, p. 150 and p. 151]

Given this, it comes as no surprise to discover Rees rather lamely admitting in passing that *"no other peasant insurrection reproduced the Kronstadters demands."* Perhaps that explains why he failed to mention any of the demands raised either in the strikes or by Kronstadt for to do so would have shown that clearly **proletarian** strikes, resolutions and activists all produced demands similar or identical to the Kronstadt demands. [**Op. Cit.**, p. 63]

Similarly, the working class nature of the resolution can be seen from who agreed to it. The resolution passed by the sailors on the battleships was ratified by a mass meeting and then a delegate meeting of workers, soldiers and sailors. In other words, by workers **and** peasants. Yet J.G. Wright, following his guru Trotsky without question (and using him as the sole reference for his "facts"), stated that *"the incontestable facts"* were the *"sailors composed the bulk of the insurgent forces"* and *"the garrison and the civil population remained passive."* This, apparently, is evidence that *"underlying the mutiny was the expression of the petty bourgeois reaction against the difficulties and privations imposed by the conditions of the proletarian revolution. Nobody can deny this class character of the two camps."* [*"The Truth about Kronstadt"*, Lenin and Trotsky, **Op. Cit.**, p. 123] Let us contest these *"incontestable facts"* (i.e. assertions by Trotsky).

First, the meeting of 1st March in Anchor Square involved *"some fifteen to sixteen thousand sailors, soldiers and civilians."* [Getzler, **Kronstadt 1917–1921**, p. 215] As this represented over 30% of Kronstadt's total population, it hardly points to a "passive" attitude on behalf of the civilians and soldiers.

Second, the conference of delegates had a *"membership that fluctuated between which two and three hundred sailors, soldiers, and working men."* This body remained in existence during the whole revolt as the equivalent of the 1917 soviet and, like that soviet, had delegates from Kronstadt's *"factories and military units."* It was, in effect, a *"prototype of the 'free soviets' for which the insurgents had risen in revolt."* In addition, a new Trade Union Council was created, free from Communist domination. [Avrich, **Op. Cit.**, p. 159 and p. 157] Elections were held for the Council of Trade Unions on the 7th and 8th of March and this was a *"Council committee consisting of representatives from all trade unions"* while the Conference of Delegates *"had been elected by Kronstadt's body politic at their places of work, in army units, factories, workshops and Soviet institu-*

tions." The revolutionary troikas (the equivalent of the commissions of the Executive Committee of the Soviet in 1917) were also *"elected by the base organisations."* Likewise, *"the secretariats of the trade unions and the newly founded Council of Trade Unions were both elected by the entire membership of trade unions."* [Getzler, **Op. Cit.**, pp. 238–9 and p. 240]

Third, the declarations by sailors, soldiers and workers printed in ***Izvestiia*** which expressed their support for the revolt and those which announced they had left the Communist Party also present evidence which clearly contests Wright's *"incontestable facts."* One declaration of the *"soldiers of the Red Army from the fort Krasnoarmeietz"* stated they were *"body and soul with the Revolutionary Committee."* [quoted by Voline, **The Unknown Revolution**, p. 500] Likewise, given that the Red Army troops manned the main bastion and the outlying forts and gun emplacements at Kronstadt and that the Bolshevik troops had to take these forts by force, we can safely argue that the Red Army soldiers did not play a "passive" role during the rebellion. [Paul Avrich, **Op. Cit.**, p. 54 and pp. 205–6] In short, the *"local land forces of the Kronstadt garrison ... fell in and joined the seamen."* [D. Fedotoff-White, **The Growth of the Red Army**, p. 154]

That is a lot of activity for "passive" people. In short: *"But if the sailors took the lead, the Kronstadt garrison ... the Red Army troops who manned the surrounding forts and batteries ... soon fell into line; and the townspeople too, always susceptible to the influence of the seamen, with whom their occupations brought them into close contact, offered their active support"* [Avrich, **Op. Cit.**, p. 159]

As can be seen, the ***Petropavlovsk*** resolution not only reflected the demands of proletarians in Petrograd, it gained the support of proletarians in Kronstadt in the fleet, the army and the civilian workforce. More, the Kronstadt demands found support in urban areas. For example, *"Workers [in Moscow] applauded pro-Kronshtadt speakers at mass meetings, but at no point during the Kronshtadt events did this sympathy translate into action, however limited. On 25 March workers at the Bromlei factory, who passed a resolution supporting Kronshtadt, were punished with arrests, and the mass sacking and selective re-employment of the entire workforce, which in turn triggered some solidarity strikes in nearby factories. But that was all."* [Simon Pirani, *"The Moscow Workers' Movement in 1921 and the Role of Non-Partyism"*, pp. 143–160, **Europe-Asia Studies**, Vol. 56, No. 1, p. 149] At least two other revolts **did** raise demands similar to those raised by Kronstadt and both were by urban workers.

The first revolt started in Saratov when the authorities cut the already meagre rations at the beginning of March. The strike saw metallurgical plants and other large factories send representatives to the railroad shops and *"the initiative ... came from the skilled stratum that the Communists normally deemed the most conscious."* Strikers gatherings alarmed the local authorities, which *"agreed to permit the setting up of a commission that would re-examine the activities of all economic organs and the Cheka"* but *"the assemblies held at factories to elect delegates to the commission bitterly denounced the Communists"* and elected 270 members (less than 10 were Communists). This commission *"believed a **political** solution offered the best answer to putting an end to workers' economic distress ... the workers' delegates ... demanded the freeing of political prisoners, new elections to the soviets and to all labour organisations, independent unions, and freedom of speech, the press, and assembly."* These were identical to the demands raised in Kronstadt at the same time. The Bolsheviks *"resolved to shut down the commission before it could issue a public statement calling for free elections and independent labour organisations"* and *"set up a Provincial Revolutionary Committee (**gubrevkom**), which introduced martial law both in the city and the garrison. It arrested the ringleaders of the workers' movement"* and *"the police crackdown depressed the*

workers' movement and activities of the rival socialist parties". The Cheka *"sentenced 219 people to death and others to various prison terms. It also expanded its network of informants"* while the *"next month the Cheka shot another 62 individuals and sentenced 205 more to jail.* The local party reported to Moscow that the *"all but general strike was liquidated after tremendous efforts of the entire party and Soviet apparatus."* [Donald J. Raleigh, **Experiencing Russia's Civil War**, pp. 387–9]

Another revolt took place in Ekaterinoslavl (in the Ukraine) in May 1921 which the local communists called a *"little Kronstadt."* It started in the railway workshops and became *"quickly politicised,"* with the strike committee raising a *"series of political ultimatums that were very similar in content to the demands of the Kronstadt rebels."* The strike *"spread to the other workshops. The very close similarity of the demands of the Ekaterinoslavl workers to those of the Kronstadt rebels is evidence of their consciousness of being part of a wider movement but even more impressive is the speed and effectiveness with which the strike spread."* On June 1st the main large Ekaterinoslavl factories joined the strike. The strike was spread via the use of trains and telegraph and soon an area up to fifty miles around the town was affected. The local Communist Party leader was instructed *"to put down the rebellion without mercy ... Use Budennyi's cavalry."* The strike was finally ended by the use of the Cheka, using mass arrests and shootings, with 15 workers immediately shot and their bodies dumped in the River Dnepr. After a trial of 20 strike leaders, the communists held a series of meetings amongst the workers at which they *"spoke at length about the suppression of the Kronstadt revolt and the treatment meted out to the rebels"* and *"warned the workers of the consequences of further protest."* After a guarantee of immunity, a debate was held with Cheka agents hidden in the crowds *"to note the names of those workers who supported anti-Soviet speeches"* but the response to one such speech *"was so overwhelming they could do very little."* [Jonathan Aves, **Workers Against Lenin**, pp. 171–4]

Thus the claim that the Kronstadt resolution purely reflected the interests of the peasantry is refuted. The Kronstadters (like the Petrograd and other workers) raised economic and political demands in 1921 just as they had four years earlier when they overthrew the Tsar. Which, again, refutes the logic of defenders of Bolshevism. For example, Wright excelled himself when he argued the following:

> *"The supposition that the soldiers and sailors could venture upon an insurrection under an abstract political slogan of 'free soviets' is absurd in itself. It is doubly absurd in the view of the fact [!] that the rest of the Kronstadt garrison consisted of backward and passive people who could not be used in the civil war. These people could have been moved to an insurrection only by profound economic needs and interests. These were the needs and interests of the fathers and brothers of these sailors and soldiers, that is, of peasants as traders in food products and raw materials. In other words the mutiny was the expression of the petty bourgeoisie's reaction against the difficulties and privations imposed by the proletarian revolution. Nobody can deny this class character of the two camps."* [*"The Truth about Kronstadt"*, Lenin and Trotsky, **Op. Cit.**, pp. 111–2]

Of course, no worker or peasant could possibly reach beyond a trade union consciousness by their own efforts, as Lenin so thoughtfully argued in **What is to be Done?** (see section H.5). Neither could the experience of two revolutions have an impact on anyone, nor the extensive political agitation and propaganda of years of struggle. Indeed, the sailors were so backward

that they had no *"profound economic needs and interests"* of their own but rather fought for *"the needs and interests of the fathers and brothers"*! Yet, according to Trotsky, *"[t]hey themselves did not clearly understand that what their fathers and brothers needed first of all was free trade."* [Lenin and Trotsky, **Op. Cit.**, p. 92] And these were the sailors the Bolsheviks desired to operate some of the most advanced warships in the world?

Sadly for Wright's assertions history has proven him wrong time and time again. Working people have constantly raised political demands which were far in advance of those of the "professional" revolutionaries (a certain German and the Paris Commune springs to mind, never mind a certain Russian and the soviets). The fact that the Kronstadt sailors not only *"venture[d] upon an insurrection under an abstract political slogan of 'free soviets'"* but actually **created** one (the conference of delegates) goes unmentioned. Likewise, it is forgotten that the motivation for the resolution was solidarity with the strikes in Petrograd and so it also, naturally enough, included the dissatisfaction of both the workers and the peasants. For the Kronstadters, it was a case of the needs of **all** the toilers and so their resolution reflected the needs and demands of both. That two other worker revolts – waged by that proletarian weapon, the strike — also raised similar demands shows the baselessness of Wright's assertions.

Thus claims that the Kronstadt demands reflected peasant needs is mistaken. In fact, they reflected the needs of the whole working population, including the urban working class who raised these demands continually throughout the Civil War period during their strikes. Simply put, the policies of the Bolsheviks as regards food did not work and were, in fact, counter-productive — as many of the Russian proletariat recognised.

So to claim that Kronstadt solely reflected the plight or interests of the peasantry is nonsense, whether that claim was made in 1938, 1991 or now. Yet there is an irony in such assertions for, after all, the very demands which Trotskyists claims show the revolt's peasant nature — point 8 (withdrawn of roadblocks) and point 11 (free action for peasants who do not use wage-labour) — were quickly agreed to by the Bolshevik authorities. During the revolt Zinoviev announced various *"concessions to the workers' most pressing demands"* which included that *"plans were afoot to abandon the forcible seizure of grain from the peasants in favour of a tax in kind ... which would at least partially restore freedom of trade between town and country"* plus *"the withdrawal of all roadblocks from the whole of the Petrograd province."* [Avrich, **Op. Cit.**, p. 49] Surely, then, it was the Bolsheviks who represented the most "backward" elements of the peasantry? Moreover, given that the New Economic Policy (NEP) allowed wage labour does this not mean the Bolsheviks represented the interests of the kulak?

5 What lies did the Bolsheviks spread about Kronstadt?

From the start, the Bolsheviks lied about the uprising. Indeed, Kronstadt provides a classic example of how Lenin and Trotsky used slander against their political opponents. Both attempted to paint the revolt as being organised and lead by the Whites. As Paul Avrich notes, *"every effort was made to discredit the rebels"* and that the *"chief object of Bolshevik propaganda was to show that the revolt was not a spontaneous outbreak of mass protest but a new counterrevolutionary conspiracy, following the pattern established during the Civil War. According to the Soviet press, the sailors, influenced by Mensheviks and SR's in their ranks, had shamelessly cast their lot with the 'White Guards,' led by a former tsarist general named Kozlovsky ... This, in turn, was said to be part of a*

carefully laid plot hatched in Paris by Russian emigres in league with French counterintelligence." [**Op. Cit.**, p. 88 and p. 95]

Lenin, for example, argued in a report to the Tenth Congress of the Communist Party on March 8th that *"White Guard generals were very active over there. There is ample proof of this"* and that it was *"the work of Social Revolutionaries and White Guard emigres."* The first government statement on the Kronstadt events was entitled *"The Revolt of Ex-General Kozlovsky and the Warship Petropavlovsk"* and stated that the revolt was *"expected by, and undoubtedly prepared by, French counterintelligence"* and that on the morning of March 2 *"the group around ex-General Kozlovsky ... had openly appeared on the scene ... [he] and three of his officers ... have openly assumed the role of insurgents. Under their direction ... a number of ... responsible individuals, have been arrested... Behind the SRs again stands a tsarist general."* [Lenin and Trotsky, **Kronstadt**, p. 44 and pp. 65–6]

The reality was different and the Bolsheviks knew it. Victor Serge, a French illegalist-anarchist turned Bolshevik, later recounted how he was first told that *"Kronstadt is in the hands of the Whites"* and that *"[s]mall posters stuck on the walls in the still empty streets proclaimed that the counter-revolutionary General Kozlovsky had seized Kronstadt through conspiracy and treason."* However, the *"truth seeped through little by little, past the smokescreen put out by the Press, which was positively berserk with lies"* (indeed, it *"lied systematically"*). He found out that the Bolshevik's official line was *"an atrocious lie"* and that *"the sailors had mutinied, it was a naval revolt led by the Soviet."* However, the *"worse of it all was that we were paralysed by the official falsehoods. It had never happened before that our Party should lie to us like this. 'It's necessary for the benefit of the public,' said some ... the strike [in Petrograd] was now practically general"* This confirms the obvious: if the Bolshevik leaders had considered the revolt to be counter-revolutionary (passing a *"SR-Black Hundreds"* resolution as Zinoviev informed Lenin on the 28th of February) then why were Kalinin and Kuzmin sent to Kronstadt the next day to parley with the sailors? Is it really conceivable that leading Bolsheviks could safely undertake an official visit to the headquarters of a counter-revolution? Serge suggested that it *"was probably Kalinin who, on his return to Petrograd, invented 'the White General Kozlovsky'"* for he had attended the initial mass meeting at Kronstadt and *"whose brutal bungling provoked the rebellion"* by *"treat[ing] them as rogues and traitors merely out for themselves, and threatened them with merciless reprisals."* [**Memoirs of a Revolutionary**, pp. 124–6 and p. 127]

Thus the claim that the Kronstadt rebellion was the work of Whites and led by a Tsarist General was a lie — a lie deliberately and consciously spread. This was concocted to weaken support for the rebellion in Petrograd and in the Red Army, to help isolate it. Lenin admitted as much on the 15th of March when he stated at the Tenth Party Conference that in Kronstadt *"they do not want either the whiteguards or our government"*. This did not, of course, stop him proclaiming earlier at this conference that the revolt was *"bound up initially with the whiteguards"* [**Collected Works**, vol. 32, p. 228 and p. 185]

If you agree with Italian Marxist Antonio Gramsci that *"to tell the truth is a communist and revolutionary act"* then it is clear that the Bolsheviks in 1921 (and for a long time previously) were not communist or revolutionary (and as the subsequent Leninist accounts of Kronstadt show, Bolshevism is still neither). [quoted by Gwyn A. Williams, **Proletarian Order**, p. 193] In stark contrast to the Bolsheviks, the Kronstadt paper ***Izvestiia*** published Bolshevik leaflets, paper articles and radio broadcasts so that the inhabitants of the island could see exactly what lies the Bolsheviks were telling about them.

So by the 1950s even Isaac Deutscher, Trotsky's somewhat uncritical biographer, had to admit that the Bolsheviks *"denounced the men of Kronstadt as counter-revolutionary mutineers, led by a White general. The denunciation appears to have been groundless."* [**The Prophet Armed**, p. 511] Yet this did not stop the Trotskyist editors of **Kronstadt** showing the same contempt for their readers as the Bolsheviks showed for the truth. They include an *"Introduction"* to their work by Pierre Frank in which he argues that the Bolsheviks merely *"state that [White] generals, counterrevolutionaries, sought to manipulate the insurgents"* and that anarchists *"turn this into a claim that these generals had launched the rebellion and that [quoting Ida Mett] 'Lenin, Trotsky and the whole Party leadership knew quite well that this was no mere "generals' revolt,"'"* . This apparently shows how *"[a]nything having to do with the facts"* gets treated by such authors, who *"merely distort the Bolsheviks' positions."* Somewhat amazingly, Franks states this in the same work that quotes Lenin actually stating on March 8th, 1921, that *"the familiar figures of White Guard generals"* were *"very quickly revealed,"* that *"White generals were very active"* in Kronstadt, that it was *"quite clear that it is the work of Social Revolutionaries and White Guard emigres"* and that Kronstadt was *"bound up initially"* with *"the White Guards."* Lenin is also quoted, on March 9th, arguing that *"the Paris newspapers reported the events two weeks before they actually occurred, and a White general appeared on the scene. That is what actually happened."* Frank makes this claim in spite of the book it appears in including the government statement entitled *"The Revolt of Ex-General Kozlovsky and the Warship Petropavlovsk"* which states on *"the morning of March 2 the group around ex-General Kozlovsky (chief of artillery) and three of his officers ... have openly assumed the role of insurgents."*. [Lenin and Trotsky, **Op. Cit.**, p. 22, pp. 44–5, p. 48 and p. 66–7]

Nor can it be said that Ida Mett claims that the Lenin and Trotsky had said a general had "launched" the revolt. She quotes Moscow radio as stating that the revolt (*"Just like other White Guard insurrections"*) was in fact *"the mutiny of ex-General Kozlovsky and the crew of the battle ship 'Petropavlovsk'"* and it was *"clear that the Kronstadt revolt is being led from Paris. The French counter espionage is mixed up in the whole affair ... The Socialist Revolutionaries, who have their headquarters in Paris, are preparing the ground for an insurrection against the Soviet power. The ground prepared, their real master, the Tsarist general appeared"*. [quoted by Mett, **Op. Cit.**, p. 155] It seems strange that Frank complains that others *"distort"* the Bolsheviks position when, firstly, the person he quotes does not and, secondly, he distorts that persons' actual position. As can be seen, Mett provided evidence for her claim — the quote provided heads the section from which Frank cherry-picks — yet Frank fails to inform his readers of this before quoting her on how *"Lenin, Trotsky and the whole Party leadership knew quite well that this was no mere 'generals' revolt."* [**Op. Cit.**, p. 43]

After providing evidence that the Bolsheviks had blamed the revolt on a White conspiracy, she **then** turns to General Kozlovsky whom the Bolsheviks indicated by name as its leader and had outlawed in the proclamation of March 2nd. Who was he and what part did he play? Mett sums up the evidence:

> "He was an artillery general, and had been one of the first to defect to the Bolsheviks. He seemed devoid of any capacity as a leader. At the time of the insurrection he happened to be in command of the artillery at Kronstadt. The communist commander of the fortress had defected. Kozlovsky, according to the rules prevailing in the fortress, had to replace him. He, in fact, refused, claiming that as the fortress was now under the jurisdiction of the Provisional Revolutionary Committee, the old rules no longer

applied. Kozlovsky remained, it is true, in Kronstadt, but only as an artillery specialist. Moreover, after the fall of Kronstadt, in certain interviews granted to the Finnish press, Kozlovsky accused the sailors of having wasted precious time on issues other than the defence of the fortress. He explained this in terms of their reluctance to resort to bloodshed. Later, other officers of the garrison were also to accuse the sailors of military incompetence, and of complete lack of confidence in their technical advisers. Kozlovsky was the only general to have been present at Kronstadt. This was enough for the Government to make use of his name.

"The men of Kronstadt did, up to a point, make use of the military know how of certain officers in the fortress at the time. Some of these officers may have given the men advice out of sheer hostility to the Bolsheviks. But in their attack on Kronstadt, the Government forces were also making use of ex Tsarist officers. On the one side there were Kozlovsky, Salomianov, and Arkannihov; On the other, ex-Tsarist officers and specialists of the old regime, such as Toukhatchevsky. Kamenev, and Avrov. On neither side were these officers an independent force." [**Op. Cit.**, pp. 156–7]

These facts have been well-known since 1921 but they are not good enough for Trotskyists. Wright, for example, would have none of it and after quoting Alexander Berkman — that there was *"a former general, Kozlovsky, in Kronstadt. It was Trotsky who had placed him there as an Artillery specialist. He played no role whatever in the Kronstadt events."* [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 69] — he goes on to protest that this is not true. As evidence, Wright quotes from an interview by Kozlovsky and states that *"[f]rom the lips of the counterrevolutionary general himself ... we get the unambiguous declaration that* ***from the very first day****, he and his colleagues had openly associated themselves with the mutiny, had elaborated the 'best' plans to capture Petrograd ... If the plan failed it was only because Kozlovsky and his colleagues were unable to convince the 'political leaders', i.e. his SR allies [!], that the moment was propitious for exposing their true visage and program."* [*"The Truth about Kronstadt"*, Lenin and Trotsky, **Kronstadt**, p. 119] In other words, because the Provisional Revolutionary Committee **failed** to take the advice of the military specialists it proves that, in fact, they were in league. That is very impressive. We wonder if the Kronstadters **had** taken their advice then this would have proved that they were not, in fact, in league with them after all?

Every non-Leninist account agrees that Kozlovsky played no part in the revolt. Paul Avrich notes that when trouble erupted *"the Bolsheviks at once denounced him as the evil genius of the movement,"* immediately *"outlawed"* him and seized his family as hostages. He confirms that the military specialists *"threw themselves into the task of planning military operations on behalf of the insurrection"* and that Kozlovsky had refused to succeed as the commander of the fortress after the old one had fled to the mainland (as demanded by military rules). He stresses that *"the officers remained in a purely advisory capacity throughout the rebellion. They had no share, as far as one can tell, in initiating or directing the revolt, or in framing its political program, which was alien to their way of thinking."* Their role *"was confined to providing technical advice, just as it had been under the Bolsheviks."* The Provisional Revolutionary Committee *"showed its distrust of the specialists by repeatedly rejecting their counsel, however sound and appropriate it might be."* And, of course, *"[f]or all the government's accusations that Kronstadt was a conspiracy of White Guard generals, ex-tsarist officers played a much more prominent role in the attacking force than among the defenders."* [**Op. Cit.**, p. 99, p. 100, p. 101 and p. 203]

Kozlovsky before the revolt *"had served the Bolsheviks so loyally that on 20 October 1920 the chief commander of the Baltic Fleet ... had awarded him a watch 'for courage and feat of arms in the battle against Yudenich'"* [Getzler, **Kronstadt 1917–1921**, p. 219] This officially confirmed the award made on the 3rd of December, 1919, by the Petrograd Soviet *"for military feats and energetic activities during the attack of the Yudenich bands on Petrograd."* Indeed, he was one of the first generals who entered into service of the Bolsheviks and the Kronstadt soviet had elected him Chief-of-Staff of the fortress in the wake of the February revolution in 1917. All this did not stop the Bolsheviks claiming on March 3rd, 1921, that Kozlovsky was a *"supporter of Yudenich and Kolchak"*. [quoted by Israel Getzler, *"The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents"*, **Op. Cit.**, p. 43 and p. 31]

Berkman was clearly correct and Wright, wrong. Kozlovsky took no role in the revolt and the Trotskyists join the Stalinists in the *"historical falsification [which] had singled out [him] as the leader of the rebellion."* What he did do was offer his expertise to the Kronstadt rebels (just as he had to the Bolsheviks) and make plans which were rejected. If associating yourself with an event and making plans which are rejected by those involved equals a role in that event then Trotsky's role in the Spanish revolution equalled that of Durruti's. Likewise, no Trotskyist concludes that if Tsarist Generals providing advice makes something counter-revolutionary, then the Red Army must also have been. After all, the Bolshevik regime gave command of the assault on Kronstadt to Toukhatchevsky, a professional soldier and former Tsarist officer whose social background would have ensured he would harbour no sympathies — unlike many of the troops he commanded — for the socialist ideas being raised by the rebels and who would not think twice at placing machine-guns behind the Red Army forces to ensure their obedience. Indeed, after crushing Kronstadt he *"turned to his next task — the suppression of the peasant rising in the Tambov and the adjoining provinces"*. [George Katkov, **Op. Cit.**, p. 40 and p. 66]

It should be noted that Bolsheviks slandering their opponents was hardly new. For example, Serge, a few pages before his account of the Kronstadt rebellion in his memoirs, mentions *"the strenuous calumnies put out by the Communist Press"* about Nestor Makhno, *"which went so far as to accuse him of signing pacts with the Whites at the very moment when he was engaged in a life-and-death struggle against them"* which suggests that Kronstadt was hardly the first time the Party had lied to them. [**Op. Cit.**, pp. 124–6 and p. 122] Sadly, he fails to mention that he himself contributed to the Bolshevik lie machine about Kronstadt by, for example, publically repeating the Soviet regime's falsifications about the rebels in March 1922. [**The Serge-Trotsky Papers**, pp. 18–9] Nor was this an isolated case — he also repeated the usual Bolshevik slanders against the Makhnovists in 1920 before, in 1938, admitting such claims were *"not true"* [Victor Serge, **Anarchists Never Surrender**, p. 169 and p. 223] Likewise, a revolt in Saratov in May 1918 saw the party depict it *"as the outgrowth of the actions of its **collective** enemies: White Guards, tsarist officer organisations, Black Hundreds, Cossacks, Czechoslovaks, and ... Right SRs and Mensheviks. But the classified report of the Extraordinary Investigative Commission charged with studying the insurrection saw it as a spontaneous, disorganised movement caused by excessive use of force that turned the city's inhabitants against Soviet power, which lacked a popular mandate."* [Donald J. Raleigh, **Experiencing Russia's Civil War**, p. 54]

Finally, we must note that in the late 1920s the Stalinists tried to link the Trotskyist Opposition to a White General. Thus the *"charge that the Opposition had ties with White Guards was trumpeted"* and, while baseless, *"the objective of further discrediting the Opposition had been accomplished. 'The myth about the "Wrangel officer" is being broadcast through the land, poisoning*

the minds of a million party members and tens of millions of non party men', reported the Opposition leaders." [Tony Cliff, **Trotsky**, vol. 3, pp. 256–7]

These days, it is hard to find a Leninist who subscribes to this particular Bolshevik lie about Kronstadt. It has, in the main, been long abandoned by those who follow those who created it despite the fact it was the cornerstone of the official Bolshevik account of the rebellion. As the obvious falseness of the claims became more and more well-known, Trotsky and his followers turned to other ways to slander the uprising. The most famous is the assertion that the *"Kronstadt sailors were quite a different group from the revolutionary heroes of 1917."* [Wright, *"The Truth about Kronstadt"*, **Op. Cit.**, p. 129] We turn to this question in the section 8 and indicate that subsequent research has refuted it (and how Trotskyists have misused this research). The more sophisticated ones utilise a variation on Serge's arguments for why he, in the end, supported the Bolsheviks in 1921 and we discuss this in section 12. However, first we must discuss whether the Kronstadt revolt was, in fact, a White conspiracy (section 6) and its real relationship to the Whites (section 7).

6 Was the Kronstadt revolt a White plot?

As discussed in the last section, at the time the Bolsheviks portrayed the Kronstadt revolt as a conspiracy organised by a foreign spies and a former Tsarist General. Lenin, for example, proclaimed on March 8th that *"White Guard generals were very active"* at Kronstadt. *"There is ample proof of this. A fortnight before the Kronstadt events, the Paris newspapers reported a mutiny at Kronstadt. It is quite clear that it is the work of Social Revolutionaries and White Guard emigres."* [**Collected Works**, vol. 32, p. 184] Trotsky, on March 16th, made the same point, arguing that *"in a number of foreign newspapers ... news of an uprising in Kronstadt appeared as far back as the middle of February ... How [to] explain this? Very simply ... The Russian counterrevolutionary organisers promised to stage a mutiny at a propitious moment, while the impatient yellow and financial press write about it as an already accomplished fact."* [Lenin and Trotsky, **Kronstadt**, p. 68]

This appears to be the best, indeed only, "evidence" provided by Lenin and Trotsky as regards the White Guardist nature of the revolt. To see the truth of these claims it is simply a case of looking at how the Bolsheviks reacted to this announcement of an uprising in Kronstadt two weeks before it took place: they did nothing. As the Trotskyist editors of a book justifying the repression note, the *"Red Army command was caught unprepared by the rebellion."* J.G. Wright, in his *"The Truth about Kronstadt"*, similarly noted that the *"Red Army command"* was *"[c]aught off guard by the mutiny."* This in spite of Trotsky stating at the time that on *"basis of the dispatch"* he had *"sent a warning to Petrograd to my naval colleagues."* [Lenin and Trotsky, **Op. Cit.**, p. 6, p. 123 and p. 68] This clearly shows how little weight the newspaper reports were held **before** the rebellion. Of course, **during** and **after** the rebellion was a different matter and they quickly became a focal point for Bolshevik smears.

This is perhaps to be expected for, as proof of a White plot, this evidence is pathetic as can be seen by Lenin himself who noted a *"campaign of lies"* which produced *"a vast number of fabrications in this period"*. [**Collected Works**, vol. 32, p. 269] Likewise, Trotsky admitted that *"the imperialist press ... prints ... a great number of fictitious reports about Russia"* but also maintained that the reports on Kronstadt were examples of *"forecasts"* of *"attempts at overturns in specific centres of Soviet Russia"* (indeed, the *"journalistic agents of imperialism only 'forecast'*

that which is entrusted for execution to other agents of this very imperialism."). [Lenin and Trotsky, **Kronstadt**, pp. 50–1]

Yet this same press can be used as evidence for a White conspiracy in Kronstadt? *"In reality,"* as Emma Goldman noted, *"this advance news was like other news from Paris, Riga or Helsingfors, and which rarely, if ever, coincided with anything that had been claimed by the counter-revolutionary agents abroad ... No, the advance news in the Paris Press had no bearing whatever on the Kronstadt rebellion. In point of fact, no one in Petrograd in 1921 believed its connection, not even quite a number of Communists."* [*"Trotsky Protests Too Much"*, **Op. Cit.**, p. 262] Ida Mett states the obvious:

> *"The publication of false news about Russia was nothing exceptional. Such news was published before, during, and after the Kronstadt events. It is undeniable that the bourgeoisie throughout the world was hostile to the Russian Revolution and would exaggerate any bad news emanating from that country. The Second Communist Conference of the Baltic Fleet had just voted a resounding resolution, critical of the political leadership of the Fleet. This fact could easily have been exaggerated by the bourgeois press, once again confusing the wishes with reality. To base an accusation on a 'proof' of this kind is inadmissible and immoral."*
>
> *In 1938 Trotsky himself was to drop this accusation. But ... he refers his readers to a study of the Kronstadt rebellion undertaken by an American trotskyist John G Wright ... [who] takes up once again the claim that the revolt must have been planned beforehand ... He says: 'the connection between Kronstadt and the counterrevolution can be established not only out of the mouths of the enemies of Bolshevism but also on the basis of irrefutable facts'. What irrefutable facts? Again, quotations from the bourgeois press ... giving false news before and during the insurrection."* [**Op. Cit.**, p. 196]

The question of **why** the counterrevolutionary plotters would give their enemies advance notice of their plans and so time to take preventive action never cross Leninist minds. How seriously these reports were taken can be seen by how the revolt took all the various Bolshevik hierarchies by surprise. Similarly, at the time **no** evidence was forthcoming that the Whites organised or took part in the revolt. Bukharin in July 1921, for example stated that, as regards Kronstadt, the *"documents which have since been brought to light show clearly that the affair was instigated by purely White Guard centres."* [**In Defence of the Russian Revolution**, Al Richardson (ed.), p. 192] It is redundant to note that said "documents" were not published by the Soviet Government then or since:

> *"If, at the time the Bolshevik Government had proofs of these alleged contacts between Kronstadt and the counter-revolutionaries why did it not try the rebels publicly? Why did it not show the working masses of Russia the 'real' reasons for the uprising? If this wasn't done it was because no such proofs existed."* [Mett, **Op. Cit.**, p. 197]

The first soviet investigation into the revolt came to the conclusion that it was spontaneous. A special plenipotentiary of the Secret-Operation Department of the **Vecheka** was sent by the presidium of that body to Kronstadt soon after the crushing of the uprising. His mandate was *"to ascertain the role of various parties and groups in the start and development of the uprising and the ties of its organisers and inspirers with counter-revolutionary parties and organisations*

operating both in and outside Soviet Russia." He produced a report on the 5th of April, 1921, which expressed his considered opinion that the *"uprising was entirely spontaneous in origin and drew into its maelstrom almost the entire population and the garrison of the fortress ... the investigation failed to show the outbreak of the mutiny was preceded by the activity of any counter-revolutionary organisation at work among the fortress's command or that it was the work of the* ***entente.*** *The entire course of the movement speaks against that possibility. Had the mutiny been the work of some secret organisation which predated its outbreak, then that organisation would not have planned it for a time when the reserves of fuel and provisions were hardly sufficient for two weeks and when the thawing of the ice was still far off."* He noted that the *"masses"* in Kronstadt *"were fully aware of the spontaneity of their movement."* This conclusion was shared by chairman of the Extraordinary **Troika** of the First and Second Special Section who was given the double assignment of *"the punishment of the mutineers and the unmasking of all the organisations that prepared and led the mutiny."* He reported on April 20th, 1921, that *"in spite of all efforts we have been unable to discover the presence of any organisation and to seize any agents."* [quoted by Israel Getzler, *"The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents"*, **Op. Cit.**, pp. 25–6]

These conclusions were drawn in spite of the interrogation of prisoners who would have been willing to tell the authorities what they wanted to hear in order to escape execution or imprisonment (unless of course placing the word "proletarian" before interrogation or torture — like state — produces different results?). Still, the Bolsheviks were apparently quite willing to consider inventing evidence of a conspiracy. Trotsky, for example, raised, on the 24th of March 1921, the possibility of a *"Political Trial of Kronstadters and Makhnovites."* This show trial would be part of the *"struggle"* against *"anarchism (Kronstadt and Makhno)."* This was *"presently an important task"* and so it *"seems ... appropriate to organise trials of Kronstadters ... and of Makhnovites."* The *"effect of the reports and the speeches of the prosecutor etcetera would be far more powerful than the effects of brochures and leaflets about ... anarchism."* [quoted by Getzler, **Op. Cit.**, p. 39] While Trotsky's show trial was never staged, the fact that the idea was taken seriously can be seen from the invented summaries of the testimonies of three men considered by the Bolsheviks as ringleaders of the revolt. Perhaps the fact that the three (Kozlovsky, Petrichenko, Putilin) managed to escape to Finland ensured that Trotsky's idea was never carried out. Stalin, of course, utilised the *"powerful"* nature of such trials in the 1930s.

While the Bolsheviks never published any of the documents they at times claimed to have proving the White conspiracy at Kronstadt, decades later historian Paul Avrich **did** discover an unsigned hand written manuscript labelled *"Top Secret"* and entitled *"Memorandum on the Question of Organising an Uprising in Kronstadt."* Trotskyist Pierre Frank considered it *"so convincing"* that he *"reproduced it in its entirety"* to prove a White conspiracy existed behind the Kronstadt revolt. Indeed, he considers it as an *"indisputable"* revelation and that Lenin and Trotsky *"were not mistaken in their analysis of Kronstadt."* [Lenin and Trotsky, **Op. Cit.**, p. 26 and p. 32]

However, reading the document quickly shows that Kronstadt was not a product of a White conspiracy but rather that the White National Centre aimed to try and use a spontaneous *"uprising"* it thought was likely to *"erupt there in the coming spring"* for its own ends. The report notes that *"among the sailors, numerous and unmistakable signs of mass dissatisfaction with the existing order can be noticed."* Indeed, the Memorandum states that *"one must not forget that even if the French Command and the Russian anti-Bolshevik organisations do not take part in the preparation and direction of the uprising, a revolt in Kronstadt will take place all the same during the coming*

spring, but after a brief period of success it will be doomed to failure." [quoted by Avrich, **Kronstadt 1921**, p. 235 and p. 240] Avrich himself rejected the idea that this Memorandum explains the revolt:

> "Nothing has come to light to show that the Secret Memorandum was ever put into practice or that any links had existed between the emigres and the sailors before the revolt. On the contrary, the rising bore the earmarks of spontaneity ... there was little in the behaviour of the rebels to suggest any careful advance preparation. Had there been a prearranged plan, surely the sailors would have waited a few weeks longer for the ice to melt ... The rebels, moreover, allowed Kalinin [a leading Communist] to return to Petrograd, though he would have made a valuable hostage. Further, no attempt was made to take the offensive . .. Significant too, is the large number of Communists who took part in the movement ...
>
> "The Sailors needed no outside encouragement to raise the banner of insurrection ... Kronstadt was clearly ripe for a rebellion. What set it off were not the machinations of emigre conspirators and foreign intelligence agents but the wave of peasant risings throughout the country and the labour disturbances in neighbouring Petrograd. And as the revolt unfolded, it followed the pattern of earlier outbursts against the central government from 1905 through the Civil War." [**Op. Cit.**, pp. 111–2]

He concludes that while the National Centre had *"anticipated"* the revolt and *"laid plans to help organise it,"* they had *"no time to put these plans into effect."* The *"eruption occurred too soon, several weeks before the basic conditions of the plot ... could be fulfilled."* It *"is not true,"* he stresses, *"that the emigres had engineering the rebellion."* The revolt was *"a spontaneous and self-contained movement from beginning to end."* Most obviously, as Avrich notes, an *"underlying assumption of the Memorandum is that the revolt would not occur until after the springtime thaw, when the ice had melted and Kronstadt was immune from an invasion from the mainland."* [**Op. Cit.**, pp. 126–7 and pp. 106–7]

Voline, then, just stated the obvious when he argued that the revolt *"broke out spontaneously"* for if it *"had been the result of a plan conceived and prepared in advance, it would certainly not have occurred at the beginning of March, the least favourable time. A few weeks later, and Kronstadt, freed of ice, would have become an almost impregnable fortress ... The greatest opportunity of Bolshevik government was precisely the spontaneity of the movement and the absence of any premeditation, of any calculation, in the action of the sailors."* [**Op. Cit.**, p. 487] Given that the Memorandum also recognised this need for the ice to thaw and it was the basic assumption behind it, the revolt **was** spontaneous and actually undercut the assumptions behind the Memorandum. Likewise, a prominent right-SR leader and head of the SR Administrative Centre in Finland wrote a letter on the 18th of March that while *"[o]ne usually looks for those responsible [for the failure]; it is difficult to find them in this case, as it is generally difficult to analyse the causes and results of events that are so absolutely spontaneous. The movement began spontaneously, without any organisation and quite unexpectedly. After all, a month later, Kronstadt would have been inaccessible to the Bolsheviks and a hundred times more dangerous to them."* [quoted by Getzler, **Op. Cit.**, pp. 25–6]

Moreover, whether the Memorandum played a part in the revolt can be seen from the reactions of the White National Centre to the uprising. Firstly, they failed to deliver aid to the rebels nor get French aid to them. Secondly, Professor Grimm, the chief agent of the National Centre in

Helsingfors and General Wrangel's official representative in Finland, stated to a colleague after the revolt had been crushed that if a new outbreak should occur then their group must not be caught unawares again. Avrich also notes that the revolt *"caught the emigres off balance"* and that *"[n]othing ... had been done to implement the Secret Memorandum, and the warnings of the author were fully borne out."* [**Op. Cit.**, p. 212 and p. 123] If Kronstadt was a White conspiracy then how could the organisation of the conspiracy have been caught unawares?

Clearly, the attempts of certain later-day Trotskyists to justify and prove their heroes slanders against Kronstadt are pathetic. No evidence of a White-Guardist plot existed until 1970 when Paul Avrich produced his study of the revolt and the single document in question clearly does not support the claim that the Whites organised the revolt. Rather, the Whites aimed to use a sailors uprising to further their cause, an uprising which they predicted would occur in the spring with or without them. The predicted revolt **did** take place, but earlier than expected and was not a product of a conspiracy. Indeed, the historian who discovered this document explicitly argues that it proves nothing and that the revolt was spontaneous in nature. All it shows is that Whites were better informed of the alienation of the Kronstadt sailors than the Bolshevik state and its military hierarchies.

The claim that Kronstadt was a White plot cannot be defended with anything but assertions. No evidence exists to back up such claims.

7 What was the real relationship of Kronstadt to the Whites?

As we indicated in the last section, the Kronstadt revolt was not a White conspiracy. It was a spontaneous popular revolt from below. However, some Trotskyists still try and smear the revolt by arguing that it was, in fact, really or "objectively" pro-White. We turn to this question now.

We must first stress that the Kronstadters' rejected every offer of help from the National Centre and other obviously pro-White group. Historian Israel Getzler stressed that *"the Kronstadters were extremely resentful of all gestures of sympathy and promises of help coming from the White-Guardist emigres."* He quotes a Red Cross visitor who stated that Kronstadt *"will admit no White political party, no politician, with the exception of the Red Cross."* [Getzler, **Kronstadt 1917–1921**, p. 235] Avrich notes that the Kronstadter's *"passionately hated"* the Whites and that *"both during and afterwards in exile"* they *"indignantly rejected all government accusations of collaboration with counterrevolutionary groups either at home or abroad."* As the Communists themselves acknowledged, no outside aid ever reached the insurgents. [Avrich, **Op. Cit.**, p. 187, p. 112 and p. 123] In short, there was no relationship between the revolt and the Whites.

It must be noted that the rebels did accept help towards the end of the rebellion from the Russian Red Cross when the food situation had become critical but the fortress fell before any supplies sent. Yet, the Bolsheviks themselves turned to the American Relief Administration and the International Red Cross to fight the famine in the Volga provinces and southern Urals later in 1921 and without whose aid *"millions more would have died."* [S.A. Smith, **Russia in Revolution**, pp. 232–3] This crisis, a direct result of the disastrous Bolsheviks policies as regards the peasantry and food supplies the Kronstadters opposed, also saw the Bolshevik rebuff others of help by left dissidents in favour of the right *"who had bitterly fought the October Revolution. They had repeatedly been arrested as counter-revolutionists, but now they were accepted with open arms as the 'Citizens' Committee.' Every facility was given them in their work: a building, telephones, typists, and the right to publish a paper"* This, though, was short-lived and they were soon *"again*

denounced as counter-revolutionary, and its leaders exiled to distant parts of the country." [Emma Goldman, **Living My Life**, vol. 2, pp. 900–1]

While there were no direct links between the rebels and the Whites, there is no denying that the latter **were** extremely happy that Kronstadt had revolted. However, it would be weak politics indeed that based itself on the reactions of reactionaries to evaluate social struggles. If we did then we would have to conclude that the Stalinists were right to crush the 1956 Hungarian revolt and the 1968 Prague Spring. Likewise, we would have to conclude that the overthrow of Stalinism in 1989 was nothing more than a counter-revolution rather than a popular revolt against a specific form of capitalism (namely state capitalism) and, indeed, many orthodox Trotskyists took this position. It smacks of the crude Stalinist amalgam which argued that because fascists and Trotskyists criticised Stalin, this showed that they were somehow linked.

Unsurprisingly, the Kronstadters themselves acknowledged that the Whites were happy to support their actions (indeed, **any** actions against the Bolsheviks) and the danger this represented. However, they noted that this joy was for different reasons than theirs:

> "The ... Kronstadt sailors and workers have wrested the tiller from the Communists' hands and have taken over the helm ... Comrades, keep a close eye upon the vicinity of the tiller: enemies are even now trying to creep closer. A single lapse and they will wrest the tiller from you, and the soviet ship may go down to the triumphant laughter from tsarist lackeys and henchmen of the bourgeoisie.
>
> "Comrades, right now you are rejoicing in the great, peaceful victory over the Communists' dictatorship. Now, your enemies are celebrating too.
>
> "Your grounds for such joy, and theirs, are quite contradictory.
>
> "You are driven by a burning desire to restore the authentic power of the soviets, by a noble hope of seeing the worker engage in free labour and the peasant enjoy the right to dispose, on his land, of the produce of his labours. **They** dream of bringing back the tsarist knout and the privileges of the generals.
>
> "Your interests are different. They are not fellow travellers with you.
>
> "You needed to get rid of the Communists' power over you in order to set about creative work and peaceable construction. Whereas they want to overthrow that power to make the workers and peasants their slaves again.
>
> "You are in search of freedom. They want to shackle you as it suits them. Be vigilant! Don't let the wolves in sheep's clothing get near the tiller." [**No Gods, No Masters**, vol. 2, pp. 187–8]

Of course, this is not enough for the followers of Lenin and Trotsky. John Rees, for example, quotes Paul Avrich to support his assertion that the Kronstadt revolt was, in fact, pro-White. He argues as follows:

> *"Paul Avrich ... says there is 'undeniable evidence' that the leadership of the rebellion came to an agreement with the Whites after they had been crushed and that 'one cannot rule out the possibility that this was the continuation of a longstanding relationship.'"* [**Op. Cit.**, p. 64]

What Rees **fails** to mention is that Avrich **immediately** adds *"[y]et a careful search has yielded no evidence to support such a belief"* before stating that *"[n]othing has come to light to show that ... any links had existed between the emigres and the sailors before the revolt."* How strange that Rees fails to quote or even mention Avrich's conclusion to his own speculation! As for the post-revolt links between the leadership of the rebellion and the Whites, Avrich correctly argues that *"[n]one of this proves that there were any ties between the [National] Centre and the Revolutionary Committee either before or during the revolt. It would seem, rather, that the mutual experience of bitterness and defeat, and a common determination to overthrow the Soviet regime, led them to join hands in the aftermath."* [Avrich, **Op. Cit.**, p. 111 and p. 129] Seeing you friends and fellow toilers murdered by dictators may affect your judgement, unsurprisingly enough.

Let us, however, assume that certain elements in the leadership of the revolt were, in fact, scoundrels. What does this mean when evaluating it?

Firstly, we must point out that this leadership was elected by and under the control of the Conference of Delegates which was, in turn, elected by and under the control of the rank-and-file sailors, soldiers and civilians. This body met regularly during the revolt *"to receive and debate the reports of the Revolutionary Committee and to propose measures and decrees."* [Getzler, **Kronstadt 1917–1921**, p. 217] The actions of the leadership were not independent of the mass of the population and so, regardless of their own agendas, had to work under control from below. In other words, the revolt cannot be reduced to a discussion of whether a few of the leadership were scoundrels or not. Indeed, to do so just reflects the elitism of bourgeois history yet Rees does just that and reduces the Kronstadt revolt and its "ideology" down to just one person (Petrichenko). Perhaps we can evaluate Bolshevism with this method? Or Italian Socialism. After all, influential figures in both these movements ended up making contacts and deals with extremely suspect organisations and acting in ways we (and the movements they sprang from) would oppose. Does that mean we gain an insight into their natures by concentrating on Stalin's or Mussolini's later activities? Or evaluating their revolutionary nature from such individuals? Of course not. Indeed, Rees's article is an attempt to argue that objective circumstances rather than Bolshevism as such lead to Stalinism. Rather than do the same for Kronstadt, he prefers to concentrate on an individual. This indicates a distinctly bourgeois perspective:

> *"What passes as socialist history is often only a mirror image of bourgeois historiography, a percolation into the ranks of the working class movement of typically bourgeois methods of thinking. In the world of this type of 'historian' leaders of genius replace the kings and queens of the bourgeois world ... . The masses never appear independently on the historic stage, making their own history. At best they only 'supply the steam', enabling others to drive the locomotive, as Stalin so delicately put it ... This tendency to identify working class history with the history of its organisations, institutions and leaders is not only inadequate — it reflects a typically bourgeois vision of mankind, divided in almost pre-ordained manner between* ***the few*** *who will manage and decide, and* ***the many****, the malleable mass, incapable of acting consciously on its own behalf ... Most histories of the degeneration of the Russian Revolution rarely amount to more than this."* [Maurice Brinton *"Preface to Ida Mett's 'The Kronstadt Commune'"*, **Op. Cit.**, pp. 18–9]

Secondly, the question is one of whether workers are in struggle and what they aim for and definitely **not** one of whether some of the "leaders" are fine upstanding citizens. Ironically, Trot-

sky indicates why. In 1934, he had argued *"[a]nyone who had proposed that we not support the British miners' strike of 1926 or the recent large-scale strikes in the United States with all available means on the ground that the leaders of the strikes were for the most part scoundrels, would have been a traitor to the British and American workers."* [*"No Compromise on the Russian Question"*, **Writings of Leon Trotsky: Supplement (1934–40)**, p. 539] The same applies to Kronstadt. Even if we assume that some of the leadership or those active in revolt did have links with the National Centre (an assumption we must stress has no evidence to support it), this in no way invalidates the Kronstadt revolt. The movement was not produced by the so-called "leaders" of the revolt but rather came from below and so reflected the demands and politics of those involved. To use an obvious example, if it were proved, as KGB and other soviet sources argued, that some of the leaders of the Hungary uprising of 1956 had CIA links or were CIA agitators, would that make the revolution and its workers' councils somehow invalid? Of course not. If some of the leadership were scoundrels, as Trotsky argued, this does not invalid the revolt itself. Maurice Brinton stated the obvious:

> *"During the Hungarian Revolution of 1956 many were the messages of verbal or moral support for the rebels, emanating from the West, piously preaching the virtues of bourgeois democracy or of free enterprise. The objective of those who spoke in these terms were anything but the institution of a classless society. But their support for the rebels remained purely verbal, particularly when it became clear to them what the real objectives of the revolution were ... The backbone of the Hungarian revolution was the network of workers' councils. Their main demands were for workers' management of production and for a government based on the councils. These facts justified the support of revolutionaries throughout the world ... The class criterion is the decisive one.*
>
> *"Similar considerations apply to the Kronstadt rebellion. Its core was the revolutionary sailors. Its main objectives were ones with which no real revolutionary could disagree. That others sought to take advantage of the situation is inevitable — and irrelevant."* [*"Preface to Ida Mett's 'The Kronstadt Commune'"*, **Op. Cit.**, p. 137]

This is recognised in their own way by the Trotskyists themselves. Trotsky used the strike example against those claiming, correctly, that to unconditionally defend the Soviet Union was to give an endorsement to Stalinism. Hence we see him, immediately after the words quoted above, add: *"Exactly the same thing applies to the USSR!"* [**Op. Cit.**, p. 539] Wright echoes this with regards to Kronstadt:

> *"underlying the mutiny was the expression of the petty bourgeois reaction against the difficulties and privations imposed by the conditions of the proletarian revolution. Nobody can deny this class character of the two camps. All other questions are only of secondary importance. That the Bolsheviks may have committed errors of a general or concrete character, cannot alter the fact that they defended the acquisitions of the proletarian revolution against the bourgeois (and petty bourgeois) reaction. That is why every critic must himself be examined from the standpoint as to which side of the firing line he finds himself. If he closes his eyes to the social and historical content of the Kronstadt mutiny then he is himself an element of petty bourgeois reaction against the proletarian revolution ... A trade union, say, of agricultural labourers may commit errors in a strike against farmers. We can criticise them but our criticism should be based*

upon a fundamental solidarity with the worker's trade union and upon our opposition to the exploiters of the workers even if these exploiters happen to be small farmers." [*"The Truth about Kronstadt"*, **Op. Cit.**, p. 112]

This was written in 1938 in apparent ignorance that Emma Goldman had debunked similar assertions over ten years previously:

> *"There is another objection to my criticism on the part of the Communists. Russia is on strike, they say, and it is unethical for a revolutionist to side against the workers when they are striking against their masters. That is pure demagoguery practised by the Bolsheviki to silence criticism.*
>
> *"It is not true that the Russian people are on strike. On the contrary, the truth of the matter is that the Russian people have been* ***locked out*** *and that the Bolshevik State — even as the bourgeois industrial master — uses the sword and the gun to keep the people out. In the case of the Bolsheviki this tyranny is masked by a world-stirring slogan: thus they have succeeded in blinding the masses. Just because I am a revolutionist I refuse to side with the master class, which in Russia is called the Communist Party."* [**My Disillusionment in Russia**, p. xlix]

So there was a few obvious differences which invalidates the Trotskyist analogy as regards both Stalinism and Kronstadt. First, in both cases there are more than two classes involved — along with the peasants and workers, there is the bureaucracy. In Russia in 1921 as in 1934, the state and party bureaucracy was oppressing and exploiting the workers. Trade union bureaucrats, for all their faults, are not at a head of a dictatorship defended by troops and secret police. Second, in 1921 as before, the heads of the bureaucratic class had declared martial law and utilised troops, lock-outs and arrests against the striking workers — a practice continued under Stalin. Trade union bureaucrats are, at best, hesitant to make a strike official and may well sell it out but they rarely call in the armed might of the state against their own members. Third, the regime in Russia in both 1921 and 1934 was a party dictatorship. Strikes are usually run to some degree by the strikers. Fourth, strikes are examples of proletarian direct action which can, and do, get out of control of union structures and bureaucrats. They can be the focal point for creating new forms of working class organisation and power which can end the power of the union bureaucrats and replace it with self-managed strikers assemblies and councils. Both the Bolshevik and Stalinist regimes were organised to repress any attempts at unseating them — indeed, the Kronstadt revolt was precisely such a rank-and-file movement. In short, Russian state was **not** a form of working class self-defence in even the limited form that trade unions are — rather, it was as Emma Goldman noted the organ of a new master class. That neither Trotsky nor Wright could see this obvious fact explains why they sided with the bureaucratic reaction against the proletarian revolution — although as the former was then part of the ruling bureaucracy, this is understandable.

While being more aware of the bureaucratic nature of the Bolshevik regime, John Rees continued this line of attack on Kronstadt:

> *"As it became clear that the revolt was isolated Petrichenko was forced to come to terms with the reality of the balance of class forces. On 13 March Petrichenko wired David*

> *Grimm, the chief of the National Centre and General Wrangel's official representative in Finland, for help in gaining food. On 16 March Petrichenko accepted an offer of help from Baron P V Vilkin, an associate of Grimm's whom 'the Bolsheviks rightly called a White agent.' None of the aid reached the garrison before it was crushed, but the tide of events was pushing the sailors into the arms of the Whites, just as the latter had always suspected it would."* [**Op. Cit.**, p. 64]

We should note that it was due to the *"food situation in Kronstadt .. . growing desperate"* that Petrichenko contacted Grimm. [Avrich, **Op. Cit.**, p. 121] If the revolt had spread to Petrograd and the striking workers there, such requests would have been unnecessary. However, as historian V. Brovkin notes, the *"key here is that the Communists suppressed the workers uprising in Petrograd in the first days of March. The sailors' uprising in Kronstadt, which was an outgrowth of the uprising in Petrograd, was now cut off from its larger social base and localised on a small island. From this moment on the Kronstadt sailors were on the defensive."* [**Behind the Lines during the Civil War**, pp. 396–7] So, in a sense, Rees is correct to point to *"the reality of the balance of class forces"* but he fails to appreciate that the bureaucratic class has to be factored in. Isolation was a product of the actions and so power of the state bureaucracy and was due to the reality of the balance of coercive forces — the Bolshevik state machine had successfully repressed the Petrograd strikes (see section 10).

So, in his analysis of the *"balance of class forces"*, Rees — like Trotsky and Wright — fails to account for the class which had real power (and the related privileges) in Russia at the time — the state and party bureaucracy. The working class and peasantry were officially powerless and the only influence they exercised in the "workers' and peasants state" was when they rebelled, forcing "their" state to make concessions or to repress them (usually, a combination of both happened). The balance of class forces was between the workers, peasants and ruling bureaucracy. To ignore this class, the ruling class in Russia, means to misunderstand the problems facing the revolution and the Kronstadt revolt itself.

Given that the Bolshevik dictatorship had lied to and suppressed the Petrograd working class, the Kronstadters had few options left as regards aid. Rees's argument smacks of the "logic" of Right as regards the Spanish Civil War, the Cuban revolution and the Sandinistas. Isolated, each of these revolts turned to the Soviet Union for aid thus proving what the Right had always known from the start, namely their objectively Communist nature and their part in the International Communist Conspiracy. Few revolutionaries would evaluate these struggles on such an illogical and narrow basis but Rees wants us to do so with Kronstadt.

Worse, the logic of Rees arguments was used by the Stalinists — yet it is doubtful he would agree with them that the fact the Hungarian revolution of 1956 called on Western aid against the Red Army shows that it was objectively counter-revolutionary and pro-capitalist, just as the Communist Party bureaucrats had argued. The fact that during that revolt many messages of support for the rebels also preached bourgeois values would also, according to Rees's logic, damn that revolt in the eyes of all socialists. Similarly, the fact that the Polish union **Solidarity** got support from the West against the Stalinist regime does not mean that its struggle was counter-revolutionary. So the arguments used by Rees are identical to those used by Stalinists to support their repression of working class revolt in the Soviet Empire. Indeed, orthodox Trotskyists drew these conclusions and called **Solidarnosc** a company union of the CIA, bankers, the Vatican and Wall Street for capitalist counterrevolution in Poland and considered the fall of the Soviet Union

as a defeat for the working class and socialism, in other words, a counterrevolution. As evidence they pointed to the joy and support each generated in Western elite circles — and denounced neo-Trotskyists like Rees' party when they, rightly, argued that these were popular revolts against state-capitalist exploitation.

In reality, of course, the fact that others sought to take advantage of these (and other) situations is inevitable and irrelevant. The important thing is whether working class people were in control of the revolt and what the main objectives of it were. By this class criteria, it is clear that the Kronstadt revolt was a **revolutionary** revolt as, like Hungry 1956, the core of the revolt was working people and their councils. It was they who were in control and called the tune. That Whites tried (unsuccessfully) to take advantage of it is as irrelevant to evaluating the Kronstadt revolt as the fact that Stalinists tried (successfully) to take advantage of the Spanish struggle against Fascism.

Lastly, we must comment upon the fact that members of Kronstadt's Revolutionary Committee took refuge in Finland along with *"[s]ome 8,000 people (some sailors and the most active part of the civilian population)."* [Mett, **Op. Cit.**, p. 172] This was as the Bolsheviks had predicted on March 5th: *"At the last minute, all those generals, the Kozlovskys, the Bourksers, and all that riff raff, the Petrichenkos, and the Tourins will flee to Finland, to the White guards".* [quoted by Mett, **Op. Cit.**, p. 162] However, this does not indicate any "White guardist" connections for where else **could** they go? The fact that active participants in the revolt ended up in the only place they could end up to avoid death has no bearing to that nature of that revolt nor can it be used as "evidence" of a "white conspiracy."

In short, the attempts of Trotskyists to smear the Kronstadt sailors with having White links have no basis. That the Whites celebrated the revolt is as irrelevant as any warm words expressed towards the Hungarian revolution of 1956 by politicians in the West. Likewise, the actions of some rebels **after** the Bolsheviks had crushed the revolt cannot be used to discredit the revolt itself. The real relationship of the revolt to the Whites is clear. It was one of hatred and opposition.

8 Did the rebellion involve new sailors?

The most common Trotskyist assertion to justify the repression of the Kronstadt revolt was first raised by Trotsky. It consists of arguing that the sailors in 1921 were different than those in 1917. Trotsky started this line of justification towards the end of the revolt itself when he stated on March 16th that the Baltic Fleet had been *"inevitably thinned out with respect to personnel"* and so a *"great many of the revolutionary sailors"* of 1917 had been *"transferred"* elsewhere. They had been *"replaced in large measure by accidental elements"* and this had *"facilitated"* the work of the *"counterrevolutionary organisers"* who had *"selected"* Kronstadt. In 1937 and 1938, he repeated this claim. [Lenin and Trotsky, **Kronstadt**, pp. 68–9, p. 79, p. 81 and p. 87]

His followers have repeated his assertions since. Wright suggested that *"the personnel of the fortress could not possibly have remained static throughout the years between 1917 and 1921"* and doubted that the revolutionary sailors of 1917 could have remained behind in the fortress while their comrades fought the Whites. [*"The Truth about Kronstadt"*, **Op. Cit.**, pp. 122–3] John Rees, continuing this line of rationale, argued that *"the composition of the garrison had changed ... it seems likely that the peasants had increased their weight in the Kronstadt, as Trotsky suggested."* [Rees, **Op. Cit.**, p. 61] In short, the revolutionary sailors of 1917 had been replaced by peasant conscripts in 1921. What are we to make of these claims?

First, we must note that this defence is completely irrelevant. If, as the Bolsheviks claimed, the revolt was a White plot or have led to a White counter-revolution then whether the sailors of 1921 had been there in 1917 is beside the point. Even if it were proven categorically that the bulk of the sailors had been revolutionary veterans the Bolsheviks would still have crushed the rebellion and their supporters would still justify this act. At best, this defence amounts to the unstated assumption that the revolutionary sailors of 1917 would have been either completely indifferent to, or supportive of, the Bolshevik repression of the Petrograd strikes in 1921. This, to say the least, seems unlikely but it suggests that for Leninists the highest expression of class consciousness is identical to the lowest once they are in power.

Second, we have to determine what are the facts as regards the social composition and turnover of personnel in Kronstadt. Thanks to research by academics, this can be done and the evidence is clear — the bulk of the sailors in 1921 were veterans from 1917. Given this conclusion, it may come as no surprise to discover that these sources have been misused by Trotskyists and we will, after presenting the evidence, discuss this in order to indicate how far they will abuse the truth.

Academic Evan Mawdsley concludes that *"it seems reasonable to challenge the previous interpretation"* that there had been a *"marked change in the composition of the men in the fleet ... particularly ... at the Kronstadt Naval Base."* From the *"statistical data, it would appear that the situation in the DOT [Active Detachment] was"* that *"the majority of men have been veterans of 1917 ... and available information indicates that as many as three-quarters of the DOT ratings – the Kronstadt mutineers — had served in the fleet at least since the World War."* The data suggests *"for the DOT as a whole on 1 January 1921, 23.5% could have been drafted before 1911, 52% from 1911 to 1918 and 24.5% after 1918."* In terms of the two battleships whose sailors played the leading role in 1921 revolt, the Petropavlovsk and the Sevastopol, he shows that *"at the time of the uprising"* of the 2,028 sailors, 20.2% were recruited into the navy before 1914, 59% joined in the years 1914–16, 14% in 1917 and 6.8% in the years 1918–21. So 93.2% of the sailors who launched the revolt in 1921 had been there in 1917. In short, the *"majority of men seem to have been veterans of 1917"*. [*"The Baltic Fleet and the Kronstadt Mutiny"*, pp. 506–521, **Soviet Studies**, vol. 24, no. 4, pp. 508–9] Thus:

> *"Although the number of ratings in the Baltic Fleet as a whole rose by 1 December 1920 to 24,914 — still 1,079 below the establishment — the basic composition of the DOT did not change greatly. The important point is that the 10,000 new recruits were trainees, not replacements ... and these men were in training depots in Petrograd, not at Kronstadt; furthermore, as at 1 December only 1,313 of a planned total of 10,384 had arrived. It also seems unlikely that the new volunteers could have been appeared in large numbers by the end of February 1921; those that did were probably in Petrograd and not aboard the ships of the DOT ... [and so] remobilisation, difficulties in finding suitable replacements ... [meant] that as many as three-quarters of the DOT ratings — the Kronstadt mutineers — had served in the fleet at least since the World War."*
>
> *"By the time of the rising the demobilisation of the older classes had hardly begun ... The composition of the DOT had not fundamentally changed, and anarchistic young peasants did not predominate there. The available data suggest that the main difficulty was not ... that the experienced sailors were being demobilised. Rather, they were not being demobilized rapidly enough."* [**Op. Cit.**, pp. 509–10]

Another academic, Israel Getzler in his excellent account of Kronstadt during the revolution, also investigated this issue and presented identical conclusions. He demonstrated that of those serving in the Baltic fleet on 1st January 1921 at least 75.5% were drafted before 1918. Over 80% were from Great Russian areas, 10% from the Ukraine and 9% from Finland, Estonia, Latvia and Poland. He argues that the *"veteran politicised Red sailor still predominated in Kronstadt at the end of 1920"* and presents more *"hard statistical data"* like that just quoted by also investigating the crews of the two main battleships, the ***Petropavlovsk*** and the ***Sevastopol***, showing like Mawdsley that of the 2,028 sailors where years of enlistment are known, only 6.8% were recruited in the years 1918–21 (including three who were conscripted in 1921) and they were the only ones who had not been there during the 1917 revolution. [**Kronstadt 1917–1921**, pp. 207–8]

Historian Fedotoff-White also noted that *"a good many"* of the rebels *"had had ample experience in organisational and political work since 1917. A number had long-standing associations with Anarchists and the Socialist Revolutionaries of the Left"*. The cruiser **Rossiia** joined in the decision to re-elect the Kronstadt Soviet and its *"crew consisted mostly of old seamen."* [**The Growth of the Red Army**, p. 155 and p. 138] Moreover, the majority of the revolutionary committee were veterans of the Kronstadt Soviet and the October revolution. [Ida Mett, **Op. Cit.**, p. 42] While obviously not a miniature of the 1917 Baltic Fleet, the available information indicates that by length of service the sailors of Kronstadt in 1921 had been there since 1917 — including the sailors manning the battleships which were *"the powder kegs of the rising."* Moreover, *"[g]iven their maturity and experience, not to speak of their keen disillusionment as former participants in the revolution, it was only natural that these seasoned bluejackets should be thrust into the forefront of the uprising."* [Avrich, **Krondtadt 1921**, p. 93 and p. 91]

So Getzler was right to conclude that it was *"certainly the case"* that the *"activists of the 1921 uprising had been participants of the 1917 revolutions"* for the *"1,900 veteran sailors of the* **Petropavlovsk** *and the* **Sevastopol** *who spearheaded it. It was certainly true of a majority of the Revolutionary Committee and of the intellectuals ... Likewise, at least three-quarters of the 10,000 to 12,000 sailors — the mainstay of the uprising — were old hands who had served in the navy through war and revolution."* [**Op. Cit.**, p. 226] As Paul Avrich notes in a review of Getzler's book:

> *"Getzler draws attention to the continuity in institutions, ideology, and personnel linking 1921 with 1917. In doing so he demolishes the allegation of Trotsky and other Bolshevik leaders that the majority of veteran Red sailors had, in the course of the Civil War, been replaced by politically retarded peasant recruits from the Ukraine and Western borderlands, thereby diluting the revolutionary character of the Baltic fleet. He shows, on the contrary, that no significant change had taken place in the fleet's political and social composition, that at least three-quarters of the sailors on active duty in 1921 had been drafted before 1918 and were drawn predominantly from Great Russian areas."* [**Soviet Studies**, Vol. 36, No. 1, pp. 139–40]

This is not the end of the matter. A report by Vasilii Sevei, Plenipotentiary of the Special Section of the **Vecheka,** dated March 7th, 1921, stated that a *"large majority"* of the sailors of Baltic Fleet *"were and still are professional revolutionaries and could well form the basis for a possible third revolution."* He notes that the *"disease from which they suffer has been too long neglected."* What is significant about this social-political profile of the *"large majority"* of sailors was that it was **not** written in response of the Kronstadt revolt but that it was formulated well before. As its

author put it in the report, *"I stated these views more than a month ago in my memorandum to comrade Krestinskii"* (then secretary of the Communist Party). And the recipient of this March 7th, 1921, report? Leon Trotsky. [quoted by Israel Getzler, *"The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents"*, **Op. Cit.**, pp. 32–3]

It should also be noted that Stalinist works on the Kronstadt Rebellion tried to prove that the Red Sailors of 1917 had been replaced by 1921. As one historian notes: *"Statistical arguments used by these authors are not convincing. They show that the actual proportion of peasants serving in the Baltic Navy in 1921 was at that time rather smaller than the proportion of peasants in the Red Army in the same year."* [George Katkov, **Op. Cit.**, p. 21] This places Trotsky's assertion that the *"workers who marched over the ice against the fortress represented the proletarian revolution"* while the *"sailors in revolt represented the peasant Thermidor"* in context. [Lenin and Trotsky, **Kronstadt**, p. 82] Perhaps, for Trotskyists, this explains the fact that the *"ordinary Red Army soldiers … were reluctant and unreliable fighters against Red Kronstadt, although driven at gunpoint onto the ice and into battle"*? [Getzler, **Kronstadt 1917–1921**, p. 243]

Needless to say, this statistical information was unavailable when libertarians wrote their accounts of the uprising. All they could go on were the facts of the uprising itself and the demands of the rebels. Based on these, it is little wonder that anarchists like Alexander Berkman stressed the continuity between the Red Kronstadters of 1917 and the rebels of 1921. Firstly, the rebels in 1921 took action in ***solidarity*** with the striking workers in Petrograd. In the words of Emma Goldman, it was *"after the report of their Committee of the real state of affairs among the workers in Petrograd that the Kronstadt sailors did in 1921 what they had done in 1917. They immediately made common cause with the workers. The part of the sailors in 1917 was hailed as the red pride and glory of the Revolution. Their identical part in 1921 was denounced to the whole world as counter-revolutionary treason"* by the Bolsheviks. [*"Trotsky Protests Too Much"*, **Op. Cit.** p. 259] Secondly, their demands were thoroughly in-line with the aspirations and politics of 1917 and clearly showed a socialist awareness and analysis. Thirdly, Emma Goldman spoke to some of those wounded in the attack on Kronstadt. She records how one *"had realised that he had been duped by the cry of 'counter-revolution.' There were no Tsarist generals in Kronstadt, no White Guardists — he found only his own comrades, sailors and soldiers who had heroically fought for the Revolution."* [**My Disillusionment in Russia**, pp. 199–200] Similarly, Ante Ciliga quoted the testimony regarding Kronstadt of a fellow political prisoner in Soviet Russia: *"'It is a myth that, from the social point of view, Kronstadt of 1921 had a wholly different population from that of 1917,' [a] man from Petrograd, Dv., said to me in prison. In 1921 he was a member of the Communist youth, and was imprisoned in 1932 as a 'decist' (a member of Sapronov's group of 'Democratic Centralists')."* [*"The Kronstadt Revolt"*, **Op. Cit.**, pp. 335–6] Hence Goldman:

> "Now, I do not presume to argue what the Kronstadt sailors were in 1918 or 1919. I did not reach Russia until January, 1920. From that time on until Kronstadt was 'liquidated' the sailors of the Baltic fleet were held up as the glorious example of valour and unflinching courage. Time on end I was told not only by Anarchists, Mensheviks and social revolutionists, but by many Communists, that the sailors were the very backbone of the Revolution. On the 1st of May, 1920, during the celebration and the other festivities organised for the first British Labour Mission, the Kronstadt sailors presented a large clear-cut contingent, and were then pointed out as among the great

> heroes who had saved the Revolution from Kerensky, and Petrograd from Yudenich. During the anniversary of October the sailors were again in the front ranks, and their re-enactment of the taking of the Winter Palace was wildly acclaimed by a packed mass.
>
> "Is it possible that the leading members of the party, save Leon Trotsky, were unaware of the corruption and the demoralisation of Kronstadt, claimed by him? I do not think so. Moreover, I doubt whether Trotsky himself held this view of the Kronstadt sailors until March, 1921. His story must, therefore, be an afterthought, or is it a rationalisation to justify the senseless 'liquidation' of Kronstadt?" [*"Trotsky Protests Too Much"*, **Op. Cit.**, pp. 257–8]

In short, the continuity between the sailors of 1917 and 1921 could be seen from their actions (rising in solidarity with the Petrograd workers) and in their politics (as expressed in their demands and in their paper). The later research has just confirmed what is obvious from an analysis of such facts, namely that the rebels in 1921 were acting in the spirit of their comrades of 1917 and this implies a significant continuity in personnel (which perhaps explains the unwillingness of Leninists to mention that the revolt was in solidarity with the strikers or the demands of the rebels). The empirical evidence available supports the political analysis of the revolt conducted by revolutionaries like Berkman, Voline, Goldman and Ciliga.

So academic research refutes the claims of Trotskyists since Trotsky suggested that Kronstadt had *"been completely emptied of proletarian elements"* as *"[a]ll the sailors"* belonging to the ships' crews *"had become commissars, commanders, chairmen of local soviets."* Later, realising the stupidity of this claim, he changed it to Kronstadt being *"denuded of all revolutionary forces"* by *"the winter of 1919."* He also acknowledged that *"a certain number of qualified workers and technicians"* remained to *"take care of the machinery"* but these were *"politically unreliable"* as proven by the fact they had not been selected to fight in the civil war. As evidence, he mentions that he had wired a *"request at the end of 1919, or in 1920, to 'send a group of Kronstadt sailors to this or that point'"* and they had answered *"No one left to send."* [Lenin and Trotsky, **Kronstadt**, p. 87, p. 90 and p. 81] Obviously, the Communist commander at Kronstadt had left his fortress and its ships totally unmanned! Such common sense is sadly lacking from Trotsky and the evidence does not support his claims.

Moreover, does this claim not also apply to the Communist Party membership at Kronstadt? Is Trotsky **really** arguing that the Bolsheviks in Kronstadt after the winter of 1919 were not revolutionary? Given that the bulk of them had joined the party during or after this time, we must obviously conclude that the recruiters let anyone join. Moreover, there had been a *"rigorous local purge"* of the party conducted in the autumn of 1920 by the commander of the Baltic Fleet. [Getzler, **Kronstadt 1917–1921**, p. 211 and p. 205] Must we also conclude that this purge did not have revolutionary politics as a factor when determining whether a party member should be expelled or not?

Trotsky claims too much. There are two possibilities. The first is that the Kronstadt Communist Party was not revolutionary and was made up of politically backward individuals, careerists and so on. If that were the case in Kronstadt then it must also have been the case elsewhere in Russia and this discredits any attempt to argue that the Bolshevik party dictatorship was revolutionary. The second is that it **did** have revolutionary elements. If so, then the fact that hundreds of these members left the party during the revolt and only a minority opposed it makes the claim that the

rebellion was "counter-revolutionary" difficult (indeed, impossible) to maintain. Of the around 2,000 members of the Communist Party in Kronstadt, some 500 officially resigned along nearly 300 candidate members. Trotsky later estimated that 30% of the party in Kronstadt took an active part in the revolt while 30% remained neutral. [Avrich, **Kronstadt 1921**, tp. 183–4] This shows that Trotsky's claims that Kronstadt was denuded of revolutionary elements were false.

J.G. Wright, as noted above, thought that it was *"impossible"* to believe that the sailors of 1917 could leave their comrades to fight the Whites while they stayed at Kronstadt. [*"The Truth About Kronstadt"*, **Op. Cit.**, pp. 122–3] This may have been a valid argument **if** the Soviet armed forces were democratically run. However, as we indicated in section 2, it was organised in a typically bourgeois fashion. Trotsky had abolished democratic soldiers and sailors councils and the election of officers in favour of appointed officers and hierarchical, top-down, military structures. This meant that the sailors would have stayed in Kronstadt if they had been ordered to — and probably shot if they had not followed those orders. The fact that they had to defend Petrograd combined with the level of technical knowledge and experience required to operate the battleships and defences at Kronstadt would have meant that many of the sailors of 1917 would have been irreplaceable and so had to remain at Kronstadt. This is what, in fact, did happen:

> *"One reason for the remarkable survival in Kronstadt of these veteran sailors, albeit in greatly diminished numbers, was precisely the difficulty of training, in war-time conditions, a new generation competent in the sophisticated technical skills required of Russia's ultra-modern battleships, and, indeed, in the fleet generally."* [**Op. Cit.**, p. 208]

We should also note here that *"by the end of 1919 thousands of veteran sailors, who had served on many fronts of the civil war and in the administrative network of the expanding Soviet state, had returned to the Baltic Fleet and to Kronstadt, most by way of remobilisation."* [Getzler, **Op. Cit.**, pp. 197–8] Thus the idea that any sailors who had been ordered away did not come back is not a valid one.

Trotsky obviously felt that this argument of changing social composition of the sailors would hold more water than claims White Guards organised it and he continued this theme:

> *"The best, most self-sacrificing sailors were completely withdrawn from Kronstadt and played an important role at the fronts and in the local soviets throughout the country. What was left was the grey mass with big pretensions ('We are from Kronstadt'), but without the political education and unprepared for revolutionary sacrifice. The country was starving. The Kronstadters demanded privileges. The uprising was dictated by a desire to get privileged food rations."* [Lenin and Trotsky, **Op. Cit.**, p. 79]

This was Trotsky's first comment on the uprising for 16 years and, as Ida Mett notes, *"[s]uch a demand was never put forward by the men of Kronstadt"* and so Trotsky *"started his public accusations with a lie."* [**Op. Cit.**, p. 191] He repeated the claim again, six months later [Lenin and Trotsky, **Op. Cit.**, p. 92] Unfortunately for him, the opposite was the case: point 9 of the Kronstadt demands explicitly called for an **end** of privileges by the *"equalisation of rations for all workers."* This was implemented during the uprising.

As an aside, Trotsky later stated that *"[w]hen conditions became very critical in hungry Petrograd, the Political Bureau more than once discussed the possibility of securing an 'internal loan' from*

Kronstadt, where a quantity of old provisions still remained. But delegates of the Petrograd workers answered: 'You will get nothing from them by kindness. They speculate in cloth, coal, and bread. At present in Kronstadt every kind of riffraff has raised its head.'" [Lenin and Trotsky, **Op. Cit.**, pp. 87–8] As Ida Mett pointed out, *"[w]e should add that before the insurrection these 'stores' were in the hands of communist functionaries and that it was upon these people alone that consent to the proposed 'loan' depended. The rank and file sailor, who took part in the insurrection, had no means open to him whereby he could have opposed the loan, even if he had wanted to."* [**Op. Cit.**, p. 193] If Trotsky's words were true, then they were a crushing indictment of the Bolshevik regime and **not** the Kronstadt rebels.

As for Trotsky's claim of a lack of political education and unwillingness for sacrifice, the 15 point resolution voted upon by the sailors exposes this as nonsense and the fact the sailors fought the Red Army to the end indicates that there were prepared to die for their ideals. Similarly, his argument that *"in 1917–18, the Kronstadt sailor stood considerably higher than the average level of the Red Army"* but by 1921 they *"stood ... on a level considerably lower, in general, than the average level of the Red Army"* but, as we indicate in section 9, the political programme of the revolt was fundamentally the same as the dominant ideas within Kronstadt during 1917. [**Op. Cit.**, p. 87] More, we should note that the Kronstadt rebels opposed the introduction of wage labour, a basic socialist idea and one raised in 1917 by anarchists and others, while this was missing from the Bolshevik's NEP policies. This shows clear continuity between 1921 and 1917 and, moreover, the mass meeting that agreed the resolution did so unanimously, meaning old and new sailors agreed to it. So much for Trotsky's assertions.

Now we turn to the misuse of these sources to support their case. This indicates well the nature of Bolshevik ethics. *"While the revolutionaries,"* argued Ciliga with regards to the Bolsheviks, *"remaining such only in words, accomplished in fact the task of the reaction and counter-revolution, they were compelled, inevitably, to have recourse to lies, to calumny and falsification."* [*"The Kronstadt Revolt"*, **Op. Cit.**, p. 335] Defending these acts also pays its toll on those who follow this tradition, as we shall see.

Needless to say, such evidence as provided by Avrich and Getzler is rarely mentioned by supporters of Bolshevism. However, rather than ignore these works, the Trotskyists use them in their own way, for their own purposes — indeed, both Paul Avrich's **Kronstadt 1921** and Getzler's **Kronstadt 1917–1921** have been used to support pro-Bolshevist conclusions when, in fact, they do the opposite. The misuse of these references is quite unbelievable and shows the mentality of Trotskyism well.

Pierre Frank, for example argues that Avrich's work has *"conclusions"* which are *"similar to Trotsky's"* and *"confirms the changes in the composition of the Kronstadt garrison that took place during the civil war, although with a few reservations."* [Lenin and Trotsky, **Op. Cit.**, p. 25] A quick look at these reservations shows how false Frank is. It is worth quoting Avrich at length to show this:

> "There can be little doubt that during the Civil War years a large turnover had indeed taken place within the Baltic Fleet, and that many of the old-timers had been replaced by conscripts from rural districts who brought with them the deeply felt discontent of the Russian peasantry. By 1921, according to official figures, more than three-quarters of the sailors were of peasant origin, a substantially higher proportion that in 1917 ... Yet this does not necessarily mean that the behavioural patterns of the fleet

had undergone any fundamental change. On the contrary, alongside the technical ratings, who were largely drawn from the working class, there had always been a large and unruly peasant element among the sailors … Indeed, in 1905 and 1917 it was these very youths from the countryside who had given Kronstadt its reputation as a hotbed of revolutionary extremism. And throughout the Civil War the Kronstadters had remained an independent and headstrong lot, difficult to control and far from constant in their support for the government. It was for this reason so many of them … had found themselves transferred to new posts remote from the centres of Bolshevik powers. Of those who remained, many hankered for the freedoms they had won in 1917 before the new regime began to establish its one-party dictatorship throughout the country.

"Actually, there was little to distinguish the old-timers from the recent recruits in their midst. Both groups were largely of peasant background … Not unexpectedly, when the rebellion finally erupted, it was the older seamen, veterans of many years of service (dating in some cases before the First World War) who took the lead … Given their maturity and experience, not to speak of their keen disillusionment as former participants of the revolution, it was only natural that these seasoned bluejackets should be thrust into the forefront of the uprising … The proximity of Petrograd, moreover, with its intense intellectual and political life, had contributed towards sharpening their political awareness, and a good many had engaged in revolutionary activity during 1917 and after…

"As late as the autumn of 1920, Emma Goldman recalled, the sailors were still held up by the Communists themselves as a glowing example of valour and unflinching courage; on November 7, the third anniversary of the Bolshevik seizure of power, they were in the front ranks of the celebrations … No one at the time spoke of any 'class degeneration' at Kronstadt. The allegation that politically retarded **muzhiks** had diluted the revolutionary character of the fleet, it would seem, was largely a device to explain away dissident movements among the sailors, and had been used as such as early as October 1918, following the abortive mutiny at the Petrograd naval station, when the social composition of the fleet could not yet have undergone any sweeping transformation." [**Kronstadt 1921**, pp. 89–92]

As can be seen, Avrich's *"few reservations"* are such as to make clear he does **not** share Trotsky's *"conclusions"* as regards the class make-up of Kronstadt and, indeed, noted the ideological bias in it.

Moreover, Avrich points to earlier revolts which the Bolsheviks had also explained in terms of a diluting of the revolutionary sailors of the Baltic Fleet by peasants. In April 1918 *"the crews of several Baltic vessels passed a strongly worded resolution"* which *"went so far as to call for a general uprising to dislodge the Bolsheviks and install a new regime that would adhere more faithfully to the principles of the revolution."* In October that year, *"a mass meeting at the Petrograd naval base adopted a resolution"* which included the sailors going *"on record against the Bolshevik monopoly of political power. Condemning the suppression of the anarchists and opposition socialists, they called for free elections to the soviets"* and *"denounced the compulsory seizure of gain."* Their demands, as Avrich notes, *"strikingly anticipated the Kronstadt programme of 1921, down to the slogans of 'free*

soviets' and 'Away with the commissarocracy.'" He stresses that a *"glance at the behaviour of the Baltic Fleet from 1905 to 1921 reveals many elements of continuity."* [**Op. Cit.**, pp. 63–4] Frank's selective quoting should be sufficient to dismiss his arguments.

However, an even worse example of Trotskyist betrayal of the truth is provided by the British SWP's John Rees. The evidence Rees musters for the claim that the *"composition"* of the Kronstadt sailors *"had changed"* between 1917 and 1921 is a useful indication of the general Leninist method when it comes to the Russian revolution. Rees argues as follows:

> *"In September and October 1920 the writer and Bolshevik party lecturer Ieronymus Yasinksky went to Kronstadt to lecture 400 naval recruits. They were 'straight from the plough'. And he was shocked to find that many, 'including a few party members, were politically illiterate, worlds removed from the highly politicised veteran Kronstadt sailors who had deeply impressed him'. Yasinsky worried that those steeled in the revolutionary fire' would be replaced by 'inexperienced freshly mobilised young sailors'."* [**Op. Cit.**, p. 61]

This quote is referenced to Israel Getzler's **Kronstadt 1917–1921**. Rees account is a fair version of the first half of Yasinskys' report. However, Getzler continues exactly as reproduced below:

> *"Yasinsky was apprehensive about the future when, 'sooner or later, Kronstadt's veteran sailors, who were steeled in revolutionary fire and had acquired a clear revolutionary world-view would be replaced by inexperienced, freshly mobilised young sailors'. Still he comforted himself with the hope that Kronstadt's sailors would gradually infuse them with their 'noble spirit of revolutionary self-dedication' to which Soviet Russia owed so much. As for the present he felt reassured that 'in Kronstadt the red sailor still predominates.'"* [Getzler, **Kronstadt 1917–1921**, p. 207]

Rees handy 'editing' of this quote transforms it from one showing that three months before the rising that Kronstadt had retained its revolutionary spirit to one implying the garrison had indeed been replaced.

Rees also tries to generate *"[f]urther evidence of the changing class composition"* by looking at the *"social background of the Bolsheviks at the base."* What is the basis of Rees *"further evidence"*? Simply that in *"September 1920, six months before the revolt, the Bolsheviks had 4,435 members at Kronstadt. Some 50 per cent of these were peasants, 40 percent workers and 10 percent intellectuals ... Thus the percentage of peasants in the party was considerably higher than nationally ... If we **assume** that the Bolshevik party was more working class in composition than the base as a whole, then it seems **likely** that the peasants had increased their weight in the Kronstadt, as Trotsky suggested."* [our emphasis, **Op. Cit.**, p. 61] So on the basis of an assumption, it may be *"likely"* that Trotsky was correct: impressive *"evidence"* indeed.

The figures Rees uses are extracted from D. Fedotoff-White's **The Growth of the Red Army**. Significantly, Rees fails to mention that the Kronstadt communists had just undergone a *"re-registration"* which saw about a quarter of the 4,435 members in August 1920 voluntarily resigning. By March 1921, the party had half as many members as in the previous August and during the rebellion 497 members (again, about one-quarter of the total membership) voluntarily resigned,

211 were excluded after the defeat of the rebellion and 137 did not report for re-registration. [Fedotoff-White, **Op. Cit.**, p. 140] It seems strange that the party leadership had not taken the opportunity to purge the Kronstadt party of "excessive" peasant influence in August 1920 when it had the chance.

Other questions arise from Rees' argument. He uses the figures of Communist Party membership in an attempt to prove that the class composition of Kronstadt had changed, favouring the peasantry over the workers. Yet this is illogical. Kronstadt was primarily a military base and so its "class composition" would be skewed accordingly. Since the Bolshevik military machine was made up mostly of peasants, can we be surprised that the Communist Party in Kronstadt had a higher percentage of peasants than the national average? Significantly, Rees does not ponder the fact that the percentage of workers in the Kronstadt Communist Party was around the national average (indeed, Fedotoff-White notes that it *"compares favourably in that respect with some of the large industrial centres."* [**Op. Cit.**, p. 142]).

Also, given that Rees acknowledges that by December 1920 only 1,313 new recruits had arrived in the Baltic Fleet, his pondering of the composition of the Communist organisation at Kronstadt smacks more of desperation than serious analysis. By arguing that we *"do not know how many more new recruits arrived in the three months before Kronstadt erupted,"* Rees fails to see that this shows the irrelevance of his statistical analysis. [**Op. Cit.**, p. 61] After all, how many of these *"new recruits"* would been allowed to join the Communist Party in the first place? Given that the Bolshevik membership had halved between August 1920 and March 1921, his analysis is simply pointless, a smokescreen to draw attention away from the weakness of his own case. Moreover, as evidence of **changing** class composition these figures are not very useful. This is because they do not compare the composition of the Kronstadt Bolsheviks in 1917 to those in 1921. Given that the Kronstadt base always had a high percentage of peasants in its ranks, it follows that in 1917 the percentage of Bolsheviks of peasant origin could have been higher than normal as well. If this were the case, then Rees argument falls. Simply put, he is not comparing the appropriate figures.

It would have been very easy for Rees to inform his readers of the real facts concerning the changing composition of the Kronstadt garrison. He could quoted Getzler's work on this subject. As noted above, Getzler demonstrates that the crew of the battleships ***Petropavlovsk*** and ***Sevastopol***, which formed the core of the rising, were recruited into the navy before 1917, only 6.9% having been recruited between 1918 and 1921. These figures are on the same page as the earlier quotes Rees uses but are ignored by him. Or, then again, he could have reported Samuel Farber's summary of Getzler's (and others) evidence. Rees rather lamely notes that Farber *"does not look at the figures for the composition of the Bolsheviks"* [**Op. Cit.**, p. 62] Why should he when he has the appropriate figures for the sailors? Here is Farber's account of the facts:

> *"this [Trotsky's class composition] interpretation has failed to meet the historical test of the growing and relatively recent scholarship on the Russian Revolution ... In fact, in 1921, a smaller proportion of Kronstadt sailors were of peasant social origin than was the case of the Red Army troops supporting the government ... recently published data strongly suggest that the class composition of the ships and naval base had probably remained unchanged since before the Civil War. We now know that, given the wartime difficulties of training new people in the technical skills required in Russia's ultramodern battleships, very few replacements had been sent to Kronstadt to take the place*

> *of the dead and injured sailors. Thus, at the end of the Civil War in late 1920, no less than 93.9 per cent of the members of the crews of the* **Petropavlovsk** *and the* **Sevastopol** *... were recruited into the navy before and during the 1917 revolutions. In fact, 59 per cent of these crews joined the navy in the years 1914–16, while only 6.8 per cent had been recruited in the years 1918–21 ... of the approximately 10,000 recruits who were supposed to be trained to replenish the Kronstadt garrison, only a few more than 1,000 had arrived by the end of 1920, and those had been stationed not in Kronstadt, but in Petrograd, where they were supposed to be trained."* [**Before Stalinism**, pp. 192–3]

Yet Rees bemoans Farber for not looking at the Bolshevik membership figures! Yes, assumptions and likely conclusions drawn from assumptions are more important than hard statistical evidence.

After stating *"if, for the sake of argument, we accept Sam Farber's interpretation of the evidence"* (evidence Rees refuses to inform the reader of) Rees then tries to save his case. He states Farber's *"point only has any validity if we take the statistics in isolation. But in reality this change [!] in composition acted on a fleet whose ties with the peasantry had recently been strengthened in other ways. In particular, the Kronstadt sailors had recently been granted leave for the first time since the civil war. Many returned to their villages and came face to face with the condition of the countryside and the trials of the peasantry faced with food detachments."* [**Op. Cit.**, p. 62] Yet such an argument has **nothing to do with Rees original case.** Let us not forget that he argued that the **class** composition of the garrison had changed, **not** that its **political** composition had changed. Faced with overwhelming evidence against his case, he not only does not inform his readers of it, he changes his original argument. Very impressive.

So, what of this argument? Hardly an impressive one. Let us not forget that the revolt came about in response to the wave of strikes in Petrograd, **not** a peasant revolt. Moreover, the demands of the revolt predominantly reflected worker demands, **not** peasant ones (as noted in section 4, Rees himself acknowledged that the Kronstadt demands were not reproduced by any peasant insurrection). The political aspects of these ideas reflected the political traditions of Kronstadt, which were not, in the main, Bolshevik. The sailors supported soviet power in 1917, not party power, and they again raised that demand in 1921. In other words, the **political** composition of the garrison was the same as in 1917 (see section 9). Rees is clearly clutching at straws.

The fact that the class composition of the sailors was similar in 1917 and in 1921 **and** that the bulk of the sailors at the heart of the revolt were veterans of 1917, means that Trotskyists can only fall back on their ideological definition of class. This perspective involves defining a specific "proletarian" political position (i.e. the politics of Bolshevism) and arguing that anyone who does not subscribe to that position is "petty-bourgeois" regardless of their actual position in society (i.e. their class position). As Ida Mett suggests, *"[w]hen Trotsky asserts that all those supporting the government were genuinely proletarian and progressive, whereas all others represented the peasant counterrevolution, we have a right to ask of him that he present us with a serious factual analysis in support of his contention."* [**Op. Cit.**, p. 195]

Given the political aspects of the Kronstadt demands we can safely argue that even if the rebellion had been the work of recent recruits they obviously had been influenced by the veteran sailors who remained. They, like the peasant-workers of 1905 and 1917, would have been able to raise their own political demands and ideas while, at the same time, listening to those among them with more political experience. Unsurprisingly, this is what did happen.

Rees, while studiously ignoring the hard data provided by Gelzter and repeated by Farber, comments that while we did not know the composition of the sailors, we did *"know about the composition of some of the other units based at Kronstadt, like the 2,5000 Ukrainians of the 160th Rifle Regiment, recruited from areas particularly friendly to the Makhno guerrillas and with less than 2 percent of Bolsheviks in its ranks."* [**Op. Cit.**, p. 61] In other words, we know the origin of **one** other unit at Kronstadt, not the class *"composition"* of *"some of the other units"* there. Ignoring this, there are a few issues with Rees's use of this fact. First, Rees gained his information on the 160th Rifle Regiment from Fedotoff-White's work but does not think it important to note that he also indicated that Communists numbered less than 2 per cent of metal-workers in Petrograd and only 4 per cent of 2,200 employed in metal works in Moscow. [Fedotoff-White, **Op. Cit.**, p. 132] As such the low figure for Communists in the 160th Rifle Regiment does not tell us much about its class composition. Second, as Fedotoff-White notes, while *"the soldiers were also disaffected and had no love of the Communists and the commissars,"* they were *"unable to formulate their grievances clearly and delineate the issues at stake ... They did not have it in them to formulate a plan of action. All that was done at Kronstadt was the work of the bluejackets [the sailors], who were the backbone of the movement."* If, as Rees argues, that new recruits explain the uprising, then how can he explain the differences between the army and navy? He cannot. The difference can be explained only in terms of what Rees is at pains to deny, namely the existence and influence of sailors who had been there since 1917. As Fedotoff-White speculates, *"the younger element among the seamen"* would *"easily [fall] under the spell of the ... older men they served with on board ships"* and of the *"large number of old-ex-sea men, employed in the industrial enterprises of Kronstadt."* He notes that *"a good many"* of the rebels *"had had ample experience in organisational and political work since 1917. A number had long-standing associations with Anarchists and the Socialist Revolutionaries of the Left."* Thus the *"survival of the libertarian pattern of 1917 ... made it possible for the bluejackets not only to formulate, but carry out a plan of action, no doubt under a certain amount of influence of the Anarchists, and those who had left the party in such great numbers during the September 1920 re-registration."* [**Op. Cit.**, pp. 154–5]

Rees, needless to say, ignores all this and how it shows the political and personnel continuity of the Kronstadt rebellion. Ultimately, though, the assumption that the sailors could not raise revolutionary political demands if they were "raw recruits" only makes sense if we subscribe to Lenin's dictum that the working class, by its own efforts, can only reach a trade union consciousness (i.e. that toiling people cannot liberate themselves). The bulk of the sailors at the start of 1921 had been there since 1917 but even if this were not the case and we assume that a majority of the sailors at Kronstadt were recent recruits, does this invalidate the rebellion? Of course not. After all, the Red sailors of 1917 were once raw recruits. They had become politicised over time by debate, discussion and struggle. So had the workers in Petrograd and elsewhere. Would Leninists have denounced strikers in 1905 or 1917 if it were discovered that most of them were recent peasant arrivals in the city? Of course not — they do so with regards to Kronstadt only because the rebels in question are facing Lenin and Trotsky.

Ironically, the Bolsheviks were simply repeating old Menshevik arguments once raised against them. Between 1910 and 1914, the industrial workforce in Russia grew from 1,793,000 workers to 2,400,000. At the same time, the influence of the Bolsheviks grew at Menshevik expense which the latter considered as *"consequence of the changes that were taking place in the character of urban Russia"* with peasants joining the labour force. [*"Introduction"*, **The Mensheviks in the Russian Revolution**, Abraham Archer (ed.), p. 24] The Mensheviks argued that the Bolshe-

viks gained their influence from such worker-peasant industrial *"raw recruits"* and not from the genuine working class. [Orlando Figes, **A People's Tragedy**, p. 830] As Robert Service noted, *"Menshevik critics were fond of carping that most Bolshevik newcomers were young lads fresh from the villages and wanting in long experience of industrial life and political activity. It was not completely unknown for Bolshevik spokesmen to come close to admitting this."* [**The Bolshevik Party in Revolution**, p. 44] It was the industrial "raw recruits" who took part in the 1905 and 1917 revolutions, helping to raise and formulate demands as well as organising soviets, strikes and demonstrations and raising slogans which were to the left of the Bolsheviks. Does this process somehow grind to a halt when these "raw recruits" oppose the vanguard party? Of course not.

In short, this Trotsky inspired sociology has been debunked — and misses the point. Sadly, we have to address it in order to refute common-place Leninist arguments against Kronstadt and expose how willing they are to selectively quote from the sources they use. As we show in the next section, the political composition of the Kronstadt rebels, like their class composition, was basically unchanged in 1921 when compared to that which pre-dominated in 1917.

9 Was Kronstadt different politically in 1921?

As we indicated in the last section, over 90% of the Kronstadt sailors on the two battleships which were the catalyst for the rebellion for whom years of enlistment are known had been there since 1917. However, given that most Leninists mean "support the party" by the term "class consciousness," it is useful to compare the political perspectives of Kronstadt in 1917 to that raised in the 1921 revolt. As will soon become clear, the political ideas expressed in 1921 were essentially similar to those popular in 1917. This similarly also proves the continuity between the Red sailors of 1917 and the rebels of 1921.

Kronstadt in 1917 was **never** dominated by the Bolsheviks, they were always a minority and a *"radical populist coalition of Maximalists and Left SRs held sway, albeit precariously,* ***within*** *Kronstadt and its Soviet"* while *"****externally*** *Kronstadt was a loyal stronghold of the Bolshevik regime"*. [Getzler, **Kronstadt 1917–1921**, p. 179] This confirms Trotsky's recollections from 1938 that *"the Bolsheviks constituted less than one-half of the Kronstadt Soviet. The majority consisted of SRs and anarchists."* [*"Hue and Cry Over Kronstadt"*, Lenin and Trotsky, **Kronstadt**, p. 86] Indeed, in 1917 Trotsky even stated that the Kronstadters *"are anarchists."* [quoted by Getzler, **Op. Cit.**, p. 98]

Kronstadt was in favour of soviet power and, unsurprisingly, supported those parties which claimed to support that goal, which explains its initial support for the Bolshevik regime. Yet internally, the political climate in Kronstadt was *"very close to the politics of the Socialist Revolutionary Maximalists, a left-wing split-off from the SR Party, politically located somewhere between the Left SRs and the Anarchists."* [Farber, **Before Stalinism**, p. 194] In Kronstadt this group was led by Anatolii Lamanov and *"it rejected party factionalism"* and *"stood for pure sovietism"*. They sought an immediate agrarian and urban social revolution, calling for the *"socialisation of power, of the land and of the factories"* to be organised by a federation of soviets based on direct elections and instant recall, as a first step towards socialism. [Getzler, **Op. Cit.**, p. 135] The similarities with anarchism are clear.

At the time of the October revolution, the Kronstadt soviet did not have a Bolshevik majority. The soviet elections in August saw the Bolsheviks receive 96 seats, as did the Non-Party grouping, the Left-SRs receiving 73, the Menshevik Internationalists 13 and anarchists 7. Kronstadt's

delegates to the third All-Russian Congress of Soviets were a Left-SR (157 votes), a SR-Maximalist (147 votes) and a Bolshevik (109 votes). It was only in the January elections in 1918 that the Bolsheviks improved their position, gaining 139 deputies compared to their previous 96. In spite of securing their highest ever vote during the era of multi-party soviets the Bolsheviks only gained 46 percent of seats in the soviet. Also elected at this time were 64 SRs (21 percent), 56 Maximalists (19 percent), 21 non-party delegates (7 percent), 15 Anarchists (5 percent) and 6 Mensheviks (2 percent). The soviet elected a Left SR as its chairman and in March it elected its three delegates to the Fourth Congress of Soviets, with the Bolshevik delegate receiving the lowest vote (behind a Maximalist and an anarchist with 124, 95 and 79 votes respectively). By the April 1918 elections, as in most of Russia, the Bolsheviks found their support had decreased. Only 53 Bolsheviks were elected (29 per cent) as compared to 41 SR Maximalists (22 percent), 39 Left SRs (21 percent), 14 Menshevik Internationalists (8 percent), 10 Anarchists (5 percent) and 24 non-party delegates (13 percent). Indeed, Bolshevik influence at Kronstadt was so weak that on April 18th, the Kronstadt soviet denounced the Bolsheviks attack against the anarchists in Moscow, April 12th by a vote of 81 to 57. The *"Bolshevisation"* of Kronstadt *"and the destruction of its multi-party democracy was not due to internal developments and local Bolshevik strength, but decreed from outside and imposed by force."* [Getzler, **Op. Cit.**, p. 134, pp. 182–4 and p. 186]

Thus the dominant political perspective in 1917 was one of *"sovietism"* – namely, all power to the soviets and not to parties. This was the main demand of the 1921 uprising. Politically, Kronstadt had not changed: *"What is impressive is that Kronstadt seems to have changed so little throughout the period from 1905 to 1921. Moreover, the argument of ideological degeneration was used against the sailors as early as the mutiny of October 1918, when it was quite implausible".* [Nicolas Walter, **The Anarchist Past and Other Essays**, p. 138]

In addition to the soviet, there was the *"general meetings in Anchor square, which were held nearly every day."* [Avrich, **Op. Cit.**, p. 57] The Kronstadt Soviet was itself constantly pressurised by these mass meetings. For example, on 25 May 1917, a large crowd, inspired by Bolshevik and anarchist speakers, marched to the Naval Assembly and forced the leaders of the Soviet to rescind their agreement with the more moderate Petrograd Soviet. In February 1921, the Kronstadt rebels met in Anchor square to pass the ***Petropavlovsk*** resolution — just as happened before in 1917. And as in 1917, they elected a Conference of Delegates to manage the affairs of the Kronstadt. In other words, the sailors re-introduced exactly the same political forms they practised in 1917.

These facts suggest that any claims that the majority of sailors, soldiers and workers in Kronstadt had changed politically are unfounded. This, ironically enough, is confirmed by Trotsky.

Trotsky's memory (which, after all, seems to be the basis of most of his and his followers' arguments) did play tricks on him. He states that there *"were no Mensheviks at all in Kronstadt."* As for the anarchists, *"most"* of them *"represented the city petty bourgeoisie and stood at a lower level than the SRs."* The Left SRs *"based themselves on the peasant part of the fleet and of the shore garrison."* [Lenin and Trotsky, **Op. Cit.**, p. 86] So we have Trotsky arguing that the majority of the *"pride and glory"* of the revolution in 1917 voted for groups of a *"lower level"* than the Bolsheviks (and quite a few for a party, the Mensheviks, Trotsky said did not exist there).

Looking at the politics of these groups, we discover some strange inconsistencies which undermine the validity of Trotsky's claims. For example, in the beginning of 1918, *"the working population of Kronstadt, after debating the subject at many meetings, decided to proceed to socialise dwelling places ... A final monster meeting definitely instructed several members of the Soviet — Left Social-Revolutionaries and Anarcho-Syndicalists — to raise the question at the next [soviet] ple-*

nary session." While the Bolshevik delegates tried to postpone the decision (arguing in the soviet that the decision was too important and should be decided by the central government) the *"Left Social-Revolutionaries, Maximalists and Anarcho-Syndicalists asked for an immediate discussion and carried the vote."* [Voline, **The Unknown Revolution**, pp. 460–1] This fits in exactly with the communist-anarchist programme of socialisation but it is hardly an expression of representatives of *"the city petty bourgeoisie."* Let us quote one:

> *"I am an anarchist because contemporary society is divided into two opposing classes: the impoverished and dispossessed workers and peasants ... and the rich men, kings and presidents ...*
>
> *"I am an anarchist because I scorn and detest all authority, since all authority is founded on injustice, exploitation and compulsion over the human personality. Authority dehumanises the individual and makes him a slave.*
>
> *"I am an opponent of private property when it is held by individual capitalist parasites, for private property is theft ...*
>
> *"I am an anarchist because I believe only in the creative powers and independence of a united proletariat and not of the leaders of political parties of various kinds.*
>
> *"I am an anarchist because I believe that the present struggle between the classes will end only when the toiling masses, organised as a class, gain their true interests and conquer, by means of a violent social revolution, all the riches of the earth ... having abolished all institutions of government and authority, the oppressed class must proclaim a society of free producers ... The popular masses themselves will conduct their affairs on equal and communal lines in free communities."* [N. Petrov, quoted by Paul Avrich, **Anarchists in the Russian Revolution**, pp. 35–6]

Very "petty bourgeois"! Of course Trotsky could argue that this represented the minority of *"real revolutionaries,"* the *"elements most closely linked to the Bolsheviks"* among the anarchists, but such an analysis cannot be taken seriously considering the influence of the anarchists in Kronstadt. [Lenin and Trotsky, **Op. Cit.**, p. 86] For example, a member of the Petrograd Committee and the Helsingfors party organisation in 1917 recalled that the Anarchist-Communists had great influence in Kronstadt. Moreover, according to historian Alexander Rabinowitch, they had an *"undeniable capacity to influence the course of events"* and he speaks of *"the influential Anarcho-Syndicalist Communists [of Kronstadt] under Iarchuk."* Indeed, anarchists *"played a significant role in starting the July uprising"* in 1917. [**Prelude to Revolution**, p. 62, p. 63, p. 187 and p. 138] This confirms Paul Avrich's comments that the *"influence of the anarchists ... had always been strong within the fleet"* and *"the spirit of anarchism"* had been *"powerful in Kronstadt in 1917"* (it *"had by no means dissipated"* in 1921). [Arvich, **Op. Cit.**, p. 168 and p. 169]

A similar analysis of the Maximalists would produce the same results for Trotsky's claims. Paul Avrich provides a useful summary of their politics. He notes the Maximalists occupied *"a place in the revolutionary spectrum between the Left SR's and the anarchists while sharing elements of both."* They *"preached a doctrine of total revolution"* and called for a *"'toilers' soviet republic' founded on freely elected soviets, with a minimum of central state authority. Politically, this was identical with the objective of the Kronstadters [in 1921], and 'Power to the soviets but not the parties' had originally been a Maximalist rallying-cry."* Economically, the parallels *"are no less striking."*

They denounced grain requisitioning and demanded that *"all the land be turned over to the peasants."* For industry they rejected the Bolshevik theory and practice of *"workers' control"* over bourgeois administrators in favour of the *"social organisation of production and its systematic direction by representatives of the toiling people."* Opposed to nationalisation and centralised state management, they argued for socialisation and workers' self-management of production. Little wonder he states that the *"political group closest to the rebels in temperament and outlook were the SR Maximalists"* and *"[o]n nearly every important point the Kronstadt program, as set forth in the rebel* **Izvestiia***, coincided with that of the Maximalists."* [Paul Avrich, **Op. Cit.**, pp. 171–2]

This can be quickly seen from reading both the ***Petropavlovsk*** resolution and the Kronstadt newspaper ***Izvestiia*** (see **No Gods, No Masters**, vol. 2, pp. 183–204). The political continuity is striking between 1917 and 1921, as can be seen from the article *"So-Called Socialism"* published in its last issue on March 16th:

> *"In making the October Revolution, the sailors and Red soldiers, the workers and peasants, spilled their blood for the power of the Soviets, for the building of a workers' republic.*
>
> *"The Communist Party paid close attention to the aspirations of the masses. Having inscribed on its banners attractive slogans which aroused the enthusiasm of the workers, it swept them into the struggle and promised them that it would lead them into the beautiful kingdom of socialism which only the Bolsheviks knew how to build ... It seemed as if the time of free labour in the fields, factories and workshops had come. It seemed as if power were going to pass into the hands of the workers ... Then, feeling themselves strong enough, the Communists progressively eliminated from power first the socialists of other tendencies, then they pushed workers and peasants out of many state posts, while continuing to govern in their name.*
>
> *"In this way the Communists have brought in the rule of the commissars, with all the despotism of personal power. Against all reason and contrary to the will of the workers, they then began stubbornly to build a state socialism with slaves, instead of building a society based on free labour ... the Bolsheviks established the nationalisation of works and factories. From a slave of the capitalist the worker was transformed into a slave of state enterprises. Soon this no longer sufficed, and they planned the application of the Taylor system.*
>
> *"The whole mass of the peasants were declared enemies of the people and identified with the 'kulaks.' Very enterprisingly the Communists then set about ruining the peasants and substituting Soviet exploitation, that is to say, establishing the estates of the new agrarian profiteer, the State. That is what the peasants have obtained from the Socialism of the Bolsheviks, instead of free labour on the liberated land for which they had hoped. In exchange for bread and livestock, almost entirely requisitioned, they obtained the raids of the Cheka and mass shootings. A fine system of exchange in a workers' state — lead and bayonets for bread!*
>
> *"The life of the citizen became monotonous and banal to the point of death, regulated according to the rules of the authorities. Instead of a life animated by free labour and the free development of the individual, an unprecedented and incredible slavery was born. All independent thought, all just criticism of the acts of the criminal rulers became*

crimes, punished by prison and often by death. Indeed, the death penalty, that disgrace to humanity, was extended in the 'socialist fatherland.'

"Such is the beautiful kingdom of socialism to which the dictatorship of the Communist party has brought us. We have received State Socialism with Soviets of functionaries who vote docilely what the authorities and their infallible commissars dictate to them. The slogan, 'He who does not work shall not eat,' has been modified under this beautiful 'Soviet' regime to 'Everything for the Commissars.' And as for the workers, peasants and intellectual workers, they have just to carry out their tasks in a prison.

"This has become insupportable. Revolutionary Kronstadt has been the first to break the chains and bars of the prison. It fights for the true Soviet republic of the workers in which the producer himself will be owner of the products of his labour and can dispose of them as he wishes." [quoted by Voline, **Op. Cit.**, pp. 518–9]

So as can be seen, the Maximalists were in advance of the Bolsheviks too. They argued for soviet power, not party power, as well as workers' self-management to replace the state capitalism of the Bolshevik party dictatorship. The political outlook of the Kronstadt rebels had not changed dramatically. Heavily influenced by anarchist and semi-anarchists in 1917, in 1921 the same political ideas came to the fore again once the sailors, soldiers and civilians had freed themselves from Bolshevik dictatorship and created the Conference of Delegates.

According to the logic of Trotsky's argument, the Kronstadt sailors were revolutionary simply because of the actions of the Bolshevik minority, as a *"revolution is 'made' directly by a **minority.** The success of a revolution is possible, however, only where this minority finds more or less support ... on the part of the majority. The shift in different stages of the revolution ... is directly determined by changing political relations between the minority and the majority, between the vanguard and the class."* It is this reason that necessitates *"the dictatorship of the proletariat"* as the level of the masses cannot be *"equal"* and of *"extremely high development."* Trotsky argued that the *"political composition of the Kronstadt Soviet reflected the composition of the garrison and the crews."* [Lenin and Trotsky, **Op. Cit.**, p. 85, p. 92 and p. 86]

In other words, with the vanguard (the minority of Bolsheviks) gone, the majority of the Kronstadters fell back to their less developed ways. Yet, if the political composition of the revolt reflected the composition of the crews, then Trotsky's argument suggests that this composition was remarkably unchanged for in the early months of 1918 the Bolsheviks saw their vote nearly half between late January and April 1918. Similarly, we find John Rees, in contradiction to his main argument that the sailors were backward new recruits, admitting that the *"ideology of the Kronstadt garrison was one factor"* in the revolt because *"in its heroic days the garrison had an ultra-left air."* [Rees, **Op. Cit.**, p. 62] Yet if, as he maintains, the sailors **were** new, how could they had time to be influenced by this ideology, the ideology of sailors he claims were not there? And if the new recruits he claims were there **had** been influenced by the sailors of 1917 then it is hard to maintain that the revolt was alien to the spirit of 1917. By this apparently simple admission of the facts, he seems unaware that he fatally undermines his own case.

All of which raises an interesting question. If revolutions are made by a minority who gain the support of the majority, what happens when the majority reject the vanguard? As we indicate in section 15, Trotsky was not shy in providing the answer — party dictatorship. Such socialism from above, as the Kronstadt sailors recognised, cannot create genuine socialism but only state-capitalism.

To conclude, the evidence shows that the political ideas dominant in Kronstadt had not changed since 1917 — the same libertarian socialist ideas prevailed although now enriched by the experience of the state socialism anarchists had warned of. Indeed, it is the politics expressed in 1921 which clearly confirm the statistical evidence on the length of service of the rebel sailors we presented in the last section. The revolt of 1921 reflected the politics and aspirations of those active since at least 1917. It was these politics which had made Kronstadt the *"pride and glory"* of the revolution in 1917 and, four years later, made it so dangerous to the Bolsheviks.

10 Why did the Petrograd workers not support Kronstadt?

For Trotskyists, the inaction of the Petrograd workers during the revolt is a significant factor in showing its *"backward peasant"* character. Trotsky, for example, argued that from *"the class point of view"* it is *"extremely important to contrast the behaviour of Kronstadt to that of Petrograd in those critical days"* for the *"uprising did not attract the Petrograd workers. It repelled them. The stratification proceeded along class lines. The workers immediately felt that the Kronstadt mutineers stood on the opposite side of the barricades — and they supported the Soviet power. The political isolation of Kronstadt was the cause of its internal uncertainty and its military defeat."* [*"Hue and Cry Over Kronstadt"*, Lenin and Trotsky, **Kronstadt**, pp. 90–1]

First, it should be noted that Trotsky's claims in 1937 are at odds with his opinion during the crisis. In a cable dated March 5th, 1921, to a member of the Council of Labour and Defence Trotsky insisted that *"only the seizure of Kronstadt will put an end to the political crisis in Petrograd."* [quoted by Israel Getzler, *"The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents"*, **Op. Cit.**, p. 32] Thus, in 1921, Trotsky was well aware of the links between the Kronstadt revolt and the Petrograd strikes, seeing the destruction of the former as a means to defeating the latter. Simply put, the crushing of Kronstadt would give the rebel workers in Petrograd a clear message of what to expect if they persisted in their protests.

Second, Trotsky's later arguments leave a lot to be desired. For example, he fails to note (to use Victor Serge's words that the state and Communist Press *"was positively berserk with lies"* and *"lied systematically"* [**Memoirs of a Revolutionary**, pp. 125–6] The press and radio campaign directed against Kronstadt stated that the revolt had been organised by foreign spies and was led by ex-Tsarist generals. As an example (see section 5 for more details), on 5th March the Petrograd Defence Committee put out a call to the insurgents, inviting them to surrender:

> *"You are being told fairy tales when they tell you that Petrograd is with you or that the Ukraine supports you. These are impertinent lies. The last sailor in Petrograd abandoned you when he learned that you were led by generals like Kozlovsky. Siberia and the Ukraine support the Soviet power. Red Petrograd laughs at the miserable efforts of a handful of White Guards and Socialist Revolutionaries."* [quoted by Mett, **Op. Cit.**, p. 162]

These lies would, of course, alienate many workers in Petrograd. Two hundred emissaries were sent from Kronstadt to distribute their demands but only a few avoided capture. The Party had brought the full weight of its propaganda machine to bear, lying about the revolt and those taking part in it. The government also placed a *"careful watch"* on the *"trains from Petrograd to*

mainland points in the direction of Kronstadt to prevent any contact with the insurgents." [Avrich, **Op. Cit.**, p. 140 and p. 141]

However, while lying is a factor in the lack of active support, it is by no means the key one. That factor was state repression. Emma Goldman recalled the situation in Petrograd at the time:

> *"Extraordinary martial law was declared over the entire Petrograd Province, and none but specially authorised officials could leave the city. The Bolshevik press opened a campaign of calumny and vituperation against Kronstadt, proclaiming that the sailors and soldiers had made common cause with the 'tsarist general Kozlovsky,' and declaring the Kronstadt people outlawed."* [**Living My Life**, vol. 2, pp. 878–9]

Given what everyone knew what happened to people outlawed by the Bolsheviks, is it surprising that many workers in Petrograd (even if they knew they were being lied to) did not act? Particularly as the threat could be seen on the streets of Petrograd:

> *"On March 3 the Petrograd Defence Committee, now vested with absolute power throughout the entire province, took stern measures to prevent any further disturbances. The city became a vast garrison, with troops patrolling in every quarter. Notices posted on the walls reminded the citizenry that all gatherings would be dispersed and those who resisted shot on the spot. During the day the streets were nearly deserted, and, with the curfew now set at 9 p.m., night life ceased altogether."* [Avrich, **Op. Cit.**, p. 142]

Berkman, also an eyewitness to the repression like Goldman, stated that:

> "The Petrograd committee of defence, directed by Zinoviev, its chairman, assumed full control of the city and Province of Petrograd. The whole Northern District was put under martial law and all meetings prohibited. Extraordinary precautions were taken to protect the Government institutions and machine guns were placed in the Astoria, the hotel occupied by Zinoviev and other high Bolshevik functionaries. The proclamations posted on the street bulletin boards ordered the immediate return of all strikers to the factories, prohibited suspension of work, and warned the people against congregating on the streets. 'In such cases', the order read, 'the soldiery will resort to arms. In case of resistance, shooting on the spot.'
>
> "The committee of defence took up the systematic 'cleaning of the city.' Numerous workers, soldiers and sailors suspected of sympathising with Kronstadt, placed under arrest. All Petrograd sailors and several Army regiments thought to be 'politically untrustworthy' were ordered to distant points, while the families of Kronstadt sailors living in Petrograd were taken into custody **as hostages.**" [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 71]

As we noted in section 2, the events in Kronstadt were in solidarity with the strike wave in Petrograd at the end of February. Then the Bolsheviks had repressed the workers with *"arrests, the use of armed patrols in the streets and in the factories, and the closing and re-registration of an enterprise labour force."* [Mary McAuley, **Op. Cit.**, p. 409] A three-man Defence Committee

was formed and Zinoviev *"proclaimed martial law"* on February 24th (this was later *"vested with absolute power throughout the entire province"* on March 3rd). As part of this process, they had to rely on the ***kursanty*** (Communist officer cadets) as the local garrisons had been caught up the general ferment and could not be relied upon to carry out the government's orders: *"Overnight Petrograd became an armed camp. In every quarter pedestrians were stopped and their documents checked . .. the curfew [was] strictly enforced."* The Petrograd Cheka made widespread arrests. [Avrich, **Op. Cit.**, p. 39, p. 142 and pp. 46–7]

However, part of the Petrograd proletariat continued to strike during the Kronstadt events including the biggest factories of Petrograd: Poutilov, Baltisky, Oboukhov, Nievskaia Manoufactura, etc. However, the Bolsheviks acted quickly to shut down the factories and started the re-registration of the workers. For workers to be locked out of a factory meant to be *"automatically deprived of their rations."* [Avrich, **Op. Cit.**, p. 41] On the day the Bolsheviks attacked Kronstadt (March 7th) the Cheka reported that it was launching *"decisive actions against the workers."* These *"decisive actions"* involved a *"massive purge of Petrograd factories and plants."* At the Arsenal factory, for example, *"the workers organised a mass meeting on 7th March, (the day the bombardment of Kronstadt began). This meeting adopted a resolution of the mutinous sailors! It elected a commission which was to go from factory to factory, agitating for a general strike."* [Mett, **Op. Cit.**, p. 164] The Cheka confirms this event, reporting to Zinoviev on March 8th that *"[a]t a rally of workers of the Arsenal Plant a resolution was passed to join the Kronstadt uprising. The general meeting had elected a delegation to maintain contact with Kronstadt."* This delegation had already been arrested. This was a common practice and during this period the Cheka concentrated its efforts on the leaders and on disrupting communication: all delegates to other workplaces, all Mensheviks and SRs who could be found, all speakers at rallies were being arrested day after day. Thus the Communists *"suppressed the workers' uprising in Petrograd in the first days of March."* Unlike the Kronstadt sailors, the workers did not have weapons and *"were essentially defenceless vis-a-vis the Cheka."* [V. Brovkin, **Op. Cit.**, p. 396]

The state of siege was finally lifted on the 22nd of March, five days after the crushing of Kronstadt. The city had been *"appeased by [economic] concessions and cowed by the presence of troops."* [Avrich, **Op. Cit.**, p. 200] In these circumstances, is it surprising that the Petrograd workers did not join in the rebellion? So Trotsky is insulting the intelligence of his readers by arguing that the lack of support in Petrograd for Kronstadt reflected *"class lines."* Indeed, by failing to mention (to use Emma Goldman's words) *"the campaign of slander, lies and calumny against the sailors"* conducted by the Soviet Press (which *"fairly oozed poison against the sailors"*) or that *"Petrograd was put under martial law"* Trotsky, quite clearly, *"deliberately falsifies the facts."* [*"Trotsky Protests Too Much"*, **Op. Cit.**, p. 264] In short:

> "Here again Trotsky is saying things which are quite untrue. Earlier on we showed how the wave of strikes had started in Petrograd and how Kronstadt had followed suit. It was against the strikers of Petrograd that the Government had to organise a special General Staff: the Committee of Defence. The repression was first directed against the Petrograd workers and against their demonstrations, by the despatch of armed detachments of Koursantys.
>
> "But the workers of Petrograd had no weapons. They could not defend themselves as could the Kronstadt sailors. The military repression directed against Kronstadt certainly intimidated the Petrograd workers. The demarcation did not take place

> 'along class lines' but according to the respective strengths of the organs of repression. The fact that the workers of Petrograd did not follow those of Kronstadt does not prove that they did not sympathise with them. Nor, at a later date, when the Russian proletariat failed to follow the various 'oppositions' did this prove that they were in agreement with Stalin! In such instances it was a question of the respective strengths of the forces confronting one another." [Mett, **Op. Cit.**, pp. 191–2]

Not that this was the first time Trotsky confused force with class. In 1920 he had defended the fact *"of having substituted for the dictatorship of the Soviets the dictatorship of our party"* by arguing that *"it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party"* and that there is *"no substitution at all"* when the *"power of the party"* replaces that of the working class. The rule of the party *"has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour."* [**Terrorism and Communism**, p. 109] He continued:

> *"But where is your guarantee, certain wise men ask us, that it is just your party that expresses the interests of historical development? Destroying or driving underground the other parties, you have thereby prevented their political competition with you, and consequently you have deprived yourselves of the possibility of testing your line of action.*
>
> *"This idea is dictated by a purely liberal conception of the course of the revolution. In a period in which all antagonisms assume an open character, and the political struggle swiftly passes into a civil war, the ruling party has sufficient material standard by which to test its line of action, without the possible circulation of Menshevik papers. Noske [in Germany] crushes the Communists, but they grow. We have suppressed the Mensheviks and the S.R.s — and they have disappeared. This criterion is sufficient for us."* [**Op. Cit.**, pp. 109–10]

An interesting criterion, to say the least. By this logic Hitler expressed the *"interests of historical development"* when the German Communists and Trotskyists *"disappeared"* by leaps and bounds. Similarly, the Trotskyists in Russia *"disappeared"* under Stalin. Is this a Trotskyist justification of Stalinism? After all, in November 1927, the Left Opposition called for workers to demonstrate in its support during the 10th anniversary celebrations of the October Revolution. The workers did not heed their call, leading neo-Trotskyist Tony Cliff to lament *"the passivity of the mass of the workers, their lack of will to fight for the Opposition"*. This lack of response was critical for the success of Stalinism: *"For the ruling group to win it needed the passivity of the mass of the workers, while the Opposition needed the activity and consciousness of the masses for success."* [**Trotsky**, vol. 3, p. 263] So, if we apply the Leninist arguments against Kronstadt to this then, surely, we must conclude that the fact the workers remained passive shows that the Stalinists represented the "proletarian revolution" while the Trotskyists represented "petty bourgeois reaction"? That the Left Opposition proclaimed its proletarian credentials matters little, as Trotsky reminded us as regards the Kronstadt rebels, *"Marx has said that it is impossible to judge either parties or peoples by what they say about themselves"*. [Lenin and Trotsky, **Kronstadt**, p. 88] Likewise, noting the repressive nature of the regime in 1927 to explain this passivity would be acceptable if the repression in Petrograd before, during and after the Kronstadt rebellion was not ignored by the Trotskyists.

Rather than being an irrefutable case against Kronstadt Trotskyists think it is, all that the isolation of Kronstadt proves is the power of the repressive system the rebels and the Russian masses faced.

On this theme, we can see the depths which Trotskyists go to re-write history from Pierre Frank's *"Introduction"* to the work **Kronstadt**. He decides to quote Paul Avrich's work (after, of course, warning the reader that Avrich *"is not a Bolshevik or a Trotskyist"* and his *"political features are blurred"*) and states that Avrich *"done his work conscientiously, without skipping over the facts."* It is a shame that the same cannot be said of Frank who states that Avrich *"discusses the strikes in Petrograd preceding Kronstadt and comes to the following conclusion"*:

> "For many intellectuals and workers, moreover, the Bolsheviks, with all their faults, were still the most effective barrier to a White resurgence and the downfall of the revolution.
>
> "For these reasons, the strikes in Petrograd were fated to lead a brief existence. Indeed, they ended almost as suddenly as they had begun, never having reached the point of armed revolt against the regime." [quoted by Frank, Lenin and Trotsky, **Op. Cit.**, pp. 24–25]

It is the *"moreover"* in the first paragraph that gives the game away. Avrich lists a few more reasons than the one given by Frank. Here is what Avrich actually lists as the reasons for the end of the strike wave:

> "after several days of tense excitement, the Petrograd disturbances petered out ... The concessions had done their work, for more than anything else it was cold and hunger which had stimulated popular disaffection. Yet there is no denying that the application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities had been indispensable in restoring order. Particularly impressive in this regard was the discipline shown by the local party organisation. Setting aside their internal disputes, the Petrograd Bolsheviks swiftly closed ranks and proceeded to carry out the unpleasant task of repression with efficiency and dispatch ...
>
> "Then, too, the collapse of the movement would not have come so soon but for the utter demoralisation of Petrograd's inhabitants. The workers were simply too exhausted to keep up any sustained political activity . .. What is more, they lacked effective leadership and a coherent program of action. In the past these had been supplied by the radical intelligentsia ... [but they] were themselves in no condition to lend the workers any meaningful support, let alone active guidance ... they now felt too weary and terrorised ... to raise their voices in opposition. With most of their comrades in prison or exile, and some already executed, few of the survivors were willing to risk the same fate, especially when the odds against them were so overwhelming and when the slightest protest might deprive their families of their rations. For many intellectuals and workers, moreover, the Bolsheviks, with all their faults, were still the most effective barrier to a White resurgence and the downfall of the revolution.

> "For these reasons, the strikes in Petrograd were fated to lead a brief existence. Indeed, they ended almost as suddenly as they had begun, never having reached the point of armed revolt against the regime." [Paul Avrich, **Kronstadt**, pp. 49–51]

As can be seen, Frank "skips over" most of Avrich's argument and so the basis of his conclusion. Indeed, what Frank calls Avrich's "conclusion" cannot be understood by providing, as Frank does, the **last** reason Avrich gives for it. The dishonesty is clear, if not unexpected nor an isolated case.

John Rees, to provide another example, states that the revolt was *"preceded by a wave of serious but quickly resolved strikes."* No mention that the strikes were *"resolved"* by force nor that the Kronstadt revolt was not only *"preceded"* by the strikes but was directly inspired by them, was in **solidarity with them** and raised many of the same demands. Similarly, he argues that the Kronstadters' *"insistence that they were fighting for a 'third revolution', freedom of expression and for 'soviets without parties' [although, as Avrich notes, they **never** raised that slogan and so we have to wonder who Rees is quoting here] has convinced many historians that this revolt was fundamentally distinct from the White Rebellions."* But this, apparently, is not the case as *"one must be careful to analyse the difference between the conscious aims of the rebels and the possible outcome of their actions. The Bolshevik regime still rested on the shattered remnants of the working class. The Kronstadt sailors' appeals to the Petrograd workers had met with little or no response."* [**Op. Cit.**, p. 61 and p. 63]

One has to wonder what planet Rees is on. After all, **if** the Bolsheviks **had** rested on the *"shattered remnants of the working class"* then they would **not** have had to turn Petrograd into an armed camp, repress strikes, impose martial law and arrest militant workers. The Kronstadt sailors' appeals *"met with little or no response"* due to the Bolshevik coercion exercised in those fateful days. To not mention the repression in Petrograd is to deliberately deceive the reader. That the Kronstadt demands would have met with strong response in Petrograd can be seen from the actions of the Bolsheviks (who did not rest upon the workers but rather arrested them). Given that the Kronstadt demands simply reflected those raised by the Petrograd strikers **themselves** we can safely say that Rees is talking nonsense (see section 4). Thus Rees' "class analysis" of the Kronstadt revolt is pathetic and has no bearing to the reality of the situation in Petrograd nor to the history of the revolt itself.

As can be seen, any attempt to use the relative inaction of the Petrograd workers as evidence of the class nature of the revolt has to be based on ignoring all the relevant facts of the situation. This can go so far as to selectively quote from academic accounts to present a radically different conclusion to that of the misused author's.

11 Were the Whites a threat during the Kronstadt revolt?

The lack of foreign intervention during the Kronstadt revolt suggests more than just the fact that the revolt was not a "White conspiracy." It also suggests that the White forces were in no position to take advantage of the rebellion or even support it. This is significant simply because the Bolsheviks and their supporters argue that the revolt had to be repressed simply because the Soviet State was in danger of White or foreign intervention. How much danger was there? According to John Rees, a substantial amount:

> *"The Whites, even though their armies had been beaten in the field, were still not finished — as the emigre response to the Kronstadt rising shows ... They had predicted a rising*

> *at Kronstadt and the White National Centre abroad raised a total of nearly 1 million French Francs, 2 million Finnish marks, £5000, $25,000 and 900 tons of flour in just two weeks; Indeed, the National Centre was already making plans for the forces of the French navy and those of General Wrangel, who still commanded 70,000 men in Turkey, to land in Kronstadt if the revolt were to succeed."* [**Op. Cit.**, pp. 63–4]

To back up his argument, Rees references Paul Avrich's book. We, in turn, will consult that work to evaluate his argument.

First, the Kronstadt revolt broke out months after the end of the Civil War in Western Russia. Wrangel had fled from the Crimea in November 1920. The Bolsheviks were so afraid of White invasion that by early 1921 they demobilised half the Red Army (some 2,500,000 men). Second, the Russian emigres *"remained as divided and ineffectual as before, with no prospect of co-operation in sight."* Third, as far as the last of the White Generals goes, Wrangel's forces were in no state to re-invade Russia. His troops were *"dispersed and their moral sagging"* and it would have taken *"months ... merely to mobilise his men and transport them from the Mediterranean to the Baltic."* A second front in the south *"would have meant almost certain disaster."* Indeed, in a call issued by the Petrograd Defence Committee on March 5th, they asked the rebels: *"Haven't you heard what happened to Wrangel's men, who are dying like flies, in their thousands of hunger and disease?"* The call goes on to add *"[t]his is the fate that awaits you, unless you surrender within 24 hours."* [Paul Avrich, **Kronstadt 1921**, p. 13, p. 219, p. 146 and p. 105]

Clearly, the prospect of a White invasion was slim. This leaves the question of capitalist governments. Avrich has this to say on this:

> *"Apart from their own energetic fund-raising campaign, the emigres sought the assistance of the Entente powers ... the United States government, loath to resume the interventionist policies of the Civil War, turned a deaf ear to all such appeals. The prospects of British aid were even dimmer ... The best hope of foreign support came from France ... the French refused to interfere either politically or militarily in the crisis."* [**Op. Cit.**, pp. 117–9]

The French government had also *"withdrew its recognition of Wrangel's defunct government"* in November 1920 *"but continued to feed his troops on 'humane grounds,' meanwhile urging him to disband."* [**Op. Cit.**, p. 105] The demobilising of the Red Army confirms that this threat was considered non-existent.

Thus, the claim that foreign intervention was likely seems without basis. Indeed, the Communist radio was arguing that *"the organisation of disturbances in Kronstadt have the sole purpose of influencing the new American President and changing his policy toward Russia. At the same time the London Conference is holding its sessions, and the spreading of similar rumours must influence also the Turkish delegation and make it more submissive to the demands of the Entente. The rebellion the* **Petropavlovsk** *crew is undoubtedly part of a great conspiracy to create trouble within Soviet Russia and to injure our international position."* [quoted by Berkman, *"The Kronstadt Rebellion"*, **Op. Cit.**, p. 71] Lenin himself argued on March 16th that *"the enemies"* around the Bolshevik state were *"no longer able to wage their war of intervention"* and so were launching a press campaign *"with the prime object of disrupting the negotiations for a trade agreement with Britain, and the forthcoming trade agreement with America"* for *"we see that what they fear most, from the prac-*

tical angle of international capital, is the resumption of proper trade relations. But they will fail in their attempts to disrupt them." [Lenin, **Collected Works**, vol. 32, p. 270]

Moreover, these governments had to take into account of its own working class. It was doubtful that they would, after years of war, been able to intervene, particularly if there was a clearly socialist revolt coming from below. Their own working class, in such a situation, would have prevented intervention by foreign capitalist states. This was, in fact, acknowledged in Lenin on 5 July 1921: *"we are not entirely isolated, since the whole international bourgeoisie is incapable of waging open war against us just now, because the whole working class, even though the majority is not yet communist, is sufficiently class-conscious to prevent intervention. The bourgeoisie is compelled to reckon with the temper of the masses even though they have not yet entirely sided with communism."* [**Op. Cit.**, p. 495]

So in spite of massive social unrest and the revolt of a key fortress protecting Petrograd, the Western powers took no action. The Whites were disorganised and could only raise non-military supplies (none of which reached Kronstadt). Could this situation have changed if Kronstadt had spread to the mainland? It is doubtful simply because the Western governments, as Lenin argued, had to take into account the anti-interventionist position of their own working classes. The Whites had no military forces available, as the Bolsheviks themselves admitted. Avrich notes it would have taken months for what was left of these forces to reach Kronstadt by which time soviet democracy would have been consolidated and ready to protect itself.

Even if we assume that Kronstadt had survived until the ice melted while Petrograd remained under Bolshevik dictatorship it, again, is doubtful that it would have been the basis for renewed White attacks. Neither Wrangel's troops nor foreign government forces would have been welcomed by Red Kronstadt. While non-military aid would have been welcome (i.e. food supplies and so on), it is hard to believe that the Conference of Delegates would have allowed troops to arrive or pass them by to attack Petrograd. Simply put, the Kronstadters were fighting for soviet power and were well aware that others may try to support the revolt for their own, anti-revolutionary, reasons (see section 7).

In short, the possibility of foreign intervention was negligible. The arguments of Lenin at the time, plus the demobilisation of the Red Army, all point in that direction. Moreover, the lack of response by Western governments during the revolt indicates that they were unlikely to take advantage of continuing unrest in Kronstadt, Petrograd and other towns and cities. Their working classes, sick of war and class consciousness enough to resist another intervention in Russia, would have been a factor in this apathetic response. Wrangel's troops, as the Bolsheviks were aware, were not a threat.

The only real threat to Bolshevik power was internal — from the workers and peasants the Bolsheviks claimed to be representing. Many of the deserters from the Red Army swelled the ranks of peasant guerrilla forces fighting the repressive and counter-productive food collection squads. In the Ukraine, the Bolsheviks were fighting the remnants of the Makhnovist army (a fight, incidentally, brought upon the Bolsheviks by themselves as they had betrayed the agreements made with the anarchist forces and attacked them once Wrangel had been defeated). In the towns and cities, the Bolsheviks faced general strikes, protests and mass meetings.

Thus the only danger facing the "soviet power" (i.e. Bolshevik power) was soviet democracy, a danger which had existed since the October revolution. As in 1918, when the Bolsheviks disbanded any soviet elected with non-Bolshevik majorities, they met the danger of soviet democracy with violence. The Bolsheviks were convinced that their own dictatorship was equivalent to

the revolution and that their power was identical to that of the working class. They considered themselves to be the embodiment of "soviet power" and it obviously did not bother them that the demand for free soviets can hardly be considered as actions against the power of the soviets.

In such circumstances, the Bolshevik government viewed the Kronstadt revolt **not** as socialists should but rather as a ruling class. It was suppressed for "reasons of state" and not to defend a revolutionary regime (which was, by this stage, revolutionary in name only). This is reflected in Paul Avrich's introduction which ends by suggesting that *"[e]ach side behaved in accordance with its own particular goals and aspirations. To say this is not to deny the necessity of moral judgment. Yet Kronstadt presents a situation in which the historian can sympathise with the rebels and still concede that the Bolsheviks were justified in subduing them. To recognise this, indeed, is to grasp the full tragedy of Kronstadt."* [**Op. Cit.**, p. 6] As anarchist Nicolas Walter suggests:

> *"But to recognise this is in fact to surrender the possibility of moral judgement and so to abdicate the responsibility of the historian. World history, as Hegel said, is world judgement; the historian is not just a mechanical recorder of facts, but also part of the human process he is investigating. If we sympathise with the Kronstadt rebels and still concede that the Bolsheviks were justified in subduing them — as indeed Victor Serge did — then we can sympathise with any rebels (the Paris Commune, say, or the plots against Hitler, Mussolini, and Franco) and still concede that any government is justified in subduing them."* [**Op. Cit.**, p. 152]

A socialist regime cannot be defended by proclaiming that they did the same as a capitalist regime would do in similar circumstances. The criteria must be higher as the goals it is meant to embody and pursue are meant to be higher — they are meant to reflect the goal of human liberation. To suggest that it can act the same as a regime dedicated to defending human exploitation and oppression shows a confusion of mind.

The only possible justification for maintaining the party dictatorship was the argument that soviet democracy would have led to the defeat of the Communists at the polls (which would mean admitting that it was a dictatorship **over** the proletariat and had been for some time). This would, it is argued, have resulted in (eventually) a return of the Whites and an anti-working class dictatorship that would have slaughtered the Russian workers and peasants *en masse*. As we note in section 13, this was the position of Victor Serge in his Memoirs and echoed by more sophisticated Leninists ever since. Yet, such a position is self-serving and could have been used by Stalin to justify **his** regime and, unsurprisingly enough, the Hungarian Stalinists argued after crushing the 1956 revolution that *"the dictatorship of the proletariat, if overthrown, cannot be succeeded by any form of government other than fascist counter-revolution."* [quoted by Andy Anderson, **Hungary '56**, p. 101] Moreover, such an argument ignores the awkward facts that Lenin's regime was by any objective measure an anti-working class dictatorship and that an even worse one did appear which **did** slaughter the Russian workers and peasants *en masse*, namely Stalinism.

Finally, why was the call that *"[b]ureaucratic autocracy must give place to Soviet democracy"* inevitably counter-revolution in 1921 when raised in Kronstadt but revolutionary when (apparently) raised by Trotsky in 1936? [**The Revolution Betrayed**, p. 289] After all, in 1936 Russia was still surrounded by capitalist countries which hated it as well as facing re-armed and belligerent fascist Germany, Italy and Japan rather than states weary and exhausted after the First

World War and facing internal revolts of their own. We will discuss this in section 13 and here simply note that, by opposing the Kronstadt revolt, Trotskyists *"weaken their own case, for if the demands for freely elected soviets, for freedom of expression (proletarian democracy) and for workers' management of production were wrong in 1921, why did they become partially correct in 1923? If in 1921 Lenin and Trotsky represented the 'real' interests of the workers (against the actual workers), why couldn't Stalin? Why couldn't Kadar in Hungary in 1956? The Trotskyist school of hagiography has helped to obscure the real lessons of the struggle against the bureaucracy."* [Maurice Brinton, *"Preface to Ida Mett's 'The Kronstadt Commune'"*, **Op. Cit.**, pp. 130–1]

12 Was the country too exhausted to allow soviet democracy?

Trotskyists have, in general, three main lines of attack with regards the Kronstadt revolt. The first was that it was simply a White General revolt (see section 6). The second is that the sailors of 1921 were not those of 1917 (see section 8). The third is that the country was too exhausted for the Bolshevik dictatorship to agree to the revolt's demands and introduce soviet democracy. The working class was decimated and in such circumstances, it is argued, objective conditions meant that soviet democracy was impossible and so the Bolsheviks had to maintain their dictatorship at all costs to defend what was left of the revolution. Leninist Pat Stack of the British SWP is typical of this approach:

> *"Because anarchists dismiss the importance of material reality, events such as the 1921 Kronstadt rising against the Bolshevik government in Russia can become a rallying cry. The revolutionary Victor Serge was not uncritical of the Bolshevik handling of the rising, but he poured scorn on anarchist claims for it when he wrote, 'The third revolution it was called by certain anarchists whose heads were stuffed by infantile delusions.'*
>
> *"This third revolution, it was argued, would follow the first one in February 1917 and the second in October. The second had swept away the attempts to create capitalist power, had given land to the peasants and had extracted Russia from the horrible imperialist carnage of the First World War. The revolution had introduced a huge literacy programme, granted women abortion rights, introduced divorce and accepted the rights of the various Russian republics to self-determination. It had done so, however, against a background of a bloody and horrendous civil war where the old order tried to regain power. Sixteen imperialist powers sent armies against the regime, and trade embargoes were enforced.*
>
> *"The reality of such actions caused huge suffering throughout Russia. The regime was deprived of raw materials and fuel, transportation networks were destroyed, and the cities began running out of food. By 1919 the regime only had 10 percent of the fuel that was available in 1917, and the production of iron ore in the same year stood at 1.6 percent of that in 1914. By 1921 Petrograd had lost 57 percent of its population and Moscow 44.5 percent. Workers were either dead, on the frontline of the civil war, or were fleeing the starvation of the city. The force that had made the revolution possible was being decimated .. .*
>
> *"The choice facing the regime in Russia was either to crush the uprising and save the revolution, or surrender to the rising and allow the forces of reaction to march in on*

> *their back. There was no material basis for a third way. A destroyed economy and infrastructure, a population faced with starvation and bloody war, and a hostile outside world were not circumstances in which the revolution could move forward. Great efforts would have to be made to solve these problems. There were no overnight solutions and preserving the revolutionary regime was crucial. Ultimately real solutions could only be found if the revolution were to spread internationally, but in the meantime to have any chance of success the regime had to survive. Only the right and the imperialist powers would have benefited from its destruction."* [*"Anarchy in the UK?"*, **Socialist Review**, no. 246]

As we discuss in the next section, Victor Serge's own mind was stuffed by infantile delusions on the nature of the regime he was part of and the possibility of a benevolent dictatorship. Here, we address the suggestion that objective circumstances meant that genuine socialist solutions to the problems facing the Russian Revolution were impossible.

The first thing to note is how disingenuous Stack is being. *"World history"*, as Marx himself noted, *"would indeed be very easy to make if the struggle were taken up only on condition of infallibly favourable chances"* [Marx, **Marx-Engels Collected Works**, vol. 44. p. 136] Revolutions have a habit of breaking out when circumstances are hardly ideal — the Paris Commune springs to mind — but that is not reason to oppose them. Indeed, Stack's fellow party member provides this very quote by Marx against those who dismiss the Bolshevik revolution as a complete delusion due to the backwardness of the country, arguing that *"[t]he unavoidable conclusion is that all the talk about 'premature' revolution ... is an **excuse** born of expediency, not a serious argument against revolutionary socialism."* [**Op. Cit.**, pp. 9–10] The **real** question is whether revolutionaries, when faced with a popular revolt for socialism, should side with the rebels or a bureaucratic, state-capitalist party dictatorship.

The second thing to note is that Anarchists, regardless of Stack's assertions, were and are well aware of the problems facing the revolution. Alexander Berkman (who was in Petrograd at the time) pointed out the *"[l]ong years of war, revolution, and civil struggle"* which *"had bled Russia to exhaustion and brought her people to the brink of despair."* [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 61] Like every worker, peasant, sailor and soldier in Russia, anarchists knew (and know) that reconstruction would not take place "overnight." The Kronstadters' recognised this in the first issue of their newspaper **Izvestiia**:

> *"Comrades and citizens, our country is passing through a tough time. For three years now, famine, cold and economic chaos have trapped us in a vice-like grip. The Communist Party which governs the country has drifted away from the masses and proved itself powerless to rescue them from a state of general ruination ... All workers, sailors and Red soldiers today can clearly see that only concentrated efforts, only the concentrated determination of the people can afford the country bread, wood and coal, can clothe and shoe the people and rescue the Republic from the impasse in which it finds itself."* [quoted in **No Gods, No Masters**, vol. 2, p. 183]

The Kronstadt ***Izvestiia*** of March 8 wrote that it was *"here in Kronstadt that the foundation stone was laid of the Third Revolution that will smash the last shackles on the toiler and open up before him the broad new avenue to socialist construction."* It stressed that the *"new revolution will*

rouse the toiling masses of the Orient and Occident. For it will offer the example of fresh socialist construction as opposed to mechanical, governmental 'Communist' construction." [**Op. Cit.**, p. 194] Clearly, the Kronstadt rebels knew that construction would take time and were arguing that the only means of rebuilding the country in a socialist direction was via the participation of what of left of the working class and peasantry in free class organisations like freely elected soviets and unions. Rather than wasting resources — both human and material — on repressing their strikes and revolts, Kronstadt's success would have seen these used for reconstruction.

So, for example, the partial freeing of the economy from the Bolshevik bureaucracy expressed by the New Economic Policy (NEP) saw factory output rise by over 40% between 1920 and 1921 and by a further 30% between 1921 and 1922 while agriculture *"too made remarkable strides forward."* [Robert Service, **The Bolshevik Party in Revolution**, p. 160] Victor Serge recalled how the NEP *"was, in the space of a few months, already giving marvellous results. From one week to the next, the famine and the speculation were diminishing perceptibly. Restaurants were opening again"*. [**Memoirs of a Revolutionary**, p. 147] Would workers' freedom and democracy not have had at least a similar result and have the benefit of not enriching a new boss class?

The experience of the revolt provides evidence that this analysis was far from utopian. A Finish reporter in Kronstadt was struck by the *"enthusiasm"* of its inhabitants, by their renewed sense of purpose and mission. Avrich argues that for a *"fleeting interval Kronstadt was shaken out if its listlessness and despair."* [**Kronstadt 1921**, p. 159] The sailors, soldiers and civilians sent their delegates to delegates, started to re-organise their trade unions and so on. Freedom and soviet democracy was allowing the masses to start to rebuild their society and they took the opportunity. This suggests that a similar policy implemented by the workers who had just organised general strikes, demonstrations and protest meetings all across Russia's industrial centres was neither impossible nor doomed to failure.

Indeed, this wave of strikes refutes Stack's claim that *"[w]orkers were either dead, on the front-line of the civil war, or were fleeing the starvation of the city. The force that had made the revolution possible was being decimated."* Clearly, a sizeable percentage of the workers were still working: approximately one-third of factory workers were still in Petrograd (the overall decrease of urban working people throughout Russia exceeded 50 percent [Avrich, **Op. Cit.**, p. 24]). So, yes, the size of the working class in 1921 **was** smaller in 1921 than it was in 1917 but the figures for May 1918 and 1920 were nearly identical. In 1920, the number of factory workers in Petrograd was 148,289 (which was 34% of the population and 36% of the number of workers in 1910). [Mary McAuley, **Op. Cit.**, p. 398] In January 1917, the number was 351,010 and in April 1918, it was 148,710. [S.A. Smith, **Red Petrograd**, p. 245] Thus factory worker numbers were about 40% of the pre-Civil War number and remained so throughout the Civil War. Does soviet democracy become invalid once a certain number of workers is reached? So we should remember that a proletarian core remained in every industrial town or city in Russia and, more importantly, this work force was capable of collective action and decision making in the face of state repression under Lenin from 1918 onwards (see section H.6.3). By the start of 1921, another strike wave surfaced and became near general strikes in many cities, including Petrograd and Moscow (see section 2). If the workers could organise strikes (and near general strikes at that), protest meetings and committees to co-ordinate their struggles, what could stop them starting to manage their own destinies and begin to rebuild an economy suffering under the counter-productive policies of a party dictatorship?

So, in stark contrast to Stack's claims, all across Russia in February 1921 the Russian working class were going on strike, organising meetings and demonstrations. In other words, **taking collective action** based on demands collectively agreed in workplace meetings. One factory would send delegates to others, urging them to join the movement which soon became a general strike in Petrograd and Moscow. In Kronstadt, workers, soldiers and sailors went the next step and organised a delegate conference. In other places they tried to do so, with various degrees of success. During the strikes in Petrograd *"workers from various plants elected delegates to the Petrograd Assembly of Plenipotentiaries"* which raised demands later championed in Kronstadt. Its activities and other attempts to organise collectively were obviously hindered by the fact the Cheka arrested *"all delegates to other enterprises"* the strikers sent. Brovkin states that following the example of Petrograd, *"workers in some cities set up assemblies of plenipotentiaries"* as well. In Saratov *"such a council grew out of a strike co-ordination committee."* [**Op. Cit.**, p. 393, p. 396 and p. 398]

Any claim that the Russian working class had no capacity for collective action seems invalidated by such events. If anything was going to shatter what was left of working class collective power it would have been the Bolshevik repression of these strikes which, by its very nature, atomised and individualised the masses in order to break the collective action being practised. Martial law, the use of armed patrols on the streets and in the factories, the closing and re-registration of an enterprise labour force were all designed to break the strike and atomise the workforce — these actions would not have been needed if the Russian working class was, as Stack claims, non-existent, atomised and incapable of collective action and decision making.

The fact that these strikes did not last longer of course suggests that the strikers could not sustain this activity indefinitely. However, this was more a product of state repression and the rations being withheld by the authorities to break the strike than any objectively predetermined impossibility of collective decision making. The workers may have been too exhausted to wage indefinite general strikes against a repressive state but that does not imply they could not practice collective decision making if that regime was replaced by a genuine soviet democracy. Likewise, the poor state of the Russian economy cannot be understood without reference to the negative impact of Bolshevik economic policies which made a bad situation far worse — both in terms of limiting economic activity and initiative as well as the powerful bureaucracy it had created. As Emma Goldman suggested:

> *"In the economic field this transformation must be in the hands of the industrial masses: the latter have the choice between an industrial State and anarcho-syndicalism. In the case of the former the menace to the constructive development of the new social structure would be as great as from the political State. It would become a dead weight upon the growth of the new forms of life ... It is only when the libertarian spirit permeates the economic organizations of the workers that the manifold creative energies of the people can manifest themselves and the revolution be safeguarded and defended. Only free initiative and popular participation in the affairs of the revolution can prevent the terrible blunders committed in Russia. For instance, with fuel only a hundred versts [about sixty-six miles] from Petrograd there would have been no necessity for that city to suffer from cold had the workers' economic organizations of Petrograd been free to exercise their initiative for the common good. The peasants of the Ukraina would not have been hampered in the cultivation of their land had they had access to the farm implements*

> *stacked up in the warehouses of Kharkov and other industrial centres awaiting orders from Moscow for their distribution. These are characteristic examples of Bolshevik governmentalism and centralisation, which should serve as a warning to the workers of Europe and America of the destructive effects of Statism."* [**My Disillusionment in Russia**, p. 253]

The fact, of course, is that the majority of what remained of the working class would not have voted Communist in free soviet elections. Thus political considerations have to be factored in when evaluating Stack's arguments. Likewise, he makes no mention of the Bolshevik orthodoxy on the necessity of party dictatorship nor makes any comments on the Bolshevik embrace of centralised economic and political structures and their obvious negative impact on the situation. Rather all the blame for the terrible economic situation he describes is laid purely at the feet of the counter-revolution — a position which, at best, is a half-truth and deliberately obscures the failure of Bolshevik policies. Nor was it believed at the time, for as Berkman summarised *"the workers of Petrograd ... charged that, aside from other causes, Bolshevik centralisation, bureaucracy, and autocratic attitude toward the peasants and workers were directly responsible for much of the misery and suffering of the people."* [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 61] As such, it takes an impressive amount of gall to argue that we must support the repressive actions of a party dictatorship because the nation is exhausted when it is the case that *"the dictatorship had paralysed the initiative of both the city proletariat and the peasantry."* [Goldman, *"Trotsky Protests Too Much"*, **Op. Cit.**, p. 263]

Incredibly, Stack fails to even mention the power and privileges of the bureaucracy at the time. Officials got the best food, housing and so on. The lack of effective control or influence from below ensured that corruption was widespread. One of the leaders of the Workers' Opposition gives us an insight of the situation which existed at the start of 1921:

> "The rank and file worker is observant. He sees that so far ... the betterment of the workers' lot has occupied the last place in our policy ... We all know that the housing problem cannot be solved in a few months, even years, and that due to our poverty, its solution is faced with serious difficulties. But the facts of ever-growing inequality between the privileged groups of the population in Soviet Russia and the rank and file workers, 'the frame-work of the dictatorship', breed and nourish the dissatisfaction.
>
> "The rank and file worker sees how the Soviet official and the practical man lives and how he lives ... [It will be objected that] 'We could not attend to that; pray, there was the military front.' And yet whenever it was necessary to make repairs to any of the houses occupied by the Soviet institutions, they were able to find both the materials and the labour." [Alexandra Kollontai, **The Workers' Opposition**, p. 10]

A few months earlier, the Communist Yoffe wrote to Trotsky expressing the same concerns. *"There is enormous inequality,"* he wrote, *"and one's material position largely depends on one's post in the party; you'll agree that this is a dangerous situation."* [quoted by Orlando Figes, **A People's Tragedy**, p. 695] Indeed, part of the factors resulting in Kronstadt was *"the privileges and abuses of commissars, senior party functionaries and trade union officials who received special rations, allocations and housing and ... quite openly enjoying the good life."* [Getzler, **Kronstadt 1917–1921**, p. 210] As one historian summarised:

> *"Between the Eighth Congress (March 1919) and the Tenth, the party grew from 310,000 to 730,000 … Worker members comprised 41 per cent of the membership, as opposed to 60 per cent in 1917, but most of these were workers by social origin who no longer worked on the factory floor, having been promoted to positions in the state administration, economic organs, or the Red Army. The rest of the membership was more or less equally divided between peasants (most soldiers) and white-collar employees (most of whom worked in the state apparatuses. On the eve of the Tenth Party Congress, L.B. Krasin declared: 'The source of the woes and unpleasantness that we are currently experiencing is the fact that the Communist Party consists of 10% convinced idealists, and 90% hangers-on without consciences, who have joined the party in order to get a position.' Krasin articulated a growing sense that the party had been hijacked by careerists; and if the purge of 1921 is any guide, he was right … many rank-and-file party members began vociferously to attack the privileges enjoyed by 'those at the top'. In June 1920 Preobrazhenskii reported to the Central Committee that the 'majority of rank-and-file members' supported slogans such as 'Down with the privileged caste of the communist elite!' … in September 1920 … a commission was set up to investigate 'Kremlin privileges.' Its recommendations were never implemented … [Even party members showed] exasperation at red tape and careerism [as well as] disaffection at the arbitrary transfers of cadres and the substitution of political departments, such as Trotsky had created in the Red Army, for party committees … it was clear that proletarians promoted into positions of authority often behaved little differently from those officials who had moved seamlessly from positions in tsarist ministries or zemstvos into commissariats or soviets."* [S.A. Smith, **Russia in Revolution**, pp. 212–3]

As such, to talk about anarchists dismissing the importance of material reality and a *"revolutionary regime"* while ignoring the inequalities in power and wealth, and the bureaucratisation and despotism which were their root, is definitely a case of the pot calling the kettle black! It means joining Lenin in having *"no inkling that the state itself could become an instrument of exploitation and showed little understanding of how the Bolsheviks could themselves be 'captured' by the apparatus which they notionally controlled."* [S.A. Smith, **Op. Cit.**, p. 216]

The question for anarchists, as for the Kronstadt rebels, was what the necessary pre-conditions for the needed reconstruction were. Could Russia be re-built in a socialist way while being subject to a dictatorship which crushed every sign of working class protest and collective action? It is an infantile delusion to think that such a regime could achieve this and it ill-suits a self-proclaimed socialist to suggest that a benevolent dictatorship is possible, particularly one who claims to believe in "socialism from below." Surely the first step, as Kronstadt shows, would have to be the re-introduction of workers' democracy and power for only this would give allow expression to the creative powers of the masses and interest them in the reconstruction of the country. Continuing party dictatorship would **never** do this:

> *"by its very essence a dictatorship destroys the creative capacities of a people… The revolutionary conquest could only be deepened through a genuine participation of the masses. Any attempt to substitute an 'elite' for those masses could only be profoundly reactionary.*

> *"In 1921 the Russian Revolution stood at the cross roads. The democratic or the dictatorial way, that was the question. By lumping together bourgeois and proletarian democracy the Bolsheviks were in fact condemning both. They sought to build socialism from above, through skilful manoeuvres of the Revolutionary General Staff. While waiting for a world revolution that was not round the corner, they built a state capitalist society, where the working class no longer had the right to make the decisions most intimately concerning it."* [Mett, **Op. Cit.**, pp. 204–5]

Under the harsh material conditions facing Russia at the time, it goes without saying that the bureaucracy would utilise its position to gather the best resources around it. Stack fails to mention this and instead talks about the necessity of defending a "workers' state" in which workers had no power and where bureaucratic abuses were rampant. If anyone is denying reality, it is him. Thus Ciliga:

> *"The Soviet Government and the higher circles in the Communist Party applied their own solution [to the problems facing the revolution] of* ***increasing the power of the bureaucracy****. The attribution of powers to the 'Executive Committees' which had hitherto been vested in the soviets, the replacement of the dictatorship of the class by the dictatorship of the party, the shift of authority even within the party from its members to its cadres, the replacement of the double power of the bureaucracy and the workers in the factory by the sole power of the former — to do all this was to 'save the Revolution!' ... The Bureaucracy prevented the bourgeois restoration ... by eliminating the proletarian character of the revolution."* [*"The Kronstadt Revolt"*, **Op. Cit.**, p. 331]

Perhaps, in light of this, it is significant that, in his list of revolutionary gains from October 1917, Stack fails to mention what anarchists would consider the most important, namely workers' power, freedom, democracy and rights. But, then again, the Bolsheviks did not rate these gains highly either and were more than willing to sacrifice them to ensure their most important gain, state power. So when Stack argues that it was necessary to crush Kronstadt to *"save the revolution"* and *"preserv[e] the revolutionary regime"* we feel entitled to ask what was there left to save and preserve? The dictatorship and decrees of "Communist" leaders? In other words, party power. Yes, by suppressing Kronstadt Lenin and Trotsky saved the revolution: saved it for Stalin. This is hardly something to be proud of.

Ironically, given Stack's assertions that anarchists ignore *"material reality"*, anarchists had long predicted that a revolution would be marked by economic disruption. Kropotkin, for example, argued that it was *"certain that the coming Revolution ... will burst upon us in the middle of a great industrial crisis ... There are millions of unemployed workers in Europe at this moment. It will be worse when Revolution has burst upon us ... The number of the out-of-works will be doubled as soon as barricades are erected in Europe and the United States ... we know that in time of Revolution exchange and industry suffer most from the general upheaval ... A Revolution in Europe means, then, the unavoidable stoppage of at least half the factories and workshops."* He stressed that there would be *"the complete disorganisation"* of the capitalist economy and that during a revolution *"[i]nternational commerce will come to a standstill"* and *"the circulation of commodities and of provisions will be paralysed."* [**The Conquest of Bread**, pp. 69–70 and p. 191]

Elsewhere, Kropotkin argued that a revolution would *"mean the stoppage of hundreds of manufactures and workshops, and the impossibility of reopening them. Thousands of workmen will find no*

employment ... The present want of employment and misery will be increased tenfold." He stressed that *"the reconstruction of Society in accordance with more equitable principles **will** necessitate a disturbed period"* and argued that any revolution will be isolated to begin with and so (with regards to the UK) *"the imports of foreign corn will decrease"* as will *"exports of manufactured wares."* A revolution, he argued, *"is not the work of one day. It means a whole period, mostly lasting for several years, during which the country is in a state of effervescence."* To overcome these problems he stressed the importance of reconstruction from the bottom up, organised directly by working people, with local action being the basis of wider reconstruction. The *"immense problem — the re-organisation of production, redistribution of wealth and exchange, according to new principles — cannot be solved by ... any kind of government. It must be a natural growth resulting from the combined efforts of all interested in it, freed from the bonds of the present institutions. It must grow naturally, proceeding from the simplest up to complex federations; and it cannot be something schemed by a few men and ordered from above. In this last shape it surely would have no chance of living at all."* [**Act for Yourselves**, pp. 71–2, p. 67, pp, 72–3, pp. 25–6 and p. 26]

The Russian revolution confirmed all this. It had faced economic crisis all through 1917 and 1918. Indeed, by the spring of 1918 Russia was living through an almost total economic collapse, with a general scarcity of all resources and mass unemployment. According to Tony Cliff (the leader of the SWP) in the spring of 1918 Russia's *"[w]ar-damaged industry continued to run down. 'The bony hand of hunger' ... gripped the whole population ... One of the causes of the famine was the breakdown of transport ... Industry was in a state of complete collapse. Not only was there no food to feed the factory workers; there was no raw materials or fuel for industry. The oilfields of the Baku, Grozny and Emba regions came to a standstill. The situation was the same in the coalfields. The production of raw materials was in no better a state ... The collapse of industry meant unemployment for the workers."* [**Lenin**, vol. 3, pp. 67–9] The industrial workforce dropped to 40% of its 1917 levels. The similarities to Stack's description of the situation in early 1921 is striking.

The fact is that Lenin and Trotsky had argued that revolution inevitably meant civil war, economic crisis and so exceptional and difficult circumstances. They did not, for that reason, suggest that revolution was impossible. Thus, for example, Lenin in 1917 mocked those who argued that revolution was out of the question because *"the circumstances are exceptionally complicated."* He noted that **any** revolution, *"in its development, would give rise to exceptionally complicated circumstances"* and that it was *"the sharpest, most furious, desperate class war and civil war. Not a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances. If there were no exceptionally complicated circumstances there would be no revolution."* [**Collected Works**, vol. 26, pp. 118–9]

Does this mean that, for Leninists, soviet democracy was impossible in early 1918? After all, then the Russian Revolution also faced a *"destroyed economy and infrastructure, a population faced with starvation and bloody war, and a hostile outside world."* If these *"were not circumstances in which the revolution could move forward"* then it also applied in 1918 — in 1917, in fact — as well as in 1921. If so, then this means admitting that soviet democracy is impossible during a revolution, marked as it will always be by exceptionally difficult circumstances. Which, of course, means to defend party power and not soviet power and promote the dictatorship of the party over the working class, positions Leninists deny holding. Of course, as noted in section H.6, the Bolsheviks **in practice** were making soviet democracy impossible by suppressing soviets that elected the wrong people while the Bolshevik policies aiming to address these problems — which

in 1917 Lenin had proclaimed could only be solved by revolution and placing the Bolsheviks into power — made the problems worse by their centralised and top-down nature. To suggest that the Bolsheviks had to remain in power because the country was exhausted in part as a result of their policies is hard to take seriously.

So anarchists had predicted the problems facing the Russian Revolution decades previously and, given the lack of success of Bolshevik attempts to solve these problems via centralism, had also predicted the only way to solve them. Far from ignoring *"material reality"* anarchists have long been aware of the difficulties a revolution would face and had organised our politics around them. In contrast, Stack is arguing that these inevitable effects of a revolution create *"circumstances"* in which the revolution cannot *"move forward"*. If this is so, then revolution is an impossibility as it will always face economic disruption and isolation at some stage in its development, for a longer or shorter period. If we base our politics on the "best-case scenario" then they will soon be proven to be lacking.

Ultimately, Stack's arguments (and those like it) are the ones which ignore *"material reality"* by arguing that Lenin's state was a *"revolutionary regime"* and reconstruction could be anything but to the advantage of the bureaucracy without the active participation of what was left of the working class and the independence of their class organisations — unions, soviets and co-operatives. Indeed, the logic of his argument would mean rejecting the idea of socialist revolution **as such** as the problems he lists will affect **every** revolution and had affected the Russian Revolution from the start. So while the problems facing the Russian working class were difficult in the extreme in 1921, we should not forget that many of which were due to the results of Bolshevik economic policies which compounded economic chaos via centralisation as well as the inevitable results of monopolising political power which meant the crushing of all independent working class organisation and initiative. They could **never** be solved by someone else bar the thousands of workers taking strike action all across Russia at the time: *"And if the proletariat was that exhausted how come it was still capable of waging virtually total general strikes in the largest and most heavily industrialised cities?"* [Ida Mett, **Op. Cit.**, p. 202]

The problem after October 1917 was that when the proletariat **did** organise itself, it was repressed as counterrevolutionary by the Bolsheviks. The reconstruction from below, the organisation of the proletariat, automatically came into conflict with party power. The workers and peasants could not act because soviet and trade union democracy would have ended Bolshevik dictatorship — little wonder the country was *"exhausted"* as all the means of addressing the situation were systematically smashed by the ruling elite.

Indeed, Serge himself admitted as much when he noted that *"[t]hrough its intolerance and its arrogation of an absolute monopoly of power and initiative in all fields, the Bolshevik regime was floundering in its own toils, spreading a sort of general paralysis throughout the country ... By freeing the State-strangled cooperatives, and inviting various associations to take over the management of different branches of economic activity, an enormous degree of recovery could have been achieved straightaway ... [this] would have caused less inconvenience than did our stringently bureaucratic centralisation, with its muddle and paralysis ... However, since the Bolshevik mind had already ordained other solutions, it was a vision confined to the realms of pure theory."* [**Op. Cit.**, pp. 147–8] Serge at the time, however, did not seem to support the one part of the party, the Workers' Opposition, which did raise this idea — albeit within the context of a party dictatorship (see section 2 of the appendix on "Were any of the Bolshevik oppositions a real alternative?"). Trotsky dismissed this suggestion precisely because of the threat this posed to the party's position: *"we*

are against it. Why ? ... Because, in the first place, we want to retain the dictatorship of the Party, and, in the second place, because we think that the [democratic] way of managing important and essential plants is bound to be incompetent and prove a failure from an economic point of view." [quoted by James Bunyan, **The Origin of Forced Labor in the Soviet State, 1917–1921**, p. 252]

So, as far as *"material reality"* goes, it is clear that it is Stack who ignores it, not anarchists nor the Kronstadt rebels. Both recognised that the country was in dire straits and that a huge effort was required for reconstruction. The material basis at the time offered two possibilities for reconstruction — either from above or from below. Such a reconstruction could **only** be socialist in nature if it involved the direct participation of the working masses in determining what was needed and how to do it. In other words, the process had to start **from below** and no central committee utilising a fraction of the creative powers of the country could achieve it. Such a bureaucratic, top-down re-construction would rebuild the society in a way which benefited a few. Which, of course, was what happened.

What is surprising is that any self-proclaimed socialist could think otherwise. In a country with no workers' democracy, where the masses do not have even limited control over those in power, where all power and rights are held by the administration, where workers can do nothing on their own initiative, it is naive in the extreme to believe that any social reconstruction will not reflect the interests of the ruling bureaucracy. To suggest so, as Stack does, means ignoring the class reality of the situation in favour of wishful thinking over the possibility of benevolent dictatorship. It means ignoring that by crushing Kronstadt, the Bolsheviks not only crushed the Third Revolution but also paved the way for Stalinism.

Ultimately, Stack's arguments fail to convince. As noted, his ideological gurus clearly argued that revolution without civil war and economic exhaustion was impossible. Sadly, the means to mitigate the problems of Civil War and economic crisis (namely workers' self-management and control) inevitably came into conflict with party power and a vision of socialism premised on the efficiency of centralisation and could not be encouraged. If Bolshevism cannot meet the inevitable problems of revolution and maintain the principles it pays lip-service to (i.e. soviet democracy and workers' control) then it clearly does not work and should be avoided. This argument, in short, represents the bankruptcy of Bolshevik ideology rather than a serious argument against the Kronstadt revolt.

13 Was there a real alternative to Kronstadt's *"Third Revolution"*?

Another Trotskyist argument against Kronstadt and in favour of Bolshevik repression is related to the country was exhausted argument we discussed in the last section. It finds its clearest expression in Victor Serge's argument:

> "After many hesitations, and with unutterable anguish, my Communist friends and I finally declared ourselves on the side of the Party. This is why. Kronstadt had right on its side. Kronstadt was the beginning of a fresh, liberating revolution for popular democracy: 'The Third Revolution!' it was called by certain anarchists whose heads were stuffed with infantile illusions. However, the country was exhausted, and production practically at a standstill; there was no reserves of any kind, not even reserves of stamina in the hearts of the masses. The working-class **elite** that

had been moulded in the struggle against the old regime was literally decimated. The Party, swollen by the influx of power-seekers, inspired little confidence ... Soviet democracy lacked leadership, institutions and inspiration; at its back there were only masses of starving and desperate men.

"The popular counter-revolution translated the demand for freely-elected soviets into one for 'Soviets without Communists.' If the Bolshevik dictatorship fell, it was only a short step to chaos, and through chaos to a peasant rising, the massacre of the Communists, the return of the emigres, and in the end, through the sheer force of events, another dictatorship, this time anti-proletarian ... In these circumstances it was the Party's duty to make concessions, recognising that the economic regime was intolerable, but not to abdicate power." [**Memoirs of a Revolutionary**, pp. 128–9]

Serge is at least being honest here and not suggesting that it was a White Guard plot or a product of backward peasant recruits. Still, he supported the Bolsheviks, considering them as the only possible means of defending the revolution. Some of the more sophisticated modern day Leninists follow this line of reasoning and quote Trotsky somewhat out of context to proclaim that crushing the revolt was *"a tragic necessity"*. [Lenin and Trotsky, **Kronstadt**, p. 98] They want us to believe that the Bolsheviks were defending the remaining gains of the revolution and ensuring that no counter-revolution took place indirectly by allowing the Russian workers soviet democracy. The hope was that the revolution could survive until it spread internationally. As John Rees put it: *"But ultimately, without a revival of struggle in Russia or successful revolution elsewhere, the [Left] Opposition was doomed to failure. That, however, could not be known in advance."* [**Op. Cit.**, p. 69] This is echoed in different ways by other Leninists — the Bolsheviks had to crush Kronstadt to secure the revolution until it could spread to other countries, particularly advanced industrial nations. The isolation of the revolution ensured the victory of the bureaucracy and Stalin.

Let us accept Serge's argument and those who, like Rees, echo it. This means that the only alternative to the *"Third Revolution"* would have been self-reform of the party dictatorship and, therefore, of the soviet state. Such an attempt was made after 1923 by the **Left Opposition** headed by Trotsky. Given the logic of such arguments, this is the only option left for Leninists. How viable was this alternative? Could the soviet dictatorship reform itself? Was soviet democracy more of a danger than the uncontrolled dictatorship of a party within a state marked by already serious levels of corruption, bureaucracy and despotism? History provides the answer with the rise of Stalin.

However, given how widespread this infantile delusion is within the Leninists, more needs to be said. From a libertarian perspective, there are three main problems with this argument. First, it ignores the reality of the Bolshevik regime. Second, it ignores the politics of the Left Opposition. Third, it ignores how Bolshevik ideology would have impacted on any other revolution. We will discuss each in turn after making an obvious point — libertarian socialists who defend the Kronstadt revolt and oppose the actions of the Bolsheviks are not foolish enough to argue that Kronstadt's *"Third Revolution"* would have definitely succeeded as every revolution is a gamble and may fail. Ante Ciliga put it well:

*"Let us consider, finally, one last accusation which is commonly circulated: that action such as that at Kronstadt could have **indirectly** let loose the forces of the counter-*

> *revolution. It is **possible** indeed that even by placing itself on a footing of workers' democracy the revolution might have been overthrown; but what is **certain** is that it has perished, and that it has perished on account of the policy of its leaders. The repression of Kronstadt, the suppression of the democracy of workers and soviets by the Russian Communist party, the elimination of the proletariat from the management of industry, and the introduction of the NEP, already signified the death of the Revolution."* [*"The Kronstadt Revolt"*, **Op. Cit.**, p. 335]

No revolution is guaranteed to succeed. The same with Kronstadt's *"Third Revolution."* Its call for soviet democracy may have led to a return of the Whites, that is possible just as it was possible in 1917. One thing is sure, by maintaining the Bolshevik dictatorship the Russian Revolution **was** crushed and (Stalinist) counter-revolution ensued. As such, we must always remember what the alternatives were: *"Were there not real dangers in the democratic way? Was there no reason to fear reformist influences in the soviets, if democracy had been given free rein? We accept that this was a real danger. But it was no more of a danger than what inevitably followed the uncontrolled dictatorship of a single party".* [Mett, **Op. Cit.**, p. 204]

After all, the most obvious objection is what gains, exactly? The only gains that remained were Bolshevik party power and nationalised industry – both of which excluded the real gains of the Russian Revolution from a socialist perspective (namely soviet power, the right to independent unions and to strike, freedom of assembly, association and speech for working people, the beginnings of workers' self-management of production and so on). Indeed, both "gains" were the basis for the Stalinist bureaucracy's power.

Unfortunately for the **Left Opposition**, the bureaucracy had gained experience in repressing working class struggles since early 1918 — most obviously in breaking the wave of strikes in 1921 and crushing the Kronstadt rebellion itself. As such, it is incredulous to suggest as Rees does that *"the regime was left stranded, the well-head of renewal and thorough reform — the activity of the workers — had dried to a trickle ... To appeal outside the machine, as the Workers' Opposition had wanted, was impossible. This is the tragedy of Lenin's last fight and of the Left Opposition. They knew the problem but the means at their disposal was not equal to the task. Hence the paucity of the measures they advocated: self reform of the bureaucracy."* [**Op. Cit.**, p. 68] The "well-head" of workers' struggle did not dry-up by some natural process — it was deliberately blocked by the Bolshevik regime itself:

> *"After the launch of the NEP, the state's strategy in dealing with strikes in the nationalised sector remained fairly uniform throughout the 1920s. Its priority was to compel workers to return to their jobs as quickly as possible for which the full forces of management, Party, unions, and state would be mobilised as required ... the Bolshevik leadership ... feared a repeat of the escalation and politicisation of worker discontent that had marked the end of War Communism ... Hence the general strategy employed by the state when faced by a strike was to attempt to pacify the bulk of striking workers, while seeking to 'isolate' or eliminate instigators and organisers. In cases where these measures failed ... a re-registration of the workforce, closure of the factory, or mass dismissals would be announced ... From the start, the CheKa/OGPU played a leading role in eradicating strikes, making arrests, bringing in its special troops to deal with unrest, and using its intelligence network to monitor the shopfloor and identify activists"* [An-

drew Pospielovsky, *"Strikes during the NEP"*, pp. 1–34, **Revolutionary Russia**, Vol. 10, No. 1, pp. 17–8]

These techniques had all been used and perfected from 1918 onwards. Thus the strike wave of 1923 was repressed by the same methods as those in 1921 with the name of the secret police being the only difference (from Cheka to GPU):

> *"Trade unions, reluctant to disturb the industrial revival, refused to press claims. Finally, 'wild' strikes broke out in many factories, spread, and were accompanied by violent explosions of discontent ... The threat of a general strike was in the air, and the movement seemed on the point of turning into a political revolt. Not since the Kronstadt rising had there been so much tension in the working class and so much alarm in ruling circle ... the remnants of the anti-Bolshevik parties ... [were] thoroughly suppressed [and] had been inactive ... the G.P.U arrested [the Workers' Group] ... where there is much inflammable material a few sparks may produce a conflagration. The party leaders sought to stamp out the sparks. They determined to suppress the Workers' Group and the Workers' Truth ... Trotsky ... had no sympathy with the crude and anarchic tub-thumping. Nor was he inclined to countenance industrial unrest".* [Isaac Deutscher, **The Prophet Unarmed**, pp. 88–9]

The *"leaders of the 1923 opposition did ... nothing to protest at the repression of dissidents ... Trotsky, in the very letters to the politburo in which he fired his first broadsides against the 'unhealthy regime' and lack of internal party democracy, supported repressive action against the far left."* Indeed, he *"welcomed an instruction by Dzerzhinskii to party members immediately to report 'any groupings within the party', i.e. the Workers Group and Workers Truth, not only to the C[entral] C[ommittee] but also to the G.P.U., and emphasized that making such reports was 'the elementary duty of every party member'."* [Simon Pirani, **The Russian revolution in retreat, 1920–24**, p. 215] Trotsky was clear that *"it is obvious that there can be no toleration of the formation of groupings [within the party] whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers' Truth and Workers' Group."* [**Challenge of the Left Opposition (1923–25)**, p. 408] By "dictatorship of the proletariat," Trotsky meant the dictatorship of the party as both these opposition groups — unlike the Left Opposition — advocated genuine soviet democracy.

Rees suggests that the Stalinist bureaucracy could betray the revolution without *"an armed counter-revolutionary seizure of power"* and so *"no martial law, no curfew or street battles"* because of *"the atomisation of the working class."* [**Op. Cit.**, p. 69] However, the atomisation was a product of the armed counter-revolutionary activities of Lenin and Trotsky after 1918 which reached their culmination when in 1921 they broke the strikes in Petrograd (and elsewhere) by means of martial law and curfew and crushed the sailor rebellion by battles in the streets of Kronstadt. In 1927–8, the workers had no interest in which branch of the bureaucracy would govern and exploit them and so remained passive. Rees fails to see that there **was** martial law, curfew and street battles but they occurred in 1921, not 1928. The rise of Stalinism was the victory of one side of the new bureaucratic class over another but that class had defeated the working class in March 1921.

Not that the Left Opposition's political platform could have saved the revolution: it was utopian in that it urged the party and state bureaucracy to reform itself based upon maintaining

the Bolshevik party's dictatorship as well as one-man management in the workplace. As such, it did not get at the roots of the problem, namely the state-capitalist nature of the regime and Bolshevik ideology. The theoretical limitations of the "Left Opposition" are discussed in more detail in section 3 of the appendix on "Were any of the Bolshevik oppositions a real alternative?", here we will restrict ourselves to looking at **The Platform of the Opposition** written in 1927.

While uttering many warm words about workers', trade union and soviet democracy — for which the Kronstadt sailors and were branded "White Guardists" and "counter-revolutionary" — it also affirmed *"the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party."* While bemoaning that the *"growing replacement of the party by its own apparatus is promoted by a 'theory' of Stalin's which denies"* this, it repeats this principle by arguing that *"the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry."* [*"The Platform of the Opposition"*, **The Challenge of the "Left Opposition" (1926–27)**, p. 395, p. 439 and p. 441] Any split in the party or the formation of two parties represented an enormous danger to the revolution:

> "Nobody who sincerely defends the line of Lenin can entertain the idea of 'two parties' or play with the suggestion of a split. Only those who desire to replace Lenin's course with some other can advocate a split or a movement along the two-party road.
>
> "We will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party. It demands a proletarian party — that is, a party whose policy is determined by the interests of the proletariat and carried out by a proletarian nucleus. Correction of the line of our party, improvement of its social composition — that is not the two-party road, but the strengthening and guaranteeing of its unity as a revolutionary party of the proletariat." [**Op. Cit.**, pp. 440–1]

We can note, in passing, the interesting notion of party (and so "proletarian" state) policy *"determined by the interests of the proletariat and carried out by a proletarian nucleus"* but which is **not** determined **by** the proletariat itself. Which means that the policy of the "workers' state" must be determined by some other (unspecified) group and not by the workers. What possibility can exist that this other group actually knows what is in the interests of the proletariat? None, of course, as any form of democratic decision can be ignored when those who determine the policy consider the protests of the proletariat to be not *"in the interests of the proletariat"* — hence the pressing need for *"the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party."* Needless to say, the Platform makes no call for industrial democracy but rather proclaims that the *"appropriation of surplus value by a workers' state is not, of course, exploitation"* while also acknowledging the existence of a *"swollen and privileged administrative apparatus [which] devours a very considerable part of our surplus value"* while *"all the data testify that the growth of wages is lagging behind the growth of the productivity of labour."* [**Op. Cit.**, pp. 347–50]

As Anton Ciliga recalled when in a Stalinist prison in the early 1930s, the imprisoned Trotskyists retained this perspective for *"the argument of freedom to choose one's party"* was *"condemned formerly by Lenin, by Trotsky, and by the **Decemists**. And even then the major part of the **Decemists** and almost all the Trotskyists continued to consider that 'freedom of party' would be 'the*

end of the revolution'. 'Freedom to choose one's party — that is Menshevism,' was the Trotskyists' final verdict. 'The proletariat is socially homogenous and that is why its interests can only be represented by a single party,' the ***Decemist*** *Davidov wrote. 'And why should not democracy within the party be coupled with its dictatorship outside?' the* ***Decemist*** *Nyura Yankovskaya wanted to know."* He concluded the Trotskyists' *"outlook was not that very different from that of the Stalinist bureaucracy; they were slightly more polite and human, that was all."* [**The Russian Enigma**, p. 280 and p. 263] This reflect the flawed class analysis of Leninism:

> *"Trotskyism as well as Stalinism saw ... two social orders: the proletariat versus bourgeoisie, the latter embracing the kulaks and the relics of the former ruling classes ... I had come to the conclusion that three social systems were partaking in the struggle: State capitalism, private capitalism and socialism, and that these three systems represented three classes: the bureaucracy, the bourgeoisie (including the kulaks) and the proletariat. The difference lay in that Stalinists and Trotskyism saw State capitalism as socialism and bureaucracy as proletariat. Trotsky as well as Stalin wished to pass off the State as being the proletariat, the bureaucratic dictatorship over the proletariat as the proletarian dictatorship, the victory of State capitalism over both private capitalism and socialism as a victory of the latter. The difference between Trotsky and Stalin ... [was that] Trotsky perceived and stressed the gaps and bureaucratic deformations of the system."* [Ciliga, **Op. Cit.**, pp. 103–4]

The bureaucratic machine outnumbered the party — there were over five million state officials in 1921 compared to around 730,000 party members (reduced to 515,000 in January 1922 after a purge). The grim reality was that *"those enjoying dominant positions in the State apparatus ... had been consolidating their power and detaching themselves more and more from the workers. The bureaucracy was already assuming alarming proportions. The State machine was in the hands of a single Party, itself more and more permeated by careerist elements. A non Party worker was worth less, on the scale of everyday life, than an ex bourgeois or nobleman, who had belatedly rallied to the Party. Free criticism no longer existed. Any Party member could denounce as 'counter revolutionary' any worker simply defending his class rights and his dignity as a worker."* [Mett, **Op. Cit.**, p. 140]

Likewise, within the party the higher echelons held power and had been more than willing to use it against internal dissidents long before 1921. As such, it ignored the reality of the Bolshevik party to appeal to the party machine to introduce *"in deeds and not words a democratic regime. Do away with administrative pressure tactics. Stop the persecution and expulsion of those who hold independent opinions about party questions."* [Trotsky, **Op. Cit.**, p. 407] It failed to note that these tactics were used by Lenin and Trotsky against Left-wing dissidents within the party after the October revolution.

The Left-Communists in early 1918, for example, were subject to such pressure. They were ousted from leading positions in the Supreme Economic Council in March 1918 and after their views were denounced by Lenin, a *"campaign was whipped up in Leningrad which compelled* ***Kommunist*** *[their paper] to transfer publication to Moscow ... After the appearance of the first issue of the paper a hastily convened Leningrad Party Conference produced a majority for Lenin and 'demanded that the adherents of* ***Kommunist*** *cease their separate organisational existence.'"* The paper lasted four issues, with the last having to be published as a private factional paper. The issue had been settled by a high pressure campaign in the Party organisation, backed by a barrage of

violent invective in the Party press and in the pronouncements of the Party leaders. The Workers' Opposition three years later also experienced it. At the Tenth Party congress, Kollontai (author of their platform) stated that the circulation of her pamphlet had been deliberately impeded. *"So irregular were some of these that the Moscow Party Committee at one stage voted a resolution **publicly** censuring the Petrograd organisation 'for not observing the rules of proper controversy.'"* The success of the Leninist faction in getting control of the party machine was such that *"there is serious doubt as to whether they were not achieved by fraud."* [Maurice Brinton, **The Bolsheviks and Workers' Control**, pp. 39–40, p. 75 and p. 77] Victor Serge witnessed the rigging of an election to ensure Lenin's victory in the trade union debate. [**Memoirs of a Revolutionary**, p. 123] Kollontai herself mentions (in early 1921) that comrades *"who dare to disagree with decrees from above are **still** being persecuted."* [our emphasis, **The Workers' Opposition**, p. 22] As Ida Mett noted:

> *"There is no doubt that the discussion taking place within the [Communist] Party at this time [in early 1921] had profound effects on the masses. It overflowed the narrow limits the Party sought to impose on it. It spread to the working class as a whole, to the solders and to the sailors. Heated local criticism acted as a general catalyst. The proletariat had reasoned quite logically: if discussion and criticism were permitted to Party members, why should they not be permitted to the masses themselves who had endured all the hardships of the Civil War?*
>
> *"In his speech to the Tenth Congress — published in the Congress Proceedings — Lenin voiced his regret at having 'permitted' such a discussion. 'We have certainly committed an error,' he said, 'in having authorised this debate. Such a discussion was harmful just before the Spring months that would be loaded with such difficulties.'"* [**Op. Cit.**, p. 143]

Unsurprisingly, the Tenth Congress voted to ban factions within the Party. The elimination of discussion in the working class led to its ban in the party. Having the rank-and-file of the Party discuss issues would give false hopes to the working class as a whole who may attempt to influence policy by joining the party (and, of course, vote for the wrong people or policies). Equally unsurprising, we discover the Platform stating that *"the dying out of inner-party democracy leads to a dying out of workers' democracy in general — in the trade unions, and in all other nonparty mass organisations."* [*"Platform of the Joint Opposition"*, **Op. Cit.**, p. 395] Ignoring the awkward fact that Kronstadt was crushed precisely for demanding this, as noted the opposite causation is correct: the dying out of workers' democracy in general leads to a dying out of inner-party democracy. Power monopolised by a single party means that all dissatisfaction becomes channelled through it — this cannot help but generate factions within the party as disagreements and interests need to be expressed somewhere. As the party dictatorship replaces the working masses, eliminating workers democracy by the dictatorship of a single party, democracy in that party must wither for if workers can join that party and influence its policies then the same problems that arose in the soviets and unions appear in the party. This necessitates a corresponding centralisation in power within the party as occurred in the soviets and unions, all to the detriment of rank and file power and control. This can be seen from the banning of factions within the party in early 1921:

> *"In March 1921, in the days of the Kronstadt revolt, which attracted into its ranks no small number of Bolsheviks, the 10th Congress of the party thought it necessary to resort to a prohibition of factions — that is, to transfer the political regime prevailing in the state to the inner life of the ruling party. This forbidding of factions was again regarded as an exceptional measure to be abandoned at the first serious improvement in the situation. At the same time, the Central Committee was extremely cautious in applying the new law, concerning itself most of all lest it lead to a strangling of the inner life of the party."* [Trotsky, **The Revolution Betrayed**, p. 96]

Yet this is, as we discuss in section H.5.3, the inevitable outcome of vanguardism in practice. Trotsky, then, simply opposed the application of repressive methods used on previous dissidents onto himself and those who agreed with him. He seemed genuinely surprised that the party machine would abuse its power in its own interests. Just as those outside the party — whether anarchists, other oppositional socialist groups or strikers — were repressed by the bureaucracy, so the party itself was subject to a similar regime. As Victor Serge noted, in practice the faction ban *"meant the establishment within the Party of a dictatorship of the Old Bolsheviks, and the direction of direction of disciplinary measures, not against the unprincipled careerists and conformist latecomers, but against those sections with a critical outlook."* [**Memoirs of a Revolutionary**, p. 135] Originally this repression was mild but, over time, it increased in severity until Communists and even bureaucrats suffered the same fate as those without a party card.

The notion that the bureaucracy could be defeated from within was naive in the extreme. It — like any ruling class — could only be defended from below, by the working class. To fight the bureaucracy, the working class needed freedom: freedom to organise, freedom of the press, freedom of assembly, as demanded by the Kronstadt rebels. Limiting these essential liberties to within the party as Trotsky wished would solve little given the size and power of the bureaucracy and the willingness of the ruling elite — as shown in 1921, for example — to repress any workers who exercised those freedoms. It is, therefore, unsurprising to discover Ciliga recounting how in his prison the strongest fraction of the Trotskyists *"hoped for reform from above ... As to making an appeal to the people and the masses ... this [was considered] an extremely dangerous course to follow: the peasants were 'against us'; the workers were undecided, the 'spirit of Kronstadt' pervaded the land and the 'Thermidor front might well include the working class'"* [**Op. Cit.**, p. 212] Victor Serge, likewise, noted how **Left Opposition** *"refused to appeal to workers and intellectuals who were not affiliated to the Party, because it believed that counterrevolutionary attitude, whether conscious or not, were still rife amongst them."* [**The Life and Death of Leon Trotsky**, p. 140] As Trotsky put it: *"We have never had and do not now have the intention of making nonparty people judges of our inner-party conflicts."* [**The Challenge of the Left Opposition (1926–27)**, p. 482]This is unsurprising, for it is doubtful such people would have restricted their demands to the limited inner-party reforms urged by the **Left Opposition** nor would they have forgotten Trotsky's policies when he had held power. So what else could it do? Appeal to the workers to fight, to revolt, in the name of... party dictatorship?

In terms of internal reform, this was doomed to failure in advance: the **Left Opposition** received the crop that Lenin and Trotsky sowed the seeds of in 1921. Much the same can be said for the idea that an external revolution could have regenerated the Soviet regime. In the words of Ida Mett:

> *"Some claim that the Bolsheviks allowed themselves such actions (as the suppression of Kronstadt) in the hope of a forthcoming world revolution, of which they considered themselves the vanguard. But would not a revolution in another country have been influenced by the spirit of the Russian Revolution? When one considers the enormous moral authority of the Russian Revolution throughout the world one may ask oneself whether the deviations of this Revolution would not eventually have left an imprint on other countries. Many historical facts allow such a judgement. One may recognise the impossibility of genuine socialist construction in a single country, yet have doubts as to whether the bureaucratic deformations of the Bolshevik regime would have been straightened out by the winds coming from revolutions in other countries."* [**Op. Cit.**, p. 203]

This is indeed the case — from the start, the Bolsheviks were considered by many socialists across the globe as showing the correct path in terms of revolutionary strategy and actions. This included the dogma on the necessity of party dictatorship which had become Bolshevik orthodoxy by the start of 1919 at the latest (reflecting its practice by mid-1918). Thus we see, for example, during the Hungarian Revolution which had seen libertarians form the first workers' councils in December 1917 by 1919 they *"felt that the powers of the [Communist] Revolutionary Governing Council [of Bela Kun] were excessive ... For the syndicalists the legitimate holders of proletarian sovereignty were the workers councils ... It was not long before they saw their cherished ideals defeated by the united party's oligarchy. On April 7, 1919, elections were held for the Budapest Council of Workers' and Soldiers' Deputies. The syndicalist controlled Budapest Eighth district elected a slate consisting solely of syndicalist and anarchist write-in deputies in place of the single-party ticket. The Revolutionary Governing Council voided the results of the election and a week later the official slate 'won'"*. [Rudolf L. Tokes, **Bela Kun and the Hungarian Soviet Republic**, p. 38 and pp.151–2] As in Russia, the "wrong" people had been elected to the soviets and so the Communist regime simply nullified workers' democracy.

The same perspective was expressed in other countries. As another example, in Italy the pro-Bolsheviks were also raising the necessity of party dictatorship and were being opposed by the libertarians during the revolutionary crisis in 1920:

> *"Up to now, whenever we said that what the socialists term* ***dictatorship of the proletariat*** *is only, in fact, the dictatorship of some men who, with the assistance of a party, superimpose and impose themselves on the proletariat, they used to treat us as if we were little short of slanderers ... Moscow had become the Mecca of the proletariat; the source of light, and ... peremptory orders as to the ideas that those who, with permission from their betters, wished to call themselves communists ought to profess and the conduct they should observe ... the official Italian Socialist Party daily, up to now the most authorised mouthpiece for the word from Moscow, ...* ***Avanti!*** *of the 26th [September, 1920] ... said:*
>
> *"'In Russia, under the soviet regime, the Party really directs all State policy and all public activities; individuals as well as groups being utterly subordinated to the decisions of the Party, so that* ***the dictatorship of the proletariat is really the dictatorship of the party and, as such of its central committee****.'*

> *"Well now we know what we have to look forward to: the dictatorship of the Leadership of the Socialist Party, or of the as yet unborn Communist Party ... a revolution made with an authoritarian outlook with dictatorial objectives ... through authoritarian imposition from above."* [Errico Malatesta, *"At Last! What is the 'dictatorship of the proletariat'?"*, **Anarchistes, Socialistes et Communistes**, pp. 208–10]

Kronstadt, likewise, was integrated into this perspective with, for example, leading German Communist Karl Radek writing on 1 April 1921 that he was *"convinced that in the light of the events at Kronstadt, the Communist elements which have so far not understood the role of the Party during the revolution, will at last learn the true value of these explanations, as well as the resolution of the 2nd Congress of the Communist International on the subject of the role of the Party."* For *"the full benefit of this lesson"* is that *"even when that uprising bases itself on working-class discontent"* it must *"be realised that, if the Communist Party can only triumph when it has the support of the mass of workers, there will nevertheless arise situations in the West where it will have to, for a certain period, keep power using solely the forces of the vanguard."* He noted that this was a long standing position by quoting an earlier article of his from 1919:

> *"And the mass ... may well hesitate in the days of great difficulties, defeats, and it may even despair of victory and long to capitulate. The proletarian revolution does not bring with it an immediate relief of poverty, and in certain circumstances, it may even temporarily worsen the situation of the proletariat. The adversaries of the proletarian will take advantage of this opportunity to demand the government of the workers themselves; it is for this reason that it will be necessary to have a centralised Communist Party, powerful, armed with the means of the proletarian government and determined to conserve power for a certain time, even only as the Party of the revolutionary minority, while waiting for the conditions of the struggle to improve and for the morale of the masses to rise ... there can arise situations where the revolutionary minority of the working class must shoulder the full weight of the struggle and where the dictatorship of the proletariat can only be maintained, provisionally at least, as the dictatorship of the Communist Party."*

Events of March 1921 confirmed this position for the party's *"firm decision to retain power by all possible means"* is *"the greatest lesson of the Kronstadt events, the international lesson.* He also referenced *"our discussions with that section of Communists [in Germany] who wished to oppose the Russian dictatorship, the dictatorship of the Communist Party"* — as also discussed by Lenin in **"Left-Wing" Communism: An Infantile Disorder** (see section H.3.3) — on *"the problem of the relationship between the Communist Party and the mass of the proletariat and the form of the dictatorship: dictatorship of the Party or dictatorship of the class".* [**The Kronstadt Uprising**] Radek was just repeating the Bolshevik position in words with more than usual clarity and *"provisionally"* unsurprisingly came to be measured in decades and was only ended by mass revolt in 1989.

The Bolsheviks had already been manipulating foreign Communist Parties in the interests of their state for a number of years. That is part of the reason why the Council Communists around Anton Pannekoek and Herman Gorter whom Radek referred to broke with the Third International in 1921. *"We can now see why,"* Pannekoek noted *"the tactics of the Third International, laid down*

by Congress to apply homogeneously to all capitalist countries and to be directed from the centre, are determined not only by the needs of communist agitation in those countries, but also by the political needs of Soviet Russia" in addition to the *"immediate economic needs which determine their policies"*. [*"World Revolution and Communist Tactics"*, **Pannekoek and Gorter's Marxism**, p. 144]

Just as the influence of Lenin had been a key factor in the successful the struggle against anti-Parliamentarian tendencies in Communist Parties all across the world, so the example and influence of the Bolsheviks would have made its impact on any foreign revolution. Any successful revolutionaries would have applied such "lessons" of October such as the dictatorship of the proletariat being impossible without the dictatorship of the Communist Party, centralism, nationalisation, one-man management, militarisation of labour and so on. This would have distorted any revolution from the start as well as simply creating a new bureaucratic ruling class as had happened in Russia.

Given how obediently the Communist Parties around the world followed the insane policies of Stalinism, can we doubt this conclusion? After all, even in the 1930s, these positions were still held by Trotskyists across the globe. The first issue of the official American Trotskyist journal, for example made its position clear by seeking to refute the notion that the dictatorship of the party was an alien concept brought into Bolshevism by Stalin! It did so by *"quotations from Lenin, Trotsky and others so as to establish ... the dictatorship of the party is Leninist"* rather than *"a Stalinist innovation"*. [Max Shachtman, *"Dictatorship of Party or Proletariat? Remarks on a Conception of the AWP ... and Others"*, **New International**, July 1934]

Thus the reality was that any Bolshevik-style revolution in Western Europe — and least we forget, Trotskyists are convinced that only a Bolshevik-lead revolution can succeed — would have followed the Bolshevik ideology with regards to the necessity of the dictatorship of the party as well as nationalisation and one-man management. In short, it would have also resulted in the political and economic dispossession of the working class by "its" party. As such, a successful revolution in the West would **not** have seen the Russian dictatorship over the proletariat ended but rather reinforced as the non-Russian Leninist parties would have simply repeated the "lessons" learned by the Bolsheviks and communicated internationally:

> *"It was, indeed, between 1917 and 1920 that the Bolshevik party established itself so firmly in power that it no longer could have been dislodged except by force of arms. And it was from the beginning of this period that the uncertainties of its line were ironed out, the ambiguities lifted, and the contradictions resolved. In the new State, the proletariat was to work, to be mobilised, and, should the need arise, to die in defence of the new power. It was to give its most 'conscious' and most 'capable' members to 'its' party, where they would become the leaders of society. It was to be 'active' and it had to 'participate' whenever it was asked to do so, but it was to do so only and exactly to the extent that the Party demanded this of the proletariat. Finally, it was to bow completely to the Party's will on all essential matters."* [Cornelius Castoriadis, **Political and Social Writings**, vol. 3, p. 99]

Simply put, democracy cannot be introduced in the soviets and unions when party dictatorship is considered essential for the "realisation" of the "proletarian" dictatorship and when there can only be **one** party. If "proletarian" dictatorship is impossible without the dictatorship of the party

then, clearly, proletarian democracy becomes meaningless. All the workers would be allowed to do would be to vote for members of the same party, all of whom would be bound by party discipline to carry out the orders of the party leadership. Power would rest in the party hierarchy and definitively **not** in the working class, its unions or its soviets (both of which would remain mere fig leafs for party rule). Ultimately, the **only** guarantee that the party dictatorship would govern in the interests of the proletariat would be the good intentions of those who held power in its hierarchy. However, being unaccountable to the masses, such a guarantee would be worthless — as history shows.

It may be objected here that this ignores that Trotsky stated in 1936 that when *"the Soviet bureaucracy is overthrown by a revolutionary party having all the attributes of the old Bolshevism"* then it *"would begin with the restoration of democracy in the trade unions and the Soviets. It would be able to, and would have to, restore freedom of Soviet parties."* Yet this ignores his suggestion that a *"restoration of the right of criticism, and a genuine freedom of elections, are necessary conditions for the further development of the country"* and this *"assumes a revival of freedom of Soviet parties, beginning with the party of Bolsheviks"*. [**The Revolution Betrayed**, p. 252 and p. 289] While in power Trotsky — like every leading Bolshevik — had repeatedly asserted that party dictatorship was not only completely compatible with "Soviet Democracy" but that the latter required the former. So rather than a complete introduction of Soviet democracy in the true meaning of the term, we would see the Trotskyists given freedom first but within the context of their party's dictatorship. They would then decide which other parties counted as "Soviet parties" — we do not have to look at the fate of the Mensheviks under Lenin to see the flaws in such a position. It comes as no surprise to discover Trotsky reiterating the necessity of party dictatorship the year this work was published in English:

> *"The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history ... The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution .. . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses."* [**Writings 1936–37**, pp. 513–4]

We can agree with Trotsky on *"the crushing of Soviet democracy by an all-powerful bureaucracy"* occurred in Russia but not on the date — it happened when Lenin held the reins of power and not after his death. Likewise, we can agree that the *"opposition parties were forbidden one after the other"* is *"obviously in conflict with the spirit of Soviet democracy"* but must reject as revisionism the claim that *"the leaders of Bolshevism regarded [this] not as a principle, but as an episodic act of self-defence."* [**The Revolution Betrayed**, p. 278 and p. 96] The Platform of the Opposition — to note just one example — shows that this smacks of the re-writing of history Trotsky correctly accused Stalinism of.

As can be seen, the alternatives suggested by Trotskyists to crushing Kronstadt are the real utopian positions. The self-reform of the regime by a section of its rulers is not only impossible in the face of the size and power of the bureaucracy but it was also based on maintaining the party dictatorship and one-man management within production. Unlike the Kronstadt Platform, it was doomed to failure from the start. Any group which raised demands for a return to the principles of 1917 were, like the Kronstadt sailors, crushed by forces of the State. In terms of workers' struggles, the bureaucracy had long experience is repressing strikes and so any revolt would have undoubtedly suffered the fate of the Petrograd strikes which had inspired the solidarity of Kronstadt. Finally, the notion that a revolution elsewhere would have revitalised the Soviet regime fails to acknowledge that it would have — if it were Leninist in nature — been based on imposing a party dictatorship and state-capitalism as per the example of Soviet Russia under Lenin and Trotsky. As for a non-Leninist revolution, well, those who defend the Bolshevik repression of Kronstadt are Leninists and so assume that no such thing is possible…

Regardless of the suggested alternative to Kronstadt's Third Revolution, it can only be concluded that it did not exist — the balance of forces at the time, the nature of the regime, the ideology of the ruling elite, all pointed to this during the revolt itself. The unchallenged master of the economy and society, the Bolshevik bureaucracy was the nucleus of a new ruling class — the notion that such a machine could be controlled or appealed to by a few "pure" party members is the infantile delusion. This new bureaucratic class could only be removed by a Third Revolution and while this, possibly, could have resulted in a bourgeois counter-revolution the alternative of maintaining Bolshevik dictatorship would **inevitably** have resulted in Stalinism. When supporters of Bolshevism argue that Kronstadt would have opened the door to counter-revolution, they do not understand that the Bolsheviks **were** the counter-revolution in 1921 and that by suppressing Kronstadt the Bolsheviks not only opened the door to Stalinism but invited it in and gave it the keys to the house.

Lastly, we should draw some parallels between the fates of the Kronstadt sailors and the Left Opposition. John Rees argues that the Left Opposition had *"the whole vast propaganda machine of the bureaucracy . .. turned against them,"* a machine used by Trotsky and Lenin in 1921 against Kronstadt. Ultimately, the Left Opposition *"were exiled, imprisoned and shot,"* again like the Kronstadters and a host of revolutionaries who defended the revolution but opposed the Bolshevik dictatorship. [**Op. Cit.**, p. 68]

A Third Revolution was the only **real** alternative in Bolshevik Russia. Any struggle from below post-1921 would have raised the same problems of soviet democracy and party dictatorship which Kronstadt raised. Given that the **Left Opposition** subscribed to the *"Leninist principle"* of *"the dictatorship of the party,"* it could not appeal to the masses as its members knew that not only would they not vote for it, the masses would hardly have taken to the streets for such a pitiful set of reforms. The arguments raised against Kronstadt that soviet democracy would lead to counter-revolution are equally applicable to movements which appealed, as Rees desires, to the Russian working class post-Kronstadt. Moreover, any mass revolt would have faced the same state machine utilised in 1921 against Petrograd and Kronstadt. Finally, any Leninist external revolution would have imposed party dictatorship and state-capitalism following Bolshevik orthodoxy — along with the associated bureaucracy this hierarchical, centralised regime necessitated.

To conclude, the claim that Kronstadt would inevitably have led to an anti-proletarian dictatorship fails. Yes, it might have but the Bolshevik dictatorship itself was anti-proletarian (it had repressed proletarian protest, organisation, freedom and rights on numerous occasions) and it

could never be reformed from within by its social position and the very logic of its own ideology. The rise of Stalinism was inevitable after the crushing of Kronstadt for there are no benevolent dictatorships, not even socialist ones headed by Trotsky. This is not hindsight — a massive, corrupt bureaucratic machine which had crushed numerous strikes, protests and revolts by the workers and peasants before early 1921 would not have been kept "pure" by a handful of leaders elected by a self-selected party which proclaimed the necessity of its own dictatorship.

14 How do modern day Trotskyists misrepresent Kronstadt?

We have discussed how Trotskyists have followed their heroes Lenin and Trotsky in abusing the facts about the Kronstadt sailors and uprising in previous sections. In section 8, we have indicated how they have selectively quoted from academic accounts of the uprising and suppressed evidence which contradicts their claims. In section 7, we have shown how they have selectively quoted from Paul Avrich's book on the revolt to paint a false picture of the connections between the Kronstadt sailors and the Whites. In section 10, we exposed how the repression against the Petrograd strikers was removed from history. Here we summarise some of the other misrepresentations of Trotskyists about the revolt.

We noted in section 3 how Trotskyists fail to quote the Kronstadt demands. They often go one further by inventing them. Thus, for example, John Rees asserts that the Kronstadters were fighting for *"soviets without parties."* [**Op. Cit.**, p. 63] His fellow-party member Pat Stack goes one further and asserts that the *"central demand of the Kronstadt rising though was 'soviets without Bolsheviks', in other words, the utter destruction of the workers' state."* [*"Anarchy in the UK?"*, **Socialist Review**, no. 246, November 2000] Both reference Paul Avrich's book **Kronstadt 1921** in their articles yet this is unambiguous: *"'Soviets without Communists' was not, as is often maintained by both Soviet and non-Soviet writers, a Kronstadt slogan."* Nor did they agitate under the banner *"soviets without parties."* They argued for *"all power to the soviets and not to parties."* Political parties were not to be excluded from the soviets, simply stopped from dominating them and substituting themselves for them. As Avrich notes, the Kronstadt programme *"did allow a place for the Bolsheviks in the soviets, alongside the other left-wing organisations ... Communists ... participated in strength in the elected conference of delegate, which was the closest thing Kronstadt ever had to the free soviets of its dreams."* The index for Avrich's work handily includes this page in it, under the helpful entry *"soviets: 'without Communists.'"* [**Kronstadt 1921**, p. 181 and p. 269]

The central demand of the uprising was simply soviet democracy and a return to the principles that the workers and peasants had been fighting the whites for. In other words, both Leninists have misrepresented the Kronstadt revolt's demands and so misrepresented its aims while, at the same time, claiming to have read a work which debunks their own claim.

Rees goes one step further and tries to blame the Bolshevik massacre on the sailors themselves. He argues *"in Petrograd Zinoviev had already essentially withdrawn the most detested aspects of War Communism in response to the strikes."* [**Op. Cit.**, p. 63] Needless to say, Zinoviev did not withdraw the **political** aspects of War Communism, just some of the **economic** ones and, as the Kronstadt revolt was mainly **political**, these concessions were not enough — indeed, the repression directed against workers' rights and opposition socialist and anarchist groups **increased**. As such, Zinoviev confirmed what Kuzmin had warned the Conference of Delegates on 2nd March in Kronstadt, namely *"that the Communists would on no account surrender power or share it with*

another political party or group." [George Katkov, **Op. Cit.**, p. 30] Rees then states the Kronstadters *"response [to these concessions] was contained in their* ***What We Are Fighting For****"* and quotes it as follows:

> *"there is no middle ground in the struggle against the Communists ... They give the appearance of making concessions: in Petrograd province road-block detachments have been removed and 10 million roubles have been allotted for the purchase of foodstuffs... But one must not be deceived ... No there can be no middle ground. Victory or death!"* [quoted by Rees, **Op. Cit.**, p. 63]

What Rees fails to inform the reader is that this was written on March 8th, while the Bolsheviks had started military operations on the previous evening. Moreover, the fact the *"response"* stated *"[w]ithout a single shot, without a drop of blood, the first step has been taken [of the "Third Revolution"]. The toilers do not need blood. They will shed it only at a moment of self-defence"* is not mentioned. [quoted by Avrich, **Op. Cit.**, p. 243] In other words, the Kronstadt sailors reaffirmed their commitment to non-violent revolt. Any violence on their part was in self-defence against Bolshevik actions. Not that you would know that from Rees' work. Indeed, as another one of his sources indicates, the rebels *"had refrained from taking any communist lives. The Soviet Government, on the other hand, as early as March 3, already had executed forty-five seamen at Oranienbaum — a quite heavy proportion of the total personnel of the men at the Naval Aviation Detachment. These men had voted for the Kronstadt resolution, but did not take arms against the government. This mass execution was merely a prelude to those that took place after the defeat of the mutineers.*" These executions at Oranienbaum, it should be noted, exceeded the total of 36 seamen who had paid with their lives for the two large rebellions of the 1905 revolution at Kronstadt and Sveaborg. [D. Fedotoff-White, **Op. Cit.**, p. 156]

Ted Grant, of the UK's **Socialist Appeal** re-writes history significantly in his work **Russia: From revolution to counter-revolution**. He asserts, without providing any references or evidence, that the *"first lie"* of anti-Bolshevik writers on the subject *"is to identify the Kronstadt mutineers of 1921 with the heroic Red sailors of 1917."* Yet this book appeared in 1997, long after the academic research we quote in section 8 **proven** that over 90% of the sailors on the two battleships which started the revolt had been recruited before and during the 1917 revolution and at least three-quarters of the sailors were old hands who had served in the navy through war and revolution. So was the majority of the Provisional Revolutionary Committee. Grant also asserts that the sailors in 1917 and 1921 *"had nothing in common"* because those *"of 1917 were workers and Bolsheviks"*, so ignoring the substantial evidence which had appeared decades before which — as we summarised in section 9 — showed that the Bolsheviks were a minority in Kronstadt during 1917 and that the demands raised in the revolt in 1921 matched the politics dominant in 1917. For good measure, he proclaims *"[t]hat there were actual counter-revolutionary elements among the sailors was shown by the slogan 'Soviets without Bolsheviks'"* without apparently aware that this was never raised in Kronstadt.

Grant claims that *"almost the entire Kronstadt garrison volunteered to fight in the ranks of the Red Army during the civil war."* Are we to believe that the Bolshevik commanders left Kronstadt (and so Petrograd) defenceless during the Civil War? Or drafted the skilled and trained (and so difficult to replace) sailors away from their ships, so leaving them unusable? Of course not. Common sense refutes Grant's argument even if you were unaware, as he was, of the statistical evidence

that on 1st January, 1921, at least 75.5% of the Baltic Fleet was likely to have been drafted before 1918 and over 80% were from Great Russian areas and some 10% from the Ukraine. [Gelzter, **Kronstadt 1917–1921**, p. 208] Not to be outdone, Grant then states that the *"Kronstadt garrison of 1921 was composed mainly of raw peasant levies from the Black Sea Fleet. A cursory glance at the surnames of the mutineers immediately shows that they were almost all Ukrainians."* According to Paul Avrich, *"[s]ome three or four hundred names appear in the journal of the rebel movement ... So far as one can judge from these surnames alone ... Great Russians are in the overwhelming majority."* Of the 15 person Provisional Revolutionary Committee, *"three ... bore patently Ukrainian names and two others... Germanic names."* Of the three Ukrainians, two were sailors who *"had fought on the barricades in 1917."* [Paul Avrich, **Op. Cit.**, pp. 92–3 and p. 91] He also suggests that *"[i]t is interesting to note that members of the Workers' Opposition, a semi-anarcho-syndicalist tendency present at the Congress, also joined the attacking forces. This nails yet another lie, which attempts to establish a clumsy amalgam between Kronstadt — anarchism — Workers' Opposition \96 three things that have absolutely nothing in common."* Ignoring the awkward fact that only Trotsky's biography Isaac Deutscher claimed Kronstadt was led by anarchists, we can simply note that it was the leadership of the Bolsheviks who sought to link the Workers' Opposition with Kronstadt at the time:

> *"But I ask: Why is Shlyapnikov not prosecuted for making such statements? Are we seriously discussing discipline and unity in an organised Party, or are we at a meeting of the Kronstadt type? For his is a Kronstadt, anarchist type of statement, to which the response is a gun."* [Lenin, **Collected Works**, vol. 32, p. 206]

Alexander Shlyapnikov was a leader of the Workers' Opposition so, as Nicolas Walter noted in 1971, *"[a]ttempts to assimilate Kronstadt to the Workers' Opposition, which were made by the Leninists at the time as part of the amalgam technique of propaganda and which have been made by libertarian Marxists since then as part of a similar technique in reverse, break on the decisive fact that the Workers' Opposition ... always retained as its fundamental principle the Communist monopoly of power — the structure of the Bolshevik regime was to be changed, but not its basis as a party dictatorship; the fundamental principle of the Kronstadt programme, on the other hand, was precisely the removal of that dictatorship. The essential difference, however, was not in words but in deeds: when it came to a practical choice between Communism and communism, the Workers' Opposition gladly turned their guns on Kronstadt."* [**Op. Cit.**, p. 149]

And **Grant** talks about the *"[m]any falsifications... written about this event,"* that it *"has been virtually turned into a myth"* and that *"these allegations bear no relation to the truth."* Truly amazing — although, to be fair, he **may** have been genuinely ignorant of the research on the subject but his readers would surely have expected him to do **some** investigation of the facts before so confidently accusing others of falsification and myth-making. The best that can be said is that he made no attempt to suggest he had read Paul Avrich's and Israel Gelzter's essential books on the subject while making his assertions.

Another SWP member, Abbie Bakan, asserts that *"more than three quarters of the sailors"* at Kronstadt *"were recent recruits of peasant origin"* but refuses to provide a source for this claim. [*"A Tragic Necessity"*, **Socialist Worker Review**, no. 136] As noted above, such a claim is false. The likely source for the assertion is Paul Avrich, who noted that more than three-quarters of the sailors were of peasant origin but Avrich does **not** say they were all recent recruits. While

stating that there could be *"little doubt"* that the Civil War produced a *"high turnover"* and that *"many"* old-timers had been replaced by conscripts from rural areas, he does not indicate that all the sailors from peasant backgrounds were new recruits. He also notes that *"there had always been a large and unruly peasant element among the sailors."* [**Op. Cit.**, pp. 89–90] It should be noted that Bakan seems ignorant of the research by Evan Mawdsley and Israel Gelzter which show beyond doubt that most of the sailors had been there in 1917. Like Grant, Bakan seems unwilling to research the subject being discussed — unlike Grant, Bakan **is** an academic.

She asserts that anti-Semitism *"was vicious and rampant"* yet fails to provide **any** official Kronstadt proclamations expressing this perspective. Rather, we are to generalise from the memoirs of **one** sailor who was not even based in Kronstadt and the anti-Semitic remark of Vershinin, a member of the Revolutionary Committee, which was reported by Bolshevik sources. The source for these claims is Paul Avrich's book but, as Nicolas Walter points out, *"he offers very little evidence for this. He quotes some hair-raising passages from the manuscript memoirs of a sailor who was serving in Petrograd, and refers to the sailor's claim that his views were widely shared by his colleagues in the fleet ... That isn't much of an argument, and the only other piece of evidence — the Bolshevik story that one of the first Kronstadt rebels they caught shouted to his captors to 'join us and beat the Jews' — is derisory. In view of the powerful tradition of antisemitism in Russia ... the remarkable thing is that there seems to have been virtually no breath of antisemitism during the Kronstadt rising."* [**Op. Cit.**, pp. 147–8] Nor should we forget that the opinions of the single sailor whose testimony is verifiable (who, let us stress, was not even in Kronstadt) were irrelevant to the Bolsheviks when they drafted him in the first place. More importantly, this *"vicious and rampant"* anti-Semitism failed to be expressed in the demands raised nor the Kronstadt rebels' newspaper or their radio broadcasts. Needless to say, the Bolsheviks failed to mention it at the time.

Yes, it is true that as Bakan (echoing Avrich) noted that the *"worse venom of the Kronstadt rebels was levelled against Trotsky and Zinoviev"* but it was **not** because, as Bakan asserts, they were *"treated as Jewish scapegoats."* Their ethnic background was not mentioned by the Kronstadt sailors and they were strong **political** reasons for attacking them. As Paul Avrich wrote, *"Trotsky in particular was the living symbol of War Communism, of everything the sailors had rebelled against. His name was associated with centralisation and militarisation, with iron discipline and regimentation."* As for Zinoviev, he had *"incurred the sailors' loathing as the party boss who had suppressed the striking workers and who had stooped to taking their own families as hostages."* [**Op. Cit.**, p. 178 and p. 176] Good reasons to attack them and nothing to do with them being Jewish. Needless to say, Bakan seems selective in her concern over anti-Semitism and makes no mention of Emma Goldman's comment:

> *"To be sure, the former commissar assures us that 'the peasants reconciled themselves to the requisition as a temporary evil,' and that 'the peasants approved of the Bolsheviki, but became increasingly hostile to the "Communists".' But these contentions are mere fiction .. . In point of historic truth, the peasants hated the regime almost from the start, certainly from the moment when Lenin's slogan, 'Rob the robbers,' was turned into 'Rob the peasants for the glory of the Communist Dictatorship.' That is why they were in constant ferment against the Bolshevik Dictatorship. A case in point was the uprising of the Karelian Peasants drowned in blood by the Tsarist General Slastchev-Krimsky ... [who] had fought against the Revolution from its very beginning and had led*

> *some of the Wrangel forces in the Crimea. He was guilty of fiendish barbarities to war prisoners and infamous as a maker of pogroms. Now Slastchev-Krimsky recanted and he returned to 'his Fatherland.' This arch-counter revolutionist and Jew-baiter, together with several Tsarist generals and White Guardists, was received by the Bolsheviki with military honours. No doubt it was just retribution that the anti-Semite had to salute the Jew, Trotsky, his military superior. But to the Revolution and the Russian people the triumphal return of the imperialist was an outrage."* [*"Trotsky Protests Too Much"*, **Op. Cit.**, pp. 259–60]

Bakan states that the *"demands of the Kronstadt sailors reflected the ideas of the most backward section of the peasantry."* As can be seen from section 3, such a comment cannot be matched with the actual demands raised (demands, of course, which are not provided). So which ideas reflected the *"most backward section of the peasantry"*? Free elections to the Soviets, freedom of speech and of the press for workers and peasants, right of assembly, freedom for trade union and peasant organisations, a conference of workers, soldiers and sailors, liberation of all political, worker and peasant prisoners, equalisation of rations, freedom for peasants as long as they do not employ hired labour, and so on? All these could, indeed should, be included in most socialist parties programmes and were, in fact, key elements of Bolshevik rhetoric in 1917 and reflected key aspects of the Soviet Constitution. Moreover, these *"backward"* peasants send a radio message marking International Woman's Day, hoping that women would *"soon accomplish"* their *"liberation from every form of violence and oppression."* [quoted by Alexander Berkman, *"The Kronstadt Rebellion,"*, **Op. Cit.**, p. 85] How *"backward"* can you get!

Bakan pathetically acknowledges that their demands included *"calls for greater freedoms"* yet looks at the *"main economic target"* (not mentioning they were points 8 and 11 of the 15 demands, the bulk of the rest are political). These, apparently, were aimed at *"the programme of forced requisitioning of peasant produce and the roadblock detachments that halted the black market in grain."* Given that she admits that the Bolshevik leadership was *"already discussing"* the end of these features (due to their lack of success) it must be the case that the likes of Lenin, Zinoviev and Trotsky also *"reflected the ideas of the most backward section of the peasantry"*. Moreover, the demand to end the roadblocks was also raised by the Petrograd and Moscow workers during their strikes, as were most of the other demands raised by Kronstadt. [Avrich, **Op. Cit.**, p. 42] The *"most backward section of the peasantry"* was getting around in those days, appearing as they were in the highest echelons of the Bolshevik party bureaucracy and the factories of Petrograd and other major cities!

In reality, of course, the opposition to the forced requisitioning of food and the roadblocks between town and countryside was a combination of ethical and practical considerations — not least, being counterproductive. As the striking workers show, you did not have to be a peasant to see this. Victor Serge, for example, recollected he would *"have died without the sordid manipulations of the black market."* [**Memoirs of a Revolutionary**, p. 79] He was a government official, think how much worse it would have been for an ordinary worker. These policies harmed everyone, including industrial workers — little wonder they struck for their end and little wonder the sailors expressed solidarity with them and included it in their demands. Therefore, **nothing** can be drawn from these demands about the class nature of the revolt.

In an interesting example of double-think, Bakan then states that the sailors *"called for the abolition of Bolshevik authority in the army, factories and mills."* What the resolution demanded

was, in fact, *"the abolition Party combat detachments in all military groups"* as well as *"Party guards in factories and enterprises"* (point 10). In other words, to end the intimidation of workers and soldiers by armed communist units in their amidst. Needless to say, we discover Leninists denounce this when Stalinists do it, arguing that *"people who seriously believe that workers at the height of revolution need a police guard to stop them handing their factories over to capitalists certainly have no real faith in the possibilities of a socialist future."* [Chris Harman, **Bureaucracy and Revolution in Eastern Europe**, p. 144]

Likewise, when Bakan states that *"the real character of the rebellion"* can be seen from the opening declaration that *"the present soviets do not express the will of the workers and peasants"* she could not have made a truer comment. The Kronstadt rebellion was a revolt for soviet democracy and against party dictatorship — so soviet democracy would only have led to *"abolition of Bolshevik authority"* if the existing soviets, as the resolution argued, did not express the will of their electors. Ignoring the reality of the situation in terms of lack of genuine soviet democracy under the Bolshevik dictatorship, she asserts that the Provisional Revolutionary Committee was *"non-elected"* and so contradicts every historian who acknowledges it was elected by the Conference of Delegates on March 2nd and expanded by the next conference a few days later. She even considers the fact the delegate meeting's *"denial of party members' usual role in chairing the proceedings"* as one of many *"irregularities"* while, of course, the **real** irregularity was the fact that **one** party (the government party) had such a *"usual role"* in the first place! Moreover, given that that Petrograd soviet meeting to discuss the revolt had Cheka guards (Lenin's political police) on it, her notion that sailors guarded the Conference of Delegates meeting (a meeting held in opposition to the ruling party) was *"irregular"* seems ironic.

Lastly, the issue of the Memorandum of the White National Centre is raised and used as evidence that *"Lenin's suspicion of an international conspiracy linked up with the Kronstadt events has been vindicated."* Needless to say, she fails to mention that the historian who discovered the document rejected the notion that it proved that Kronstadt was linked to such a conspiracy (see section 6 for a full discussion). Much is made of the claim that *"[t]wo weeks after the Kronstadt rebellion the ice was due to melt"* and that *"[h]olding out until the ice melted was identified as critical in the memorandum,"* but this is not true. The Memorandum in fact, as Paul Avrich notes, *"assumes that the rising will occur after the ice has melted."* [**Op. Cit.**, p. 237fn] No other interpretation can be gathered from the document.

To conclude, these writings shows how deeply the supporters of Leninism will sink to when attempting to discuss the Kronstadt rebellion. Sadly, as we have indicated many, many times, these are not isolated occurrences. Long refuted claims are repeated by those who seem to think doing research on a subject before writing about it is as counter-revolutionary as accurately reflecting the facts and arguments in any book they do deem fit to consult.

15 What does Kronstadt tell us about Bolshevism?

The rationales used by Lenin, Trotsky and their followers are significant aids to getting to the core of the Bolshevik Myth. These rationales and the various bad faith activities (selective quoting, invention, cherry-picking, deliberately ignoring relevant facts, etc.) utilised to create them allow us to understand the limitations of Bolshevik ideology and how it contributed to the degeneration of the revolution. However, the Kronstadt revolt should not be viewed in isolation — it was the

climax of a process which had started as soon as the Bolsheviks had seized power in 1917. As Nicolas Walter suggests:

> *"Each side in every conflict, after all, behaves in accordance with its own particular goals and aspirations. It is action, more than anything else, which reveals the true nature of human beings. This in fact is the basis for our total condemnation of the Bolsheviks. We are not concerned with the possibility that the success of Kronstadt might have led to chaos, civil war, or counter-revolution, but with the certainty that the failure of Kronstadt did lead to dictatorship, purges, and counter-revolution. The suppression of real communists calling for real soviet power by people who described themselves as the Communist Party and the Soviet Government destroyed the Bolsheviks' credentials and should have destroyed their credibility. Kronstadt was not an isolated phenomenon ... The importance of Kronstadt is not that it was a 'betrayal of the revolution', a sudden disease which afflicted Russia in 1921, but that it was indeed a 'tragic necessity', a symptom of the underlying chronic illness of authoritarian socialism — the fact that it is objectively, practically, essentially counter-revolutionary."* [**Op. Cit.**, pp. 152–3]

Moreover, it shows the links between Leninism and Stalinism. Thus the Stalinist officially approved history of the Russian Communist Party repeats the same myths as the Trotskyists do — *"Whiteguards, in complicity with Socialist-Revolutionaries, Mensheviks and representatives of foreign states, assumed the lead of the mutiny"*, the rebels *"raised the cry: 'Soviets without Communists!'* while *"counter-revolutionaries tried to exploit the discontent of the petty bourgeois masses in order to overthrow the power of the Soviets under a pseudo-Soviet slogan"* for *"[n]early all the old sailors who had taken part in the October Revolution were at the front, heroically fighting in the ranks of the Red Army"* and replaced by *"new men, who had not been schooled in the revolution"* who *"were a perfectly raw peasant mass who gave expression to the peasantry's discontent"*. [C.P.S.U. (B), **History of the Communist Party of the Soviet Union (Bolsheviks)**, p. 250] To be fair to the Trotskyists, they do not claim the Mensheviks were involved and so can at least claim to be less dishonest that the Stalinists — faint praise indeed.

The various arguments used to justify the Bolshevik dictatorship crushing the rebellion are, in the main, weak or factually incorrect as we have indicated above. There is only one which had any real traction and it gets to the heart of the problem as it exposes the counter-revolutionary nature of Bolshevism from a socialist perspective. It was expressed by Trotsky in 1938:

> *"the Kronstadt uprising was nothing but an armed reaction of the petty bourgeoisie against the hardships of social revolution and the severity of the proletarian dictatorship.*
>
> *"That was exactly the significance of the Kronstadt slogan, 'Soviets without Communists,' which was immediately seized upon, not only by the SRs but by the bourgeois liberals as well. As a rather far-sighted representative of capital, Professor Miliukov understood that to free the soviets from the leadership of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve*

> *as a bridge from the proletarian dictatorship. They could play no other role, regardless of the 'ideas' of their participants. The Kronstadt uprising thus had a counterrevolutionary character."* [Lenin and Trotsky, *"Hue and Cry Over Kronstadt"*, **Kronstadt**, p. 90]

Interesting logic. Let us assume that the result of free elections would have been the end of Bolshevik *"leadership"* (i.e. dictatorship), as seems likely. What Trotsky is arguing is that to allow workers to vote for their representatives would *"only serve as a bridge from the proletarian dictatorship"*. This argument was made (in 1938) as a **general point** and is **not** phrased in terms of the problems facing the Russian Revolution in 1921. In other words Trotsky is clearly arguing for the dictatorship of the party and contrasting it to soviet democracy. So much for *"All Power to the Soviets"* or *"workers' power"* — Trotsky is unambiguously calling for party power and, ultimately, party dictatorship. As he put it around the same time as the Kronstadt rebellion:

> *"The Workers' Opposition came out with dangerous slogans, in that they have made a fetish of democratic principles. They have placed the workers' rights to elect representatives for workers' organizations above the Party, as though the Party had no right to assert its dictatorship even in cases when that dictatorship clashes temporarily with the passing mood of the workers' democracy ... It is essential that we should become aware of the revolutionary-historical birthright of the Party, which is in duty bound to retain its dictatorship, regardless of the temporary vacillations of the amorphous masses, regardless of the temporary vacillations even of the working class ... At any given moment, the dictatorship does not rest upon the formal principle of workers' democracy ... over and above the formal aspect [of workers' democracy] is the Party dictatorship which safeguards the basic interests of the working class even when the moods of that class are temporarily vacillating."* [quoted by Bunyan, **Op. Cit.**, pp. 251–2]

It should — but unfortunately probably will not — cause Trotskyists some concern that in 1957, after crushing the previous year's workers' revolution, the Hungarian Stalinists argued along **exactly** the same lines as Trotsky had after the Bolsheviks had crushed Kronstadt: *"the regime is aware that the people do not always know what is good for them. It is therefore the duty of the leadership to act, not according to the **will** of the people, but according to what the leadership knows to be in the best **interests** of the people."* [quoted by Andy Anderson, **Hungary '56**, p. 101]

Along with Trotsky, Lenin made the same point at the same Congress in March 1921 by arguing that *"the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of that class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts (by imperialism in some countries) that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard that has absorbed the revolutionary energy of the class. The whole is like an arrangement of cogwheels. Such is the basic mechanism of the dictatorship of the proletariat, and of the essentials of transition from capitalism to communism."* So in *"the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers ... the Party, shall we say, absorbs the vanguard of the proletariat, and this vanguard exercises the dictatorship of the proletariat."* [**Collected Works**, vol. 32, p. 21 and p. 20] Yet what happens if there is a clash between the vanguard and the class? Lenin had explained the grim reality the previous year at a conference of the Cheka:

> *"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves."* [**Op. Cit.**, vol. 42, p. 170]

It must be remembered that Lenin, according to Trotsky, had privately confessed the following in early 1921: *"If we perish, it is all the more important to preserve our ideological line and give a lesson to our continuators. This should never be forgotten, even in hopeless circumstances".* [quoted by Maurice Brinton, **The Bolsheviks and Workers' Control**, p. 79] Trotsky repeated this lesson then as well as nearly 20 years later:

> *"But the masses are by no means identical: there are revolutionary masses, there are passive masses, there are reactionary masses. The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralized organization of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves. To invest the mass with traits of sanctity and to reduce one's program to amorphous 'democracy', is to dissolve oneself in the class as it is, to turn from a vanguard into a rearguard, and by this very thing, to renounce revolutionary tasks. On the other hand, if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the class is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself. All this is elementary; all this has been demonstrated by the experience of Russia, and confirmed by the experience of Spain."* [*"The Moralists and Sycophants against Marxism"*, **Their Morals and Ours**, p. 59]

Yet, by definition, everyone is "backward" compared to the vanguard. Lenin and Trotsky are clearly arguing that the working class, as a class, is incapable of making a revolution or managing society itself — hence the party must step in on its behalf and, if necessary, ignore the wishes of the very people the party claims to represent. This requires a state in the normal sense of the word, an instrument of minority rule based on special bodies of armed people separate from the people itself – the Red Army and Cheka used to crush the Petrograd strikes and Kronstadt revolt of 1921. To recall Lenin's words from 1917:

> *"And the dictatorship of the proletariat, i.e., the organisation of the vanguard of the oppressed as the ruling class for the purpose of suppressing the oppressors, cannot result merely in an expansion of democracy.* ***Simultaneously*** *with an immense expansion of democracy, which* ***for the first time*** *becomes democracy for the poor, democracy for the people, and not democracy for the money-bags, the dictatorship of the proletariat imposes a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists. We must suppress them in order to free humanity from wage slavery, their resistance must be crushed by force; it is clear that there is no freedom and no democracy where there is suppression and where there is violence."* [*"The State and Revolution"*, **Collected Works**, vol. 25, pp. 466–7]

As the dissident (working class) Communist Gavriii Miasnokov argued in 1921 against Lenin's defence of the regime and its authoritarianism:

> *"The trouble is that, while you raise your hand against the capitalist, you deal a blow to the worker. You know very well that for such words as I am now uttering hundreds, perhaps thousands, of workers are languishing in prison. That I myself remain at liberty is only because I am a veteran Communist, have suffered for my beliefs, and am known among the mass of workers. Were it not for this, were I just an ordinary mechanic from the same factory, where would I be now? In a Cheka prison or, more likely, made to 'escape,' just as I made Mikhail Romanov 'escape.' Once more I say: You raise your hand against the bourgeoisie, but it is I who am spitting blood, and it is we, the workers, whose jaws are being cracked."* [quoted by Paul Avrich, *"Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers' Group"*, **The Russian Review**, Vol. 43, No. 1, p. 11]

So, if this vanguard is suppressing the proletariat itself, crushing its resistance by force, then by Lenin's own logic *"where there is suppression and where there is violence"* then for the working class *"there is no freedom and no democracy"*. And, indeed, this was in fact the situation post-October. Likewise, in 1905, Lenin had argued (and used Engels as an authority) that *"the principle, 'only from below' is an **anarchist** principle."* For Lenin, Marxists must be in favour of *"From above as well as from below"* and *"renunciation of pressure also from above is **anarchism**"* as *"[p]ressure from below is pressure by the citizens on the revolutionary government. Pressure from above is pressure by the revolutionary government on the citizens."* [Lenin, **Op. Cit.**, vol. 8, p. 477, p. 474, p. 481 and p. 474] Yet, as Kronstadt shows, *"pressure from above"* has an advantage over *"pressure from below"* as it has the full power of the state apparatus to use against the citizens. In other words, the seeds for degeneration of the revolution and the repression of Kronstadt lie at the heart of the Bolshevik ideology — and in Marxism itself:

> *"The workers ... must not only strive for a single and indivisible German republic, but also within this republic for the most determined centralisation of power in the hands of the state authority. They must not allow themselves to be misguided by the democratic talk of freedom for the communities, of self-government, etc... . it must under no circumstances be permitted that every village, every town and every province should put a new obstacle in the path of revolutionary activity, which can proceed with full force only from the centre ... As in France in 1793 so today in Germany, it is the task of the really revolutionary party to carry through the strictest centralisation."* [Marx, **Marx-Engels Collected Works**, vol. 10, p. 285]

Such a perspective cannot help having disastrous consequences for a revolution as this centralisation of power would soon undermine the democracy it claimed to embody. The Russian Revolution showed that Bakunin had been right to argue against Marx that the "workers' state" would not remain controlled by the workers for long and would soon became a dictatorship **over** the proletariat by an elite which claimed to know the interests of the working class better than they did themselves. The logic of the centralisation favoured by Marxism clearly implies that when the party suppressed Kronstadt, when it disbanded non-Bolshevik soviets in early 1918 and robbed the workers and soviets of their power, the Bolsheviks were acting in the best interests of masses. The notion that Leninism is a revolutionary theory is invalidated by these arguments and practices they reflected. Rather than aim for a society based on workers' power, they aim for a "workers' state" in which workers **delegate** their power to the leaders of the party

who then use that very same power to retain its social position in the face of popular dissent (the localities placing new obstacles in the way of the centralised state authority). Such an approach is doomed to failure — it cannot produce a socialist society as such a society (as Bakunin stressed) can only be built from below by the working class itself. As Vernon Richards argues:

> *"The distinction between the libertarian and authoritarian revolutionary movements in their struggle to establish the free society, is the means which each proposes should be used to this end. The libertarian maintains that the initiative must come from below, that the free society must be the result of the will to freedom of a large section of the population. The authoritarian ... believes that the will to freedom can only emerge once the existing economic and political system has be replaced by a dictatorship of the proletariat [i.e., the dictatorship of the party] which, as the awareness and sense of responsibility of the people grows, will wither away and the free society emerge.*
>
> *"There can be no common ground between such approaches. For the authoritarian argues that the libertarian approach is noble but 'utopian' and doomed to failure from the start, while the libertarian argues on the evidence of history, that the authoritarian **methods** will simply replace one coercive state by another, equally despotic and remote from the people, and which will no more 'wither away' than its capitalist predecessor."* [**Lessons of the Spanish Revolution**, p. 206]

Thus the reality of the Bolshevik regime confirmed Bakunin's prediction that Marxism meant *"the highly despotic government of the masses by a new and very small aristocracy of real or pretended scholars. The people are not learned, so they will be liberated from the cares of government and included in entirety in the governed herd."* [**Statism and Anarchy**, pp. 178–9] True, while modern day Leninists follow Trotsky's arguments they rarely acknowledge where they logically led or that their heroes explicitly acknowledged this conclusion and justified it. They do not state this position as honestly as did Lenin and Trotsky — although we do see echoes of it in their attempts to justify the repression of Kronstadt — as can be seen when Chris Bambery of the British SWP argues that *"in Lenin's concept of the party, democracy is balanced by centralism"* for the *"working class is fragmented. There are always those who wish to fight, those who will scab and those in between. Even in the soviets those divisions will be apparent. Revolutionary organisation does not aspire to represent the working class as a whole. It bases itself on those workers who want to challenge capitalism, and seeks to organise those to win the majority of workers to the need to take power."* [*"Leninism in the 21st century"*, **Socialist Review**, no. 248]

Anarchists, as discussed in section J.3.6, recognise that the truth of this description of the working class but we draw radically different conclusions in terms of the relationship of socialists to that class and its divisions. We also argue that the Leninist assumptions lead to anti-socialist conclusions (see section H.5) and this can be seen from how Bambery's comments have **exactly** the same basis of Trotsky's defence of the need of party dictatorship and why Kronstadt was counterrevolutionary. Bambery notes that even *"in the soviets"* there will be *"divisions"* and so we have the basic assumption which, combined with centralisation, vanguardism and other aspects of Bolshevism, leads to events like Kronstadt and the destruction of soviet power by party power. The arguments for centralisation mean, in practice, the concentration of power in the centre, in the hands of a few party leaders, as the working masses cannot be trusted to make the correct ("revolutionary") decisions. This centralised power is then used to impose the will of the leaders,

who use state power against the against whoever protests against the dictatorship of the party, including the very class they claim to represent. Thus the transformation of the *"dictatorship of the proletariat"* into the dictatorship **over** the proletariat under the Bolsheviks came as no surprise to anarchists.

Of course, it will be replied that the Bolshevik dictatorship used its power to crush the resistance of the bosses (and *"backward workers"* — that is, any workers who disagreed with the vanguard). Sadly, this is not the case. Lenin's argument is flawed as it confuses the defence of the revolution with the defence of the party in power. These are two totally different things. The *"revolutionary coercion"* Lenin speaks of is, apparently, directed against one part of the working class. However, this will also intimidate the rest (just as bourgeois repression not only intimidates those who strike but those who may think of striking). As a policy, it can have but one effect — to eliminate **all** workers' power and freedom. It is the violence of an oppressive minority against the oppressed majority, not vice versa. Ending free speech harmed working class people. Eliminating soviet democracy and union independence did not affect the bourgeoisie — neither did the militarisation of labour and the repression of strikes. Unsurprisingly, of the 17 000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40 913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants of workers. [George Leggett, **The Cheka: Lenin's Political Police**, p. 178] Ironically, the same Bolshevik ideology which proclaimed this dictatorship over the proletariat a "proletarian" regime deemed the proletariat itself to be "petty-bourgeois" in order to justify this repression.

This can be seen all through the history of Bolshevism. Bambery states (correctly) that *"Lenin and the Bolsheviks initially opposed"* the spontaneously formed soviets of 1905 but then, incredulously, assigns this opposition to the assertion that their *"model of revolution was still shaped by that of the greatest previous revolution in France in 1789."* [**Op. Cit.**] In reality, it was because they considered, in the words of a leading Bolshevik, that *"only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent."* [quoted by Oskar Anweilier, **The Soviets**, p. 77] The soviet, in other words, could not represent the interests of the working class because it was elected by them! The Bolsheviks saw the soviets as a rival to their party and demanded it either accept their political programme or simply become a trade-union like organisation. They feared that it pushed aside the party committee and thus led to the subordination of consciousness to spontaneity, following Lenin in **What is to be Done?** when he had argued that the *"**spontaneous** development of the labour movement leads to it being subordinated to bourgeois ideology."* [**Essential Works of Lenin**, p. 82]

This perspective is at the root of all Bolshevik justifications for party power after the October revolution. With the perception that spontaneous developments inevitably leads to bourgeois domination, any attempt to revoke Bolshevik delegates and elect others to soviets **must** represent counter-revolutionary tendencies. As the working class is divided and subject to *"vacillations"* due to *"wavering and unstable elements among the masses themselves,"* working class people simply cannot manage society themselves. Hence *"the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of*

the party." [Trotsky, *"The Platform of the Opposition"*, **The Challenge of the "Left Opposition" (1926–27)**, p. 395] And, equally logically, to events like Kronstadt. Thus Cornelius Castoriadis:

> *"To manage the work of others — this is the beginning and the end of the whole cycle of exploitation. The 'need' for a specific social category to manage the work of others in production (and the activity of others in politics and in society), the 'need' for a separate business management and for a Party to rule the State — this is what Bolshevism proclaimed as soon as it seized power, and this is what it zealously laboured to impose. We know that it achieved its ends. Insofar as ideas play a role in the development of history — and,* ***in the final analysis****, they play an enormous role — the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy."* [**Political and Social Writings**, vol. 3, p. 104]

Moreover, the logic of the Bolshevik argument is flawed:

> *"Besides, if one wants a government which has to educate the masses and put them on the road to anarchy, one must also indicate what will be the background, and the way of forming this government.*
>
> *"Will it be the dictatorship of the best people? But who are the best? And who will recognise these qualities in them? ... by whom and with what criterion will the choice be made to put the social forces at the[ir] disposal ... ? Will it be instead a government elected by universal suffrage, and thus the more or less sincere expression of the wishes of the majority? But if you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing a genius from the votes of a mass of fools? And what will happen to the minorities which are still the most intelligent, most active and radical part of a society?"* [Malatesta, **Anarchy**, pp. 53–4]

Hence the need for federalism, workers' democracy and socio-economic self-management, for the demands of the Kronstadt revolt. As Malatesta put it: *"Only freedom or the struggle for freedom can be the school for freedom."* [**Errico Malatesta: His Life and Ideas**, p. 59] The *"epic of Kronstadt"* proves *"**conclusively** that what belongs really to **the workers and peasants** can be **neither governmental nor statist**, and what is **governmental and statist** can belong **neither to the workers nor the peasants.**"* [Voline, **The Unknown Revolution**, p. 503] Kronstadt, in the words of Alexander Berkman, *"proves once more that government, the State — whatever its name or form — is ever the mortal enemy of liberty and self-determination. The state has no soul, no principles. It has but one aim — to secure power and hold it, at any cost. That is the political lesson of Kronstadt."* [*"The Kronstadt Rebellion"*, **Op. Cit.**, p. 89]

Anarchists are well aware that differences in political perspective exist within the working class. We are also aware of the importance of revolutionaries organising together to influence the class struggle, raising the need for revolution and the creation of working class organisations which can smash and replace the state with a system of self-managed communes and workers' councils. We are well aware that revolutions take time to develop, that (libertarian) socialism cannot be created overnight, that revolutions need defending a revolution, that expropriating the

power and wealth of the ruling class is just the first stage of a social revolution. Our opposition to Bolshevism is based on **how** a revolution does all this — we reject the Bolshevik conclusion for centralised power (i.e. into the hands of a few party leaders) as doomed to failure. Rather, we agree with Bakunin who argued that revolutionary groups must *"not seek anything for themselves, neither privilege nor honour nor power"* and reject *"any idea of dictatorship and custodial control."* The *"revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegations ... [who] will set out to administer public services, not to rule over peoples."* [**Michael Bakunin: Selected Writings**, p. 172]

Anarchists seek to influence working people directly, via their natural influence in working class organisations like workers' councils, unions and so on. Only by discussion, debate and self-activity can the political perspectives develop and change. This is impossible in a centralised system based on party dictatorship for debate and discussion are pointless if they have no effect on the process of the revolution nor if working people cannot elect, mandate and recall their own delegates. Nor can self-activity be developed if the government uses *"revolutionary coercion"* against *"waving or unstable elements"* (i.e. those who do not unquestioningly follow the orders of the government). Such a regime would hinder the popular initiative required to solve the many problems a social revolution inevitable experiences — with, as Bolshevik Russia showed, terrible consequences for building genuine — self-managed — socialism.

In other words, the fact Bolshevism uses to justify its support for party power is, in fact, the strongest argument against it. By concentrating power in the hands of a few, the political development of the bulk of the population is hindered. No longer in control of their fate, of **their** revolution, they will become pray to counter-revolutionary tendencies. Nor was the libertarian approach impossible to implement during a revolution or civil war. Anarchists applied their ideas very successfully in the Makhnovist movement in the Ukraine — as we discuss in more detail in the appendix "Why does the Makhnovist movement show there is an alternative to Bolshevism?", within the areas they protected, the Makhnovists refused to dictate to the workers and peasants what to do and instead encouraged free soviets and workers' control. In contrast, the Bolsheviks tried to **ban** congresses of workers', peasants' and soldiers' delegates called by the Makhnovists. This should make the reader ponder if the elimination of workers' democracy during the civil war can be fully explained by the objective conditions facing Lenin's government or whether Leninist ideology played an important role in it.

The terrible objective circumstances facing the revolution obviously played a key role in the degeneration of the revolution. However, this is not the whole story. The **ideas** of the Bolsheviks played a key role as well — not least in often making those terrible objective circumstances worse by policies which centralised decision making and so produced wasteful, inefficient, ever-growing and corrupt bureaucracy. The circumstances the Bolsheviks faced may have shaped certain aspects of their actions, but it cannot be denied that the impulse for these actions were rooted in Bolshevik theory. In regards to this type of analysis, the Trotskyist Pierre Frank argues that anarchists think that bureaucratic conceptions *"beget bureaucracy"* and that *"it is ideas, or deviations from them, that determine the character of revolutions. The most simplistic kind of philosophical idealism has laid low historical materialism."* This means, apparently, that anarchists ignore objective factors in the rise of the bureaucracy such as *"the country's backwardness, low cultural level, and the isolation of the revolution."* [Lenin and Trotsky, **Kronstadt**, pp. 22–3] Yet nothing could be further from the truth — what anarchists argue (like Lenin before the October

revolution) is that **every** revolution will suffer from isolation, uneven political development, economic problems and so on (i.e. *"exceptional circumstances,"* see the appendix "What caused the degeneration of the Russian Revolution?"). The question is whether your revolution can survive them and whether your political ideas can meet these challenges without producing bureaucratic deformations. As can be seen from the Russian Revolution, Leninism fails that test.

Moreover, Frank is being incredulous. If we take his argument seriously then we have to conclude that Bolshevik ideology played **no** role in how the revolution developed. In other words, he subscribes to the contradictory position that Bolshevik politics were essential to the success of the revolution and yet played no role in its outcome. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions they face. What decisions they make will be influenced by the ideas they hold — they will not occur automatically, as if people were on auto-pilot — and their decisions are also shaped by the social relationships they experience. Thus, someone placed into a position of power over others will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations. Likewise, someone who favoured working class self-activity and did not view it as "petty-bourgeois" would not, as Zinoviev did in the summer of 1920, issue *"a decree forbidding any kind of commercial transaction. The few small shops still open were closed and their doors sealed. However, the State apparatus was in no position to supply the towns. From this moment on, famine could no longer be attenuated by the initiative of the population. It became extreme."* [Mett, **Op. Cit.**, p. 144]

So, obviously "ideas" matter, particularly during a revolution. Someone in favour of centralisation, nationalisation and who equates party rule with class rule (like Zinoviev, Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation, federalism and self-management. In other words, political ideas do matter in society. Nor do anarchists leave our analysis at this obvious fact, we also argue that the types of organisation people create and work in shapes the way they think and act. This is because specific kinds of organisation have specific authority relations and so generate specific social relationships. These obviously affect those subject to them — a centralised, hierarchical system will create authoritarian social relationships which shape those within it in totally different ways than a federal, egalitarian system. That Frank seems to deny this obvious fact suggests he knows nothing of materialist philosophy and subscribes to the distinctly lobotomised (and bourgeois) "historical materialism" of Lenin (see Anton Pannekoek's **Lenin as Philosopher** for details).

All in all, the attitude of Leninists to the Kronstadt event shows quite clearly that, for all their lip-service to history from below, they are just as fixated with leaders as is bourgeois history. As Cornelius Castoriadis argues:

> *"Now, we should point out that it is not workers who write history. It is always the **others**. And these others, whoever they may be, have a historical existence only insofar as the masses are passive, or active simply to support them, and this is precisely what 'the others' will tell us at every opportunity. Most of the time these others will not even possess eyes to see and ears to hear the gestures and utterances that express people's autonomous activity. In the best of instances, they will sing the praises of this activity so long as it **miraculously** coincides with their own line, but they will radically condemn it, and impute to it the basest motives, as soon as it strays therefrom. Thus Trotsky describes in grandiose terms the anonymous workers of Petrograd moving ahead of the*

Bolshevik party or mobilising themselves during the Civil War, but later on he was to characterise the Kronstadt rebels as 'stool pigeons' and 'hirelings of the French High Command.' They lack the categories of thought — the brain cells, we might dare say — necessary to understand, or even to record, this activity as it really occurs: to them, an activity that is not instituted, that has neither boss nor program, has no status; it is not even clearly perceivable, except perhaps in the mode of 'disorder' and 'troubles.' The autonomous activity of the masses belongs by definition to what is ***repressed*** *in history."* [**Op. Cit.**, p. 91]

The Trotskyist accounts of the Kronstadt revolt, with their continual attempts to portray it as a White conspiracy, proves this analysis is correct. Instead it was labelled the work of *"backward peasants"* being misled by SRs, a White General and spies — indeed, the possibility that the revolt was a spontaneous mass revolt with political aims was dismissed by one of them as *"absurd"*. [Wright, *"The Truth about Kronstadt"*, **Op. Cit.**, p. 111] Like the capitalist who considers a strike the work of "outside agitators" and "communists" misleading their workers, the Trotskyists present an analysis of Kronstadt reeking of elitism and ideological incomprehension. Independent self-activity by the working class is dismissed as "backward" and to be corrected by the "proletarian dictatorship" by any means necessary. Clearly Bolshevik ideology played a key role in the rise of Stalinism along with the regime built by Lenin and Trotsky which the Kronstadt sailors rebelled against. As Emma Goldman summarised:

"I see no marked difference between the two protagonists of the benevolent system of the dictatorship except that Leon Trotsky is no longer in power to enforce its blessings, and Josef Stalin is. No, I hold no brief for the present ruler of Russia. I must, however, point out that Stalin did not come down as a gift from heaven to the hapless Russian people. He is merely continuing the Bolshevik traditions, even if in a more relentless manner.

"The process of alienating the Russian masses from the Revolution had begun almost immediately after Lenin and his party had ascended to power. Crass discrimination in rations and housing, suppression of every political right, continued persecution and arrests, early became the order of the day. True, the purges undertaken at that time did not include party members ... But all the other political opponents, among them Mensheviki, Social Revolutionists, Anarchists, many of the Liberal intelligentsia and workers as well as peasants, were given short shrift in the cellars of the Cheka, or exiled to slow death in distant parts of Russia and Siberia. In other words, Stalin has not originated the theory or methods that have crushed the Russian Revolution and have forged new chains for the Russian people.

"I admit, the dictatorship under Stalin's rule has become monstrous. That does not, however, lessen the guilt of Leon Trotsky as one of the actors in the revolutionary drama of which Kronstadt was one of the bloodiest scenes." [*"Trotsky Protests Too Much"*, **Op. Cit.**, pp. 251–2]

Lastly, the supporters of Bolshevism argue that in suppressing the revolt *"the Bolsheviks only did their duty. They defended the conquests of the revolution against the assaults of the counterrevolution."* [Wright, *"The Truth about Kronstadt"*, **Op. Cit.**, p. 123] In other words, we can expect more Kronstadts if these "revolutionaries" gain power — no clearer condemnation of Bolshevism

as a socialist current is required. More, that is how Kronstadt is used in Leninist circles to this day, namely to steel the revolutionary cadres for the same task in the future by justifying repression in the past. For no matter how much Leninists may say otherwise, the ease with which the Bolsheviks embraced policies which are alleged to be the antithesis of what their ideology is claimed to stand for is of note — as is the lack of regret and the willingness of their followers to still justify them. As Samuel Farber reminds us, *"there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers' control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921."* [**Before Stalinism**, p. 44] It is the practice of Bolshevik – and acts such as the repression of the Kronstadt revolt — which shows that it is fundamentally a "socialism from above" ideology (see section H.3.3) and so to be avoided.

And, we must ask, what, exactly, **were** these "conquests" of the revolution that must be defended? The suppression of strikes, independent political and labour organisations, elimination of freedom of speech, assembly and press and, of course, the elimination of soviet and union democracy in favour of party power? Which, of course, for all Leninists, is the **real** revolutionary conquest and **anyone** who questions that is a counter-revolutionary: *"The sailors had dared to stand by the discontented workers. They had dared to demand that the promise of the Revolution — all Power in the Soviets — should be fulfilled. The political dictatorship had slain the dictatorship of the proletariat. That and that alone was their unforgivable offense against the holy spirit of Bolshevism."* [Emma Goldman, *"Trotsky Protests Too Much"*, **Op. Cit.**, p. 266]

The issue is simple — either socialism means the self-emancipation of the working class or it does not. Leninist justifications for the suppression of the Kronstadt revolt simply mean that for the followers of Bolshevism, when necessary, the party will paternalistically repress the working class for its own good. The clear implication of this Leninist support of the suppression of Kronstadt is that, for Leninism, it is dangerous to allow working class people to manage society and transform it as they see fit as they will make wrong decisions (like vote for the wrong party or, worse, take the management of their lives into their own hands). If the party leaders decide a decision by the masses is incorrect, then the masses are overridden (and repressed). So much for *"all power to the soviets"* or *"workers' power."*

Ultimately, Wright's comments (and those like it) show that Bolshevism's commitment to workers' power and democracy is non-existent. What is there left of workers' self-emancipation, power or democracy when the "workers state" represses the workers for trying to practice these essential features of any real form of socialism? How will the State machine required to do this "wither away"? It is the experience of Bolshevism in power that best refutes the Marxist claim that the workers' state "will be democratic and participatory." The suppression of Kronstadt was just one of a series of actions by the Bolsheviks which began **before** the start of the Civil War, with them abolishing soviets which elected non-Bolshevik majorities, abolishing elected officers and soldiers soviets in the Red Army and Navy and replacing workers' self-management of production by state-appointed managers with *"dictatorial"* powers (see section H.6).

As anarchists predicted, the "workers' state" did not, could not, be "participatory" as it was still a state. It spawned a new class system based on the bureaucracy oppressing and exploiting the working classes. Kronstadt is part of the empirical evidence which proves Bakunin's predictions on the authoritarian nature of Marxism (see section H.1.1). This warning by Bakunin was confirmed by the Kronstadt rebellion and the justifications made at the time and afterwards by the supporters of Bolshevism:

> *"What does it mean, 'the proletariat raised to a governing class?' Will the entire proletariat head the government? The Germans number about 40 million. Will all 40 million be members of the government? The entire nation will rule, but no one would be ruled. Then there will be no government, there will be no state; but if there is a state, there will also be those who are ruled, there will be slaves.*
>
> *"In the Marxists' theory this dilemma is resolved in a simple fashion. By popular government they mean government of the people by a small number of representatives elected by the people. So-called popular representatives and rulers of the state elected by the entire nation on the basis of universal suffrage — the last word of the Marxists, as well as the democratic school — is a lie behind which the despotism of a ruling minority is concealed, a lie all the more dangerous in that it represents itself as the expression of a sham popular will.*
>
> *"So ... it always comes down to the same dismal result: government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of* ***former*** *workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers' world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people ...*
>
> *"They say that this state yoke, this dictatorship, is a necessary transitional device for achieving the total liberation of the people: anarchy, or freedom, is the goal, and the state, or dictatorship, the means. Thus, for the masses to be liberated they must first be enslaved ... They claim that only a dictatorship (theirs, of course) can create popular freedom. We reply that no dictatorship can have any other objective than to perpetuate itself, and that it can engender and nurture only slavery in the people who endure it. Liberty can only be created by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward."* [**Statism and Anarchy**, pp. 178–9]

The tragedy of Kronstadt is a product of an ideology which did not — could not — understand how its strategy as well as the socio-economic structures it favoured and built created a new class and armed it both ideologically and physically to secure its position in the new social hierarchy. If, as Marx suggested, history repeats itself first as tragedy and then as farce, the antics of Leninists since 1921 — the lying, the selective quoting, the cherry-picking, the ignoring of awkward facts, the replacing of research by the repeating of orthodoxy, etc. — to justify the repression are definitely farcical. All in all, Kronstadt should be remembered by all genuine socialists for it exposed the reality of the Bolshevik regime like no other event and so marked the definitive end of the Russian Revolution: its demands were the minimum needed to save the revolution from bureaucratic degeneration, party dictatorship and state-capitalism.

What caused the degeneration of the Russian Revolution?

As is well known, the Russian Revolution failed. Rather than produce socialism, the Bolshevik revolution gave birth to an autocratic party dictatorship presiding over a state capitalist economy. In turn, this regime gave rise to the horrors of Stalinism. While Stalinism was denounced by all

genuine socialists, a massive debate has existed within the Marxist movement over when, exactly, the Russian Revolution failed and why it did.

Indeed, it is fair to say that the date choosen indicates much about the individual's or party's other politics. Some argue around 1928, others say around 1924, a few — anarchists and libertarian Marxists — argue from the Bolshevik seizure of power 1917. The reasons for the failure tend to be more readily agreed upon within pro-Bolshevik Marxist circles than the date: isolation, the economic and social costs of civil war, the "backward" nature of Russian society and economy are usually listed as the key factors. As we shall see, these are often referred to as "objective factors" in constrast to the "subjective factors" of Bolshevik ideology, decisions and actions.

Moreover, what the Stalinist regime was is also discussed heatedly in Marxist circles. While anarchists agree with Emma Goldman's summation that it was *"an absolute despotism politically and the crassest form of state capitalism economically"* [**Red Emma Speaks**, p. 420] so confirming in practice Kropotkin's analysis that *"State Socialism ... is in reality nothing but State capitalism"* [*"Caesarism,"*, **Freedom**, June 1899], mainstream Marxists have had more difficulty agreeing — some (orthodox Trotskyists) claiming it was a *"degenerated workers state,"* others (such as the neo-Trotskyist British SWP) that it was *"state capitalist"* (although, as discussed in section H.3.13, for different reasons than anarchists). Indeed, after describing the various Marxist theories on the Russian regime, one expert concluded that *"it is perfectly clear that Soviet society can hardly be explained in orthodox-Marxian terms at all. If it is accepted that the USSR was not communist in a Marxian sense, the analysis becomes almost impossible"*. [Marcel van der Linden, **Western Marxism and the Soviet Union**, p. 317]

For anarchists, however, the failure of Bolshevism did not come as a surprise. In fact, just as with the reformist fate of the Social Democrats, the failure of the Russian Revolution provided empirical evidence for Bakunin's critique of Marx (section H.1.1). As Emma Goldman recounts in her memoirs:

> *"Professor Harold Laski ... expressed the opinion that I ought to take some comfort in the vindication anarchism had received by the Bolsheviki. I agreed, adding that not only their regime, but their stepbrothers as well, the Socialists in power in other countries, had demonstrated the failure of the Marxian State better than any anarchist argument. Living proof was always more convincing than theory. Naturally I did not regret the Socialist failure but I could not rejoice in it in the face of the Russian tragedy."* [**Living My Life**, vol. 2, p. 969]

Alexander Berkman, like Goldman an eye-witness to developments between 1920 and 1922, provides an excellent overview of what had happened in Russia after the October Revolution:

> *"The elective system was abolished, first in the army and navy, then in the industries. The Soviets of peasants and workers were castrated and turned into obedient Communist Committees, with the dreaded sword of the Cheka [political para-military police] ever hanging over them. The labour unions governmentalised, their proper activities suppressed, they were turned into mere transmitters of the orders of the State. Universal military service, coupled with the death penalty for conscientious objectors; enforced labour, with a vast officialdom for the apprehension and punishment of 'deserters'; agrarian and industrial conscription of the peasantry; military Communism in the*

> *cities and the system of requisitioning in the country ... ; the suppression of workers' protests by the military; the crushing of peasant dissatisfaction with an iron hand ..."* [**The Russian Tragedy**, p. 27]

Given that Leninists claim that the Russian revolution was a success (at least initially) and so proves the validity of their ideology, anarchists have a special duty to analyse and understand what went wrong. Simply put, if the Russian Revolution was a success, Leninism does not need failures!

This appendix aims to discuss these pro-Bolshevik explanations for the failure of Bolshevism in more detail than in section H.6.1, indicating why anarchists are not convinced by Leninist accounts of why Bolshevism created a new class system rather than socialism. This subject is no mere historical discussion. Unless we learn the lessons of history, we will be doomed to repeat them. More, given the fact that many people who become interested in socialist ideas will come across the remnants of Leninist parties it is important that libertarians explain clearly and convincingly why the Russian Revolution failed and the role of Bolshevik ideology in that process. We need to account why a popular revolution became a state capitalist party dictatorship. As Noam Chomsky put it:

> *"In the stages leading up to the Bolshevik coup in October 1917, there **were** incipient socialist institutions developing in Russia — workers' councils, collectives, things like that. And they survived to an extent once the Bolsheviks took over — but not for very long; Lenin and Trotsky pretty much eliminated them as they consolidated their power. I mean, you can argue about the **justification** for eliminating them, but the fact is that the socialist initiatives were pretty quickly eliminated.*
>
> *"Now, people who want to justify it say, 'The Bolsheviks had to do it' – that's the standard justification: Lenin and Trotsky had to do it, because of the contingencies of the civil war, for survival, there wouldn't have been food otherwise, this and that. Well, obviously the question is, was that true. To answer that, you've got to look at the historical facts: I don't think it was true. In fact, I think the incipient socialist structures in Russia were dismantled **before** the really dire conditions arose ... reading their own writings, my feeling is that Lenin and Trotsky knew what they were doing, it was conscious and understandable."* [**Understanding Power**, p. 226]

As we discussed in section H.6, Chomsky's feeling is more than supported by the historical record. The elimination of meaningful working class freedom and self-management began from the creation of the new regime after the October Revolution and was firmly in place before the start of the civil war at the end of May, 1918. The civil war simply accelerated processes which had already began, strengthened policies that had already been applied. Indeed, it could be argued that rather than impose alien policies onto Bolshevism, the civil war simply brought the hidden (and not-so-hidden) state capitalist and authoritarian politics of Leninism (and mainstream Marxism) to the fore.

Which is why analysing the failure of the revolution is important. If the various arguments presented by Leninists on why Bolshevism failed (and, consequently, why Stalinism developed) can be refuted, then we are left with the key issues of revolutionary politics — whether Bolshevik politics had a decisive negative impact on the development of the Russian Revolution and, if so,

whether there was an alternative to those politics. As regards the first issue, as we discussed in section H.6.2, anarchists argue that this was the case: Bolshevik ideology itself played a key role in the degeneration of the revolution (also see the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?"). And as regards the second, anarchists can point to the example of the Makhnovist movement active in Ukraine during the same revolution, which proves that alternative policies were possible and could be applied with radically different outcomes (see the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?").

Before continuing, we must note that our division of the discussion into objective and subjective factors is, of course, artifical and purely presentational. It is impossible to discuss everything at once and, moreover, this reflects pro-Bolshevik accounts of the regime which focus primarily on "objective factors" and rarely address ideological and structural influences (beyond lamenting that their often all-too-idealised version of Bolshevik ideology had to be undermined to secure the survival of the revolution). So it must be noted that anarchists stress the interplay between the "objective factors" and the subjective ones such as party ideology. Faced with difficult circumstances, people and parties react in different ways. If they did not then it would imply what people think has no impact at all on their actions, that the politics of the Bolsheviks played no role in their decisions — which raises the interesting contradiction of why Leninists stress the power and importance of having the correct (their!) ideology. Unsurprisingly, this position simply cannot be maintained. As section H indicates, Leninist ideology itself played a key role in the rise of Stalinism.

Leninists, of course, try to distance themselves from Stalinism, correctly arguing that it was a brutal and undemocratic system (although some did, and do, defend it against attacks from the right). The problem is that it was when Lenin and Trotsky were at the head of the so-called "workers' state" rather than when Stalin occupied that position that the regime broke strikes, repressed protests, shot strikers, banned left papers along with radical organisations and party factions, sent workers and revolutionaries to prison, advocated and introduced one-man management and piece-work in the workplace, eliminated democracy in the military, packed soviets to secure party power and shut down soviets elected with the "wrong" (i.e. non-Bolshevik) majorities, eliminated independent trade unions, and so on.

Many Leninists know nothing of this. Their parties simply do not present their members with the full facts of when Lenin and Trotsky were in power, nor do they encourage an atmosphere of independent analysis and investigation to discover these themselves. Others do know and either ignore than when discussing the revolution or attempt to justify these actions. When anarchists discuss why the Russian Revolution failed, these Leninists have basically one reply. They argue that anarchists never seem to consider the objective forces at play during the Russian revolution, namely the civil war, the legacy of World War One, the international armies of counter-revolution and economic disruption. These "objective factors" meant that the revolution was, basically, suffocated and were the overriding cause for the rise of authoritarianism and the crushing of socialism.

Thus, as one British Leninist puts it, the *"degree to which workers can 'make their own history' depends on the weight of objective factors bearing down on them ... To decide in any given circumstance the weight of the subjective and objective factors demands a concrete analysis of the balance of forces."* The conditions in Russia meant that the *"subjective factor"* of Bolshevik ideology *"was reduced to a choice between capitulation to the Whites or defending the revolution with whatever*

means were at hand. Within these limits Bolshevik policy was decisive. But it could not wish away the limits and start with a clean sheet. It is a tribute to the power of the Bolsheviks' politics and organisation that they took the measures necessary and withstood the siege for so long." [John Rees, *"In Defence of October,"* pp. 3–82, **International Socialism**, no. 52, p. 30]

For anarchists and other libertarian socialists, such "objective factors" do not explain why the Russian Revolution failed. This is because almost all revolutions will face the same, or similar, problems. As we indicate in section 1 of this appendix, anarchists like Kropotkin had long indicated that a revolution would suffer such events and argued for strategies and structures which would mitigate their impact by encouraging mass participation and local initiative. More, as discussed in section 2 the Bolsheviks themselves, with Lenin at their head, argued at the time that such factors would affect every revolution. In section 3, we build on this by arguing that any defence of Bolshevism based on blaming the impact of the civil war is both factually and logically flawed, not least because as we discussed in section H.2.1, Leninists like to claim that they are "realistic" (unlike the "utopian" anarchists) and recognise the need for a "workers' state" because civil war is inevitable in a revolution. As far as economic disruption goes, as we discuss in section 4 this explanation of Bolshevik authoritarianism is unconvincing as **every** revolution — indeed, every revolutionary situation — has faced and will face this problem. Then section 5 analyses the common Leninist argument that the revolution failed because the Russian working class became "atomised" or "declassed," showing that the Russian working class was more than capable of collective action throughout the 1918 to 1921 period (and beyond). The problem for the Leninists, which explains why they are disinclined to discuss it, is that it was directed **against** the Bolshevik party. As section 6 shows, the Bolshevik leaders at the time did not explain their actions in terms of the *"objective factors"* they faced. Then section 7 discusses the ideological utility that stressing "objective factors" has for Leninist ideology (namely, it shifts perspectives away from the Bolshevik vision of socialism) while section 8 highlights how Leninists also stress the importance of the very ideology they seek to discount.

Three final points.

First, anarchists do not criticise the Bolshevik regime because it was not perfect. Anarchists, as indicated in section H.2.5, have never thought there could be an "over-night" revolution which would usher in an ideal and so we subject the Bolshevik regime to realistic criteria, namely whether it was encouraging or undermining socialist tendencies. *"Not that I expected to find Russia a proletarian Eldorado,"* Alexander Berkman recalled. *"By no means. I knew the great travail of a revolutionary period, how stupendous the difficulties to be overcome."* [**The Bolshevik Myth**, 328–9] Emma Goldman likewise summed up this position well:

> *"Both these criticisms would be justified had I come to Russia expecting to find Anarchism realised, or if I were to maintain that revolutions can be made peacefully ... I do not therefore expect Anarchism to follow in the immediate footsteps of centuries of despotism and submission. And I certainly did not expect to see it ushered in by the Marxian theory.*
>
> *"I did, however, hope to find in Russia at least the beginnings of the social changes for which the Revolution had been fought. Not the fate of the individual was my main concern as a revolutionist. I should have been content if the Russian workers and peasants as a whole had derived essential social betterment as a result of the Bolshevik régime.*

> *"Two years of earnest study, investigation, and research convinced me that the great benefits brought to the Russian people by Bolshevism exist only on paper, painted in glowing colours to the masses of Europe and America by efficient Bolshevik propaganda. As advertising wizards the Bolsheviki excel anything the world had ever known before. But in reality the Russian people have gained nothing from the Bolshevik experiment."* [**My Disillusionment in Russia**, p. xlvii-xlviii]

Second, we must stress that libertarians do not think any future revolution will suffer as terrible conditions as that experienced by the Russian one. However, it might and we need to base our politics on the worse case possibility. That said, we argue that Bolshevik policies made things worse — by centralising economic and political power, they automatically hindered the participation of working class people in the revolution, smothering any creative self-activity under the dead-weight of state officialdom. As a libertarian revolution would be based on maximising working class self-activity (at all levels, locally and upwards) we would argue that it would be better placed to respond to even the terrible conditions facing the Russian Revolution.

Third, it must be stressed that we are discussing these factors individually simply because it is easier to do so. It reality, they all interacted. Civil war undoubtedly meant economic disruption, economic disruption meant unemployment and that affected the working class via fewer goods available, fewer goods made it harder to exchange with the peasants for food, necessitating forced requisition by the regime, for example. So just because we separate the specific issues for discussion purposes, it should not be taken to imply that we are not aware of their combined impact. Likewise, recognising the impact of certain developments does not mean the responses to them are above criticism nor made the situation worse. Thus in our example above key links in that chain could have been broken by different policies.

To conclude: while mechanically invoking "objective factors" may be sufficient for the followers of Bolshevism, it cannot be sufficient for anyone who wants to learn from history, tather than repeat it. For, ultimately, if difficult times back in 1918–21 justified suppressing working class political and economic freedom and self-management, imprisoning and shooting anarchists and other socialists, implementing and glorifying party dictatorship, what might we expect during difficult times in the future? Simply put, if your defence of the Bolsheviks rests simply on "difficult circumstances" then it can only mean one thing, namely if "difficult circumstances" occur again (and they will) we can expect the same outcome.

Worse, perhaps a future revolution will be less destructive, less isolated, less resisted than the Russian (although, as we note below in section 2, leading Bolsheviks like Lenin, Trotsky and Bukharin argued that this would **not** be the case). That **is** a possibility. However, should we embrace an ideology whose argument is based on the hope that fate will be kinder to them this time? Particularly when, even assuming these better "objective circumstances," while we may manage to avoid the horrors of Stalinism we would not avoid the recreation of a some kind of new class system as such an outcome is inherent in state-socialism?

So while it cannot be denied that objective factors influenced how certain Bolshevik policies were shaped and applied, the inspiration of those policies came from Bolshevik ideology. An acorn will grow and develop depending on the climate and location it finds itself in, but regardless of the "objective factors" it will still grow into an oak tree, however stunted. Similarly with the Russian revolution. While the circumstances it faced influenced its growth, Bolshevik ideology could not help but produce an authoritarian regime with no relationship with **real** socialism.

1 Do anarchists ignore the objective factors facing the Russian revolution?

It is often asserted by Leninists that anarchists simply ignore the "objective factors" facing the Bolsheviks when we discuss the degeneration of the Russian Revolution. According to this argument, anarchists present a basically idealistic analysis of the failure of Bolshevism, one not rooted in the material conditions (civil war, economic chaos, etc.) facing Lenin and Trotsky. As one Trotskyist puts it, anarchists *"do not make the slightest attempt at a serious analysis of the situation"* and so *"other considerations, of a different, 'theoretical' nature, are to be found in their works."* [Pierre Frank, *"Introduction,"* Lenin and Trotsky, **Kronstadt**, p. 22] Thus:

> *"Bureaucratic conceptions beget bureaucracy just as opium begets sleep by virtue of its sleep-inducing properties. Trotsky was wrong to explain the proliferation and rise of the bureaucracy on the basis of the country's backwardness, low cultural level, and the isolation of the revolution. No, what gave rise to a social phenomenon like Stalinism was a conception or idea ... it is ideas, or deviations from them, that determine the character of revolutions. The most simplistic kind of philosophical idealism has laid low historical materialism."* [Frank, **Op. Cit.**, pp. 22–3]

Many other Trotskyists take a similar position (although most would include the impact of the Civil War on the rise of Bolshevik authoritarianism and the bureaucracy). Duncan Hallas, for example, argues that the account of the Bolshevik counter-revolution given in the Cohn-Bendit brothers' **Obsolete Communism** is marked by a *"complete omission of any consideration of the circumstances in which [Bolshevik decisions] took place. The ravages of war and civil war, the ruin of Russian industry, the actual disintegration of the Russian working class: all of this, apparently, has no bearing on the outcome."* [**Towards a Revolutionary Socialist Party**, p. 41]

So, it is argued, by ignoring the problems facing the Bolsheviks and concentrating on their **ideas**, anarchists fail to understand **why** the Bolsheviks acted as they did. Unsurprisingly anarchists are not impressed with this argument. This is for numerous reasons.

First, and most obvious, the rise of bureaucracies is hardly limited to Bolshevik Russia. As Trotskyists themselves note as regards the trade unions and social democratic parties, although they exist in advanced capitalist countries with a high cultural level these have ruling bureaucracies (and had them for many decades, indeed since before the First World War). Similarly, all States have bureaucracies regardless of their cultural level. Indeed, Marx himself noted the bureaucratic machine which existed in France and the role it played in society since the 1800s (see section H.3.9). Even Trotsky had to admit that the Bolshevik Party itself — like all Social Democratic Parties across the globle — had a bureaucracy before the revolution (see section H.5.12), something which internal critics of every Leninist party which exists today echo, including those in the most advanced nations with a high cultural level (see section H.5.11). The list goes on.

Do anarchists argue that "ideas" produce these bureucracies? No, far from it — specific forms of social structure generate them. Thus hierarchical and centralised structures will inevitably generate bureaucracies — a theory generated from a careful analysis of countless organisations, including the State and mainstream trade unions. Nor do these structures just appear, but rather reflect specific class interests and needs — minority classes cannot favour social structures which include the masses. Thus *"the ideal of the **Jacobin State** .. . had been designed from the viewpoint of the bourgeois, in direct opposition to the egalitarian and communist tendencies of the people*

which had arisen during the Revolution" [Peter Kropotkin, **Modern Science and Anarchy**, p. 366] Likewise, previous revolutions saw a similar process, as Kropotkin noted:

> *"It is often thought that it would be easy for a revolution to economise in the administration by reducing the number of officials. This was certainly not the case during the Revolution of 1789–1793, which with each year extended the functions of the State, over instruction, judges paid by the State, the administration paid out of the taxes, an immense army, and so forth."* [**The Great French Revolution**, vol. II, p. 460]

So based on an analysis of the State which recognised that it had its own vested interests (as outlined in section B.2), anarchists correctly predicted the *"new form of wage-labour which would arise if the State took possession of the means of production and exchange ... New powers, industrial powers, added to those which it [already] possesses ... would create a new, formidable instrument of tyranny."* [Kropotkin, **Modern Science and Anarchy**, p. 170] Trotsky's post-hoc analysis sought to explain something unanticipated in his own ideology and from which it had to be excused all responsibility, regardless of the facts and logic.

Given that Bolshevik ideology favoured adding more and more functions to the ("workers") state, extending its reach into economic matters, it comes as no surprise that its bureaucracy likewise grew — at least to non-Trotskyists. As such, rather than express the *"most simplistic kind of philosophical idealism"*, the anarchist critique is rooted in a clear materialist analysis of the effects of certain organisational structures and why these develop. Insofar as ideas played a role in the fate of Russian Revolution, they are reflected in Bolshevik preferences for centralised structures and the social relationships these produced when they were built — as we discuss elsewhere (see section H.6.2 and its related appendix, "How did Bolshevik ideology contribute to the failure of the Revolution?"). Rather than Trotsky's attempts to understand a degeneration he failed to recognise until 1923, anarchists saw the signs when they first arose precisely due to our theory (indeed, Trotsky's ability to recognise and explain Stalinism could only be hindered by him being one of the main architects of the degeneration).

Second, according to anarchist theory, the "objective factors" facing the Bolsheviks are to be expected in **any** revolution. Indeed, the likes of Bakunin and Kropotkin predicted that a revolution would face the very "objective factors" which Leninists use to justify and rationalise Bolshevik actions.

As such, to claim that anarchists ignore the "objective factors" facing the Bolsheviks is simply a joke: how can anarchists be considered to ignore what we consider to be the inevitable results of a revolution? Moreover, these Bolshevik assertions ignore the fact that the anarchists who wrote extensively about their experiences in Russia never failed to note that difficult objective factors facing it. Alexander Berkman in **The Bolshevik Myth** paints a clear picture of the problems facing the revolution, as does Emma Goldman in **My Disillusionment in Russia**. This is not to mention anarchists like Voline, Arshinov and Maximoff who took part in the Revolution, experiencing the "objective factors" first hand (and in the case of Voline and Arshinov, participating in the Makhnovist movement which, facing the same — if not worse — factors, managed **not** to act as the Bolsheviks did).

However, as the claim that anarchists ignore the "objective circumstances" facing the Bolsheviks is relatively common, it is important to refute it once and for all — even if it means repeating some of arguments made in section H.6.1.

Anarchists take it for granted that, to quote Bakunin, revolutions *"are not child's play"* and that they mean *"war, and that implies the destruction of men and things."* The *"Social Revolution must put an end to the old system of organisation based upon violence, giving full liberty to the masses, groups, communes, and associations, and likewise to individuals themselves, and destroying once and for all the historic cause of all violences, the power and existence of the State."* This meant a revolution would be *"spontaneous, chaotic, and ruthless, always presupposes a vast destruction of property."* [**The Political Philosophy of Bakunin**, p. 372, p. 373, p. 380] He took it for granted that counter-revolution would exist, arguing that it was necessary to *"constitute the federation of insurgent associations, communes and provinces ... to organise a revolutionary force capable of defeating reaction"* and *"for the purpose of self-defence."* [**Micheal Bakunin: Selected Writings**, p. 171]

It would, of course, be strange if this necessity for defence and reconstruction would have little impact on the economic conditions in the revolutionised society. The expropriation of the means of production and the land by a free federation of workers' associations would have an impact on the economy. Kropotkin built upon Bakunin's arguments, stressing that a **social** revolution would, by necessity, involve major difficulties and harsh objective circumstances. It is worth quoting one of his many discussions of this at length:

> *"Suppose we have entered a revolutionary period, with or without civil war — it does not matter, — a period when old institutions are falling into ruins and new ones are growing in their place. The movement may be limited to one State, or spread over the world, — it will have nevertheless the same consequence: an immediate slackening of individual enterprise all over Europe. Capital will conceal itself, and hundreds of capitalists will prefer to abandon their undertakings and go to watering-places rather than abandon their unfixed capital in industrial production. And we know how a restriction of production in any one branch of industry affects many others, and these in turn spread wider and wider the area of depression.*
>
> *"Already, at this moment, millions of those who have created all riches suffer from want of what must be considered* ***necessaries*** *for the life of a civilised man... Let the slightest commotion be felt in the industrial world, and it will take the shape of a general stoppage of work. Let the first attempt at expropriation be made, and the capitalist production of our days will at once come to a stop, and millions and millions of 'unemployed' will join the ranks of those who are already unemployed now.*
>
> *"More than that ... The very first advance towards a Socialist society will imply a thorough reorganisation of industry as* ***to what we have to produce.*** *Socialism implies ... a transformation of industry so that it may be adapted to the needs of the customer, not those of the profit-maker. Many a branch of industry must disappear, or limits its production; many a new one must develop. We are now producing a great deal for export. But the export trade will be the first to be reduced as soon as attempts at Social Revolution are made anywhere in Europe ... All that* ***can*** *be, and* ***will*** *be reorganised in time — not by the State, of course (why, then, not say by Providence?), but by the workers themselves. But, in the meantime, the worker ... cannot wait for the gradual reorganisation of industry ... The great problem of how to supply the wants of millions will thus start up at once in all its immensity. And the necessity of finding an* ***immediate solution*** *for it is the reason we consider that a step in the direction of [libertarian]*

> *Communism will be imposed on the revolted society — not in the future, but as soon as it applies its crowbar to the first stones of the capitalist edifice."* [**Act for Yourselves**, pp. 57–9]

This perspective was at the core of Kropotkin's politics — he was an anarchist not because he thought the revolution would be easy but because he recognised it would be difficult. His classic work **The Conquest of Bread** was based on this clear understanding of the nature of a social revolution and the objective problems it will face. As he put it, while a *"political revolution can be accomplished without shaking the foundations of industry"* a revolution *"where the people lay hands upon property will inevitably paralyse exchange and production ... This point cannot be too much insisted upon; the reorganisation of industry on a new basis ... cannot be accomplished in a few days."* Indeed, he considered it essential to *"show how tremendous this problem is."* [**The Conquest of Bread**, pp. 72–3]

He pointed to the experience of the French Revolution as evidence for this, as it showed, *"[o]ne of the great difficulties in every Revolution is the feeding of the large towns."* This was because the *"large towns of modern times are centres of various industries that are developed chiefly for the sake of the rich or for the export trade"* and these *"two branches fail whenever any crisis occurs, and the question then arises of how these great urban agglomerations are to be fed."* This crisis, rather than making revolution impossible, spurred the creation of what Kropotkin terms *"the communist movement"* in which *"the Parisian proletariat had already formed a conception of its class interests and had found men to express them well."* [**The Great French Revolution**, vol. II, p. 457 and p. 504]

As for self-defence, he reproached the authors of classic syndicalist utopia **How we shall bring about the Revolution** for *"considerably attenuat[ing] the resistance that the Social Revolution will probably meet with on its way."* He stressed that the *"check of the attempt at Revolution in Russia [in 1905] has shown us all the danger that may follow from an illusion of this kind."* Elsewhere he argued that *"[i]f armed brigands attack a people, is not that same people, armed with good weapons, the surest rampart to oppose to the foreign aggressor?"* He recognised that *"a society in which the workers would have a dominant voice"* would require a revolution to create, *"a revolution far more profound than any of the revolutions which history had on record."* In such a rebellion, however, *"the workers would have against them, not the rotten generation of aristocrats against whom the French peasants and republicans had to fight in the [eighteenth] century — and even that fight was a desperate one — but the far more powerful, intellectually and physically, middle-classes, which have at their service all the potent machinery of the modern State."* Thus *"each time that such a period of accelerated evolution and reconstruction on a grand scale begins, civil war is liable to break out on a small or large scale."* [**Direct Struggle Against Capital**, p. 561, p. 121 and pp. 495–6]

It must, therefore, be stressed that the very "objective factors" supporters of Bolshevism use to justify the actions of Lenin and Trotsky were correctly predicted by anarchists decades before hand. Indeed, rather than ignore them anarchists like Kropotkin based their political and social ideas on these difficulties. As such, it seems ironic for Leninists to attack anarchists for allegedly ignoring these factors. It is even more ironic as these very same Leninists are meant to know that **any** revolution will involve these exact same "objective factors," something that Lenin and other leading Bolsheviks eventually acknowledged (see the next section).

Therefore, as noted above, when anarchists like Emma Goldman and Alexander Berkman arrived in Russia they were aware of the problems it, like any revolution, would face. Their critique of Bolshevism was not based on decrying what they considered as inevitable, but rather the (counter-productive) Bolshevik response. Unsurprisingly, this extremely realistic perspective can be found in their later works. Berkman, for example, stressed that *"when the social revolution had become thoroughly organised and production is functioning normally there will be enough for everybody. But in the first stages of the revolution, during the process of re-construction, we must take care to supply the people the best we can, and equally, which means rationing."* This was because the *"first effect of the revolution is reduced production."* This would be initially due to the general strike which is its *"starting point."* However, *"[w]hen the social revolution begins in any land, its foreign commerce stops: the importation of raw materials and finished products is suspended. The country may even be blockaded by the bourgeois governments."* In addition, he thought it important not to suppress *"small scale industries"* as they would be essential when *"a country in revolution is attacked by foreign governments, when it is blockaded and deprived of imports, when its large-scale industries threaten to break down or the railways do break down."* Rather than assume the problem away, it was essential that to counteract isolation workers must understand *"that their cause is international"* and that *"the organisation of labour"* must develop *"beyond national boundaries."* However, *"the probability is not to be discounted that the revolution may break out in one country sooner than in another"* and *"in such a case it would become imperative ... not to wait for possible aid from outside, but immediately to exert all her energies to help herself supply the most essential needs of her people by her own efforts."* [**What is Anarchism?**, p. 215, p. 223 p. 228, p. 229 and p. 227]

Emma Goldman, likewise, noted that it was *"a tragic fact that all revolutions have sprung from the loins of war. Instead of translating the revolution into social gains the people have usually been forced to defend themselves against warring parties." "It seems,"* she noted, *"nothing great is born without pain and travail"* as well as *"the imperative necessity of defending the Revolution."* However, in spite of these inevitable difficulties she pointed to how the Spanish anarchists *"have shown the first example in history* ***how Revolutions should be made****"* by *"the constructive work"* of *"socialising of the land, the organisation of the industries."* [**Vision on Fire**, p. 218, p. 222 and pp. 55–56]

These opinions were, as can be seen, to be expected from revolutionary anarchists schooled in the ideas of Bakunin and Kropotkin. Clearly, then, far from ignoring the "objective factors" facing the Bolsheviks, anarchists have based their politics around them. We have always argued that a social revolution would face isolation, economic disruption and civil war and have, for this reason, stressed the importance of mass participation (and the appropriate **federalist** structures required to foster it) in order to overcome them. As such, when Leninists argue that these inevitable "objective factors" caused the degeneration of Bolshevism, anarchists simply reply that if it cannot handle the inevitable then Bolshevism should be avoided: just as we would avoid a submarine which worked perfectly well until it was placed in the sea.

Moreover, what is to be made of this Leninist argument against anarchism? In fact, given the logic of their claims we have to draw the conclusion that the Leninists seem to think a revolution **could** happen **without** civil war and economic disruption. As such it suggests that the Leninists have the "utopian" politics in this matter. After all, if they argue that civil war is inevitable then how can they blame the degeneration of the revolution on it? Simply put, if Bolshevism cannot handle the inevitable it should be avoided at all costs.

Ironically, as indicated in the next section, we can find ample arguments to refute the Trotskyist case against the anarchist analysis in the works of leading Bolsheviks like Lenin, Trotsky and Bukharin. Indeed, their arguments provide a striking confirmation of the anarchist position as they, like Kropotkin, stress that difficult "objective factors" will face **every** revolution. This means to use these factors to justify Bolshevik authoritarianism simply results in proving that Bolshevism is simply non-viable or that a liberatory social revolution is, in fact, impossible (and, as a consequence, genuine socialism).

There are, of course, other reasons why the Leninist critique of the anarchist position is false. In terms of theory, the Leninist position is the crudest form of economic determinism. As we discuss in section 7, ideas **do** matter and, as Marx himself stressed, can play a key in how a social process develops. In terms of the empirical evidence against the Trotskyist explanation, as we indicate in section 3, soviet democracy and workers' power in the workplace was **not** undermined by the civil war. Rather, the process had began before the civil war started and, equally significantly, continued after its end in November 1920.

Third, in terms of the economic and social backwardness of Russia, the similar (if not worse) backwardness of Germany in 1847 did not stop Marx arguing that socialist central planning was viable — indeed, in the **Philosophy of Philosophy** he berated Ricardian Socialist John Bray for suggesting using labour-notes *"for a period of transition"* to communism while in the **Communist Manifesto** he asserted that *"the bourgeois revolution in Germany will be but the prelude to an immediately following proletarian revolution."* [**Marx-Engels Collected Works**, vo. 6, p. 142 and p. 519] Moreover, the notion that Russia was only ready for a **bourgeois** revolution was held by the Mensheviks (reflecting the mainstream position of Marxist social-democracy) and accordingly denounced by Leninists, then and now. So being predominantly a peasant society with little, if any, large-scale industy did not stop Marx issuing a very public call for communist revolution in Germany in 1847 (indeed, this was the social situation across whole of Continental Europe during Marx's lifetime and for **many** decades afterwards).

Nor does the then backwardness of Russia hinder the adoption of various aspects of Bolshevism — such as vanguardism, the necessity of party dictatorship, the centralised structure of socialism, one-man management, etc. — by Marxists in the West after 1917, indeed until now. As such, "backwardness" is a selective excuse — not least because few Leninists would agree that vanguardism was a product of Tsarist Russia and so applicable only there and then. In short, if Leninists took the issue of "backwardness" seriously then they would question **all** aspects of their ideology and hopefully — like the German Council Communists — recognise that Leninism is permeated with the social conditions of a semi-feudal regime and has little to offer modern revolutionaries (or revolutionaries active in the advanced capitalist nations of post-war Europe).

Fourth, there is the example of the Makhnovist movement. Operating in the same "objective circumstances," facing the same "objective factors," the Makhnovists did **not** implement the same policies as the Bolsheviks. As we discussed in the appendix "Why does the Makhnovist movement show there is an alternative to Bolshevism?", rather than undermine soviet, soldier and workplace democracy and replace all with party dictatorship, the Makhnovists applied these as fully as they could. Now, if "objective factors" explain the actions of the Bolsheviks, then why did the Makhnovists not pursue identical policies? Why did the Makhnovists not raise the necessity of party dictatorship to an ideological truism?

In summary, regardless of Trotskyist assertions, anarchists do not ignore the objective factors facing the Bolsheviks during the revolution. As indicated, we predicted the problems they faced

and developed our ideas to counter them. As the example of the Makhnovists showed, our ideas were more than adequate for the task — unlike those of the Bolsheviks.

2 Can "objective factors" really explain the failure of Bolshevism?

As noted in the previous section Leninists falsely argue that anarchists downplay (at best) or ignore (at worse) the "objective factors" facing the Bolsheviks during the Russian Revolution. However, there is more to it than that. Leninists also claim to be revolutionaries, they claim to know that revolutions will face problems, that civil war is inevitable and so forth. It therefore strikes anarchists as being somewhat hypocritical for Leninists to blame these very same "objective" but allegedly inevitable factors for the failure of Bolshevism in Russia.

Ironically enough, Lenin and Trotsky agree with these anarchist arguments. Looking at Trotsky, he dismissed the CNT's leaderships' arguments in favour of collaborating with the bourgeois state as follows:

> *"The leaders of the Spanish Federation of Labour (CNT) ... became, in the critical hour, bourgeois ministers. They explained their open betrayal of the theory of anarchism by the pressure of 'exceptional circumstances.' But did not the leaders of the German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an 'exceptional circumstance.' Every serious revolutionary organisation, however, prepares precisely for 'exceptional circumstances' ... We have not the slightest intention of blaming the anarchists for not having liquidated the state with the mere stroke of a pen. A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society. But all the more severely do we blame the anarchist theory, which seemed to be wholly suitable for times of peace, but which had to be dropped rapidly as soon as the 'exceptional circumstances' of the... revolution had begun. In the old days there were certain generals — and probably are now — who considered that the most harmful thing for an army was war. Little better are those revolutionaries who complain that revolution destroys their doctrine."* [*"Stalinism and Bolshevism,"* **Writings of Leon Trotsky 1936–37**, pp. 423–4]

Thus to argue that the *"exceptional circumstances"* caused by the civil war are the only root cause of the degeneration of the Russian Revolution is a damning indictment of Bolshevism: Lenin did not argue in **State and Revolution** that the application of soviet democracy was dependent only in *"times of peace."* Rather, he stressed that they were for the *"exceptional circumstance"* of revolution and the civil war he considered its inevitable consequence. As such, we must note that Trotsky's followers do not apply this critique to their own politics, which are also a form of the *"exceptional circumstances"* excuse. Given how quickly Bolshevik "principles" (as expressed in **The State and Revolution**) were dropped, we can only assume that Bolshevik ideas are also suitable purely for *"times of peace"* as well.

But, then, Trotsky was not above using such arguments himself (making later-day Trotskyists at least ideologically consistent in their hypocrisy). In the same essay, for example, he justifies the prohibition of other Soviet parties in terms of a *"measure of defence of the dictatorship in a backward and devastated country, surrounded by enemies on all sides."* In other words, an appeal

to the exceptional circumstances facing the Bolsheviks! Perhaps unsurprisingly, his followers have tended to stress this (contradictory) aspect of his argument rather than his comments that those *"who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat. The Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics."* [**Op. Cit.**, p. 426 and p. 430] Which, of course, suggests that the prohibition of other parties had little impact on levels of soviet "democracy" allowed under the Bolsheviks.

This dismissal of the *"exceptional circumstances"* argument did not originate with Trotsky. Lenin repeatedly stressed that any revolution would face civil war and economic disruption. In early January, 1918, he was pointing to *"the incredibly complications of war and economic ruin"* in Russia and noting that *"the fact that Soviet power has been established ... is why civil war has acquired predominance in Russia at the present time."* [**Collected Works**, vol. 26, p. 453 and p. 459] A few months later he states quite clearly that *"it will never be possible to build socialism at a time when everything is running smoothly and tranquilly; it will never be possible to realise socialism without the landowners and capitalists putting up a furious resistance."* He reiterated this point, acknowledging that the *"country is poor, the country is poverty-stricken, and it is impossible just now to satisfy all demands; that is why it is so difficult to build the new edifice in the midst of disruption. But those who believe that socialism can be built at a time of peace and tranquillity are profoundly mistake: it will be everywhere built at a time of disruption, at a time of famine. That is how it must be."* [**Op. Cit.**, vol. 27, p. 520 and p. 517]

As regards civil war, he noted that *"not one of the great revolutions of history has take place"* without one and *"without which not a single serious Marxist has conceived the transition from capitalism to socialism."* Moreover, *"there can be no civil war — the inevitable condition and concomitant of socialist revolution — without disruption."* [**Op. Cit.**, p. 496 and p. 497] He considered this disruption as being applicable to advanced capitalist nations as well:

> *"In Germany, state capitalism prevails, and therefore the revolution in Germany will be a hundred times more devastating and ruinous than in a petty-bourgeois country — there, too, there will be gigantic difficulties and tremendous chaos and imbalance."* [**Op. Cit.**, vol. 28, p. 298]

Lenin reiterated this point again and again. He argued that *"we see famine not only in Russia, but in the most cultured, advanced countries, like Germany ... it is spread over a longer period than in Russia, but it is famine nevertheless, still more severe and painful than here."* In fact, *"today even the richest countries are experiencing unprecedented food shortages and that the overwhelming majority of the working masses are suffering incredible torture."* [**Op. Cit.**, vol. 27, p. 460 and p. 461] And from June, 1918:

> *"We must be perfectly clear in our minds about the new disasters that civil war brings for every country. The more cultured a country is the more serious will be these disasters. Let us picture to ourselves a country possessing machinery and railways in which civil war is raging, and this civil war cuts off communication between the various parts of the country. Picture to yourselves the condition of regions which for decades have been accustomed to living by the interchange of manufactured goods and you will understand that every civil war brings forth disasters."* [**Op. Cit.**, vol. 27, p. 463]

As we discuss in section 4, the economic state of Germany immediately after the end of the war suggests that Lenin had a point: the German economy was in a serious state of devastation, a state equal to that of Russia during the equivalent period of its revolution. If economic conditions made party dictatorship inevitable in Bolshevik Russia (as pro-Leninists argue) it would mean that soviet democracy and revolution cannot go together.

Lenin, unlike many of his latter day followers, did not consider these grim objective conditions as making revolution impossible. Rather, for him, there was *"no other way out of this war"* which is causing the problems *"except revolution, except civil war ... a war which always accompanies not only great revolutions but every serious revolution in history."* He continued by arguing that we *"must be perfectly clear in our minds about the new disasters that civil war brings for every country. The more cultured a country is the more serious will be these disasters. Let us picture to ourselves a country possessing machinery and railways in which civil war is raging, and this civil war cuts communication between the various parts of the country. Picture to yourselves the condition of regions which for decades have been accustomed to living by interchange of manufactured goods and you will understand that every civil war brings fresh disasters."* [**Op. Cit.**, p. 463] The similarities to Kropotkin's arguments made three decades previously are clear (see section 1 for details).

Indeed, he mocked those who would argue that revolution could occur without *"exceptional circumstances"*:

> *"A revolutionary would not 'agree' to a proletarian revolution only 'on the condition' that it proceeds easily and smoothly, that there is, from the outset, combined action on the part of proletarians of different countries, that there are guarantees against defeats, that the road of the revolution is broad, free and straight, that it will not be necessary during the march to victory to sustain the heaviest casualties, to 'bide one's time in a besieged fortress,' or to make one's way along extremely narrow, impassable, winding and dangerous mountain tracks. Such a person is no revolutionary."* [**Op. Cit.**, vol. 28, p. 68]

Thus industrial collapse and terrible difficulties would face any revolution. As Lenin noted, *"in revolutionary epochs the class struggle has always, inevitably, and in every country, assumed the form of **civil war,** and civil war is inconceivable without the severest destruction, terror and the restriction of formal democracy in the interests of this war."* Moreover, *"[w]e know that fierce resistance to the socialist revolution on the part of the bourgeoisie is inevitable in all countries, and that this resistance will **grow** with the growth of the revolution."* [**Op. Cit.**, p. 69 and p. 71] To blame the inevitable problems of a revolution for the failings of Bolshevism suggests that Bolshevism is simply not suitable for revolutionary situations.

At the 1920 Comintern Congress Lenin lambasted a German socialist who argued against revolution because *"Germany was so weakened by the War"* that if it had been *"blockaded again the misery of the German masses would have been even more dreadful,"* dismissing this argument:

> *"A revolution ... can be made only if it does not worsen the workers' conditions 'too much.' Is it permissible, in a communist party, to speak in a tone like this, I ask? This is the language of counter-revolution. The standard of living in Russia is undoubtedly lower than in Germany, and when we established the dictatorship, this led to the workers beginning to go more hungry and to their conditions becoming even worse. The workers' victory cannot be achieved without sacrificing, without a temporary deterioration*

> *of their conditions... If the German workers now want to work for the revolution, they must make sacrifices and not be afraid to do so ... The labour aristocracy, which is afraid of sacrifices, afraid of 'too great' impoverishment during the revolutionary struggle, cannot belong to the party. Otherwise the dictatorship is impossible, especially in western European countries."* [**Proceedings and Documents of the Second Congress 1920**, pp. 382–3]

In 1921 he repeated this, arguing that *"every revolution entails enormous sacrifice on the part of the class making it... The dictatorship of the proletariat in Russia has entailed for the ruling class — the proletariat — sacrifices, want and privation unprecedented in history, and the case will, in all probability, be the same in every other country."* [**Collected Works**, vol. 32, p. 488]

So Lenin is on record as saying these "objective factors" will always be the circumstances facing a socialist revolution. Indeed, in November 1922 he stated that rather than having undermined the revolution, *"Soviet rule in Russia is celebrating its fifth anniversary. It is now sounder than ever."* [**Op. Cit.**, vol. 33, p. 417]

All of which must be deeply embarrassing to Leninists. After all, here is Lenin arguing that the factors Leninists list as being responsible for the degeneration of the Russian Revolution were inevitable side effects of **any** revolution and, moreover, the revolution was more sound than ever! Of course, Lenin did not ponder how *"Soviet rule"* was compatible with party dictatorship, but then neither did Trotsky.

Nor was this perspective limited to Lenin. The inevitability of economic collapse being associated with a revolution was not lost on Trotsky either. For example, in **Terrorism and Communism** he argued that *"[a]ll periods of transition have been characterised by ... tragic features"* of an *"economic depression"* such as exhaustion, poverty and hunger. Every class society *"is violently swept off [the arena] by an intense struggle, which immediately brings to its participants even greater privations and sufferings than those against which they rose."* He gave the example of the French Revolution *"which attained its titanic dimensions under the pressure of the masses exhausted with suffering, itself deepened and rendered more acute their misfortunes for a prolonged period and to an extraordinary extent."* He rhetorically asked: *"Can it be otherwise?"* So *"revolutions which drag into their whirlpool millions of workers"* automatically affect the *"economic life of the country."* By *"[d]ragging the mass of the people away from labour, drawing them for a prolonged period into the struggle, thereby destroying their connection with production, the revolution in all these ways strikes deadly blows at economic life, and inevitably lowers the standard which it found at its birth."* This affects the socialist revolution as the *"more perfect the revolution, the greater are the masses it draws in; and the longer it is prolonged, the greater is the destruction it achieves in the apparatus of production, and the more terrible inroads does it make upon public resources. From this there follows merely the conclusion which did not require proof — that a civil war is harmful to economic life."* Given these inevitable circumstances, he justified Bolshevik policies as being the *"only solution ... that is correct from the point of view both of principle and of practice"* and, moreover, *"dictatorship of the Soviets became possible only by means of the dictatorship of the party.* [**Terrorism and Communism**, p. 7, p. 135 and p. 109]

While this argument does have its self-serving elements — generalising to all revolutions problems created or made worse by Bolshevik policies, decisions and prejudices — the general point remains valid: revolutions are disruptive.

Another leading Bolshevik, Nikolai Bukharin, wrote his (infamous) **The Economics of the Transition Period** to make theoretical sense of (i.e. rationalise and justify) the party's changing policies and their social consequences since 1918 in terms of the inevitability of bad "objective factors" facing the revolution. While some Leninists like to paint Bukharin's book (like most Bolshevik ideas of the time) as "making a virtue out of necessity," Bukharin (like the rest of the Bolshevik leadership) did not. As one commentator, Stephan F. Cohen, notes, Bukharin *"belive[d] that he was formulating universal laws of proletarian revolution."* [**In Praise of War Communism: Bukharin's The Economics of the Transition Period**, p. 195]

Bukharin listed four *"real costs of revolution,"* namely *"the physical destruction or deterioration of material and living elements of production, the atomisation of these elements and of sectors of the economy, and the need for unproductive consumption (civil war materials, etc.). These costs were interrelated and followed sequentially. Collectively they resulted in '**the curtailment of the process of reproduction**' (and 'negative expanded reproduction') and Bukharin's main conclusion: 'the production "anarchy" ... , "the revolutionary disintegration of industry," is an historically inevitable stage which no amount of lamentation will prevent.'"* This was part of a general argument and his *"point was that great revolutions were always accompanied by destructive civil wars ... But he was more intent on proving that a proletarian revolution resulted in an even greater temporary fall in production than did its bourgeois counterpart."* To do this he formulated the *"costs of revolution"* as *"a law of revolution."* [**Op. Cit.**, pp. 195–6 and p. 195]

Cohen notes that while this *"may appear to have been an obvious point, but it apparently came as something of a revelation to many Bolsheviks. It directly opposed the prevailing Social Democratic assumption that the transition to socialism would be relatively painless ... Profound or not, Bolsheviks generally came to accept the 'law' and to regard it as a significant discovery by Bukharin."* [**Op. Cit.**, p. 196] To quote Bukharin himself:

> *"during the transition period the labour apparatus of society inevitably disintegrates, that reorganisation presupposes disorganisation, and that there the temporary collapse of productive forces is a law inherent to revolution."* [quoted by Cohen, **Op. Cit.**, p. 196]

It would appear that this *"obvious point"* would **still** come *"as something of a revelation to many Bolsheviks"* today! Significantly, of course, Kropotkin had formulated this law decades previously and so the **real** question is how the Bolsheviks sought to cope with this inevitable law is what signifies the difference between anarchism and Leninism. Simply put, Bukharin endorsed the coercive measures of war communism as the means to go forward to socialism. As Cohen summarises, *"force and coercion ... were the means by which equilibrium was to be forged out of disequilibrium."* [**Op. Cit.**, p. 198] Given that Bukharin argued that a workers' state, by definition, could not exploit the workers, he — like Lenin and Trotsky — opened up the possibility for rationalising all sorts of abuses as well as condoning numerous evils because they were "progressive."

It should be noted that Lenin showed *"ecstatic praise for the most 'war communist' sections"* of Bukharin's work. *"Almost every passage,"* Cohen notes, *"on the role of the new state, statisation in general, militarisation and mobilisation met with 'very good,' often in three languages, ... Most striking, Lenin's greatest enthusiasm was reserved for the chapter on the role of coercion ... at the end [of which] he wrote, 'Now this chapter is superb!'"* [**Op. Cit.**, pp. 202–3] Compare this to

Kropotkin's comment that the *"revolutionary tribunal and the guillotine could not make up for the lack of a constructive communist theory."* [**The Great French Revolution**, vol. II, p. 519]

Ultimately, claims that "objective factors" caused the degeneration of the revolution are mostly attempts to let the Bolsheviks of the hook for Stalinism. This approach was started by Trotsky and has continued to this day. Anarchists, unsurprisingly, do not think much of these explanations: the "objective factors" listed to explain the degeneration of the revolution are simply a list of factors **every** revolution would (and has) faced — as Lenin, Bukharin and Trotsky all admitted at the time. Bertrand Russell noted this after his trip to Soviet Russia, that while since October 1917 *"the Soviet Government has been at war with almost all the world, and has at the same time to face civil war at home"* this was *"not to be regarded as accidental, or as a misfortune which could not be foreseen. According to Marxian theory, what has happened was bound to happen."* [**The Theory and Practice of Bolshevism**, p. 103]

So we have the strange paradox of Leninists dismissing or ignoring the arguments of their ideological gurus. For Trotsky, just as for Lenin, it was a truism that revolutionary politics had to handle *"objective factors"* and *"exceptional circumstances"* and both thought they **had** during the Russian revolution in a manner consistent with their ideology: yet for their followers, these explain the failure of Bolshevism. Tony Cliff, one of Trotsky's less orthodox followers, gives us a means of understanding this strange paradox. Discussing the **Platform of the United Opposition** he notes that it *"also suffered from the inheritance of the exceptional conditions of the civil war, when the one-party system was transformed from a necessity into a virtue."* [**Trotsky**, vol. 3, pp. 248–9] Clearly, *"exceptional circumstances"* explain nothing and are simply an excuse for bad politics while *"exceptional conditions"* explain everything and defeat even the best politics!

As such, it seems extremely ironic that Leninists blame the civil war for the failure of the revolution as they continually raise the inevitability of civil war in a revolution to attack anarchism (see section H.2.1 for example). Yet, if civil war and the other factors listed by Leninists (but considered inevitable by Lenin) preclude the implementation of the radical democracy Lenin argued for in 1917 as the means to suppress the resistance of the capitalists then his followers should come clean and say that his book has no bearing on their vision of revolution. Given that the usual argument for the "dictatorship of the proletariat" is that it is required to repress counter-revolution, it seems somewhat ironic that the event it was said to be designed for (i.e. revolution) should be responsible for its degeneration.

As such, anarchists think these sorts of explanations of Bolshevik dictatorship are incredulous. After all, as **revolutionaries** the people who expound these "explanations" are meant to know that civil war, imperialist invasion and blockade, economic disruption, and a host of other *"extremely difficult circumstances"* are part and parcel of a revolution. They seem to be saying, "if only the ruling class had not acted as our political ideology predicts they would then the Bolshevik revolution would have been fine"!

In summary, anarchists are not at all convinced by the claims that *"objective factors"* can explain the failure of the Russian Revolution for, according to Lenin and Trotsky, these factors were to be expected in **any** revolution. That is why they say they want a *"dictatorship of the proletariat,"* to defend against counter-revolution (see section H.3.8 on how, once in power, Lenin and Trotsky revised this position). Now, if Bolshevism cannot handle what it says is inevitable, then it should be avoided. To use an analogy:

Bolshevik: *"Join with us, we have a great umbrella which will keep us dry."*

Anarchist: *"Last time it was used, it did not work. We all got soaked!"*

Bolshevik: *"But what our anarchist friend fails to mention is that it was raining at the time!"*

Not very convincing! Yet, sadly, this is the logic of the common Leninist justification of Bolshevik authoritarianism during the Russian Revolution.

3 Can the civil war explain the failure of Bolshevism?

One of the most common assertions against the anarchist case against Bolshevism is that while we condemn the Bolsheviks, we fail to mention the civil war and the wars of intervention. Indeed, for most Leninists the civil war is usually considered the key event in the development of Stalinism as well as explaining and justifying all anti-socialist acts of the Bolsheviks after they seized power in 1917.

For anarchists, such an argument is flawed on two levels, namely logical and factual. The logical flaw is that Leninist argue that civil war is inevitable after a revolution. They maintain, correctly, that it is unlikely that the ruling class will disappear without a fight. Then they turn round and complain that because the ruling class did what the Marxists predicted they would do the Russian Revolution failed while also (incorrectly) asserting about anarchists do not recognise the need to defend a revolution (see section H.2.1).

So, obviously, this line of defence is nonsense. If civil war is inevitable, then it cannot be used to justify the failure of Bolshevism. Marxists simply want to have their cake and eat it to: you simply cannot argue that civil war is inevitable and then blame it for the failure of the Russian Revolution.

Also, by stressing civil war and denouncing those who *"forget the years of Civil War"*, Trotsky and his followers end up being *"Apologist[s] for Stalinism"* for the civil war *"was initiated by the international bourgeoisie. And thus the ugly sides of Bolshevism under Lenin, as well as under Stalin, find their chief and final cause in capitalism's enmity to Bolshevism which, if it is a monster, is only a reluctant monster, killing and torturing in mere self-defence.* In short, *"so, if only in a roundabout way, Trotsky's Bolshevism, despite its saturation with hatred for Stalin, leads in the end merely to a defence of Stalinism as the only possible self-defence for Trotsky. This explains the superficiality of the ideological differences between Stalinism and Trotskyism. The impossibility of attacking Stalin without attacking Lenin helps to explain, furthermore, Trotsky's great difficulties as an oppositionist. Trotsky's own past and theories preclude on his part the initiation of a movement to the **left** of Stalinism and condemned 'Trotskyism' to remain a mere collecting agency for unsuccessful Bolsheviks. As such it could maintain itself outside of Russia because of the ceaseless competitive struggles for power and positions within the so-called 'communist' world-movement. But it could not achieve significance for it had nothing to offer but the replacement of one set of politicians by another. The Trotskyist defence of Russia in the Second World War was consistent with all the previous policies of this, Stalin's most bitter, but also most loyal, opposition."* [Paul Mattick, *"Bolshevism and Stalinism"*, **Anti-Bolshevik Communism**, pp. 68–9]

The other flaw in this defence of Bolshevism is the factual one, namely the awkward fact that Bolshevik authoritarianism started **before** the civil war broke out at the end of May, 1918. Simply put, it is difficult to blame a course of actions on an event which had not started yet. Moreover, Bolshevik authoritarianism **increased** after the civil war finished. This, incidentally, caused the

few remaining anarchists who supported the regime to some degree to re-evaluate their position. In the words of Alexander Berkman:

> *"I would not concede the appalling truth. Still the hope persisted that the Bolsheviki, though absolutely wrong in principle and practice, yet grimly held on to **some** shreds of the revolutionary banner. 'Allied interference,' 'the blockade and civil war,' 'the necessity of the transitory stage' — thus I sought to placate my outraged conscience .. . At last the fronts were liquidated, civil war ended, and the country at peace. But Communist policies did not change. On the contrary ... The party groaned under the unbearable yoke of the Party dictatorship.. .. Then came Kronstadt and its simultaneous echoes throughout the land ... Kronstadt was crushed as ruthlessly as Thiers and Gallifet slaughtered the Paris Communards. And with Kronstadt the entire country and its last hope. With it also my faith in the Bolsheviki."* [**The Bolshevik Myth**, p. 331]

If Berkman had been in Russia in 1918, he may have realised that Bolshevik tyranny after the end of the civil war which climaxed with the attack on Kronstadt (see the appendix on "What was the Kronstadt Rebellion?") was not at odds with their pre-civil war activities to maintain their power. The simple fact is that Bolshevik authoritarianism was **not** caused by the pressures of the civil war, rather it started before then. All the civil war did was strengthen certain aspects of Bolshevik ideology and practice which had existed from the start. Needless to say, we cannot cover everything here and will by necessity focus on certain key developments which historian S.A. Smith summarises well:

> *"The Bolsheviks established their power in the localities through soviets, soldiers' committees, factory committees, and Red Guards. Numbering less than 350,000 in October 1917, the party had little option but to allow such independent organisations extensive leeway. Yet the same desperate problems of unemployment and lack of food and fuel that helped turn the workers against the Provisional Government soon began to turn workers against the Bolsheviks. In the first half of 1918, some 100,000 to 150,000 workers across Russia took part in strikes, food riots and other protests, roughly on a par with labour unrest on the eve of the February Revolution. In this context, the Bolsheviks struggled to concentrate authority in the hands of the party and state organs ... In spring 1918, worker discontent translated into a renewal of support for the Mensheviks and, to a lesser extent, the SRs, causing the Bolsheviks to cancel soviet elections and close down soviets that proved uncooperative, thus initiating the process whereby soviets and trade unions were turned into adjuncts to a one-party state. When the Whites seized leadership of the anti-Bolshevik movement in the latter months of 1918, however, most workers swung back in support of the government. During the civil war, labour unrest continued ... the Bolsheviks generally reacted by rushing in emergency supplies and by arresting the leaders of the protest, who were often Mensheviks or Left SRs ... they did not scruple when they deemed it necessary to deploy armed force to suppress strikes, to confiscate ration cards or even to dismiss strikers en masse and then rehire them selectively. The Bolsheviks expected the working class to speak with one voice — in favour of the regime –- and when they didn't they, who had once excoriated the Mensheviks for their refusal to accept that a true proletariat existed in Russia, charged the*

working class with being no more than a mass of uprooted peasants with a thoroughly petty-bourgeois psychology." [**Revolution and the People in Russia and China**, p. 201]

The most important development during this period was the suppression of soviet democracy and basic working class freedoms. As we discuss in section H.6.1, the Bolsheviks pursued a policy of systematically undermining soviet democracy from the moment they seized power. The first act was the creation of a Bolshevik government **over** the soviets, so marginalising the very organs they claimed ruled in Russia (and directly against the promises made by Lenin in **The State and Revolution** — and not the last, as discussed in section H.1.7). The process was repeated in the local soviets, with the executive committees holding real power while the plenary sessions became increasingly infrequent and of little consequence. Come the spring of 1918, faced with growing working class opposition they started to delay soviet elections. When finally forced to hold elections, the Bolsheviks responded in two ways to maintain their power: either they packed the soviets with representatives of Bolshevik dominated organisation (making elections from the workplace irrelevant or they simply disbanded them by force if they lost (and repressed by force any protests against this). This was the situation at the grassroots, at the summit of the soviet system the Bolsheviks simply marginalised the Central Executive Committee of the soviets: real power was held by the Bolshevik government. They also packed the Fifth All-Russian Soviet Congress held in July 1918, using their control over the credentials committee to increase the number of Bolsheviks by seating delegates from bodies they controlled). The power of the soviets had simply become a fig-leaf for a "soviet power" — the handful of Bolsheviks who made up the government and the party's central committee.

It should be stressed that the Bolshevik assault on the soviets occurred in March, April and May 1918. That is, **before** the Czech uprising and the onset of full-scale civil war. So, to generalise, it cannot be said that it was the Bolshevik party that alone whole-heartedly supported Soviet power: the facts are, in the words of left-Menshevik Julius Martov, the Bolsheviks loved Soviets only when they were *"in the hands of the Bolshevik party."* [quoted by Getzler, **Martov**, p. 174] If the workers voted for others, "soviet power" was openly replaced by party power (the real aim, as discussed in section H.3.11). The Bolsheviks had consolidated their position by early 1918, turning the Soviet State into a de facto one party state by packing, gerrymandering and disbanding soviets **before** the start of the Civil War.

Given this legacy of repression, Leninist Tony Cliff's assertion that it was only *"under the iron pressure of the civil war [that] the Bolshevik leaders were forced to move, as the price of survival, to* ***a one-party system****"* needs serious revising. Similarly, his comment that the *"civil war undermined the operation of the local soviets"* is equally inaccurate, as his is claim that *"for some time — i.e. until the armed uprising of the Czechoslovak Legion — the Mensheviks were not much hampered in their propaganda work."* Simply put, Cliff's statement that *"it was about a year after the October Revolution before an actual monopoly of political power was held by one party"* is false. [**Lenin**, vol. 3, p. 163, p. 150, p. 167 and p. 172] Such a monopoly existed **before** the start of the civil war, with extensive political repression existing **before** the uprising of the Czechoslovak Legion which began it. There was a **de facto** one-party state by the spring of 1918: it took about a year for this reality to be reflected in Bolshevik ideology and rhetoric.

Other Leninists are just as loose with the facts as Cliff. His fellow British SWP member Chris Harman suggested that the Bolsheviks were really democrats and that *"[u]ntil the Civil War was*

well under way, this democratic dialectic of party and class could continue. The Bolsheviks held power as the majority party in the Soviets. But other parties continued to exist there too. The Mensheviks continued to operate legally and compete with the Bolsheviks for support until June 1918." Harman does not specifically indicate when he considered the civil war to have started, but almost always it is said to have began with the revolt of the Czech Legion at the end of May 1918 (a date he seems to agree with, as he writes that the *"Right Social Revolutionaries were instigators of the counter-revolution"*). The Bolsheviks excluded the Right-SRs and Mensheviks from the government on 14 June of that year so *"well under way"* appears to mean around 3 weeks. While opposition parties were sometimes tolerated and allowed to stand for election to soviets after this date, the reality was that the soviets had become little more than a fig-leaf of Bolshevik Party by July 1918 yet Harman proclaims *"[o]f necessity the Soviet State of 1917 had been replaced by the single-party State of 1920 onwards."* [*"How the Revolution was Lost"*, pp. 13–36, Peter Binns, Tony Cliff, Chris Harman, **Russia: From Workers' State to State Capitalism**, pp. 18–9]

The suppression of Soviet democracy reached it logical conclusion in 1921 when the Kronsdadt soviet, heart of the 1917 revolution, was stormed by Bolshevik forces, the rebels executed, imprisoned or forced into exile. Soviet democracy was not just an issue of debate but one many workers died in fighting for: similar events to those at Kronstadt had occurred three years previously.

Before turning to other Bolshevik attacks on working class power and freedom, we need to address one issue. It will be proclaimed by pro-Bolsheviks that the Mensheviks (and SRs) were *"counter-revolutionaries"* and so Bolshevik actions against them were justified. However, the Bolsheviks started to suppress opposition soviets **before** the civil war broke out, so at the time neither group could be called *"counter-revolutionary"* in any meaningful sense of the word. The Civil War started on the 25th of May and the SRs and Mensheviks were expelled from the Soviets on the 14th of June. The right-SRs **did** support the revolt of the Czech Legion to form what was called the democractic counter-revolution, based on reforming the Constituent Assembly in Samara (the White generals came later, displacing the SRs and fighting for the restoration of the Tsarist regime). The Mensheviks refused to support this strategy and while the Bolsheviks *"offered some formidable fictions to justify the expulsions"* there was *"of course no substance in the charge that the Mensheviks had been mixed in counter-revolutionary activities on the Don, in the Urals, in Siberia, with the Czechoslovaks, or that they had joined the worst Black Hundreds."* The real reason was the political loses in the soviets before the Civil War: the Bolsheviks *"drove them underground, just on the eve of the elections to the Fifth Congress of Soviets in which the Mensheviks were expected to make significant gains."* [Getzler, **Op. Cit.**, p. 181]

Official Menshevik policy was to utilise soviet democracy to secure a change in government and policy, with any member found to have supported the armed rebellion of the right-SRs was expelled. This included a member of the Menshevik central committee who went *"without its knowledge"* to Samara and was *"expelled from the party"*. Likewise, the Volga Mensheviks were *"sharply reproved by Martov and the Menshevik Central Committee and instructed that neither party organisations nor members could take part in ... such adventures."* [Getzler **Op. Cit.**, p. 185] Such legal opposition did not stop the Bolsheviks repeatedly tolerating and banning the organisation (interestingly, periods of tolerance co-incidenced with the **decline** of the White threat and the corresponding rise of working class protest). In summary, then, the charge that the Mensheviks *"were active supporters of intervention and of counter-revolution"* was *"untrue ... and the Communists, if they ever believed it, never succeeded in establishing it."* [Leonard Schapiro, **The Origin of the Communist Autocracy**, p. 193]

Attacks on working class freedoms and democracy were not limited to the soviets. Before seizing power, the Bolsheviks had long presented economic visions much at odds with what libertarians consider as fundamentally socialist. Lenin, in April 1918, was arguing for one-man management and *"[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected or appointed by Soviet institutions, vested with dictatorial powers."* His support for a new form of wage slavery involved granting state appointed *"individual executives dictatorial powers (or 'unlimited' powers)."* Large-scale industry (*"the foundation of socialism"*) required *"thousands subordinating their will to the will of one,"* and so the revolution *"demands"* that *"the people* ***unquestioningly obey the single will*** *of the leaders of labour."* Lenin's *"superior forms of labour discipline"* were simply hyper-developed capitalist forms. The role of workers in production was the same, but with a novel twist, namely *"unquestioning obedience to the orders of individual representatives of the Soviet government during the work."* [**Collected Works**, vol. 27, p. 316, p. 267–9 and p. 271]

This simply replaced private capitalism with **state** capitalism. *"In the shops where one-man management (Lenin's own preference) replaced collegial management,"* notes historian Diane Koenker, *"workers faced the same kinds of authoritarian management they thought existed only under capitalism."* [**Labour Relations in Socialist Russia**, p. 177] If, as many Leninists claim, one-man management was a key factor in the rise of Stalinism and/or *"state-capitalism"* in Russia, then, clearly, Lenin's input into these developments cannot be ignored (see section H.3.13 on the obvious similarities between state socialism and state capitalism). After advocating *"one-man management"* and *"state capitalism"* in early 1918, he remained a firm supporter of both and looking back at this time from April 1920, he reiterated his position (*"Dictatorial powers and one-man management are not contradictory to socialist democracy"*) while also stressing that this was not forced upon the Bolsheviks by civil war. Discussing how, as in April 1918, the civil war was ended and it was time to build socialism he argued that the *"whole attention of the Communist Party and the Soviet government is centred on peaceful economic development, on problems of the dictatorship and of one-man management ... When we tackled them for the first time in 1918, there was no civil war and no experience to speak of."* So it was *"not only experience"* of civil war, argued Lenin *"but something more profound . .. that has induced us now, as it did two years ago, to concentrate all our attention on labour discipline."* [**Op. Cit.**, vol. 30, p. 503 and p. 504]

In the light of this it is bizarre that some later day Leninists claim that the Bolsheviks only introduced one-man management because of the Civil War. Clearly, this was **not** the case: it was **this** period (before the civil war) that saw Lenin advocate and start to take the control of the economy out of the hands of the workers and place it into the hands of the Bolshevik party and the state bureaucracy. Thus what pro-Leninists like to portray as Stalinist had its roots in Lenin's regime, as can be seen when neo-Trotskyists like the British SWP's Peter Binns argue that Stalinism must be defined as *"state capitalism"* because of the *"exploitation and powerlessness of the Russian working class"*, created when it was *"decreed"* that *"all managers' orders"* were — to quote a 1929 resolution of the Communist Party's Central Committee — to be *"unconditionally binding on his subordinate administrative staff and on all workers"*. [*"The Theory of State Capitalism"*, pp. 73–98, **Russia: From Workers' State to State Capitalism**, p. 75] Given Lenin's imposition of one-man management in early 1918, why was Bolshevism **not** state-capitalist? Do social relationships change their nature dependent on who imposes them, whether it was Lenin or Stalin?

Needless to say, the Bolshevik undermining of the factory committee movement and, consequently, genuine worker's self-management of production in favour of state capitalism cannot be gone into great depth here (see section H.6.2, for more discussion). Suffice to say, the factory committees were deliberately submerged in the trade unions and state control replaced workers' control. This involved practising one-man management and, as Lenin put in at the start of May 1918, *"our task is to study the state capitalism of the Germans, to spare **no effort** in copying it and not to shrink from adopting **dictatorial** methods to hasten the copying of it."* He stressed that this was no new idea, rather he *"gave it **before** the Bolsheviks seized power."* [**Op. Cit.**, vol. 27, p. 340 and p. 341]

It will be objected that Lenin advocated *"workers' control."* This is true, but a "workers' control" of a **very** limited nature. As we discuss in section H.3.14, rather than seeing it as workers managing production directly, he always saw it in terms of workers' "controlling" or "supervising" those who did and his views on this matter were **radically** different to those of the factory committees. This is not all, as Lenin always placed his ideas in a statist context — rather than base socialist reconstruction on working class self-organisation from below, the Bolsheviks started *"to build, from the top, its 'unified administration'"* based on central bodies created by the Tsarist government in 1915 and 1916. [Maurice Brinton, **The Bolsheviks and Workers' Control**, p. 36] The institutional framework of capitalism would be utilised as the principal (almost exclusive) instruments of "socialist" transformation. Lenin's support for *"one-man management"* must be seen in this context, namely his vision of "socialism."

Bolshevik advocating and implementing of *"one-man management"* was not limited to the workplace. On 30th of March 1918 Trotsky, as Commissar of Military Affairs, set about reorganising the army. The death penalty for disobedience under fire was reintroduced, as was saluting officers, special forms of address, separate living quarters and privileges for officers. Officers were no longer elected. [Brinton, **Op. Cit.**, pp. 37–8] Trotsky made it clear: *"the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree"*. [*"Work, Discipline, Order"*, **How the Revolution Armed**, vol. I, pp. 46–7] The soldiers were given no say in their fate, as per bourgeois armies.

Lenin's proposals also struck at the heart of workers' power in other ways. For example, he argued that *"we must raise the question of piece-work and apply it ... in practice."* [*"The Immediate Tasks Of The Soviet Government"*, **Collected Works**, vol. 27, p. 258] As Leninist Tony Cliff (of all people) noted, *"the employers have at their disposal a number of effective methods of disrupting th[e] unity [of workers as a class]. Once of the most important of these is the fostering of competition between workers by means of piece-work systems."* He notes that this was used by the Nazis and the Stalinists *"for the same purpose."* [**State Capitalism in Russia**, pp. 18–9] Obviously piece-work is different when Lenin introduces it!

Finally, there is the question of general political freedom. It was also in this time period that the Bolsheviks first used the secret police (the Cheka, formed in December 1917) against left-wing opposition groups. The anarchists in Moscow were attacked on the night of April 11–12, with armed detachments of the Cheka raiding 26 anarchist centres, killing or wounding 40 and jailing 500. Shortly afterwards the Cheka carried out similar raids in Petrograd and in the provinces. In May **Burevestnik**, **Anarkhiia**, **Golos Truda** and other leading anarchist periodicals closed down. [Paul Avrich, **The Russian Anarchists**, pp. 184–5] It must surely be a coincidence that there had been a *"continued growth of anarchist influence among unskilled workers"* after the October revolution and, equally coincidentally, that *"[b]y the spring of 1918, very little was heard from*

the anarchists in Petrograd." [David Mandel, **The Petrograd Workers and the Soviet Seizure of Power**, p. 357]

All this **before** the Trotsky provoked revolt of the Czech legion at the end of May, 1918, and the consequent "democratic counter-revolution" in favour of the Constituent Assembly (which the right-Socialist Revolutionaries led) and long before the rise of the White Armies (which replaced the right-SRs as the main threat to "soviet power" by the end of 1918) and Allied intervention. In summary, it was **before** large-scale civil war took place, in an interval of relative peace, that we see the introduction of most of the measures Leninists now try and pretend were necessitated by the Civil War itself. As discussed in sections H.1.7, the promises of 1917 did not last six months.

This factual problem with the "civil war caused Bolshevik authoritarianism" excuse is the best answer to it. If the Bolsheviks pursued authoritarian policies before the civil war started, it is hard to justify their actions in terms of something that had not started yet. This explains why some Leninists have tried to muddy the waters somewhat by obscuring when the civil war started. For example, John Rees states that *"[m]ost historians treat the revolution and the civil war as separate processes"* yet *"[i]n reality they were one."* He presents a catalogue of *"armed resistance to the revolution,"* including such *"precursors of civil war before the revolution"* as the suppression after the July days and the Kornilov revolt in 1917. [John Rees, *"In Defence of October,"* pp. 3–82, **International Socialism**, no. 52, p. 31–2]

Ironically, Rees fails to see how this blurring of when the civil war started actually **harms** Leninism. After all, most historians place the start of the civil war when the Czech legion revolted **because** it marked large-scale conflict between armies. It is one thing to say that authoritarianism was caused by war — large-scale conflict — and another to say **any** form of conflict caused it. Simply put, if the Bolshevik state could not handle relatively minor forms of counter-revolution then where does that leave Lenin's **State and Revolution**? It is even worse if "civil war" is pushed back to **before** the actual revolution for then revolution is equated to civil war and so doomed to degeneration before it even starts. So while the period from October to May of 1918 was not trouble free, it was not one where the survival of the new regime looked to be seriously threatened as it was after that, particularly in 1919 and 1920. Thus "civil war" should be used, as is commonly done, to refer to the period from the Czech revolt (late May 1918) to the final defeat of Wrangel (November 1920).

This means attempts to push the start of the civil war back to October 1917 (or even earlier) simply weakens the Leninist argument. It still leaves the major problem for the "blame it on the civil war" position, namely to explain why the months **before** May of 1918 saw soviets being closed down, the start of the suppression of the factory committees, restrictions on freedom of speech and association, plus the repression of opposition groups (like the anarchists). Either any level of "civil war" makes Lenin's **State and Revolution** redundant or the source of Bolshevik authoritarianism must be found elsewhere. Given that Leninists to this day continue to point to Lenin's work as what they "really" standfor, it seems unlikely that they will take their rationales for the Bolshevik's violating it in practice to their logical position and place that work in the dustbin of history.

That covers the period **before** the start of the civil war. We now turn to the period **after** it finished. Here we find the same problem, namely an **increase** of authoritarianism even after the proclaimed cause for it (civil war) had ended.

The last White General Wrangel evacuated what remained of his forces to Constantinople in November 1920. With this defeat the Russian civil war had come to an end and the Bolsheviks

started to demoblise the Red Army (halving its size to around 2,500,000 by the start of 1921). Those familiar with the history of the revolution will realise that it was some 4 months **later** that yet another massive strike wave occurred and the Kronstadt revolt took place (see the appendix "What was the Kronstadt Rebellion?"), while within the party, the 10th Congress banned factions. The repression of the strikes and Kronstadt revolt effectively destroying hope for mass pressure for change from below and the faction ban within the party closed off the very last "legal" door for those who opposed the regime from the left (although, as discussed in the appendix "Were any of the Bolshevik oppositions a real alternative?", given that **all** the main factions did not question the necessity of party dictatorship there was no possibility for real socialist change).

It could be argued that the Bolsheviks were still fighting peasant insurrections and strikes across the country, but this has everything to do with Bolshevik policies and could only be considered "counter-revolutionary" if you think the Bolsheviks had a monopoly of what socialism and revolution meant. In the case of the Makhnovists in the Ukraine, the Bolsheviks started that conflict by betraying them once they had played a key role in defeating Wrangel. As such, any resistance to Bolshevik rule by the working class and peasantry of Russia indicated the lack of democracy within the country rather than some sort of "counter-revolutionary" conflict.

So even the end of the Civil War causes problems for this defence of the Bolsheviks. Simply put, with the defeat of the Whites it would be expected that some return to democratic norms would happen. It did not, in fact the reverse happened. Factions were banned, even the smallest forms of opposition was finally eliminated from both the party and society as a whole. Those opposition groups and parties which had been tolerated during the civil war were finally smashed. Popular revolts for reform, such as the Kronstadt rebellion and the strike wave which inspired it (see][section 5 below), were put down by force. No form of opposition was tolerated, no freedom allowed. If civil war **was** the cause of Bolshevik authoritarianism, it seems strange that it got worse after it was finished.

This grim reality was what convinced anarchists like Emma Goldman and Alexander Berkman to finally break with the regime. After rationalising away their doubts with the hope that the end of the civil war would see change, the continuation of repression showed them the error of their ways. As Goldman put it:

> *"We must not fail to consider the Bolsheviki **continue** to employ exactly the same methods today as they did in 'the moments of grim necessity, in 1919, 1920, and 1921.' ... The military fronts have long ago been liquidated; internal counter-revolution is suppressed; the old bourgeoisie is eliminated; the 'moments of grim necessity' are past .. . but the Terror, the Tchecka, suppression of free speech and press, and all the other Communist methods of former years still remain in force. Indeed, they are being applied even more brutally and barbarously since the death of Lenin. Is it to 'preserve the remnants of civilisation' or to strengthen the weakening Party dictatorship?"* [**My Disillusionment in Russia**, pp. liii-liv]

This, then, is the main factual problem with the "blame the civil war" approach beloved by Leninists to this day: Bolshevik authoritarianism had not began with the start of the civil war, nor did it stop when the civil war ended.

As we discuss in section H.6, the root causes for Bolshevik authoritarianism post-October was Bolshevik ideology combined with state power. After all, how "democratic" is it to give all power

to the Bolshevik party central committee? Surely socialism involves more than voting for a new government? Is it not about mass participation, the kind of participation centralised government precludes and Bolshevism vanguardism fears — as discussed in section H.5 — as being inevitably influenced by *"bourgeois ideology"*? In such circumstances, moving from party rule to party dictatorship is not such a leap.

That "civil war" cannot explain what happened can be shown by a counter-example which effectively shows that civil war did not inevitably mean party dictatorship ruling over a state capitalist economy (and protesting workers and peasants!). The Makhnovists (an anarchist influenced partisan army) managed to defend the revolution and encourage soviet democracy, freedom of speech, and so on, while doing so (see the appendix "Why does the Makhnovist movement show there is an alternative to Bolshevism?"). Which, of course, does not really fit in with the Bolsheviks being forced to be anti-democratic due to the pressures of civil war.

So, in summary, civil war and imperialist intervention cannot be blamed for Bolshevik authoritarianism simply because the latter had started before the former existed. Moreover, the example of the Makhnovists suggests that Bolshevik policies during the civil war were also not driven purely by the need for survival. As Kropotkin argued in 1920, *"all foreign armed intervention necessarily strengthens the dictatorial tendencies of the government ... The evils inherent in a party dictatorship have been accentuated by the conditions of war in which this party maintains its power. This state of war has been the pretext for strengthening dictatorial methods which centralise the control of every detail of life in the hands of the government, with the effect of stopping an immense part of the ordinary activity of the country. The evils natural to state communism have been increased ten-fold under the pretext that all our misery is due to foreign intervention."* [**Anarchism**, p. 253]

In other words, while the civil war may have increased Bolshevik authoritarianism, it did not create it.

4 Did economic collapse and isolation destroy the revolution?

One of the most common Trotskyist explanations for the failure of the Russian revolution is that the Bolsheviks faced terrible economic conditions, which forced them to be less than democratic. Combined with the failure of the revolution to spread to more advanced countries, party dictatorship, it is argued, was inevitable. In the words of Leninist John Rees:

> *"In a country where the working class was a minority of the population, where industry had been battered by years of war and in conditions of White and imperialist encirclement, the balance gradually titled towards greater coercion. Each step of the way was forced on the Bolsheviks by dire and pressing necessities."* [*"In Defence of October,"* **International Socialism**, no. 52, p. 41]

Thus *"economic devastation"* played a key part in the degeneration of the revolution. [**Op. Cit.**, p. 31] Other Leninists have made similar arguments, with Victor Serge noting that the *"decline in production was uninterrupted. It should be noted that this decline had already begun before the revolution. In 1916 the output of agricultural machinery, for example, was down by 80 per cent compared with 1913. The year 1917 had been marked by a particularly general, rapid and serious downturn. The production figures for the principal industries in 1913 and 1918 were, in millions of*

***poods**: coal, from 1,738 to 731 (42 per cent); iron ore, from 57, 887 to 1,686; cast-iron, from 256 to 31.5 (12.3 per cent); steel, from 259 to 24.5; rails, from 39.4 to 1.1. As a percentage of 1913 production, output of linen fell to 75 per cent, of sugar to 24 per cent, and tobacco to 19 per cent."* Moreover, production continued *"to fall until the end of civil war ... For 1920, the following indices are given as a percentage of output in 1913: coal, 27 per cent; cast iron, 2.4 per cent; linen textiles, 38 per cent."* [**Year One of the Russian Revolution**, p. 352 and p. 425]

Likewise Tony Cliff (like Serge, another of Rees's references), who argued that war-damaged industry *"continued to run down"* in the spring of 1918: *"One of the causes of famine was the breakdown of transport . .. Industry was in a state of complete collapse. Not only was there no food to feed the factory workers; there was no raw material or fuel for industry ... The collapse of industry meant unemployment for the workers."* Cliff provides economic indexes. For large scale industry, taking 1913 as the base, 1917 saw production fall to 77%. In 1918, it was at 35% of the 1913 figure, 1919 it was 26% and 1920 was 18%. Productivity per worker also fell, from 85% in 1917, to 44% in 1918, 22% in 1919 and then 26% in 1920. [**Lenin**, vol. 3, pp. 67–9, p. 86 and p. 85]

In such circumstances, it is argued, how can you expect the Bolsheviks to subscribe to democratic and socialist norms? This meant that the success or failure of the revolution depended on whether the revolution spread to more advanced countries. Leninist Duncan Hallas argues that the *"failure of the German Revolution in 1918–19 ... seems, in retrospect, to have been decisive ... for only substantial economic aid from an advanced economy, in practice from a socialist Germany, could have reversed the disintegration of the Russian working class."* [*"Towards a revolutionary socialist party,"* pp. 38–55, **Party and Class**, Alex Callinicos (ed.), p. 44]

Anarchists are not convinced by these arguments. This is for two reasons.

Firstly, we are aware that revolutions are disruptive no matter where they occur and, moreover, Leninists are meant to know this too (see section 1). Simply put, there is a certain incredulous element to these arguments. Lenin himself had argued that *"[e]very revolution ... by its very nature implies a crisis, and a very deep crisis at that, both political and economic. This is irrespective of the crisis brought about by the war."* [**Collected Works**, vol. 30, p. 341] Serge also considered crisis as inevitable, arguing that the *"conquest of production by the proletariat was in itself a stupendous victory, one which saved the revolution's life. Undoubtedly, so thorough a recasting of all the organs of production is impossible without a substantial decline in output; undoubtedly, too, a proletariat cannot labour and fight at the same time."* [**Op. Cit.**, p. 361] As we discussed in detail in section 2, this was a common Bolshevik position at the time and so it seems strange that — yet again — Leninists blame events they consider inevitable for the degeneration of the Bolshevik regime.

Secondly, and more importantly, every revolution or revolutionary situation has been accompanied by economic crisis. This means that **if** Bolshevik authoritarianism is blamed on the state of the economy, it is not hard to conclude that **every** Bolshevik-style revolution will suffer the same fate as the Russian one. For example, as we will shortly prove, Germany itself was in a state of serious economic disruption and falling production in 1918 and 1919, a collapse which would have got worse is a Bolshevik-style revolution had occurred there. This suggests that the common Leninist idea that a successful revolution in, say, Germany would have ensured the success of the Russian Revolution is flawed. Looking at Europe during the period immediately after the first world war, we discover great economic hardship. To quote one Trotskyist editor:

> *"In the major imperialist countries of Europe, production still had not recovered from wartime destruction. A limited economic upswing in 1919 and early 1920 enabled many*

> *demobilised soldiers to find work, and unemployment fell somewhat. Nonetheless, in 'victorious' France overall production in 1920 was still only two-thirds its pre-war level. In Germany industrial production was little more than half its 1914 level, human consumption of grains was down 44 per cent, and the economy was gripped by spiralling inflation. Average per capita wages in Prague in 1920, adjusted for inflation, were just over one-third of pre-war levels."* [John Riddell, *"Introduction,"* **Proceedings and Documents of the Second Congress, 1920**, vol. I, p. 17]

Now, if economic collapse was responsible for Bolshevik authoritarianism and the subsequent failure of the revolution, it seems hard to understand why an expansion of the revolution into similarly crisis ridden countries would have had a major impact in the development of the revolution. Since most Leninists agree that a successful German Revolution would have made the difference, we will discuss this in more detail before going onto other revolutions and revolutionary situations.

By 1918, Germany was in a bad state. Victor Serge noted *"the famine and economic collapse which caused the final ruin of the Central Powers."* [**Op. Cit.**, p. 361] The semi-blockade of Germany during the war badly effected the economy, the *"dynamic growth"* of which before the war *"had been largely dependent on the country's involvement in the world market"*. The war *"proved catastrophic to those who had depended on the world market and had been involved in the production of consumer goods . .. Slowly but surely the country slithered into austerity and ultimately economic collapse"* and *"overall food production declined further after poor harvests in 1916 and 1917. Thus grain production, already well below its prewar levels, slumped from 21.8 million to 14.9 million tons in those two years."* [V. R. Berghahn, **Modern Germany**, p. 47, pp. 47–8, p. 50]

The parallels with pre-revolution Russia are striking and it is hardly surprising that revolution did break out in Germany in November 1918. Workers' councils sprang up all across the country, inspired in part by the example of the Russian soviets (and what people **thought** was going on in Russia under the Bolsheviks). A Social-Democratic government was founded, which used the Free Corps (right-wing volunteer troops) to crush the revolution from January 1919 onwards. This meant that Germany in 1919 was marked by extensive civil war and in January 1920 a state of siege was re-introduced across half the country.

This social turmoil was matched by economic turmoil. As in Russia, Germany faced massive economic problems, problems which the revolution inherited. Taking 1928 as the base year, the index of industrial production in Germany was slightly lower in 1913, namely 98 in 1913 to 100 in 1928 and so Germany effectively lost 15 years of economic activity. In 1917, the index was 63 and by 1918 (the year of the revolution), it was 61 (i.e. industrial production had dropped by nearly 40%). In 1919, it fell again to 37, rising to 54 in 1920 and 65 in 1921. Thus, in 1919, the *"industrial production reached an all-time low"* and it *"took until the late 1920s for [food] production to recover its 1912 level ... In 1921 grain production was still ... some 30 per cent below the 1912 figure."* Coal production was 69.1% of its 1913 level in 1920, falling to 32.8% in 1923. Iron production was 33.1% in 1920 and 25.6% in 1923. Steel production likewise fell to 48.5% in 1920 and fell again to 36% in 1923. [V. R. Berghahn, **Op. Cit.**, p. 258, pp. 67–8, p. 71 and p. 259]

Significantly, one of the first acts of the Bolshevik government towards the new German Social-Democratic government was *"the offer by the Soviet authorities of two trainloads of grain for the hungry German population. It was a symbolical gesture and, in view of desperate shortages in*

Russia itself, a generous one." The offer, perhaps unsurprisingly, was rejected in favour of grain from America. [E.H. Carr, **The Bolshevik Revolution**, vol. 3, p. 106]

The similarities between Germany and Russia are clear. As noted above, in Russia, the index for large scale industry fell to 77 in 1917 from 100 in 1913, falling again to 35 in 1918, 26 in 1919 and 18 in 1920. [Tony Cliff, **Lenin**, vol. 3, p. 86] In other words, a fall of 23% between 1913 and 1917, 54.5% between 1917 and 1918, 25.7% in 1918 and 30.8% in 1919. A similar process occurred in Germany, where the fall in production was 37.7% between 1913 and 1917, 8.2% between 1917 and 1918 and 33.9% between 1918 and 1919 (the year of revolution). While production did rise in 1920 by 45.9%, it was still around 45% less than before the war.

Thus, comparing the two countries we discover a similar picture of economic collapse. In the year the revolution started, production had fallen by 23% in Russia (from 1913 to 1917) and by 43% in Germany (from 1913 to 1918). Once revolution had effectively started, production fell even more. In Russia, it fell to 65% of its pre-war level in 1918, in Germany it fell to 62% of its pre-war level in 1919. Of course, in Germany revolution did not go as far as in Russia, and so production did rise somewhat in 1920 and afterwards. What is significant is that in 1923, production fell dramatically by 34% (from around 70% of its pre-war level to around 45% of that level). This economic collapse did not deter the Communists from trying to provoke a revolution in Germany that year, so suggesting that economic disruption played no role in their evaluation of the success of a revolution.

This economic chaos in Germany is never mentioned by Leninists when they discuss the "objective factors" facing the Russian Revolution. However, once these facts are taken into account, the superficiality of the typical Leninist explanation for the degeneration of the revolution becomes obvious. The very problems which, it is claimed, forced the Bolsheviks to act as they did were also rampant in Germany. If economic collapse made socialism impossible in Russia, it would surely have had the same effect in Germany? This means, given that the economic collapse in both 1918/19 and 1923 was as bad as that facing Russia in 1918 and that the Bolsheviks had started to undermine soviet and military democracy along with workers' control by spring and summer of that year (see section 3), to blame Bolshevik actions on economic collapse would mean that any German revolution would have been subject to the same authoritarianism **if** the roots of Bolshevik authoritarianism were forced by economic events rather than a product of applying a specific political ideology via state power. Few Leninists draw this obvious conclusion from their own arguments although there is no reason for them not to.

So the German Revolution was facing the same problems the Russian one was. This means that when John Rees argues that giving machinery or goods to the peasants in return for grain instead of simply seizing it required *"revolution in Germany, or at least the revival of industry"* in Russia, he completely fails to indicate the troubles facing the German revolution (and the role Bolshevik policies and prejudices played in the collapse of industry, as noted in section H.6.2). *"Without a successful German revolution,"* he writes, *"the Bolsheviks were thrown back into a bloody civil war with only limited resources. The revolution was under siege."* [John Rees, *"In Defence of October,"* pp. 3–82, **International Socialism**, no. 52, p. 40 and p. 29] Yet given the state of the German economy at the time, it is hard to see how much aid a successful German revolution could have given and so his belief that a successful German Revolution would have mitigated Bolshevik authoritarianism seems exactly that, a belief without any real evidence to support it. As Lenin argued against the Russian left-communists in early 1918:

> *"Yes, we shall see the world revolution, but for the time being it is a very good fairy-tale ... But I ask, is it proper for a serious revolutionary to believe in fairy-tales? ... [I]f you tell the people that civil war will break out in German and also guarantee that instead of a clash with imperialism we shall have a field revolution on a world-wide scale, the people will say you are deceiving them. In doing this you will be overcoming the difficulties with which history has confronted us only in your minds, by your wishes ... You are staking everything on this card! If the revolution breaks out, everything is saved ... But if it does not turn out as we desire, if it does not achieve victory tomorrow — what then? Then the masses will say to you, you acted like gamblers — you staked everything on a fortunate turn of events that did not take place ..."* [**Collected Works**, vol. 27, p. 102]

It seems ironic that modern-day Leninists subscribe to such *"fairy-tales"* in their attempts to excuse Lenin's regime.

The same can be said of other revolutions as well. The Paris Commune, for example, was born after a four-month-long siege *"had left the capital in a state of economic collapse. The winter had been the severest in living memory. Food and fuel had been the main problems .. . Unemployment was widespread. Thousands of demobilised soldiers wandered loose in Paris and joined in the general hunt for food, shelter and warmth. For most working men the only source of income was the 1.50 francs daily pay of the National Guard, which in effect had become a form of unemployment pay."* The city was *"near starving"* and by March it was *"in a state of economic and political crisis."* [Stewart Edwards, *"Introduction,"* **The Communards of Paris, 1871**, p. 23] Yet this economic collapse and isolation did not stop the commune from introducing and maintaining democratic forms of decision making, both political and economic. A similar process occurred during the French Revolution, where mass participation via the *"sections"* was not hindered by economic collapse. It was finally stopped by state action organised by the Jacobins to destroy popular participation and initiative (see Kropotkin's **The Great French Revolution** for details).

During the Spanish Revolution, *"overall Catalan production fell in the first year of war by 30 per cent, and in the cotton-working sector of the textile industry by twice as much. Overall unemployment (complete and partial) rose by nearly a quarter in the first year, and this despite the military mobilisation decreed in September 1936. The cost of living quadrupled in just over two years; wages ... only doubled."* [Ronald Fraser, **Blood of Spain**, p. 234] Markets, both internally and externally, for goods and raw materials were disrupted, not to mention the foreign blockade and the difficulties the war and revolution imposed in trying to buy products from other countries. This came on top of problems caused by the great depression of the 1930s which affected Spain along with most other countries. Yet, libertarian socialist norms of economic and social decision making continued in spite of economic disruption. Ironically, given the subject of this discussion, it was only once the Stalinist counter-revolution got going were they fatally undermined or destroyed.

Thus economic disruption need not automatically imply authoritarian policies. And just as well, given the fact that revolution and economic disruption seem to go hand in hand.

Looking further afield, even revolutionary situations can be accompanied with economic collapse. For example, the Argentine revolt against neo-liberalism which started in 2001 took place when economy was a mess, with poverty and unemployment at disgusting levels. Four years of recession saw the poverty rate balloon from 31 to 53 percent of the population of 37 million, while unemployment climbed from 14 to 21.4 percent, according to official figures. Yet in the face

of such economic problems, working class people acted collectively, forming popular assemblies and taking over workplaces (see **Horizontalism: Voices of Popular Power in Argentina**, edited by Marina Sitrin).

The Great Depression of the 1930s in America saw a much deeper economic contradiction. Indeed, it was as bad as that associated with revolutionary Germany and Russia after the first world war. According to Howard Zinn, after the stock market crash in 1929 *"the economy was stunned, barely moving. Over five thousand banks closed and huge numbers of businesses, unable to get money, closed too. Those that continued laid off employees and cut the wages of those who remained, again and again. Industrial production fell by 50 percent, and by 1933 perhaps 15 million (no one knew exactly) — one-forth or one-third of the labour force — were out of work."* [**A People's History of the United States**, p. 378] Specific industries were badly affected. For example, total GNP fell to 53.6% in 1933 compared to its 1929 value. The production of basic goods fell by much more. Iron and Steel saw a 59.3% decline, machinery a 61.6% decline and non-ferrous metals and products, a 55.9% decline. Transport was also affected, with transportation equipment declining by 64.2% railroad car production dropping by 73.6% and locomotion production declining by 86.4%. Furniture production saw a decline of 57.9%. The workforce was equally affected, with unemployment reaching 25% in 1933. In Chicago 40% of the workforce was unemployed. Union membership, which had fallen from 5 million in 1920 to 3.4 million in 1929 fell to less than 3 million by 1933. [Lester V. Chandler, **America's Greatest Depression, 1929–1941**, p. 20, p. 23, p. 34, p. 45 and p. 228]

Yet in the face of this economic collapse, no Leninist proclaimed the impossibility socialism. In fact, the reverse was the case. Similar arguments could apply to, say, post-world war two Europe, when economic collapse and war damage did not stop Trotskyists looking forward to, and seeking, revolutions there. Nor did the massive economic collapse that occurred after the fall of Stalinism in Russia in the early 1990s deter Leninist calls for revolution. Indeed, you can rest assured that any drop in economic activity, no matter how large or small, will be accompanied by Leninist articles arguing for the immediate introduction of socialism.

And this was the case in 1917 as well, when economic crisis had been a fact of Russian life throughout the year. Lenin, for example, argued at the end of September that *"[u]navoidable catastrophe is threatening Russia ... The danger of a great catastrophe and of famine is imminent ... Six months of revolution have elapsed. The catastrophe is even closer. Unemployment has assumed a mass scale. To think that there is a shortage of goods in the country"*. [*"The Threatening Catastrophe and how to Fight It"*, **Collected Works**, vol. 25, p. 327] This did not stop him calling for revolution and seizing power, arguing that only a genuine socialist government — a Bolshevik one, naturally — could implement the policies needed to solve the crisis. Nor did this crisis stop the creation of democratic working class organisations, such as soviets, trade unions and factory committees being formed. It did not stop mass collective action to combat those difficulties. It appears, therefore, that while the economic crisis of 1917 did not stop the development of socialist tendencies to combat it, the seizure of power by a socialist party did.

Given that no Leninist has argued that a revolution could not nor should not take place in Russia in 1917, in Germany after the First World War, in the USA during the darkest months of the Great Depression, nor in Europe after the devastation of the Second World War, the argument that the grim economic conditions facing Bolshevik Russia made socialist democracy impossible seem weak. By arguing that, for example, Germany in 1918 to 1921 could create a viable socialist revolution in economic conditions just as bad as those facing Soviet Russia, the reasons why

the Bolsheviks created a party dictatorship must be looked for elsewhere. Moreover, **if** the pro-Bolshevik argument Rees, Cliff and others expound **is** correct, then the German Revolution would have been subject to the same authoritarianism as befell the Bolshevik one simply because it was facing a similar economic crisis.

In short, if these arguments are taken seriously them you would have to conclude that, for Leninists, economic collapse only makes socialism impossible once **they** are in power. Which is hardly convincing, or inspiring.

Finally, the situation is not as bleak as these Leninist argument would suggest. Yes, revolutions and economic disruption do go together but this does not make revolution undesirable or impossible. It means that revolutionaries need to be aware of these predictable — and predicted, at least by anarchists! — developments and be aware of the solutions can only be found in decentralisation, federalism and self-management. As Kropotkin put it:

> *"The first months of emancipation will inevitably increase consumption of goods and production will diminish. And, furthermore, any country achieving social revolution will be surrounded by a ring of neighbours either unfriendly or actually enemies ... The demands upon products will increase while production decreases, and finally famine will come. There is only one way of avoiding it. We should understand that as soon as a revolutionary movement begins in any country the only possible way out will consist in the workingmen [and women] and peasants from the beginning taking the whole national economy into their hands and organising it themselves ... But they will not be convinced of this necessity except when all responsibility for national economy, today in the hands of a multitude of ministers and committees, is presented in a simple form to each village and city, in every factory and shop, as their own affair, and when they understand that they must direct it themselves."* [Kropotkin, **Anarchism**, pp. 77–8]

Anarchists have always recognised that a revolution would face problems and difficult "objective factors" and has developed our ideas accordingly. We argue that to blame "objective factors" for the failure of the Russian Revolution simply shows that believing in fairy-tales is sadly far too common on the "serious" Leninist "revolutionary" left. As we discuss in the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", Marxist ideas were important and decisive in developments. In other words, economic disruption need not undermine a revolution if libertarian principles are applied. In Russia, this inevitable economic distruption was made worse by Bolshevik ideology due to the policies it inspired and the centralised structures it created.

5 Was the Russian working class atomised or "declassed"?

A standard Leninist explanation for the dictatorship of the Bolshevik party (and subsequent rise of Stalinism) is based on the "atomisation" or "declassing" of the proletariat. Neo-Trotskyist John Rees summarises this argument as follows:

> *"The civil war had reduced industry to rubble. The working class base of the workers' state, mobilised time and again to defeat the Whites, the rock on which Bolshevik power stood, had disintegrated. The Bolsheviks survived three years of civil war and wars in*

> *intervention, but only at the cost of reducing the working class to an atomised, individualised mass, a fraction of its former size, and no longer able to exercise the collective power that it had done in 1917 ... The bureaucracy of the workers' state was left suspended in mid-air, its class base eroded and demoralised. Such conditions could not help but have an effect on the machinery of the state and organisation of the Bolshevik Party ... The vice-like pressure of the civil war had transformed the state in other ways. The weight of the bureaucracy, of the army, of the Cheka, had grown enormously during the civil war. Without these institutions the October regime would have been swept away in a bloody, reactionary counter-revolution. With them the October revolution had become sclerotic and authoritarian ... The power of the bureaucracy, and within the bureaucracy the power of its top layers, grew."* [*"In Defence of October,"* pp. 3–82, **International Socialism**, no. 52, pp. 65–6]

It is these objective factors which explain why the Bolshevik party substituted itself for the Russian working class. *"Under such conditions,"* argues Tony Cliff, *"the class base of the Bolshevik Party disintegrated — not because of some mistakes in the policies of Bolshevism, not because of one or another conception of Bolshevism regarding the role of the party and its relation to the class — but because of mightier historical factors. The working class had become declassed ... Bolshevik 'substitutionism' ... did not jump out of Lenin's head as Minerva out of Zeus's, but was born of the objective conditions of civil war in a peasant country, where a small working class, reduced in weight, became fragmented and dissolved into the peasant masses."* [**Trotsky on Substitutionism**, pp. 62–3] In other words, because the working class was so decimated the replacement of class power by party power and then by that of the bureaucracy (Stalinism) was inevitable.

Before discussing it, we should point out that this argument dates back to Lenin. For example, he argued in 1921 that the proletariat, *"owning to the war and to the desperate poverty and ruin, has become declassed, i.e. dislodged from its class groove, and had ceased to exist as a proletariat ... the proletariat has disappeared."* [**Collected Works**, vol. 33, p. 65] However, unlike his later-day followers, Lenin was sure that while it *"would be absurd and ridiculous to deny that the fact that the proletariat is declassed is a handicap"* it could still *"fulfil its task of wining and holding state power."* [**Op. Cit.**, vol. 32, p. 412]

Anarchists do not find these arguments particularly convincing. This is for two reasons.

First, it seems incredulous to blame the civil war for the "substitution" of Bolshevik power for working class power as party power had been Lenin's stated aim in 1917 (and long before) and October saw the seizure of power by the Bolsheviks, **not** the soviets (see section H.3.11). As we saw in section 3, the Bolsheviks started to gerrymander and disband soviets to remain in power **before** the civil war started. As such, to blame the civil war and the problems it caused for the usurpation of power by the Bolsheviks is unconvincing. Simply put, the Bolsheviks had "substituted" itself for the proletariat from the start, from the day it seized power in the October revolution.

Second, the fact is the Russian working class was far from "atomised." Rather than being incapable of collective action, as Leninists assert, Russia's workers were more than capable of taking collective action throughout the civil war period. The problem for Leninists is, of course, that any such collective action was directed **against** the Bolshevik regime. This caused the party no end of problems for if the working class **was** the ruling class under the Bolsheviks, then who was it striking and protesting against? Emma Goldman explains the issue well:

> *"In my early period the question of strikes had puzzled me a great deal. People had told me that the least attempt of that kind was crushed and the participants sent to prison. I had not believed it, and, as in all similar things, I turned to Zorin [a Bolshevik] for information. 'Strikes under the dictatorship of the proletariat!' he had proclaimed; 'there's no such thing.' He had even upbraided me for crediting such wild and impossible tales. Against whom, indeed, should the workers strike in Soviet Russia, he argued. Against themselves? They were the masters of the country, politically as well as industrially. To be sure, there were some among the toilers who were not yet fully class-conscious and aware of their own true interests. These were sometimes disgruntled, but they were elements incited by ... self-seekers and enemies of the Revolution ... no better than out and out counter-revolutionists, and of course the Soviet authorities had to protect the country against their kind."* [**Living My Life**, vol. 2, pp. 872–3]

This still seems to be the position in pro-Bolshevik accounts of the Revolution and its degeneration. After the Bolshevik seizure of power, the working class as an active agent almost immediately disappears from their accounts and any mention of strikes and protests is short and fleeting, if it exists at all. This is unsurprising, as it does not bode well for maintaining the Bolshevik Myth to admit that workers were resisting the so-called "proletarian dictatorship" from the start. The notion that the working class had "disappeared" fits into this selective blindness well: why discuss the actions of a class which did not exist? Thus we have a logical circle from which reality can be excluded: the working class is "atomised" and so cannot take industrial action, evidence of industrial action need not be looked for nor mentioned because the class is "atomised."

As discussed in section H.6.3, the Russian working class **did** take extensive collective action throughout this period (from the Bolshevik seizure of power to well after the end of the civil war) and faced substantial State repression as a result. Here we provide more evidence of the existence of working class collective struggle throughout the period 1918 to 1923 but before doing so, it is necessary to place Lenin's comments on the "declassing" of the working class in context: rather than being the result of a **lack** of collective industrial direct action and solidarity, Lenin's arguments were the product of its opposite — the **rise** in collective struggle by the Russian working class. As one historian notes, *"[a]s discontent amongst workers became more and more difficult to ignore, Lenin ... began to argue that the consciousness of the working class had deteriorated ... workers had become 'declassed.'" "Lenin's analysis,"* he continues, *"had a superficial logic but it was based on a false conception of working-class consciousness. There is little evidence to suggest that the demands that workers made at the end of 1920 ... represented a fundamental change in aspirations since 1917".* Moreover, *"an analysis of the industrial unrest in 1921 shows that long-standing workers were prominent in protest."* [Jonathan Aves, **Workers Against Lenin**, pp. 90–1]

Lenin's pessimistic analysis of 1921 is in sharp contrast to the optimistic mood of early 1920 in Bolshevik ranks produced by the defeat of the White armies. For example, writing in May 1920, Trotsky seemed oblivious to the atomisation of the Russian working class so much bemoaned later, arguing that *"in spite of political tortures, physical sufferings and horrors, the labouring masses are infinitely distinct from political decomposition, from moral collapse, or from apathy ... Today, in all branches of industry, there is going on an energetic struggle for the establishment of strict labour discipline, and for the increase of the productivity of labour. The party organisations, the trade unions, the factory and workshop administrative committees, rival each one another in this*

respect, with the undivided support of the working class as a whole." Indeed, they *"concentrate their attention and will on collective problems"* (*"Thanks to a regime which, though it had inflicted great hardship upon them, has given their life a purpose and a high goal"*!). Needless to say, the party had *"the undivided support of the public opinion of the working class as a whole."* [**Terrorism and Communism**, p. 6]

The turn around in perspective after this period did not happen by accident, independently of the working class resistance to Bolshevik rule. After all, the defeat of the Whites in early of 1920 saw the Bolsheviks take *"victory as a sign of the correctness of its ideological approach and set about the task of reconstruction on the basis of an intensification of War Communism policies with redoubled determination."* This led to *"an increase in industrial unrest in 1920,"* including *"serious strikes."* The resistance was *"becoming increasingly politicised."* Thus, the stage was set for Lenin's turn around and his talk of "declassing." In early 1921 *"Lenin argued that workers, who were no more demoralised than they were in early 1920, had become 'declassed' in order to justify a political clamp-down."* [Aves, **Op. Cit.**, p. 37, p. 80 and p. 18]

Other historians also note this context. For example, while the *"working class had decreased in size and changed in composition, ... the protest movement from late 1920 made clear that it was not a negligible force and that in an inchoate way it retained a vision of socialism which was not identified entirely with Bolshevik power ... Lenin's arguments on the declassing of the proletariat was more a way of avoiding this unpleasant truth than a real reflection of what remained, in Moscow at least, a substantial physical and ideological force."* [Richard Sakwa, **Soviet Communists in Power**, p. 261] In the words of Diane Koenker, *"[i]f Lenin's perceptions of the situation were at all representative, it appears that the Bolshevik party made deurbanisation and declassing the scapegoat for its political difficulties, when the party's own policies and its unwillingness to accept changing proletarian attitudes were also to blame."* Ironically, this was not the first time that the Bolsheviks had blamed its problems on the lack of a "true" proletariat and its replacement by "petty-bourgeois" elements: *"This was the same argument used to explain the Bolsheviks' lack of success in the early months of 1917 — that the cadres of conscious proletarians were diluted by non-proletarian elements."* [*"Urbanisation and Deurbanisation in the Russian Revolution and Civil War,"* pp. 424–450, **The Journal of Modern History**, vol. 57, no. 3, p. 449 and p. 428]

It should be noted that the "declassing" argument does have a superficial validity if you accept the logic of vanguardism. After all, if you accept the premise that the party alone represents socialist consciousness and that the working class, by its own efforts, can only reach a reformist level of political conscious (at best), then any deviation in working class support for the party obviously represents a drop in class consciousness or a "declassing" of the proletariat (see section H.5.1). Thus working class protest against the party can be dismissed as evidence of "declassing" which has to be suppressed rather than what it really is, namely evidence of working class autonomy and collective struggle for what it considers **its** interests to be against a new master class. The "declassing" argument is related to the vanguardist position which, in turn, justifies the dictatorship of the party **over** the class (see section H.5.3).

So the "declassing" argument is not some neutral statement based on the fact that the numbers of industrial workers fell between October 1917 and 1921. It was developed as a weapon in the class struggle, to justify Bolshevik repression of collective working class struggle, to justify the continuation of Bolshevik party dictatorship **over** the working class. This in turn explains why working class struggle during this period generally fails to get mentioned by later day Bolsheviks — it simply undermines their justifications for Bolshevik dictatorship. After all, how can they say

that the working class could not exercise *"collective power"* when it was conducting mass strikes — collective action — throughout Russia during the period 1918 to 1923?

As such, it is not strange that most Leninist accounts of the revolution post-October rarely, if ever, mention what the working class was actually doing. We do get statistics on the drop of the numbers of industrial workers in the cities (usually Petrograd and Moscow), but any discussion on working class protest and strikes is limited at best, usually ignored. Which shows the bankruptcy of what can be called the "statistical tendency" of analysing the Russian working class. While statistics can tell us how many industrial workers remained in Russia in, say, 1921, they do not provide any idea of their combativeness or their ability to take collective decisions and action. If statistics alone indicated that, then the massive labour struggles in 1930s American would not have taken place. Millions had been made redundant: at the Ford Motor Company, for example, 128,000 workers had been employed in the spring of 1929 and only 37,000 were by August of 1931 (only 29% of the 1929 figure) while, by the end of 1930, almost half of the 280,000 textile mill workers in New England were out of work. [Howard Zinn, **A People's History of the United States**, p. 378] Yet in the face of this mass unemployment and economic crisis, the workers organised themselves and fought back. Likewise, the reduction in the number of Russian workers did not restrict their ability to make collective decisions and collectively act on them — Bolshevik repression **did.**

Moreover, while Leninists usually point to the fall in population in Petrograd and Moscow during the civil war, concentrating on these cities can be misleading. *"Using the Petrograd figures,"* notes Daniel R. Bower, *"historians have painted a lurid picture of flight from the cities. In 1918 alone the former capital lost 850,000 people and was by itself responsible for one-half of the total urban population decline of the Civil War years. If one sets aside aggregate figures to determine the trend characteristic of most cities, however, the experiences of Petrograd appears exception. Only a handful of cities ... lost half their population between 1917 and 1920, and even Moscow, which declined by over 40 percent, was not typical of most towns in the northern, food-importing areas. A study of all cities ... found that the average decline in the north (167 towns in all, excluding the capital cities) amounted to 24 percent between 1917 and 1920. Among the towns in the food-producing areas in the southern and eastern regions of the Russian Republic (a total of 128), the average decline came to only 14 percent."* [*"'The city in danger': The Civil War and the Russian Urban Population,"* **Party, State, and Society in the Russian Civil War**, Diane P. Koenker, William G. Rosenberg and Ronald Grigor Suny (eds.), p. 61] Does this mean that the possibility of soviet democracy declined less in these towns? Yet the Bolsheviks applied their dictatorship even there, suggesting that declining urban populations was not the source of their authoritarianism.

Equally, what are we to make of towns and cities which increased their populations? For example, Minsk, Samara, Khar'kov, Tiflis, Baku, Rostov-on-don, Tsaritsyn and Perm all grew in population (often by significant amounts) between 1910 and 1920 while other cities shrunk. [Diane Koenker, *"Urbanisation and Deurbanisation in the Russian Revolution and Civil War,"* pp. 424–450, **The Journal of Modern History**, vol. 57, no. 3, p. 425] Does that mean soviet democracy was possible in those towns but not in Petrograd or Moscow? Or does the fact that the industrial workforce grew by 14.8% between October 1920 and April 1921 mean that the possibility for soviet democracy also grew by a related percentage? [Aves, **Workers Against Lenin**, p. 159] In neither case was soviet democracy encouraged, in spite of the reversal of the factor alleged to have undermined it.

Then there is the question of when the reduction of workers makes soviet democracy impossible. After all, between May 1917 and April 1918 the city of Moscow lost 300,000 of its two million inhabitants. Was soviet democracy impossible in April 1918 because of this? During the civil war, Moscow lost another 700,000 by 1920 (which is basically the same amount per year). [Diane Koenker, **Op. Cit.**, p. 424] When did this fall in population mean that soviet democracy was impossible?

Simply put, comparing figures of one year to another simply fails to understand the dynamics at work, such as the impact of *"reasons of state"* and working class resistance to Bolshevik rule. It, in effect, turns attention away from the state of working class autonomy and on to number crunching.

Ultimately, the question of whether the working class was too "atomised" to govern can only be answered by doing something Leninists rarely do: looking at the class struggle in Russia during this period, by looking at the strikes, demonstrations and protests that occurred under Bolshevik rule. Needless to say, certain strike waves just cannot be ignored. The most obvious case is in Petrograd just before the Kronstadt revolt in early 1921. After all, the strikes (and subsequent Bolshevik repression) inspired the sailors to revolt in solidarity with them. Faced with such events, in Leninist circles the scale of the strikes and the Bolshevik repression is understated and the subject quickly changed. As we noted in section 10 of the appendix on "What was the Kronstadt Rebellion?", John Rees states that Kronstadt was *"preceded by a wave of serious but quickly resolved strikes."* [**Op. Cit.**, p. 61] Needless to say, he does not — no more than Trotsky before him — mention that the strikes were *"resolved"* by *"serious"* state repression as Emma Goldman recalled:

> *Trotsky ... omits the most important reason for the seeming indifference of the workers of Petrograd. It is of importance, therefore, to point out that the campaign of slander, lies and calumny against the sailors began on the 2nd March, 1921. The Soviet Press fairly oozed poison against the sailors. The most despicable charges were hurled against them, and this was kept up until Kronstadt was liquidated on 17th March. In addition, Petrograd was put under martial law. Several factories were shut down ... Under these iron-clad rules it was physically impossible for the workers of Petrograd to ally themselves with Kronstadt, especially as not one word of the manifestoes issued by the sailors in their paper was permitted to penetrate to the workers in Petrograd. In other words, Leon Trotsky deliberately falsifies the facts."* [*"Trotsky Protests Too Much"*, [**Writings of Emma Goldman**, 264]

Nor does Rees explain how *"an atomised, individualised mass"* **could** conduct such *"serious"* strikes, strikes which required martial law to break. Little wonder, then, Rees does not expound on the strikes and what they mean in terms of the revolution and his own argument. Ida Mett long ago stated the obvious about these all-Russia strike waves: *"And if the proletariat was that exhausted how come it was still capable of waging virtually total general strikes in the largest and most heavily industrialised cities?"* [**The Kronstadt Uprising**, p. 81]

Similarly, we find Victor Serge arguing that the *"working class often fretted and cursed; sometimes it lent an ear to the Menshevik agitators, as in the great strikes at Petrograd in the spring of 1919. But once the choice was posed as that between the dictatorship of the White Generals and the dictatorship of its own party — and there was not and could not be any other choice — every fit*

man ... came to stand ... before the windows of the local party offices." [**Year One of the Russian Revolution**, pp. 365–6] An exhausted and atomised working class capable of *"great strikes"*? That seems unlikely. Significantly, Serge does not mention the Bolshevik acts of repression used against the rebel workers (see below). This omission cannot help distort any conclusions to be drawn from his account.

Which, incidentally, shows that the civil war was not all bad news for the Bolsheviks. Faced with working class protest, they could play the "White card" — unless the workers went back to work, the Whites would win. This explains why the strikes of early 1921 were larger than before and explains why they were so important. As the "White card" could no longer be played, the Bolshevik repression could not be excused in terms of the civil war. Indeed, given working class opposition to the party, it would be fair to say that civil war actually **helped** the Bolsheviks remain in power: without the threat of the Whites, the working class would **not** have tolerated the Bolsheviks longer than the Autumn of 1918. As Emma Goldman recounted, *"Kropotkin emphasised, that the blockade and the continuous attacks on the Revolution by the interventionists had helped to strengthen the power of the Communist regime. Intervention and blockade were bleeding Russia to death, and were preventing the people from understanding the real nature of the Bolshevik regime."* [**My Disillusionment in Russia**, p. 99]

The fact is that working class collective struggle against the new regime — the new boss class — and, consequently, Bolshevik repression, started before the outbreak of the civil war, continued throughout the civil war period and reached a climax in the early months of 1921. Even the repression of the Kronstadt rebellion did not stop it, with strikes continuing into 1923 (and, to a lesser degree, afterward). Indeed, the history of the "workers' state" is a history of the state repressing the revolt of the workers.

Needless to say, it would be impossible to give a full account of working class resistance to Bolshevism. All we can do here is give a flavour of what was happening and the sources for further information (also see section H.6.3). What should be clear from our account is that the idea that the working class in this period was incapable of collective organisation and struggle is false, the idea that Bolshevik "substitutionism" can be explained in such terms is also false. In addition, it will become clear that Bolshevik repression explicitly aimed to break the ability of workers to organise and exercise collective power. As such, it seems hypocritical for modern-day Leninists to blame Bolshevik party dictatorship on the "atomisation" of the working class when Bolshevik rule was dependent on smashing working class collective organisation and resistance. Simply put, to remain in power Bolshevism, from almost the start, had to crush working class power. This is to be expected, given the centralised nature of the state and the class structures and authoritarian social relationships it generates (see section H.3.9) and the assumptions of vanguardism (see section H.5). If you like, October 1917 did not see the end of *"dual power"*: rather the Bolshevik state replaced the bourgeois state and working class power (as expressed in its collective struggle) came into conflict with it. By 1921 these protests and strikes were threatening the very existence of the Bolshevik dictatorship, forcing it to abandon key aspects of its economic policies.

This struggle of the "workers' state" against the workers started early in 1918. *"By the early summer of 1918,"* records one historian, *"there were widespread anti-Bolshevik protests. Armed clashes occurred in the factory districts of Petrograd and other industrial centres. Under the aegis of the Conference of Factory and Plant Representatives ... a general strike was set for July 2."* [William Rosenberg, **Russian Labour and Bolshevik Power**, p. 107] According to another historian,

economic factors *"were soon to erode the standing of the Bolsheviks among Petrograd workers ... These developments, in turn, led in short order to worker protests, which then precipitated violent repressions against hostile workers. Such treatment further intensified the disenchantment of significant segments of Petrograd labour with Bolshevik-dominated Soviet rule."* [Alexander Rabinowitch, **Early Disenchantment with Bolshevik Rule**, p. 37]

The reasons for these protest movement were both political and economic. The deepening economic crisis combined with protests against Bolshevik authoritarianism to produce a wave of strikes aiming for political change. Feeling that the soviets were distant and unresponsive to their needs (with good reason, given Bolshevik postponement of soviet elections and gerrymandering of the soviets — see section H.6.1), workers turned to direct action and the initially Menshevik inspired *"Conference of Factory and Plant Representatives"* (also known as the *"Extraordinary Assembly of Delegates from Petrograd Factories and Plants"*, EAD) to voice their concerns. At its peak, reports *"estimated that out of 146,000 workers still in Petrograd, as many as 100,000 supported the conference's goals."* [Rosenberg, **Op. Cit.**, p. 127] The aim of the Conference (as per Menshevik policy) was to reform the existing system from within and, as such, the Conference operated openly: *"for the Soviet authorities in Petrograd, the rise of the Extraordinary Assembly of Delegates from Petrograd Factories and Plants was an ominous portent of worker defection."* [Rabinowitch, **Op. Cit.**, p. 37]

The first wave of outrage and protests occurred after Bolshevik Red Guards opened fire on a demonstration for the Constituent Assembly in early January (killing 21, according to Bolshevik sources). This demonstration *"was notable as the first time workers came out actively against the new regime. More ominously, it was also the first time forces representing soviet power used violence against workers."* [David Mandel, **The Petrograd Workers and the Soviet Seizure of Power**, p. 355] It would not be the last — indeed repression by the "workers' state" of workers became a recurring feature of Bolshevism.

The general workers' opposition saw the growth of the EAD. *"The emergence of the EAD"*, Rabinowitch notes, *"was also stimulated by the widespread view that trade unions, factory committees, and soviets ... were no longer representative, democratically run working-class institutions; instead they had been transformed into arbitrary, bureaucratic government agencies. There was ample reason for this concern."* To counter the EAD, the Bolsheviks organised non-party conferences which, in itself, shows that the soviets had become as distant from the masses as the opposition argued. District soviets *"were deeply concerned about their increasing isolation ... At the end of March ... they resolved to convene successive nonparty workers' conferences ... in part to undercut the EAD by strengthening ties between district soviets and workers."* This was done amidst *"unmistakable signs of the widening rift between Bolshevik-dominated political institutions and ordinary factory workers."* The EAD was an expression of the *"growing disenchantment of Petrograd workers with economic conditions and the evolving structure and operation of Soviet political institutions"*. [**Op. Cit.**, p. 224, p. 232 and p. 231]

It *"appeared that the government was now ready to go to whatever extremes it deemed necessary (including sanctioning the arrest and even shooting of workers) to quell labour unrest. This in turn led to intimidation, apathy, lethargy and passivity of other workers. In these circumstances, growth in support of the [Extraordinary] Assembly slowed down."* The Assembly's plans for a May Day demonstration to protest the government's policies were cancelled because of workers did not respond to the appeals to demonstrate, in part because of *"Bolshevik threats against 'protesters'"*. This apathy did not last long as events *"served to reinvigorate and temporarily radicalise the Assem-*

bly. These developments included yet another drastic drop in food supplies, the shooting of protesting housewives and workers in the Petrograd suburb of Kolpino, the arbitrary arrest and abuse of workers in another Petrograd suburb, Sestroresk, the closure of newspapers and the arrests of individuals who had denounced the Kolpino and Sestroresk events, the intensification of labour unrest and conflict with the authorities in the Obukhov plant and in other Petrograd factories and districts." [Rabinowitch, **Early Disenchantment with Bolshevik Rule**, pp. 40–1]

Early May saw *"the shooting of protesting housewives and workers in the suburb of Kolpino"*, the *"arbitrary arrest and abuse of workers"* in Sestroretsk, the *"closure of newspapers and arrests of individuals who protested the Kolpino and Sestroretsk events"* and *"the resumption of labour unrest and conflict with authorities in other Petrograd factories."* This was no isolated event, as *"violent incidents against hungry workers and their family demanding bread occurred with increasing regularity."* [Alexander Rabinowitch, **The Bolsheviks in Power**, pp. 229–30] The shooting at Kolpino *"triggered a massive wave of indignation ... Work temporarily stopped at a number of plants."* In Moscow, Tula, Kolomna, Nizhnii-Novoprod, Rybinsk, Orel, Tver' and elsewhere *"workers gathered to issue new protests."* In Petrograd, *"textile workers went on strike for increased food rations and a wave of demonstrations spread in response to still more Bolshevik arrests."* This movement was the *"first major wave of labour protest"* against the regime, with *"protests against some form of Bolshevik repression"* being common. [William Rosenberg, **Russian Labor and Bolshevik Power**, pp. 123–4]

While the Kolpino incident *"was hardly the first of its kind, it triggered a massive wave of indignation ... Work temporarily stopped at a number of plants."* Between Kolpino and early July, more than seventy incidents occurred in Petrograd, including strikes, demonstrations and anti-Bolshevik meetings. Many of these meetings *"were protests against some form of Bolshevik repression: shootings, incidents of 'terroristic activities,' and arrests."* In some forty incidents *"worker's protests focused on these issues, and the data surely understate the actual number by a wide margin. There were as well some eighteen separate strikes or some other work stoppages with an explicitly anti-Bolshevik character."* [Rosenberg, **Op. Cit.**, pp. 123–4] Then, *"[a]t the very end of May and the beginning of June, when a wave of strikes to protest at bread shortages broke out in the Nevskii district, a majority of Assembly delegates ... resolved to call on striking Nevskii district workers to return to work and continue preparation for a general city-wide strike."* [Rabinowitch, **Op. Cit.**, p. 42] Unfortunately, for the Assembly, postponing the strikes until later, until a "better time", rather than encouraging them gave the authorities time to prepare.

"At the end of May and beginning of June, a wave of strikes to protest the lack of bread swept Nivskii district factories" and *"strikes followed by bloody clashes between workers and Soviet authorities had erupted in scattered parts of central Russia."* In Petrograd, things came to a head during and after the soviet elections in June. On June 21, a general meeting of Obukhov workers *"seized control of the plant"* and the next day the assembled workers *"resolved to demand that the EAD should declare political strikes ... to protest the political repression of workers."* Orders were issued by the authorities *"to shut down Obukhov plant"* and *"the neighbourhood surrounding the plant was placed under martial law."* [Rabinowitch, **The Bolsheviks in Power**, p. 231 and pp. 246–7] So faced with workers collective action, the *"Bolsheviks responded by 'invading' the whole Nevskii district with troops and shutting down Obukhov completely. Meetings everywhere were forbidden."* However *"workers were not so readily pacified. In scores of additional factories and shops protests mounted and rapidly spread along the railways."* At the June 26th *"extraordinary session"* of the Conference a general strike was declared for July 2nd. The Bolshevik authorities acted quickly:

"Any sign of sympathy for the strike was declared a criminal act. More arrests were made. In Moscow, Bolsheviks raided the Aleksandrovsk railroad shops, not without bloodshed. Dissidence spread." On July 1st, *"machine guns were set up at main points throughout the Petrograd and Moscow railroad junctions, and elsewhere in both cities as well. Controls were tightened in factories. Meetings were forcefully dispersed."* [Rosenberg, **Op. Cit.**, p. 127] Unsurprisingly, *"as a result of extreme government intimidation, the response to the Assembly's strike call on 2 July was negligible."* [Rabinowitch, **Early Disenchantment with Bolshevik Rule**, p. 42] This repression was not trivial:

> *"Among other things, all newspapers were forced to print on their front pages Petrograd soviet resolutions condemning the Assembly as part of the domestic and foreign counter-revolution. Factories participating in the strike were warned that they would be shut down and individual strikers were threatened with the loss of work — threats that were subsequently made good. Printing plants suspected of opposition sympathies were sealed, the offices of hostile trade unions were raided, martial law declared on rail lines, and armed strike-breaking patrols with authority to take whatever action was necessary to prevent work stoppages were formed and put on 24-hour duty at key points throughout Petrograd."* [**Op. Cit.**, p. 45]

Needless to say, *"the Petrograd authorities drew on the dubious mandate provided by the stacked soviet elections to justify banning the Extraordinary Assembly."* [**Op. Cit.**, p. 42] While the Bolsheviks had won around 50% of workplace votes, they had gerrymandered the soviet making the election results irrelevant. Faced with *"demands from below for the immediate re-election"* of the Soviet, before the long-postponed election took place the existing Bolshevik-controlled Soviet confirmed new regulations *"to help offset possible weaknesses"* in their *"electoral strength in factories."* The *"most significant change in the makeup of the new soviet was that numerically decisive representation was given to agencies in which the Bolsheviks had overwhelming strength, among them the Petrograd Trade Union Council, individual trade unions, factory committees in closed enterprises, district soviets, and district non-party workers' conferences."* This ensured that *"[o]nly 260 of roughly 700 deputies in the new soviet were to be elected in factories, which guaranteed a large Bolshevik majority in advance"*. In short, the Bolsheviks *"contrived a majority"* in the new Soviet long before gaining 127 of the 260 factory delegates and even these victories raised *"the nagging question of how many Bolshevik deputies from factories were elected instead of the opposition because of press restrictions, voter intimidation, vote fraud, or the short duration of the campaign."* Overall, then, the Bolshevik election victory *"was highly suspect, even on the shop floor."* [Alexander Rabinowitch, **The Bolsheviks in Power**, pp. 248–252]

The fact the civil war had just started with the revolt of the Czech Legion at the end of May also undoubtedly aided the Bolsheviks during this election, as did the fact that the Mensheviks and Right-SRs had campaigned on a platform of winning the soviet elections as the means of replacing soviet democracy by the Constituent Assembly: many workers still viewed the soviets are **their** organisations and aimed for a functioning soviet system rather than its end. With their electoral "mandate," secured beforehand, the opposition fatally weakened by its backward-looking perspective and the threat of counter-revolution (albeit in the name of the Constituent Assembly rather than White restoration), the Bolsheviks turned on the Conference, both locally and nationally, and arrested its leading activists, so decapitating one of the few independent working class organisations left in Russia. As Rabinowitch argues, *"the Soviet authorities were*

profoundly worried by the threat posed by the Assembly and fully aware if their growing isolation from workers (their only real social base) ... Petrograd Bolsheviks developed a siege mentality and a corresponding disposition to consider any action — from suppression of the opposition press and manipulation of elections to terror even against workers — to be justified in the struggle to retain power until the start of the imminent world revolution." [**Early Disenchantment with Bolshevik Rule**, pp. 43–4]

In Moscow, workers also organised a Conference movement and *"[r]esentment against the Bolsheviks was expressed through strikes and disturbances, which the authorities treated as arising from supply difficulties, from 'lack of consciousness,' and because of the 'criminal demagogy' of certain elements. Lack of support for current Bolshevik practices was treated as the absence of worker consciousness altogether, but the causes of the unrest was more complicated. In 1917 political issues gradually came to be perceived through the lens of party affiliation, but by mid-1918 party consciousness was reversed and a general consciousness of workers' needs restored. By July 1918 the protest movement had lost its momentum in the face of severe repression and was engulfed by the civil war."* In the light of the fate of workers' protest, the May 16th resolution by the Bogatyr' Chemical Plant calling (among other things) for *"freedom of speech and meeting, and an end to the shooting of citizens and workers"* seems to the point. Unsurprisingly, *"[f]aced with political opposition within the soviets and worker dissatisfaction in the factories Bolshevik power increasingly came to reply on the party apparatus itself."* [Richard Sakwa, *"The Commune State in Moscow in 1918,"* pp. 429–449, **Slavic Review**, vol. 46, no. 3/4, pp. 442–3, p. 442 and p. 443] State repression also took place *"[i]n June 1918 [when] workers in Tula protested a cut in rations by boycotting the local soviet. The regime declared martial law and arrested the protestors. Strikes followed and were suppressed by violence. In Sormovo, when a Menshevik-Social Revolutionary newspaper was closed, 5,000 workers went on strike. Again firearms were used to break the strike."* Other techniques were used to break resistance. For example, the regime often threatened rebellious factories with a lock out, which involved numerous layouts, new rules of discipline, purges of workers' organisations and the introduction of piece work. [Thomas F. Remington, **Building Socialism in Bolshevik Russia**, p. 105 and p. 107] As discussed in section H.6.1, similar events happened in other cities with the Bolsheviks disbanding soviets elected with non-Bolshevik majorities all across Russia and suppressing the resulting working class protest.

Rather than the Civil War disrupting the relationship between the vanguard party and the class it claimed to lead, it was in fact the Bolsheviks who did so in face of rising working class dissent and disillusionment in the spring of 1918. In fact, *"[b]y the early summer of 1918"* there were *"widespread anti-Bolshevik protests. Armed clashes occurred in the factory districts of Petrograd and other industrial centres."* and *"after the initial weeks of 'triumph' ... Bolshevik labour relations after October"* changed and *"soon lead to open conflict, repression, and the consolidation of Bolshevik dictatorship over the proletariat in place of proletarian dictatorship itself."* [Rosenberg, **Op. Cit.**, p. 107 and p. 117] Given this, the outbreak of the civil war consolidated workers support for the Bolsheviks and saved it from even more damaging workers' unrest. As Thomas F. Remington puts it:

> *"At various times groups of workers rebelled against Bolshevik rule. But for the most part, forced to choose between 'their' regime and the unknown horrors of a White dictatorship, most willingly defended the Bolshevik cause. The effect of this dilemma may be seen in the periodic swings in the workers' political temper. When Soviet rule stood*

> *in peril, the war simulated a spirit of solidarity and spared the regime the defection of its proletarian base. During lulls in the fighting, strikes and demonstrations broke out."* [**Op. Cit.**, p. 101]

This cycle of resistance and repression was widespread. In July 1918, a leading Bolshevik insisted *"that severe measures were needed to deal with strikes"* in Petrograd while in other cities *"harsher forms of repression"* were used. For example, in Tula, in June 1918, the regime declared *"martial law and arrested the protestors. Strikes followed and were suppressed by violence"*. In Sormovo, 5,000 workers went on strike after a Menshevik-SR paper was closed. Violence was *"used to break the strike."* [Remington, **Op. Cit.**, p. 105] It should also be noted that at the end of September, there was a revolt by Baltic Fleet sailors demanding (as they did again in 1921) a *"return to government by liberated, democratic soviets — that is, 1917-type soviets."* The Left-SR controlled Kronstadt soviet had been disbanded and replaced by a Bolshevik revolutionary committee in July 1918. [Rabinowitch, **The Bolsheviks in Power**, p. 352 and p. 302]

This process of workers protest and state repression continued in 1919 and subsequent years. It followed a cyclical pattern. There was a *"new outbreak of strikes in March 1919 after the collapse of Germany and the Bolshevik re-conquest of the Ukraine. The pattern of repression was also repeated. A strike at a galosh factory in early 1919 was followed by the closing of the factory, the firing of a number of workers, and the supervised re-election of its factory committee. The Soviet garrison at Astrakhan mutinied after its bread ration was cut. A strike among the city's workers followed in support. A meeting of 10,000 Astrakhan workers was suddenly surrounded by loyal troops, who fired on the crowd with machine guns and hand grenades, killing 2,000. Another 2,000, taken prisoner, were subsequently executed. In Tula, when strikes at the defence factories stopped production for five days, the government responded by distributing more grain and arresting the strike organisers ... strikes at Putilov again broke out, at first related to the food crisis ... The government treated the strike as an act of counter-revolution and responded with a substantial political purge and re-organisation. An official investigation ... concluded that many shop committees were led by [Left] Social Revolutionaries ... These committees were abolished and management representatives were appointed in their stead."* [Remington, **Op. Cit.**, pp. 109–10] In the Volga region, in March 1919 delegates to a conference of railroad workers *"protested the Cheka's arrest of union members, which the delegates insisted further disrupted transport. It certainly curbed the number of strikes."* [Donald J. Raleigh, **Experiencing Russia's Civil War**, p. 371]

The strikes in Petrograd centred around the Putilov shows the response of the authorities to the "atomised" workers who were taking collective action. In March 1919, *"fifteen factories struck together (roughly 35,000 workers were involved) ... workers at Putilov assembled and sent a delegation to the works committee ... and put forward a number of demands ... On 12 March Putilov stopped work. Its workers called to others to join them, and some of them came out in a demonstration where they were fired upon by Cheka troops. Strikes then broke out at fourteen other enterprises ... On Sunday 16 March an appeal was made to the Putilovtsy to return to normal working the following day or ... the sailors and soldiers would be brought in. After a poor showing on the Monday, the sailor went in, and 120 workers were arrested; the sailors remained until the 21st and by the 22nd normal work had been resumed."* In July strikes broke out again in response to the cancellation of holidays which involved 25,000 workers in 31 strikes. [Mary McAuley, **Bread and Justice**, pp. 251–253 and p. 254] In the Moscow area, while it is *"impossible to say what proportion of workers were involved in the various disturbances,"* following the lull after the defeat of the workers' conference

movement in mid-1918 *"each wave of unrest was more powerful than the last, culminating in the mass movement from late 1920."* For example, at the end of June 1919, *"a Moscow committee of defence (KOM) was formed to deal with the rising tide of disturbances"* The KOM *"concentrated emergency power in its hands, overriding the Moscow Soviet, and demanding obedience from the population. The disturbances died down under the pressure of repression."* [Richard Sakwa, **Soviet Communists in Power**, p. 94 and pp. 94–5] In Tula *"after strikes in the spring of 1919"* local Menshevik party activists had been arrested while Petrograd saw *"violent strikes"* at around the same time. [Jonathan Aves, **Workers Against Lenin**, p. 19 and p. 23]

Historian Vladimir Brovkin summarises the data he provides in his article *"Workers' Unrest and the Bolshevik Response in 1919"* (reproduced along with data from other years in his book **Behind the Front Lines of the Civil War**) as follows:

> *"Data on one strike in one city may be dismissed as incidental. When, however, evidence is available from various sources on simultaneous independent strikes in different cities and an overall picture begins to emerge ... Workers' unrest took place in Russia's biggest and most important industrial centres: Moscow, Petrograd, Tver', Tula, Briansk, and Sormovo. Strikes affected the largest industries ... Workers' demands reflected their grievances ... The greatest diversity was in workers' explicitly political demands or expression of political opinion ... all workers' resolutions demanded free and fair elections to the soviets ... some workers ... demanded the Constituent Assembly .. .*
>
> *"The strikes of 1919 ... fill an important gap in the development of the popular movement between October 1917 and February 1921. On the one hand, they should be seen as antecedents of similar strikes in February 1921, which forced the Communists to abandon war communism. In the capitals, workers, just as the Kronstadt sailors had, still wanted fairly elected soviets and not a party dictatorship. On the other hand, the strikes continued the protests that had began in the summer of 1918. The variety of behavioural patterns displayed during the strikes points to a profound continuity...*
>
> *"In all known cases the Bolsheviks' initial response to strikes was to ban public meetings and rallies ... In several cities ... the authorities confiscated strikers' food rations in order to suppress the strike. In at least five cities ... the Bolsheviks occupied the striking plant and dismissed the strikers en masse ... In all known cases the Bolsheviks arrested strikers ... In Petrograd, Briansk, and Astrakhan' the Bolsheviks executed striking workers."* [*"Workers' Unrest and the Bolshevik Response in 1919"*, **Slavic Review**, vol. 49, no. 3, pp. 370–2]

Nor was this collective struggle stop in 1919 — *"strike action remained endemic in the first nine months of 1920"* and *"in the first six months of 1920 strikes had occurred in seventy-seven per cent of middle-sized and large works."* For the Petrograd province, soviet figures state that in 1919 there were 52 strikes with 65,625 participants and in 1920 73 strikes with 85,645, both high figures as according to one set of figures, which are by no means the lowest, there were 109,100 workers there. Strikes in 1920 *"were frequently a direct protest against the intensification of War Communist labour policies, the militarisation of labour, the implementation of one-man management and the struggle against absenteeism, as well as food supply difficulties. The Communist Party press carried numerous articles attacking the slogan of 'free labour.'"* Overall, *"the geographical extent of the February-March strike wave is impressive"* and the *"harsh discipline that went with labour*

militarisation led to an increase in industrial unrest in 1920." [Aves, **Op. Cit.**, p. 69, p. 74 and p. 80]

The spring of 1920 *"saw discontent on the railways all over the country."* This continued throughout the year. In Petrograd, the Aleksandrovskii locomotive building works *"had seen strikes in 1918 and 1919"* and in August 1920 it again stopped work. Workers had sent three representatives to the works commissar, who had them arrested. Three days later, work stopped and the strikers demanded their release. The authorities placed a guard of 70 sailors outside the enterprise to lock the workers out. The Cheka then arrested the workers' soviet delegates, who were from the SR (Minority) list, along with thirty workers and then the *"opportunity was taken to carry out a general round-up, and arrests were made"* at three other works. After the arrests, *"a meeting was held to elect new soviet delegates but the workers refused to co-operate and a further 150 were arrested and exiled to Murmansk or transferred to other workshops."* The enormous Briansk works *"experienced two major strikes in 1920"*, and second one saw the introduction of martial law on both the works and the settlement it was situated in. In Moscow, a strike in May by printers resulted in their works *"closed and the strikers sent to concentration camps after an attempt to start sympathy action failed."* [Aves, **Op. Cit.**, p. 44, pp. 45–7, pp. 48–9 and p. 59]

In January 1920, a strike followed a mass meeting at a railway repair shop in Moscow. Attempts to spread were foiled by arrests. The workshop was closed, depriving workers of their rations and 103 workers of the 1,600 employed were imprisoned. *"In late March 1920 there were strikes in some factories"* in Moscow and *"[a]t the height of the Polish war the protests and strikes, usually provoked by economic issues but not restricted to them, became particularly frequent ... The assault on non-Bolshevik trade unionism launched at this time was probably associated with the wave of unrest since there was a clear danger that they would provide a focus for opposition."* [Sakwa, **Op. Cit.**, p. 95] The *"largest strike in Moscow in the summer of 1920"* was by tram workers over the equalisation of rations. It began on August 12th, when one tram depot went on strike, quickly followed by others while workers *"in other industries joined in to."* The tram workers *"stayed out a further two days before being driven back by arrests and threats of mass sackings."* In the textile manufacturing towns around Moscow *"there were large-scale strikes"* in November 1920, with 1000 workers striking for four days in one district and a strike of 500 mill workers saw 3,000 workers from another mill joining in. [Simon Pirani, **The Russian Revolution in Retreat, 1920–24**, p. 32 and p. 43]

Strikes occurred in other places, such as Tula were the workforce *"contained a high proportion of skilled, long-standing, hereditary workers."* An *"all-out strike"* began at the start of June and on 8 June the local newspaper published a declaration from the Tula soviet threatening the strikers with *"the most repressive measures, including the application of the highest measure of punishment"*. The following day the city was declared to be under a *"state of siege"* by the local military authorities. The strikers lost ration cards and by 11 June there was a return to work. Twenty-three workers were sentenced to a forced labour camp until the end of the war. However, the *"combined impact of these measures did not prevent further unrest and the workers put forward new demands."* On 19 June, the soviet approved *"a programme for the suppression of counter-revolution"* and *"the transfer of Tula to the position of an armed camp."* The Tula strike *"highlights the way in which workers, particularly skilled workers who were products of long-standing shop-floor subcultures and hierarchies, retained the capability as well as the will to defend their interests."* [Aves, **Op. Cit.**, p. 50–55] Saratov also saw a wave of factory occupations break out in June and mill workers went out in July while in August, strikes and walkouts occurred in its mills and other factories and

these *"prompted a spate of arrests and repression."* In September railroad workers went out on strike, with arrests making *"the situation worse, forcing the administration to accept the workers' demands."* [Raleigh, **Op. Cit.**, p. 375]

While strike activity *"was most common in Petrograd, where there had been 2.5 strikers for every workman,"* the figure for Moscow was 1.75 and 1.5 in Kazan. In early March *"a wave of strikes hit the Volga town of Samara"* when a strike by printers in spread to other enterprises. *"Strike action in Moscow did not just include traditionally militant male metal workers."* Textile workers, tram workers and printers all took strike action. [Aves, **Op. Cit.**, p. 69, p. 72 and pp. 77–8]

The end of the civil war did not see the end of working class protest. Quite the reverse, for *"[b]y the beginning of 1921 a revolutionary situation with workers in the vanguard had emerged in Soviet Russia"* with *"the simultaneous outbreak of strikes in Petrograd and Moscow and in other industrial regions."* In February and March 1921, *"industrial unrest broke out in a nation-wide wave of discontent or* ***volynka****. General strikes, or very widespread unrest"* hit all but one of the country's major industrial regions and *"workers protest consisted not just of strikes but also of factory occupations, 'Italian strikes', demonstrations, mass meetings, the beating up of communists and so on."* Faced with this massive strike wave, the Bolsheviks did what many ruling elites do: they called it something else. Rather than admit it was a strike, they *"usually employed the word* ***volynka****, which means only a 'go-slow'"*. [Aves, **Op. Cit.**, p. 3, p. 109, p. 112 and pp. 111–2]

In Petrograd in the beginning of February *"strikes were becoming an everyday occurrence"* and by *"the third week of February the situation rapidly deteriorated."* The city was rocked by strikes, meetings and demonstrations. In response to the general strike the Bolsheviks replied with a *"military clamp-down, mass arrests and other coercive measures, such as the closure of enterprises, the purging of the workforce and stopping of rations which accompanied them."* [Aves, **Op. Cit.**, p. 113 and p. 120] As Paul Avrich recounts, in Petrograd these *"street demonstrations were heralded by a rash of protest meetings"* in workplaces. On the 24th of February, the day after a workplace meeting, the Trubochny factory workforce downed tools and walked out the factory. Additional workers from nearby factories joined in. The crowd of 2,000 was dispersed by armed military cadets. The next day, the Trubochny workers again took to the streets and visited other workplaces, bringing them out on strike too. In the face of a near general strike, a three-man Defence Committee was formed. Zinoviev *"proclaimed martial law"* and *"[o]vernight Petrograd became an armed camp."* Strikers were locked out and the *"application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities"* was *"indispensable in restoring order"* (as were economic concessions). [**Kronstadt 1921**, pp. 37–8, p. 39, pp. 46–7 and p. 50] Thus *"massive city-wide protest spread through Petrograd ... Strikes and demonstrations spread. The regime responded as it had done in the past, with lock-outs, mass arrests, heavy show of force — and concessions."* [Remington, **Op. Cit.**, p. 111] As we discuss in "What was the Kronstadt Rebellion?", these strikes produced the Kronstadt revolt while the Bolshevik repression ensured the Petrograd workers did not act with the sailors.

A similar process of workers revolt and state repression occurred in Moscow at the same time. There *"industrial unrest"* also *"turned into open confrontation and protest spilled on to the streets"*, starting with a *"wave of strikes that had its centre in the heart of industrial Moscow."* Meetings were held, followed by demonstrations and strikes which spread to other districts over the next few days. Workers demanded that elections to the soviets be held. Striking railway workers sent emissaries along the railway to spread the strike and soon strikes were *"also spreading outside Moscow city itself into the surrounding provinces"*. In response, *"Moscow and Moscow province were*

put under martial law." [Aves, **Op. Cit.**, p. 130, p. 138 and pp. 139–144] This strike wave started when *"[m]eetings in factories and plants gathered and criticised government policies, beginning with supply and developing into general political criticism."* As was typical, the *"first response of the civil authorities to the disturbances was increased repression"* although as *"the number of striking factories increased some concessions were introduced."* Military units called in against striking workers *"refused to open fire, and they were replaced by the armed communist detachments"* which did. *"That evening mass protest meetings were held ... The following day several factories went on strike"* and troops were *"disarmed and locked in as a precaution"* by the government against possible fraternising. February 23rd saw a 10,000 strong street demonstration and *"Moscow was placed under martial law with a 24-hour watch on factories by the communist detachments and trustworthy army units."* The disturbances were accompanied by factory occupations and on the 1st of March the soviet called on workers *"not to go on strike."* However, *"wide-scale arrests deprived the movement of its leadership."* March 5th saw disturbances at the Bromlei works, *"resulting in the now customary arrest of workers. A general meeting at the plant on 25 March called for new elections to the Moscow Soviet. The management dispersed the meeting but the workers called on other plants to support the calls for new elections. As usual, the ringleaders were arrested."* [Sakwa, **Op. Cit.**, pp. 242–3, p. 245 and p. 246] As in Petrograd, the mixture of (economic) concessions and coercion eventually broke the will of the strikers.

The events at the Bromlei works were significant in that the March 25th a mass meeting passed an anarchist and Left-SR initiated resolution supporting the Kronstadt rebels. The party *"responded by having them sacked en masse"*. The workers *"demonstrated through"* their district *"and inspired some brief solidarity strikes."* Over 3000 workers joined the strikes and about 1000 of these joined the flying picket (managers at one print shop locked their workers in to stop them joining the protest). While the party was willing to negotiate economic issues, *"it had no wish to discuss politics with workers"* and so arrested those who initiated the resolution, sacked the rest of the workforce and selectively re-employed them. Two more strikes were conducted *"to defend the political activists in their midst"* and two mass meetings demanded the release of arrested ones. Workers also struck on supply issues in May, July and August. [Pirani, **Op. Cit.**, pp. 83–4]

In Saratov, the strike started on March 3rd when railroad shop workers did not return to their benches and instead rallied to discuss an anticipated further reduction in food rations. The *"railroad workers debated resolutions recently carried by the Moscow proletariat ... The next day the strike spread to the metallurgical plants and to most other large factories, as Saratov workers elected representatives to an independent commission charged with evaluating the functioning of all economic organs. When it convened, the body called for the re-election of the soviets and immediate release of political prisoners."* During the next two days, *"the assemblies held at factories to elect delegates to the commission bitterly denounced the Communists."* The *"unrest spilled over into Pokrovsk."* The commission of 270 had less than ten Communists and *"demanded the freeing of political prisoners, new elections to the soviets and to all labour organisations, independent unions, and freedom of speech, the press, and assembly."* While the ration cut *"represent[ed] the catalyst, but not the cause, of the labour unrest"* and *"the turmoil touched all strata of the proletariat, male and female alike, the initiative for the disturbances came from the skilled stratum that the Communists normally deemed the most conscious."* The Communists *"resolved to shut down the commission before it could issue a public statement"* and as they *"expected workers to protest the dissolution of their elected representatives"*, they also *"set up a Provincial Revolutionary Committee ... which introduced martial law*

both in the city and the garrison. It arrested the ringleaders of the workers' movement ...the police crackdown depressed the workers' movement and the activities of the rival socialist parties." The near general strike was broken by a *"wave of repression"* but *"railroad workers and dockworkers and some printers refused to resume work."*The Cheka sentenced 219 people to death. [Donald J. Raleigh, **Op. Cit.**, p. 379 and pp. 387–9]

A similar *"little Kronstadt"* broke out in the Ukrainian town of Ekaterinoslavl at the end of May. The workers there *"clearly had strong traditions of organisation"* and elected a strike committee of fifteen which *"put out a series of political ultimatums that were very similar in content to the demands of the Kronstadt rebels."* On June 1st, *"by a pre-arranged signal"* workers went on strike throughout the town, with workers joining a meeting of the railway workers. The local Communist Party leader was instructed *"to put down the rebellion without mercy . .. Use Budennyi's [Red] cavalry."* The strikers prepared a train and its driver instructed to spread the strike throughout the network. Telegraph operators were told to send messages throughout the Soviet Republic calling for *"free soviets"* and soon an area up to fifty miles around the town was affected. The Communists used the Cheka to crush the movement, carrying out mass arrests and shooting 15 workers (and dumping their bodies in the River Dnepr). [Aves, **Op. Cit.**, pp. 171–3] It must be noted that the call for *"free soviets"* had previously been raised by the anarchist-influenced Makhnovist movement.

Thus strike action was a constant feature of Bolshevik Russia during the civil war. Rather than being an "atomised" mass, the workers repeatedly organised themselves, made their demands and took collective action to achieve them. In response, the Bolshevik regime used state repression to break this collective activity: martial law, lock-outs, mass arrests, withholding rations and shootings. As such, **if** the rise of Stalinism can, as modern-day Leninists argue, be explained by the "atomisation" of the working class during the civil war then the Bolshevik regime and its repression should be credited with ensuring this happened.

Unsurprisingly, as Emma Goldman recounted, *"counter-revolutionists, and bandits in Soviet penal institutions were a negligible minority. The bulk of the prison population consisted of social heretics who were guilty of the cardinal sin against the Communist Church. For no offence was considered more heinous than to entertain political views in opposition to the party, and to voice any protest against the evils and crimes of Bolshevism. I found that by far the greatest number were political prisoners, as well as peasants and workers guilty of demanding better treatment and conditions."* [**Living My Life**, vol. 2, p. 873] Indeed, of the 17,000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40,913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants or workers. [George Leggett, **The Cheka: Lenin's Political Police**, p. 178] Other rebel toilers were not so lucky:

> *"It is not possible to estimate with any degree of accuracy how many workers were shot by the Cheka during 1918–1921 for participation in labour protest. However, an examination of individual cases suggests that shootings were employed to inspire terror and were not simply used in the occasional extreme case."* [Aves, **Op. Cit.**, p. 35]

After Kronstadt and the various strike waves and protests of that time, Bolshevik repression of labour unrest continued. The economic crisis of 1921 which accompanied the introduction

of the NEP saw unemployment rise while workplaces *"that had been prominent in unrest were particularly hit by ... purges ... The effect on the willingness of workers to support opposition parties was predictable."* Yet *"[d]espite the heavy toll of redundancies, the ability to organise strikes did not disappear. Strike statistics for 1921 continue to provide only a very rough indicator of the true scale of industrial unrest and appear not to include the first half of the year."* [Aves, **Op. Cit.**, p. 182–183] For example, in early March, *"long strikes"* hit the textile towns around Moscow. At the Glukhovskaia mills 5000 workers struck for 5 days, 1000 at a nearby factory for 2 days and 4000 at the Voskresenskaia mills for 6 days. In May, 1921, workers in the city of Moscow reacted to supply problems *"with a wave of strikes. Party officials reckoned that in a 24-day period in May there were stoppages at 66 large enterprises."* These included a sit-down strike at one of Moscow's largest plants, while *"workers at engineering factories in Krasnopresnia followed suit, and Cheka agents reported 'dissent, culminating in strikes and occupation' in Bauman."* August 1922 saw 19,000 workers strike in textile mills in Moscow region for several days. Tram workers also struck that year, while teachers *"organised strikes and mass meetings"*. Workers usually elected delegates to negotiate with their trade unions as well as their bosses as both were Communist Party members. Strike organisers, needless to say, were sacked. [Pirani, **Op. Cit.**, p. 82, pp. 111–2 and p. 157]

The spring of 1922 likewise saw Soviet Russia *"hit by a new strike wave"* and the strikes *"continued to reflect enterprise traditions."* That year saw 538 strikes with 197,022 participants recorded. [Aves, **Op. Cit.**, p. 183 and p. 184] The following year saw more stoppages and in *"July 1923 more than 100 enterprises employing a total of some 50,000 people were on strike. In August figures totalled some 140 enterprises and 80,00 workers. In September and November the strike wave continued unabated."* As in the civil war, the managers shut down plants, fired the workers and rehired them on an individual basis. In this way, trouble-makers were dismissed and "order" restored. The *"pattern of workers' action and Bolshevik reaction played itself out frequently in dozens of other strikes. The Bolsheviks acted with the explicit purpose of rooting out the possibility of further protest. They tried to condition workers that labour protest was futile."* The GPU (the renamed Cheka) *"used force to disperse workers demonstrating with the arrested strike leaders."* [Vladimir Brovkin, **Russia After Lenin**, p. 174, pp. 174–5 and p. 175]

In Moscow, *"[b]etween 1921 and 1926, all branches of industry and transport ... experienced wildcat strikes or other spontaneous labour disturbances. Strike waves peaked in the winter of 1920–21 ... and in the summer and fall of 1922 and 1923 ... during July-December 1922, for example, 65 strikes and 209 other industrial disturbances were recorded in Moscow's state enterprises."* Metalworkers were arguably the most active sector at this time while *"a number of large strikes"* took place in the textile industry (where *"strikes were sometimes co-ordinated by spontaneously organised strike committees or 'parallel' factory committees"*). And in spite of repression, *"politicisation continued to characterise many labour struggles"* and, as before, *"spontaneous labour activism hindered not only the party's economic program but also the political and social stabilisation of the factories."* [John B. Hatch, **Labour Conflict in Moscow, 1921–1925**, p. 62, p. 63, p. 65, pp. 66–7 and p. 67]

We even find one of the leading proponents of "atomised" excuse, neo-Trotskyist Tony Cliff, noting against Stalinism that *"in 1922, 192,000 workers went on strike in state-owned enterprises; in 1923 the number was 165,000; in 1924, 43,000; in 1925, 34,000; in 1926, 32,900; in 1927, 20,100; in the first half of 1928, 8,900. In 1922 the number of workers involved in labour conflicts was three and a half million, and in 1923, 1,592,800."* He did not ponder how a class he claimed elsewhere had

become atomised, individualised, disintegrated and declassed could take such widescale collective industrial action — nor did he mention the use of State repression under Lenin against such action, instead falsely asserting that before the rise of Stalinism it *"was taken for granted that strikes were not to be suppressed by the state."* [**State Capitalism in Russia**, p. 28] Ultimately, if these strikes between 1922 and 1924 showed a social basis existed to combat the rising Stalinist bureaucracy, surely the strikes between 1918 and 1921 likewise show a social basis existed to combat the existing Leninist bureaucracy?

As well as repression of strike waves across the country, the end of the civil war also saw the Bolsheviks finally destroy what was left of non-Bolshevik trade unionism. In Moscow, this took place against fierce resistance of the union members. As one historian concludes:

> *"Reflecting on the determined struggle mounted by printers, bakers and chemical workers in Moscow during 1920–1, in spite of appalling economic conditions, being represented by organisations weakened by constant repression ... to retain their independent labour organisations it is difficult not to feel that the social basis for a political alternative existed."* [Jonathan Aves, *"The Demise of Non-Bolshevik Trade Unionism in Moscow: 1920–21"*, pp. 101- 33, **Revolutionary Russia**, vol. 2, no. 1, p. 130]

The also Bolsheviks dispersed provincial trade unions conferences in Vologda and Vitebsk in 1921 *"because they had anti-communist majorities."* [Aves, **Workers Against Lenin**, p. 176] At the All-Russian Congress of Metalworkers' Union in May, the delegates voted down the party-list of recommended candidates for union leadership. The Central Committee of the Party *"disregarded every one of the votes and appointed a Metalworkers' Committee of its own. So much for 'elected and revocable delegates'. Elected by the union rank and file and revocable by the Party leadership!"* [Brinton, **The Bolsheviks and Workers Control**, p. 83] Fear of arrest (and worse!) was widespread and so, for example, a Moscow Metalworkers' Union conference in early February 1921 saw the first speakers calling *"for the personal safety of the delegates to be guaranteed"* before criticisms would be aired. [Sakwa, **Op. Cit.**, p. 244] Such an atmosphere is hardly supportive for the encouragement of collective organisation!

Other forms of workers' organisation were also destroyed. For example, in his 1920 diatribe against Left-wing Communism, Lenin pointed to *"non-Party workers' and peasants' conferences"* and Soviet Congresses as means by which the party secured its rule. Yet, **if** the congresses of soviets were *"**democratic** institutions, the like of which even the best democratic republics of the bourgeois have never known"*, the Bolsheviks would have no need to *"support, develop and extend"* non-Party conferences *"to be able to observe the temper of the masses, come closer to them, meet their requirements, promote the best among them to state posts"*. [**The Lenin Anthology**, p. 573] How the Bolsheviks met *"their requirements"* is extremely significant — they disbanded them, just as they had with soviets with non-Bolshevik majorities in 1918. This was because *"[d]uring the disturbances"* of late 1920, *"they provided an effective platform for criticism of Bolshevik policies."* Their frequency was decreased and they *"were discontinued soon afterward."* [Sakwa, **Op. Cit.**, p. 203]

In the soviets themselves, workers turned to non-partyism, with non-party groups winning majorities in soviet delegates from industrial workers' constituencies in many places. This was the case in Moscow, where Bolshevik support among *"industrial workers collapsed"* in favour of non-party people. Due to support among the state bureaucracy and the usual packing of the

soviet with representatives from Bolshevik controlled organisations, the party had, in spite of this, a massive majority. Thus the Moscow soviet elections of April-May 1921 *"provided an opportunity to revive working-class participation. The Bolsheviks turned it down."* [Pirani, **Op. Cit.**, pp. 97–100 and p. 23] Indeed, one Moscow Communist leader stated that these soviet elections had seen *"a high level of activity by the masses and a striving to be in power themselves."* [quoted by Pirani, **Op. Cit.**, p. 101]

In short, an *"examination of industrial unrest after the Bolshevik seizure of power … shows that the Revolution had brought to the surface resilient traditions of organisation in society and had released tremendous forces in favour of greater popular participation … The survival of the popular movement through the political repression and economic devastation of the Civil War testifies to its strength."* [Aves, **Op. Cit.**, p. 186] The idea that the Russian working class was incapable of collective struggle is hard to defend given this series of struggles (and state repression). The class struggle in Bolshevik Russia did not stop, it continued except the ruling class had changed. All the popular energy and organisation this expressed, which could have been used to combat the problems facing the revolution and create the foundations of a genuine socialist society, were wasted in fighting the Bolshevik regime. Ultimately, the *"sustained, though ultimately futile, attempts to revive an autonomous workers' movement, especially in mid-1918 and from late 1920, failed owing to repression."* [Sakwa, **Op. Cit.**, p. 269] Another historian notes that *"immediately after the civil war"* there was *"a revival of working class collective action that culminated in February-March 1921 in a widespread strike movement and the revolt at the Kronstadt naval base."* As such, the position expounded by Rees and other Leninists *"is so one-sided as to be misleading."* [Pirani, **Op. Cit.**, p. 7 and p. 23]

So, looking at the Moscow Tram strike of August 1920 as an example, in addition to economic demands, strikers called for a general meeting of all depots. This was *"significant: here the workers' movement was trying to get on the first rung of the ladder of organisation, and being knocked off by the Bolsheviks."* The party *"responded to the strike in such a way as to undermine workers' organisation and consciousness"* and *"throttl[ed] independent action"* by *"repression of the strike by means reminiscent of tsarism."* The Bolshevik's *"dismissive rejection"* of the demand for a city-wide meeting *"spoke volumes about their hostility to the development of the workers' movement, and landed a blow at the type of collective democracy that might have better able to confront supply problems."* This, along with the other strikes that took place, showed that *"the workers' movement in Moscow was, despite its numerical weakness and the burdens of civil war, engaged with political as well as industrial issues … the working class was far from non-existent, and when, in 1921, it began to resuscitate soviet democracy, the party's decision to make the Moscow soviet its 'creature' was not effect but cause."* [Pirani, **Op. Cit.**, p. 32, p. 33, p. 37 and p. 23]

When such things happen, we can conclude that Bolshevik desire to remain in power had a significant impact on whether workers were able to exercise collective power or not. As Pirani concludes:

> *"one of the most important choices the Bolsheviks made … was to turn their backs on forms of collective, participatory democracy that workers briefly attempted to revive [after the civil war] … [Available evidence] challenges the notion … that political power was forced on the Bolsheviks because the working class was so weakened by the civil war that it was incapable of wielding it. In reality, non-party workers were willing and able to participate in political processes, but in the Moscow soviet and elsewhere,*

> *were pushed out of them by the Bolsheviks. The party's vanguardism, i.e. its conviction that it had the right, and the duty, to make political decisions on the workers' behalf, was now reinforced by its control of the state apparatus. The working class was politically expropriated: power was progressively concentrated in the party, specifically in the party elite."* [**Op. Cit.**, p. 4]

Given this collective rebellion all across the industrial centres of Russia before, during and after the Civil War, it hard to take seriously claims that Bolshevik authoritarianism was the product of an "atomisation" or "declassing" of the working class or that it had ceased to exist in any meaningful sense. Clearly it existed and was capable of collective action and organisation — until it was repressed by the Bolsheviks and even then it keep returning. This implies that a key factor in rise of Bolshevik authoritarianism was political — the simple fact that the workers would not vote Bolshevik in free soviet and union elections and so they were not allowed to. As one Soviet Historian put it, *"taking the account of the mood of the workers, the demand for free elections to the soviets [raised in early 1921] meant the implementation in practice of the infamous slogan of soviets without communists,"* although there is little evidence that the strikers actually raised that *"infamous"* slogan. [quoted by Aves, **Op. Cit.**, p. 123] It must also be noted that Bolshevik orthodoxy at the time stressed, and had done since at least early 1919, the necessity of Party dictatorship **over** the workers (see section H.1.2 for details).

Nor can it be said that this struggle can be blamed on "declassed" elements within the working class itself. In her study of this question, Diane Koenker notes that 90% of the change in the number of workers in Moscow *"is accounted for by men. Working women did not leave the city,"* their numbers dropping from 90,000 in 1918 to 80,000 in 1920. Why these 80,000 women workers should be denied a say in their own revolution is not clear, given the arguments of the pro-Bolshevik left. After all, the same workers remained in roughly the same numbers. Looking at the male worker population, their numbers fell from 215,000 to 124,000 during the same period. However, *"the skilled workers whose class consciousness and revolutionary zeal had helped win the October revolution did not entirely disappear, and the women who remained were likely to be family members of these veterans of 1917."* It was *"the loss of young activists rather than all skilled and class conscious urban workers that caused the level of Bolshevik support to decline during the civil war."* Indeed *"the workers who remained in the city were among the most urbanised elements."* In summary, *"the deurbanisation of those years represented a change in quantity but not entirely in quality in the cities. The proletariat declined in the city, but it did not wither away ... a core of the city's working class remained."* [**Op. Cit.**, p. 440, p. 442, p. 447 and p. 449] As Russian anarchist Ida Mett argued decades before in relation to the strikes in early 1921 that inspired the Kronstadt sailor rebellion:

> *"The population was drifting away from the capital. All who had relatives in the country had rejoined them. The authentic proletariat remained till the end, having the most slender connections with the countryside.*
>
> *"This fact must be emphasised, in order to nail the official lies seeking to attribute the Petrograd strikes that were soon to break out to peasant elements, 'insufficiently steeled in proletarian ideas.' The real situation was the very opposite. A few workers were seeking refuge in the countryside. The bulk remained. There was certainly no exodus of peasants into the starving towns! ... It was the famous Petrograd proletariat, the*

> *proletariat which had played such a leading role in both previous revolutions, that was finally to resort to the classical weapon of the class struggle: the strike."* [**The Kronstadt Uprising**, p. 36]

In terms of struggle, links between the events in 1917 and those during the civil war also exist. For example Jonathan Aves writes that there were *"distinct elements of continuity between the industrial unrest in 1920 and 1917. This is not surprising since the form of industrial unrest in 1920, as in the pre-revolutionary period and in 1917, was closely bound up with enterprise traditions and shop-floor sub-cultures. The size of the Russian industrial workforce had declined steeply during the Civil War but where enterprises stayed open ... their traditions of industrial unrest in 1920 shows that such sub-cultures were still capable of providing the leaders and shared values on which resistance to labour policies based on coercion and Communist Party enthusiasm could be organised. As might be anticipated, the leaders of unrest were often to be found amongst the skilled male workers who enjoyed positions of authority in the informal shop-floor hierarchies."* Moreover, *"despite intense repression, small groups of politicised activists were also important in initiating protest and some enterprises developed traditions of opposition to the communists."* Looking at the strike wave of early 1921 in Petrograd, the *"strongest reason for accepting the idea that it was established workers who were behind the* ***volynka*** *[i.e. the strike wave] is the form and course of protest. Traditions of protest reaching back through the spring of 1918 to 1917 and beyond were an important factor in the organisation of the* ***volynka.*** *... There was also a degree of organisation ... which belies the impression of a spontaneous outburst."* [**Op. Cit.**, p. 39 and p. 126]

Clearly, then, the idea that the Russian working class was atomised or declassed cannot be defended given this series of struggles. As noted, the notion that the workers were "declassed" was used to justify state repression of collective working class struggle and defend the necessity of party dictatorship in face of it. Emma Goldman was right to later note how the *"thought oppressed me that what [the Bolsheviks] called 'defence of the Revolution' was really only the defence of [their] party in power."* [**My Disillusionment in Russia**, p. 57] The class struggle in Bolshevik Russia did not stop, it continued except the ruling class had changed from bourgeoisie to Bolshevik dictatorship:

> *"There is another objection to my criticism on the part of the Communists. Russia is on strike, they say, and it is unethical for a revolutionist to side against the workers when they are striking against their masters. That is pure demagoguery practised by the Bolsheviki to silence criticism.*
>
> *"It is not true that the Russian people are on strike. On the contrary, the truth of the matter is that the Russian people have been* ***locked out*** *and that the Bolshevik State — even as the bourgeois industrial master — uses the sword and the gun to keep the people out. In the case of the Bolsheviki this tyranny is masked by a world-stirring slogan: thus they have succeeded in blinding the masses. Just because I am a revolutionist I refuse to side with the master class, which in Russia is called the Communist Party."* [**My Disillusionment in Russia**, p. xlix]

All of which, incidentally, answers Leninist Brian Bambery's rhetorical question: *"why would the most militant working class in the world, within which there was a powerful cocktail of revolutionary ideas, and which had already made two revolutions (in 1905 and in February 1917), allow a*

handful of people to seize power behind its back in October 1917?" [*"Leninism in the 21st Century"*, **Socialist Review**, no. 248, January 2001] Once the Russian workers realised that a handful of people **had** seized power they **did** protest the usurpation of their power and rights by the Bolsheviks. The Bolsheviks repressed them.

Yes, as Lenin argued, *"it is clear that there is no freedom and no democracy where there is suppression and where there is violence."* In 1917 he was talking of the *"freedom of the oppressors, the exploiters, the capitalists"* but it equally applies to the working class — if the so-called *"dictatorship of the proletariat, i.e., the organisation of the vanguard of the oppressed as the ruling class"* is suppressing the working class itself then there can be *"no freedom and no democracy"* for the working class and so it **cannot** be the ruling class. Rather, it is the self-proclaimed *"vanguard"* party which is in fact the ruling class and just like *"under capitalism we have the state in the proper sense of the word, that is, a special machine for the suppression of one class by another, and, what is more, of the majority by the minority."* Thus the so-called "workers state" became, as anarchists had long predicted, like any other State, *"a power which arose from society but places itself above it and alienates itself more and more from it"* and *"consists of special bodies of armed men having prisons, etc., at their command"* [*"The State and Revolution,"* **The Lenin Anthology**, p. 373, p. 374, p. 316] As can be seen, the Bolshevik regime was most definitely a State... **in the normal sense of the term.** That it prefixed the word "Red" onto these instruments of minority rule matters little, as can be seen from the repression of labour protest under Lenin from early 1918 onwards.

All in all, these strikes and subsequent repression confirms Bakunin's prescient critique of Marxism (see section H.1.1). Based on the anarchist analysis of the State as *"minority government, from the top downward, of a vast quantity of men,"* he correctly predicted that even the so-called workers' State *"cannot be sure of its own self-preservation without an armed force to defend it against its own **internal enemies**, against the discontent of its people."* [**Michael Bakunin: Selected Writings**, p. 265] Yes, of course, workers viewed the Bolshevik regime more favourably than the possibility of a White victory — but that is a very low bar indeed: socialism, surely, should aspire to be somewhat more appealing than the restoration of Tsarism!

Little wonder, then, that the role of the masses in the Russian Revolution after October 1917 is rarely discussed by pro-Bolshevik writers. Indeed, the conclusion to be reached is simply that for the Bolsheviks the role of workers is to support the party, get it into power and then do what it tells them. Unfortunately for the Bolsheviks, the Russian working class refused this position, the same position it held under Tsarism and capitalism. Instead they practised collective struggle in defence of their economic **and** political interests, a struggle which inevitably brought them into conflict both with the "workers' state" and their role in Bolshevik ideology. Faced with this collective action, the Bolshevik leaders (beginning with Lenin) started to talk about the "declassing" of the proletariat to justify their repression of (and power **over**) the working class. Ironically, it was the aim of Bolshevik repression to "atomise" the working class as, fundamentally, their rule depended on it. While Bolshevik repression did, in the end, succeed it cannot be said that the working class in Russia did not resist this usurpation of power by the Bolshevik party. As such, rather than "atomisation" or "declassing" being the cause for Bolshevik power and repression, it was, in fact, one of **results** of them — and helped ensure the rise of Stalin.

6 Did the Bolsheviks blame "objective factors" for their actions?

In a word, no. At the time of the revolution and for some period afterwards, the idea that "objective factors" were responsible for their policies was one which few, if any, Bolshevik leaders expressed. As we discussed in section 2, leading Bolsheviks like Lenin, Trotsky and Bukharin argued that **any** revolution would face civil war and economic crisis. Lenin **did** talk about the *"declassing"* of the proletariat from 1920 onwards, but that did not seem to affect the proletarian and socialist character of his regime (indeed, Lenin's argument was developed in the context of **increasing** working class collective action, **not** its absence).

This is not to say that the Bolshevik leaders were completely happy with the state of their revolution after the final victory over the White counter-revolution. Lenin, for example, expressed deep concern about the rising bureaucratic deformations he saw in the soviet state (particularly after the end of the civil war). Yet, while concerned about the bureaucracy, he was not concerned about the Party's monopoly of power in spite of the obvious relation between the two (how could a party dictatorship function without a bureaucracy?). Similarly, he tried to combat the bureaucracy by increasing the very structural forms which created it in the first place, namely by increasing centralisation, which in turn increased the bureaucracy and its power. In short, he fought the bureaucracy by "top-down" and, ironically, bureaucratic methods, the only ones left to him. A similar position was held by Trotsky, who was quite explicit in supporting the party dictatorship throughout the 1920s (and, indeed, the 1930s — as discussed in the appendix "Reply to errors and distortions in David McNally's pamphlet *'Socialism from Below'*"). Needless to say, due to the limitations of the ideology, both failed to understand how bureaucracy arises and how it could be effectively fought.

This position started to change, however, as the 1920s drew on and Trotsky was increasingly sidelined from power. Then, faced with the rise of Stalinism, Trotsky had to find a theory which allowed him to explain the degeneration of the revolution and, at the same time, absolve Bolshevik ideology (and his own actions!) from all responsibility for it. He did so by invoking the objective factors facing the revolution. Since then, his various followers have utilised this argument, with various changes in emphasis, to attack Stalinism while defending Bolshevism.

The problem with this type of argument is that all the major evils usually associated with Stalinism already existed under Lenin and Trotsky. Party dictatorship, one-man management, repression of opposition groups and working class protest, state bureaucracy and so on all existed before Stalin manoeuvred himself into absolute power. Thus, for example, we find Peter Binns of the British SWP lament in 1987 that:

> *"This exploitation and powerlessness of the Russian class [under Mikhail Gorbachev] is nothing new. It came about more than 50 years ago. The final vestiges of workers' rights disappeared in 1929 when it was decreed that all managers' orders were now to be 'unconditionally binding on his subordinate administrative staff and on all workers'. It was at this time that the trade unions ceased to be able to play any function on behalf of workers, in particular over the negotiation of wages. An internal passport system was introduced, and in 1930 all industrial enterprises were forbidden to employ workers who left their former jobs without permission ... As the Russian authorities themselves cynically put it: 'With the entry of the USSR into the period of socialism, the possibility of using coercive measures by corrective labour have immeasurably increased.' ... In fact*

> *all efforts to start **any** independent workers' initiatives, let alone workers' councils, are now suppressed and are standardly rewarded with extreme forms of repression."* [*"The Theory of State Capitalism"*, pp. 73–98, **Russia: From Workers' State to State Capitalism**, p. 75]

Yet this describes the regime under Lenin and Trotsky! As noted in section H.3.14, in early 1918 Lenin advocated *"dictatorial"* one-man management and started to impose it, so ending the experiments in workers' control which had previously flourished since mid-1917. This was followed a few years later by the *"militarisation of labour"*, likewise championed by Lenin and Trotsky:

> *"The militarisation of labour, rushed through the ninth Party Congress with typical Tammany Hall steam-roller methods, definitely turned every worker into a galley-slave. The substitution of one-man power in the shops and mills in place of co-operative management placed the masses again under the thumb of the very elements they had for three years been taught to hate as the worst menace ... Insult was added to injury by the introduction of the labour book, which virtually stamped everyone a felon, robbed him of the last vestiges of freedom, deprived him of the choice of place and occupation, and fastened him to a given district without the right of straying too far, on pain of severest penalties."* [Emma Goldman, **Living My Life**, vol. 2, p. 780]

As noted in the last section, workers who protested against the imposition of these policies and class relations were likewise rewarded with repression. Indeed, Trotsky wrote a book defending this regime against criticism by leading Marxist Karl Kautsky which included the comment that *"[i]n point of fact, under Socialism there will not exist the apparatus of compulsion itself, namely, the State: for it will have melted away entirely into a producing and consuming commune. None the less, the road to Socialism lies through a period of the highest possible intensification of the principle of the State. And you and I are just passing through that period. Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless form of State, which embraces the life of the citizens authoritatively in every direction."* [**Terrorism and Communism**, pp. 169–70] As Stalin put in 1930 (apparently, according to Binns, when a new class system had now developed):

> *"We are in favour of the withering away of the state, and at the same time we stand for the strengthening of the dictatorship of the proletariat, which represents the most powerful and mighty of all forms of the state which have existed up to the present day. The highest development of the power of the state, with the object of preparing the conditions of the withering away of the state: that is the Marxist formula. Is it 'contradictory'? Yes, it is 'contradictory.' But this contradiction is a living thing and wholly reflects the Marxist dialectic."* [quoted by Alfred B. Evans Jr., **Soviet Marxism-Leninism: The Decline of an Ideology**, p. 39]

Thus Stalinism and Bolshevism was based on the same social-relations — and a social system is **not** defined by the individuals in charge and their intentions but rather the relations within its social structures and the power-relations these generate. While it can be argued that Stalinism was worse — that repression was more brutal and privileges were more extreme — this does

not change the **class** nature of the regime and the inequalities that these authoritarian social relations created. As Emma Goldman saw at first hand, *"better and more plentiful food was served Party members at the Smolny dining-room and many similar injustices and evils"*, there was a *"special hospital for Communists, with every modern comfort, while other institutions lacked the barest medical and surgical necessities"*, *"housing arrangements disclosed similar favouritism and injustice"* along with general *"inefficiency, mismanagement, and bureaucratic corruption"*. [**Living My Life**, vol. 2, p. 732, p. 754 and p. 900] That the bureaucracy under Stalin gained more wealth and exercised greater power over its subjects hardly changes the class nature of the regime. Indeed, the greater abuses of Stalinism had their basis in the social relations created under Lenin and Trotsky (and, of course, Stalin who was — least we forget — an *"old Bolshevik"* as well, indeed an older one than Trotsky).

Worse for the advocates of this position, with the exception of the state bureaucracy, none of the mainstream Bolshevik leaders found anything to complain about. Whether it is Lenin or Trotsky, the sad fact of the matter is that a party dictatorship presiding over an essentially state capitalism economy was not considered a bad thing. Indeed, the "gains" of October Trotskyists claim that Stalinism destroyed were, in fact, long dead by 1921. Soviet democracy, working class freedom of speech, association and assembly, workers' self-management in the workplace, trade union freedom, the ability to strike, and a host of other, elementary, working class rights had been eliminated long before the end of the civil war (indeed, often before it started) and *"there is no evidence indicating that Lenin or any mainstream Bolshevik leaders lamented the loss of workers' control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921."* [Samuel Farber, **Before Stalinism**, p. 44]

Which, of course, causes problems for those who seek to distance Lenin and Trotsky from Stalinism and claim that Bolshevism is fundamentally "democratic" in nature. The knots Leninists get into to do this can be ludicrous. A particularly crazy example can be seen from the UK's Socialist Workers Party. For John Rees, it is a truism that *"it was overwhelmingly the force of circumstance which obliged the Bolsheviks to retreat so far from their own goals. They travelled this route in opposition to their own theory, not because of it — no matter what rhetorical justifications were given at the time."* [*"In Defence of October,"* pp. 3–82, **International Socialism**, no. 52, p. 70] So we cannot judge the Bolsheviks on what they did **nor** what they said! This is understandable for, as Rees implicitly admits, the Bolsheviks did **not** blame "objective circumstances" for their decisions. Rather, they viewed them as ideologically correct responses to difficulties they thought **every** revolution would face.

So this sort of position has little substance to it. It is both logically and factually flawed. Logically, it simply makes little sense as anything but an attempt to narrow political discussion and whitewash Bolshevik practice and politics. Given that Leninists constantly quote from Lenin's and Trotsky's post-1918 works, it seems strange that they try to stop others so doing. Strange, but not surprising, given their task is to perpetuate the Bolshevik Myth. Where that leaves revolutionary politics is left unsaid, but it seems to involve worshipping at the shrine of October and treating as a heretic anyone who dares suggest we analysis it in any depth and perhaps learn lessons from it. As discussed in the next section, there is utility in such spurious arguments.

Of course Rees' comments are little more than assertions. Given that he dismisses the idea that we can actually take what any Bolshevik says at face value, we are left with little more than a mind reading operation in trying to find out what the likes of Lenin and Trotsky "really"

thought. Perhaps the root explanation of Rees' position is the awkward fact that there are no quotes from any of the leading Bolsheviks which support it? After all, if they were quotes from the hallowed texts expounding the position Rees says the Bolshevik leaders "really" held then he would have provided them. The simple fact is that Lenin and Trotsky, like all the Bolshevik leaders, considered a one-party dictatorship presiding over a state capitalist economy as "socialism" (it also explains Trotsky's difficulty in understanding the obvious class-nature of Stalinism and his ambiguous position in terms of its "achievements"). Can we really dismiss this simply as *"rhetorical justifications"* rather than an expression of *"their own theory"*? Can we really ignore the awkward fact that they never expressed *"their own theory"* and instead we have to make do with the *"rhetorical justifications"* Rees is at such pains for us to ignore?

Which shows that a major problem in discussing the failure of the Russian Revolution is the attitude of modern day Leninists. Rees presents us with another example when he asserts that *"what is required of historians, particularly Marxists, is to separate phrase from substance."* The Bolsheviks, Rees argues, were *"inclined to make a virtue of necessity, to claim that the harsh measures of the civil war were the epitome of socialism."* Indeed, he states that non-Leninists *"take Lenin or Trotsky's shouts of command in the midst of battle and portray them as considered analyses of events."* [**Op. Cit.**, p. 46]

Yet this argument is simply incredulous. After all, neither Lenin nor Trotsky could be said to be anything **but** political activists who took the time to consider events and analyse them in detail, however wrongly. Moreover, they defended their arguments in terms of Marxism. Would Rees consider Lenin's **State and Revolution** as an unimportant work? After all, this was produced in the midst of the events of 1917, in often difficult circumstances (such as when hiding from the police). If so, then why not his other, less appealing, political proclamations (never mind actions)? Moreover, looking at just a few of the works produced in this period it is clear that they are anything **but** *"shouts of command in the midst of battle."* Trotsky's **Terrorism and Communism** is a substantial book, for example. It was **not** an ad hoc comment made during a conference or *"in the midst of battle."* Quite the reverse, it was a detailed, substantial and thought-out reply to criticism by the influential German social democrat Karl Kaustky (and, before Lenin, the most respected Marxist thinker in the world). Indeed, Trotsky explicitly asks the question (*"Is there still theoretical necessity to justify revolutionary terrorism?"*) and answers yes, his *"book must serve the ends of an irreconcilable struggle against the cowardice, half-measures, and hypocrisy of Kautskianism in all countries."* [**Terrorism and Communism**, p. 9 and p. 10]

This work was circulated at the Second Congress of the Communist International along with Lenin's **'Left-wing' Communism: An Infantile Disorder**, a work still recommended by the likes of SWP in spite of its defence of party dictatorship (see section H.3.3) and so in spite of it being, presumably, *"shouts of command in the midst of battle"* rather than *"considered analyses of events"*. Significantly, Congress attendee anarchist-turned-Bolshevik Alfred Rosmer later opined that both works had *"lost none of their value"* and could *"still be profitably read today.* [**Lenin's Moscow**, p. 69]

Therefore, Rees's comments are hard to take seriously. It is even harder to do so when it becomes clear that Rees does not apply his comments consistently or logically. He does not object to quoting Lenin and Trotsky during this period when they say something he **approves** of, regardless of how badly it reflects their actions. This is hardly convincing, particularly when their "good" quotes are so at odds with their practice and their "bad" quotes so consistent with them: as Marx argued, we should judge people by what they do, **not** by what they say. This

seems a basic principle of scientific analysis and it is significant, if not surprising, that Leninists like Rees want to reject it.

Worse, as we note in section H.6.2, Bolshevik ideology played its role in the degeneration of the revolution from the start. Many — but not all — the negative developments within the Revolution were actually consistent with the vision of socialism expounded in 1917. Others were, of course, opposed to the claims made before the seizure of power but were inevitable given these very claims – not least the swift rise of a new bureaucracy (as anarchists had warned about long before October) given Marxist prejudices in favour of centralism and nationalisation. Focusing on "objective circumstances" draws attention away from this negative impact of both the Bolshevik vision of socialism which guided the policies being implemented and the policies being imposed. The assumption that these policies were not only driven by necessity but also successfully countered this necessity cannot be maintained for the policies imposed not only reflected many of the pre-1918 positions of orthodox Marxism, they had a negative impact in-so-far as they made a bad economic situation worse as well as expanding and empowering an officialdom which soon enough became a new ruling class (for further discussion see the appendix "How did Bolshevik ideology contribute to the failure of the Revolution?")

Ultimately, the theoretical problem with this position is that it denies the importance of ideas. After all, even if it where true that the **theory** of Bolshevism was different to its practice and the justifications for that practice, it would leave us with the conclusion that this **theory** was not sufficient when faced with the rigours of reality. In other words, that it is impractical — a conclusion that Leninists do not want to draw, hence the stress on "objective factors" to explain its failure.

Similarly, there seems to be an idealist tint to Leninist accounts of the Russian Revolution. They seem to portray the Lenin of 1921 as, essentially, the same person as the Lenin of 1917. That seems to violate the basic ideas of materialism. As Herbert Read points out, *"the phrase 'the dictatorship of the proletariat' ... became fatal through the interventions of two political expedients — the identification of the proletariat with the Bolshevik Party, and the use of the State as an instrument of revolution. Expedients and compromises may have been necessary for the defeat of the reactionary forces; but there is no doubt whatsoever that what took place was a progressive brutalisation of Lenin's own mind under the corrupting influence of the exercise of power."* [**A One-Man Manifesto**, p. 51] It seems common sense that if a political strategy exposes its followers to the corrupting effects of power we should factor this into any evaluation of it. Sadly, Leninists fail to do this — even worse, they attempt to whitewash the post-October Lenin (and Trotsky) by excluding the "bad" quotes which reflect their practice, a practice which they are at pains to downplay (or ignore)!

As libertarian socialist Cornelius Castoriadis noted, this pro-Bolshevik response *"teaches us nothing we could extend beyond the confines of the Russian situation in 1920. The sole conclusion to be drawn from this kind of 'analysis' is that revolutionaries should ardently hope that future revolutions break out in more advanced countries, that they should not remain isolated, and that civil wars should not in the least be devastating."* It does not explain *"why it 'degenerated' precisely in such a way that it led to the power of the bureaucracy"*, which is perhaps unsurprising for *"[i]nsofar as ideas play a role in the development of history — and, **in the final analysis**, they play an enormous role — the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy."* [**The Role of Bolshevik Ideology in the Birth of the Bureaucracy**, p. 92 and p. 104]

Then, of course, there is the attitude of the Bolshevik leaders themselves to these so-called *"shouts of command in the midst of battle."* Rather than dismiss them as irrelevant, they continued to subscribe to them years later. For example, Trotsky was still in favour of party dictatorship in the late 1930s (see section H.1.2). Looking at his justly infamous **Terrorism and Communism**, we discover him in the 1930s reiterating his support for his arguments of 1920. His preface to the 1936 French edition sees him state that the book was *"devoted to a clarification of the methods of the proletariat's revolutionary policy in our epoch."* He concluded as follows: *"Victory is conceivable only on the basis of Bolshevik methods, to the defence of which the present work is devoted."* The previous year, in his introduction to the second English edition, he was equally unrepentant. *"The British proletariat,"* he argued, *"will enter upon a period of political crisis and theoretical criticism ... The teachings of Marx and Lenin for the first time will find the masses as their audience. Such being the case, it may be also that the present book will turn out to be not without its use."* He dismissed the *"consoling illusion"* that *"the arguments of this book [were] true for backward Russia"* but *"utterly without application to advanced lands."* The *"wave of Fascist or militarised police dictatorships"* in the 1920s and 1930s was the reason. It seems ironic that Trotsky's self-proclaimed followers are now repeating the arguments of what he termed *"incurable Fabians"*, namely that arguments within it were irrelevant and not applicable in circumstances other than those it was written in. [**Terrorism and Communism**, p. xix, p. xxxv, p. xlvii and p. xxxix]

So rather than distance himself from the authoritarian and state-capitalist policies modern day Leninists claim were thrust upon an unwilling Bolshevik party by "objective factors," Trotsky defended them. This is unsurprising, given that as we noted above in section 2, Trotsky himself argues in that work that these "objective factors" would be faced in **every** revolution. As it was, he argues that it was only the *"slow development of the revolution in the West"* which stopped *"a direct passage from military Communism to a Socialistic system of production."* Rather than admit to *"illusions"* caused by the *"iron necessity"* of winning the civil war, he talks about *"those economic hopes which were bound up with the development of the world revolution."* He even links Bolshevik practice with Stalinism, noting that the *"idea of five-year plans was not only formulated in that period [1918–1920], but in some economic departments it was also technically worked out."* Indeed, in 1920 he noted how the policies he was implementing in practice and defending in theory were *"correct from the point of view both of principle and of practice"*. [**Op. Cit.**, p. xliii and p. 135]

Even his essay outlining what he considers the differences between Stalinism and Bolshevism does not see him fundamentally distancing himself from the positions modern day Leninists like to explain by "objective factors." He stated that the *"Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics."* What did that involve? Immediately before making that claim he argued that the *"Bolshevik party has shown the entire world how to carry out armed insurrection and the seizure of power. Those who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat."* Thus the *"party dictatorship"* is seen as being an example of *"Marxist politics"* being successfully applied and not something to be opposed. Moreover, *"the Bolshevik party was able to carry on its magnificent 'practical' work only because it illuminated all its steps with theory."* [*"Stalinism and Bolshevism,"* **Writings of Leon Trotsky 1936–37**, pp. 430–1]

Clearly, rather than denounce the power of the party as being against Bolshevik theory, as Rees claims, for Trotsky it represented its application. While Trotsky excuses some Bolshevik

actions (such as the banning of opposition groups) as a product of "objective factors" (such as the civil war), he clearly sees the degeneration of the revolution coming **after** the civil war and its *"correct combination"* of *"Marxist politics"* and *"military art,"* which included *"party dictatorship"* over the soviets.

This lack of distancing is to be expected. After, the idea that "objective factors" caused the degeneration of the Russian Revolution was first developed by Trotsky to explain, after his fall from power, the rise of Stalin. While **he** was head of the Soviet state no such "objective" factors seemed to be required to "explain" the party dictatorship over the working class. Indeed, quite the reverse as he argued in 1923: *"If there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party."* [**Leon Trotsky Speaks**, p. 158] In this he reflected party orthodoxy, as expressed by Zinoviev to the delegates to the Second Congress of the Communist International who were busy seeking wisdom from **Terrorism and Communism**:

> *"Today, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... [T]he dictatorship of the proletariat is at the same time the dictatorship of the Communist Party."* [**Proceedings and Documents of the Second Congress 1920**, vol. 2, pp. 151–2]

Trotsky in 1920 (and beyond!) was just stating mainstream Bolshevik ideology, echoing a statement made in March 1923 by the Central Committee (of which he and Lenin were members) to mark the 25th anniversary of the founding of the Communist Party issued long after the need for *"shouts of command in the midst of battle"*. It sums up the lessons gained from the revolution and states that *"the party of the Bolsheviks proved able to stand out fearlessly against the vacillations within its own class, vacillations which, with the slightest weakness in the vanguard, could turn into an unprecedented defeat for the proletariat."* Vacillations, of course, are expressed by workers' democracy. Little wonder the statement rejects it: *"The dictatorship of the working class finds its expression in the dictatorship of the party."* [*"To the Workers of the USSR"* in G. Zinoviev, **History of the Bolshevik Party**, p. 213, p. 214]

So, as with all the leading Bolsheviks, he considered the party dictatorship as an inevitable result of any proletarian revolution. Moreover, he did not question the social relationships within production either. One-man management held no fears for him and he considered the state-capitalist regime under himself and Lenin "socialist" and defended it as such. He was fully supportive of one-man management, going so far as to suggest in 1920 that *"if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully."* [**Terrorism and Communism**, pp. 169–70] Writing in the peace of 1923, he likewise argued that the *"system of actual one-man management must be applied in the organisation of industry from top to bottom. For leading economic organs of industry to really direct industry and to bear responsibility for its fate, it is essential for them to have authority over the selection of functionaries and their transfer and removal."* These

economic organs must *"in actual practice have full freedom of selection and appointment."* [quoted by Robert V. Daniels, **A Documentary History of Communism**, vol. 1, p. 237]

As can be seen, all of these post-civil war opinions fit in well with his civil war opinions on the matter. Now, it seems strange that rather than present what he "really" thought, Trotsky expounded what presumably was the **opposite** of it. Surely the simplist conclusion to draw is that Trotsky said what he really did think and expressed this in his so-called *"shouts of command"* made during the civil war? Can all these comments be dismissed as *"rhetorical justifications"* and not reflective of Trotsky's real ideas? Ultimately, either you subscribe to the idea that Lenin and Trotsky were able to clearly express their ideas themselves or you subscribe to the notion that they hid their "real" politics and only modern-day Leninists can determine what they, in fact, "really" meant to say and what they "really" stood for. And as for all those "awkward" quotes which express the **opposite** of the divined true faith, well, they can be ignored.

Which is, of course, hardly a convincing position to take, particularly as Lenin and Trotsky were hardly shy in justifying their authoritarian policies and expressing a distinct lack of concern over the fate of any **meaningful** working class conquest of the revolution like, say, soviet democracy. Indeed, as we note in section 3 of the appendix "Were any of the Bolshevik oppositions a real alternative?", the sad fact is that the inter-party conflicts of the 1920s were **not** about workers' democracy at all rather party democracy, as admitted in 1925 by Max Eastman, one of Trotsky's main supporters at the time, who noted that *"this programme of democracy within the party [was] called 'Workers' Democracy' by Lenin"* and that *"Trotsky merely revived this original plea."* [**Since Lenin Died**, p. 35] Ironically, Trotskyists in soviet prisons in the early 1930s *"continued to consider that 'Freedom to choose one's party – that is Menshevism'"* and this was their *"final verdict."* [Ante Ciliga, **The Russian Enigma**, p. 280] No wonder they seemed surprised to be there!

Ultimately, Trotsky's issue with Stalinism was not based on **real** socialist principles, such as meaningful working class freedoms and power. Rather it was a case of *"the political centre of gravity ha[ving] shifted from the proletarian vanguard to the bureaucracy"* and this caused *"the party"* to change *"its social structure as well as in its ideology."* [*"Stalinism and Bolshevism,"* **Writings of Leon Trotsky 1936–37**, p. 422] The party dictatorship had been replaced by the dictatorship of the state bureaucracy, in other words. Once this happened, Trotsky sought to explain it. As analysing the impact of Bolshevik ideology and practice were, by definition, out of the question given his role in formulating and imposing it, that left the various "objective factors" Trotsky turned to in order to explain developments after 1923, to explain Stalinism while keeping true to Bolshevik ideology **and** practice.

This legacy shows itself with those who repeated it afterwards. Trotsky's limited critique explains why, to quote Chris Harman (another member of the British SWP), Trotsky *"continued to his death to harbour the illusion that somehow, despite the lack of workers' democracy, Russia was a 'workers' state.'"* Simply put, there had been no workers' democracy under Lenin and Trotsky and he considered that regime a *"workers' state"* so why should this be a key criteria for evaluating Stalinism? The question arises why **Harman** thought that Lenin's Russia was some kind of "workers' state" if workers' democracy is the criteria by which such things are to be judged. But, then again, he thinks Trotsky's **Left Opposition** *"framed a policy along [the] lines"* of *"returning to genuine workers' democracy"*! [**Bureaucracy and Revolution in Eastern Europe**, p. 20 and p. 19] This also undermines the SWP's "Stalinism was state-capitalism" position (it must be

stressed, as noted in section H.3.13, this is **not** the same as the anarchist analysis, even if the conclusions are the same). As orthodox Trotskyist Ted Grant summarised in 1949:

> *"If Comrade Cliff's thesis is correct, that state capitalism exists in Russia today [under Stalin], then he cannot avoid the conclusion that state capitalism has been in existence since the Russian Revolution and the function of the revolution itself was to introduce this state capitalist system of society. For despite his tortuous efforts to draw a line between the economic basis of Russian society before the year 1928 and after, the economic basis of Russian society has in fact remained unchanged."* [*"Against the Theory of State Capitalism: Reply to Comrade Cliff,"* **The Unbroken Thread**, p. 199]

Indeed! Although Grant was wrong to view Stalin's Russia as a *"degenerated workers' state"* rather that reject Bolshevism for introducing state-capitalism and party dictatorship in Russia, the fact is that in terms of **social relations** he is correct — Russia **was** state-capitalist under Lenin and Trotsky. The awkward fact is that the Russian working class was expropriated both politically and economically in the first few months. A new State — with its own bureaucracy and armed forces separate from the masses — was emerging by January 1918, with the elimination of democracy within the armed forces and workplaces imposed by March and April of that year. This process was in place before "objective factors" like civil war started or had a significant impact — which undoubtedly explains why the Bolsheviks at the time did **not** justify their policies in those terms, why Lenin in November 1919 stated that the *"organisation of the communist activity of the proletariat and the entire policy of the Communists have now acquired a final, lasting form; I am certain that we are on the right path and that progress along that path is fully ensured."* [**Collected Works**, vol. 30, p. 144]

The major problem for Trotskyists of all kinds is that all the characteristics which they claim differentiate Bolshevism and Stalinism were all applied under Lenin and Trotsky. So, while most neo-Trotskyists like to proclaim that socialism **has** to be politically and economically democratic to qualify as socialist in order to exclude Stalinism from Marxism, the awkward fact is that these same parties also consider Lenin's regime post-1917 as socialist in spite of it being a party dictatorship politically and state-capitalist economically: apparently, socialism need not be democratic after all.

For anarchists, however, the regime confirmed the *"belief that a revolution **à la Bakunin** would have brought more constructive results, if not immediate anarchism ... the Russian Revolution had been **à la Bakunin**, but it had since been transformed **à la Karl Marx**. That seemed to be the real trouble. I had not been naïve enough to expect anarchism to rise phoenix-like from the ashes of the old. But I did hope that the masses, who had made the Revolution, would also have the chance to direct its course."* [Emma Goldman, **Living My Life**, vol. 2, p. 826] As Kropotkin summarised, we *"have always pointed out the effects of Marxism in action. Why be surprised now?"* In short, it was the case of *"a small political party which by its false theories, blunders, and inefficiency has demonstrated how revolutions must **not** be made."* [quoted by Emma Goldman, **My Disillusionment in Russia**, p. 36 and p. 98]

So, in summary, the leading Bolsheviks did not view "objective factors" as explaining the failure of the revolution. Indeed, until Trotsky was squeezed out of power they did not think that the revolution **had** failed: party dictatorship and one-man management were considered as expressions of a successful revolution. Trotsky's issue with Stalinism was simply that the bureaucracy

had replaced the *"the proletarian vanguard"* (i.e. himself and his followers) as the dominant force in the Soviet State and it had started to use the techniques of political repression developed against opposition parties and groups against him. The idea that "objective factors" caused the failure of the revolution was not used to explain the party dictatorship but rather the usurpation of **its** power by the bureaucracy. Its subsequent use by both orthodox and neo-Trotskyists to rationalise Leninist policies do not address the fundamental issue of **why** the revolution failed as it, as we discuss in the next section, exists to **exclude** the impact of Bolshevik ideology in that process. Ultimately, it is unconvincing when placed in the wider context of Leninist ideology before, during and after the civil war.

7 What role does "objective factors" play in Leninist ideology?

As we discuss in the appendix on "How did Bolshevik ideology contribute to the failure of the Revolution?", Marxist ideology played a key role in the degeneration of the revolution and in laying the groundwork for the rise of Stalinism. However, this is a conclusion which no Leninist could entertain for a moment and this explains the popularity of "objective factors" within these cirlces — for its role is to obscure this key factor in the failure of the revolution. Kropotkin stated the obvious, namely that the problems were increased but not created by the counter-revolution and other "objective factors":

> *"The evils naturally inherent in party dictatorship have thus been increased by the war conditions under which this party maintained itself. The state of war has been an excuse for strengthening the dictatorial methods of the party, as well as its tendency to centralise every detail of life in the hands of the Government, with the result that immense branches of the usual activities of the nation have been brought to a standstill. The natural evils of State Communism are thus increased tenfold under the excuse that all misfortunes of our life are due to the intervention of foreigners."* [**Direct Struggle Against Capital**, p. 488]

So the stressing of "objective factors" is hardly accidental for it shifts perspectives away from Bolshevik ideology and its flaws. It ensures that any Leninist defence of Bolshevism based purely on stressing "objective factors" results in the conclusion that Bolshevik ideology played **no role** in the decisions made by the party leaders, that they simply operated on autopilot from October 1917 onwards. As Samuel Farber puts it *"determinism's characteristic and systemic failure is to understand that what the masses of people do and think politically is as much part of the process determining the outcome of history as are the objective obstacles that most definitely limit peoples' choices."* [**Before Stalinism**, p. 198] This is particularly the case when, as in Bolshevik Russia, "the masses of people" have had their revolution expropriated from them and placed into the hands of a few leaders at the top of a centralised, hierarchical social structure which combines political and economic decision making and power.

For anarchists, "objective factors" and "ideology" are interwoven — ideas reflect the social conditions in which they develop but how people react to events are influenced by the ideas in their heads and these are also influenced by "ideologically correct" sources from the past. The decisions made by those in power impact on the objective circumstances – making them better or worse depending on their suitability to address the issues. Social structures create specific social

relations, and so an ideological prejudice in favour of, say, centralisation results in the building of specific forms of social organisation which, in turn, quickly become objective factors. Similarly, concentrating power into a few hands automatically limits the options and knowledge available to solve the problems, as Malatesta noted long before 1918:

> *"Social action [...] is the resultant of initiatives, thoughts and actions of all individuals who make up society; a resultant which, all other things being equal, is greater or smaller depending on whether individual forces are directed to a common objective or are divided or antagonistic. And if instead, as do the authoritarians, one means government action when one talks of social action, then this is still the resultant of individual forces, but only of those individuals who form the government or who by reason of their position can influence the policy of the government. [...] Even if we pursue our hypothesis of the ideal government of the authoritarian socialists, it follows from what we have said that far from resulting in an increase in the productive, organising and protective forces in society, it would greatly reduce them, limiting initiative to a few, and giving them the right to do everything without, of course, being able to provide them with the gift of being all-knowing."* [**Anarchy**, pp. 38–9]

In short, when a few hold political, economic and social power and are ruling in the name of the working class then the impact of ideology becomes correspondingly concentrated. Unsurprisingly, rather than just select policies at random the Bolshevik leadership pursued consistently before, during and after the civil war policies which reflected their ideology. There was a preference for policies which centralised power in the hands of a few (politically **and** economically), that saw socialism as being defined by nationalisation rather than self-management, that considered bigger as inherently better, that stressed that role and power of the vanguard above that of the working class, that saw class consciousness as being determined by how much a worker agreed with the party leadership rather than whether it expressed the actual needs and interests of the class as a whole.

By stressing just one aspect of the matter, the "objective," Leninists ensure that the other, the "subjective," is ignored and so ensure a flawed analysis of the revolution and lessons to be learned from it. Indeed, what could be learned? Only that any future revolution should occur in an advanced capitalist nation, avoid isolation, civil war and so on. Thus Bolshevik ideology can be uncritically embraced for, ultimately, it has never been applied!

Yet Bolshevism itself undermined the socialist potential of the revolution, irrespective of the actual circumstances involved (which, to some degree, will affect **any** revolution). For example, the Bolshevik preference for centralisation and nationalisation would negatively affect a revolution conducted in even the best circumstances, as would the seizure of state power rather than its destruction. Only the elimination of what makes Bolshevism Bolshevik would ensure that a revolution would be successful. So anarchists stress that rather than being forced upon them by "objective factors" many of these policies were, in fact, in line with pre-civil war Bolshevik ideas. The Bolshevik vision of socialism, in other words, ensured that they smothered the (libertarian) socialist tendencies and institutions that existed at the time. As Chomsky summarises, *"Lenin and Trotsky, shortly after seizing state power in 1917, moved to dismantle organs of popular control, including factory committees and Soviets, thus proceeding to deter and overcome socialist tendencies."* [**Deterring Democracy**, p. 361] That they **thought** their system of state capitalism

was a form of "socialism" is irrelevant — they systematically combated (real) socialist tendencies in favour of state capitalist ones and did so knowingly and deliberately (see sections H.3.1 and H.3.13 on the differences between real socialism and Marxism in its Bolshevik mode and section H.6 on Bolshevik practice itself).
